THE ILLUSTRATED LONDON NEWS

VOL. 17.

JULY TO DEC. 1850.

LONDON:
WILLIAM LITTLE, 198, STRAND.

CHRONOLOGY OF REMARKABLE EVENTS.

JUNE 29, 1850, TO DECEMBER 31, 1850.

JUNE.

29.—Her Majesty's steam-sloop, *Medea*, arrived at Plymouth, having the celebrated Koh-i-Noor diamond on board. —Mr. Green's Nassau balloon dropped into the water between Gravesend and the Nore: the aëronauts with difficulty extricated.—Sir Robert Peel thrown from his horse in St. James's Park.—About forty feet of the Table Rock, Niagara Falls, gave way.—Designs selected for the reverses of Exhibition Prize Medals, by the commissioners appointed.

JULY.

1.—Second annual Scottish *Ale* in Lord Holland's Park.—Four slaves captured on the coast of Brazil, by H.M. steam-frigate *Cormorant*, which afterwards destroyed the fort of Paranagua, for firing on her.

2.—Sir R. Peel died, in the 62d year of his age.

3.—Lord Petre died.

4.—The anniversary of American Independence celebrated throughout the Union.

5.—Mr. Cayley's motion for a repeal of the Malt-tax lost in the Commons.—Robert Pate committed for trial for striking the Queen on the face with a cane.

7.—M. Poitevin made a balloon ascent, seated on a horse attached to the car, from the Champ de Mars, Paris.

8.—Duke of Cambridge died.

9.—Sir Robert Peel buried, in Drayton Bassett Church.—Mr. Locke's motion on the Postal Disarrangements lost in the Commons, by a majority of 83.—General Taylor, President of the United States, died.—Great fire in Philadelphia: 367 houses destroyed; 22 persons killed, and about 90 more or less wounded: loss about a million dollars.—Gunpowder explosion at Dinapore, on the Ganges: 91 boats destroyed.

10.—Count de Montemolin married to the Princess Caroline of Naples.—Mr. Fillmore sworn in President of the United States of America.

11.—Robert Pate tried for assaulting the Queen, and sentenced to seven years' transportation.—Law passed in the French National Assembly, compelling the attaching the names of their writers to the articles in newspapers.—Terrific hurricane on this and following day in the West Indies: vast deal of property destroyed, and many ships lost.—Brazilian slave brigantine *Julia* captured by H.M.S. *Sharpshooter*.

12.—Queen Isabella of Spain delivered of a son, who died a few minutes afterwards.—Walter Watts, formerly lessee of Marylebone Theatre, and Donovan, an ex-pugilist, committed suicide in Newgate, shortly after having received their respective sentences.

13. General Taylor, President of the United States, buried.

15.—News of the Cuban Government having resolved to release their American prisoners.—Violent shock of earthquake at Delhi.—The second reading of the Attorneys' Certificates Bill carried in the Commons by a majority against the Government of 17.—News of the Holstein army having taken possession of Eckernförde.—Senora Martinez (the "Black Malibran") appeared at Her Majesty's Theatre.

16.—Terrific thunderstorm in Lancashire; several persons killed.—Duke of Cambridge buried at Kew.—Sir J. Jervis sworn in as Lord Chief Justice of Common Pleas.—Mrs. Glover, the celebrated actress, died.—New Church of St. John the Evangelist, at Great Stanmore, consecrated.

17.—Sir T. Wilde (Lord Truro) took his seat as Lord Chancellor.—News of a great fire at San Francisco, on the 4th of May: 400 buildings burnt.—Large water-spout appeared at New Galloway, Scotland.

18.—Grand banquet, at Exeter, of the Royal Agricultural Society: upwards of 1200 sat down.

19.—£12,000 per annum, voted for the present Duke of Cambridge.

20.—Influential meeting at the Mansion House respecting a Peel Memorial.—Grand banquet to Lord Palmerston at the Reform Club.

21.—Montes, the Spanish *Matador*, seriously wounded at a bull-fight, by his bovine antagonist.

22.—Mr. H. Bell made an ascent from Vauxhall Gardens in his "patent aërial machine," which the inventor stated was capable of being guided through the air; but the result was anything but satisfactory.—The *Red Rover* steam-boat exploded at Bristol: 10 persons killed, and many were frightfully wounded.—Mr. C. E. Stanley elected M.P. for Chester.

23.—Explosion of fire-damp in a coal-pit at Commonside, near Glasgow: nineteen persons killed.—Meeting of the aristocracy at Willis's Rooms respecting a memorial to Sir R. Peel.—Grand meeting of the High Church party (opposed to Mr. Gorham) at St. Martin's Hall, Long-acre.

24.—Tercentenary celebration of the Dutch and French Protestant Churches in London.

25.—Halévy's "Juive" produced at the Royal Italian Opera.—Last tube of the Britannia-bridge floated.—Dr. Fulford consecrated Bishop of Montreal at Westminster Abbey.—Great battle at Idstedt: the Schleswig-Holsteiners compelled to retire, after fighting obstinately for eleven hours. The Danes had to lament the loss of General Schleppegrell.—Cholera raging in St. Louis and Cincinnati (U. S.); 20 to 60 deaths a day in each city.

26.—Mr. W. O. Stanley took his seat as M.P. for Chester. —Baron Rothschild appeared at the bar of the House of Commons, and desired to be sworn on the Old Testament. He was desired to withdraw, when a discussion ensued, which was adjourned to the next Monday.—Great fire at Poole: loss about £40,000.

27.—The number of inmates in the Irish Union houses in the week ended this day was 235,793; persons receiving out-door relief, 101,486.

28.—A. Mrs. Harper drowned near Vauxhall; she had been married but a few hours previously.

29.—Mr. Hume's motion, that Baron Rothschild be sworn on the Old Testament, carried by a majority of 54.—Mercantile Marine Bill passed.—Richard Marsh completed his walk of 1000 miles in 1000 hours, at Sheffield.—Explosion in a gunpowder manufactory at Etterstad, Norway: eight persons killed.

30.—Sir R. Peel (son of the late Sir Robert) took his seat as M.P. for Tamworth.—Stormy debate in the Commons on Baron Rothschild's claim.—Destructive fire at Parkhurst Prison, wilfully caused by some of the prisoners.—The Great Exhibition Building commenced in Hyde-Park.—Plymouth Royal Botanic Gardens opened.—A cotton mill fell at Stockport, killing eleven persons.

31.—The British Association met at Edinburgh.

AUGUST.

1.—The Goodwood Cup won by Canezon.—Collision on the Edinburgh and Glasgow Railway; three persons killed.—Aged Freemasons' Asylum, Croydon, opened.

2.—News of Garibaldi, the Roman exile, having arrived at New York.

3.—News of a series of earthquakes at Amboyna: the shocks occurred at intervals during nine days, committing frightful ravages.

4.—1400 Parisian excursionists arrived in London by the South-Eastern Railway.

LONDON: Printed and Published at the office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by WILLIAM LITTLE, 198, Strand, aforesaid.—SATURDAY, JANUARY 11, 1851.—SUPPLEMENT.—GRATIS

THE ILLUSTRATED LONDON NEWS

No. 434.—VOL. XVII.] FOR THE WEEK ENDING SATURDAY, JULY 6, 1850. TWO NUMBERS, 1s. WITH SUPPLEMENT GRATIS.

THE DEATH OF SIR ROBERT PEEL.

THE country has lost its greatest statesman, under circumstances the most melancholy and deplorable. In the noon-time of his fame, in the ripe vigour of his intellect, and while, to all outward appearance, he stood upon the calm hill-top of a long and brilliant life, and looked complacently toward the serene evening of a day in which there was still much work that he could do, Sir Robert Peel has been snatched from his countrymen by a sudden and shocking death. His loss is regarded by millions as a national, and by many thousands as a private and personal calamity. It has administered a shock to the feelings of all classes of the people which will not speedily subside, and has read the world a deeply-impressive and most mournful lesson on the instability of human power and greatness, and on the transitory nature of all the blessings which men most enthusiastically prize, and most ardently struggle for. In the remembrance of his services and his fate we may well exclaim—

> Could not the grave forget thee, and lay low
> Some less majestic, less beloved head?
> Those who weep not for Kings shall weep for thee,
> And Freedom's heart grow heavy at thy loss.

It is too soon to attempt to do full justice to the genius and character of a man who played so great and often so thankless a part in the history of his country. But, notwithstanding all the animosities which some of his greatest measures excited during his useful and remarkable career—animosities which had by no means subsided when the rude hand of calamity deprived the nation of his warning voice and his directing hand — his contemporaries are not blind to the eminent virtues of his character, to the greatness and purity of his aims, and to the immense influence of his opinions and acts upon the present and future destinies of Great Britain. Even those who raised the loudest outcry against him for abandoning his party on more than one occasion, admit, now that his ear is deaf to popular censure as to popular applause, his personal integrity, and the greatness of the sacrifices which he made from a sense of imperative duty. Enmity sleeps in his untimely grave; and a halo of affectionate interest, which might not otherwise have surrounded his name, has gathered upon it, now that he has been so suddenly removed from the Senate which he swayed, and from the society which he adorned. Opinions will still differ upon the tendency of his measures—more especially of the last; and many politicians will not cease to condemn the statesman for his acts, though they may think more kindly of the man than if he had been still a gladiator in his old arena. All bitter feeling against the individual will be allayed;—for who can look down upon such a grave "without a compunctious throb" that he should ever have imputed base and unworthy motives to one so gifted, so sagacious, and so unfortunate?

We shall not attempt in this place to recapitulate the events of his career. They will be found amply recorded in another portion of our Journal. On all the great questions of his time, that of the currency alone excepted, Sir Robert Peel had the misfortune in early life to be implicated with a losing party before his judgment was matured. Hence, when placed in the high position of a minister, and swayed to one direction by party ties, and by the ghost of his own consistency; and to another by the unanswerable convictions of his extended experience, he encountered the obloquy of the friends he left, without receiving the gratitude of those of whose measures he became the supporter. But on those great occasions of his life—the passing of the act for the Emancipation of the Roman Catholics, and his complete conversion to the principles of Free-Trade, he avowed, in the most manly, open and honest manner, the change that had come over him, and the causes which had wrought it:—"I have," said he, in 1829, "for years attempted to maintain the exclusion of Roman Catholics from Parliament and the high offices of the state. I do not think it was an unnatural or an unreasonable struggle. I resign it in consequence of the conviction that it can no longer be advantageously maintained, from believing that there are not adequate materials or sufficient instruments for its effectual and permanent continuance. I yield, therefore, to a moral necessity which I cannot control, being unwilling to push resistance to a point which might endanger the establishments that I wish to defend." On the question of the Corn-laws, while his career was painfully similar, his opinions underwent a more complete change. His conversion was, perhaps, more thorough, because it was more gradual; and when *he* yielded to adverse argument, the last impediment in the way of Free-Trade was removed. Moral conviction placed him under the moral necessity of acting as it dictated, and he obeyed its command at a greater sacrifice of friendship, and of all the ties that men are accustomed to hold dear, than was ever made by any other statesman of whom our history makes mention. Throughout his career, he may be said to have acted the pre-eminently useful part of a breakwater against the sweeping storms of democratic change. The men who commenced the struggle for Catholic Emancipation and for the repeal of the Corn-laws were men before their time; and, had those great questions been carried without the opposition which they encountered, they might, perhaps, have been carried in vain, or carried only to be re-enacted. His resistance ripened public opinion and his own; and when both had simultaneously arrived at maturity, he yielded at the very moment when to yield was to conquer. His wise resistance until the point when resistance became foolish, and his wise concession when not to have conceded would have been perilous or fatal, enabled him to do for those great causes what their professed friends would never have done without his aid. Whilst his political opponents were too often mere men of theory, he was the man, not of theory, but of practice—a man who was sometimes upon a wrong track, but who always steadily kept marching towards a right one—a man who was always pressing forward, but never too hastily—and who never once, in any change of opinion, changed without long, patient, earnest, and honest consideration. No man knew better than Sir Robert Peel how vain, evanescent, and worthless a thing was the applause of the mob. Yet no man more ardently longed for applause than he did. But he looked far beyond the loud voices and the clapping hands of to-day. He looked, like "mighty Verulam," to foreign nations and to posterity, to confirm the verdict of his own time, if it should happen to be favourable; or to reverse it, if it should happen to be against him. As regards foreign nations, his wish was abundantly gratified before he died. His was the name that represented alike the common-sense, the business-tact, and the enlightened statesmanship of England. Europe rang with his fame; and nations who never heard of his rivals or his enemies, were familiar with his actions and respected England in his person. But this, however gratifying, was not sufficient to an intellect and an ambition like his. A fair page in his country's history was the dearest object of his life; and though we, his contemporaries, living amid the heat and dust of the conflicts in which he was engaged, are neither enabled nor entitled to speak for those who shall come after us, we do not run any great risk of committing an error when we assert, that the unborn historian, who shall write the full and impartial history of the first half of the nineteenth century in Great Britain, will find in civil life no purer or higher reputation to identify with it, than that of Sir Robert Peel.

A word upon his private virtues may be expected from us. Though apparently cold to those who did not know him, his heart was warm and affectionate. He was a kind friend, and an unostentatious but liberal patron of merit, in whatever walk of intellectual eminence it was displayed. Misery never sued to him in vain; and his conduct towards a suffering artist—which startled the world with admiration when it was accidentally made known—was but one instance out of a thousand in which his generosity and kindliness of heart were exerted in behalf of the unfortunate and the struggling. A judicious patron of literature and the arts, an exemplary citizen, a wise statesman, an elegant scholar, and a good and humane man, unsullied in his life and morals—such, in few words, is the character of Sir Robert Peel. There are many bright names on the page of English history. There can be no doubt that his will appear among them, and that it will do no discredit to the glorious confraternity.

Robert Peel

FOREIGN AND COLONIAL NEWS.

FRANCE.

The accounts from Paris this week are wholly devoid of interest.

Sir R. Peel's death was received with the deepest feelings of sorrow by all classes.

Dissensions among the Legitimists increase, and it is believed that they will offer a formidable opposition to several measures which are about to be brought in by the Government.

M. Gros, the Minister Plenipotentiary from France to Greece, has been raised to the rank of Commander in the National Order of the Legion of Honour.

The Opposition press continues to indulge in a tone of the most bitter hostility to the President of the Republic. The *Ordre* and the *Assemblée Nationale* affirm that the most ambitious designs are meditated by the friends of Louis Napoleon.

The director of the *National* was sentenced by the Police Court of Paris, on Tuesday, to imprisonment for three months, and to pay a fine of 200 francs, for having announced a subscription to pay a fine imposed on a Socialist journal.

The presidents and secretaries of the standing committees of the National Assembly were nominated on Tuesday. They are all Conservatives.

PORTUGAL.

We have accounts from Lisbon of the 26th ult., which are principally occupied with the long-standing claims, amounting to 350,000 dollars, of the American Government upon the Portuguese Cabinet. The latter refused to acknowledge them to the extent made, in consequence of which Mr. Clay, the Chargé d'Affaires from the United States, insisted upon the demands being complied with in the course of 20 days, or he should demand his passports, and the American squadron would be ordered to make reprisals. Lord Palmerston has also put in claims on the part of Great Britain, connected with the outfit of Don Pedro's expedition in 1832. His Lordship likewise insists upon the faithful execution of the treaty of commerce so long violated in the imposition of a differential export duty on port wine.

GERMAN STATES.

Accounts from Berlin state that it was reported in well-informed circles that peace had been concluded between Prussia and Denmark, on the basis of an ultimatum of M. de Vredom. The details of the treaty were not known.

From Stuttgard, under date 26th ult., we learn that the Chamber of Representatives having voted the impeachment of ministers, the latter deemed it prudent to resign, which resignation was accepted by the King. The trial, therefore, will not take place.

The *Presse* of Brunn announces that the Emperor Nicholas of Russia will abdicate on the 4th of December next, in favour of his son, the Cesarewitch, heir to the throne!!

The new Wirtemberg Ministry is as follows:—Interior, Linden; Police, Plissen; Foriga, Reinhard; Finance, Knoppe; War, Muller; Worship, Kummer.

INDIA.

We have some further accounts from India this week. A terrible calamity, at Benares, by which upwards of one thousand persons lost their lives from the explosion of magazine-boats loaded with gunpowder (Illustrated at page 16), forms the chief topic of the present mail.

Doctor Butter and Captain Fagan, formerly directors of the Benares Bank, have been tried by court-martial and dismissed the service. The charges against them were that they had induced parties to purchase stock by representing the bank as flourishing, when they knew it to be the reverse. The result of misconduct such as this has been the ruin of the shareholders of the bank, and the sentence seems not more severe than is deserved. The Commander-in-Chief rebuked the Court, and refused their recommendation to mercy.

Colonel Grant has resigned the appointment of Adjutant-General of the Bengal army, and been succeeded by Colonel Tucker, a young but able and eminently popular officer.

India is tranquil throughout. The Affredees have lately behaved peaceably, and appear anxious for an accommodation. The Supreme Government is understood to have rescinded its orders respecting the working of the salt mines at Kohat, which had occasioned the disaffection of the Affredees and Wuzarees, and rendered those tribes accessible to the intrigues of Dhost Mahomed. The hill tribes have, therefore, succeeded in compelling the adoption of Free-Trade principles as respects salt.

CANADA.

From Canada we have no political intelligence worth recording. Two dreadful fires had occurred; one on board the steam-ship *Griffith*, trading between Buffalo and Toledo, which was burnt on Lake Erie on the 16th ult. Two hundred and fifty lives were lost on the occasion. The second fire was at Montreal on Saturday evening, the 15th ult. The flames spread with great rapidity, and were subdued only by the strenuous exertions of the firemen. Among the buildings destroyed were St. Ann's Church, and a number of valuable private dwellings. One or two women perished in the flames.

UNITED STATES.

We have news this week from New York to the 19th ult. There has been very little progress made in Congress on the Slavery Compromise Report. No division has taken place. The health of Mr. Clay gives some uneasiness to his friends.

The Cuban invasion has lost its interest. The Spanish authorities have wisely resolved upon pursuing a mild policy with regard to the rebels who have fallen into their hands. They have all been released, and will, no doubt, be tried by the tribunals of the United States. The decision thus arrived at has given much satisfaction to the commercial world, and to the supporters of General Taylor's non-intervention policy. The islanders who assisted in expelling the invaders were being liberally and honourably remunerated for their efforts.

The Supreme Court of Massachusetts has delivered its opinion on the petition of Professor Webster, for a writ of error. The judges have unanimously dismissing the petition, being of opinion that every form necessary to constitute a legal trial had been complied with. The Governor and Council are now in session, but it is not known whether they will consider the case immediately, or at the session to be held in July.

Edwin Forest, the American actor, has made his appearance before the public in the new character of a "bully." Accompanied by one or two companions, he lately met Nathaniel P. Willis, the editor and author, in Washington-square, New York. Willis was knocked down by Forest from behind, and then beaten by him with a whip of gutta percha. He was thoroughly thrashed, and declared that as Willis said he would bring no charge there against Forest, they were each bound over to keep the peace. The assault was connected with the controversy on the subject of the divorce case between Forest and his wife (late Miss Sinclair, of England), daughter of Sinclair the vocalist.

WEST INDIES.

The West India mail has brought papers from Jamaica of June 7; Demerara, June 5; Trinidad, June 7; Barbadoes, June 9; and Antigua, June 10. The political news possesses no interest. The sugar crop, it was estimated, would be 19,000 hogsheads less than last year. Drought has been the cause of this deficiency.

Incendiary fires, we regret to notice, were of frequent occurrence in Jamaica, particularly on the north side of the island.

Two extraordinary dwarfs were exhibited in Kingston. They are natives of San Salvadore, in Central America. They weigh together 33 pounds—the male 19, the female 14. Many hundred persons had crowded to see them.

The island remained perfectly healthy.

CAPE OF GOOD HOPE.

We have news to May 19th from the Cape. It conveys the assurance that, notwithstanding the excitement and dissatisfaction which recently prevailed on the convict question, the concession by the Government to the colonists of a Legislative Council has restored confidence, and created a lively satisfaction amongst all ranks.

Her Majesty's troop ship *Apollo*, with the 95th on board for England, had arrived at the Cape a few days prior to the above date. A sad tale has to be told of them. Dysentery was prevalent amongst them, and 47 died on the passage from Hong Kong. Numbers were in the hospital at the Cape, and the rest were quartered in humble lodgings in the naval yard at Simon's Town.

An amusing scene was lately witnessed in Boston, U.S., on the occasion of Mr. Gliddon, the lecturer on Egypt, having unrolled a mummy. Mr. Gliddon translated inscriptions, dwelt with much unction on the process of embalming, and on the presumed condition and character of the deceased when in life, describing the mummy as that of a priestess, as shown by vestments, inscriptions, and other unmistakable signs; and, to do Mr. Gliddon justice, he produced a solemn, deep, and absorbing interest, a profound attention and contemplation in a very large and intellectual audience. But, alas! for the errors of science and antiquarianism! In the midst of the grave impression produced by the unrolling of the mummy, and the learned lessons of the mortal part of the idol priestess, and the (to the imagination) actual and shadowy presence of phantom gods and goddesses—of Isis and Osiris—a medical man present declared, from more unmistakable signs than any referred to by Mr. Gliddon, that the priestess was a man! Imagine the uproar, the laughter, the disappointment, and the exclamations. Some wag explained that there must have been an error all through the business—that the body entombed was not an Egyptian at all, but the mortal remains of a noble Roman, who accompanied Mark Antony into Egypt, and who was named "Spurius Mummius."

The will of the late Henry Robinson Hartley, Esq., has just been proved in Doctors' Commons, and the property sworn under £99,000, the interest of the greater part of which princely sum will eventually come into the hands of the corporation of Southampton, for the promotion of literary and scientific purposes.

The grounds of the Brighton Pavilion, recently purchased of the Woods and Forests by the commissioners of Brighton, under powers conferred on them by an act of the present parliament, have been opened to the public.

Workmen have removed the massive iron gates at St. Paul's Cathedral facing Ludgate-hill, not, however, it is stated, for the purpose of carrying out the projected improvements, but for repair, and new foundation-stones are being laid down.

A parliamentary paper has just been printed, showing the number of parliamentary electors in Great Britain and Ireland, according to the registration of 1848-49 and 1849-50. In 1848-49 the total number was 1,041,203, whilst in 1849-50 the number was 1,030,187, in the United Kingdom. In England, on the present registration, the number of voters is 839,797, and in Wales 48,019; in Scotland, 90,305; making the total of Great Britain, 978,121, and in Ireland, 72,066; making the total in counties, cities, and boroughs, 1,050,187.

CHESS.

TO CORRESPONDENTS.

J G S, Nottingham—1. The King at Chess can never be taken. 2. When a player gives check to his adversary's King, he is bound to cry "Check!"

JUVENTUS—It requires remodelling, as the Black Bishop at present is in an impossible situation.

CROCUS—You have placed two pieces on one square, which is an innovation few players will be disposed to tolerate.

H M—We shall be glad to see some future specimens; these sent, though ingenious, are too easy.

A E A—The "triple manœuvre" of your Madras Brahmin was in strict accordance, we believe, with the rules of Chess in the East. Did you record any of the games wherein it occurred?

W G, Beverley—The two last are a decided advance on your previous efforts, and shall have a place shortly.

M G, ——— Yacht, Cowes—The want complained of no longer exists. A Chess-Club, under the promising direction of the veteran Harry Wilson, has just been established at Ryde, in the Isle of Wight, and is destined, if we mistake not, at no distant date to rank, both in numbers and skill, with the most successful of the kind in the country. We are not in possession of the Regulations, list of Members, &c.; but these, with full particulars, may be obtained by addressing a note to the Honorary Secretary and Treasurer, Captain Hathorne, R.N., Spring Vale, near Ryde

HERR R, Stuttgart—A private communication has been forwarded

C M J—We are sorry to say both your own Problem, and the Solution of Herr Ries, are defective

G F S—Next week, if possible. In the meanwhile, we shall be glad to receive a companion game between the same competitors

G D C—Very promising, indeed. It shall have a corner anon

R H G—Many thanks for the end game (No. 33), certainly the most elegant and subtle of any with which you favoured us

SIGMA—You may obtain the "Chess-Player's Text-Book" at Louchars, in Piccadilly. The price is 3s.

R H J—In the letter from the Secretary of the Northumberland Chess Club, in the current number of the *Chess-Players' Chronicle*, the passage at page 213, "was in the proportion of 5 to 22," should be "was in the proportion of 5 to 272"

A T R is mistaken

SOLUTIONS, by H, A D, Louvain; M P, Simple Simon, Thurnscoe, Reboot, Dr. Field, Juventus, H W, Oxford; L W D, Q, Percy, Regular Reader, A C, K, Yarmouth; Crocus, Orion, R D M, C A B H F, R F, Rosmarinet, Bath Duo, Holus, J A W, E H G, M E A, R S C, J P, Hyde; Bellamy, K E, Stuttgard; H L, C S, Romford Club; W S, W A W, are correct. All others are wrong

*** Any Amateur desirous of playing a Game by Correspondence may hear of an opponent by applying to ALPHA, Hill, Langport, Somerset.

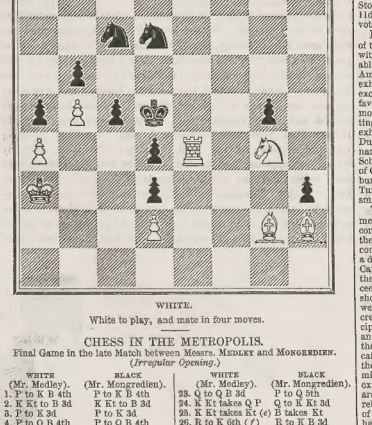
By Mr. EICHSTADT ("Berliner Schachzeitung").

BLACK.



WHITE.

White to play, and mate in four moves.

CHESS IN THE METROPOLIS.

Final Game in the late Match between Messrs. MEDLEY and MONGREDIEN.

(Irregular Opening.)

WHITE (Mr. Medley).	BLACK (Mr. Mongredien).	WHITE (Mr. Medley).	BLACK (Mr. Mongredien).
1. P to K B 4th	P to K B 4th	23. Q to Q B 3d	P to Q 7th
2. K Kt to B 3d	K Kt to B 3d	24. K Kt takes Q P	Q to K Kt 3d
3. P to K 3d	P to K 3d	25. K Kt takes Kt *(c)*	B takes Kt
4. P to Q B 4th	P to Q B 4th	26. R to K 6th *(f)*	R to K B 3d
5. Q Kt to B 3d	P to Q R 3d	27. B takes P	Q to K B 2d
6. P to Q Kt 3d	B to Q 3d	28. R takes B	R takes R
7. P to Q 3d	Castles	29. B to K 4th	Q R to Q sq
8. Castles	Q Kt to B 3d	30. B takes K R	R to Q 8th (ch)
9. Q B to Q Kt 2d	B to Q B 2d	31. K to B 2d	B takes K B P
10. Q R to B sq	P to Q Kt 3d	32. K to K 3d *(g)*	R to Q 7th (ch)
11. K B to Q Kt sq	P to Q 4th	33. K to K sq	Q to K 2d (ch)
12. Q Kt to K 2d	Kt to K 6th	34. K to B sq	R to Q 8th (ch)
13. P to Q 3d	Kt to K B 3d	35. K to B 2d	B takes Kt (ch)
14. Q Kt to K Kt 3d	Kt to K Kt 6th	36. P takes B	Q to K Kt 4th
15. Q to Q 2d	P to Q 5th	37. K to K 2d	R to K R 8th
16. P takes P	P takes P	38. Q to K 5th	Q to K Kt 3d
17. Q R to K sq *(a)*	Kt to K 6th	39. B to K 4th	Q to K Kt 4th (ch)
18. R takes Kt	P takes R *(b)*	40. Q takes Q	R takes Q
19. Q takes P	Q to K sq	41. B to Q 4th	R to Q B 4th
20. R to K sq	Q to K R 4th	42. P to K R 4th	Q to K Kt 4th
21. P to Q 4th *(c)*	B to Q 2d	43. B takes Q Kt P	R takes P
22. P to Q 6th *(d)*	P takes P	44. B to K B 3d	

And, after a few moves, Black resigned the game and the match.

(a) Played without due consideration. White must now suffer the loss of a Pawn or the "Exchange."

(b) Better apparently than taking the K B P with Bishop, since in that case White might have taken a Pawn with his Kt.

(c) The loss of the Exchange, instead of daunting, serves, as it ought, to stimulate White to renewed exertion. He now threatens to win the K R Pawn.

(d) The combination beginning with this move is highly ingenious, but we are inclined to believe that playing Q to Q B 3d, before advancing the Pawn to Q 6th, would have given White a still more marked advantage. Let us for a moment suppose,

WHITE.	BLACK.	WHITE.	BLACK.
22. Q to Q B 3d	Q to K B 3d, or K Kt 3d (He appears to have no better move)	23. P to Q 5th	Kt to Q sq (or he loses a piece)
	And Black can never save the game.	24. P takes P	Kt takes P, or *
		25. Q Kt takes K B P	

WHITE.	BLACK.	WHITE.	BLACK.
* 24.	Q B takes P	26. Q Kt takes B	
25. B takes K B P	P takes B (best)	And wins.	

(e) We should have a preference to 25. K Kt takes K B P, threatening to win the Queen next move. In that case, the following moves are likely:—

WHITE.	BLACK.	WHITE.	BLACK.
25. K Kt takes K B P	Q B takes Kt	27. Q to K Kt 3d, or Q to K B 3d	
26. Kt takes B	Q to K B 3d	And White ought to win easily.	

(f) Good chess all this undoubtedly; yet we cannot but think more was to be made of the position. Let us try:—

WHITE.	BLACK.	WHITE.	BLACK.
26. R to K 7th	R to K B 3d (best)	28. Q takes Q	P takes Q †
27. B takes K B P	Q to K B 3d (best)	29. K B to K 5th, and wins	

† If the R takes Q, then Bishop takes B, and White must equally win.

(g) An oversight, which might have enabled Black to draw the game. He should rather have moved—

WHITE.	BLACK.	WHITE.	BLACK.
31. B to Q 5th	B takes B	34. Q takes Q (ch)	K takes Q
32. P takes B	B to K 5th (dis. ch)	35. Kt to K 4th	
33. Q to K B 3d	B takes B	And ought to win	

CHESS ENIGMAS.

No. 588.—By S. ANGAS.

White: K at his Kt 4th, B at K Kt 5th, P at K B 6th and K Kt 6th.

Black: K at his R 3d, P at K R 2d.

White to mate in five moves.

No. 589.—By AN AMATEUR.

White: K at his B 3d, R at K 3d, B at Q Kt 3d, Kt at Q B 4th, P at Q Kt 5th.

Black: K at Q 5th, P at Q B 4th.

White to play, and mate in five moves.

METROPOLITAN NEWS.

PUBLIC MEETINGS.

DEPUTATION OF NEWSPAPER PROPRIETORS TO THE POSTMASTER-GENERAL.—A deputation of London Newspaper proprietors waited upon the Marquis of Clanricarde, Postmaster-General, on Wednesday, at twelve o'clock, at his residence in Carlton-terrace, in order to urge upon his Lordship, and through him upon the Government, the immediate necessity that exists for the abrogation of the recent Post-office regulation suspending the delivery of letters and newspapers on Sunday. The Marquis of Clanricarde said that his own opinion was, and he believed the same opinion was entertained by all the members of the Government, that this arrangement, which the House of Commons had decided should be carried into effect, would be of extreme inconvenience to the country, as it would prevent the transmission of news as well as letters to individuals. Newspapers had a strong claim to attention in all matters having relation to speedy conveyance by post on account of the stamp duty; but, at the same time, the alteration of the order must depend upon the public. The public were represented in Parliament; the Government were merely the executive; and, although there were doubtless occasions when it was well for a Minister of the Crown to interpose, yet it must be obvious that there were serious objections to the exercise of Government being put forward as opposing the wishes of the people, as expressed in the late address, and in a matter upon which strong religious feelings existed. Very considerable agitation had taken place. The motion was not hastily proposed. It was announced early in the session, and was put off from time to time, due notice having been given of the day upon which it was actually brought on. Upon all those occasions, neither the people nor their representatives came forward to oppose this motion. He believed, however, a motion now stood for an early day; and, of course, if the House of Commons reverses, upon re-consideration, its judgment, he should be of opinion —and he might say all her Majesty's Ministers would be of opinion, though he was not in a position to pledge the Government in any way—that the original rule should be reverted to. His own opinion upon the matter was perfectly clear, because, when he came into office, he was anxious to provide for the wants that then existed, namely, the transmission through London of the mails that came up from the provinces on Sunday. In conclusion, the noble Lord said the Government would abide by the decision of the House of Commons when the matter came to be re-considered next week, and he suggested that the committee had by a majority of four to two, determined upon recommending the continuance of the charter of the company. This was subsequently overruled by the shareholders, and a resolution for a memorial to the Government, complaining of the manner in which they had been treated, was agreed upon, and a committee appointed to draw up such memorial. After a vote of thanks to the chairman, the meeting separated.

SOUTH SEA COMPANY.—A meeting of the proprietors of this company took place on Thursday, at the South Sea House, Threadneedle-street, City; Mr. Charles Franks in the chair. The report showed that the receipts for the half-year ending July 5th, 1850, amounted to £154,828 1s. 3d., and the outgoings to £89,538 0s. 10d., leaving a balance of £64,990 0s. 5d. Half-a-year's dividend on £3,662,784 8s. 6d., South Sea Stock, at 1¾ per cent., amounted to £64,098 14s. 6d., being a balance of £891 5s. 11d. A dividend of 1¾ was proposed by the chairman and carried, and after a vote of thanks to the chairman, the meeting separated.

ROYAL BOTANIC SOCIETY.—The last of the attractive exhibitions of this society took place on Wednesday, at the gardens in Regent's Park. Notwithstanding the doubtful state of the weather, there was a crowded and fashionable attendance. The collection of flowers was very good, but the beauty of the American flowering plants, one of the most striking features of the previous exhibitions, was now exhausted. The collection of orchidaceous plants was very excellent, and the cut roses were very abundant; but even these general favourites were eclipsed by the fruit, of which the competing collections were more than usually numerous, comprising the names of many of the most distinguished of the nobility. A very interesting feature of this portion of the exhibition was some exotic fruits, grown at Sion House, the seat of the Duchess of Northumberland; and there was a new strawberry, of great size, named the "Goliath." Amongst the company were the Prince and Princess Schwartzenburg, the Dukes of Norfolk, Beaufort, and Grafton, the Archbishop of Canterbury, the Bishops of Winchester and Lichfield, the Marquises of Aileabury and Bristol; the Marchioness of Downshire, Earl Mansfield; the Austrian, Turkish, Mexican, and Portuguese Ambassadors, Countess Minto, Baron Goldsmid, Viscountess de Monconvo, &c.

THE BAKING TRADE.—A public meeting of the bakers of the metropolis was held in St. Martin's Hall, on Saturday evening last, to take into consideration the best means of obtaining redress for the grievances under which the trade at present labours, and to establish a society for improving the social and moral condition of the class. Lord Robert Grosvenor presided, and was supported by a deputation from the National Association for the Protection of Industry and Capital, at the head of which was Mr. Paul Foskett. A report was read from the Bakers' Operative Society, giving an account of the progress of their proceedings prior to the introduction of the motion by Lord R. Grosvenor, and showing that the expenses had a little exceeded the receipts. Two resolutions were passed, to the effect that the meeting viewed with alarm the rapidly-increasing evils and distress of the baking trade caused by the present unprincipled system of competition by the employment of juvenile and foreign labour, and the long hours of labour exacted from the former for low wages; that the meeting was of opinion that it was the duty of all persons to assist in eradicating the evils complained of, by every constitutional and practical means; that the meeting was convinced that the present system of unbridled and unlimited hours of labour was detrimental to the best interests of the employers, and extremely injurious to the physical and moral well-being of the employed, who are, in consequence, deprived of the means of enjoying domestic enjoyment and religious instruction; and that the best means of abolishing the evils complained of was to establish a society upon more extended principles of co-operation than have hitherto been adopted. In the course of the proceedings, Mr. Paul Foskett delivered an admirable address, counselling the meeting to be more united in their purpose, and to make their wishes known to the Legislature by petitions numerously signed. This gentleman's speech was frequently responded to by a person in the body of the hall, who declared that Free Trade, on its present confined basis, was more injurious than beneficial to the working man, a sentiment which was loudly cheered by the meeting. In reply to a very cordial vote of thanks to the noble chairman, his lordship delivered some seasonable advice to the journeymen present as regards their future conduct, after which the proceedings terminated.

MEDICAL REFORM.—The following is a copy of the propositions presented to the Secretary of State for the Home Department on behalf of the combined deputation of the provincial physicians and surgeons, dated the 2nd day of May, 1850:—Propositions to be submitted to the Right Honourable Sir George Grey, Bart., by delegates from the provincial physicians and surgeons of Manchester, Stockport, the county of Essex, the county of Salop, and North Wales; May 2, 1850. 1. That the Colleges of Physicians and Surgeons, once placed in harmonious relation with their respective members, and re organised so as to insure uniformity and sufficiency of education to all, are amply sufficient for the requirements of the medical profession in England, and that the creation of a college of general practitioners, under such circumstances, would be a needless complication, prejudicial to the interests of the profession and the public. 2. That the charter granted to the College of Surgeons in 1843 forms the principal obstacle in the path of medical legislation; and that the recent alteration of the said charter proposed by the Council of the College of Surgeons is insufficient, unsatisfactory, and unjust, as also the resolution of the Council of the 23rd April, 1850. 3. That all who were members of the college prior to the charter of 1843, as they attain respectively a standing of fifteen years, shall be admitted to the fellowship, and that fellows established in the provinces shall reside in the council, of which they may constitute one third part. 4. That, as no fine was demanded from those on whom the Fellowship of the College of Surgeons was originally conferred, those who were members in 1843 claim the fellowship on the same terms. 5. That, in the election of the Council, the Fellows resident in the country shall have the privilege of voting by balloting papers. 6. That all who shall enter the profession after the passing of this act shall be registered by no other title than that of physician or surgeon, and that such gentlemen as are now in practice shall be registered according to their respective qualifications.—On behalf of the Conference, W. BATSON BEEVER, Chairman.

ROYAL MEDICAL BENEVOLENT INSTITUTION.—The installation festival of this institution, for affording pensions of £30 per annum to the widows and unmarried daughters of military and naval officers, clergymen, members of the learned professions, professors of the fine arts, gentlemen engaged in mercantile pursuits, and others of a superior station in society, and for the erection of almshouses, was celebrated at the Freemasons' Tavern, on Wednesday evening; the Earl of Cardigan in the chair. Various appropriate speeches having been made, and toasts drunk, the usual business commenced the subscriptions, which amounted to above £1000.

ENTOMOLOGICAL SOCIETY.—The usual monthly meeting of this society was held on Monday evening; W. Spence, Esq., Vice-President, in the chair. Mr. S. Stevens exhibited a specimen of *Pezocella tusserella*, taken by Mr. Hewetson, at Kirkby Stephen, Westmoreland; and Mr. Bond exhibited several specimens of the same insect, from the fens of Cambridgeshire. Mr. J. F Stephens exhibited the pupa-cases of *Zeuzera æsculina* in the stems of reeds; and Mr. Bond remarked that these pupæ were able to move up and down inside the reeds as rapidly as the larvæ. Mr. S. Stevens showed some living specimens of *Gracilia minuta* which had perforated the lid of a hamper. Mr. F. Smith stated, that having last year found *Baris laticollis* at the roots of *Sisymbrium officinale*, he had been examining that plant again, but had met instead with larvæ which he supposed were *Lexostena punctata*. Mr. Westwood read the commencement of a paper on Strepsiptera.

MORTALITY IN THE PUBLIC INSTITUTIONS OF LONDON.

The deaths in the public institutions of London have been published every week during the present year. It was thought desirable to have, at given dates, a return of the number of inmates, for comparison with the deaths. This the Registrar-General has been able to procure through the co-operation of the Poor-law Commissioners, of the Lunacy Commissioners, and of the governing bodies and officers of the hospitals and other charitable institutions. With the same assistance the Registrar-General hopes that he shall be able to continue, and to render this return more correct than it is at present. The most general view of the public and charitable institutions of London of the greatest cities in the world cannot fail to be as useful as it is interesting.

The public institutions of London contained 40,783 inmates in the quarter ending March 31, 1850; namely, on an average of the two periods given in the table, 3,779 in the military and naval asylums, 670 in military and naval hospitals, 23,972 in the workhouses, 3067 in hospitals for the treatment of common diseases, 3849 in lunatic asylums, and 3436 in prisons. Of 10,000 inhabitants of London are in workhouses, 38 in prisons, 17 in lunatic asylums, 14 in hospitals, 183 in one kind of public institution or other. In other words, 1 in 93 of the inhabitants are in workhouses, 1 in 736 in hospitals, 1 in 578 in lunatic asylums, 1 in 410 in prison.

The deaths are in very different proportions. Of 13,219 deaths in London during the 18 weeks, 2363 took place in public institutions. This is 18 per cent. of the total deaths. If the proportion of deaths should continue the same, it will follow that 1 in 3 or 6 of the inhabitants of London ends his days in a public institution, 1 in 10 in the workhouses, 1 in 21 in hospitals, 1 in 102 in lunatic asylums; and, taking adults only, the proportion of deaths in public institutions is much greater.

After much suffering and much struggling, in the last stages of their illness, in weakness and in poverty, great numbers are carried into the London hospitals and to workhouses. The division of the deaths by the population of such institutions for the reception of the sick naturally exhibits a high ratio; and the resulting mortality is very different from that which the whole population exhibits. Thus, there are districts in England in which the annual mortality does not exceed 17 in 1000; in all England the annual rate of mortality was 22 in 1000; in London, 1838–44, the annual rate of mortality was 25 in 1000; in the first quarter of 1850 it was at the rate of 24 in 1000 annually; in the second quarter, the mortality in the public institutions was at at such a rate that, if it continued uniform for a year, 230 would die to 1000 inmates. The mortality was 23 per cent.

HOSPITALS.—The annual rate of mortality in the general hospitals was 82 per cent., in the consumptive hospital 82 per cent., in the fever and small-pox hospitals about 302 and 304 per cent. In the lying-in hospitals the mortality of the women and children has not this quarter been distinguished. No inference should be drawn from the return in respect to the mortality of particular hospitals; thus, as at King's College Hospital, the mortality may be high because patients having been received in a dying state, or from an accidental occurrence of circumstances; or the mortality may be low from the removal of patients in the last stage of illness. It is well known that the mortality is also so high among cases described as those of medical cases. The mortality in the military is lower than in the civil hospitals.

LUNATIC ASYLUMS.—The annual rate of mortality in lunatic asylums was 13 per cent. The rate in Bethlehem was 7 per cent.; in other asylums the mortality varied from 13 to 22 per cent.

MILITARY AND NAVAL ASYLUMS.—The mortality among the Greenwich pensioners in the hospital was 19 per cent.; among the Chelsea pensioners 16 per cent. The mortality of these institutions depends to some extent on the ages of the pensioners. The mortality in London of men of 65–75 is 9 per cent., of men of 75–85 is 18 per cent., of men of 85–95 is 32 per cent. The mortality of the Greenwich pensioners, it will be seen, lies between the rates of mortality at the first two periods of old age.

WORKHOUSES.—The general mortality in the London workhouses was at the rate of 23 per cent. annually. This return will be chiefly of use to the parishes themselves, as the workhouses are very differently composed. Like the Greenwich and Chelsea Hospitals, they sometimes contain old people; at other times there was attached to workhouse infirmaries, which not only receive those who fall sick in the workhouse, but out-door paupers, who should in strictness be separately returned. Other workhouses contain children at ages when the mortality is kept down by natural vigour of youth; thus, in the Strand workhouse children in London is 1·2 per cent. at the age 5—10, and only 0·5 per cent. at the age 10—15: at the latter age, only 1 in 207 boys die in a year. It is, how ever, well worthy of remark, that the mortality in the large workhouses of Finsbury and St. Martin's-in-the-Fields does not exceed 9 per cent.; and it may be well to compare the arrrngements there with those in workhouses which experience an annual rate of mortality exceeding 30 per cent.

BARRY, THE ARCHITECT.—On Saturday last, a party of about twenty gentlemen, pupils and assistants of Mr. Barry, the eminent architect, met to entertain that gentleman at a dinner at the Trafalgar Tavern, Greenwich, on the occasion of their forming a society or club among themselves for the purpose of continuing and increasing the friendship that the members have formed one with another while in the office of that gentleman, and to evince their appreciation of the high talent of Mr Barry, and of the advantages they have derived from his instructions. The health of Mr. Barry was enthusiastically received, and in his reply that gentleman expressed his pleasure at seeing his old pupils and assistants again around him, and in accepting the compliment of being named patron of the embryo club.

HOSPITAL FOR CONSUMPTION, BROMPTON.—On Sunday, during three services, a very crowded congregation assembled in the newly-consecrated chapel of the above hospital, in consequence of three distinguished members of the bench of Bishops having intimated their intention of preaching the successive sermons after the reading of the ordinary services by the chaplain of the institution. The first discourse was delivered by the Right Rev. Prelate of Lincoln, whose eloquent advocacy of the peculiar claims of the charity was responded to by a collection to the amount of £364 11s. 4d. The sermon in the afternoon was preached by the Lord Bishop of Worcester, and in the evening by the Bishop of Oxford. On each occasion, the objects of the hospital, and the much good it conferred upon society at large, were energetically dwelt upon; and the respective collections reached £50 and £79 17s. 7d., making an aggregate amount of £493 8s. 11d. The founder and many distinguished supporters of the charity were present on this the first time of opening the new chapel since its consecration, a few days since, by the Right Rev. the Bishop of London.

ACCIDENT AT THE BRICKLAYERS' ARMS STATION.—On Monday morning, shortly after ten o'clock, an accident of a fearful character occurred at the Bricklayers' Arms railway station, Old Kent-road, whereby a man, named Isaac Banks, aged 32 years, received such serious injuries that no hopes are given of his recovery. The unfortunate man was a carpenter in the employ of Mr. Kell, the extensive builder, carrying on business in Westminster, and was one of a large number of workmen who have been engaged in making considerable improvements at the terminus, which will be shortly opened for additional traffic. At the time named, Banks ascended to the roof of a large building to perform his ordinary occupation, when he missed his footing and fell to the ground, with fearful violence. Several persons ran to his assistance, and found him to be in an insensible condition. He was removed to a proper place, and seen by a surgeon of the neighbourhood, who discovered that he had sustained a compound fracture of the right thigh, fractured his scull, and other contusions about the body and head. He was immediately placed in a cab and conveyed to the accident ward of Guy's Hospital, where he lies in a very precarious state.

FATAL COLLISION ON THE RIVER.—A serious accident, by which two lives were lost and several other persons placed in great jeopardy, occurred on Saturday night last on the river Thames, about midway between the Hungerford Suspension and Westminster Bridges, in the following manner:—Mr. Hawtrey, the eldest son of one of the members of the Court of Common Council for Bread-street Ward, and four other gentlemen, hired a random skiff of Mrs. Needham, the boat-builder, at St. Paul's Wharf, for the purpose of a pleasure trip on the river. On arriving near Bennett's wharf, in the Belvidere-road, they were run down by the *Dahlia* penny steamer, and Mr. Hawtrey and a nephew of Mrs. Needham were drowned.

FIRE IN SOUTHAMPTON-STREET, STRAND.—A fire, which threatened serious consequences to the inmates, broke out on Wednesday morning, in the house No. 22, in the above-named street. The occupants had some difficulty in saving themselves from destruction, and a considerable amount of property was destroyed.

FIRE.—About half-past ten o'clock on Monday morning, a very extensive loss of property took place in Hart-street, Covent-garden. It originated at the rear of a range of buildings occupied by Mr. M'Clandish, engineer; Mr. Reeve, carpenter, and others, principally used as workshops. The engines were kept in operation for nearly an hour, when the flames were arrested in their progress, but not before a great loss of property had occurred. The origin of the fire was not known, and it is believed that none of the property destroyed is insured.

BIRTHS AND DEATHS.—Births registered during the week ending Saturday, June 29: Males, 748; females, 699: total, 1447. Deaths during the same period: Males, 536; females, 429: total, 965. The increase on the return of the previous week, when only 775 deaths occurred, arises not from an increased rate of mortality, but from a influx of deaths, which had been the subjects of coroners' inquests at various periods in the last three months, but were not registered till the end of the quarter. The corrected average for 10 corresponding weeks 1840–9 is 994; compared with which, the deaths of last week exhibit a decrease of 29. Ten persons, of whom 9 were children, died of smallpox. 17 of measles, 14 of scarlatina, 19 of hooping-cough, and 34 of typhus; all of these diseases showing much less than the usual mortality; except the last, which differs little from the average. But diarrhœa shows a considerable increase; in the last three weeks, the fatal cases being 78, 108, and 128. Two deaths from cholera were registered. On the 25th of June, at 4, Princes-street, Cripplegate, a porter, aged 38 years, died of "acute rheumatism (10 days), cholera (3 days)." The deceased had a severe attack of cholera in August last, and since that time his health has not been good. On the 28th of June, at 23, Windmill-row, the wife of a labourer, aged 54 years, died of "bilious cholera (45 hours)." The certificate adds that "there was no purging in this case." Mr. Mears, the registrar, when cholera prevailed last year, described this row as in a filthy condition, and similarly adapted to generate disease.

METEOROLOGICAL OBSERVATIONS.—The mean height of the barometer in the week was 29.885 inches. The mean temperature was 64 2 deg. It was more than 7 deg above the average on the first four days, and it was below it during the remainder of the week.

TOWN TALK AND TABLE TALK.

Most engrossing and most unhappy is the one grand subject of this week's Town Talk and Table Talk. Since the evening of last Sunday, all London has been ringing with the mournful theme as with a peal of funeral bells. Alike in drawingroom and humble parlour, in saloon and in garret, with feelings of sorrow, or sympathy, or grief, or horror, or dismay. It was so fearful in its suddenness, so appalling in its utter unexpectedness, that for hours the mind could hardly grasp and fully comprehend the stern reality. Everywhere you saw about you, everywhere you heard about you "the DEATH OF SIR ROBERT PEEL." The catastrophe was so new, so startling in its suddenness, that the announcement somehow looked unreal, otherwise a nightmare sort of terror from which you could shake yourself free. What! Sir Robert Peel dead for ever! The great man who a few brief hours ago, stood, statue-like, in the height of his popularity with the great British people—statue-like in the glory and the might of his massive and unclouded intellect—gone from amongst us while the House of Commons was still ringing with the sonorous echoes of his eloquence? Gone at the very height and climax of his sagacity and his wisdom? Gone, just as the great game of politics appeared to be taking a new turn, as new combinations began to be whispered, as old prevarications were fairly healing, as men began to muse themselves from their long-continued political apathy, and to look again curiously and hopefully towards Sir Stephen's, and to ask each other "What next?"

I heard his last speech on Friday night. It was in the best style, luminous and dignified, comprehensive and minute, gravely moderate; and, although spoken in the full heat of a virulent party debate, full of expressions of appreciative sympathy, of conciliatory kindness towards opponents, which poleyed to disagreed. Truly it may be said that Sir Robert has gone out from amongst us with the words of peace and goodwill upon his lips. "I have so site disposition," he said, "for entering into any angry or hostile controversy, that I shall make no reference whatever to many of the topics which have been introduced into that most able and temperate speech;" that of Lord Palmerston. "a speech which made us proud of the man who delivered it." His then proceeded to state his own views, with a simple perspicuity and a lucidity of order that would have made John Russell expressly acknowledged. Within a few hours the greatest statesman of his age was a stricken frame of suffering humanity.

The Commons rose early—the Lords sit late, but they, too, had he died It was an occasion not to be forgotten. There were pale faces gliding about lobby and corridor—there were faltering words of sympathy and horror:—there were tears in the eyes of hardened men. "I feel" the expression was a thousand times repeated, so general was the sentiment—"I feel as if I had lost an intimate acquaintance, a dear relative of my own." The event, people said, was so terrible, that they could not realise it. For my own part, I can hardly trust myself to say that I saw the familiar face and form before me, walking up slowly, as he was wont, from the House to Whitehall-gardens, and leaning heavily upon the arm of one of the younger men who had been brought up in his Parliamentary school—Mr. Sidney Herbert or Mr. Cardwell. I saw the head, slightly bowed, gliding gait, the flat collar, and the loose folds of that well-remembered blue frock coat; nay, even the neatly and tightly-rolled umbrella, which he almost constantly carried—all these little personal characteristics, which, as I looked for it, before many a dimmed and moistened eye. There was, indeed, a degree of strong and of unaffected personal grief excited by the demise of Sir Robert Peel, in the minds of those who only knew him from the constant habit of seeing him in the House and listening to his voice, which I believe would not be excited, at least to any such extent, by the death of any other member of the Legislature whatever.

And this feeling was, of course, in a modified degree, universally spread throughout those more humble ranks of life, the members of which seldom take much interest in the personal antecedents of a man removed from them. There was a quiet and sad and solemn sense enacted from day to day in Whitehall Gardens, where the great man lay silently on the brink of death—a scene which had its high significance and its grand import. There were unbroken lines of carriages hurrying from every West-End street and square with anxious occupants, eagerly enquiring the latest news; there were hourly messengers from the greatest and the most exalted in the land. But there stood also before the outer gate a small crowd of youths, and middle aged men, and elderly people, but always there, by night and by day. They spoke to each other in whispers, and with sad downcast looks. Men dressed like mechanics and labourers lingered, reading the bulletins with twitching lips and moistened eyes. Women with shabby shawls stood grasping the rails, and looking intently up to the blind-darkened windows. As they retired, and gained the open street, many of them addressed casual passengers, telling them that He was worse—that there was little hope—that there was no hope. That silent, solemn crowd betokened the unknown depth to which love and reverence for the great practical statesman had sunk in the minds of humble men and women. Unknowing the significance of their own appearance, these poor folk were, in reality, the guard of honour accorded to the last hours of Sir Robert Peel—by the People. How impossible was it to look upon his form, and not call to mind Sir Robert's own noble words, spoken on the last retirement from office—"It may be, sir, that I shall leave behind me a name sometimes remembered with expressions of goodwill in those dwellings which are the abodes of men whose lot it is to labour, and to earn their daily bread." The knit of his brows; a name remembered with expressions of goodwill when they shall recruit their strength with abundant and unvexed food, the sweeter because it is no longer leavened by a sense of injustice!"

That name Sir Robert Peel has left behind him. The fame and the love which guerdon that achievement Sir Robert Peel has nobly earned. The people of England know that he has been during the most eventful years of his manufactures, and correspondingly solemn and sad is the wail which his premature death has awakened in every humble household of the land.

It is almost painful to make the transition from the death of Sir Robert Peel to any ordinary topic of conversation or interest. Still, however, we must risk the effort, and proceed with a few morsels of our ordinary Town and Table Talk.

The Nepaulese Princes continue to form one of the most brilliant eyesores of the day. They are, certainly, great lions through the length of the whole season in London, as for diamonds, the brilliant eruption appears to take new forms and still more glittering features every time the Oriental magnets appear in public. Prince Jeerhang used sometime to wear diamond shirt-studs and diamond garter-buckles, but he has boasted of losing from £80 to £100 worth every time he [illegible]. If the Nepaulese garments are not better made, it must be quite a [illegible] to the jewellers to have to replace such [illegible] every parties, fêtes, and balls, with the humble but laudable object of picking up the [illegible] that fall from the rich man's coat. We will trust, however, that their [illegible] have not employed more unremunerative tailors—although, perhaps, jewellers may have had more to do with the manufacture of their raiment. What a grand notion it is, that of sending to a jeweller to take your measure for a jacket, or a trunk, and consolingly reminding the man of gems that he had better bring a good variety of pearls, rubies, emeralds, turquoises and brilliants, so that you may choose your own pattern!

Is it news to the bulk of my readers that the Nepaulese Minister is the Regent for an infant Prince; that his brothers, who accompany him, were shrewdly suspected to be his rivals for the possession of the reins of power, and that the project of politely requesting that they would be his *compagnons de voyage* in his western tour was generally regarded in Nepaul as a masterly *coup d'état*, which would have the undoubted effect of preventing anything like political advantage being gained by any of the Oriental Whigs, Tories, Radicals, or Protectionists, during the Regent's absence. In the matter of eating, the Nepaulese Princes gentlemen continue to keep rigidly to their rules of faith and custom. As regards animal food, they eat mutton and goat's-flesh (odd, by the way, that we have no Norman name—*vide* the opening chapter of "Ivanhoe"—for the latter), named species of food. Of course, these dishes are cooked after their own fashion by their own retainers. Fruit is the only refreshment, as my readers may be aware, of which the Nepaulese will partake, with the single exception of Gaour; and in consuming even it, the most curiously rigid system of isolation appears to be requisite. At a recent *fête*, at which all artistic and aristocratic London were present, the Nepaulese, before they sat down to their collation of peaches, nectarines, and so forth, were not only surrounded by a closed ring with trusty sentinels at the door, but the carpet of the apartment in which they sat, and which was of the same place as that which covered the floor of the adjoining chamber, was, at their request, covered at its edges with sheets, stuck on either side, so as to destroy the idea of any immediate connexion or communication between themselves and the neighbouring infidels. The first remark made by the Ambassador when introduced to Her Majesty's Theatre, *apropos* of the female *artistes*, is worth recording. It was, literally, "There are singers and dancers in my own country, but these are spirits—or angels!"

Thanks, we suppose, in some degree to the rivalry of the Yankees, our ocean steaming is advancing with strides worthy of the seven-leagued boots. As the Clyde took the lead in building the first tiny river boats propelled by paddles, so it keeps the Lot best in the humorous and ever-increasing task of bridging over the Atlantic. The *Asia*, the last Clyde-built boat, has fairly beaten the *Atlantic*, her New York-born rival. The former caught sight of Ireland seven days and seven hours after losing sight of America—a wonderful feat, and made the distance from wharf to wharf in nine days, seven hours [illegible] showing a difference of nineteen hours, [illegible] rival. The greatest distance performed within the twenty-four hours by the *Asia*, was 316 miles, a speed rather above thirteen miles an hour. Now the question comes to be in these go-ahead times, whether she were not a much quicker done still. We build Channel boats capable of going—*vide* the *Banshee* and the *Vivid*—from sixteen to seventeen miles an hour; why should we not have ocean boats of corresponding power? Despair, despair, despair,

ANNUAL DINNER OF THE GOVERNORS OF BRIDEWELL AND BETHLEM HOSPITALS, IN THE HALL, BRIDEWELL.

G. Robinson, M.A., churchwarden of St. James's, churchwardens of St. John's, sidesmen of St. James's, sidesmen of St. John's, overseers of the parish, with numerous influential inhabitants of the parish.

The guests numbered 150. The dinner and wines, supplied by Mr. Richard Rouse, of the Belvidere Tavern, gave unqualified satisfaction. The cloth having been drawn, the health of the Queen was given, and responded to with great enthusiasm, the elder children, boys and girls, taking an effective part in the "National Anthem," which followed. They walked round the room, and having taken up their appointed stations, an address was spoken by the senior boy and girl; after which the whole school sang a hymn, with good effect. The cleanly and healthy appearance of the children was extremely interesting.

The Chairman, in introducing the toast of the evening, made an earnest and felicitous appeal on behalf of an institution which had done so much good for so long a period; and he hoped the scene they had that night witnessed would stimulate all present to increased exertions in the furtherance of so noble and so truly Christian a charity.

The Rev. Mr. Faulkner delivered a kindly address to the children before they left the school-room.

In the course of the evening, Mr. B. Bond Cabbell, and other gentlemen, addressed the meeting on behalf of the charity, the result of which was shown in the long list of subscriptions read by the secretary, amounting in all to about £220; and including donations of £10 from the Marquis of Salisbury, £10 10s. from Mr. B. B. Cabbell, £10 10s. from the Chairman, and £5 5s. from T. S Duncombe, Esq., M.P.

JUBILEE DINNER OF THE CLERKENWELL PAROCHIAL CHARITY SCHOOLS.

THE SCOTTISH FETE, IN LORD HOLLAND'S PARK.

THE SCOTTISH FETE.

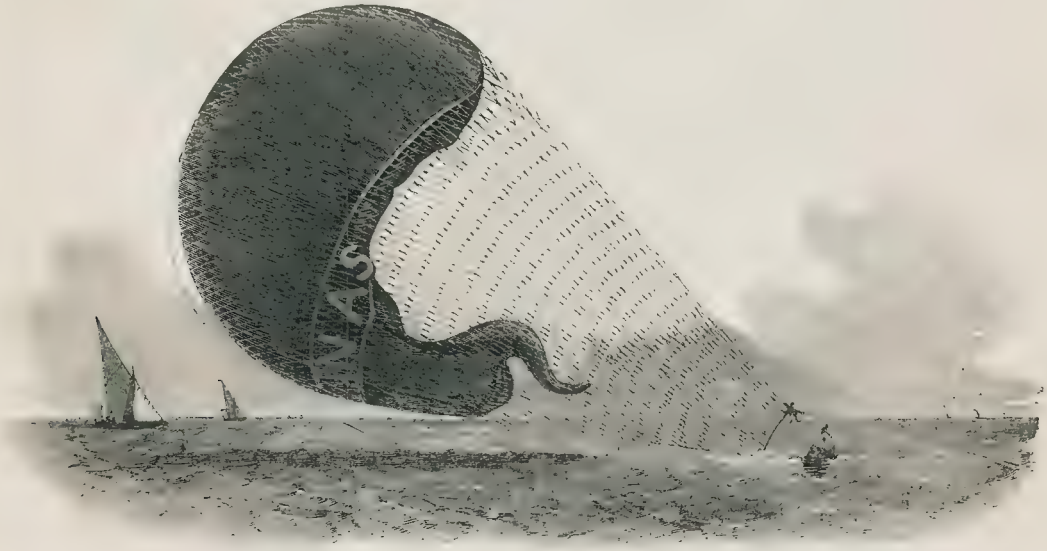
On Monday the second annual "gathering" of the members of the Highland and Scottish Societies took place in Lord Holland's Park at Notting-hill, on the occasion of a grand national *fête*, similar, in all its leading characteristics, to that of the preceding year. The object of this undertaking was to afford encouragement to those who desire to uphold the sports and pastimes of the people of Scotland, and at the same time to carry out the principle that a wholesome entertainment may be derived from the exercise of those pleasures which, whilst they offer an agreeable relaxation to the spectators, are calculated to display the goodwill of the performers in an honourable competition of strength and skill.

The use of Holland Park was kindly granted for the exhibition of these sports, games, and contests last year, and on the present occasion the same place was made use of. Several grand stands were erected for the accommodation of ladies and other visitors; and in front of these, in a large open space, the proceedings of the day were carried on. This space was railed in; the spectators who were not accommodated on the stands being ranged on the outside of these lines, with the exception of a favoured few, who were admitted to a closer view of the combatants and participators in the varied strife. The scene was a very gay one, enlivened as it was by the beautiful dresses of the lady visitors, and the characteristic Highland costumes of the participators in the sports, representing the different clans. There were also military bands; and bagpipes in abundance, foremost amongst whom was Mackay, the Queen's piper, added to the excitement by their shrill strains.

It should be observed that prizes to the amount of five hundred guineas were announced to be awarded to the successful competitors. Those for archery were open to all England, Scotland, and Ireland; but the prizes for other sports and pastimes were restricted to those who should appear in the old Caledonian costume, "in kilts or trews." It appears that the competition in archery excited the attention of many English societies. Members had been enrolled as competitors from the Broughton archers, Manchester; English Archers, London; Fraternity of St. George, London; Heath-common Archers, Wakefield; Leeds Archers, Leeds; Lichfield Archers, Lichfield, Queen's-park Archers, Brighton; Royal Toxophilites, London; Royal Sherwood Archers, Nottingham; Salisbury Archers, Edinburgh; Thirsk Bowmen, Yorkshire; West Berks Archers, Newbury; West Norfolk Archers, Worcestershire Archers; and the York Archers, York. It also appeared that candidates who had recently gained prizes in the Scottish National Games at Inverness, Braemar, Perth, Blair Atholl, Taymouth (in the presence of her Majesty), Dunkeld, St. Fillans, Lochabar, Castle Grant, Ardverykie (in presence of her Majesty), Edinburgh, Roslin, Stirling, and in Holland-park last year (in the presence of her Majesty), had also been enrolled to compete for the championship in running, leaping, throwing the hammer, putting the stone, tossing the caber, broadsword exercise, sword and target opposed to the bayonet, sword-dance, reels, strathspeys, and performances on the great Highland bagpipe—so that there was no diminution in the interest or activity of the sports as compared with the exhibition of last year.

The hour of commencement had been fixed for one o'clock, and before that hour very considerable numbers of visitors had arrived. The proceedings commenced with feats of archery, in which the various competitors showed great skill. Then came the "gillie callum" or sword-dance, and afterwards in quick succession the various trials of strength and skill, known as throwing the light hammer, reel and strathspey, tossing the caber, foot race, highland fling, broadsword exercise, putting the light stone, reel of Tulloch, throwing the heavy hammer, feats of skill with the sabre, foot race, strathspey and reel steps, tossing the caber (first class), gillie callum, putting the heavy stone, claymore and target opposed to the bayonet, and the general strathspey and reel. Into the mysteries of all these performances we do not pretend to enter. It is enough to say that they were all of the best—the dancing, especially, full of spirit and national character. Some of the feats of strength, in "tossing the caber" and in "throwing the heavy hammer," were really astounding; and the encounter between the bayonet, and broadsword and target, especially interesting.

At about a quarter past five o'clock the Queen arrived, with Prince Albert, the Prince of Wales, the Prince of Prussia, and some members of their respective



ACCIDENT TO THE MASS... BALLOON, AND ITS DESCENT, ALARM, AND THE NOTE —(SEE NEXT PAGE.)

suites. The Queen was received on the terrace in front of Holland House by Lord Holland, who afterwards joined her Majesty and Prince Albert in the Park, where the Royal visitors were met by a guard of honour composed of Scottish gentlemen of the different clans. The Queen was greeted with enthusiastic cheering; the horses were taken from the carriages, and the Royal visitors witnessed a great portion of the sports, with which they seemed highly amused.

After the games, her Majesty returned to "the green retreat" and alighted at the flower-gardens, where the Royal party were conducted through the new ball-room and conservatory, by Mr. Browne, Lord Holland's architect; the Queen and Prince were next received by Lord and Lady Holland, at the north front of the mansion, and conducted through the various apartments, which were much admired by the Royal party, who then took leave.

In the evening Lord Holland gave a *fête* to the inhabitants of Kensington: the conservatory, ball-room, and pleasure-ground were tastefully illuminated: refreshments were liberally served; and there was a brilliant display of fireworks.

On Tuesday, the gates of the several entrances to Holland Park on the Notting-hill side were opened at an early hour, and the archery commenced, and was continued up to about one o'clock. In the meantime, however, a competition in archery and reel dancing on the violin, as performed in the Highland districts, took place at the Prince of Wales Tavern, beyond Norland-square, it being understood that three prizes would be given away to the best three performers. The Neil Gow quadrille band played the dancers to action on the stage to keep up that style of music cannot fail to be interesting; and assuredly the present "candidates for honours" gave the best practical evidence that the genius of Neil Gow still animates the minds and hearts of Scotchmen. There were nine competitors in the field—James Allan, of Forfar; John Cumming, of Inverness; William Carrie, Peterhead; Ewen Fraser, Fort William; John M'Intosh, Granton; John M'intosh, Edinburgh; John M'Kenzie, Edinburgh; Duncan MacKercher, Dunkeld; John M'Kenzie, of the band of the 93rd. Sir C. R. M'Kenzie, of Scotsbury, Tulloch, Cluny, William Menzies, of London, and John Cameron M'Phee were the judges on this occasion. Each performer on this occasion was required to play a strathspey and a reel, the one to follow the other without breaking off. The decision of the judges was ultimately in favour of William Currie, of Peterhead; Duncan MacKercher, and Ewen Fraser.

On our return to the Park we found a repetition of the previous day's sports. The contests between the sabre and target, and the musket and bayonet, were, in our judgment, the most interesting of the day; and the spirit-stirring fife and drum assaults was greatly in favour of the sabre and target. The play of Benson and Cragg, Ailing and Tuoby, and of Corporal Newton and Bombardier Keating, and of Collins and Chapman, gave great satisfaction. A foot-race of 1450 yards was well contested by three competitors, and was won by Mitchell Sowerby; the second in being Charles Gow, and the third John Forbes Notman. Notman's Highland fling, too, was much admired. Another foot-race took place, which was won by Donald M'Craw, from Strathclyde Black Hill.

His Excellency the Nepaulese Ambassador, accompanied by his brothers and suite, arrived at a late hour. A guard of honour was formed, and the distinguished party remained about an hour in the Park, but unfortunately her Majesty and her Royal Consort were not present. A succession of the same sports followed which had been exhibited during that and the previous day. The National Anthem was played by all the bands at nearly half-past six o'clock, and the company departed.

On their return from the *fête*, the Nepaulese gentlemen viewed the interior of Holland House, with which they were much gratified. At their departure, they were each presented by Mr. Scroble, the head gardener, with a *bouquet* of flowers, for which they had expressed a great wish when viewing the gardens.

In the evening, the grounds and conservatory, with its splendid terrace, were unreservedly thrown open to the public, who enjoyed promenading in the same till a late hour. The whole concluded with a dinner to all the police employed in the Park and pleasure-grounds.

THE DINNER.

The banquet was ordered to take place after the business of the sports in Holland Park, at the Freemasons' Tavern, at half-past seven o'clock, but the chair was not taken till nearly nine o'clock, when the numbers assembled fell very short, in consequence of the committee, &c. not having arrived. In the absence of the Marquis of Breadalbane, The M'Kenzie of Kilcoy was requested to take the chair, which he very ably filled. There were no professional singers engaged on the occasion, with the exception of Mr. Cooper, who sang "Johnny Cope" with great humour! After dinner seven violinists played a number of Strathspeys and reels, which delighted the company.

"The Health of the Marquis of Breadalbane" having been drunk, his Lordship's piper entered the hall and marched up to the top of the table, playing the well-known air, "Sliante Capier Feidh" (The M'Kenzie Salute), in compliment to the chairman

The chairman gave "The Army and Navy." Captain Forbes responded to the toast.

Mr. Purday, an amateur, sang "The Death of Nelson" with great effect.

The chairman gave "Life and Prosperity to the Scottish Society of London," which was responded to with Highland honours.

Sir John Campbell proposed "The Health of the Chairman." The chairman returned thanks

Other toasts followed, and the festivities were kept up to a late hour.

PERILOUS BALLOON DESCENT.

On Saturday last Mr. Green ascended from Vauxhall Gardens, in his Nassau Balloon, accompanied by Mr. Rush, of Elsenham Hall, Essex, for the express purpose of testing the improvements made by that gentleman in the newly-invented aneroid barometer. For this purpose it became necessary to attain a great elevation, such as at no time can be effected without a very considerable sacrifice of gas and ballast, in consequence of the rarefaction of the air at the elevation attained by the aëronauts. At an altitude of little more than three miles the gas occupies double the space as at the earth's surface, and if not suffered to escape by means of the valves would soon burst the balloon.

The aëronauts left the Gardens at 7h. 50m., and having reached an altitude of nearly 20,000 feet, they found the temperature 19 deg. below freezing-point. They lost no time in making the intended experiments; and having been above the clouds half an hour, they commenced a rapid descent until they got below the clouds. They then found themselves sailing rapidly down Sea Reach, in the direction of the Nore Sands, where were several vessels, from which they hoped to get assistance. Mr. Green, therefore, opened the valve, and the car first struck the water about two miles north of Sheerness. The wind being fresh, they were drawn with considerable rapidity through the river; and, judging the speed of the balloon to be too great for any vessel to overtake them, Mr. Green let go the grapnel, which, by its action on the sandy bottom, so checked the rapidity, that a boat sent off from a barge to the assistance of the aëronauts reached them and took them on board. Shortly after, they were joined by several boats, sent from the *Fly* revenue cutter, Lieutenant Garland, when Mr Rush, being such a thorough seaman, declined boarding to Strood. Mr. Green returned with several boats from the cutter to the balloon, which was still held firm by the grapnel; but the violent oscillations of the machine rendered it dangerous for any vessel to approach it. Meanwhile, the Commander and crew of the cutter found great difficulty in securing the balloon; but, by pouring a volley of musketry into it, so as to enable the gas to escape by the perforations, in a short time they were enabled to secure it. Mr. Green was severely injured on the head and face, from the struggles he had to make to keep himself on the balloon when in the water.

Mr. William Jones has calculated the elevation attained in the above ascent as follows:—Upper station: thermometer, 26 deg.; barometer, 14·50 inches; 19,802 feet. Lower station: thermometer, 63 deg.; barometer, 30·08 inches; 785 feet. Difference, 19,017. Mean temperature, 41·5 Fahrenheit, add 423. Altitude, 19,440, or 3¼ miles and 1060 feet.

ADULT ORPHAN ASYLUM.—The general meeting of the supporters of this charity was held on Monday afternoon, at the Asylum, St. Andrew's-place, Regen ·-park; Earl Manvers in the chair. The report, which was read by the Rev. Mr. Anderson, declared the loss of a most valuable patroness in the Queen Dowager. Her place had, however, been filled by her Royal Highness the Duchess of Kent. The Rev. F. E. Tyler, clerical superintendent, having resigned, his office had been already filled up to the satisfaction of the committee. With regard to their finances, the report stated that of late serious reductions had been made in the amount of the funded property of the institution, in order to make good the deficiencies of former years, but that in the year no such encroachment had been deemed necessary, principally on account of the liberal response made to their special appeal in the year before last. The subscriptions during the past year showed an increase of about £70, and the donations of nearly £600 over those of the year preceding. One congregational collection had amounted alone to £77 15s. 2d., and another, after a sermon by the Bishop of Salisbury, to £57 3s. 10d. Among the legacies left to the asylum was one of ten pounds by Miss Sarah Sandford, late matron of the ward who had been appointed in 1847 sub-governess to the children of the Queen, and who had thus expressed her interest in the institution which had formerly afforded her a happy home. Another senior ward, the Laura Lane, had presented to the institution the profits, amounting to about £100, of a work which Mr. Newby had published for her. Against the increase of income the committee placed the increased expenses of general repairs. The number of senior wards at present was 45, and of junior wards, 28. The statement of accounts from January 1 to December 31, 1849, showed the total receipts to amount to £2831 18s. 1d., which left a balance over expenditure of £290 13s. 1d. After the reception of the report, a vote of thanks to Miss Jury was unanimously passed, and the privilege of two votes at all elections of wards placed at her disposal.

COST OF METROPOLITAN SEWERS.—The total receipts of the several Commissioners of Sewers, from the 1st of January, 1849, to the 31st of December, 1849, was £470,778 9s. 10d., and the expenditure during the same period, £451,343 15s. 11d., leaving a general balance in hand, on the 31st of December, 1849, of £9,334 13s. 11d.

One of the most valuable iron mines in England has been discovered near Whitehaven. The vein is 13 and 25 feet in thickness, and contains 65 per cent. of iron.

MONUMENT TO ARCHBISHOP HOWLEY.—The monument to the memory of this reverend prelate has lately been erected in Canterbury Cathedral, nearly opposite to the throne. It is a recumbent statue, after the mediæval style, with the Book of Life clasped in death to his heart.

CALENDAR FOR THE WEEK.

SUNDAY, July 7.—Sixth Sunday after Trinity.
MONDAY, 8.—Thomas à Becket murdered, 1170.
TUESDAY, 9.—Fire insurances cease.
WEDNESDAY, 10.—Henry II. of France died of a wound in the eye, 1559.
THURSDAY, 11.—Battle of Ivry, 1590.
FRIDAY, 12.—The 193d day of the year.
SATURDAY, 13.—Sun rises 4h., sets 8h. 11m.

TIMES OF HIGH WATER AT LONDON BRIDGE,
FOR THE WEEK ENDING JULY 13, 1850.

HER MAJESTY'S THEATRE.—DONNA MARIA LORETO MARTINEZ.—It is respectfully announced that an engagement has been effected with Donna MARTINEZ (surnamed the Black Malibran), who will appear on TUESDAY next, JULY 9th, in a NEW DIVERTISSEMENT composed expressly for the occasion, and will sing some of the Characteristic Airs of Spain and the Havanah.

HER MAJESTY'S THEATRE.—Mdlle. CARLOTTA GRISI it is respectfully announced, that, in order to prevent the interruption of the representation of LA TEMPESTA, the new and splendid ballet in which the eminent artiste has been renewed for a few nights, and the new Grand Opera of LA TEMPESTA will be repeated on THURSDAY NEXT, JULY 11th, 1850.

ROYAL ITALIAN OPERA, COVENT-GARDEN.—Mdme. PASTA.—A GRAND MORNING CONCERT will take place at the ROYAL ITALIAN OPERA, COVENT-GARDEN, on FRIDAY, JULY 19, in Aid of the Funds for Assisting the Re-Erection of the Theatre, which was destroyed by fire on the night of the 5th of March last. On this occasion Mdme. Pasta has most kindly consented, for the first time in this instance, as well as all the principal artistes of the Royal Italian Opera. Full particulars will be duly announced. Boxes and Stalls for admission:—Boxes, £1 1s. 6d., £2 2s., £3 3s. Pit orchestra stalls, 10s. 6d.; pit, 5s.; amphitheatre stalls, 3s.; front row, 5s.; amphitheatre, 2s.

FRENCH PLAYS.—ST. JAMES'S THEATRE.—MDLLE. RACHEL'S Performances.—ADRIENNE LECOUVREUR.—On MONDAY NEXT, JULY 8, will be produced, for the first time in London, a new Play in Five Acts, by MM. SCRIBE and LEGOUVE, entitled ADRIENNE LECOUVREUR, the character of Adrienne by Mdlle. Rachel; Maurice, M. Raphael; Michonnet, M. Faudrac. As soon as passes a Paris, on the Mardi Gras, 1850.—Country Manager. Paris has most kindly consented her valuable assistance, as well as all the principal artistes of the Royal Italian Opera. Full particulars will be duly announced.—Boxes, £1 1s. 6d., £2 2s., £3 3s. Pit 10s. 6d., £3 3s. Pit orchestra stalls, 10s. 6d.; pit, 5s.; amphitheatre stalls, 3s.; front row, 5s.; amphitheatre, 2s.

ASTLEY'S ROYAL AMPHITHEATRE.—Proprietor and Manager Mr. W. BATTY.—On MONDAY, JULY 8, 1850, the performance will commence at Seven o'Clock, with Lord Byron's popular Spectacle of MAZEPPA and the WILD HORSE, renewed with its original splendour and effect. To be succeeded by the Feats in the Circus Olympique, including the extraordinary and elegant exercises of the accomplished artiste, MISS LOUISA BATTY, the LIGHT HORSE. To conclude with an interesting Melodrama. Box-office open from 11 till 4.

MR. JOHN PARRY'S NEW ENTERTAINMENT, Music-Hall, Store-street.—Mr JOHN PARRY will have the honour of repeating his new Entertainment, entitled "A TRIP TO PARIS," a new Play in Five Acts, by MM. SCRIBE and LEGOUVE, entitled ADRIENNE LECOUVREUR, the character of Adrienne by Mdlle Rachel; Maurice, M. Raphael; Michonnet, M. Faudrac. As soon as passes a Paris, on the Mardi Gras, 1850.—Country Manager. Paris has most kindly consented her valuable assistance, as well as all the principal artistes of the Royal Italian Opera. Full particulars will be duly announced.—Boxes, £1 1s. 6d., £2 2s., £3 3s. Pit orchestra stalls, 10s. 6d.; pit, 5s.; amphitheatre stalls, 3s.; front row, 5s.; amphitheatre, 2s.

FRENCH PLAYS.—ST. JAMES'S THEATRE.—MDLLE. RACHEL'S Performances.—ADRIENNE LECOUVREUR.—On MONDAY NEXT, JULY 8, will be produced, for the first time in London, a new Play in Five Acts, by MM. SCRIBE and LEGOUVE, entitled ADRIENNE LECOUVREUR, the character of Adrienne by Mdlle Rachel; Maurice, M. Raphael; Michonnet, M. Faudrac. As soon as passes a Paris, on the Mardi Gras, 1850.—Country Manager. Paris has most kindly consented her valuable assistance, as well as all the principal artistes of the Royal Italian Opera. Full particulars will be duly announced.—Boxes, £1 1s. 6d., £2 2s., £3 3s. Pit orchestra stalls, 10s. 6d.; pit, 5s.; amphitheatre stalls, 3s.; front row, 5s.; amphitheatre, 2s.

MR. HENRY WYLDE'S SECOND MATINEE MUSICALE will take place at WILLIS'S ROOMS, King-street, St. James's, on THURSDAY MORNING, JULY 11, instead of on the day previously announced, when he will perform Beethoven's Trio in G, Mozart's Quartet in E flat, and Southcott's Sonata, Op. 18. Tickets, 10s 6d and 7s.

GRAND FETE and FANCY FAIR.—RE-ENGAGEMENT of MONSIJILLIEN.—ROYAL SURREY ZOOLOGICAL GARDENS, MONDAY and TUESDAY, JULY 8 and 9, in Aid of the Funds of the Fancy Fair and Bazaar, in aid of the funds of the Licensed Victualle s' Asylum. Promenade Concert, conducted by Mons Jullien and Mr Godfrey. Brilliant display of Fireworks by Scudder. Feeding the Animals at 3. Concert, 6 Passage of Balloon, 7. Grand Display of Fireworks. Admission, as usual, 1s

THE HIPPOPOTAMUS, presented by H.H. the Viceroy of Egypt to the Zoological Society of London, is exhibited daily from One to Six o'clock, at their GARDEN in the REGENT'S PARK. The Band of the 1st Life Guards will perform, by permission of Colonel TIDD, every Saturday, at four o'clock. Admission, ONE SHILLING; on Mondays, SIXPENCE. D. W. MITCHELL, B.A.

THE NEW SOCIETY of PAINTERS in WATER-COLOURS.—THE SIXTEENTH ANNUAL EXHIBITION is NOW OPEN, at their GALLERY, 53, PALL-MALL, opposite St. James's Palace, daily from Nine till Dusk. Admission, 1s. JAMES FAHEY, Secretary.

INDIA OVERLAND MAIL.—DIORAMA GALLERY of ILLUSTRATION, 14, REGENT-STREET.—Additional Pictures, MADRAS.—A Gigantic ROYAL BANYAN TREE, and other Scenes illustrative of the OVERLAND MAIL to INDIA, from Southampton to Madras and Calcutta, is now OPEN DAILY.—Morning, Twelve; Afternoon, Three; Evening, Eight.—Admission, 1s; Stalls, 2s 6d; Reserved Seats, 3s. Doors open half-an-hour before each representation.

HER MOST GRACIOUS MAJESTY'S VISIT TO IRELAND—Illustrated by a Grand Moving Diorama, with some of the most charming Scenery in that country taken of Killarney, by Mr. CALLOW, now exhibiting at the Chinese Gallery, Hyde Park Corner. Daily at 3, Evening at 8. Admission 1s., Reserved Seats, 2s. An interesting historical record of the event may be had at the Gallery.

TRAFALGAR MODEL.—This beautiful Model is unequalled in the World, not only as regards a faithful Representation of that great BATTLE, but also in the effect of Depth of sound but vast object Ships, apparently floating on a large surface of beautifully-imitated Sea. Admission ONE SHILLING; Children Half-price. Open from Ten till Six, and from Seven till Ten in the Evening, brilliantly Illuminated, at 168, New Bond-street, next to the Clarendon Hotel.

BREES' FRESH SERIES of PANORAMIC VIEWS of NEW ZEALAND is NOW OPEN at the LINWOOD GALLERY, LEICESTER-SQUARE.—The Great Gathering of the Chiefs, and the Arrival of the First Settlers of the Church of England.—Nelson.—Otago.—Taranaki.—New Plymouth.—Auckland, the Capital.—Hokianga.—the Bay of Islands, with Hoki casting down the Flag-staff. Daily at one, three, and eight. Admission 1s. 2s. and 3s.

ROYAL POLYTECHNIC INSTITUTION.—During this week the ALPINE SINGERS will perform daily at four, and in the Evenings at half-past Eight.—LECTURE by J. H. Pepper, Esq., on the APPARENT CONTRADICTIONS of CHEMISTRY, daily at a quarter-past Three, and every Evening at Eight.—LECTURE by Dr. Bachhoffner on VOLTAIC ELECTRICITY, daily at 12 and 5 p.m. and every Evening at a quarter-past Nine.—NEW SERIES of DISSOLVING VIEWS, illustrating some of the WONDERS of NATURE; Scenes in the ARCTIC REGIONS and CEYLON.—DIVER and DIVING-BELL, &c. Admission, 1s.; Schools, Half-price.

CHURCH of ENGLAND SELF-SUPPORTING VILLAGE SOCIETY.—A PUBLIC MEETING will take place at WILLIS'S ROOMS, ST JAMES'S, on TUESDAY NEXT, JULY 9th, for the purpose of presenting the PRIZES offered by the Committee for the Essays sent in for competition on the subject of the Duties of Clergymen on the Subject of the Diseases of Large Towns. Tickets of admission may be had at Messrs. Dalton's, Hatchard's, Nesbitt's, Parker's, and Seeley's

JOSEPH BROWN, M.A., } Honorary
J. M. MORGAN, Esq. } Secretaries.

TO CORRESPONDENTS.

VERITAS, Edinburgh, is recommended to consult a solicitor for replies to his three inquiries

C. O. S. Sydenham.—The Crystal Palace Estate, 200 acres; of Kensington Gardens, 306 acres; and of Phœnix Park, Dublin, upwards of 1700 acres

E. B. Reading.—A portion of "Flying Dutchman" appeared in No. 360 of our Journal

DRAWER 13, LEWES.—The address of Mr Kilburn, the photographer, is 224, Regent-street

N. Q.—Your enigma is ingenious, but we have already inserted the Protestant Churches in Dublin, we have not space for such details

M Q Allotments-street, is thanked for the sensible letter upon the Sabbath question; though to print it in our Journal would lead to controversy there out of place

H U J, Exeter, is altogether in error as to the copyright, &c

S. W. 1, Bolonia—The work is published by Bogue, 86, Fleet-street

A SUBSCRIBER, who has sent a slight sketch of the old oil-painting, should show the picture itself to a dealer

MILO.—Application must be made at the National Debt Office, Old Jewry, stating age and place of abode to pass the Examination for Public clerkships

A CAMPETITOR'S Letter on the Great Exhibition Building is, we believe, a fair statement, though we have not room to print it

A CONSTANT READER, Hackney, has twice noticed Rooney's Safety Yacht

N N H.—We cannot undertake to recommend medical men

A WIDOW, Chelsea, is recommended to apply to the Commissioners

F W H, Rugby.—We do not doubt the comparative importance of "the knapsack question," though we cannot at present take it up

FLORUS, Bayswater.—Admission to the Horticultural Society's Exhibitions at Chiswick is obtained by tickets, to be purchased at the Society's office, in Regent-street

NEMO.—We have not yet seen Keith Johnston's "Gazetteer." Bathos is, in poetry, the art of sinking, in opposition to the sublime

A CONSTANT READER.—We cannot inform you as to the 93rd Highlanders

A YOUNG SURGEON, Southampton-row.—See a valuable paper on the "Preparation of Chloroform" in No. 35 of the Edinburgh Medical and Surgical *Journal de Pharmacie*, translated in the "Pharmaceutical Novices"

A H, Leeds.—We cannot avail ourselves of the kind offer

J. M. A.—We are not aware of the existence of the Arabian Classic in a Journal

N. N.—Your letter is received, and shall be attended to

E H W [illegible] about four parts of sulphuric acid to one part water [illegible]

LAURA [illegible] a pencil drawing

DRAMATICUS [illegible] a pencil drawing

J. S. W.—[illegible] Dunlop

A CONSTANT READER, Hackney.—The Arms of White, of Norfolk, are "Gu. on a canton arg. a lion rampant of the field; a mullet for difference," charged with eight escalops of the second. *Crest*, an ostrich arg.

G. B., City.—No amount of income, of itself, constitutes "an Esquire." All those who are addressed as such by the Crown, all Justices of the Peace, and various other functionaries, are lawfully entitled to the title; but the whole question is fully discussed in Mr. Barker's "Barbarian," and is too lengthy to be entered on in this place

NO REPUBLICAN.—Sir George Simpson is Governor of the Hudson's Bay Company settlements, and the author of "A Narrative of an Over-land Journey round the World." He received Knighthood in 1841, and resides at New Lodge House, Bromley. He never was first-lieutenant in the Royal Navy.

AN OLD SUBSCRIBER, Torquay.—There are a few banks conducted by an individual, Thomas Mercock, of Cambridge, is the nearest reply we can give to your question.

AN [illegible] The length of the new Houses of Parliament is 930 feet. We have not the other dimensions.

J W, Donington.—The non-delivery of your copy of our Journal results from the present postal [illegible]

OCTAVIUS.—Apply at the Zoological Society's house, 12, Hanover-square; and at the Royal Botanical Society's Gardens, Inner Circle, Regent's Park. The entrance-fee to the former Society is 2s; to the latter, 1 guinea

W M J, Hatline.—Declined

"Procrastination is the thief of time,"

[illegible] Young's "Night Thoughts"

AN ARTIST.—We cannot advise you as to the recovery of Drawing-paper injured by damp

CHRISTOPHER.—The height of St Paul's Cathedral, from the pavement in the street to the top of the vane, is 404 feet

A CORRESPONDENT, "on hospitable care intent," may learn what he lacks from Soyer's "Modern Housewife"

T B C, Edinburgh.—The Numbers will be sent on remittance; they will be is each

A B, Nottingham, has better remain at home

STUDIES.—See the "London University Calendar."

Q, Dublin.—Apply to Mr Bowyer, secretary to the Royal Literary Fund, 73, Great Russell-street, Bloomsbury

B S N, Bromley.—Send us the painting to a picture-dealer

A CONSTANT SUBSCRIBER, Sunderland.—Yes, price one shilling

J W K, Bury.—See the memoir of the late Sir Robert Peel, at page 8 of the present Number

A SUBSCRIBER.—We erroneously stated the volume to end on June 22, that the Duke of Wellington had not sat in the House of Commons. The first place he represented was Trim

" Modern Housewife"

T B C, Edinburgh.—The Numbers will be sent on remittance; they will be is each

A B, Nottingham, has better remain at home

STUDIES.—See the "London University Calendar."

Q, Dublin.—Apply to Mr Bowyer, secretary to the Royal Literary Fund, 73, Great Russell-street, Bloomsbury

B S N, Bromley.—Send us the painting to a picture-dealer

A SUBSCRIBER, Sunderland.—Yes, price one shilling

J W K, Bury.—See the memoir of the late Sir Robert Peel, at page 8 of the present Number

A SUBSCRIBER.—We erroneously stated the volume to end on June 22, that the Duke of Wellington had not sat in the House of Commons. The first place he represented was Trim

Many of our most valuable arms rest on no other authority

H B S.—The arms of Swindell are " Arg. two swords in saltire az. hilted or, in chief a boar's head erased pur

A LIVERPOOL S. SUBSCRIBER.—Henry Bathurst, Bishop of Norwich, died 6th April, 1837, and was succeeded by Edward Stanley, who held it till his decease, 6th Sept., 1849

G M G.—The young lady is called "Miss," without the prefix of the Christian name

E S R, Chesterfield.—It does not appear that King Victor Emmanuel IV. was ever married

D F N.—The point is doubtful, but we are inclined to think you would be liable, and, if so [illegible], the coroner's inquest would most probably be held to be an accidental escape

A SUBSCRIBER FROM FIRST TO LAST.—The adoption of a coat of arms, as suggested by our correspondent, would, most certainly, be in accordance with the custom of early times. Many of our most respectable arms rest on no other authority

Y H.—We do not think there is a manuscript Memoir of Robert Bruce in the British Museum

L L D, Hagerstown.—For the foreign Orders of Knighthood, see "An Accurate Historical Account of all the Orders of Knighthood at present existing in Europe"—a work printed abroad, the author being Sir Lewis Namier, an Englishman; 2 vols 8vo The late Sir Harris Nicolas published "Orders of British Knighthood," 4 vols. imperial quarto

C R, Chesterfield.—A Portrait of the lamented Sir Robert Peel will be engraved in our Journal of next week

J H B, Turnham-green.—We do not recollect

A M, New Bond-street.—Our correspondent's question is not so easy to answer as it would seem; for the number of cataracts or rapids varies with the season of the year. The following, however, are those reported upon as dangerous to pass at any season.—1. Assuan; 2 Wady Halfa; 3. Semneh: 4. Amboko.; 5. Dasi; 6. Abo Hamed.

AN IRISH SUBSCRIBER.—Received

** We are compelled, by want of space, to omit the Engraving of the Foundation of a Militia Arsenal at Guernsey, from a Sketch by Paul J Naftel, Esq

ERRATUM at page 464 of our last Volume.—The height of the Rose-tree should be 10 feet, and the circumference 38 feet.

BOOKS, &c., RECEIVED DURING THE WEEK.

South Africa Delineated.—Sermons on the Lord's Day.—The Westons.
MUSIC.—Fersual Love Song.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, JULY 6, 1850.

The debate which was brought to a close on Saturday morning last was, in every respect, the most interesting and the most important of the session, or of the Parliament. Whether we look to the object under discussion—to the mighty result involved—or to those minor points, the zeal, learning, ability, character, position, and eloquence of the various speakers—it stands out in bold relief from amid all the parliamentary conflicts of our time.

The adverse vote of the House of Lords, which led to these protracted and eloquent discussions, was a small and comparatively unimportant matter. The Upper Chamber simply decided that the conduct of the British Government in reference to Greece, in the late unhappy disputes with that country, was ill-judged, and calculated to damage our reputation and to embroil us with our allies. The discussion in the House of Commons necessarily took a far wider range. The friends of Lord Palmerston, and the admirers of his general policy for twenty years, refused to narrow it to such an issue. They felt that to reprimand the Minister for his proceedings in Greece, was to condemn all he had done between 1830 and 1850; and that the system which he had uniformly endeavoured to carry out was to be judged of as a whole, and not to be broken up into fragments, and to be reversed by the nation, because one of the fragments might happen to be somewhat unshapely, when taken by itself. Mr. Finlay and his little strip of garden-ground, Don Pacifico and his warming-pans, the Greek affair and all that related to it, sank into utter insignificance in the presence of this wider topic. It was admitted by the country, and re-echoed in the Legislature, that if even an error had been committed in the tone assumed towards Greece, and in backing with such a formidable agency as Admiral Parker's fleet the possibly exaggerated claims of two British adventurers, the question in reality to be decided was, whether the policy of Lord Palmerston over the whole Continent was to be reversed? The Legislature had to solemnly decide, before the eyes of expectant Europe, whether the statesman who had managed the foreign affairs of this country in times of unexampled difficulty and peril, had or had not managed them in a manner consistent with the high and proud position which Great Britain was entitled and compelled to hold—with the character of Englishmen, and with the interests of peace, civilisation, and constitutional freedom in every part of the world? To have decided in the negative, would have been the condemnation of the Ministry; but it would, at the same time, have been the humiliation of the country. Luckily, such a result was avoided.

The opponents of Lord Palmerston, as was their wisest course under the circumstances, persisted in restricting the discussion to the narrowest possible circle. They made particularly merry with the north-country astuteness and "canniness" of Mr. Finlay, and with the Hebraical usuriousness of Don Pacifico. The exorbitant inventory of the Jew money-lender was a fruitful source of laughter or invective. But the large body of independent members, who had the interests of this country, and not those of party, to consider, and who possibly shared in the general feeling that the Greek business was at best unhappy, and at worst discreditable, saw clearly enough that the wide basis of discussion fixed by the terms of Mr. Roebuck's motion was, under the circumstances of Great Britain with regard to foreign powers, the only true one on which the question could be debated, and that Lord Palmerston must stand or fall, not by the recent proceedings taken against the unworthy Government of Greece, but by his whole policy as compared with the only other policy that could be substituted for it. There were thus three distinct and separate parties to the debate. In the first were those who condemned both our conduct with respect to Greece and the whole foreign policy of Lord Palmerston; in the second were those who deplored the Greek differences, and the manner in which they were conducted, but who did not deem their

result of sufficient importance to overthrow a Minister whose general policy was so bold, so able, so successful, and so national; and in the third were those who insisted that the Greek question and its whole conduct formed no exception to the ability, justice, and splendour of his Lordship's administration.

The discussion evolved some curious combinations of parties. In the first class were ranked not only the men who desired to over throw the Government and to step into office themselves, but all who for this purpose prompted the attack upon Lord Palmerston in the House of Lords, but men who did not seek office, and others who had been usually numbered among the supporters of the Ministry. The party without statesmen, as it has been called, including Mr. Disraeli as its chief; the statesmen without party, including the lamented Sir Robert Peel, Sir James Graham, and Mr. Gladstone; and some of the Free-Trade party, including such men as Sir William Molesworth and Mr. Cobden, were alike found among the opponents of the Minister. Never did such conflicting principles find themselves associated in the vortex of one minority. Interference and non-interference, war and peace, militarysm and Quakerism, voted together to oust a Minister whom not one of them accused of incapacity or dishonour. Among his supporters was found an almost equally heterogenous assemblage of names. The result was the signal triumph of the Administration, the nullification of the hostile vote of the House of Lords, and the notification to Europe, that, insular as is our position, and small our territory, we stand in the vanguard of European civilisation—that we are still as ever determined to maintain our position as a preponderating power, upon whose subjects no injury can be inflicted without redress, and without whose consent no step can be taken to change the political status of any other nation of the great European Commonwealth. No one will deny that it is necessary, not merely to our national honour, but to our very safety as a State, that we should hold rank in Europe among the greatest powers. We are, in fact, among the Peers of the world, and cannot descend to be the Commoners. Our dignity and rank are essential to our well-being and to our very existence. If the opinion of England on a matter of European importance be ignored, defied, and set at nought by any State whatever, we are no longer what we were. If any nation feels that it can insult us with impunity, we are no longer a first, but a second-rate power. We hold our rank, not by the extent of our territories, the strength of our armies, or even of our fleets, but, in a great degree, by the moral influence of our past history. In holding and asserting this rank, we preserve the peace of the world. Had England no more weight in Europe than Holland or Sweden, how long would war be prevented? how long would Russia keep her impatient claws from the Turkish Empire? and how long would other States refrain from forming themselves into new combinations, and endeavouring to round and consolidate their territories at the expense of their neighbours? The answer is obvious. We may have wished that, in some instances, Lord Palmerston had shown less asperity of manner towards minor powers; but, taking him with this fault, and every action that his opponents can lay to his charge, where is the living statesman whose antecedents are such as to wish he had been in Lord Palmerston's place after the events of 1830, or after those of 1848. We must confess that, for our parts, we do not know him.

Upon the whole, this great debate reflected the highest credit upon the British Parliament; and proved that the ancient eloquence is not extinct in modern days, and that it only needs a great occasion to revive, with added splendour, all the oratorical glories of past times.

THE LATE POSTAL DISARRANGEMENTS.

BY THOMAS MILLER

LETTERS from those we esteem and love, are the golden links which chain our affections to the absent, causing us to feel for others, and divesting our natures of that selfishness in which we are all, more or less, liable to indulge. They bring hope to the sinking heart, comfort to the mourner, sympathy to the distressed, pity to the poor outcast, redress to the wronged, support to the fallen and help to those who are perishing by the way. They are silent messengers that fly from one end of the earth to the other on their mission, gathering up wandering affections and estranged hearts, and bringing them back to the old familiar hearth once more, to be caressed, wept over, and smiled upon. At their bidding Grief parts her long hair, dries her tears, and takes her sweet sister Resignation by the hand; while Religion, with her holy eyes uplifted to Heaven, spreads her clasped palms above their heads and blesses them. They bring back old memories, and unlock the long-dried fountain of tears, causing Pride to fall prostrate, and, with many a sob and heart-breathed prayer, to bow before the throne of mercy, and crave forgiveness. In a letter the mother tells her absent child how she is remembered in her prayers, and ends by calling on her God to bless her. We speak it reverentially, but we believe as many hard hearts have been touched by the appeal of letters, and as many repentant tears shed after their perusal, as were ever softened or poured forth while listening to all the sermons that were ever preached. Only to look on the handwriting of one who is endeared to us all the more through absence—to know that the follies we have been guilty of have not altered that true heart, is, we think, the finest state a human creature can be placed in before entering a church or chapel to worship the Creator. Last summer, during the dreadful epidemic—when strong men were falling all around us like grass before the scythe of the mower—when many, to appearance as well as the evening, were dead and buried in a few hours—who at that awful period was so barbarous as to propose stopping the postage on the Sabbath? A letter on the Sabbath at that trying time was the greatest comforter that could be sent to a family in the country when the beloved one was an in-dweller in this great city, which the Destroying Angel seemed to overshadow. Would those grateful prayers be blown back from the footstool of God, because that letter was received on a Sunday?

Some dear child might be returning to school on a Saturday—there is an accident on the railway—he is placed in the sorry room of an inn—his mother is written to—all he cries for is his dear mother: the letter which is sent to summon her is detained twenty-four hours, through the vote of ninety-three men; it reaches her on Monday, and she rushes off broken-hearted because she had not received the tidings on the Sunday. Meantime, the child dies, while raving for his mother. The broken limb seemed forgotten as his thoughts travelled homewards. It was but a journey of two hours: between every ticking of the clock he listened for her footstep; he only prayed to look on her face before he died. The tears of repentance fell on him die, for they prevented the mother from receiving his letter on the Sabbath.

The friendly lawyer is written to on the Saturday: the harsh old man finds himself dying; his conscience smites him, and he wishes to alter his will in favour of the son whom in a moment of anger he had disinherited. The old man lingers until Monday morning, then dies at the same hour his lawyer receives the letter. The vote of ninety-three men stops this letter on the Sabbath, and leaves the forgiven son penniless.

The Indian Mail arrives—it may be in time for the delivery of many of the letters during the evening of Saturday in London: another of those struggles has taken place—a few papers reach the country, announcing a victory or a defeat; but who have fallen, or who have survived, the relatives in the country cannot know; for ninety-three men have so ordered matters, that their letters must be withheld during the twenty-four hours of the Sabbath. Are those left in such a state of suspense likely to think of anything but the letters they are expecting? if they knew the worst, they would bow before Him who wounded the broken heart. In no matter day could they receive tidings of joy or sorrow, prosperity or adversity: if the ominous black seal from some brother soldier came, they would be the better prepared to break it, and, in their fear and trembling, to call upon Him for comfort who can give it. That day could be prepared them better to sustain sorrow than the morrow, when the business of this work-a-day world steps in between their thoughts and Heaven. In the pew where he who was lost to them had so often knelt, would they kneel and acknowledge the power of Him who giveth and taketh away. No! Ninety-three men have risen up and said, "Neither good nor evil tidings shall reach you when you are best prepared to receive the one meekly and the other submissively, for we have constituted ourselves Lords of the Sabbath!"

A steamer is wrecked, like the *Orion*: many on board perish: those who survive, but lose all they possess, write to their friends and families for assistance No; they must sit shivering and half-naked on the brink of the poor fishermen's twenty-four hours longer than they need, for their letters have been kept back during the whole of the Sabbath

We will not dwell upon the inconvenience the stoppage of letters will cause to all engaged in matters of law—the loss of time and money in keeping or summoning witnesses, and a thousand other "ills which flesh is heir to." Nor is it to letters alone that we need limit our remarks. A newspaper to a reflecting mind is a sermon illustrating the casualties of human life, ever preaching to those who fancy they are secure seated "to take heed lest they fall." In them we are told how a King, who, the day before, boasted that no earthly power could overthrow him, was, on the day following, flying to save his life, penniless and all but a beggar. Of a brave nation, struggling for their ancient liberties, being suddenly overwhelmed by the interference of a foreign power, when they were on the point of overthrowing the oppressors who had so long kept them in bondage. How he who held his head highest in the world of commerce, and was all but knighted to and worshipped by the adorers of Mammon, and envied by half the world for the influence and wealth he possessed, was compelled to disgorge his ill-gotten gold, and to crawl through all the dirty labyrinths of chicanery to escape being branded as a common swindler Of red-handed murder being overtaken by Justice, who made the lightning his messenger, which shot by the murderer as he journeyed in the train, and, striking the bell, awoke the sleeping jailer, and bade him make ready to receive the shedder of blood. Of some ancient building, the boast of ages, consumed by fire in a few hours, and no trace left of it but the smoking stones and blackened rafters. How a noble vessel went down at sea, and all on board perished while sleeping in their security in their berths. How some great statesman, before he had time to replace his hat, after acknowledging the greetings of the assembled populace, was thrown to the earth in an instant through his horse stumbling, and borne away senseless and unconscious of all that had befallen him, died. Of acts of courage in the preservation of life, worthy of a tall monument to record such deeds. These, and a thousand other matters, which pass before the mind's eye while perusing a newspaper, impress on us the mutability of human affairs, and arm us all the better to battle with misfortune, carrying our thoughts, almost unconsciously, to "another and a better world," while dwelling on the casualties which surround every shade of life on earth. Thus, newspapers are sermons preached on passing events, for which every hour furnishes a text—being seized upon in its flight, and made to register the deeds it witnessed; in their columns are Daguerreotyped the transient and ever-changing features of the living world.

Is it not a wanton inroad on our domestic liberty, on a sudden to stop all these harmless messengers, and to throw us as far behind, as regards obtaining information, as if we lived in the days when slow stage-waggons and pack-horses were the only means of communication between town and town, instead of the age when the railway and electric telegraph were invented? Are not those who check the onward progress of man with man the enemies of peace and order? Have they not, also, selected a dangerous time for such an experiment? Knowledge will spread in spite of them. It is too late to fetter the "Fourth Estate," for it is no longer the infant Hercules struggling in its cradle, but the full-grown warrior, whose iron sinews are well knit, and whom long practice has rendered perfect in warfare.

In no country in the world is the Sabbath held in higher reverence than in England. The day is never desecrated by boisterous out-of-door games, open theatres, and noisy dancing-booths; nor do we now see the humbler classes rushing into the suburbs on a Sunday morning, to witness dog-fights, cock-fights, and badger-baitings, as they did some score or two of years ago. A great change has come over this class—the generality of them are now reading and thinking men, and this alteration the press alone has made. Deprive them of their newspapers, and they can tell what they may fall back upon. You cannot compel them to church, neither can you compel them to sit all day brooding over a handful of religious tracts. They are no longer men of one idea—rely upon it, they are religious in their way. You may make dukes shiver, but the masses laugh at others eating them. It is the dog in the manger we most complain of: take the stamp duty off newspapers, and leave us to send our letters without the interference of Government, and we care not if every public-house in Great Britain is closed to-morrow. Private enterprise will do all the work.

Englishmen are celebrated as a patient, burthen-bearing race: they swallow the summer dust on a Sunday, without grumbling about the state of the unwatered roads; and pay double toll on the only day many of them can get out for a drive into the country, without a murmur. If the Lord Mayor blocks up one street with his black board, they look at it, obey, and drive down another. Should a policeman search their horse's head while divine service is proceeding in some fashionable church, they turn down the by-street, and make the windows of the little Dissenters' Chapel, which they have to pass, jar again: yet draw no comparisons" between the frequenters of the one place of worship and the other. This they will endure; but order them to lower their blinds, and sit with a religious book before them all day, and, although they will not erect barricades, they will get up an alarming buzz, and show more threatening front than if ten million enraged wasps were loose and flying around the Houses of Parliament. They are well aware that if they once tolerated such an abuse of their Sabbaths as the stoppage of the Sunday post, something else would soon be issued as that which lately emanated from the Prussian Post-office, refusing to forward all papers that were (no doubt) objectionable to Government. Deprive John Bull of his materials for thinking, and, assure as he may sermons, he will soon spring up and demand why his domestic quietude is interfered with; for he is a creature of habit—used to his little harmless indulgences, and will have them, either "by book or by crook." Should a minister being used, on which the ill-paid curate rides to do double duty in the two parishes that he wide and far apart, and, though John is merciful to the "cattle within his gates" on the Sabbath, he will say that the horse must labour on all other days of the week, if necessary. His religion is seated on a broad, firm base; and he fodders and milks his cattle, conscious that he is attending to the duties which God ordained him to fulfil. Ask him to ride twenty miles for a doctor, or on a charitable errand, and see if he will object because it is the Sabbath.

We wonder how many hours out of the twenty-four her Majesty's ministers devote to religious duties on the Sabbath, without their thoughts wandering into the perplexing mazes of politics? The mind of the statesman is never at rest—work; your useless man, whose thoughts are centered on himself, who is ever praying that he himself may be saved, might bend his knees until doomsday without being interfered with, if he would leave others to perform their worldly duties and devotions in their own way. The Chancellor of the Exchequer admitted that this measure would prove a great inconvenience, yet he allowed her Majesty to be made the cabinet; he, in some measure, the state pill-box. Sickness, knowing the dose would be injurious, looked on while he permitted us to take it, and gravely shook his head as if to say, "I trust, from what you are sure to suffer, that it will be a caution to you never to take quack medicines again."

We respect every man's conscientious motives. If his letters and papers are dropped into the box at his door, we have no wish to compel him to turn at the postman, not even at the black-bordered envelope, but to pass on, nodding hand. If, to spare his servants labour on the Sabbath, he chooses to sit down to a cold dinner, we respect him for it: but we cannot permit him to force the hard-working man, who only dines with his family once a week, and that on a Sunday, to eat a cold dinner, because he himself chooses to do so: nor deprive the poor man of his Weekly Paper, because he takes in one of the "Dailies." It is very natural to suspect men who violate our rights, and openly prefer themselves better than they suppose us to be. We, who believe in our Bibles, have not forgotten the Pharisees of old: those whom we address ought also to remember that a Jew has been elected by the citizens of London to serve in Parliament. If postmen are too religious to deliver letters on the Sabbath in the country, let them stay at home, and leave us to find those who are able and willing and trustworthy

COUNTRY NEWS.

DEATH OF SIR ROBERT PEEL.

TAMWORTH.—The shops in this town were generally closed to-day on receipt of the melancholy intelligence of Sir Robert Peel's death. No acquaintance was observable. The grief expressed extended to Fazely, and throughout the district for many miles around. The domestics at Drayton are in a state of great affliction. The rent-day of Sir Robert was on Thursday last, in consequence of the accident, no dinner took place. A general gloom pervaded the tenantry.

BIRMINGHAM.—The melancholy death of Sir Robert Peel has created a universal gloom among the inhabitants of this town. It is the all-engrossing topic of conversation, and parties of every shade of politics express the deepest regret for what is considered a national loss. So general a demonstration of sorrow has not been witnessed since the death of Mr Canning.

LIVERPOOL.—The news of the death of Sir Robert Peel became known here at an early hour on Wednesday morning, and few events have excited a deeper feeling of regret and sadness. In this great mart of commerce there is but one universal feeling of sorrow for the loss of this illustrious statesman. Upon several of the churches the union-jack has been hoisted half-mast, and muffled bells have pealed their solemn sounds. On 'Change there has not been comparatively any other subject discussed In the Exchange News Room the following notice was posted up:—It is respectfully suggested that some manifestation of general regret for the decease of Sir Robert Peel be immediately adopted. Perhaps an address of condolence to Lady Peel and family would be most appropriate, or a piece of crape worn on the arm or hat.

HOP INTELLIGENCE.

MAIDSTONE.—Our reports from all quarters uniformly speak of the clean state of the plantations, and the growth of the bine.

CRANBROOK.—The hops in this parish continue progressing, looking healthy, and at present no fly is seen. There will not be a large crop, owing to the slackness of bin in many of the gardens.

HORSMONDEN.—Our hops are still quite free of vermin, and are beginning to show a profusion of lateral branches: altogether, they are presenting a very luxuriant appearance.

CANTERBURY.—We have little to say in respect of the hops, except that they progress most favourably, and are tolerably free from vermin. General accounts speak of the bine being strong.

TICEHURST.—The hop-bines in this parish have made great progress. They are quite clean, and, in many gardens, have attained the height of the poles. There is at present every appearance of a good crop.

CHICHESTER NATIONAL SCHOOLS.—On Saturday last, the boys belonging to the National Schools of Chichester, about 250 in number, paraded the streets on their way to that delightful place, described in one of Crocker's poems as Kingley Vale, where the party were regaled with good old English fare, consisting of five rounds of beef, forty plum-puddings, sixty-five 4-lb. loaves, twenty-eight pounds of cheese, and a hogshead of beer.

DOVER HARBOUR.—The total amount of tolls received on vessels entering Dover harbour, from the 10th of October, 1847, to the 10th of October, 1849, was £227 4s. 3d. The tolls on vessels passing amounted to £51,969 12s. 11d., making a gross total of £23,543 16s. 2d. This sum was contributed by 32,333 vessels.

The *Monmouthshire Merlin* expresses its pleasure at finding that the colliers are submitting to the reduction found necessary from the state of the coal market, and are about returning to their work generally.

A large portion of a beautiful wooden bridge over the Esk, an estuary of the sea, on the Whitehaven and Furness Junction Railway, was destroyed by fire on Friday morning week.

POSTSCRIPT.

HOUSE OF LORDS.—FRIDAY.

PARLIAMENTARY FRANCHISE (IRELAND) BILL.

Lord STANLEY said that he should propose that this Bill should not come into operation until June, 1851, and that there should be a voluntary instead of a compulsory registration

Their Lordships then resolved themselves into committee on the Bill.

Lord STANLEY moved as an amendment, on the clause relating to the formation of the registry, that no voter should be placed upon the register by the mere fact of his paying the requisite taxes, but that an application should be made by him for the purpose.

After some discussion, in which the Marquis of LANSDOWNE and Earl GREY opposed the amendment, the House divided—affirming the amendment by a majority of 33 to 29.

The other clauses were agreed to, and the bill was ordered to be reported. Adjourned.

HOUSE OF COMMONS.—FRIDAY.

ASSISTANT-SURGEONS IN THE NAVY.

In answer to Captain Boldero, Sir F. BARING said that the Government had issued orders regarding the furnishing of an extra cabin for the purposes of study for those officers, but they had not yet been carried out. He was as anxious as possible to give new cabins to assistant-surgeons, but, unfortunately, it was not possible, by a vote of the House, to increase the accommodation on board a ship. Many officers connected with the navy doubted very much the wisdom of the vote which had been come to by this House.

PRUSSIA AND DENMARK.

Mr. DISRAELI.—I wish to ask her Majesty's Government whether they have received any information as to the conclusion of a treaty of peace between the King of Prussia and the King of Denmark; and, in the event of their having received such information, whether they will inform the House in what capacity the King of Prussia signed the treaty, whether as Sovereign of his own dominions, or on the part of the Germanic Confederation, or in both those capacities?

Lord PALMERSTON.—I am enabled to inform the House that the Government have received a dispatch from her Majesty's Minister at Berlin, enclosing a copy of a definitive treaty of peace which was signed on the 2nd inst., and concluded between the King of Denmark on the one hand, and the King of Prussia on the other, acting in his own behalf and also on behalf of the Germanic Confederation, and that treaty was to be ratified in three weeks. (Hear, hear.)

REPEAL OF THE MALT DUTY.

Mr. CAYLEY having presented a great number of petitions from different parts of the country, praying for the repeal of the Malt-tax, proceeded to move for leave to bring in a bill to repeal the malt duties.

After a lengthened discussion—in which Mr. DISRAELI supported, and Lord J. RUSSELL opposed, the motion—the House divided, negativing the motion by 247 to 123.—Adjourned.

THE OUTRAGE ON THE QUEEN.

RE-EXAMINATION OF THE PRISONER AT THE HOME OFFICE.

At a quarter before twelve o'clock yesterday (Friday), *Robert Pate* was again brought to the Home Office, from the House of Detention, in the custody of Mr. Superintendent Orway and a police constable, for the purpose of re-examination on the charge of assaulting her Majesty on Thursday evening, the 27th ult., by striking her on the head with a cane, in Piccadilly. There were but few persons round the doors of the Home Office, the excitement having entirely subsided since the fasts of the dastardly attack have been made so fully public.

In the Council-room there were present Sir George Grey, Secretary of State for the Home Department; the two Police Commissioners; Sir B. Hall, chief magistrate of Bow-street; Mr. Burnaby, clerk of Bow-street police-court; and Mr. Maule, Solicitor to the Treasury

The Attorney-General again attended on behalf of the Crown; and Mr. Huddlestone, by permission, for the prisoner.

There were only two fresh witnesses; namely, Sir James Clark and the coachman of Lady W. d'Eresby. Mr. Cooling and policeman A 8 were, however, recalled.

The first witness was Joseph Bas, who said that he resided at No. 12, Pembroke Mews; he was coachman to Lady Willoughby d'Eresby. On the evening of Thursday, the 27th of June, he saw her Majesty leaving the court-yard of Cambridge House, about twenty minutes past six o'clock, in her carriage; some children being in the carriage with the Queen. Her Majesty had scarcely left the court-yard when he saw a tall man strike at the Queen with a small thin stick, which he held in his hand. He then saw her Majesty put up her hand to her head directly the blow was struck, when one of the Queen's servants seized the assailant, and he was delivered over to the policeman. The prisoner was the person who struck at her Majesty

Sir James Clark said he was physician to her Majesty. On the evening of Thursday, the 27th ult., he was called in to visit the Queen. He arrived at Buckingham Palace between eight and nine o'clock the same evening, and was immediately introduced to her Majesty. He examined her Majesty's forehead, when he found a swelling upon the left temple, and a small incision, from which blood had oozed, but was stopped before his arrival.

Sir James Clark was recalled, and again stated that he was sure the prisoner was the man who struck her Majesty, for he himself caught hold of his right arm, and held him until Silver, the police constable, took him into custody, and conveyed him to the station-house.

Mr. Tyler, the gunsmith, produced the stick which he found in the prisoner's hand when he arrested him. It was what is called a partridge cane, of a dark brown colour, curved in a semicircle at the handle, and with a small silver ferrule on the end. It was nearly an inch in circumference, and 37 inches in length.

The Attorney-General said that the evidence which had been produced fully established the fact that her Majesty had been struck, and that the prisoner was the person who struck the blow. It was necessary to call the Queen's servants, and he therefore asked that Robert Pate should be committed for trial on the charge which had been proved against him.

The prisoner was then fully committed to Newgate, to take his trial for misdemeanour at the next session of the Central Criminal Court, the six witnesses being bound over separately in the sum of £100 each to appear and give evidence; and Mr. Hayne, the Police Commissioner, entered into security to conduct the prosecution

The prisoner was shortly afterwards conveyed to Newgate in the custody of Superintendent Orway. When the cab left the Home-office, a crowd was collected to witness his departure, and several persons hissed and groaned.

THE REVENUE.

The account of the Quarter's Revenue was made up last night (Friday) The returns are, for the quarter ending July 5, 1850:—

	£
Customs	4,124,777
Excise	3,329,225
Income-Tax	1,026,536
Stamps	1,[illegible]7
Assessed Taxes	2,073,281

Corresponding quarter of last year, viz. ending July 5, 1849:—

	£
Customs	4,124,777
Excise	3,329,262
Income-Tax	1,033,240
Stamps	1,619,697
Assessed Taxes	2,064,730

THE REMAINS OF SIR ROBERT PEEL, BART.—The family of the lamented Baronet removed his remains yesterday (Friday) evening, by special train, to Drayton, where they are to be interred in a few days.

Lady Peel.—We regret to learn that Lady Peel continues very much indisposed. Her Majesty sent to inquire after her Ladyship twice on Thursday. The Duke of Wellington and many others of the highest nobility made inquiries during the day.

LATEST FOREIGN NEWS.

FRANCE.

Our accounts of yesterday (Friday) mention that M. Dupin has been re-elected President of the French Assembly for the next three months, by a great majority. We are happy to say M. Dupin could not agree as to the candidate of their choice, and hence that hon. member obtained an easy victory

The Government project respecting the press is denounced upon all sides, and is exciting considerable apprehension that it should become law

Some more arrests have taken place at Lyons, the individuals concerned being mixed up with the Oran conspiracy.

ITALY

An official order has just been issued at Naples, by which the King commands that all functionaries shall take a new oath, according to the decree of 1816. This edict virtually abolishes the Constitution, the obligation the new oath imposes being implicit obedience to his Majesty.

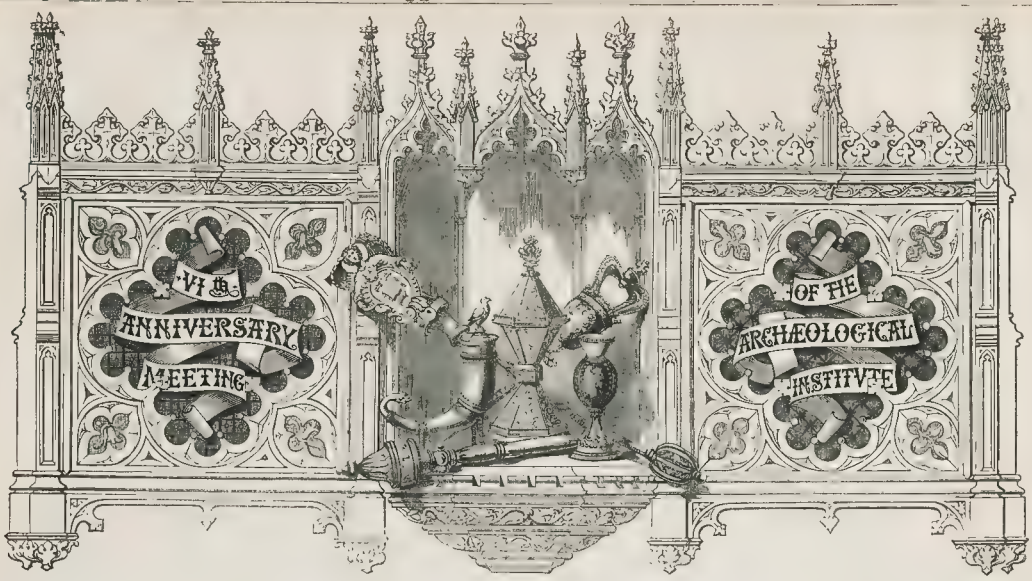
RUSSIA

The Imperial Government of Russia has just published a ukase, interdicting all paid or unpaid functionaries in Poland from marrying without authorisation. The object of the decree is to prevent functionaries, by their marriage, acquiring a position which they cannot maintain.

DENMARK.

According to advices from Brussels, the statement that a peace has been concluded between Prussia and Denmark has been confirmed, the question of secession to the throne of the latter being reserved.

AN EXPENSIVE PAUPER.—A woman, named Sarah Clayfield, died in Stroud workhouse last week, aged 67 years. It is understood that she became an inmate of Horsley poorhouse when an infant three weeks old, and remained there until the formation of the Stroud Union, consequent upon which she was removed to the establishment in which she died. Supposing, then, the cost of her maintenance averaged 2s. 6d. per week, the deceased has cost the parish upwards of £440 in hard cash, without counting interest, which, for such a long period as her lifetime, would be a very handsome bonus,



In the last Number of our Journal we briefly adverted to the annual meeting of the Archæological Institute, which was then being held at Oxford. We have now the satisfaction of presenting our readers with Illustrations of some of the more prominent events of the week; and also with Engravings of some of the

CHRISMATORY, FROM THE INSTITUTE MUSEUM.

objects of interest which were gathered together for exhibition in the temporary Museum formed in the Taylor Buildings, under the superintendence of the hon Secretaries of the Institute.

The proceedings commenced on Tuesday, the 18th ult., when an introductory meeting was held in the Sheldonian Theatre, for the purpose of installing the President elect, the Marquis of Northampton, who, in assuming the chair, amidst loud applause, acknowledged the kindness with which he had always been received at Oxford, and especially on the two previous occasions on which he had presided at the meetings of the British Association.

After a vote of thanks to the late president, the Right Hon. Sidney Herbert, had been unanimously carried, a long, learned, and elaborate introductory address was delivered by Charles Newton, Esq., M.A., of the British Museum; but it is not possible, within our limits, to do justice to this brilliant and interesting effusion, which was listened to throughout with the most marked attention, and, at its conclusion, called down an unanimous expression of approbation from the audience. At the evening meeting, at the Town-Hall, the principal of Brazenose College read a highly interesting paper on the history of St Mary's Church, Oxford. This church (which is now under repair by the University) is mentioned in Domesday Book, and, in all probability, was (as tradition asserts) founded by Alfred: the present edifice, however, which was erected about the year 1490, has repeatedly suffered from storms, and been as often renewed in the style in fashion at the day, so that, in many parts, it now presents an incongruous appearance. There is every reason to hope that such portions of the building as have been confided to the supervision of Mr. Buckler, the architect, will be restored to their pristine style and beauty.

On Wednesday the morning was occupied by the company in visiting the various Sections of History, Architecture, and early and Mediæval Antiquities, in each of which papers were being read. The public dinner took place in the Town-Hall, and was attended by nearly 200 of the members. The arrangements gave the greatest satisfaction, and the party broke up in time to attend the *soirée* at Exeter College, to which they had been invited by the Rev. W. Sewell, President of the Oxford Architectural Society; and of which we subjoin a representation, taken from the College Gardens, which were all thrown open and brilliantly illuminated. The good taste and elegance of this entertainment, combined with the various resources, both of nature and art, of which the donor of the feast was not slow to take advantage, rendered this *fête* most *distinguée* in character, and one that will long be remembered by the 800 or 900 guests who partook of Mr. Sewell's splendid hospitality.

On Thursday, in consequence of the projected excursions to Ewelme and Dorchester, the sections did not meet. At the former place, a large party were hospitably entertained by the Rev. Dr. Jacobson, Regius Professor of Divinity; and at Dorchester Mr. Freeman illustrated practically the memoir which he had previously read on the Church, and pointed out the chief subjects worthy of note in this ancient edifice. Others took advantage of the vicinity of Blenheim, Nuneham, Iffley, Abingdon, Cumnor, or Cuddesden, to visit these places; or occupied themselves in inspecting the halls and chapels of the various colleges in Oxford, which, by permission of the authorities, had been thrown open to the members. In this manner much of the ancient College plate (and other objects of interest which are not usually to be seen by the casual visitor of the University) were shown. A *réunion* took place in the Town-Hall in the evening, which was presided over by the Vice-Chancellor.

On Friday morning several papers were read in the Historical Section. At twelve o'clock, the Rev. Professor Willis delivered his lecture on the Cathedral, in the Sheldonian Theatre, where a most numerous and distinguished audience was assembled. The Professor commenced by observing that nothing very new could be expected from him on this occasion, the Cathedral not affording him in fact the usual theme, being inferior to most of our ecclesiastical edifices, of any note

(*Continued on page* 11.)

THE FETE IN EXETER COLLEGE GARDENS

DEATH OF THE RIGHT HONOURABLE SIR ROBERT PEEL BART.

THE late Sir Robert Peel, of whom, with unfeigned regret, we present this brief obituary memoir, was born in a cottage, near the family residence of Chamber Hall, in the neighbourhood of Bury, in Lancashire, on the 5th of July, 1788. Much has been said of the low-house of the Peel family, and no little misconception indulged in with respect to the obscurity of its descent. The following details, founded on unquestionable data, will show that it can be traced back for several generations through a line of respectable progenitors, the great-grand-uncle of the first Baronet, the Rev. Nicholas Peele, having held the curacy of Blackburn, in Lancashire, so far back as 1650. The name we find originally written with a final e; and a family of Peele was, as early as the beginning of the fifteenth century, seised of lands in Salisbury and Wiltshire districts, in the lower division of Blackburn, Lancashire. About the close of the next century, Robert Peele left the parish of East Marton, in Craven, and settled at Hale House, in the hundred of Blackburn, with which his descendants have ever since been connected. He died in 1608, leaving a son, William Peele, of Hale House, father of William Peele, of Hale House, who died in 1651, leaving, by Margaret Livesey his wife whom he married, in 1619, a son, Robert Peele of Hale House, whose two sons were Robert Peele, of Peele Fold, Oswaldtwistle, and the Rev. Nicholas Peele, curate of Blackburn. The elder, Robert Peele, of Peele Fold, married in 1681, Anne Warde, and died in 1733, leaving one son, William Peele, of Peele Fold, who married, in 1712, Anne, daughter of Laurence Walmesly, of Upper Darwent, and was father of Robert Peele, of Peele Fold, who, by Mary his wife, daughter of Edmund Haworth, of Blackburn, had a large family, the third son of which was the first Sir Robert Peel, Bart., who, by the union of integrity and industry, ability and sense, rendered good service to his country, and realised for his family a splendid inheritance. By his first wife, Ellen, daughter of Mr. Yates, partner in his extensive cotton factories in Lancashire, he left, with other issue, an eldest son, the eminent statesman.

Two years after the birth of Sir Robert Peel, his father, who had by that time acquired an immense fortune, was returned to Parliament for Bury, and, having previously published a pamphlet entitled the "National Debt productive of National Prosperity," he quickly became intimate with Mr. Pitt, who used to consult him on all questions connected with manufactures and commerce. From this intimacy sprang the ambition that his son should be Pitt's successor, and he therefore sent him at a very early age to Harrow, where we find him on the upper fifth form in the list of 1803; and on the lower fifth, Lord Byron, who says of him "there were always great hopes of Peel amongst us all, masters and scholars. As a scholar, he was greatly my superior. As a schoolboy, out of school I was always in scrapes, and he never; and in school, he always knew his lesson, and I rarely."

BIRTH-PLACE OF THE LATE SIR ROBERT PEEL, NEAR CHAMBER HALL, LANCASHIRE.

In 1804 Peel left Harrow, and entered Christchurch, Oxford, as a gentleman commoner. At the University he was a diligent and laborious student; and in 1808, on taking his degree, obtained what is called a double first-class, or highest honours, in both classics and mathematics. Amongst his competitors were Mr. Gilbert, afterwards Vice-Chancellor of the University; Mr. Hampden, professor of divinity; and Whateley, the present Archbishop of Dublin. A boy from Tunbridge School, writing to one of his former class-fellows an account of this examination, speaks with enthusiasm of the spirit of Peel's translations, and especially of his beautiful rendering of the opening of the second book of Lucretius, beginning—

"Suave mari magno turbantibus æquora ventis
E terra magnum alterius spectare laborem,"

and ending with the picture of the philosopher gazing from his calm mental rest on the disturbed, self-wearying, ignorant, erring world. "Often of late," said one of those to whom this letter at the time was read, "have I been struck with the fitness of this passage to Peel himself, who, having achieved so much amidst all the strife of party, could, free from its entanglements, see men of all parties gathering the ripening fruit of his measures

In 1809 Peel came of age; and that he might as early as possible enter the arena of statesmanship, his father bought him the representation of Cashel. He came into the House avowedly to work his way to the highest office in the State. His father had made no secret of his belief that his son would follow in the path and attain the position of Pitt. Burke, Pitt, and Fox were gone; Sheridan so fallen down that he rarely could be give even faint evidence of his former brilliance: but still the House was not devoid of men of talent and power. There was Grattan, an orator from the intensity with which he felt the wrongs of the Roman Catholics—stern, unswerving, earnest, and with the great mass of the Irish people around him. And there were also the sarcastic, witty Tierney, Windham, Wilberforce, Whitbread, Perceval, Canning, Castlereagh, Croker, Lord Glenelg in his able days as Charles Grant; and Romilly and Henry Petty; and Francis Horner, master of finance; and Sir Henry Parnell: and there came into Parliament about the same time Lord Palmerston, Brougham, and Frederick Robinson. These were the men amongst whom Peel must rise. Circumstances favoured him.—Canning and Castlereagh had fought their famous duel, and resigned their offices; the Duke of Portland had also resigned; Perceval became Premier; the Marquis of Wellesley, the Earl of Liverpool, and Lord Palmerston took office with him; Parliament was about to meet, and at its very opening there was the Walcheren disaster to be defended, so that the Address might be got through; and to Peel, but just entered the House, and not yet two-and-twenty—possibly under the idea that the result might be a practical rebuke to his ambition—was entrusted the seconding of the Address. His speech—and it was his first—was spirited and effective, and led the way to an animated debate, and a large majority for the Government. This was on the 10th of January, 1810. Peel shortly after spoke on the bringing-up of the report of Lord Porchester's committee, condemnatory of the expedition to the Scheldt, and again for the rejection of the Livery of London petition as to the committal of Sir Francis Burdett. Neither of these speeches, however, equalled the promise of his first effort; but it was surpassed by his speech of March 18, 1811, upon the Peninsular War, in which he defended the Duke of Wellington, and said: "He could not help reminding the House that at this very hour Lord Wellington might be preparing for action to-morrow; and, when he reflected on the venal abuse which had been disseminated against that illustrious character, he cherished sanguine expectations that the day would soon arrive when another transcendant victory would silence the tongue of envy and the cavils of party animosity; when the British commander would be hailed by the unanimous voice of his country with the sentiment addressed on a memorable occasion to another illustrious character—'Invidiam gloria superasti.'"

This speech brought Peel for the first time into office. Perceval was so pleased with it, that he forthwith appointed him Under-Secretary of State for the Colonies; and in this office his diligence, regularity, and constant attention to business so far further gained upon the Premier, that it was understood he only waited an opportunity to raise him to the Cabinet. Time, however, was not left Perceval to carry his intentions into effect: on the 11th of May, 1812, he was shot dead in the lobby of the House of Commons. On the 1st of June, the Marquis of Wellesley was sent for, but failing to form an Administration, Lord Liverpool was made Premier; and, amongst other changes, Peel was appointed to the Chief Secretaryship for Ireland. He found the business of his new office in extreme disorder, which he forthwith corrected, and gained by his close and careful attention to business, and manifest desire to improve the trade of Ireland, the good opinion of all merchants and manufacturers who had interviews with him.

But the Catholic question was the great difficulty of the day: even then the agitation against political oppression of religious belief had assumed a bold front in Ireland. O'Connell, in all the strength of his youth, was rousing the country to the justice of the claim for emancipation. On the 22nd of June, 1812, Canning carried, by a majority of 234 to 106, a motion pledging the House to consider the Catholic claims in the ensuing session. Peel voted in the minority. He thus appeared in Ireland as the pledged opponent of the question upon which were set the hearts of the vast majority of the people. When, in the session of

CONSTITUTION HILL.

1813, Mr. Grattan moved for a committee to take the Catholic claims into consideration, Peel, for the first time, spoke determinedly against the claims. But, in a debate which shortly afterwards took place on the state of education in Ireland, he strongly urged the right of the people to be taught:—"Assuredly he was the last man who would throw any obstacle in the way of the extension of education to the Irish people. Never would a refusal to such effect be more pregnant with injustice, for in no case could the claim be stronger, *if capacity* and anxiety to enjoy it could constitute a claim. Many instances evincing the thirst for knowledge felt by the Irish peasantry, such as must arouse the warmest feelings in every generous mind, had come to his knowledge. It was a thing quite frequent for working people to deprive themselves of all advantages from the labour of their children, in order that they might have their whole time devoted to literary acquirements; and he knew one parish in which there were no fewer than eleven evening schools, where adults used to repair after the toils of the day, in order to procure that culture which had been denied them in their earlier years." This desire amongst the people for education, and their self-sacrifices to gain it, were never forgotten by Peel: he upheld the National Board, and founded the unsectarian colleges in Ireland.

In 1814 the south of Ireland was in a state bordering upon social disorganisation. The Catholic Board was suppressed by proclamation of the Lord-Lieutenant. Peel, defending the proclamation, charged the condition of the country upon the agitators for Emancipation; and at the same time he proposed, to secure the better obedience to the laws and preservation of peace, the appointment of superintending stipendiary magistrates and a properly organised police force. This system was, in 1822, so extended, that the constabulary of Ireland now constitutes a complete addition to the standing army. In 1816, there was so deficient a harvest in Ireland, that the bitterest distress prevailed, and Peel did his utmost to mitigate the famine by the issue of a Treasury order for the admission of American flour duty free. But still misery and agrarian outrage increased, and the demand of the people for Catholic Emancipation became more loud. On the 5th of May, 1817, Mr. Grattan again brought the subject before the House. The Pope and the Catholic Hierarchy had agreed that the Roman Catholic Bishops should be nominated in the country, and that the Queen should have a veto on the appointment. Peel spoke in opposition to the claims with more force than on any former occasion, upon the ground that the Catholics, having political power, would overthrow the Established Church, and would aspire, as it was natural they should, to the establishment of their own Church in all its ancient splendour. To Peel was now, for the most part, left the defence of Catholic exclusion and Protestant ascendancy: session after session he had the same battle to fight; but on the way the party were at some pains to flatter his ambition. Shortly after the debate in 1817, Mr. Speaker Abbot, M.P. for the University of Oxford, was raised to the Peerage. Early notice was given to Christ Church of Peel's intention to contest the vacancy, and the seat was secured for him before Canning's friends commenced their canvass.

In the following year, Peel resigned his office of Secretary for Ireland.

On first coming into Parliament, Peel went with his father on the subject of currency; and, in 1811, voted with Mr. Vansittart in favour of a paper resolution. On the 3rd of February, 1819, he was appointed on a committee to consider the state of the Bank of England with reference to the expediency of the resumption of cash payments. On the 24th of May he brought forward the report recommending a short extension of the period of restriction, a gradual resumption of cash payments, and the repeal of prohibitions against export and melting of coin, the resumption to be entire on May 1st, 1823. The Bank resumed cash payments two years before the specified time. One of the ablest of Peel's speeches was a defence of this much-abused resumption of cash payments, in reply to a joint attack by William Cobbett and John Fielden, on the 16th of May, 1833. This measure of Peel for the resumption of cash payments gained the Ministry such credit with the commercial world as enabled Lord Liverpool to keep his party for some time in office. Peel, however, continued out of office. In 1819 throughout the manufacturing districts there was general distress, and loud demands from the people for parliamentary reform and abolition of the bread-tax. On the 30th of July a proclamation was issued against seditious meetings. On the 16th of August the people gathered from all the neighbouring places on Peterloo Field, the site of the present Free-Trade Hall, in Manchester. The result of the meeting was the Peterloo massacre. Peel defended the conduct of the Manchester magistrates on this occasion, upon the ground of the long growth of discontent, the secret societies amongst the people, and the dangers that might have followed had that meeting been allowed to pass.

In June, 1820, on the arrival of Queen Caroline in England, a bill of Pains and Penalties was introduced by Ministers, to deprive her of her legal rank and privileges. In this measure Peel took no part; but on the 5th of Feb., 1821, he defended Ministers against the Marquis of Tavistock's motion, condemning their conduct toward the Queen, but he, at the same time, lamented the exclusion of her name from the Liturgy, and the refusals as to the palace and ship-of-war. On the 26th of Feb., 1821, Mr. Plunkett once more brought the Catholic claims before Parliament. The speech was one of surpassing power, and Mr. Peel's reply, in which he passed a high eulogium upon Grattan, and upon Plunkett as alone worthy to be the successor of so great a man. This speech afforded the first evidence of a possibility of a change in Peel's opinions. "I can (he said) most conscientiously assure this House that no result of this debate can give me unqualified satisfaction. I am, of course, bound to wish that the opinions which I honestly feel may prevail, but their prevalence must still be mingled with regret at the disappointment which I know that the success of such opinions must entail on a large portion of my fellow-subjects."

At the end of 1821, important changes were made in the Ministry; and on the retirement of Lord Sidmouth Peel again took office—this time as Secretary of State for the Home Department—in which he soon gained some popularity by the avoidance of harsh language and generally conciliatory tone to opponents.

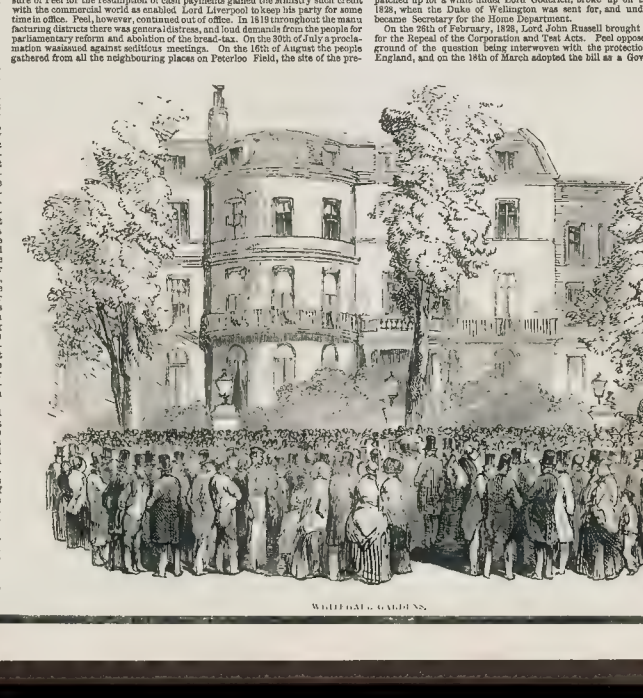
In this session Lord John Russell brought forward his first motion for a Reform in Parliament, in opposition to which Peel made but a very short speech; but he spoke at length in reply to Mr. Canning's motion "for the restoration of the Catholic peers to their political privileges."

In the August of 1822, the death of Lord Londonderry, brought Canning, after some delay, into the Foreign Office. Before his re-election, Lord Brougham called the attention of the House to the threatened invasion of Spain, at the instigation of the Holy Alliance, by a French army. Peel made a cautious defence of the Holy Alliance, on the ground that "the rights of States, if their exercise tend to general injury, are subject to the interference of other States. But that injury ought not to be imaginative, but real." On the 14th of April, 1823 Mr. Canning laid the diplomatic papers on the table of the House. On this occasion, Peel "protested strongly against the doctrine maintained by what was called the Holy Alliance, of its right of interference with the liberty of nations, by the establishment of a sort of European police for the prevention of the success of revolution, wherever it might be found, and under whatever circumstances. He contended as strongly as any man could do for one exception, at least, from that doctrine, namely, when the security of the State rendered such a revolution necessary."

At the opening of the session of 1826 Canning seemed fairly to have outstepped Peel: he was favourable to the Catholic claims; his foreign policy was better defined and more liberal than that of the country party; the close of that year, he even surpassed Peel on his own chosen ground. But, on the 9th of March, on introducing important measures for the consolidation and improvement of the criminal law, Peel outshone all his former efforts, and more than regained his position as a speaker in the opinion of the House.

On the 18th of February, 1827, Lord Liverpool was found senseless on the floor of his breakfast-room, in an apoplectic fit. Peel carried the news to the King at Brighton. In April, Canning undertook to form an administration; Peel refused to retain office with any one at the head of affairs favourable to the Catholic claims. Lord Eldon and the Duke of Wellington resigned. The Ministry was, however, formed, but on the 8th of August Canning died. The Ministry, patched up for a while under Lord Goderich, broke up on the 8th of January, 1828, when the Duke of Wellington was sent for, and under him Peel again became Secretary for the Home Department.

On the 26th of February, 1828, Lord John Russell brought forward his motion for the Repeal of the Corporation and Test Acts. Peel opposed, but gave up the ground of the question being interwoven with the protection of the Church of England, and on the 18th of March adopted the bill as a Government measure,



WHITEHALL GARDENS.

This measure of justice was rapidly followed, in the session of 1829, by Catholic Emancipation; on supporting which, Peel said, "I see as clearly as ever the dangers which I have heretofore felt as connected with the subject; but I have no hesitation in saying that the pressure of present evils is so great and overwhelming, that I am willing to encounter the risk of those contingent dangers, rather than, in the existing situation of the country, to endure not only the continuation but the aggravation of the present system." Having made this step, Peel, on February 20, resigned his seat for the University of Oxford; and at the contest for re-election was beaten by Sir H. Inglis, the numbers polled being—Inglis, 755; Peel, 609. He was not long, however, without a seat, being returned on the 3rd of March, for Westbury; and on the last day of the same month he brought up the Catholic Relief Bill to the Lords.

In the following year he succeeded his father in the Baronetcy, and from the property bequeathed him became one of the richest Commoners in England. He succeeded, also, to the representation of Tamworth. In April, the Wellington Administration came to a close. It was clear that Reform could not much longer be resisted. Of the speeches against Reform, Sir Robert Peel's were the most spirited and best. The measure carried, he at once accepted it as irrevocable; called upon his party to fight the battle of the constitution in the Registration Courts; and with all diligence set himself to form a powerful party. In November, 1834, the Whigs were left without a leader in the Commons. King William IV. dismissed the Ministry, and sent with all speed to Rome for Peel. Pending his arrival, the Duke of Wellington held place for him, and did well nigh all the business of the State.

The general election of 1834 gave no majority to Peel; he was beaten on the election of Speaker, the Tithe Question and Appropriation Clause; his ministry was, from first to last, a mere struggle for existence, and on the 8th of April he resigned, and Lord Melbourne returned to office. Peel, however, had, even in this short period, gained for his party a high character in the House, and for his adroitness for the Premiership. In 1836 Sir Robert was elected Lord Rector of the University of Glasgow, and in 1837 the Conservatives entertained him at a banquet, to which upwards of 3000 sat down, and at which his speech was the most eloquent he had ever delivered. In 1839, the Whigs, after various minimum majorities and little defeats were fairly beaten on the Jamaica Bill, and resigned. Peel was again sent for, this time by the present Queen, and he required, however, that her Majesty should dismiss the ladies of the household; which the Queen declining, the ministry was not formed. Lord Melbourne again returned to office; but on the 27th May Sir Robert moved a vote of want of confidence in Ministers, which was carried after eight nights of debate, in one of the fullest Houses on record, by a majority of 1, the numbers being—for Ministers 311; against, 312. A general election on the question of Free-trade followed in detail. The new Parliament met on the 19th of August; on the 24th an amendment to the address, expressive of a total want of confidence, was carried by a majority of 91. On the 30th, the announcement was made of the resignation of the Melbourne Ministry, and Sir Robert was sent for, and formed his short administration. His advice had been taken, the registries had been looked to, and he found himself at the head of his party with the largest majority in Parliament since that of 1832. On the meeting of Parliament, the Bedford Bill, but there had been a succession of bad harvests; trade was stagnant; the bitterest distress, and with but doubtful prospects of any alleviation, was spread over the manufacturing districts. Sir Robert Peel refused, on the immediate assembling of the new Parliament, to state any of his plans. The distress increased. The winter was one of the severest suffering ever known amongst the manufacturing operatives. On the 5th of February, 1842, Sir Robert brought forward his new Corn-Law, which lowered the sliding scale, and introduced the new principle of reats. On that occasion he gave up the defence of "Protection," on the ground of advantage to any particular class, stating that he thought "protection could not be vindicated on that principle, and that the only protection which could be vindicated was that which consisted with the welfare of all classes of the community." At the same time reductions were made in the duties upon seeds, timber, copper, silk, grassseed and cotton pods, hard, live cattle, and various manufactures; and the income-tax was proposed as a three years' measure to supply the present deficit of revenue

There is no need we should follow the progress of these measures in Parliament, nor their reception by the country; nor detail the growth of public opinion under the agitation of the League; nor dwell upon the surprise with which Sir Robert Peel's measures of 1845, while they carried with them the Corn-Law, and all the coincident sweeping changes in the Tariff, were received. They are too recent, and discuss on upon them has been too eagerly kept alive, to need any present note; and, as a perfectly neutral personage, our position is much at any time have been out of place, and most now when their author, stricken down in a hale and vigorous age, lies dead. Boldest of all the late Robert Peel's speeches were those in defence of his policy of 1846. In them he threw off all his studied caution, all restraint, all trammels of party. He was the Minister of the nation, not of any section of the House. The Queen, not any party, had called him to office, and he was answerable for its best exercise, but to her own conscience and to the country. On resigning office, on the 29th of June, 1846, he spoke with memorable force:—"In relinquishing power, I shall leave a name, severely censured I fear by many, who, on public grounds, deeply regret the severance of party ties—deeply regret the severance of valuable political and personal motives, but from the firm conviction that fidelity to party engagements, the existence and maintenance of a great party, constitutes a powerful instrument of Government. I shall surrender power unnerved by the taint of inconsistency, but unbroken in spirit, adhere to the principle of Protection, considering the maintainance of it to be essential to the welfare and interest of the country. I shall leave a name execrated by every monopolist, who, from less honourable motives, clamours for protection because it conduces to his own individual benefit; but it may be that I shall leave a name sometimes remembered with expressions of goodwill in the abodes of those whose lot it is to labour, and to earn their daily bread by the sweat of their brow, when they shall recruit their exhausted strength with abundant and untaxed food, the sweeter because it is no longer leavened with the sense of injustice."

Far and wide throughout the country there is heartfelt sorrow at this great man's death. Reviewing his life through his acts, people find him to have been a man of power and progress—one who withstood the mere demands of agitators, but never the clearly expressed public will; a statesman of large views, who might be, that events and public speech should teach the people the full value of any measure before he yielded it; but when the time came, preferring to all tenure of office, to all fame of party, the brave performance of his duty to the people and the State. His power in Parliament was not the power of oratory, but his knowledge of men within the walls, and of the progress of public opinion without. He was himself slow to learn; every circumstance, every fact was weighed and measured in his mind: and he was slower still to teach; but prompt in rendering the taught will of the people into action, when he himself had reached the same amount of knowledge, and shared their convictions. His currency measures were the result of conviction: Emancipation he yielded to necessity: Free Trade was the result, also, of conviction; and though he opposed the Reform Bill, he, more than the most zealous of its advocates, taught the people its true practical value, when he said "The battle of the constitution must be fought in the Registration Courts."

The suddenness of his death from accident has taken the people so by surprise, that they can scarcely recal the labours of his long life, or realise the loss of so able and experienced a statesman. Everywhere there was the utmost anxiety for his recovery, and sincere sorrow is felt at his death. Nor is this feeling confined to England. The commercial world of all the capitals honours him friends throughout the industrial and commercial world; and throughout the world his death will be mourned, and his memory recalled with admiration and gratitude.

But a short week since, and the enquiry on every one's lip was, "What will Peel do?" Now his familiar seat is vacant in the House; his place in the nation is vacant. His silvery-toned voice, that for more than forty years had, on so many occasions, fixed the attention of the House, is silent for ever: the defence of his measures has fallen upon his colleagues. In the busy political world not even the greatest man is long missed; parties make no pause in the path of duty where the hot power of ambition has told. Sir Robert Peel will be longer missed from the House of Commons, such influence did he wield there, than most men of mark have been: and, even when his place has been filled up, his name, to use again his own words, will be "associated with recollections of good will in the abodes of those whose lot it is to labour and to earn their daily bread by the sweat of their brow."

Sir Robert Peel married, in 1820, Julia, youngest daughter of General Sir John Floyd, Bart., and leaves issue. Robert, the present Baronet, born the 4th May, 1822; Secretary of Legation in Switzerland. Frederick, M.P. for Leominster, born 26th October, 1823. William, born 3rd October, 1824. Captain R. N. John Floyd, born 24th May, 1829; in the Scots Fusilier Guards. Arthur Wellesley, born the 3rd August, 1829. Julia, married in July, 1841, to Viscount Villiers, eldest son of the Earl of Jersey. And Eliza.

FATAL ACCIDENT TO SIR ROBERT PEEL.

The occurrence, on Saturday last, of the accident which has proved fatal to Sir Robert Peel, has been already published to the world through the medium of the daily papers. It remains, then, only to present the most accurate statement possible of the details of this sad catastrophe, divested of the errors which, as the haste of its first publication, were almost unavoidable.

The scene of the disastrous occurrence was on Constitution-hill, in St. James's Park, along which the right hon. Baronet was riding shortly after five o'clock, at a slow pace, from Buckingham Palace, where he had just made a call, and entered his name in her Majesty's visiting-book. He had arrived nearly opposite the wicket-gate leading into the Green Park, when the Duke of Kelly, one of Lady Dover's daughters, on horseback, attended by a groom. Sir Robert had scarcely exchanged salutes with this young lady when his horse became slightly restive. He was observed for a moment to sit very steadily, pulling rein side to side, and the next instant the horse turned sharply round and threw Sir Robert over its head upon his face. Two gentlemen (Mr Bowles, of Chesham-place, and Mr. Barnes, connected with the Post Office of Savory and Moore, Bond-street), who were close to the spot, ran [illegible] Mr Barnes [illegible] Dr [illegible] the [illegible] spot just as Sir Robert had been raised by [illegible] Commissioner Sir James Clarke also came up in a few moments afterwards. Sir Robert, on being raised, groaned very heavily, and, in reply to Dr. Foucart's question as to whether he was much hurt, he replied, "Yes—very much."

Mrs. Lucas, a lady resident in Bryanston-square, happened to be passing shortly after the accident, and at once made a spontaneous offer (which was immediately accepted) to give up her carriage, in order to convey the right hon. Baronet to his residence. During the few moments which elapsed before a carriage was procured, Sir Robert became unconscious, in which state he remained until after he had been assisted into the carriage. He then slightly revived, and, again in reply to Dr. Foucart, said, "I feel better." The carriage was then ordered to drive slowly through the park to Whitehall-gardens, Sir Robert being supported by Dr. Foucart and the two gentlemen who had first raised him from the ground. Sir James Clarke also accompanied him in the carriage to Whitehall.

In a few minutes after he had entered the carriage Sir Robert became much excited, and endeavoured to raise himself up, which it was thought necessary to prevent. The sufferer's countenance then again sank into a state of half unconsciousness, in which he remained until his arrival in Whitehall-gardens. On being lifted out of the carriage he revived, and walked, with assistance, into the house. On entering the mansion, Sir Robert was met by Lady Peel and the members of his family, who had been awaiting his arrival in painful anxiety after having received intelligence of the accident. Lady Peel was overwhelmed with emotion. The effect of the meeting upon Sir Robert was extremely painful. The right honourable Baronet swooned in the arms of Dr. Foucart, and was placed upon a sofa in the nearest apartment (the dining-room). From this apartment Sir Robert was never removed, and so extremely sensitive to pain did he speedily become, that it was only after very considerable difficulty that he could be removed from the sofa to a patent hydraulic bed which had been procured for his use. An examination was immediately made, with the view of ascertaining what description of injury the right hon. Baronet had sustained. There were present at the examination the following distinguished members of the profession:—Sir Benjamin Brodie, Dr. Seymour, Mr. Paget, Sir James Clarke, Dr. Foucart, and Mr. Hodgson, the family surgeon. After the examination the following bulletin was issued:—

"Whitehall Gardens, June 29, seven P.M.—Sir Robert Peel has met with a severe accident by falling from his horse. There is severe injury of one shoulder, with a fracture of the left collar-bone. There is great reason to hope that there is no internal injury. (Signed) CESAR HAWKINS."

The fracture was a comminuted one, and the symptoms that soon began to present themselves were of the most serious character, though, at times, up to Tuesday, the right hon. Baronet's case did not appear quite hopeless. From two o'clock in the morning of that day the change for the worse in the right hon. Baronet's symptoms was progressive, the pulse increasing to 130, and becoming gradually weaker. Stimulants were administered, but had no apparent effect, and the sufferer's breathing became more and more painful. Restoratives were now informed that all the relief medical science could afford was exhausted, and that no hope whatever existed of being able to prolong Sir Robert's life beyond the following day. Bishop of Gibraltar (the Rev. Dr. Tomlinson), a very old friend of Sir Robert, was sent for, and administered the last offices of the Church; and then the last painful parting scene took place between the dying statesman and the members of his family. The deepest sympathy of those beloved ones surrounding his couch—towards whom he at length extended his faltering hand, and in an attitude bespeaking the intensity of his feelings, whispered to them a few audible voices, "God bless you!"

Sir Robert ceased to exist at nine minutes after eleven o'clock on Tuesday night. There were present at his decease his three brothers—the Dean of Worcester, Colonel Peel, and Mr. Jonathan Peel; three of his sons—Mr. F. Peel, M.P., Captain W. Peel, R.N., and Mr. Arthur Peel; his son-in-law, Lord Villiers; his old political friends, Lord Hardinge and Sir James Graham; and the medical gentlemen in attendance. Sensibility to pain had ceased some time before death, and the last moments of the right hon. Baronet were not disturbed by any physical suffering

After death an examination of the body was made, when a most important fact was for the first time discovered, viz. that the fifth rib on the left side was fractured. This was the region where Sir Robert complained of the greatest pain, and there is much reason to fear that it was the seat of mortal injury, the broken rib pressing on the lung, and producing what is technically known as effusion and pulmonary engorgement.

The family were consulted as to their wishes on the subject of a *post mortem* examination; and both Mr. Frederick Peel and Captain Peel objected to allowing the remains to be disturbed in any way, and the precise cause of death will never, therefore, be ascertained. An application for permission to take a cast of the face, from an eminent sculptor, was also refused

Lady Peel's health has been greatly affected at her sad bereavement, and she still continues in a state of deep prostration.

With respect to the horse from which the right hon. Baronet was thrown, it appears that Sir Robert had been in the habit for the past few years to ride a favourite bay mare. This animal having become very old, Sir Robert was advised to obtain a more sure-footed horse; and the animal from which he was thrown was bought at Tattersall's, on the 14th of May last, for 52 guineas. Peel had intended to be offered to Sir Robert Peel. Mr. Denison rode him daily for a week. He met the troops with their bands playing, as well as omnibuses and carriages in Piccadilly—all of which he must know would be the sources of annoyance to him to shy. Mr. Denison insisted upon Sir Robert riding him for a week before he decided on keeping him. He did so, and then requested he might have him. The horse had, when Mr. Denison rode him, been ridden by Lord Jersey and by Lord Villiers, who thought he would suit his father-in-law exceedingly well. For the last two months Sir Robert has ridden this horse regularly at evening.

Immediately on the accident becoming known, the Royal Highness Prince Albert, accompanied by the Prince of Prussia, arrived at Sir Robert's residence from Buckingham Palace, to make inquiries after the right hon. Baronet.

His Royal Highness Prince George also called at seven o'clock; and his illustrious parents, the Duke and Duchess of Cambridge, sent to make inquiries about the same time.

Viscount Palmerston was one of the first members of the nobility who sent to ascertain the state of Sir Robert, and to inquire after Lady Peel and the family. The noble Viscount received a written reply from Captain Peel.

The nobility and gentry continued to make inquiries almost incessantly, up to the moment of the right hon. Baronet's death, and the utmost sympathy pervaded every rank and class

On Wednesday several of the principal mercantile establishments in the City and at the West-end manifested their respect for the lamented deceased, and their deep regret at his premature demise, by closing their windows, a proceeding almost universally adopted in the neighbourhood of Whitehall. The flags of many vessels on the river, and also on many public buildings, were hoisted half-mast high, as a mark of respect to the memory of the deceased.

The body was placed in a shell on Wednesday evening, and the funeral will, it is expected, take place in the mausoleum of the family at Drayton, near Tamworth, in the early part of the ensuing week.

THE ILLUSTRATIONS.

The Engraving upon the front page of the present Number is copied, by permission, from a characteristic portrait of the late Baronet, on his favourite horse, published by Mr. M'Lean, Haymarket.

The vignette of the Birth-place of Sir Robert Peel, is from a clever work, entitled "England in the Nineteenth Century."

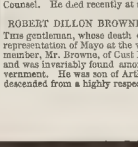
The View on Constitution Hill shows the site of the lamentable accident; and that of the Mansion in Whitehall Gardens shows the strong sympathy expressed on the melancholy event.

The following Engravings, illustrative of the public life of Sir Robert Peel, have already appeared in this Journal:

No. 73, 94, and 196. Portraits of Sir Robert Peel.
No. 83. View of Drayton Manor, visited by her Majesty in 1843
No. 186. The Trent Valley Railway, commenced by Sir Robert Peel, in 1845.
No. 191. The Mansion in Whitehall-gardens.
No. 196. Characteristic Sketch at the House of Commons.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

LORD PETRE.



WILLIAM FRANCIS HENRY PETRE, Baron Petre, of Writtle, county Essex, and co-heir to the baronies of Howard and Greystock, was the son of Robert Edward, the tenth Baron Petre, and was born the 22nd of January, 1793. He succeeded as eleventh Baron at the decease of his father, the 29th of March, 1809 His Lordship married, first, the 2nd of June, 1815, Frances Charlotte, eldest daughter of Sir Richard Bedingfield, Bart., by whom, who died the 29th of January, 1822, he leaves issue (beside another son and two daughters) a son and successor, William Barnard, the present Baron. The late Baron married, secondly, the 14th April, 1823, Emma Agnes, second daughter of the late Henry Howard, Esq., of Corby Castle, Cumberland, by whom, who survives him, he leaves four sons and one daughter.

His Lordship was a Catholic peer. He generally supported the present Government. He was much attached to the sports of the field. Lord Petre died on the 3rd inst., at his residence in Mansfield-street.

RICHARD PRESTON, ESQ.

THIS gentleman, an eminent conveyancer, was called to the bar by the Hon. Society of the Middle Temple, the 20th of May, 1807. He attained considerable practice and a high reputation in his profession. His treatise on the law of real property are standard books in the principal of them are his "Treatise on Conveyancing," and his "Treatise on Estates." He also edited an enlarged edition of "Shepherd's Touchstone." Mr. Preston obtained the rank of Queen's Counsel. He died recently at a very advanced age.

ROBERT DILLON BROWNE, ESQ., M.P. FOR THE COUNTY OF MAYO.

THIS gentleman, whose death occurred on the 1st inst., first succeeded to the representation of Mayo at the vacancy occasioned by the elevation of the former member, Mr. Browne, of Cast Mountgarrett, to the Peerage as Lord Oranmore, and was invariably found among the most liberal supporters of the Whig Government. He was son of Arthur Browne, Esq., of Glenerrih, co. Mayo, and descended from a highly respectable county family.

IMPERIAL PARLIAMENT.

[The Debate of Thursday and Friday week, on the Foreign Policy, will be found at p. 22 of the Supplement.]

HOUSE OF LORDS.—MONDAY.

Lord BROUGHAM remarked upon the inconvenience attending the selection of Hyde Park as the site for the proposed Industrial Exhibition, and objected to the destruction of the trees which had already commenced in preparation for the edifice.

THE FRANCHISE (IRELAND).

After some preliminary remarks from Lord STANLEY, the House went into Committee on the Parliamentary Voters (Ireland) Bill.

On clause 1,

The Earl of ST. GERMANS, after some discussion, withdrew his own motion in favour of

Earl DESART, who moved, as an amendment, that the minimum rating qualification, necessary to confer the franchise upon tenants, should be increased from £8 to £15.

The Marquis of LANSDOWNE opposed the amendment, enlarging upon the necessity which existed of placing the Irish electorate upon a real and substantial basis, and contended that the debasing was not too low, while the suggested enhancement of the qualification would very much circumscribe the numbers of the constituency

Lord STANLEY conceded the propriety of creating an enlarged electorate in Ireland, but objected to have the voters holding beneficial interest in property swamped by so vast an addition of small tenant voters as would be occasioned under an £8 rating. A pauper constituency was the worst possible. It would overwhelm the property of the country, and might react dangerously upon the Imperial Parliament. In his opinion, £15 was somewhat too low: but he was willing to vote for it as an approach to a sound system of qualification

A prolonged discussion followed, in which the facts and arguments turned chiefly upon the character of the electorate which would be created under a franchise based upon tenures. The Earl of DESART offered to adopt the £12 qualification as proposed in the amendment suggested by the Earl of St. Germans; but this compromise not being accepted, their Lordships at length divided

For the clause	.. ..	50
For Lord Desart's amendment	.. ..	72
Majority		32

On the motion of the Marquis of LANSDOWNE, the Chairman then reported progress, the committee being ordered to resume on Friday next. Adjourned.

HOUSE OF COMMONS—MONDAY.

HYDE PARK.—THE EXHIBITION OF 1851.

A lengthened conversation, founded on questions by Colonel SIBTHORP and other members, was elicited on the site of the National Exhibition of 1851. The ATTORNEY-GENERAL explaining the legal position of the question, stated that Hyde-park was the property of the Crown in fee, and that on each occasion it was vested in the Commissioners of Woods and Forests as trustees for the public. Those commissioners had a right to cut down mature trees, and, with the Royal sanction, immature trees, but were unable to grant any lease for the erection of permanent buildings. He declined to suggest how the public were to interfere, if dissatisfied with the acts of the trustees. Lord J. RUSSELL stated that the Exhibition was to close on the 1st of November, 1851, at latest, and in seven months from that date the whole building was to be removed; and he reiterated the statement that there was no idea of applying to the public purse for assistance. Mr. REYNOLDS offered the Phœnix-park, Dublin, for the Exhibition, and Mr. ALCOCK proposed Battersea-fields. Mr. DUNCOMBE thought it would be better to brave the frowns of Rotten-row, rather than peril the Exhibition, and objected to the price of half-a-crown, which it was understood was intended to be charged for admission, saying that the entrance ought to be free, three days in the week; a suggestion which was rejected by Lord J. Russell. Finally, it was arranged that the whole matter should be again discussed, and in the meantime a memorial, addressed to the Lords of the Treasury, by the Commissioners in charge of the Exhibition, stating the grounds on which they had acted as to the locality and the reasons for it, was to be placed in the hands of members.

SMITH O'BRIEN.

Mr. ANSTEY moved for an inquiry into the circumstances under which a letter addressed by Mr. Smith O'Brien to a member of the House (Mr. Anstey himself), complaining of his having been placed in solitary confinement by the present Lieutenant-Governor of Van Diemen's Land, was intercepted and opened in that colony by the local authorities.

Sir GEORGE GREY opposed the motion, stating that the course adopted in reference to Mr. Smith O'Brien was not an exceptional one, but was that invariably pursued towards convicts who refused to give the parole upon which tickets of leave were granted. Mr. S. O'Brien was treated with as much lenity as circumstances, in his own creation, would permit, consistent with affording the necessary example.

After some discussion, in which Sir LUCIUS O'BRIEN and other members took part, the motion was negatived by 84 to 17; majority, 28.

SUPPLY

The House then went into Committee of Supply on the Civil Service Estimates. £125,000 was voted for educational purposes in Great Britain.
£125,000 for national education in Ireland.
£14,785 for schools of design.

On the vote for £2000 for salaries and allowances to the professors of Oxford and Cambridge being put,

Mr. Ker Baillie regretted that there was not at these Universities a professor of history in connexion with diplomacy.

Lord PALMERSTON said that the matter had been for some time under his consideration, and he hoped to be able to make arrangements for examining those who received their first diplomatic commission.

The vote was agreed to.

Other votes having been taken, an interesting discussion arose in connexion with the vote for the British Museum. The sluggishness and the obstructiveness of those whose duty it is to furnish the public with an early and popular access to the treasures of antiquity contained in that noble pile, and despite the usual official excuses, the feeling of the public in reference to the unwillingness or incompetency of certain of its paid servants to do their duty, in regard to this department of the Museum, was generally expressed.

Adjourned at twenty minutes past twelve o'clock.

HOUSE OF LORDS.—TUESDAY.

NATIONAL EDUCATION.

The Earl of HARROWBY moved for the appointment of a select committee to inquire into the expenditure of the public money granted annually for the purposes of education. Detailing the chief features of the controversy now pending between the National Society and the Committee of the Privy Council on Education, the noble Earl argued that the right of interference claimed by the Council with all the schools which were to partake in the national grants, tended to shake and extinguish the efforts of individual zeal among a large portion of the clerical and lay members of the Established Church. By the system of supervision, the whole body of schoolmasters was placed under the immediate control of the Privy Council, and the result was that the education of the people was checked on one side, and the privileges of the Church invaded on the other.

The Marquis of LANSDOWNE, from an official knowledge of the facts, declared that the system of inspection had worked well, and the aid and advice of the Government Inspectors were acceptable and cordially sought for and acknowledged. He admitted that the zeal of the inspectors might in some instances have carried them too far, and led to an unwarrantable intermeddling in the management of the schools; but contended that in general they kept within the scope of their instructions. Respecting the jealousies that had arisen on the part of a certain section of the church, he believed that they were founded upon misapprehension, because the Privy Council had carefully recognised the supremacy of the clergyman in all matters of religion. He nevertheless denied that the Legislature had designed, or that the Privy Council were warranted, to place all national grants for educational purposes at the sole disposal of the clergy of the Established Church. Dissenters and Catholics had a right, and were intended to come in, for their share. The Wesleyan body had at first testified some jealousy of the Government system, but, on acquiring fuller information of the real nature of the contemplated inspection, had waived all difference, and cordially co-operated with the Privy Council in utilising the means furnished by the Legislature. No invidious distinctions had, as was alleged, been created against the Church; but all sects were considered in the act with the most careful impartiality. Of 689 schools assisted with grants during the last two years, 533 belonged to the Established Church, to whom had been appropriated 80 per cent. of the funds expended by the Committee of the Council for Education. After reading the testimony of dignitaries and ministers, the noble Marquis submitted that the administration of the national funds voted for purposes of instruction was unobjectionable in principle, and useful in its practical results. For these reasons he objected to the appointment of a select committee, observing, also, that at so late a period of the session there was no time for it to prosecute inquiries to any available purpose.

After a short conversation,

Lord STANLEY concurred in approving of the system of inspection, but apprehended that, in practice, many irregularities existed, particularly since the extension of the educational operations during the last two years. Some incidents of alleged impropriety he then related, and contended that immediate inquiry was highly requisite to ascertain the truth and extent of those asserted misdoings.

Lord HARROWBY replied; and

Their Lordships divided upon Lord Harrowby's motion:—

Contents	.. ..	26
Non-contents	.. ..	31
Majority against the motion	.. ..	5

Adjourned at a quarter to one o'clock.

HOUSE OF COMMONS.—TUESDAY.

The House met at noon.

Mr. PUSEY moved the third reading of the Landlord and Tenant Bill.

Col. SETHORPE opposed the motion, and moved, as an amendment, that the bill be read a third time that day six months

After a discussion, the House divided—For the third reading, 53; against it, 17: Majority, 35.

The bill was read a third time

MR SHARMAN CRAWFORD moved that the word "Ireland" be struck out of the preamble.

The House divided—For the amendment, 16; against it, 64; majority against the amendment, 48.

The bill then passed.

At the evening sitting, Mr. B. OSBORNE announced, that, in consequence of the illness of Mr. Roebuck, that hon. member would not be able to proceed with his motion respecting the Irish Church, which stood first on the notice paper that night.

Mr. F O'CONNOR moved that the petition of C. R. Hyatt, complaining of the conduct of Mr. Commissioner Fonblanque, and praying for inquiry, be printed.

On a division there were—

For the motion ..	..	..	..	..	..	107
Against it	..	..	..	..	..	1
Majority against the motion ..					..	—106

The report of the Committee of Supply was received.

Adjourned at twenty minutes before six o'clock.

HOUSE OF COMMONS.—WEDNESDAY.

The House assembled, as usual on Wednesdays, at twelve o'clock.

DEATH OF SIR ROBERT PEEL.

Mr. HUME immediately rose, and, referring to the melancholy decease of Sir Robert Peel, said that, as a slight tribute of respect to his memory, he thought the House ought to adjourn. The hon. gentleman then moved the adjournment of the House.

Mr. GLADSTONE, who spoke in a tone that evinced the intensity of his feelings, said that the hon. gentleman, from motives which they would all appreciate, had proposed the motion to the House, and as there was no other person present who had been associated in office with the lamented gentleman but himself, he might be allowed to second the motion of the hon. gentleman. He was quite sure that it would be a subject of deep regret to the noble Lord at the head of the government, that, in consequence of the introduction of the subject of a few moments sooner than might have been expected, he was deprived of giving his support to that, the first, but not the last, tribute of respect to one whom he was now at liberty to name as the late Sir Robert Peel. As the subject had been introduced by the honourable gentleman, he hoped he might be forgiven for saying that at that moment it was not one which was fit for discussion Every heart was too full, and they could not enter into the amount of the calamity which the country had suffered The deceased gentleman was a statesman of the greatest head, of the most splendid ability, and of the purest virtues. He would only repeat the lines which had been applied to a man perhaps greater than Sir Robert Peel.

> "Now is the stately column broke,
> The beamy light is quenched in smoke,
> The trumpet's silver sound is still,
> The warder silent on the hill."

He would say no more—he had, perhaps, said too much—he begged to second the motion of the hon. gentleman

Mr. NAPIER, Sir ROBERT INGLIS, and Sir WILLIAM SOMERVILLE (the only member of the Government present) acquiesced, and the House adjourned accordingly.

HOUSE OF LORDS.—THURSDAY.

The Judgments (Ireland) Bill was read a third time and passed.

The Police Improvement (Scotland) Bill was read a third time and passed.

The Court of Session (Scotland) Bill was read a third time and passed.

DEATH OF SIR ROBERT PEEL.

The Marquis of LANSDOWNE having paid a handsome tribute of respect to the memory of the late lamented right hon. Baronet,

Lord STANLEY observed that he had been opposed to Sir Robert Peel, and had also been joined with him as a colleague; and although, four years past, it had been his misfortune to differ from him on a most important subject, yet no was happy to say that he had never tampered in his personal hostility in his opposition to him. There had been no interruption in their private friendship, and he was convinced that whatever Sir R. Peel had done he had only done because that distinguished statesman felt that it was necessary to his country's good and to what he believed to be his country's welfare. Sir R. Peel had made greater sacrifices than any statesman had ever made.

Lord BROUGHAM before his testimony to the merits of the eminent statesman who had been taken from us.

The DUKE OF WELLINGTON, who was frequently inaudible from emotion, and who was affected to tears, likewise gave utterance to his great sorrow at the sudden death of his right hon. gentleman, whose friendship he was proud to say he had enjoyed for many years.

After a conversation, originated by Lord BROUGHAM, on the selection of Hyde Park for the Industrial Exhibition of 1851, their Lordships adjourned.

HOUSE OF COMMONS.—THURSDAY.

The House met at twelve o'clock.

Mr MACKENZIE moved that the evidence taken before the River Lee Trust Bill Committee be laid on the table of the House, and that so much of it as relates to the quality of the water of the river Lee be printed.—Agreed to

Sir G. GREY said, he would postpone the orders of the day which stood for that morning, owing to the absence of Lord John Russell, who was attending the funeral of the late right hon. Baronet, which would take place at half-past four o'clock. The right hon. Baronet referred to the death of Sir R. Peel in a few sentences, which he had great difficulty in giving utterance to: but, by a strong effort mastering his feelings, he moved that the House should adjourn until half-past four o'clock.

The motion was immediately agreed to, and the House accordingly adjourned

The House resumed at half-past four o'clock

SIR ROBERT PEEL.

Lord J. RUSSELL having brought up the report of the commissioners on the proposed Exhibition of 1851, adverted in terms of deep and respectful sorrow to the death of Sir Robert Peel. In speaking of that great man (said the noble Lord) it is impossible not to lament that hereafter this House will be no longer guided by that long and large experience of public affairs, by that profound knowledge, by those rhetorical powers, by that copious yet exact memory, with which this House was wont to be enlightened, instructed, and guided. (Cheers.) It is not for me, or for this House, to speak of the career of Sir Robert Peel. It never happened to me to be in political connexion with him, but so late as that last debate to which I have referred, I took occasion to thank him for that fair and frank support which he had given to the present Government. (Hear.) Sir Robert Peel, Sir, in that speech which preceded the one which I addressed to the House, and in which he opposed the policy of the Government, spoke with such temper and such forbearance towards all those who might hold an opposite opinion to his, that it must be a satisfaction to those remaining that his last act should have been one of such candour and kindness towards all those around him. (Hear, hear.) Sir, there can, I think, be no doubt, that, however history may deal with the wisdom of the course as pursued, that it will be admitted that on two great occasions when he held power, undisturbed and apparently with every sign of security, and when he proposed measures to this House which shook of deep love for his country which ever distinguished him. (Hear, and cheers.) Having slightly adverted to the course of the right hon. Baronet on the Corn-Law the noble Lord concluded by observing, that, if it should appear to the family and friends of the late Sir Robert Peel to be desirable to take such a course, though I shall not now proceed to make any motion on the subject, I will give my willing support to a proposal for conferring the same honours on His remains that was awarded to Mr. Grattan and Mr. Pitt. (Loud cheers.) I may, perhaps, be permitted to add, that I thought it right to obtain the sanction of the Crown before I made this proposal, and I feel assured that anything which could do honour to the memory of Sir Robert Peel, or which could add any further tribute of respect to his name, would be unhesitatingly acquiesced in by her Majesty. Sir, I wish, therefore, in concluding these few words, to say, in disposing of this proposal, I place myself entirely in the hands of the friends of the late Sir Robert Peel. Having had no political connexion with him, this proposal comes from me without the tinge of partiality; and I may say in conclusion, without any fear of a charge of insincerity, that I do feel, that this country, as well as posterity hereafter, in recognising the claims of individuals deceased to the title of eminent statesmen, will have adorned the annals of this country, or contributed to its history, those of the late Sir Robert Peel will be amongst the foremost. (Cheers.)

Mr GOULBURN, while acknowledging, on the part of the family of the late lamented right honourable Baronet, the high honour shown to his memory in the offer made by the noble Lord, begged gratefully to decline it, as opposed to the wishes of Sir R. Peel, as expressed in his will, which was dated May 8, 1844, and in which he stated, "I desire that I may be interred in the vault in the parish of Drayton-Bassett, in which my father and mother were interred, and that my funeral may be without ostentation or parade of any kind." (Murmurs of applause.) Nor did this sentiment undergo any alteration, for, not later than six weeks since, when alterations were made in that particular church to which that memorandum referred, Sir R. Peel pointed out to Lady Peel the very spot in the vault in which he wished and trusted his body might be laid, without any of that parade or ostentation which he so strongly deprecated, and the absence of which gave him such great satisfaction in the case of the funeral of the late Queen Dowager. Under these circumstances, therefore, he was sure that he (Mr. Goulburn) had but one duty to perform, and the family of the late Sir Robert Peel but one wish, and that was the thankfulness with which he (Mr Goulburn), on their part, had to acknowledge the intentions both of her Majesty and her Parliament, in wishing to confer on his late lamented friend that, the greatest honour that could be paid to a subject—a proposition which they were compelled respectfully, but thankfully, to decline. He (Mr. Goulburn) only retreated the House and the noble Lord from that which they had paid to the ability and public services of his lamented friend tha further mark of respect to his simplicity of character, and give effect to his desire as to the way in which he wished his funeral obsequies to be conducted. The motion of the noble Lord of the House immediately after its meeting on the previous day, out of respect to the memory of the deceased statesman, was an honour which would live for ever in the journals of that House, and an honour which was never before paid to a subject. -(Hear

After a few words from Mr. HERBERT, the subject dropped.

BUSINESS OF THE SESSION

On the motions for reading the orders of the day,

Lord J. RUSSELL stated the intentions of the Government with respect to the bills which were now standing over undisposed of. As he had already stated that the late debate had disarranged the course of public business to the extent of ten days, he thought it a reasonable proposition that those bills which had not been long before the public should not be sent up to the other House at so late a period, when there could be hardly time to get through with them. That was not, however, applicable to measures of revenue. The Chancellor of the Exchequer would, therefore, proceed with the Stamp Bill. The next bill which he would mention was one of great importance, upon which the House had already decided in favour of its principle; and that was, the abolition of the Lord-Lieutenancy of Ireland. As it was, however, probable that there would be a great deal of discussion as to the mode of exercising the authority of the Crown in that country which had been hitherto exercised by the Lord-Lieutenant, and as the bill would not reach the other House before the beginning of August, that would be too late to propose so very large a change in the mode of governing Ireland. (Cheers.) The Merchant Seamen's Bill would not be proceeded with; nor the Woods and Forests Bill, for the re-arrangement of that department; nor the Railway Audit Bill. The Parliamentary Oaths Bill would be proceeded with on that day fortnight. He did not think it necessary to state the intentions of the Government with respect to every bill on the order book; but he might state that it was proposed to proceed with the Charitable Trusts Bill.

THE EXHIBITION OF 1851.

Colonel SIBTHORP moved that the report respecting the proposed Exhibition in Hyde-park in 1851, be submitted to a select committee of this House, for the purpose of examination and due consideration of the same, and that the report of the said committee be laid upon the table of this House, and that the report of the said committee be laid upon the table of this House, and that the report of the said committee be laid upon the table of this House

MEETING OF THE ARCHÆOLOGICAL INSTITUTE.—PROFESSOR WILLIS'S VISIT TO CHRISTCHURCH CATHEDRAL, OXFORD.

being plentifully supplied throughout the evening. This *réunion* afforded the Institute an opportunity of taking a kind farewell of a place in which they had been received with so much cordiality and hospitality.

On Tuesday morning, the business of the Institute was brought to a conclusion at a general meeting held in the Theatre, at which the usual "votes of thanks" and complimentary speeches were duly made. The report of the committee and auditors was also read, and received with strong manifestations of satisfaction at the increasing prosperity of the Institute; and the Marquis of Northampton having informed the meeting that, of the numerous towns to which the Institute had received invitations, Bristol had appeared to the committee to be the most eligible for their next Meeting in 1851, it was unanimously resolved to give that ancient city the preference.

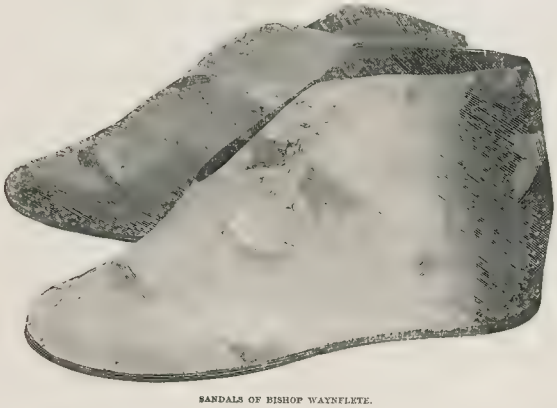
We now proceed to call attention to some of the antiquities from the temporary museum, of which we have been enabled, by the courtesy of their proprietors, to present Engravings. Of these, perhaps not the least remarkable is the bell of St. Senanus, called, also, the Clogborn, or Golden Bell. This curious relic was supposed to possess, until very lately, the valuable virtue of recovering stolen property, and was carried round the country side when anything was lost, that all accused persons might purge themselves from suspected criminality by taking an oath on it. Tradition asserts that it belonged to St. Senanus, who, in the sixth century, founded a monastery at Inniscattery, on the Shannon, and, from its peculiar ornamentation, there is no reason to doubt its very great antiquity. On the dissolution of this monastery, it came into the possession of the family of Keane, on the western coast of the county Clare; and it still remains the property of Marcus Keane, Esq., Beech Park, Ennis. It is supposed originally to have been an altar-bell, and, from having an outer covering of silver, it is conjectured that the interior case is much more ancient than the outer, although this is evidently of Saxon workmanship.

The elaborately ornamented Crozier belongs to St. John's College, and was not unlikely part of the insignia of some Bishop of the 16th century. Its history is quite unknown; but it is conjectured to be the crucifix alluded to in the following curious extract from a MS. in the possession of the President of St. John's College:—"Old superstitious church ornaments were given and delivered unto me, Ralph Huchenson, President of St. John's College, 14th of April, 1602, by Mrs Amy Leech, widdow, ye Founder's sister's daughter, to be converted to the benefit of some better use for ye said College, to which (as 'tis supposed) it sometime did appertain. These, I believe, being given by ye Founder, and taken away by him at ye Reformation, were given to his niece aforesaid—a crucifix, divers vestments, altar cloths, copes, &c."

CROZIER, IN ST. JOHN'S COLLEGE.

The Vestmental Sandals of Bishop Waynflete, who was the founder of Magdalen College, are curious relics, serving to recal to memory the habits and fashions of former times.

The Chrismatory of which we give a representation was exhibited by the Rev. Walter Sneyd, of Denton, and is an unusually good specimen of that peculiar kind of religious vessel, which contained the holy oil for sacramental purposes. Its date is about the early part of the 14th century.

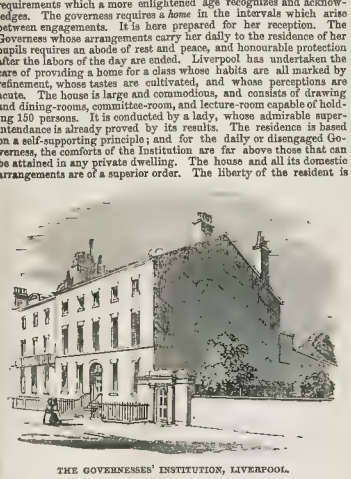


SANDALS OF BISHOP WAYNFLETE.

"THE CLOGHORN," OR "GOLDEN BELL."

LIVERPOOL GOVERNESSES' INSTITUTION.

The Liverpool Governesses' Institution has been instituted to meet the requirements which a more enlightened age recognizes and acknowledges. The governess requires a *home* in the intervals which arise between engagements. It is here prepared for her reception. The Governess whose arrangements carry her daily to the residence of her pupils requires an abode of rest and peace, and honourable protection after the labors of the day are ended. Liverpool has undertaken the care of providing a home for a class whose habits are all marked by refinement, whose tastes are cultivated, and whose perceptions are acute. The house is large and commodious, and consists of drawing and dining-rooms, committee-room, and lecture-room capable of holding 150 persons. It is conducted by a lady, whose admirable superintendance is already proved by its results. The residence is based on a self-supporting principle; and for the daily or disengaged Governess, the comforts of the Institution are far above those that can be attained in any private dwelling. The house and all its domestic arrangements are of a superior order. The liberty of the resident is



THE GOVERNESSES' INSTITUTION, LIVERPOOL.

wholly without restriction; her independence is unassailed. The lectures, also, are another feature in the arrangements of the Institution, from which it is hoped Governesses will derive both pleasure and profit; and on every Friday evening there will be additional class instructions, which will be found by many of the highest value. Every facility is afforded for the renewal of engagements between parents and governesses, and for securing to the former a perfectly efficient instructress. Governesses of the highest class have already gladly taken up their abode in the Institution, and, by so doing, have promptly obtained fresh engagements with remunerating salaries. Gratuitous medical advice is also secured in case of sickness—often no small item in the expenditure of the Governess.

Neither does the guardian care of this Institution rest only over the present, but extends into the future. The governors have an Annuity Fund as well as a Provident and Benevolent Fund, both of which are arranged on the most secure and effectual basis. It is the wish of the committee to render the life of the Governess more happy and her prospects more hopeful. It is their earnest wish to relieve her mind, both from present and contingent anxieties; to cheer and inspirit her in the discharge of her daily duties; and to assure her of the certainty of a competent provision, as life draws nearer to its close, by securing to her the reward of her own prospective care.

A Stained-Glass Window, in the Cinque-Cento style, has just been put up at the east end of the parish church of West Lynn. The story is the visit of the Three Women (usually termed the Three Marys) at the Tomb on the morning of the Resurrection. The window has been presented by three Miss Walkers, of North Lynn, in memory of their sister; and executed by W. J. Bolton, Esq., of Cambridge. The window cannot fail of contributing to establish Mr. Bolton's reputation as one of the first artists of the day in the style to which he has devoted his powers. "The Cinque-Cento style," says Mr. Winston, "reached its perfection between the years 1526 and 1538, a period which may be termed the golden age of glass-painting." Mr. Bolton is, we believe, an American.

He has entered as a Fellow-Commoner of Caius College, Cambridge, and has fixed his *atelier* under the very windows of King's Chapel, in the Old Buildings

The Cholera in the East.—Recent accounts from Cochin China state that cholera made its appearance in that country in the latter part of last year, and had committed great ravages, traversing the whole kingdom. It broke out in the month of September, in the Royal province, and quickly spread through the other provinces, proceeding in a northern direction. It attained its greatest malignity in the month of October, after which it diminished in intensity; but at the latest dates it had not entirely ceased, occasionally exhibiting renewed vigour. In the Royal province the most moderate and trustworthy estimates state the number of victims at 20,000, although some carry the reckoning as high as 100,000, and it is thought that the other provinces have lost from 10,000 to 15,000 inhabitants each. The greatest consternation prevailed, and the usual care and respect for the dead, which so strikingly characterise the Chinese nations, were entirely lost sight of. The corpses were thrown out into the fields and rivers, in some places actually obstructing the streams; and persons who had been seized with the malady were cast out of their houses before life had departed. A great drought had also prevailed, followed by famine, the rice crops having almost entirely failed; and the inhabitants were reduced to the utmost misery, feeding upon leaves and whatever they could possibly use as a means of preserving life. Unusually heavy rains afterwards followed, completing whatever of the work of destruction the drought had left unaccomplished, and sweeping away the few paddy fields which the miserable inhabitants had been able with much toil and perseverance to form. We have not learnt whether the cholera had appeared in Cambodia, but it can scarcely have escaped a visitation, considering the virulence with which it had prevailed on both sides of it in the adjoining kingdoms of Siam and Cochin China.

CYCAS REVOLUTA, IN BLOOM.

We have been favoured, by a Correspondent, with a Sketch of a very fine specimen of the *Cycas revoluta* (or Sago Palm), which is now blooming in a pine-

CYCAS REVOLUTA, IN BLOOM, AT RAVENSWORTH CASTLE.

stove belonging to the Right Hon. Lord Ravensworth, of Ravensworth Castle, in the county of Durham. The plant is supposed to be about fifty years of age, and has never bloomed before. The flower is of a fine yellow colour. The trunk, at the base, measures in circumference 2 feet 5½ inches; 2 feet 10½ inches where the leaves project; and stands 2 feet 8 inches high. The circumference of floral leaves is 3 feet 4½ inches, the flower of which appears to form on the base of the leaflets, in the shape of gands. The *Cycas revoluta* is a native of China, and was introduced into England by Thunberg, in 1737

DESIGN BY JOSEPH PAXTON, F.L.S., FOR A BUILDING FOR THE GREAT EXHIBITION OF 1851

PRESENTATION OF A CHAIN OF OFFICE TO THE MAYOR OF BATH.

On Saturday last, the superb Insignia, represented in the accompanying Engraving, were presented to the right worshipful the Mayor of Bath. The presentation took place at the Guildhall, where, at the appointed hour, the banqueting-room was well filled by a number of the subscribers and others interested in the proceedings, a goodly proportion of the company consisting of ladies

The present was acknowledged by the Mayor in a well-chosen address, wherein he illustrated the policy of maintaining such official distinctions, and concluded by acquainting the company that he had arranged to wear his new and honourable badge upon his presentation at her Majesty's levee, on Wednesday.

Mr Green then said that the example set by Bath had not been lost on other cities. At Norwich, where for some time the use of official costume had been discontinued, it was proposed to follow "the admirable example of the city of Bath," and to resume the costume. Mr. Green then proposed three cheers for the Mayor, Aldermen, and Burgesses of the city.—The proposal was immediately acceded to, the band repeating the National Anthem.

Three cheers were then given for F. Dowding, Esq., the Mayor; at whose suggestion cheers long and loud were given for her Majesty

The thanks of the subscribers were then voted to Mr. Green, chairman of the committee; three cheers were given for the ladies of Bath; and the proceedings terminated.

The Collar and Badge have been designed and

CHAIN OF OFFICE FOR THE MAYOR OF BATH, PRESENTED ON SATURDAY LAST.

executed by Messrs. Payne, of Bath, goldsmiths in ordinary to the Queen, and they are highly creditable to their taste and skill. They are in the mediæval style. The Collar is 4 feet in length, full an inch wide, and weighs, with the Badge, nearly 6 oz. troy of standard gold. The centre of the Collar is formed of the Tudor rose, enamelled red and white, on either side of which is a portcullis, emblematic of municipal authority, and of the ancient grants of the city. These are connected with a very beautifully-formed knot, composed of the gold, which is attached again to a Tudor rose, and each alternately continued, terminating with two portcullis, corresponding with the front. The Badge—which is pendent from the centre rose, on a swivel—is of circular form, enriched with a border of Elizabethan character, within which is an enamelled band of garter blue, with the legend damascened, "HONI SOIT QUI MAL Y PENSE." Ornate Regio Elizabetha Reginante. A.D. 1569." The centre of the Badge is formed of the Bath City armsand supporters, exquisitely executed in high relief, and placed on a field argent, producing a *tout ensemble* of surpassing beauty and effect. On the reverse is engraved the following inscription :

"PRÆTORIBUS IN PERPETUUM VERANIS CIVES BATHONIENSES A.D. MDCCCL. PRÆSIDENTE F. DOWDING, ARMIGERO."

The whole is contained in an oak case, lined with velvet, having the arms of the city engraved on a brass plate in the cover.

The cost of this superb work has been defrayed by subscription very liberally responded to by the good and loyal people of Bath.

MUSIC.

CONCERTS.

The fourth and last concert for the exhibition of the students of the Royal Academy of Music, took place on Saturday, at the Hanover Rooms, under the direction of Mr. Lucas; M. Sainton being principal violin. There were four novelties in the programme—MS. works by pupils The first was a Symphony in A major, by Mr. H. C. Banister, King's Scholar, being his third composition of that class. Although the execution was not so good as could have been desired, the symphony displayed the young composer's abilities in a very favourable light: the orchestral colouring is graphic and effective; and if there were not points of startling originality in the forms and ideas, the production must be regarded as highly creditable, and must pique curiosity as to the future career of Mr. Banister. The second novelty—a Mass, by J. A. Owen—is to be decidedly Weberian to entitle the composer to any other credit than that of a clever appropriation of the imaginings of his model. The fragmentary *finale* from a MS. opera by Mr. John Thomas, an associate, the words by H. Duval, it is difficult to judge of, knowing nothing of the libretto and of the general musical treatment; but he seems to be gifted with melodious inspiration, and is acquainted with vocal effects. The MS. song by Miss C. Rowe, expressly sung by Miss Owen—"Remember me"—is prettily sacred. The remainder of the scheme was judiciously selected: the "Batti, batti," sung by Miss Brown; and the "Vedrai carino," rendered by Miss Mary Rose, must be favourably cited. There was merit, also, in the interpretation of Costa's pretty madrigal, "Dall'aria," by Miss Ellen Taylor. The "Tancredi" duo was ruined by the tenor. Mendelssohn's part song "the Nightingale," Beethoven's "Bridesmaids' Chorus," from "King Stephen," were the choral pieces; the finale of Rossini's "Otello" (first act) terminating the first part. Neukomm's Septet was well played by Messrs. Wells (flute), Horton (oboe), Owen (clarionet), Wuetzig (bassoon), C. Harper (horn), Hay (trumpet), and Mount (double bass). Mdme. de Vasselon's ability performed the first movement of Sterndale Bennett's pianoforte concerto; and Mr. Banister executed with credit the opening movement of Mozart's pianoforte concerto in E flat. The four concerts, on the whole, have exhibited the system of instruction at the Royal Academy in a favourable manner. It is unreasonable to expect that the institution can produce every season Meyerbeers, Rossinis, and Mendelssohns as composers, Jenny Linds, Grisis, and Viardots as singers, or Paganinis, Thalbergs, and Lists as violinists and pianists; but it will be the fault of any student, possessing average musical ability and perseverance, if the method of tuition be not successful in forming a sound musical education. As in all here institutions, there are defects; but the general results of the establishment of the Royal Academy of Music in this country have been favourable to [illegible], if only in the supply of admirable orchestral players, not to mention the many eminent vocalists who have been educated at the institution

M. M. N. Mori's *soirée musicale*, at the Mortimer-street Rooms, a [illegible] attraction. He was assisted by Mdlle. Comlon, Messrs. B. Richards, H. Chipp, W. Watson, R. Blagrove, Jarret, Barret, Lazarus, and Baumann.

Mr. R. Blagrove's last concertina concert of the season took place last Monday evening, at the Mortimer-street rooms, assisted by Misses Williams and Addle, Mdlle. Rudersdorff, Messrs. T. Williams, R. Blagrove, A. Norman, G. and J. Case, Herr Mengis, Herr Salt, and Giulio Regondi.

M. Jullien's benefit and *concert monstre* took place at the Surrey Zoological Gardens last Monday night, when he assembled four military bands, who played the National Anthem, with a discharge of cannon *obligato* at each bar.

Mr. John Parry repeated his new entertainment, "Notes, Vocal and Instrumental," at the Music Hall, Store-street, last Monday evening

The final meeting of the "Musical Union" took place on Tuesday, at Willis's Rooms. The selection comprised Mozart's Quintet in D, Mendelssohn's Quartet No. 5 in E flat (the scherzo encored), and the celebrated Kreutzer Sonata in A Minor. The executants were Ernst, Deloffre, Hill, Mellon, Piatti, and Charles Hallé. Mr. Ella, the director, deserves every credit for the tact he has displayed; but he has given a farewell speech in his last *Record*, and a summary of his doings during the season in such a strain of self-congratulation, that it would be supererogatory for us to ruminate on the same ideas. There is one agreeable fact in his management that must, however, not be passed over; and that is, the introduction of novelty by placing compositions of Eckert and Silas in the scheme, as well as the works of the classical composers, thus affording the rising talent of the day a chance of hearing. Nothing could be finer than Tuesday's execution—Ernst and Hallé surpassed themselves.

The *matinée* of Madame Oury, the accomplished *pianiste*, was given on Monday, at the residence of Mrs. Shelley, in Belgrave-square. With M. Oury and Piatti, Madame Oury played the adagio and finale from a new trio by De Beriot, superbly; she also executed, with M. Oury, Weiff and De Beriot's Duo Concertante for piano and violin, on themes from the "Prophète;" and a charming Nocturne waltz of her own composition. Godefroid and Piatti played solos on harp and violoncello. The vocal gleanings were sung by Mdlle. Parodi, Mdme. Giuliani, Mdlle. Bertrand, Signori Gardoni, Tamburini, Castelli, Belletti, and M. Jules Lefort. The conductors were Balfe, Benedict, Eckert, Belletti, Schira, Piatti, and Vera A French romance, "La Plainte," with violoncello, sung by Gardoni, was encored with fervour. It is composed by Vera, a celebrated performer on the French horn, who accompanied Gardoni

Mrs Messent, the vocalist, gave a concert on Thursday, at her residence, in Stratton-street, assisted by native and foreign talent.

M. Billet, the composer and pianist, has given another morning performance of classical pianoforte music, at the Queen Ann-street Rooms, selected from the works of Bach, Beethoven, Scarlatti, Handel, Dussek, Chopin, Mendelssohn, Moscheles, Henselt, and W. S. Bennett; and assisted in the vocal selections by Mdlle Julie Sherrington, Mrs. Newton, Mr. Frodsham, and Mr. Drayton.

Herr Oberthür, a clever harp player and composer for that instrument, has given a concert, at the Queen Ann-street Rooms, assisted by Mdlle Sophie Dulcken (piano), Mdlle Isabella Hickey (concertina), and Herr Aloisburg, a pupil of Maurer (violin); with Mdme. Nottes, Herr Stigelli, and Herr Mengis, as vocalists: Herr H. Dulcken and Herr H. Bohrer, accompanyists.

A performance of unaccompanied vocal music took place on Wednesday night, at St Martin's Hall, by the members of the Upper Singing Schools, under the direction of Mr. John Hullah, the first part devoted to sacred music, and the second to secular music. The selections were from Antonio Lotti, John Bishop, Reynolds, Pelissier, Webbe, Callcott, Dr. Calcott, Sir Richard Smith, Wilbye, Morley, Lord Mornington, &c. The execution was generally worthy of praise, the standing sin of these classes, defective intonation, being less perceptible than usual.

MUSICAL EVENTS.—On Monday evening will be the concert given by the Beethoven Quartet Society to Ernst.—Madame Pasta will also give a farewell concert at Her Majesty's Theatre on Monday night.—Mr. H. Wylde's *matinée musicale* will be on Friday.—On Wednesday evening, the last grand classical, dramatic, concerted musical entertainment will be given at Her Majesty's [illegible] will sing the "Soldier Tired," of Dr. [illegible]

In addition to the other vocal and instrumental attractions, Thalberg (playing Beethoven's pianoforte concerto. —On Friday next (the 12th), for the benefit of the Italian refugees, a grand morning concert will be given at the Royal Italian Opera; the programme will be rendered memorable by the final appearance of Madame Pasta, after an absence of seventeen years.——Herr Carl Deichmann's concert will take place on the 16th instant. He leaves this country by the end of August, to join Mdlle. Lind, Signor Belletti, and Mr. Benedict in the transatlantic trip.——Amateurs of classical quartet music will be gratified to learn that there will be an extra performance of the Beethoven Quartet Society, on the 8th for the benefit of Ernst.——Miss Dolby, Mdlle. Magnus, Mdlle. Lavenu, Reeves and Drayton, and M. de Kontski, have been giving concerts this week at Greenwich, Croydon, Woolwich, and Peckham.—Munich letters mention the performance, at the Court theatre, on the 4th ult., of Cimarosa's "Matrimonio Segreto," by aristocratic amateurs; Prince Albert, the younger brother of the King of Bavaria, who has a superb bass voice, playing *Geronimo*.——The Berlin Italian Opera company is at Hamburg. Signora Fiorentini (Mrs. Jennings), *prima donna*, and Labocetta, first tenor.——The Grand Opera in Paris will be closed during the months of July and August, with the authority of the Minister of the Interior, to prevent the heavy losses during the hot weather. It will re-open in September with Viardot in the "Prophète." Massol has been re engaged by the director. The title of the Rue Pinone, behind the Opera-house, has just been changed to Rue Rossini.——Adolphe Adam's new opera, "Le Bijou Perdu" ("the Body of Vengeance")—a very mysterious title, certainly—was produced at Weimar on the 12th ult., in presence of the Court, and, despite of its unintelligible title, was successful. A new opera, by Richard Wagner, was to be produced on the 15th August.——Two new operas by Signor Mariani, called "La Fidanzata del Guerriero" and "Gil Esuli," have been brought out at Constantinople.——Meyerbeer's "Huguenots" has been playing by the Italian company at New York: *Marcel* by Marini; Saivi, *Raoul*; and Mdlle. Steffanone, *Valentine*.——The Italian Opera at Rio Janiero had been unsuccessful, owing to the reigning epidemic, which had carried off several singers.——Three novelties are in preparation at the Royal Italian Opera.—Rossini's "Otello," Beethoven's "Fidelio," and Mauly's "Ione."

THE THEATRES.

HER MAJESTY'S

The direction has very wisely varied the performances by the revival of Bellini's opera of "I Capuletti ed I Montecchi." We say wisely, for, with the single frequenters of Her Majesty's Theatre, novelty is all-important. The nine consecutive representations of "La Tempesta" were sufficient test of its triumphant success on a great revival of Rossini's early work, and a convincing proof that the achievements of the artists employed in its illustration. That the "Tempesta" will constitute a principal feature in the operatic *repertoire*, there can be no question, for it possesses the two great elements of popularity—melody and dramatic power. Rossini's music is, in the ruling charm of the music of Bellini The opera has been hitherto given in a complex form; the several acts having been selected from Zingarelli, Vaccai, and Rossini, and re-written. The effect, naturally, of this strange combination was confusion worse confounded: the incongruity of the several styles marred the necessary lyrical unity, and the mind and the ear were unsettled and discomfited. Such, however, are now banished, and we have the opera in its entirety, the same colouring runs throughout; and the musical interest keeps pace with the dramatic development. The cast is singularly efficient: Parodi, the *Romeo*; and Frezzolini, the *Juliet*. Shakespeare himself could wish no more appropriate pair of his exquisite poem; the fire and energy of Parodi being admirably contrasted with the grace and delicacy of Frezzolini. The librettist has availed himself but of the outline of the original tragedy, for he has made the fiery *Tybalt* the rival of *Romeo*; the *Friar* is transformed into a family doctor; and "other ventures has he squandered abroad," doubtless induced by the lyrical exigences The *Romeo* of Parodi is moulded upon the conception and reading of her renowned preceptress, Madame Pasta; and the youth, and beauty, and intelligence of the pupil is no pale reflex of the marvellous powers of her great predecessor. The intense love, and fiery impetuosity, and deep grief, which constitute the elements of the "boy lover," were very finely depicted, and the tomb scene was instinct with the true spirit of romantic tragedy. The opening cavatina, "Ecco ridente a questo accento," of *Romeo*, was sung with great feeling and truthfulness of expression; and the duet with *Juliet*, "Si fuggiere," was encored with acclamation, as was the quintet in the finale to the first act. Madame Frezzolini, a tragic actress and singer, stresses in the very foremost rank, proved her versatility by her interesting portraiture of *Juliet*: it was fraught with tenderness and true womanhood. Her vocalisation was brilliant, her intonation perfect, and her rendering of the scena, "Eccomi in lieta vesta," was loudly applauded, and the second part re-demanded. Gardoni made his first appearance this season as *Tybalt*, and we were glad to find his voice as pure and sympathetic, and his powers as fresh and untouched by the rude winds of the north, as they were the season of his *début*. Belletti's *Capulet* was an admirable performance, and the concerted pieces were fully acted and sung by Lorenzo. The scenery, dresses, and appointments were picturesque and appropriate

On Thursday, the performances were for the benefit of Signor Pozzi. Chairman's opera of the "Matrimonio Segreto" was given with Mdlle. Castellan, Pozzi, and Tamburini. The *Geronimo* of Lablache is world-famous, and none who witnessed his great comic powers on this occasion but felt how above all rivalry stands the Titan of the lyric world. The united efforts of Sontag, Parodi, and Frezzolini combined to throw a delightful interest over this charming work, which throughout distinguished by the unceasing flow of melody and the grace of melodic inspiration. The celebrated trio "Le faccio un inchino" was re-demanded; and the exquisite aria "Pria que spunte l'aurore" was beautifully sung by Calzolari. Indeed, the entire opera was listened to with unmixed delight by a crowded audience

Thursday next will form an epoch in the annals of Her Majesty's Theatre, for on that evening the renowned Madame Pasta will appear in her grand creation, the *Anna Bolena*. Her acting in this character has been ever considered as a masterpiece of histrionic genius. Her present advent was as unexpected as its reality is replete with unalloyed gratification Pasta is the Siddons of the lyric stage: her conceptions were of the same Spartan and Cyclopedic calibre, shall, severe, and energetic. To behold Pasta, for one night only, revisiting the scene of her former triumphs, and kindling her torch upon the altar of her earlier glories, is full of sweet and bitter fancies. The *Jane Seymour* will be presented by Parodi, her gifted pupil. The event is of peculiar interest.

But perhaps the most startling announcement of the next week's performances is that which informs us that the celebrated "Black Maiden" will vindicate her Occidental fame, in a *divertissement* which has been [illegible] for her *début* on Tuesday night. This coloured lady (who is a [illegible] native of Spain) will execute a Spanish and Cuban bolero, which [illegible] have created so astonishing a sensation among the American *dilettanti*. The experiment is looked for with the utmost interest, and competent authorities prophesy a triumphant result.

Carolina Grisi has been engaged for a few nights, in order to enable the management to revive the "Tempesta."

ROYAL ITALIAN OPERA.

The eighth performance of Meyerbeer's "Huguenots," last Saturday night, was by special desire of her Majesty, who for the third time in one week honoured the theatre with her presence, again accompanied by the Prince of Russia and Prince Albert, the Royal suite occupying another double box to the left of the Queen's box. It was during the duo between Mdme. Castellan and Mdlle. Grisi, which sang the solos amidst bursts of cheering, every single repetition taken up with the greatest eagerness and spontaneity. Her Majesty was, evidently, much gratified by this second demonstration on the part of the audience. Every part of the theatre was crowded to excess. The opera was performed with the greatest spirit and precision, the "Benediction of the Daggers" being encored, and Mario and Grisi receiving a special ovation at the end of the third act, for their magnificent acting and singing. The Royal visitors remained until the fall of the curtain, frequently applauding Grisi, Mario, and Formes in the *finale*.

The sixth representation of Meyerbeer's "Roberto il Diavolo," on Tuesday night, was by special desire of her Majesty, to afford the Prince of Prussia the opportunity of hearing that great work. The Queen and Prince Albert intended to have been present, and were expected at the theatre up to ten o'clock, when the Prince of Prussia arrived; and it was intimated that, in consequence of the indisposition of the state of Sir Robert Peel, her Majesty and the Prince Consort would not be present at the performance. The news of the melancholy result likely to be anticipated from Sir Robert Peel's accident spread through the house, and rumours were forced upon the corridors at the end of each act, eagerly inquiring for the latest authentic information. The damp thrown over the evening by this event was unprecedented in our operatic reminiscences; and the artistes seemed to feel the chilly influence of the disastrous tidings—for the opera went off very languidly compared with former occasions.

On Thursday, for the extra night, Meyerbeer's "Prophète" was given for the fifth time. Rossini's "Otello," with Grisi, Zelger, Polonini, Maratti, Ronconi, and Tamberlik, is announced for this evening (Saturday).

ST. JAMES'S.

The reappearance, on Monday, of Mdlle. Rachel, is, in our opinion, an event of great theatrical importance, limited as may be the series of performances. So strong in this country has been the prejudice against the structure of French tragedy, and so different is the Parisian style of acting from ours, that the public mind needs to be prepared in order to its due appreciation. The latter is also, as we think, so superior, that it becomes the duty of the critic who has the good of the drama at heart, to bestow some diligence in commending what he believes to be beneficial both to the native drama, for the improvement of the popular taste, and promoting its reforming reaction on the national stage. We can learn something from our neighbours in this particular, and we ought; for while acting themselves abroad, Englishmen are English.

One of the *chefs d'œuvre* of the works of the elegant Racine, if not the *chef d'œuvre*, has been selected for the first effort of the great *tragédienne* of Paris, this season, at the theatre selected by the aristocracy of England for their especial patronage. Racine may be not unjustly esteemed the Sophocles of the French drama. Grace and beauty are the characteristics of his productions. In his early "Britannicus," he showed indeed some of the fiery spirit of the Fronde, which, in the beginning of its influence, was found among the rich and idle, and only later descended to the more operative and wealth-producing classes. The heroes of Racine are, however, more courtly than those of Corneille. Louis XIV. had restored to the court the respect for royalty which threatened its boldness without losing its vigour. Racine's "Phèdre," notwithstanding the nature of its subject, has a polished propriety in its manners, which strongly contrasts with the crime of the heroine. Not from a general corruption of morals, but as an individual destiny incurred from the wrong done to her sister *Ariadne*, in early life, the unholy passion rages in the bosom of the mother of *Hippolyte*. In structure, the tragedy is regular, even to conventionality Each heroine has her *confidante*, to whom is conveniently entrusted all that it is convenient for the audience to know; and *Hippolyte* himself is provided with his *Theramène*, to whom, in the second scene, the preliminary business is planted. Out of such simple situations, nevertheless, some of the most salient effects in the drama are produced. The weight is thrown upon the dialogue. It is Mdlle. Rachel's chief merit that she appreciates this. To the diction, accordingly, she gives peculiar force; her emphases are frequent; sometimes each word is elaborated, and its sense marked by a breadth of sound and a depth of intonation perfectly irresistible. This artistic peculiarity is perceptible from the first speech of her *Phèdre*. The victim of illicit passion enters, leaning on *Oenone* (Madame Croisnier), enfeebled and sick both in mind and body Scarcely able to totter into the apartment, indisposed to life, and overcharged with regrets, she eagerly, like an invalid, takes the seat prepared for her support. Lawful love concealed has so consumed her, that, from her intolerable sufferings, if not spoken out, she must find refuge in death. Artfully she leads on her confidante to inquiries which shall justify her own confession. *Oenone* at length puts the question, "Aimez-vous?" and the following terrible colloquy ensues:

Phèdre. De l'amour j'ai toutes les fureurs.

Oenone. Pour qui?

Phèdre. Tu vas cuir le comble des horreurs. J'aime—Ah! ce nom fatal, je frissonne. J'aime——

Oenone. Qui?

Phèdre. Tu connais ce fils de l'Amazone, ce prince si long-temps par moi-même opprimé——

Oenone. Hippolyte! Grands dieux!

Phèdre. C'est toi qui l'as nommé!

Then succeeds a grand set speech, in which, with hurried accents, *Phèdre* relates the origin and progress of her fatal passion. Both this and the above the Rachel delivered with consummate skill, and with powerful and startling effect, agitating the audience with mixed terror and wonder—the former for the truth of the emotion, and the latter for the skill of the *artiste*.

The second scene between *Phèdre* and *Hippolyte* exhibits the actress sitting in a chair, the body sometimes slightly raised under the inspiration of passion; but the situation was even all the more striking for being perfectly natural. As the latter, in a respectful position, was addressing her, *Phèdre's* subsequent interview with *Hippolyte*, in which she first sounds the state of his affections, and then desperately proceeds to unveil her own, terminating the revelation with a moment of indignation, in which she snatches from his hands his sword, declaring how much she is odious to herself for her intended crime, and how determined to avenge it. She leaves *Hippolyte* astonished. Such was the force and feeling of Rachel's delineation, that it seemed to receive the plaudits of the audience. Nevertheless, notwithstanding the energy and even vehemence of elocution, there was no violence of action, there was no crossing and re-crossing of the stage; but for the most part a statuesque pose was retained, and the expression of the features in the midst of the fiercest passion of face was admirably and delicately managed; their action being modulated, as it were, so that one form of it passed into the other by gradual mutations, not by sudden transitions

The method of histrionic art just described is the very reverse of that usually adopted on the English stage, where change of place is supposed to be conducive to effect, and where the leading performer claims the privilege of pacing pluckher out of temper with his pupil, to stamp, and strut, and rage about the boards. In this style we have seen one of our most respectable actors in *Coriolanus* dash past his mother, *Volumnia*, in the most unseemly and irreverent manner, notwithstanding that the motive-spring of the hero's character and conduct is supposed to be the exceeding veneration in which the noble son holds the mother of whom he says we have seen this, and heard it applauded by an uninstructed though well disposed pit. Such practices, let it now be said, are beside the purpose of genuine playing; and, in proof of the superiority of the opposite method, let us point to the example of Mdlle. Rachel, as bearing unexceptionable and commanding testimony.

With the arrival of *Thesée* on the scene, the fortunes of the drama change. Not being able to conceal her embarrassment, in the united presence of her husband and son, on explanation to the father becomes inevitable; when, inflamed by the demon of vengeance, *Phèdre* accuses the latter of having attempted her violation. We must here pause to bestow a word of deserved praise on M. Raphael, who, as *Thesée*, in the [illegible] scene, in the midst of the [illegible] was, indeed, a *King*, most touchingly pathetic. To disprove his mother's infamous accusation, the son pleads his love for *Aricie*; but *Thesée* looks upon the plea as a gross artifice to hide his passion for *Phèdre*; and in the midst of his public wife is now filled with a new passion—that of jealousy—and resolves on sacrificing the lovers to her vengeance. Her mind thrungs with phantasies: she contemplates Minos in the infernal regions, and in the midst of her passion her mind are full of horror. As the result of her unnatural passion, *Hippolyte* is condemned to exile; but, as stated by Euripides, whom Racine here closely copies, on his way he domestically. Nothing, then, remains for *Phèdre* but to perish. Her part in the last act is, indeed, most brief, but grand. Self-poisoned, she seeks *Thesée*, and expires in his presence

The argument of such a drama is sublime; but it is classical, and, in acting, demands the severest style of Greek art. What we have already stated is sufficient to indicate the manner in which Mdlle. Rachel realises its conditions. Her last scenes were worthy of her earlier ones; and, at the fall of the curtain, the triumph of the accomplished *artiste* was confirmed by the unanimous verdict of an intelligent and brilliant audience.

We have engraved a scene from "Phèdre," which we are compelled to defer till next week, when it will be found, together with a notice of Racine's "Bajazet," performed on Wednesday evening.

HAYMARKET.

The drama of the "Maid of Croissy" has been revived. Mr Webster and Mr. Buckstone appearing in their original characters of *Sergeant Austerlitz* and *Walter*. That of *Theresa* is charmingly sustained by Miss Reynolds. The entertainments, according to announcement, begins on next Monday, when a benefit for Mr. Webster is advertised.

SURREY.

The opera season has commenced, and has been signally successful. On Monday and Tuesday, Donizetti's opera of "Lucia di Lammermoor" was very effectively given, with Mr. Travers as *Edgar*, Borrani as *Douglas Ashton*, Delavonti in *Bide the Bent*, and Mdlle. Nau as *Lucy Ashton*

Bellini's beautiful opera, "Sonnambula," was announced for Wednesday, and created vast interest. The house was crowded. Borrani's *Rodolpho* is too well known to require description. Travers's *Elvino* is very naturally given; he sang "Gently o'er my heart is stealing," beautifully. Widdicomb, as *Elisso*, kept the house in a roar. Miss Jane Coveney's *Lisa* was creditable. The great attraction of the evening was the first appearance at this theatre of Miss Annie Romer, as *Amina*. She gave "Dear friends and companions," "Take this ring," and her air with the *finale*, "Come mi piace," in the first style of excellence. She acted the part as well as she executed the music, was several times encored, twice called before the curtain, and received showers of *bouquets*. She is a valuable addition to the vocal strength of the Surrey company

Mr. H. Rodwell's laughable farce of "My Wife's Out" was the second piece; and with Widdicombe, Miss Coveney, and Miss Laporte (who was encored in "Betty's Lament"), kept the house in perfect good-humour.

NEW STRAND.

Euripides' fine tragedy of "Alcestis" has here been made the subject of an exceedingly elegant burlesque, by Mr. Seymour, under the extended title of "Alcestis, or the Original Strong-minded Woman." It was produced on Thursday, and proved decidedly successful.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

The members of the Reform Club, including some of the most distinguished advocates of Liberal principles in England, intend entertaining Lord Palmerston at a magnificent banquet, early this month, as a testimony of their admiration of his private character, and approval of the policy which he has adopted in the capacity of her Majesty's Secretary of State for Foreign Affairs. Arrangements for a metropolitan dinner, to commemorate the recent victory in the House of Commons, are also stated to be in progress.

From a return just presented to the House of Commons, it appears that the total number of persons attacked with cholera in Ireland, and relieved, medically or otherwise, by boards of guardians, from September 29, 1848, to March 25, 1850, was 85,141. The cost of relief to 5000 persons, in consequence of supporters died from cholera, was £3183 14s. 3d., which, added to the medical and other expenses occasioned by cholera, made a total of £41,102 8s. 1d.

Sir Launcelot Shadwell is convalescent, and it is now probable that he will be able to resume his public duties before the vacation.

Mr. Dyce Sombre has printed in Paris, and circulated in London, a pamphlet of 590 octavo pages, to prove his perfect sanity. The petition for a new examination stands fifth on the list of opposed lunatic petitions for the next day of hearing.

The Duke of Wellington, at his late audit for Strathfieldsaye, Kingsclere, Sanghurst, &c., made an abatement of 15 per cent. on the rents, in consequence of the reduction in the price of all agricultural produce.

The Silver Bowl of the Royal Company of Archers, the Queen's Body Guard for Scotland, was won on Saturday last, at Edinburgh, by John Kennedy, Esq., W. S. Tenant of Pennycook.

On Saturday, Thomas Grix, of Lynn, in Norfolk, labourer, was committed to take his trial at the next assizes, for having, on the 16th of June, feloniously set fire to a stack of hay, the property of William Frost, of that place.

William Rushton, Esq., the present High-sheriff of Yorkshire, has returned 25 per cent. to his tenants at his recent audit.

There are frequently as many as ten or a dozen French ships discharging cargoes of corn and flour in Penzance pier at one time, the whole of which return to France in ballast.

The total amount of funds placed at the disposal of the Public Works Commissioners in Ireland, up to the 5th of January, 1850, was £6,795,417 18s. 3d. Of this sum, £5,417,896 7s. 8d. has been issued, leaving to be issued £1,377,521 5s. 7d., viz. £998,213 13s. 7d. for land improvement, and £346,307 12s. for ordinary loans and arterial drainage. The total repayments to the Exchequer on account of public works, to the 5th of January, 1850, was £1,448,593 16s. 1d. A sum of £103,073 remained unissued on the 5th of January, on account of piers, harbours, and navigation.

An American in charge of fortune has just come over to a young soldier of the 39th Regiment, at present stationed at Athlone. By the death of an uncle in the island of Cuba, this young soldier has come into possession of £50,000, as is stated, in money, besides very valuable estates in the same island. The young man is a Marrator, and he is said to be a remarkably well-conducted person, of very agreeable manner, and only in the 20th year of his age, and had enlisted in the regiment as a drummer when only 13 years old. He has left the regiment and is on his way to Cuba.

An inquest was held on Monday, before Mr. Bedford, on the body of the Rev. W. Gascoit, curate of Bagthorpe, Norfolk, who committed suicide by hanging himself, in King's College Hospital, a day or two since, while labouring under excitement, caused by the terror of a serious operation, to which, from the nature of his disease, he was about to submit. The jury returned a verdict of "Temporary insanity."

The total amount of salaries paid to schoolmasters and schoolmistresses in the several Poor-law districts and in the parishes and corporations not subject to the provisions of the Poor-Law Amendment Act, during the year ended March 31, 1849, was £30,920; the salaries paid to medical officers during the same period was £78,434 16s. 7d. The proportion of the grant received by Gilbert's incorporations by places under local acts during the same period was £2093 8s. 10d.

On Tuesday evening, Mr. J. Woolner, chemist, of Norfolk, committed suicide by taking a quantity of the essential oil of bitter almonds, which contains hydrocyanic acid, the most deadly of poisons, and thus terminated his existence at comparatively little compunction. A disappointment in love is mentioned in the will of a deceased relative is said to have been the cause.

A magnificent organ has just been opened in Chesterfield Church.

Such has been the extraordinary demand of late for veal, that liver cut for medical purposes, and the price has risen in the southern markets from about £20 to £36 per ton. The liver seems to be the most valuable part; for cod fish, which this time last year was bringing £16 per ton, was last month selling at low as £8.

An action has just been tried before the Tribunal of Commerce, at Paris, in which an English gentleman, named James, was plaintiff, against Mr. Hawley, a merchant of the same nationality, to recover the sum of 20,000 francs, contained in other articles of value belonging to his wife, estimated by him at 1880f., which was lost during his journey from Havre to Paris. The company refused to pay more than 150f., as their notice stated that money and articles of value were rendered as such, and were not paid for accordingly. The tribunal, however, decided otherwise, contending that the notice of the company did not apply to personal effects, and condemned the defendants to pay to Mr. James the amount of 1000f.

The greatest number of colliery explosions has occurred at Wallsend, where twelve have taken place between October 11, 1782, and December 19, 1838, attended with the loss of 166 lives. Alarms of explosions have occurred at Hetton, but without effect. At Haswell 97 lives have been lost in three explosions; at Hebburn, 81 in four; at Felling, 120 in three, and at the Rainton pits, 87 in three explosions.

On Saturday a cock fight still, at full work, was seized in Willowcourt, St. Pancras, by Mr. Oliver, the revenue and several other officers, who conveyed the same, together with a vast quantity of spirits, &c., to her Majesty's stores, Old Broad-street, City. Only one man, named Robert Sprague, was found on the premises. He was forthwith conveyed before Mr. Combe, the magistrate, who committed him to the House of Correction for three months, in default of paying £30. Illicit distillation is now carried on to an extent beyond conception, the spirit finding ready purchasers with the varnish-makers and low beer-shop keepers.

On Saturday a cock fight still, at full work, was seized in Willowcourt, St. Pancras, by Mr. Oliver, the revenue and several other officers, who conveyed the same, together with a vast quantity of spirits, &c., to her Majesty's stores, Old Broad-street, City. Only one man, named Robert Sprague, was found on the premises. He was forthwith conveyed before Mr. Combe, the magistrate, who committed him to the House of Correction for three months, in default of paying £30. Illicit distillation is now carried on to an extent beyond conception, the spirit finding ready purchasers with the varnish-makers and low beer-shop keepers.

Recent accounts from the French West India Island Guadaloupe mention the reappearance of a revolt of the Negroes against the whites. Many persons were killed, and the city of Point Petre set on fire in several places. The grossest outrages were daily committed; but, at the latest dates, the whites were under arms, and the blacks kept in awe.

The weather in Egypt at present is unseasonably hot, the thermometer marking 92 deg generally by F.A.M. As the sea-breeze freshens during the afternoon, the heat becomes considerably modified.

At the wreck of the Orient, the divers are continuing their operations with considerable success. Amongst the property recovered is the chest containing the silver plate belonging to the vessel. The value of the plate is upwards of £1500.

The public walks (25 miles in length) around the improving and busy town of Nottingham were opened on Monday. The ceremony was not so numerously attended as might have been expected, owing to the badness of the weather

Newtown Butler, county Fermanagh, having been constituted a post-town, the office there is opened for the issue and payment of money orders on and after the 6th inst. (this day), as is also the receiving office for letters at Tottenham-green, for the issue and payment of money orders.

The Egyptian ophthalmia prevails to a very great extent among the troops garrisoned at Cracow. It has not hitherto assumed a very formidable character, generally speaking, but many persons have already become blind.

The Spanish Government has contracted with a London firm for the immediate construction in England of two war steamers of 500 horse power each, which are to be completed by the end of February. This is in addition to the seven already ordered to be built, namely, two in England, three in Ferrol, and two in Cadiz. When these are launched, the steam navy of Spain will consist of 26 vessels.

The Bishop of Manchester has licensed the new chapel at Rossall Hall, near Fleetwood, for the performance of divine service.

Upon hearing of the intended erection of a chapel at Bishop Hatfield's Hall, Durham, on Very Rev. the Dean of Durham has transmitted the very munificent donation of £50 to the Rev. the Principal in aid of the funds.

A new church is intended to be built at Frocester, in the diocese of Gloucester. The parish church of Frocester has been decreased nearly a century, and the service is now held in an inconvenient chapel, which is now in a dangerous state, and too small for the congregation, and no burial-ground attached. The interments take place in the old burial-ground; to this spot the feelings of the parishioners are much attached, and a general desire has manifested itself to rebuild, on its old site, the parish church

The vessel *Agnes*, this week arrived in the West India Docks, from Nassau, New Providence, has brought 1000 puncheons, consigned to a well-known house, as a part of her cargo. This is the first direct importation of West India pine-apples into the metropolis during the present season.

The declared value of all cotton piece goods of India admitted duty free in 1847 was £160,640; in 1848, £76,738; in 1849, £45,505; and in the first three months of 1850, £12,312. The declared value of cotton manufactures of other sorts not made up admitted duty free in 1847 was £171,791; 1848, £97,289; 1849, £26,261; and in the first three months of 1850, £6,166. Of linens not made up the imports duty free were, in 1847, £11,489; 1848, £9451; 1849, £19,384.

The Apothecaries Company of London have voted the sum of £50, and the Cutlers' Company of Sheffield have likewise voted the sum of £50, to the funds now raising for carrying into effect the Exhibition of 1851

On Thursday night week the farm-house of Mr. George Cotton, at Naish, near Gainsborough, was broken into by four men, "marvies" in appearance, who plundered it of a quantity of property, including three sovereigns, eleven half-sovereigns, and other money, two silver watches, one of them with the name of "Thomas Atkin" scratched on the outer case.

NATIONAL SPORTS.

The Liverpool Meeting will be the grand feature of the Turf movements next week: it commences on Wednesday, and will occupy, as usual, three days; the Cup, to which the lesses of the course adds the munificent sum of £200, being fixed for the second day. There is every reason to expect a good field, and that the speculations will undergo some important fluctuations before the bell rings for saddling. The St. Leger will be run for over the Doncaster course. The Ascot Heath Meeting, a pleasant little meeting in Essex, comes off on Monday; Ipswich, on Thursday and Friday; Mansfield, on Thursday; and Kinnell, on Friday. There will also be a gathering in Jersey, commencing on Wednesday, while promises great things in a small way.

There are several cricket matches to come off in the course of the week, but only three of any importance, viz. one on Monday, between Kent and Sussex, and one on Tuesday, between the M.C.C. and ground and the Leamington — both at Lord's; and another set-to on Thursday, at the Oval, between Surrey and Kent.

The Aquatic register, but for the Tower Regatta on Tuesday, would be blank.

TATTERSALL'S.

MONDAY.—Windlehurst and Coeleorneille were in high feather for the Liverpool Cup, and Maid of Team Valley had a few admirers; the general business, however, on this and the other events being limited in extent, and unimportant in its results.

JULY STAKES.—5 to 2 as Grecian

NEWMARKET JULY MEETING.—TUESDAY.

HANDICAP SWEEPSTAKES of 20 sovs each. Mr. Casidy's Diligence (T. Smith), 1. Sir J. Hawley's Stang (Webster), 2.

THE JULY STAKES, of 50 sovs each.—Mr. Howard's Grecian (A. Day), 1. Sir J. Hawley's f. by Bay Middleton (Templeman), 2.

WEDNESDAY.

SWEEPSTAKES of 10 sovs each, for Two-year-olds.—Mr. Stephenson's c. by Dromedary (Flatman), 1. Lord Orford's Zadoc (F. Butler), 2.

FIFTY POUNDS.—Mr. Rolt's Collingwood (Flatman), 1. Mr. Gurney's Bullfinch (Feist), 2.

SWEEPSTAKES of 10 sovs each, for two-year-olds.—Mr. Rogers's Harp (Rogers), 1. Lord Exeter's c. by Venison, out of Ratan's dam (Marlow) 2.

THE TOWN PLATE of 50 sovs.—Lord Exeter's Prelaw (Flatman), 1. Mr Gurney's St. Fabian (Pettit), 2

THURSDAY.

MATCH.—Peasant Girl beat The Arab.

HANDICAP Californis, 1. Meridian, 2

THE CHESTERFIELD STAKES Teddington, 1. Aricsto, 2.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Consols have, from the commencement of the week, displayed an upward tendency, which the decided majority in favour of the foreign operations warranted by Government has continued to maintain. The opening price of Monday was 96¼ ¾, advancing to 96⅞ ¾, although the business transacted was comparatively trifling, Sir Robert Peel's unfortunate accident occupying general conversation. On Tuesday, a decline of ¼ per cent. was registered, and the day passed without any reaction; but on Wednesday, several large purchases, arising evidently from the continued easy state of money, caused quotations to advance to 96⅝, at which they closing at 96⅝ ¾. This advance was firmly maintained on Thursday, Consols having touched 96⅞, buyers. Exchequer Bills and India Bonds fully maintain last week's prices. The dividends due this quarter will be paid to the public on Government bank, and the books for transfer will open the 17th. The painful death of Sir Robert Peel has caused universal regret in the City, where he was regarded by all connected with financial affairs as the only financier of the age. Universal hopes were generally entertained that a measure to renew the Bank Charter, with such further modifications as would afford additional safety to credit, it being generally felt that in all matters connected with the Bank of England, and consequently with the currency, Sir Robert Peel's opinion would, in any Ministry, have sufficient influence to render it law. At the close of the week prices were firm, Reduced quoting 97¼; New Three-and-a-Quarter per Cent. Annuities, 98⅜; Long Annuities to expire Jan., 1860, 18 -16; Ditto, 30 Cent. Annuities, 98⅜; India Bonds under £1000, 50 p; South Sea Stock, Old Annuities, 95⅜; Consols for Account, 96⅝; Exchequer Bills, £1000, June, 70 p; Small, June, 70 p.

Without any marked rise in prices (Peruvian excepted), the Foreign Market has been well supported, fractional advances being quoted in several instances. Mexican is firmer, and Peruvian has advanced from 78½, Monday's quotation, to 80⅜. Remittances on behalf of creditors are promised from Bogota and La Guayra, in correspondence addressed to the committee of Spanish bondholders, causing a fractional improvement in Venezuela and Grenada bonds. The Market at the close of business was the following rates:—Danish Bonds, 1825, Three per Cent., 74; Equador Bonds, 30; Grenada Bonds, One-and-a-Half per Cent., 18; Mexican, Five per Cent., Account, 30; Peruvian Bonds, Four-and-a-Half per Cent., Account, 80; Portuguese, Converted, 1841, 33; Ditto, Four per Cent., 34; Russian Bonds, Four-and-a-Half per Cent., 95; x d; Ditto, Small, 95; Spanish, Passive, 3; Venezuela Bonds, Two-and-a-Quarter per Cent., 12; Ditto, Deferred, 1; Railway shares continue dull; the last prices are—Buckinghamshire, 17; Caledonian, 7; Ditto, New, £10 Pre-ference, 5; Eastern Counties, 7; Eastern Union, Class (late E. U. Shares), Scrip (6 per cent.), 16; East Lincolnshire, Guaranteed, 6 per Cent., 20; Great Northern, 91½, 92; Ditto, 4 A Deferred, 5; Ditto, 5 per Cent., Preference, 10; Great Western, 88; Lancashire and Yorkshire, 39; Ditto, Fifths, 1; Leeds and Bradford, 93; London, Brighton, and South Coast, 83; London and North-Western, 109; Ditto, New Quarters, 1½ 2; Ditto, Fifths, 1; London and South-Western, 86; Midland, 35; Ditto, £50 Shares, 10; Ditto, Consolidated Bristol and Birmingham, 5 per Cent., 102; North British, 8; North Staffordshire, 11; South-Eastern and Dover, 7; York, Newcastle, and Berwick (Newcastle Exten.), 0; Do. G.N.E. Preference, 4; York and North Midland, 16; Do. Preference, 7; Boulogne and Amiens, 6; Central of France (Orleans and Vierzon), 13; East Indian, 7; Great Indian Peninsular, 5; Luxembourg, 1; Do., 2; Namur and Liege, 7; Northern of France, 10; Orleans and Bordeaux, 2; Paris and Rouen, 23, Rouen and Havre, 8; Tours and Nantes, 2.

SATURDAY MORNING.—The upward tendency in Consols has been well maintained to-day, a rise of ⅛ per cent. being registered. The closing quotation is 96⅞ 97 for the opening. The Foreign Market continues good, Peruvian having advanced to 83⅜ 84, and Russian to 110; Mexican is 30⅜. Shares do not show much change.

THE MARKETS.

CORN EXCHANGE (FRIDAY). Since Monday the arrivals of English wheat for our market coastwise as well as by land carriage, have been on a limited scale. To-day few samples of either red or white were on offer, and the trade demanded ruled steady at fully last week's quotations. From abroad upwards of 10,000 quarters of wheat have come fresh to hand this week, in very middling condition. Selected parcels were scarce, and quite as dear, but all other qualities met a very slow sale, at barely Monday's currency. Barley was large, hence the demand for that article was very inactive, and prices were with difficulty supported. Malt, the supply of which was limited, ruled steady. Beans and Peas very dull prices. The show of oat samples was not large, yet the trade ruled heavy, and late figures were with difficulty supported. Indian corn was offered on lower terms. Flour and Seeds were dull trade.

Tables next to nothing was doing

ARRIVALS.—English: Wheat, 1383; barley, 60: malt, 490; oats, 230; flour, 960 Foreign: Wheat, 10,640; barley, 13,360; oats, 7240; flour, 900

English.—Wheat, Essex and Kent, red, 37s to 40s; ditto, white, 40s to 42s; Norfolk and Suffolk, red, 37s to 40s; ditto, white, 40s to 42s; rye, 30s to 32s; grinding barley, 19s to 21s, distilling ditto, 25s to 25s; malting ditto, 36s to 37s; Kent and Lincoln malt, 46s to 48s; brown ditto, 45s to 46s; Harrow beans, 34s to 36s per quarter; ticks, 32s to 34s; Yorkshire and Lincolnshire feed oats, 19s to 19s; potato ditto, 17s to 20s; Youghal and Cork, black, 14s to 16s; Sligo, white, 18s to 19s per load; new beans, new, 24s to 27s; grey peas, 23s to 25s; maple, 24s to 25s; white, 23s to 24s; boilers, 25s to 27s, per quarter. Town-made flour, 37s to 38s; Suffolk, 37s to 37s; Stockwell and Yorkshire, 37s to 39s, per 280 lbs.

Foreign: Danzig red wheat, —s to —s; white, —s to —s; barley, —s to —s; oats, —s to —s, beans, —s to —s; peas, —s to —s per quarter. Flour, American, 30s to 32s per barrel. Canada, 30s to 32s per barrel.

Seeds.—Scarcely a transaction worthy of notice has taken place in seeds this week. Prices are, therefore, almost nominal.

Linseed, English, sowing, 54s to 56s; Baltic, crushing, 40s to 42s; Mediterranean and Odessa, 38s to 40s; Hybrid, 34s to 36s per quarter; cakes, £6 10s to £6 15s per ton. Rapeseed, English, 36s to 38s; Foreign, 34s to 36s per quarter. Clover, red, 30s to 40s; white, 40s to 60

TERRIFIC EXPLOSION AT THE RAJ GHAUT FERRY, BENARES.—(SEE PRECEDING PAGE.)

the gift of the Queen, and the practice is every year to submit the design for her Majesty's inspection. In each case, the manufacturers, Messrs. Wilkinson and Dobson, of Piccadilly, have been honoured with her Majesty's approval, and the Race Committee have expressed themselves in flattering terms of the Plate.

The Prize is a claret flagon of classic design and ornamentation, one side of the bowl bearing a bas-relief of Phaëton, in his aërial chariot.

THE GUERNSEY RACE PRIZE CUP, PRESENTED BY HER MAJESTY.

PONY PHAETON FOR HER MAJESTY.

THIS unique little carriage has been built by Mr. Andrews, the Mayor of Southampton, who, by the Queen's command, delivered the Phaëton in person at Osborne House, on Monday, the 17th ult. The carriage was landed at the Royal wharf at East Cowes, and thence conveyed to the front of the Palace, where it was closely inspected by her Majesty, Prince Albert, and Colonel Bouverie, the Equerry in Waiting. The Queen and the Prince expressed to the Mayor their entire satisfaction with the style, elegance, and extraordinary lightness of the construction of the carriage, which scarcely weighs 3 cwt. The height of the fore wheels is only 15 inches, and of the hind ones 30 inches. The Phaëton is cane body, of George the Fourth style, with moveable head; the fore part is iron, but very light and elegant, and beautifully painted. The selection of the Phaëton was, we believe, suggested by the Queen, and it is intended for the sole use of her Majesty, who will drive in it a very small Shetland pony. The tires of the wheels are wide, to prevent cutting up the lawns and grounds around the palace. The workmanship is very beautiful: it bears no sign of Royalty, but a small crown painted at the back.

PONY PHAETON, BUILT FOR THE QUEEN.

THE TIDE OF EMIGRATION TO THE UNITED STATES AND TO THE BRITISH COLONIES.

THE great tide of Emigration flows steadily westward. The principal emigrants are Irish peasants and labourers. It is calculated that at least four out of every five persons who leave the shores of the old country to try their fortunes in the new, are Irish. Since the fatal years of the potato famine and the cholera, the annual numbers of emigrants have gone on increasing, until they have become so great as to suggest the idea, and almost justify the belief, of a gradual depopulation of Ireland. The colonies of Great Britain offer powerful attractions to the great bulk of the English and Scottish emigrants who forsake their native land to make homes in the wilderness. But the Irish emigration flows with full force upon the United States. Though many of the Irish emigrants are, doubtless, persons of small means, who have been hoarding and saving for years, and living in rags and squalor, in order to amass sufficient money to carry themselves and families across the Atlantic, and to beg their way to the western states, where they may "squat" or purchase cheap lands, the great bulk appear to be people of the most destitute class, who go to join their friends and relatives, previously established in America. Large sums of money reach this country annually from the United States. Through Liverpool houses alone, near upon a million sterling, in small drafts, varying from £2 or £3 to £10 each, are annually forwarded from America, for poor persons in Ireland, to enable them to emigrate; and the passage-money of many thousands, in addition, is paid in New York. Before the fatal year 1847, the emigration was very considerable; but, since that time, it has very rapidly increased. The following document, issued on the authority of her Majesty's Colonial Land and Emigration Commissioners, shows the progressive increase in the numbers of British subjects who have annually quitted our shores as emigrants, from 1825 to January 1st, 1850:—

EMIGRATION FROM THE UNITED KINGDOM DURING THE TWENTY-FIVE YEARS, FROM 1825 TO 1849 INCLUSIVE.

Years.	North American Colonies.	United States.	Australian Colonies and New Zealand.	All other Places.	Total.
1825	8,741	5,551	485	114	14,891
1826	12,818	7,063	903	116	20,900
1827	12,648	14,826	715	114	28,003

THE EMBARKATION, WATERLOO DOCKS LIVERPOOL

THE TIDE OF EMIGRATION TO THE UNITED STATES AND TO THE COLONIES.

(Continued from page 16.)

unprecedentedly large emigration of 1849. This human stream flows principally through the ports of London and Liverpool; as there is but little direct emigration from Scotland or Ireland. In the year 1849, out of the total number of 209,498 emigrants, more than one-half, or 132,902, left from the port of Liverpool. We learn from a statement in a Liverpool newspaper, that in the months of January, February, March, and April of the present year, the total emigration was 50,683 persons; and as these four months include two of the least busy months of the year, it is probable that the numbers during the months of May, June, July, and August, the full emigrational season, will be much more considerable, and that the emigration for the year will exceed that for 1849. Her Majesty's Colonial Land and Emigration Commissioners publish in the Spring of every year a useful little pamphlet, entitled the "Colonization Circular," which contains the names and duties of the emigration offices in the ports of the United Kingdom and in the Colonies—the cost of passage to the various colonies—a statement of the demand for labour—the rate of wages, and the price of provisions in each colony—an explanation of the mode of disposal of Crown lands—the privileges granted to naval and military settlers—the victualling scale on board ship—an abstract of the Passengers Act, and other valuable particulars. The Government, however, gives no information relative to the United States—so that its admirable little circulars is of comparatively little service to at least one half of the [illegible].

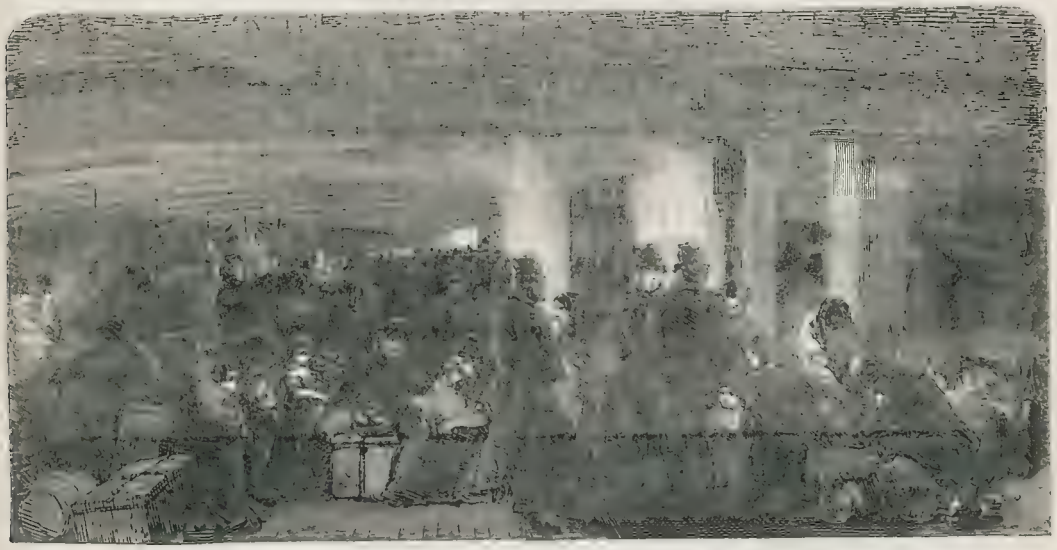
The majority of emigrants take a steerage passage, and go out at the cheapest rate. Out of the 158,902 mentioned above as having left the port of Liverpool in 1849, the number of first and second cabin passengers was only 4639. The information likely to be most valuable to the great bulk of the emigrants is, therefore, that relative to the [illegible] for their labour in the United States and the British Colonies. We shall, accordingly, extract from the Government Circular a good deal of the official information bearing upon this point, premising, in the case of each colony, a few practical hints and observations as to their characteristics and capabilities as emigration fields:—

BRITISH AMERICA.

Canada, New Brunswick, and Nova Scotia, although possessing many capabilities for profitable settlement, have of late years been comparatively neglected by the English settler; principally inasmuch as their contiguity to the more enterprising states of the Union, where labour and investment are sure of an ample reward, induces a contrast most unfavourable to their pretensions. Thus, of the area of New Brunswick, embracing nearly 20,000,000 acres, little more than half a million have been cleared; and the whole population of this [illegible] as yet reached a quarter of a million, or that of one [illegible] of London.

[illegible] Lower Canada, which is mostly settled by French Canadians, contains 192,000,000 acres, of which upwards of six millions are available for immediate and profitable settlement; and the quantity of good soil is said to be equal, in proportion to the whole, to that of any country in the world. Some of the best lands (that on which grows the hardest timber) produce, not unfrequently, one hundred bushels to the acre. Of Upper Canada, embracing sixty-four millions of acres, upwards of four million acres are available. The soil in general is moist, but rich and fertile. The settler in Upper Canada ought to select Toronto as his head-quarters for a while, and look about him, inspect the plans of public lands, and bear in mind that the best lands are not those in the immediate neighbourhood of the river-courses, but from twelve to sixteen miles in the interior—a circumstance tending to confirm an oft-repeated opinion, that a system of railways is absolutely necessary to stimulate agricultural enterprise and development in those colonies. The winter is not so severe in Upper as in Lower Canada: there is [illegible] than in England; and, as the frost disappears, the climate [illegible]ves—it becomes brighter, clearer, and more equable. Cotton, indigo, tobacco, and the mulberry are found to thrive under the sun of Upper Canada.

In Lower Canada the lands are disposed of in fifty-acre allotments and upwards; in Upper Canada, smaller portions are to be purchased; the price in Lower Canada averaging 5s., in Upper Canada 8s. currency per acre. The settler is cautioned against buying what are called cleared farms from private jobbers. In most cases these cleared farms are quite exhausted. If he deal with individuals, unless he has good knowledge of their character, let him take the land for a year or



STEAM BETWEEN DECKS.

two on trial before he purchase. The Government give frequently four or five years to complete a purchase. There are no taxes in Canada save those imposed for local purposes -the local rates being 8s. 5d. per annum on 200 acres of wild land, and 1d. per acre per annum on cleared land.

The following estimate, founded on the experience of a farmer in the London district of Upper Canada, has been given of the expense and profit of farming twenty acres there:—

		£	s.	d.	£	s.	d.
First Year.							
Chopping and clearing 20 acres at £4 ..		80	0	0			
Seed, 30 bushels		7	10	0			
Sowing, &c.		6	0	0			
Harvesting		7	10	0			
Twenty bushels of wheat					75	0	0
Second Year.							
Clover, &c.		2	10	0			
Mowing hay, &c.		7	10	0			
Hay					45	0	0
Third Year.							
Mowing, &c.		7	10	0			
Hay					45	0	0
Profit		47	10	0			
		165	0	0	165	0	0

Upper Canada is said to be admirably adapted for the cultivation of hemp, to alternate with grain crops. At present there is not one hemp or flax mill in the province.

SALE OF WASTE LANDS IN NORTH AMERICA.

Canada.—By a provincial Act of 1841, Crown lands are to be sold at a price to be from time to time fixed by the Governor in Council. The prices fixed for the present are as follows:—

	Per Acre. s. d.
In CANADA EAST (LOWER CANADA), for lands situated south of River St. Lawrence, down to River Chaudière and Kennebec-road, and including the township of Newton, county of Vaudreuil	4 0
County of Ottawa:	
Lands in townships previously advertised	4 0
Lands in townships to be hereafter advertised	3 0
East of River Chaudière and Kennebec-road, and including the counties of Bonaventure and Gaspé	2 0
North of River St. Lawrence, from westerly limit of county of Two Mountains, down to easterly limit of county of Saguenay	2 0

One-fourth of the purchase-money will be payable in five years from the date of purchase. The remaining three-fourths in three equal instalments at intervals of two years between each, all with interest.

No person will be allowed to purchase on these terms more than 100 acres.

The purchaser must clear on taking possession one half the width of the road on the whole front of his land; and within four years from the date of purchase, one-tenth part of the lot, and must reside thereon.

No patent will be issued to the purchaser until it is satisfactorily proved that the above-mentioned settlement duties have been duly performed, nor until the whole of the purchase-money and interest is paid up. In the meantime no timber must be cut without a license, except for clearing the land, or for farm purposes.

Applications to purchase land are to be made to the respective local agents in the colony.

For CANADA WEST (UPPER CANADA), 8s. currency (about 6s. 7d. sterling) per acre.

These prices do not apply to lands resumed by Government for non-performance of the conditions of settlement on which they were granted under a former system now abolished, nor to lands called Indian Reserves and Clergy Reserves; which three classes are, as well as town and village lots, subject to special valuation.

The size of the lots of country lands is usually 200 acres; but they are sold as frequently by half as whole lots.

The following are the conditions of sale at present in force, as regards land in Canada West:—

1. The lots are to be taken at the contents in acres marked in the public documents, without guarantee as to the actual quantity contained in them.

2. No payment of purchase money will be received by instalments, but the whole purchase-money, either in money or land scrip (issued by the local Government in satisfaction of certain old militia claims), must be paid at the time of sale.

3. On the payment of the purchase-money, the purchaser will receive a receipt which will entitle him to enter on the land which he has purchased, and arrangements will be made for issuing to him the patent without delay.

The receipt thus given not only authorises the purchaser to take immediate possession, but enables him, under the provisions of the Land Act, to maintain legal proceedings against any wrongful possessor or trespasser, as effectually as if the patent deed had issued on the day the receipt is dated.

Government land agents are appointed in the several municipal districts, with full power to sell to the first applicant any of the advertised lands which the return open to public inspection may show to be vacant within their districts.

To persons with sufficient capital for farming, this colony continues to offer great inducements. The improvements of the internal communications have enabled the farmers in the interior to avail themselves of the highest markets for the disposal of their surplus produce.

Nova Scotia.—The public lands are here also sold at a fixed price of 1s. 9d. sterling per acre, payable at once. The smallest regular farm lot contains 100 acres. Any less quantity of land may be had, but the cost would be the same as for 100 acres, viz. £5 10s., the *minimum* sum for which a deed of grant is issued.

New Brunswick.—The mode of sale in this province is by auction. The upset price is generally about 2s. 6d. sterling (3s. currency), but varies according to situation, &c. Fifty acres is the smallest quantity usually sold. Twenty per cent. discount is allowed for immediate payment. Purchasers have the option of paying in labour on the roads for their lots, but in that case 20s. must be paid down towards the expenses of survey.

Prince Edward Island.—Sale by auction prevails. The upset price was formerly 20s. per acre for wild land, and £10 to £20 per acre for town pasture and river lots. These rates were in 1837 reduced in certain localities on the application of the House of Assembly; and on a renewed application from the same body, the further alterations embodied in the following table were made in 1848:—

Situation of Land.	Quantity of Crown Land remaining Unsold.	New upset Prices.
Township No. 15	7,000 acres	5s. per acre
Township No. 35	2,040 acres	10s. per acre
Third Class of Pasture Lots, 8 acres each, in the Royalty of Georgetown.. ..	Not stated	£5 per acre
Town Lots in Prince Town, having a front of 60 feet	480 lots	Not reported

Newfoundland.—There exists no official return of the surveyed and accessible land at the disposal of the Crown in this colony. The area has been estimated at about 2,300,000 acres, of which about 23,000 have been appropriated. By a colonial law, Crown lands are to be sold by auction at an upset price, to be fixed by the Governor, at not less than 2s. per acre. Land exposed to auction more than once, on different days, may afterwards be sold, without further competition, at the last upset price. Although the agriculture of the province is progressively increasing, there are yet comparatively few persons exclusively employed in it, the population being nearly all engaged in the fisheries.

It appears by the information received from Mr. Buchanan, the chief Emigration Agent at Quebec, that the demand for labour in Canada continues to be limited. A general depression of the trading interests, together with the discontinuance of the expenditure maintained for some years past, in the construction of public works, has thrown out of present employment many artizans and mechanics, and a still larger number of common labourers. Some of those classes have turned to other means of living, or have sought employment elsewhere. But it may, perhaps, be some time before the extensive field for labour which has existed hitherto in Canada becomes fully re-opened. The agricultural interests, however, are in the meantime in a healthy state; and the settlement and improvement of land, encouraged by fair prices for most kinds of produce, continue to be carried on extensively.

The Immigration Agent does not hold out the prospect of a demand for the labour of emigrants in New Brunswick, during the season of 1850; and there is little demand for additional labour either in Nova Scotia or Prince Edward's Island.

AUSTRALIA AND NEW ZEALAND.

The climate of Australia is generally found to be healthy, but it is marked by great extremes of temperature. Certain districts are affected by hot north-west winds for occasional short periods during the summer; and wild droughts, which, however, are only partial, large tracts existing which are altogether free from such visitations. The lands unoccupied for wheat cultivation are in general admirably suited for pasturage. The whole island abounds with mineral productions.

The island of Australia Proper embraces four districts: on the south-west, Western Australia; south, South Australia; east, New South Wales; south-east, Victoria; their respective ports being Albany, Adelaide, Sydney, and Port Phillip. But the Australian groupe comprises also the adjoining island of Van Diemen's Land, with its towns of Launceston and Hobart Town, and the islands of New Zealand where there are now six principal settlements—Auckland, Wellington, and New Plymouth, in the Northern Island; in the Southern, Canterbury, Nelson, and Otago.

Western Australia, originally called Swan River, is well watered; the climate healthy and temperate; and the country abounds with natural pasture. Its exemption from droughts gives it a peculiar advantage over the eastern portion of the island for agricultural purposes, especially the growth of wool. The territory embraces upwards of twenty millions of acres, about one-twentieth being occupied.

South Australia, containing nearly ten times the area of Western Australia, is for the most part unexplored. Less than one million of acres have as yet been sold in this colony; the great pursuit being sheep-farming, for which the runs are let on lease, and are already covered with upwards of a million sheep. The soil is rich in minerals, and nearly twenty mines are in operation. Coal, however, has not yet been discovered.

New South Wales, the oldest settlement in Australia, presents everywhere an alternation of hill and dale. The staple pursuit is grazing—upwards of one hundred million acres being in occupation, but not two hundred thousand being cultivated. Victoria, lately erected into a separate colony, containing about sixty million acres, is, perhaps, the most interesting and promising of the Australian settlements, being free from the extreme heat of New South Wales, nor affected by the opposite extreme of humidity, like the neighbouring island of Van Diemen's Land. The soil is well adapted for all the branches of agriculture, and is eminently productive.

Van Diemen's Land greatly resembles England in many of its characteristics of soil and climate, and has attained to a higher point of agricultural development than the other Australian Colonies. It presents, however, moral evils which greatly detract from its claims as an Emigration field; and the disproportion of the sexes—48,000 males to 32,000 females—is a disgrace to English legislation and government.

Lastly, the Islands of New Zealand, presenting a surface of 60,000,000 acres, are for the most part admirably fitted for the purposes of colonisation. The climate is unsurpassed in the world; and when steam shall bring this most favoured region within more rapid intercommunication with America, its rich resources cannot fail to establish it as the commercial emporium of the Pacific. The great drawback hitherto has been its mis-colonisation, partly owing to differences between the New Zealand Company and the Government, and partly to the system adopted by the former, of charging a disproportionate price for their lands, on the plea of remote and problematical improvements.

SALE OF LAND IN AUSTRALIA.

The following are the regulations now in force under the provisions of the Australian Land Act, 5 and 6 Vict., c. 36, for the disposal of the Waste Lands in the Colonies of New South Wales (including the Sydney and Port Phillip districts, and any other districts that may hereafter be opened), South Australia and Western Australia.

1. All lands are disposed of by sale alone, and must have once at least been exposed.

2. The lowest upset price will be not less than £1 per acre; but the Government will have power to raise the same by proclamation, though not again to reduce it.

3. The lands are distinguished into three different classes; viz. Town, Suburban, and Country lots.

4. Upon town and suburban lots, as well as upon a proportion not exceeding one-tenth of the whole of the country lots offered for sale at any auction, the Governor will have the power of naming a higher than the general or lowest upset price; the country lots on which such power is exercised to be designated "Special Country Lots."

5. Town and suburban lots will in no case be disposed of except by public auction; but country lots which have already been put up to public auction and not sold, may be disposed of afterwards by private contract at the upset price.

6. No lands will be sold by private contract except for ready money. When sold by public auction, one-tenth at least of the whole purchase-money must be paid down, and the remainder within one calendar month, or the deposit will be forfeited.

7. Lands will be put up for sale in lots not exceeding one square mile in extent.

8. As an exception to the general regulations, and subject to certain restrictions laid down in the Australian Land Act, the Governor will have it in his discretion to dispose, by private contract, at a price not less than the lowest upset price for the district, of blocks comprising 20,000 acres or more.

9. Persons will be at liberty to make payments for colonial lands in this country, for which payment or deposit they will receive an order for credit to the same amount in any purchase of land they may effect in the colony, and will have the privilege of naming a proportionate number of emigrants for a free passage, as explained in the next article. The orders are to be made in one or more sums of £100 each at the Bank of England, to the account of the Colonial Land and Emigration Commissioners, and the depositor must state at the time the colony in which the land is to be selected, and give notice to the Commissioners of the deposit. Upon production of the Bank's receipt for the money, the Commissioners will furnish the depositor with a certificate, stating the amount which he has paid, and entitling him to obtain credit for that sum in any purchase which he may effect in the colony, subject to all rules and regulations in force in the colony at the time such purchase may be made.

10. For every sum of £100 deposited as above, the depositor will be entitled, for six months from the date of payment, to name a number [illegible] specified emigrants, equal to five adults. For the passage [illegible] fourteen are to be reckoned as equal to the adult. The emigrants are required to be chosen from the class of [illegible] and handicraftsmen, agricultural labourers, domestic servants, and such others as may set out with the intention to work for wages. They are to be subject to the approval of the Commissioners, and must, in all respects, fall within their general regulations on the selection of labourers. The purchaser and his family cannot receive a free passage under this privilege.

DEMAND FOR LABOUR IN THE AUSTRALIAN COLONIES.

1. *New South Wales.*—In a return dated 31st August, 1849, the Immigration Agent at Sydney reports as follows:—

"The labourers most wanted are shepherds, farm-servants, agricultural labourers, and female domestic servants. For rough carpenters, bricklayers, and blacksmiths there is a slight demand in the country districts, but for the superior description of mechanics or tradesmen, who can only find suitable employment in Sydney and other populous towns, there is no demand at all.

"An extensive establishment has now been formed in Sydney for the reception of the orphan immigrants, and arrangements have been made for the admission to it of all UNMARRIED FEMALES who may come to the colony unaccompanied by friends or relations. There is a matron in charge of the establishment, under whose care the females will be placed; and they will receive the advice and assistance of a committee, of which I have the honour to be chairman, comprising clergymen of the Church of England, the Church of Scotland, and the Church of Rome, and other members, who, from their official position or general experience, are well qualified to form a correct opinion of the characters of applicants for servants, and to advise immigrants accordingly as to the engagements which it would be most conducive to their interests to accept."

2. *South Australia.*—The following is an extract of a return from Mr. Brewer, the Emigration Agent in South Australia, for the quarter ended 31st December, 1848:—

"The demand for labour of every description continues as great as ever, notwithstanding the arrival during the quarter of a larger number of immigrants than during the previous one, but which has not affected the price of wages in the slightest degree; indeed, harvest wages have been higher this year than they have for the last five years." Female servants are specially mentioned as being much in request. The Colonial Secretary, however, in a previous return, remarked that, although no reduction had been effected in the rates of wages by the arrival of immigrants, it must be anticipated that their continued influx may produce a change in this respect; and that it would be well, therefore, in order to prevent the disappointment which would, in such an event, be naturally felt by those who may be induced to emigrate with expectations, founded on the present scale of wages, that they should be warned, before leaving England, of the probability of such a contingency.

The following extract of a despatch from the Governor, dated 30th January, 1849, may be useful to parties in this country:—"Under the impression that the present impulse, extensively prevalent in Great Britain in favour of emigration to South Australia, may very probably not be confined to such persons only as are qualified to succeed as colonists, it is as well, before closing this despatch, to observe that, whilst little fear need be entertained of industrious, steady men and women, accustomed to labour with their own hands, doing well, so great is their influx is regulated by the demand for their services, as safely indicated from time to time by the extent of Crown land sales, emigration to this province is not equally profitable to persons without capital and unaccustomed to manual labour. Gentlemen agriculturists have very seldom, if ever, proved a thriving class. Gentlemen sheep-farmers are at this moment much distressed by the low price of wool, an evil particularly among other causes. Purchasers of land at public auctions from the Crown, at an upset price of £1 per acre, usually and very readily obtain from 4s. to 7s. per acre for unenclosed land, and proportionately higher rates for land that is fenced; and money-lenders get from £10 to £18 per cent. per annum on good security. Persons not directly engaged in raising their subsistence from their land, find the cost of sustenance about the same as in England, butchers' meat and tea being the only items much cheaper. Wages and the rent of houses are higher, and the return for the expenditure under these heads is less satisfactory than that which is attainable for the same outlay in Great Britain. Those who emigrate in quest of salaried situations, in public or private employment, are usually disappointed."

Young unmarried females who emigrate to South Australia, without friends or relations on board, are, on arriving in the colony, at once removed from the vessel bringing them to a house in Adelaide, where every necessary comfort is in readiness for their reception. They are placed under the immediate control of a matron; and are required to conform to the regulated hours of the establishment, and otherwise to conduct themselves properly.

3. *Western Australia.*—Steady men, thoroughly acquainted with the various work required on a farm, are sure of finding employment at good wages. Most of this class who originally went out to the colony have become tenants of farms, and in some instances proprietors; their places being now very indifferently supplied by persons either unaccustomed to agricultural pursuits, or wanting in sober and industrious habits. For experienced shepherds there is still a demand. A few good blacksmiths, wheel wrights, and harness-makers also hardly fail to do well. Female domestic servants are also much wanted.

4. *New Zealand.*—It appeared by information from the Immigration Agent at Auckland, that good farm servants acquainted with rearing stock, dairy-women, and respectable female domestic servants, were in request, and that a few shoemakers and tailors were likely to find employment. It is stated in subsequent reports from the agent, that the success of the measures for promoting tranquility in the colony had tended greatly to increase the demand for labour of the above descriptions, but that it might be fully met by the arrival of the corps of Foncibles and their families, and by the services of the native labourers, who appear to be becoming very useful. Young men of no particular profession, and without capital, invariably fail to procure employment; and even those who have been brought up to mercantile pursuits are equally unsuccessful. Immigrants accustomed to live in towns, such as weavers, &c., are ill adapted for the colony, and real agriculturists are the only class who seem to do well. From October to April is the best season for arriving in New Zealand, and from May to September the least favourable; the colony is very healthy at all seasons, but the weather is boisterous and rainy during the last-mentioned period.

CAPE OF GOOD HOPE AND NATAL.

Natal, a tract of country on the south-east coast of Africa, embracing an area of nearly 15,000,000 acres, possesses a healthy climate, and, in some degree, combines the advantages of tropical and temperate regions, being adapted not only for the ordinary agricultural operations of the English farmer, but for the growth of coffee, cotton, rice, indigo, and sugar. The lands are sold by auction at an upset price of 4s. an acre; but special arrangements are made, which have been extensively acted upon, according to which a party depositing £1000 with the Government as the price of 5000 acres, and locating 100 emigrants in the colony, upon allotments of 20 acres each, will receive a return of 4000 acres in addition to the balance of 5000 acres of land, and the profit made by the passage of the emigrants to the colony—a system very advantageous to the capitalist who has money enough to cultivate the lands so obtained, but evidently not adapted to the interests of the poorer class of emigrants, unless they can at once find employment for themselves and their wives and their way at a reduced price into the market) and work for wages in the colony.

1. The unappropriated Crown lands in this colony are sold in free-hold, and by public auction only.

2. Unless it is otherwise notified, the upset price will be at the Cape two shillings (2s.) per acre (one acre is about half a morgen), and at Natal three shillings (3s.) per acre; but the Governor, for the time being, will have the power to fix such higher upset price as the locality, or other circumstances, may render expedient, of which due notice will always be publicly given. Lands not sold at auction may afterwards be purchased at the upset price on payment of the whole purchase-money.

3. Persons desirous of becoming purchasers will apply, in writing, to the Secretary to Government respecting the land they wish to have put up for sale, stating in what division it is situated, and, as far as practicable, its position, boundaries, and probable extent.

These applications, after being recorded in the Colonial Office, will be transmitted to the Surveyor General, who, if he see no objection to the land being disposed of, will call upon the applicant to deposit with him the probable expense of the survey, which expense will be calculated upon the following tariff, and be borne by the eventual purchaser:

	£	s.	d.
For a piece of ground, and dividing the same into small or fifths, or erven. for the first four lots, each	0	12	0
For any lot beyond that number	0	9	0
For the measurement of any piece of land up to 10 morgen	0	12	0
For every morgen above 10 up to 100, per morgen ..	0	0	3
For 100 morgen	1	14	6
For every morgen above 100, as far as 500, per morgen ..	0	0	1½
For 500 morgen	4	4	6
For every morgen above 500, per morgen	0	0	1
For 3000 morgen	14	14	0
For every morgen above the same	0	0	1
For every diagram	0	12	0

4. Should the applicant not become the purchaser, the amount de-

posited by him will be refunded when paid by the eventual purchaser; but should no sale take place, no refund can be made.

5. Lands offered for sale will be advertised for two months in the *Government Gazette*, at the expiration of which time they will be sold by public auction.

6. Ten per cent. of the purchase-money must be paid at the time of sale, and the balance (with the expenses of the survey, if the purchaser did not make the deposit) within one calendar month from the day of sale; in default of which, the 10 per cent. so paid will be forfeited to the Colonial Treasury.

7. Persons desirous of acquiring Crown lands at the Cape or Natal will be at liberty to make deposits at the Bank of England to the credit of the Colonial Land and Emigration Commissioners, upon the same conditions and with the like privileges as are prescribed in the case of the Australian colonies, with this exception, that, for every £100 so paid in, the depositor will be allowed to name for a free passage to the colony seven, instead of five, properly qualified emigrants. The rules affecting the selection of emigrants for the Cape are printed at page 16. These rules will also apply generally to emigrants to Natal, in case they be proposed for a passage by purchasers of land, or in case funds should be provided for carrying on emigration at the public expense. The persons eligible for passages to Natal would be agricultural labourers, mechanics, skilled labourers, and small farmers accustomed to some manual labour, and intending to work for their subsistence. Deposits to the credit of the Commissioners do not exempt the depositors from the payment of survey fees.

DEMAND FOR LABOUR AT THE CAPE OF GOOD HOPE.

Persons of the following classes, if of good character and ability in their callings, are stated to be in demand; viz. agricultural labourers, shepherds, female domestic and farm servants, and a few country mechanics, such as blacksmiths, wheelwrights, carpenters, and masons.

The following extract, relative to the sale of waste lands in the colonies, will be principally interesting to that valuable class of emigrants, who have not simply their labour, but some small capital, to invest.

THE FALKLAND ISLANDS

The lands in this colony are now open for sale. The mode of sale is the same as that adopted in the Australian colonies. The upset price of country lands is, for the present, 8s. per acre. Town lots of half an acre each, and suburban lots of fifty acres each, will be put up at £50. Deposits of purchase money may be made in this country, in the mode prescribed for the Australian colonies; but the depositors will be entitled to nominate for a free passage six, instead of five, adult labourers, for every £100 deposited.

WEST INDIES.

In the West Indies, Crown lands are to be sold by auction at an upset price of not less than £1 per acre.

In Antigua and Dominica the smallest lot sold is 40 acres, except in certain localities intended for villages.

In the Bahamas the mode of sale is also by auction, but the Lieutenant Governor is, from time to time, to name the upset price, which is never to be less than 8s. per acre. Land once exposed to auction may, in the discretion of the Lieutenant-Governor, be afterwards sold by private contract, at not less than the upset price of such land. The ordinary size of the lots in the Bahamas is to be twenty acres; but lots of five acres may, if thought expedient, be disposed of.

CEYLON.

In this colony the Crown lands are sold by auction, at an upset price, which is to be fixed by the Governor, but which is not to be less than £1 per acre. Before being exposed to auction, the lands are surveyed by the Government, and duly advertised.

HONG KONG.

The Crown lands will not be alienated in perpetuity, but let on leases, which are to be offered for sale at public auction. The duration of the leases will not exceed 21 years for country lands, intended for purposes of cultivation; but country lands required for sea-coast residences, and lands for building purposes, will be let on leases for 75 years, not renewable of right, but at the option of the Government, and on the holder's paying an increased rent. Powers will be reserved, when necessary, for regulating the character of the buildings to be erected in particular situations, and for avoiding the leasing within a specified time the buildings be not completed or in progress.

The rent to be paid for lands designated as marine, town, or suburban lots, will be determined exclusively by public auction; but leases of country lots, if they have been once exposed to auction and not sold, may be afterwards sold by private agreement, at the upset price.

The Governor will decide whether there is sufficient demand to call for public sales at fixed periods, or whether the leases should only be advertised and brought into the market as they may be applied for.

UNITED STATES.

It would be highly desirable if information equal in minuteness and authenticity to the foregoing, which bears sole reference to the British colonies, could be provided for the advantage of the large class of persons who emigrate to the United States; though it is scarcely to be expected that the British Government should undertake to supply it.

All the lands owned by the United States are surveyed under one system, the general land-office being at Washington, with local offices at Cincinnati for Ohio, Michigan, and Indiana; at Du Bugue for Wisconsin and Iowa, and at St. Louis for Illinois and Missouri. The lands being surveyed, townships are marked out, of six miles square, or thirty-six miles area; each square mile being a "section" of 640 acres, numbered from 1 to 36, and subdivided again into quarter and half-quarter sections. The lands are then offered for sale at public auction, at a minimum price of a dollar and a quarter, or about 5s. sterling, and the lands not sold at auction may be purchased at any time at the upset price. One section in each township is appropriated as an endowment for educational purposes.

Although the United States is yet possessed of thousands of square miles of territory, it appears that the quantity of *available* land in each district is being rapidly appropriated. The standard lands are coal-land for food, and coal lands for minerals. Corn-lands, being bottom lands, form a small proportion of the whole; and of the coal-fields not much is yet accessible to markets. Thus, improved farms in New York and Pennsylvania are often sold at 100 dollars an acre, and the cleared farm-lands of Ohio will soon command that price. In 1848 the white population was about eighteen millions. The increase is about 3½ per cent., or 600,000, and the average immigration 250,000; and three-fourths of the whole population devoting themselves to agriculture, we may readily conceive the enormous encroachments which this rapidly increasing population is yearly making upon the wilderness. In 1845, accordingly, the total quantity of lands entered for sale, or applied for public purposes, was nearly five millions of acres; of these, nearly two millions were Government sales, and more than two million acres were allotments to the Mexican soldiers—being upwards of four million acres entered for actual settlement.

For the purposes of this compendium it is only necessary to offer a brief sketch of the qualities of the principal available portions of the Union as an Emigration field. These are chiefly in the Western States of Ohio, Indiana, Illinois, Michigan, Missouri, Wisconsin, Iowa, the upper sections of the valleys of the Mississippi and St. Lawrence, and the lately annexed district of Texas.

Indiana, lying to the south of Lake Michigan, possesses the peculiar advantage of ready transport for produce by a fine system of rivers, flowing into Lake Huron or the Ohio, and affording ample outlets to various markets. The extent of the pork trade of Indiana is indicated by the circumstance that the annual slaughter of hogs for market reaches nearly 200,000 head.

Of Illinois, about two-thirds is prairie land, annually swept over by fire, which destroys the grass, and leaves a deposit of ashes to enrich the soil. Vast ranges of a mixed land, uniting forest and prairie, locally distinguished as "barrens," are to be found in these western districts, and are well adapted for all kinds of produce. Illinois possesses coal fields, and the Illinois and Michigan Canal affords great facilities for the development of agriculture.

Missouri possesses a remarkable diversity of soil, undulating ranges alternating with alluvial bottoms, and abounding in beds of minerals and natural manure. The country north of the Missouri has been called the Garden of the West—picturesque in scenery, and adapted for every species of agricultural enterprise.

Wisconsin, which is one vast, undulating plain, in the vicinity of the great lakes, is remarkable for the purity of the air and water and the healthiness of the climate, and possesses great river and lake facilities.

The other western districts present features very similar to those of the States here touched upon; and it will be found that accident or peculiar circumstances are more apt to determine the choice of a settler, than any striking natural superiority of one of these tracts over another. Lately-acquired state of Texas begins to attract many enterprising settlers, in consequence of the peculiar facilities it presents for agricultural cultivation, consisting for the most part of vast regions of wold and prairie, the removal of which (by fire) exposes a surface and soil of wonderful productiveness.

To describe the United States as a field of emigration and enterprise would require a space equal to that required for all the British colonies. It may suffice here to say, generally, that the great fortunes which have been made by land investments in the United States, have been the result, in most cases, of a combined energy and speculative foresight, which is not possessed by the majority of settlers: by purchasing lands as near to the centres of civilization as economy and prudence will permit; partially clearing these, submitting in the meantime to the hardships of a rude life; and in the course of a year or two disposing of them at enhanced prices to new-comers or less adventurous spirits. Such a mode of life is unsuitable as it would be distasteful to men accustomed to rely much upon society for their enjoyments. To these, the more cultivated and civilized States of New York and Massachussetts will present altogether disproportionate attractions, and they must be content with the advantages presented in such districts—advantages hardly to be earned by the small capitalist, now, in any part of the mother country—of a fair and well-assured field of fortune.

The following statements, derived from a small pamphlet recently issued, throw considerable light upon the prospects of the humbler classes, who prefer to become citizens of that great and growing republic, rather than to cast their lot in the colonies of their parent State. The pamphlet bears the title "Nine Years in America, by Thomas Mooney, a traveller for several years in the United States of America, the Canadas, and other British provinces, in a series of letters to his cousin, Patrick Mooney, a farmer in Ireland." The writer's politics are extreme, his dislike of England is considerable, and his predilections in favour of the United States, in every particular, political and social, are so broadly stated as to betray the partizan in every line. The statements will, therefore, be taken with a full allowance for his enthusiasm and his prejudice; though, to the bulk of the Irish emigrants, for whom they are intended, they will, doubtless, be received with full confidence. Irish emigrants must, ultimately, prosper in the United States, if the emigrants of past years can afford, as they do, to transmit annually for the benefit of their poorer brethren left behind, the magnificent sum of one million sterling:—

"The New World," says Mr. Mooney, "has become to the present European generation an object of the deepest interest. Every third man in Europe, who labours for his living, is dissatisfied with his condition, and would emigrate to the New World if he *knew how* to get a living there—if he were tolerably certain that he could obtain there good health, a reward for his labour, a return for his capital, security for his person, and education for his children.

"Now, all these a man of industrious sober habits can obtain, to a liberal extent, in this New World—to a greater extent, indeed, than the *majority* of men can obtain them in Europe.

"The American farmer, Patrick, never pays any rent. When he takes a farm, he buys it for ever. If it be what is called 'wild land,' he pays the Government about five British shillings an acre; and if he has no money on his first settling, it makes little matter, provided the land be not taken up, or 'entered' by another. He goes on cultivating in perfect confidence, giving notice to the nearest Government office. Two, three, or possibly seven years may pass over before he is called upon to pay the purchase-money. Even then, if he should be so unfortunate as not to be able to discharge the claim, he still has a 'squatter's right;' and if he has behaved himself honestly, in face of public opinion, to buy his farm over his head, then the buyer must allow him for his 'improvements,' according to the valuation of twelve sworn men.

"In the State of Wisconsin, there has recently been enacted a law, denominated 'The Homestead Law,' which is, in my humble opinion, the wisest law ever yet adopted by any nation to preserve the industrious from the machinations of the idle, and prevent the process of the pauper manufacture. It is this:—A farmer buys and cultivates a farm; it may be large or small, 40 or 500 acres. He builds and trades with the world, and, in the course of time, becomes unfortunate; his creditors come down upon his property with their executions; but this law interposes to an extent sufficient to prevent the unfortunate farmer becoming a pauper. It reserves from the grasp of the law the homestead; that is, the farmer's house, barn, stables, ploughs, oxen, waggons, farm-horses, cows, pigs, poultry, furniture, and forty acres of the land nearest to his dwelling."

"The Wisconsin homestead law has lately been adopted by two of the old States, viz. Vermont and New Hampshire, and will, I am persuaded, be adopted by the other free States.

"Should you purchase what is called an 'improved farm,' that is, one on which a house, barn, stables, &c., have been erected, and some portion of the land cleared and cultivated, here the price of the whole is agreed upon, some portion of the purchase-money is paid down, the balance is left due under the security of a mortage, at an annual interest of six, seven, or eight per cent., and is paid by easy yearly instalments.

"The 'wild land' is generally better and fresher than the 'improved farms,' and is to be found in the greatest abundance in the States of Wisconsin, Iowa, Minnesota, and Nibraska, where there are millions and millions of acres yet to be sold, at five British shillings an acre, for ever, free of all rent, rate, tax, or tribute of any sort, save the small tax necessary for roads, schools, and local government. The land is laid off in squares, as follows:—

A township is ten square miles, or	6400 acres.
A section is one square mile, or	640 acres.
A half section is half a square mile, or	320 acres.
A quarter of a section is ¼ of a square mile, or ..	160 acres.
A farm is	80 acres.
A half farm is	40 acres.

The smallest quantity of land which the Government agent will enter is forty acres. This land is quite as good as any in America, and can be obtained, colonized, and cultivated to a high state of perfection by the Irish.

"I would caution men of capital against buying 'improved farms' on their first arrival in America. Be at least a year in the country before you invest money in either land, house, or ship; and then look very sharply after title.

"The food of the American farmer, mechanic, or labourer, is the best, I believe, enjoyed by any similar classes in the whole world. At every meal there is meat, or fish, or both; and I think the women, children, and sedentary classes eat too much meat for their own good health. However, it is an error on the right side, easily cured when discovered. The breakfast of the common people is made up of coffee or tea, fish, meat, butter, bread, potatoes, all on the table. Dinner: meat and fish, potatoes, bread, pies made of apples or berries of all sorts, Indian pudding. Supper: Tea, meat, bread, hot cakes, &c.

"This kind of diet, or 'board,' with lodging and washing, can be had in the 'mechanics' boarding-houses,' in any of the cities of America (except those in the south), at two and a half dollars a week (11s. British) for men, and one dollar and a half (6s. 6d. British) for women. In the western States the same board and lodging can be had by the same classes for two dollars (8s. 6d. British) a week for men, and one dollar for women. In the southern cities board is nearly double these rates.

"In so wide a breadth of country as the United States, which embraces so many climates, from the frigid to torrid, it would be surprising indeed if some of those who come out from the moderate temperatures of England, Ireland, or Scotland, did not complain of the change. I have lived in all climates, and, except in New Orleans, never experienced a day's sickness in any. The south must be avoided during the summer by all those from the British Isles, until well acclimated: *temperate habits* will preserve you elsewhere.

"From all these causes the value of common manual labour is higher in the United States than in any other part of the world. The average value of a common uneducated labourer is 80 cents (3s. 4d.) a day; of educated or mechanical labour, 125 to 200 cents (5s. to 8s.) a day; of female labour, 40 cents (1s. 8d.) a day. Against meat, flour, vegetables, and groceries, at one-third less than they rate in Great Britain and Ireland; against clothing, house rent, and fuel, at about equal; against public taxes, at about three-fourths less: and a certainty of employment, and the facility of acquiring houses and lands, and education for children, *a hundred to one greater*. The farther you penetrate into the country, Patrick, the higher in general will you find the value of labour, and the cheaper the price of all kinds of living."

"It is true, a great deal of vice is found in the American cities of the large class, and this vice is represented at the press by some evil newspapers. Where the human mind is working with such intensity, it is not surprising that its grosser sensations should find an audible articulation in the public din. We cannot expect that any system, either religious or political, or both combined, will purify humanity completely from its natural grossness; yet it cannot be denied that the number of criminals and paupers in the United States are less in proportion to the whole population than are found in any other nation in the world.† The paupers in the whole United States are under 50,000, scarcely one of whom is to be found begging in the streets.‡ The great bulk of paupers are found in the alms-houses of the seaboard cities (named below), and in the large and dense manufacturing towns; the majority formed by the deposit from emigration, or the excrescence of the factories, or the dregs of intemperance. These are fed in the alms-houses by a tax on the citizens; and the most of this pauper crowd are Irish—the unfortunate appendages of the great annual immigration from that country. In the interior, the paupers bear but the merest fraction to the rest of the inhabitants. I have never found more than some 40 or 50 paupers in the *sole* alms-house of a town of eight or ten thousand inhabitants; and in the country or farming districts, not over a dozen old people in the alms-house, and these almost supported by *their own cultivation* of the alms-house farm.

"The Americans have no colonies, no penal settlements. No one is 'transported,' as you understand it, Patrick. All criminals are put to peculiar labour in the prisons, and the prisons are fitted up as great factories, with steam-engines, or water-wheels, which move machinery for making *all kinds* of articles, whether of clothing, house-furnishing, or machinery. If a criminal, on his entering prison, knows no trade, he is quickly taught one there. He is allowed the privilege of choosing the trade he will work at; but at some trade he must be employed from the first day of his imprisonment to the day of his liberation. The prisons are, from this arrangement, a source of profit to the State, instead of a burden; and are, moreover, a species of model mechanical school in the district where they are located.

"In the great agricultural states few farmers ever lock their doors at night. A robbery of a house is an *event*. I heard only of one robbery of the public mail in all my travels, and that was by a postmaster. In the dense seaboard cities, such as New York, Boston, Philadelphia, Baltimore, and New Orleans, there are robbers and murderers, as we find them in Paris, London, or Dublin."

Mr. Mooney concludes his first letter, in which these glowing counts of the Western Paradise are given to the world, with the lowing brief summary of the state of politics in the Republic:—

"You will find in America, Patrick, political parties existing, opposed to each other, as the political parties of Ireland are, or those England and France. While I would advise you to take the oath of allegiance to the Republic as soon as convenient after you arrive, I would caution you against taking any part in the politics of the country until you are in it a few years. You must be five years in the States before you can vote, but, in the far western states, a year's residence will entitle you to vote for many of the state officers and members. The great question of the United States now is the abolition of slavery. The abolition is almost universally admitted as necessary, but the *mode* of abolishing is the great question of difficulty. The other parties in the Republic deserve a notice.

"The *Free Soiler* represents the idea that the land, like the air and water, having been created by God for the use of man, should not be bought, sold, or rented. Were this so, they contend, no man would have more than he and his sons could cultivate, and each man would have enough. This party are urging the Government to concede farms to all *bona fide* settlers, without price or rent; and they are making way in the Union. The state of Wisconsin has partly embodied their idea in the 'homestead law.'

"The *Locofoco* represents the idea of complete free-trade in everything made by the hands of man, or produced from the earth, or the results of labour or business. The expenses of the Government to be defrayed by a direct property and poll tax; neither a national debt to be created, nor bank paper fabricated; and a wide distribution of power among the people.

"The *Democrat* is a sort of extinct term.

"The *Whig* represents a manufacturing and commercial idea, with protection for capital invested in particular enterprises, a big national bank, and concentration. The Whigs, owing to splits among the other parties at the last election, have carried their favourite candidate, General Taylor, to the Presidential chair; but the other parties have a decided majority in both Houses of the Legislature against him.

"Now, Patrick, I have opened to your view a glance at the people among whom you are about to begin a new life.

"I return to Ireland for a while, to scatter the seeds of thought among my countrymen. Sir Walter Raleigh, an Englishman of the reign of Queen Elizabeth, brought from America, three hundred years ago, a pocket-full of potatoes, which he planted in those islands: they grew, multiplied, and became at last the chief food of the people. I hope to scatter far more valuable plants in the land—plants that will invigorate and illumine the minds of the Irish."

It would appear that very few out of the vast army of Irish and other emigrants that proceed to the United States, or the British Colonies, go out as mere adventurers, without some knowledge of the country, or their chances of doing well, when they get there. The sums received by them before they leave this country are sufficient proofs that they have prosperous friends upon the other side; and it is to be presumed that the friends who send them money, do not avoid sending them advice, and giving them full information, to the best of their means, as to their movements upon arrival.

EMIGRATION FROM LIVERPOOL.

We now proceed to detail the process of emigration, beginning with the arrival of the emigrants at Liverpool, the great port of intercourse with the United States. In the annexed Illustrations, our Artists have portrayed the principal incidents that occur in port—from the arrival of the family to their final departure from the Mersey. The first care of the emigrants, if their passage have not been previously paid for them by their kind friends in New York, is to pay their passage-money, and make the best bargain they can with the passenger brokers. The competition in this trade is very great, and fares, accordingly, vary from day to day, and even from hour to hour, being sometimes as high as £5 per passenger in the steerage, and sometimes as low as £3 10s.

All persons contracting to convey passengers to North America are required to take out a license; and, under the new act, have also to give bonds by themselves and two sureties to the Colonial land and Emigration Commissioners, to the amount of £200. There are at present twenty-one licensed passenger-brokers in Liverpool. The following list appears in the *Liverpool Journal*:—George Percival, representing the house of Messrs. Harden and Co.;

* A *cent* is an American copper coin of the same size and value of an English halfpenny. The American dollar is worth one hundred cents; an English shilling is worth 24 cents. The English sovereign is worth 484 cents.

† The whole number of criminals in prison in the United States is under 6000.

‡ In New York, the great *entrepôt* of the Republic, the average number of paupers in the alms-house is 4000, in Boston, 2000; Philadelphia, 2800; Baltimore, 1200. The total population of these four cities is 1,000,000.

THE DEPARTURE.

Wilson, representing Messrs. Pilkington and Wilson, 55, Waterloo road; Daniel P. Mitchell, representing Messrs. Train and Co.; Josiah Thompson, representing Messrs. Grimshaw and Co., 11, Goree-piazzas; J. T. Crook, 2, Tower-chambers, Old Churchyard, and 115, Waterloo-road; George Saul, 36, Waterloo-road; J. W. Shaw, 90, Waterloo-road; Robert Dunn, 1, Cook-street; Orson Pratt, 15, Wilton-street; Thomas Elliott, 11, Waterloo-road; W. Robinson, 48, Waterloo-road; William Tapscott, Regent-road; Frederick Sabell, 28, Moorfields; Eleazar Jones, 25, Union-street; G. C. Beckett, 116, Waterloo-road; J. S. Holmes, 120, Waterloo-road; D. O'Donovan, 117, Waterloo-road; Edward Matthew Norris, 6, Regent-road; William Russel Grace, 120, Waterloo-road; Thomas Lockhart, 192, Great Howard-street; William Maume, 6, Regent-road; and Michael M'Donnell, 47, Union-street.

Amongst these twenty-one, says the *Liverpool Journal*, are the names of parties well known in Liverpool, of high honour and strict integrity; but, on the other hand, it must be confessed that there are some to whom this character will not apply; and Lieut. Hodder, the Government Emigration Agent, whose duty it is to see the poor emigrant protected, and the act carried out, is, with his officers, kept in a state of constant combativeness. If a summons be taken out, the chances are ten to one but that the poor people whom it was intended to victimise are treated with; and, to save the exposure which would otherwise result, the case is compromised at any price. The magistrates may, for any irregularity or delinquency, withdraw a licence—a power sometimes exercised; but no cases are yet on record of the forfeiture of a bond.

The walls of Liverpool are thoroughly placarded with the notices of the days of sailing of the various packets, for which the above firms act as passenger-brokers, and set forth in large letters the excellent qualities of such well-known and favourite packets as the *Yorkshire*, the *New World*, the *Isaac Webb*, the *West Point*, the *Constitution*, the *Isaac Wright*, the *London*, the *Star of the West*, the *Queen of the West*, and scores of others. The average number of steerage passengers that can be accommodated in these fine vessels (which are mostly owned in New York) is 400; but some of them, such as the *Isaac Webb*, can comfortably make room for double that number.

After the emigrant has chosen the ship by which he will sail, and perhaps run the gauntlet through scores of designing and unscrupulous "man-catchers"—a class of persons who get a commission from the passenger-brokers for each emigrant that they bring to the office—his next duty is to present himself with his family at the

MEDICAL INSPECTOR'S OFFICE.

By the terms of the New Passenger Act, 12 & 13 Vict., c. 33,

QUARTER-DECK OF AN EMIGRANT SHIP.—THE ROLL-CALL.

THE GOVERNMENT INSPECTOR'S OFFICE.

no passenger-ship is allowed to proceed until a medical practitioner appointed by the emigration office of the port shall have inspected the medicine-chest and passengers, and certified that the medicines, &c. are sufficient, and that the passengers are free from contagious disease. The master, owner, or charterer of the ship is bound to pay the medical inspector the sum of £1 sterling for every 100 persons thus inspected. When the emigrant and his family have undergone this process, their passage-ticket is stamped, and they have nothing further to do, until they go on board, but to make their own private arrangements and provide themselves with outfits, or with such articles of luxury or necessity as they may desire over and above the ship's allowance. All persons who may be discovered to be affected with any infectious disease, either at the original port of embarkation or at any port in the United Kingdom into which the vessel may subsequently put, are to be re-landed, with those members of their families, if any, who may be dependent on them, or unwilling to be separated from them, together with their clothes and effects. Passengers re-landed are entitled to receive back their passage-money, which may be recovered from the party to whom it was paid, or from the owner, charterer, or master of the ship, by summary process, before two or more justices of the peace

THE EMBARKATION.

The scene in the Waterloo Dock, at Liverpool, where all the American sailing packets are stationed, is at all times a very busy one; but, on the morning of the departure of a large ship, with a full complement of emigrants, it is peculiarly exciting and interesting. The passengers have undergone inspection, and many of them have taken up their quarters on board for twenty-four hours previously, as they are entitled to do by the terms of the act of Parliament. Many of them bring, in addition to the boxes and trunks containing their worldly wealth, considerable quantities of provisions, although it must be confessed that the scale fixed by the Government to be supplied to them by the ship is sufficiently liberal to keep in health and comfort all among them, who, in their ordinary course of life, were not accustomed to animal food. The following is the scale, in addition to any provisions which the passengers may themselves bring:—

3 quarts of water daily.
2¼ lb. of bread or biscuit (not inferior to navy biscuit) } per week. To be issued
1 lb wheaten flour } in advance, and not less
5 lb. oatmeal } often than twice a week.
2 lb. rice }
2 oz. tea }
½ lb. sugar }
½ lb. molasses }

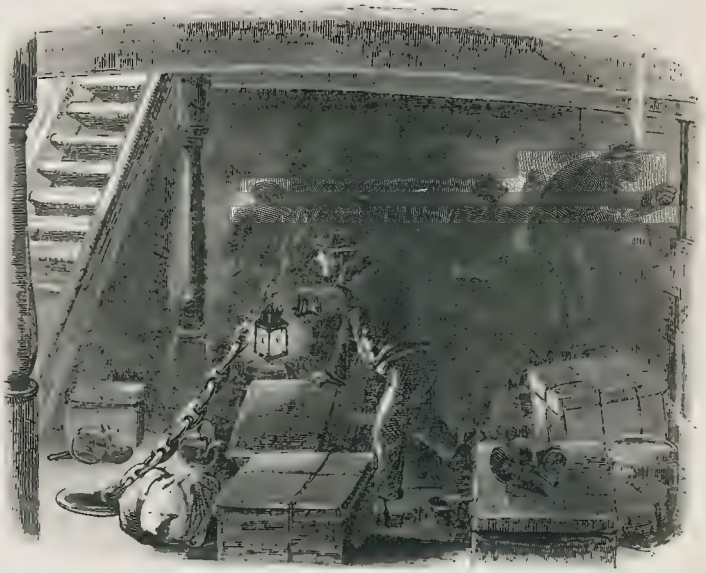
5 lb. of good potatoes may, at the option of the master, be substituted for 1 lb. of oatmeal or rice; and in ships sailing from Liverpool, or from Irish or Scotch ports, oatmeal may be substituted, in equal quantities, for the whole or any part of the issues of rice.

Vessels carrying as many as 100 passengers must be provided with a seafaring person to act as passengers' cook, and also with a proper cooking apparatus. A convenient place must be set apart on deck for cooking, and a proper supply of fuel shipped for the voyage. The whole to be subject to the approval of the emigration officer.

DANCING BETWEEN DECKS.

The scenes that occur between decks on the day before the sailing of a packet, and during the time that a ship may be unavoidably detained in dock, are not generally of a character to impress the spectator with the idea of any great or overwhelming grief on the part of the emigrants at leaving the old country. On the contrary, all is bustle, excitement, and merriment. The scene represented by our Artist, of a party of emigrants, male and female, dancing between decks—to the music of the violin—played for their amusement, by some of their fellow-passengers, is not a rare one. Sometimes a passenger is skilful upon the Irish bagpipe, and his services are freely asked and freely given for the gratification of his countrymen and countrywomen—not simply while in dock, but, according to the reports of captains and others, during the whole voyage. Any person who can play the violin—the flute—the pipe, or any other instrument, becomes of interest and importance to the passengers, and is kept in constant requisition for their amusement. The youngest child and the oldest man in the ship are alike interested; and greyheaded men and women are frequently to be seen dancing with as much delight, if not with as much vigour, as if seventeen, not seventy, was the number that would most nearly express their age.

But, as the hour of departure draws nigh, the music ceases. Too many fresh arrivals take place every moment, and the decks become too much encumbered with luggage to admit of the amusement. Although notice of the day and hour of departure may have been given for weeks previously, there are a large class of persons—not confined to emigrants, it may be observed *en passant*—who never *will* be punctual, and who seem to make it a point of duty and conscience to postpone everything to the last moment, and to enjoy the excitement of being within a few minutes or even moments of losing their passage. These may be seen arriving in flushed and panting detachments, driving donkey-carts laden with their worldly stores, to the gangway at the ship's side. It often happens that the gangway has been removed before their arrival, in which case their only chance is to wait until the ship reaches the dock-gate, when their boxes, bales, barrels, and bundles are actually pitched into the ship, and men, women, and children have to scramble up among the rigging, amid a screaming, a swearing, and a shouting perfectly alarming to listen to. Not unfrequently a box or a barrel falls overboard, and sometimes a man or a woman shares the same fate, but is speedily re-saved by men in a small boat, that follows in the wake of this ship for the purpose, until she have finally cleared the dock.



SEARCHING FOR STOWAWAYS.

DANCING BETWEEN DECKS.

THE DEPARTURE.

There are usually a large number of spectators at the dock gates to witness the final departure of the noble ship, with its large freight of human beings. It is an interesting and impressive sight; and the most callous and indifferent can scarcely fail, at such a moment, to form cordial wishes for the pleasant voyage and safe arrival of the emigrants, and for their future prosperity in their new home. As the ship is towed out, hats are raised, handkerchiefs are waved, and a loud and long-continued shout of farewell is raised from the shore, and cordially responded to from the ship. It is then, if at any time, that the eyes of the emigrants begin to moisten with regret at the thought that they are looking for the last time at the old country—that country which, although, in all probability, associated principally with the remembrance of stern and unfeeling [illegible] to a constant battle for the barest means necessary to support existence, is, nevertheless, the country of their fathers, the country of their childhood, and consecrated to their hearts by many a token. The last look, if known to be the last, is always sorrowful, and refuses, in most instances, to see the wrong and the suffering, the error and the misery, which may have impelled the one who takes it, to venture from the old into the new, from the tried into the untried path, and to recommence existence under new auspices, and with new and totally different prospects.

"Farewell, England! Blessings on thee—
Stern and niggard as thou art.
Harshly, mother, thou hast used me,
And my bread thou hast refused me:
[illegible]

is doubtless the feeling uppermost in the mind of many thousands of the poorer class of English emigrants at the moment when the cheers of the spectators and of their friends on [illegible] the instant of departure from the land of their birth. [illegible] of the Irish emigrants, a similar feeling—though possibly less [illegible] can scarcely fail to be excited. Little time, however, [illegible] to indulge in these reflections. The ship is generally towed by a steam-tug five or ten miles down the Mersey; and during the time occupied in traversing these ten miles, two very important ceremonies have to be gone through: the first is "*the Search for Stowaways*," and the second is the "*Roll-call of the Passengers*."

THE SEARCH FOR STOWAWAYS.

The practice of "stowing away," or hiding about a vessel until after the passage tickets have been collected, in order to procure, by

this fraudulent means, a free passage across the Atlantic, is stated to be very common to ships leaving London and Liverpool for the United States. The "stowaways" are sometimes brought on board concealed in trunks or chests, with air-holes to prevent suffocation. Sometimes they are brought in barrels, packed up to their chins in salt, or biscuits, or other provisions, to the imminent hazard of their lives. At other times they take the chance of hiding about the ship, under the bedding, amid the confused luggage of the other passengers, and in all sorts of dark nooks and corners between decks. Hence, it becoming expedient to make a thorough search of the vessel before the steam-tug has left her, in order, that, if any of these unhappy intruders be discovered, they may be taken back to port and brought before the magistrate, to be punished for the fraud which they have attempted. As many as a dozen stowaways have sometimes been discovered in one ship, and cases have occurred, though not frequently, of men, women, and young boys, having been taken dead out of the barrels or chests in which they had concealed themselves, to avoid payment of £8 or £4 passage money. When the ship is fairly out, the search for stowaways is ordered. All the passengers are summoned upon the quarter-deck, and there detained until the search has been completed in every part of the ship. The carpenter, with the chief officer, attended by the clerk of the passenger broker, and as many of the crew as may be necessary for the purpose, then proceed below, bearing masked lanterns or candles, and armed with long poles, hammers, chisels, &c., that they may not only rummage and poke into dark places, but that they may break open suspicious looking chests and barrels. Occasionally the pole is said to be tipped with a sharp nail, to aid the process of discovery in dark nooks; and sometimes the man armed with the hammer hammers the bed-clothes, in order that if there be a concealed head underneath, its owner may make the fact known, and thus avoid a repetition of the blows. If a stowaway be concealed in a barrel, it is to be presumed that he has been placed with his head uppermost, and the searchers, upon this hint, whenever they have a suspicion, deliberately proceed to turn the barrel bottom upwards—a process which never fails, after a short time, if the suspicion be well founded, to elicit a response from able cry for release. Although this search is invariably made with the utmost care, it is not always effectual in discovering the delinquent; and instances have occurred in which no less than eight, ten, or even a larger number, including both men and women, have made their appearance after the vessel has been two or three days at sea. Some captains used to make it a rule to behave with great severity, if not cruelty, to these unfortunates; and instances are related of their having caused them to be tarred and feathered, or to walk the decks through the cold nights with nothing on but their shirts: but this inhumanity does not now appear to be practised. As there is a great deal of dirty work that must be done on ship-board, the stowaways are pressed into that service, and compelled to make themselves useful, if not agreeable. They are forced, in fact, to work their passage out, and the most unpleasant jobs are imposed upon them. After due search for them in every corner of the ship, the next ceremony, that of the

ROLL-CALL,

is commenced. This is one that occupies a considerable space of time, especially in a large ship, containing seven or eight hundred emigrants. The passengers—those in the state cabin excepted—being all assembled upon the quarter-deck, the clerk of the passenger-broker, accompanied by the ship's surgeon, and aided in the preservation of order by the crew, proceeds to call for the tickets. The clerk, or man in authority, usually stands upon the rail, or other convenient elevation on the quarter-deck, so that he may be enabled to see over the heads of the whole assemblage—usually a very motley one—comprising people of all ages, from seven weeks to seventy years. A double purpose is answered by the Roll-call—which resembles that of the passenger-list, and the medical inspection of the emigrants, on behalf of the captain and owners. The previous inspection on the part of the Governor was for the purpose of preventing the risk of contagious disease on board. The inspection on the part of the owners is for a different object.

The ship has to pay a poll-tax of one dollar and a-half per passenger to the State of New York; and if any of the poor emigrants are helpless and deformed persons, the owners are fined in the sum of seven hundred-and-five dollars for bringing them, and are compelled to enter into a bond to the city of New York that will not become a public burden upon the public. To obviate this risk, the medical officer of the ship passes them under inspection; and if there be a pauper cripple among the number who cannot give security that he has friends in America to take charge of him on arrival, and provide for him afterwards, the captain may refuse to take him.

The business of verification and inspection generally occupies from two to four hours, according to the number of emigrants on board; and, during its progress, some noteworthy incidents occasionally arise. Sometimes an Irishman, with a wife and eight or ten children, who may have only paid a deposit of his passage-money in attempts to evade the payment of the balance, by pleading that he has not a farthing left in the world, and trusting that the ship will rather take him out to New York for the sum already paid, than incur the trouble of putting him on shore again with his family. Sometimes a woman may have included in her passage ticket an infant at the breast, and may be seen, when her name is called, panting under the weight of a strapping boy of eight or nine years of age, whom she is holding to her bosom as if he were really a sucking. Sometimes a youth of nineteen, strong and big as a man, has been entered as under twelve, in order to get across to America for half the fare of an adult; and sometimes a whole family are without tickets, and have come on board in the hope that, amid the confusion which they imagine will be attendant upon the congregation of so many hundred people in a ship, they may manage to evade notice, and slip down unperceived amid those whose documents are found *en règle*. These cases, as they occur, are placed on one side; and those who have duly paid their passage money, and produced their tickets, are allowed to pass down and take possession of their berths. Those who have not paid, either in whole or in part, and who are either unable or unwilling to satisfy the claim against them, are then transferred on board the tug, with their bag and baggage, to be removed to port. Those who have money, and who have attempted a fraud, generally contrive, after many lamentations about their extreme poverty, to produce the necessary funds, which, in the shape of golden sovereigns, are not unfrequently found to be safely stitched amid the rags of petticoats, coats, and unmentionable garments. A few who have really no money, and who cannot manage to appeal to the sympathy of the crowd for a small subscription to help them to the New World, must resign themselves to their fate, and remain in the poverty from which they seek to free themselves, until they are able to raise the small sum necessary for their emancipation. The stowaways, as they are ordered to be taken before the magistrates; and all strangers and interlopers being safely placed in the tug, the emigrant ship is left to herself. May all prosperity attend her living freight!

"Far away—oh, far away—
We seek a world o'er the ocean spray!
We seek a land across the sea,
Where bread is plenty and men are free.
The sails are set, the breezes swell—
England, our country, farewell! farewell!"

GLACIERS OF THE HIMALAYA.—Lieutenant R. Strachey, Bengal Engineers, has communicated to the *Journal of the Royal Asiatic Society of Bengal*, N S., No. 8, a paper, descriptive of the Glaciers of the Pindur and Kuphinee rivers, in the Kumaon, Himalaya. He is also fully satisfied of the actual existence of many other glaciers, both from accounts of residents and visitors, and from his own observation. Lieut. Strachey therefore concludes that in the Himalaya, as in the Alps, almost every valley that descends from the ranges covered with perpetual snow has at its head a true glacier.

THE RIGHT LEG.—Having noticed that this limb was more frequently the seat of accidents than the left in the wards, I made the comparison rose fairly, at one time, of those in the house, and found that of sixteen simple and compound fractures and amputations of the leg or thigh, thirteen were in the right, and but three in the left limb. If a hypothesis were allowed, possibly the fact might be explained on the idea that it is, in this country, chiefly from reckonings and overleaps that accidents occur; the 'best foot forward' suffering the most injury.—*Dr. Hartshorne, in American Journal of Med. Sciences.*

It is estimated that upwards of 30,000 children in the United States have, within the last fifty years, been christened George Washington,

IMPERIAL PARLIAMENT.

OUR FOREIGN POLICY.—VOTE OF CONFIDENCE IN MINISTERS.

The great interest which attaches to the debate in the House of Commons last week, on the Foreign Policy of the Government, as well on account of the important questions at issue, viz. the future policy of the British Government in its relations with the Governments of other States, and the existence of the present administration, as also on account of the great ability and force of argument displayed by the principal speakers, calls for as full a notice of the discussion as our limits admit; and we therefore reproduce in a form somewhat reduced the chief speeches delivered on this remarkable occasion.

HOUSE OF COMMONS.—THURSDAY, JUNE 27.

The adjourned debate on Foreign Policy was resumed from Tuesday by

SIR J. WALSH, who reiterated many of the objections previously urged against Lord Palmerston, charging him with propagandism, and with having undertaken the advocacy of Jacobinical principles throughout Europe. Enlarging especially upon the incidents attending Lord Minto's mission, he stigmatised the foreign policy of the Government as tending to foster Bolshevism and disorganization throughout the Continent of Europe, and to place England under a universal ban of isolation and suspicion among all the powers of the civilised world.

SIR H. VERNEY followed from private communications, that the legal and constitutional state of Greece had fallen into deplorable anarchy; and that the only means of obtaining redress for English subjects was by the stern interposition of their own Government. The precedent now set would be of extensive value in our commercial relationship with Turkey, as proving that the protection of the British Crown was extended over all its loyal subjects.

SIR R. INGLIS acknowledged that he might have approved of the particular line taken by the Government with respect to Greece, but refused to affirm the whole course of their foreign policy, and reprobated the non-constitutional maxim which he said had been enunciated by Lord J. Russell, to the effect that no responsible administration, but even a verdict of the House of Lords. This, he said, was recognising in England the single chamber system which they had confessed to be so imperfect for the colonies. Contesting the ability of Lord Palmerston's defence on Tuesday night, its general integrity of intentions, and the especial debt which the anti slavery cause owed to his advocacy, he yet felt himself reluctantly forced to withhold his vote from the approving resolution now proposed for their adoption.

The Marquis of GRANBY noticed one or two *lacunæ* in the reply of the Foreign Secretary to the charges brought against him. He reviewed with much minuteness the foreign policy of the Government, characterising it as a series of impulses, which, for the most part originated in unconstitutional political dogmas, encountered the risk of rebuff, and sacrificed the dignity of the nation.

SIR W. MOLESWORTH enforced the importance of a decision for which every nation of Europe, and especially under the Crown of Prussia, was ready to vote, if not, not. He contended that an impartial appreciation of the rules laid down with respect to Greece by Lord Palmerston would render the British Government at home responsible for the depredations committed by a London pickpocket upon the subject of a foreign country. Believing that no amount of taxation would suffice to provide the force necessary to support such a policy, such a principle, he, the honourable Baronet argued that whenever an Englishman consented to live abroad, even if under a despotic or barbarian government, he should accept, as an inevitable consequence of his choice, all the chances of suffering under arbitrary acts or subservient tribunals of the country he had selected. He objected to make England the universal pedagogue of constitutionalism, and believed that no only legitimate political influence which this country should exert over others was that of example without interference. Contemplating the contingencies of resignation or dissolution offered as the consequence of an anti-ministerial vote, he relied upon the force of public opinion to check any premature dissolution, and their proximate successor in a supporter of triennial Parliaments, could not look with disapprobation upon the dismissal of a House which had already completed its third year of legislation. With regret, as approving their domestic policy, but with a conscientious opinion in the integrity, he should vote against the resolution of the hon. member for Sheffield.

MR. SHAFTO ADAIR expressed his conviction that the policy of the Foreign Secretary had received the approbation of the public at home, and was calculated to preserve the dignity of England and the safety of her subjects abroad.

MR. B. HERBERT referred to some paragraphs omitted, as he stated, from the published despatches to show that the Foreign Secretary had been influenced by those personal motives and jealousies which he had in his speech so indignantly denied. In Spain his interference had produced disgust, which culminated in the expulsion of the British ambassador, and upon the long-delayed accommodation of matters, the restoration of good understanding was acknowledged in an unofficial missive accepted by the Spanish government only as being the least objectionable form of the rejection of the offers were submitted to them. Following the detail of some minor transactions in Austrian and Papal Italy, and dwelling upon the ill-advised suppression of Petrarch's house at Arqua, the hon member proceeded to the reluctance to sanction with a vote of approval such attorney-like proceedings.

SIR G. GREY recognised in the indignation with which the House had received the allegations against the personal character of Lord Palmerston the most conclusive proof of the confidence delivered in the previous debate. Declaring that the question turned upon principles and not upon particulars, the right hon. Baronet nevertheless referred to and again refuted the renewed charges founded upon the misapprehension of a despatch and the misinterpreted letters of Baron Gros. Reverting to the general principles involved, he divided them into two classes—the one referring to the redress and protection of individuals, the other affecting the honour and dignity of the country at large. Respecting the first class, he contended that the interpretation sanctioned by the vote of the Peers resulted in a too narrow limitation of the functions of Government, and would place the English subject in the hard land of the could not necessary to his welfare and success. The theory of international law and the practice of all countries, as exhibited in very recent instances, concurred in proving that protection by negotiation, remonstrance, and force was the right of the individual and the duty of the Government. If the principles that had guided the foreign secretary were repudiated, what others could be substituted? The concurrence had been liberally bestowed, but the alternative never declined. Reviewing the assertion that any interference or dictation in the internal affairs of our allies could be proved against Lord Palmerston, he appealed to his intercourse with France as a striking instance of his abstinence, and contended that none but the utmost the diplomatic communications had contained nothing beyond some disinterested advice upon questions which involved the interests of Europe hardly less than those of the country to whose ministers it was ostensibly addressed. To remove suspicion, he were unwilling to bind by treaties to take a part in the controversies respecting their administrative constitutions. Submitting that the minute sifting of motives and actions had resulted in proving that the valiant, talent, and devotion of the Foreign Minister, Sir G Grey adverted to and vindicated the mission of Lord Minto in Italy; and who contend ing that no policy could be fairly brought to judgement upon its event, declared that the course he had pursued in the recognition of the Government of Louis Napoleon was the one which the best secured the maintenance of the peace of the world and the inclusions of despotism on one side and anarchy on the other, no less than in preserving to this country the friendly relations of our ally, and to the people of France the right to choose for themselves their own form of government.

The right hon. baronet concluded by warning the House not to encourage feuds here in asailing the rights of Englishmen, by holding out to them the prospect of indemnification from the public purse.

MR. LAMBERT arraigned the conduct of the First Minister in sitting down contentedly under the censure of the House of Lords, a sitting himself under precedents which were, in fact, no precedents at all. He held the office of Chancellor of the Exchequer pre-eminent to the hon. member for Sheffield, who did not deem it at present to raise the same issue as in the upper House. It was deemed wise to shift the basis in order to enlist in favour of the ministry the sympathies of those who believed that he existed to promote popular principles. Upon the Greek question he repudiated precedents which inv ited the conduct of strong countries against weak ones; and having examined the course which the main body depended, laying great stress upon that of the Ionian Samuchi, whose really barbarous treatment had met with no redress, he observed that the original vice of the noble Lord was contained in the case of Mr. Finlay, in which the case and the grand question how the relations of British subjects domiciled in foreign countries were to be regulated. It had been admitted that where the law of the country was applicable in the case, the remedy must be first resorted to. The law did apply to that case; Mr. Finlay, therefore, was bound to go before the tribunals to which he had been always referred by the Greek Government; yet, with the tribunals open to him, diplomatic measures had been employed. Recurring, exercising the imperial agency of France, declared that it was owing to Mr Finlay, that the arbitration was not proceeded with. The case of M. Pacifico stood upon the same footing as that of Mr. Finlay. If the courts were not sorted to, a denial of justice action was unjustifiable. Mr. Gladstone then dissected the character and claims of Pacifico, whose house was full of the most costly furniture, but who had nothing b sides. Did M. Pacifico seek civil redress? He did not even ask it. All such complaints were received without scrutiny by the British Minister, and reprisals were made upon Greek property to the amount of £80,000. The noble Lord had thus violated the principles of international law, the conventions of his own treaty of 1837; and, without trying the means of civil redress, had resorted to force, instead of order and law. The fruit of this policy has been humiliation to France, and a recent, received almost with derision by the Greek people. Let us ask the Earl of our conduct towards other nations, Sir G Grey had asked, what was the antagonistic principle? That of non-interference; whereas, the policy of Lord Palmerston had been that of universal mischief. Such complaints were received without scrutiny by the British Minister, and reprisals were made upon Greek property to the amount of £80,000 The noble Lord had thus violated the principles of international law, the conventions of his own treaty of 1837; and, without trying the means of civil redress, had resorted to force, instead of order and law. The fruit of this policy has been humiliation to France, and a recent, received almost with derision by the Greek people. Let us ask the Earl of our conduct towards other nations, Sir G Grey had asked, what was the antagonistic principle? That of non-interference; whereas, the policy of Lord Palmerston had been that of universal mischief. On

he treated as unfair attempts to prejudice his claims, he had sustained a wrong, and was therefore entitled, though a Jew, or even a forger, to redress. In what civil tribunals could he obtain compensation from a set of brigands and paupers? The mimic prosecution had been tried, and had failed. Of the conduct of the Greek courts and municipalities, Mr Cockburn drew a very unfavourable picture, confirming its accuracy by extracts from a pamphlet by Mr Bulte Cochrane. Tortures of the most atrocious kind, though "strictly prohibited by the constitution," were practised in Greece: British subjects were liable to these inflictions; and were they to wait until they obtained redress from such tribunals? Again, in most difficult and trying times, Lord Palmerston had interfered only when invited, or when legitimate occasion called for interference, steering a middle course between commanding Monarchs to make timely and wise concessions to their subjects, and endeavouring to induce excited and irritated nations readily to listen to the counsels of the Monarchy. What was the honour was not the less because success had not crowned his efforts. Defending the noble Lord's course of proceeding in the Spanish case, the Neapolitan case, and that of Austria and Piedmont, he uttered an indignant protest against those whose sympathies were awakened only in favour of tyranny, despotism, and also ruin. The interference of Lord Palmerston was undoubtedly based on the principle that though it was the side chosen by Mr Cobden, the Government's mantle had fallen well and satisfactorily upon the noble Lord. Mr. Cockburn then indulged in some lively and pointed sallies respecting the state of parties, upon the hypothesis of the imminent change of the Ministry. What was to take the government of the country? (Hear, hear) Which of you (addressing the Opposition benches) are prepared to do so? He would take the liberty of addressing a few words to the right hon. gentleman opposite who had supported his government for four years, upon the ground that the domestic policy of the government was essential, and that the commercial policy they introduced, and which the government carried out, was essential to the prosperity and happiness of the people. What, he would ask, were the right hon. gentlemen prepared to do? As upon other occasions, they might take one of three courses. (Loud cheering and cheers followed this allusion to Sir R. Peel.) They might themselves undertake the government of the country; or they might leave it to the hon. gentlemen (Disraeli and Co.) who sat near them, who were not of them, and who certainly did not love them. (Much laughter.) Or they might pursue a third course, by making a combination with some of the two parties. He asked both these right hon. baronets whom he was addressing—he asked first the first hon. Baronet the member for Ripon, who opened his attack in so powerful and plausible and mistaken a style (Mr. Goulburn), and who heard, and who declared that he came forward under an imperious sense of duty after a silence upon the subject for four years—(cheers)—was he prepared to undertake the government? (Hear, hear) He addressed himself to another right hon. gentleman Baronet, for whom he had always entertained a great respect, a respect which he was sure he would continue to entertain unless the right hon. gentleman should do something to destroy that respect. (Loud laughter —whose talents, abilities, statesmanlike views, and, above all, whose great courage as displayed on a momentous occasion struck him with the deepest admiration (Cheers.) He asked both these right hon. baronets if they were prepared to take the government if so where were their colleagues? (Renewed cheers) where their elements of power? (Cheers) Certainly not in that House; for when they consented to be seduced by the Delilah of free trade, they consented also to be shorn of their strength. The people of the country were not prepared to go to the country; and if they did go, they would be worse off than now. (Hear, hear.) He presumed, then, that they were not prepared to take the government themselves. He presumed, too, that they did not suppose that the protectionists, after fighting the gallant fight for four years—(cheers)—and who were only defeated by the supposition given by those right hon. baronets to the government. (Hear, hear)—that they had been taking all their pains for the purpose of setting those right hon. baronets well at it power. (Hear, hear.) It was scarcely to be supposed that Lord Stanley had brought forward this resolution in order that the right hon. baronet the member for Tamworth might come into the councils of the state, and the right hon. baronet the member for Ripon again fill the office he so ably filled before. (Laughter.) Oh, no, the protectionists were not so weak as that. Addressing the agriculturists, they might say—

So vos non vobis fertis aratra bovis:
So vos non vobis vellera fertis oves:

—(laughter)—or, if they were disposed to follow, like sheep, the hon. and gallant member for Lincoln,

So vos non vobis mell fertis apes.

Were the gentlemen of the Protectionist party prepared to form a Government? Were they prepared to say that they could govern as a body was anything but palatable to the country. Then there was the third course, that of a combination between the two. When he heard of the possibility of such a thing he ran back to the first hon. right hon. Baronet the member for Tamworth (laughter.) He would not believe it. He would not believe that any such thing had been boarded in that House by the leaders of that party, and upon whom they had poured ignominy and contempt and scorn, until he (Mr Cockburn) absolutely felt himself burning with indignation—(Cry) he could never suppose that the right hon. Baronet, for the sake of obtaining office, would prostrate his great name by a union with that party. (Loud cheers, in the midst of which a right hon. friend of Sir R. Peel's was seen to rise.) He would not believe that any such combination in which the right hon. Baronet was held in and out of that House, notwithstanding those attacks that had been so frequently made upon him, was enough to satisfy any man, and that power could be so dear to him, and the love of attraction in his eyes as to induce him to seek it under such circumstances. The country would hastily understand this endeavour to denounce the foreign policy of the government that was not enough. There was the domestic policy of the House who were called on to aid in dispossessing her Majesty's Government of power, had a right to know what were the terms and conditions of this unholy alliance. Then was the commercial policy, he did not believe that they would be so reckless as to drive the Government from office by an abstract vote upon their past policy, unless they were prepared to see some Government substituted in the room of the one overthrown. It was through no intercourse that he asked the question. He had a right to demand to know what the terms and conditions of this alliance were to be. (Hear, hear) Judging from their conduct, he believed that the honesty of the transaction would be on the one side, and not on the other side of the House. Unless they intended to abandon their Protectionist principles, he could not be here they were prepared to govern. And if they did not intend to abandon them, let them speak out. Let us state the terms on which they undertake the government in conjunction with the right hon. Baronet. Let them state whether the House was to have a fixed duty or a sliding scale. He again asked, what were the conditions and the terms during the alliance, and the people of England were to expect? Let that question they had a right, in all fairness and frankness, to a reply. Until he knew how that was to be, he would not lend himself, and he trusted the independent members of that House would lend themselves, to any political intrigue or piracy which had been entered into against the Government. (Cheers.) It was not here, in England alone, but throughout Europe, that this conspiracy existed. It was not a conspiracy of nations, but a conspiracy of cabinets. When the right honourable Baronet the member for Ripon said that we were in the right word amongst nations, the right honourable gentleman said what was not correct. (Hear, hear.) The right honourable gentleman, by saying so, stated distinctly his arbitrary ruler. (Cheers.) He (Mr Cockburn) would tell the right hon Baronet that the nations—that was to say, the people of Europe —did not dislike our conduct towards the English Government. He could tell him, on the contrary, that the policy of the last four years was looked upon by them, and that, making allowances for her Majesty's Government, which they knew could not interfere by force of arms, they fully believed that the British Government was with them in mind and heart in a favourable view of the government, and that her Majesty's Government was the faithful echo of that feeling. (Hear, hear.) We were now at a momentous epoch, and had to choose between Absolutism and Republicanism—seeking to encourage constitutional Governments, but not intervening to establish them by illegal means, relying on a manful and manly endeavours to do so. (Hear, hear.) Any vote of this powers might detest us, but be assured that when the time came, when the people should have a vote, they would look back with pleasure on the efforts of the country, and gratefully acknowledge them. It was now a question whether her Majesty's Government would yield up the reins of power to another party in the state. Feeling it was necessary for this country that they should retain those reins in their own hands, bearing that the nations of Europe and the best and dearest ties and of mankind would be found to support them, he cheerfully and unhesitatingly should vote in favour of the resolution. (Cheers, and a laugh.) He had heard one class of the hon. and learned gentleman's speech, when throughout made a great impression on the House, and on which several hon. members immediately congratulated him by a warm shake of the hand.

Mr. WALPOLE replied to Mr. Cockburn, adopting his distribution of the question under the heads of the interference of the Government in the particular case of Greece, and their general foreign policy. Upon the first head, he observed that Mr. Cockburn should not ask any one to pledge himself to any course, to carefully omitting all allusion to the nations claims in relation to the two Islands, whereas the proceeding of the noble Lord in the matter had violated the treaty stipulations of a treaty, and endangered the amity of nations and the peace of the world. With respect to the personal claims, the principles of international law—which were as well understood as those of the common law of England—could not be repealed, except on the positive refusal of a Government to afford redress, or an evasion of justice by unreasonable delay, or a decision obviously partial and unjust; and, applying those principles to the cases of Mr. Finlay and Mr. Pacifico, he showed that they were not within the exceptions. Passing, then, to the general system pursued by the noble Lord in his intercourse with other nations, he contrasted it, in its tendency and its results, with that of Prince Metternich—the former, calculated to sow jealousy and distrust amongst nations, and to destroy their amicable intercourse; the latter maintaining, by an equal and dignified policy, the peace of the world.

Mr. MILNES contended that the simple statement of facts given by Lord Palmerston should have satisfied many of the points in this comprehensive question. His policy, if wise in principle, should not be tested by its success or its popularity. It was difficult for an English Minister to avoid a certain amount of interference in the affairs of weak states; but he believed it had been exercised discreetly and prudently by the noble Lord, the characteristic of whose administration was its moderation. The reclamations made on behalf of British subjects in Greece would have been promptly attended to by other states. If a different mode of dealing with such cases were to be adopted, our countrymen would be exposed to outrage throughout the world.

Mr. CORDEN was anxious to consider the question on its legitimate issue, not for the purpose of making a party or personal opposition, and seeing nothing in the question which involved any plot, or conspiracy, or cabal. He desired to be exonerated from the charge preferred against those who would not support the motion, and they were anxious, of all things, to get at the real merits of it. The first question was the conduct of the Government towards Greece. He would state in a few words the case of Mr. Finlay. He was one of a humble person and could not afford to pay Greek Governments, the ordinary agent for the recovery of payment, but he refused to pay recovery ensued, and then a passed a British fleet in the Bay of Salamis. In the case of Mr. Pacifico, his house was attacked; he handed his disgraceful bill to the Greek Government, and then came the British fleet. Mr. Cobden commended the other proceedings in the same compendious manner, and asked if there was no other way of settling such trifling matters than by sending fifteen ships-of-war. Why, Lord Palmerston had actually adopted arbitration, but it was after he had resorted to force. Mr. Cobden ridiculed the manner in which the Foreign Secretary had conducted the negotiations with the French Minister, who, he said, had given him a contempt for diplomacy. The result had been humiliation to France, a rebuke from Russia: all that had been done by the fifteen ships-of-war being a nullity. The matter was not settled yet, and the House was asked to say that one to deny the traffic had been done fairly, justly, and dexterously managed. They were further asked to identify themselves with the whole foreign policy of the Government. He should be the most unreasonable man upon earth if he did so, after condemning so many of their acts of interference with the affairs of other countries, done in direct contravention to the expression of Whig principles proclaimed by Lord Grey. Mr. Cobden had expounded his views on the subject of intervention, and he objected Mr. Cockburn with being an open advocate of propagandism. The question did not depend upon Liberalism or Absolutism; it depended more upon peace, commerce, and education.

Mr. BARNARD, in vindication of the motives which influenced his vote, declared that the rumour, or insinuation, that there had been a disgraceful conspiracy, or a base compromise, in opposition to the Ministers, on his side of the House was wholly unfounded. He had given his conscientious support to them because he had cordially approved their policy in domestic affairs—commercial, monetary, and in relation to Ireland. Those were occasions in which he had supported their foreign policy, which he did not think had been forward or cautious; but he was asked to give his approval of the whole, and to affirm principles tantamount to the saving of a Government. Before Mr. Hume called for a subscription in his hat he should like to know distinctly what were the principles of the foreign diplomacy of the Government. Were they non-intervention? Were they the employment of the same language to the strong and to the weak? Was the recent application of the foreign policy adopted by Lord Aberdeen, he declared that, though no partisan of the Greek Government, he could not conscientiously vote on that policy of his successor in the affairs of Greece had been calculated to maintain the honour and dignity of this country. He admitted, if the weak arguments that we had just claims upon Greece, but he maintained that there was an obvious mode of settling them without offend ng France, proving the reasonableness of those claims, and thereby avoiding a collision with the people of France (which had been ultimately accepted) before resorting to force. He blamed the conduct of the Government towards France after her good offices had been employed. Why did the Queen sail from Marseilles without visiting the Court of Mr. Wyse? Why not, when a misunderstanding had arisen, at once tender the London convention, which was at last reluctantly conceded? Could he see this transaction, and the present position in respect to France, calmly, and admire, and vote for this resolution? Then he came to the principles of foreign policy he was asked to affirm by it, which were vague and indefinite, but which, as expounded by Mr Roebuck, meant that this country would assist other nations in their efforts to obtain self-government, and to resist tyranny, under the name of legitimacy. This was no other than the principle proclaimed by the National Convention of France on the 19th of November, 1792, and in the manifesto of the Duke of Brunswick. Are we prepared, then (said the right hon. Baronet), to make a declaration to the nations of Europe that we will inquire into the internal affairs of countries and decide in favour of the principle or self-government. Are we prepared to declare in favour of that people "that resists in the name of legitimacy the tyrs my which has ever sought to crush it and all foreign power which was in England, consider to be in very bringht that nature was given to it" (Hear, hear," and Manterfai cheers.) It is a most serious interfering on the part of this country. If you do claim that right, you must go to a war with the right to their powers possessing self-government. What is the basis of self-government. We are living in this neighbour and a great republic of a republic that may be prosperous and may consolidate its power—which is a dangerous doctrine that legitimacy is the only principle of consolidation—that monarchy is the nearest with self-government. If I claim the right to introduce my notions of self-government into independent nations, and I deny the right of those nations to introduce their notions of self-government into countries esp ed to them? Recollect our manifold relations with other countries in every quarter of the globe. Here are our position in North America. Recollect our intimate connection with Canada, with the Australasian Americas. American notions of self-government differ from ours. American notions of self-government go to extreme that where there ought to be universal suffrage, and that all persons would have a right to exercise a vote in the government of the country. If I impose my ideas of monarchical government on despotic countries, what right have I to remonstrate against the United States for their views of the right of self-government? Great Britain, in her practice, consists of what constitutes self-government. (Hear.) Does self government extend beyond Europe? We govern millions in India. Are we to admit the right of other powers to demand the introduction of self-government into countries esp ed to them? Recollect our manifold relations with other countries in every quarter of the globe. Here are our position in North America. Recollect our intimate connection with Canada, with the Australasian Americas. American notions of self

"Too Truthful."—Painted by A. Solomon.

FINE ARTS.

PICTURES, FROM THE EXHIBITIONS OF THE PRESENT SEASON.

In our Journal for June 1, we gave a series of interesting Illustrations from certain of the most attractive Pictures in the present Exhibition of the Royal Academy. The London season has, week after week, contributed so many subjects for delineation in our pages, that we have been compelled to defer the resumption of these Picture Engravings until the present day; when, to enable us to do justice to a very popular class of subjects, we have enlarged our space. The postponement has been productive of this advantage—that it has enabled our Artists to ensure higher finish and verisimilitude to the Engravings, than could, under ordinary circumstances, be calculated on.

The first of our present gallery is from the Middle Room of the Royal Academy Exhibition, and illustrates a by no means uncommon artistic difficulty—that of pleasing a sitter—whose full-blown vanity is equally prominent in the composition. It stands in the catalogue:

525. "Too Truthful."

"So very like a painter drew,
That every eye the picture knew:
He hit complexion, feature, air,
So just, the life itself was there
He gave each muscle all its strength,
The mouth, the chin, the nose's length;
His honest pencil touch'd with truth,
And marked the date of age and youth.
He lost his friends, his practice failed;
Truth should not always be revealed."—Gay.

This picture is Mr. Solomon's early contribution to the Exhibition, and is a very charmingly characteristic scene. The displeasure of the grandee, the chuckle of his wife, the anxious

"The Arrival of the Coach—A Roadside Inn a Century Ago."—Painted by T. F. Marshall.

painter, and his still more solicitous wife—are all admirably portrayed.

The next Illustration is from Mr. T. F. Marshall's single contribution to the Royal Academy Exhibition. It hangs in the Octagon Room, but merits a better place:

634. "The arrival of the Coach." A roadside inn, a century ago.—This is a delightful picture of domestic life. The gossiping group in the foreground—the delighted passengers—the country girl meeting her relatives—the attention of the landlady to the passengers of the better class—are very characteristic; and the old inn, with its quaint sign-board, is picturesquely treated.

Next is one of Mr. Herring's contributions to the Exhibition of the Society of British Artists, of which he is so distinguished a member. The picture hangs in the Great Room.

184. "The Stirrup Cup."—A gallant cavalier, mounted upon his steed, is partaking of the "stirrup cup," without which it would be unfriendly to depart. The draught has been handed to him by a damsel who stands in the doorway of a dwelling of "the olden time." The horse, as might be expected from Mr. Herring, is cleverly painted; and the picture is altogether a capital one.

The impressively devotional picture at page 29 is one of Mr. Redgrave's four contributions to the Royal Academy Exhibition.

493. "The Child's Prayer."—"Out of the mouths of babes and sucklings hast Thou perfected praise." *St. Matthew*, xxi. [illegible] are interesting portraiture of simplicity and purity; the devotional feeling of the child, and the no less devotional solicitude of the mother, who is teaching her little one "how to pray," are very characteristic.

The picturesque scene upon the lower half of page 29 is from the Royal Academy Exhibition:

112. "Market boats arriving at Angers, Morning Effect." E. A. Goodall.—The fine old town of Angers is situated on the Maine, called Mayenne in the upper part of its course, a little below the Sarthe. With its modern improvements, the formation of a broad quay along the left bank of the river, the substitution of tall, regular, white stone houses, for the old gable-faced cottage-built structures, have greatly innovated upon the thoroughly antique character which Angers previously bore. "A broad formal boulevard, planted with young trees, replaces the old fortifications—

'The flinty ribs of this contemptuous town;'

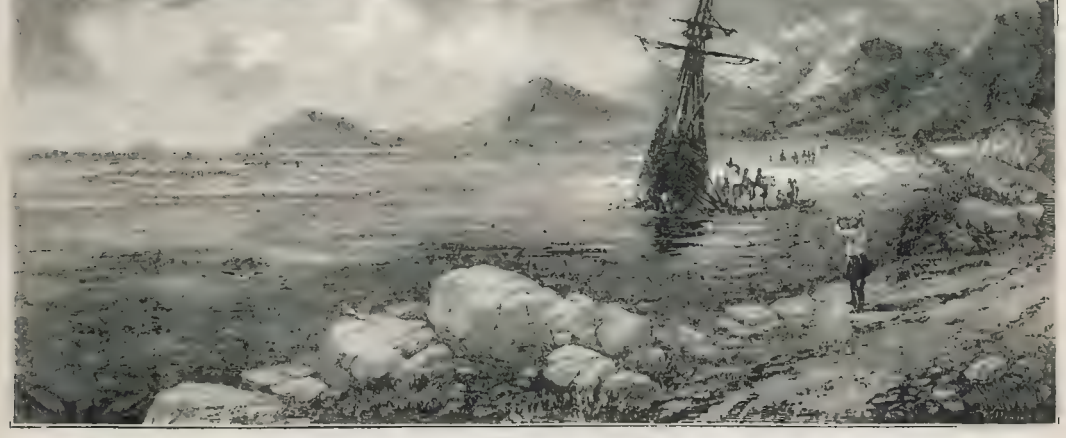
"THE STIRRUP CUP."—PAINTED BY J. F. HERRING.

. . . 'those sleeping stones,
That as a waist did girdle it about,
By this time from their fixed beds of lime
Have been dishabited.'—(*King John.*)

The 'strong-barred gates' are all down, and only one tower remains near the upper bridge of those 'saucy walls.' These Angers, as it was called from the sombre hue of its buildings of state, is now like an old coat with a modern trimming; but plunge into the midst of its labyrinth of buildings, scale its steep and narrow streets, many of them inaccessible to wheel carriages, and you will find traces enough of the Angers of olden time, the capital of Anjou, and the residence of its Dukes. In few towns of France will the antiquary, artist, or architect find a greater number of interesting antique churches and houses than here." Mr. Goodall has in his picture availed himself of the most picturesque objects at the waterside—the venerable Castle, close to the new suspension-bridge, which fell down a few months since. The Castle walls were originally washed by the waters of the Maine, until its moat was partly filled, to give place to the new quay. If its size and preservation be jointly considered, it is, perhaps, the finest feudal castle in France. Seventeen colossal towers surround it; they are 70 to 80 feet high, close set among the walls, shaped like [illegible]-boxes, thick below, narrowmitted, and having bands of white stone let into the black rough slate of which they are built, so as to give them the appearance of being hooped. A broad and deep ditch isolates the castle from the rest of the town; it is entered by a massive gateway, under a perfect portcullis, and within its portal is the furnace where lead and pitch were melted for the benefit of invaders. On one side of the open space surrounding the castle stands a handsome modern building, originally L'Académie d'Equitation. Mr. Pitt (afterwards Lord Chatham) and the Duke of Wellington received part of their education at the military college here, now removed to Saumur, which occupied this edifice, still called L'Académie. It has been converted, since the Revolution, into a *caserne de cavalerie* and *dépôt de remonte*. No trace or tradition is preserved of either of these great men, of whose education it may be said, 'Hic est et ab hoste doceri!'" Another prominent object in the picture is the Cathedral, everywhere conspicuous from its elevated position, and its twin-towers placed so closely together as to seem thrown into one. The old bridge is also shown, as are also some of the picturesque old gabled houses and towers of the town buildings.

We next have one of Mr. Creswick's fine pictures at the Roya

(*Continued on page 28.*)



THE WIND ON SHORE.—PAINTED BY T. CRESWICK, A.R.A.

BRITISH GRASSES.

(BY T. ROWLANDSON.)

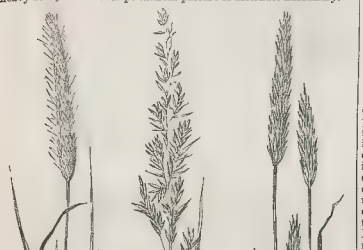
We have selected the above subject for Illustration in the present Number for several reasons, amongst which may be enumerated the circumstance that this is the season of the year most favourable to their study, and is also about the period usually devoted to hay-making; these facts, combined with the annual meeting of the Royal Agricultural Society of England, occurring during the ensuing week, are calculated to draw more than usual attention and interest to this important subject.

The subject will be found a pleasing one to the amateur, when his attention is drawn to it; whilst its importance to the farmer can scarcely be over-rated, seeing that, according to Mr. M'Culloch, the cultivated land in England alone may be divided as follows:—

				ACRES
Extent of land in Wheat	..	..	..	3,800,000
Ditto	Barley and Rye ..	..	..	900,000
Ditto	Oats and Beans ..	..	..	3,000,000
Ditto	Roots (Turnips, Potatoes, &c.)			1,300,000
Ditto	Pasture Land ..	..	..	17,000,000
Ditto	Clover ..	..	..	1,200,000
Ditto	Fallow ..	..	..	1,650,000

with about 8,000,000 acres of improvable and unimprovable moor and waste.

It was justly observed by Professor Martyn, "that grass vulgarly forms one idea; and a husbandman, or passer-by, when looking over an enclosure, does not know that there are three hundred (since which it has been ascertained that there are upwards of a thousand) species of grass, of which thirty or forty may at the moment be under his eye." It may truly be said that the knowledge of this most common and useful tribe of plants is yet in its infancy. Of the nearly one hundred and fifty distinct species and varieties of grass, natives of the British Isles, many are of no value to the farmer, whilst others constitute the foundation of his wealth, as they are the chief food of the most valuable domestic animals. Although they are of very different values, the general appearance of the different kinds is sometimes much alike; in such cases the distinctions can only be known by their botanical characteristics, these being frequently minute. The investigation of them is often perplexing to botanists, and, consequently, to those who know nothing of that science, their specific distinction will always be a matter of difficulty. In order, therefore, to give a more popular character to this paper, the proprietors of the ILLUSTRATED LONDON NEWS determined to give a set of Drawings of sixteen of the most valuable and remarkable of the cultivated grasses in general use in the British Isles. There can be no doubt but this will be a most useful and acceptable service to the British farmer, and will supply a vacancy that has long existed, viz. a popular and cheap illustrated account of the most remarkable British Grasses; the illustrated books hitherto published on this subject being expensive, costing from thirty shillings to five guineas and upwards, thus making them, in fact, sealed books to the great mass of persons interested in their cultivation. It is almost needless to add, that, without illustrations, a paper on Grasses would be deprived of nineteen-twentieths of its utility; figures, therefore, of the most useful and remarkable of the grasses are now presented to the reader. With many of them, a mere comparison of the Drawing with a specimen of the natural grass will suffice to show the identity; such as the cocksfoot, the foxtail, catstail, &c.; but with many species of the poas, or meadow-grasses, the fescues, beats, &c., their general appearances are so much alike, that a distinction cannot be made without referring to the botanical character. In carrying out our design, we shall, in the first instance, give a description of each particular grass, with general remarks respecting its adaptation to certain soils, culture, and climate; and, in conclusion, will advert to the assortment of grasses best calculated for growing on light or heavy soils, whether for permanent pasture or alternate husbandry.



MEADOW FOXTAIL. MEADOW FESCUE. SWEET-SCENTED VERNAL.

Anthoxanthum odoratum (Sweet-scented Vernal Grass).—This grass is said to have derived its name from the property attributed to it of giving the sweet-smelling scent to new-made hay. This title has always appeared to us somewhat inappropriate—for the dried stems and leaves are as destitute of smell as it is possible to imagine any grass to be; in addition to which, fine-flavoured hay is frequently procured from fields in which not a blade of the sweet-scented vernal grass is to be found. Although we are disposed to summarily dismiss its claims to attention for merits commonly but improperly attributed to it, yet it has some properties which are valuable. It is commonly found on dry and light soils, but attains perfection only on such as are deep and moist. It thrives best when mixed with other grasses, and, consequently, is classed amongst the true permanent pasture grasses. Its chief properties to the farmer are, that it throws up early shoots in spring, continuing to vegetate and throw up flowering stalks to the end of autumn, is of a hardy nature, and the autumnal herbage more nutritious than that of the summer or spring—a fact of some importance, as the great majority of the best grasses decline in their feeding qualities during autumn. When allowed to run to seed, the culms, or seed stalks, are invariably refused by cattle, whilst anything else is to be obtained. It should always form a part of a permanent pasture or meadow, for the qualities above noticed; and also from the circumstance that it assists in forming a thick sward. It comes into flower the latter end of April, and ripens the seed about the second week in June.

Alopecurus pratensis (Meadow Foxtail).—This grass does not attain perfection until it has been sown four years, and, consequently, is not so valuable for alternate cropping as the two grasses to be immediately described. The weight of crop per acre is also less, though there is strong presumptive evidence that, weight for weight, it is more nutritious than cocksfoot, and perhaps so than Timothy. Sheep are very fond of it. Mr. George Sinclair states, that, when combined with white clover only, the second season, on a sandy loam, it is sufficient for the support of five couples of ewes and lambs per acre. It is the principal grass in all rich natural pastures, and should, therefore, when laying down land permanently, form at least one-tenth of the sward. This grass is most nutritious at the time of the seed ripening: the latter-math is more nutritive than the spring herbage. This grass grows well in irrigated meadows, being generally found on the crowns of the ridges. It flowers in April, May, and June, according as it may have been depastured early or late. The seed ripens in June or July, according to the season of flowering. The seeds are very liable to disease—so much so, that, under the most favourable circumstances, not more than one seed out of four can be expected to grow.

Dactylis glomerata (Round-panicled Cocksfoot).—This is one of the heaviest producing grasses, yielding only to Timothy in produce of hay, and that only on certain soils; whilst, if kept grazed, it yields a superior amount of herbage as compared with any other grass, and is always found in great abundance on our richest natural pastures—in some instances to the extent of three-fourths of the whole amount. Wherever this grass abounds it should be kept closely grazed; otherwise it is apt to grow into coarse tufts or hassocks, and is, consequently, refused by cattle. It grows well on cultivated bogs and peats, as also on loams and stiff soils. It flowers in June, and ripens its seed in July.

TIMOTHY, OR MEADOW CATSTAIL.

Phleum pratense major (Meadow Catstail, or Timothy Grass).—This grass yields an immense produce of hay on rich bog-land, sometimes amounting to three tons to the acre. The hay is, however, coarse; and it is, consequently, necessary to cut it into chaff previous to giving it to horses or cattle. Draught horses are very fond of Timothy hay, which, though sometimes as coarse as oat straw, is, nevertheless, very nutritious, containing more sugar than any grass. This grass is easily known from others by its large head or spike, often being six inches long. In Canada, I have been informed, it frequently attains the length of nine inches. It is known in that country and in the United States under the name of herd's grass, and is esteemed the most valuable grass of any for the production of winter forage. Its merit, whether for alternate husbandry or as a pasture plant, is only very little understood. It is commonly found naturally sown in moist rich meadows, and the borders of brooks and rivers. It will withstand the effects of undue moisture better than any of the preceding grasses. The root is fibrous, and in light and dry soils inclined to become bulbous; so much so, that it is asserted that the roots of this grass, according to the character of the soil, become fibrous or bulbous. Mr. George Sinclair, however, states that there are marked botanical distinctions between the true Timothy and the bulbous-rooted, as well as with the lesser, catstail: these are points, however, of no great economical importance to the farmer, as it is only on soils inclined to be moist, and of a tolerably open character, that this grass grows to perfection. It is superior to the cocksfoot, in producing early spring herbage. The principal drawback to this grass is, that the produce of aftermath or autumnal herbage is small if the season is dry. It flowers in the latter end of June, and ripens the seed in the end of July.

Cynosurus cristatus (Crested Dogstail).—This grass is particularly well adapted for irrigated meadows. It attains the greatest luxuriance of growth on moist, turfy soils, mixed with tenacious clay or marl; it is, also, one of our principal down and light land grasses. It has a wider range of habitat, whether as respects dry or wet, heavy or light land, than any other British grass. On light lands, laid down to permanent pasture, this grass will eventually usurp the place of nearly all the other kinds; being found, in a few years, mixed only with white and red clovers, and commonly with the birdsfoot trefoil (*Lotus corniculatus*) and wild vetch (*Vicia sepium*). If, however, kept well manured on the soils under notice, it will entirely overcome the two last-named plants; and, if mown or kept eaten down close, only the white clover will be found growing in its company, except grasses of a kindred nature. If an estimation was made of all the old meadows throughout the country, it would be found that the major part of them consisted principally of this grass. Notwithstanding it is so widely grown as a meadow grass, and still more so as a pasture one, it is greatly inferior, in produce and nutritive properties, to the grasses described immediately preceding this. Under the most favourable circumstances, it rarely yields a ton and a half of hay to the acre. Mr. George Sinclair remarks, in a note, that, "In the opinion of those who have the care of high-bred horses, the best hay to be met with in the London markets is the *upland meadow* hay, from the neighbourhood of Hendon. The crop is usually cut early in June, and consists chiefly of the *Cynosurus cristatus*; hence, this species, is called, *par excellence*, the Hendon bent." It may be well to remark here, that this grass, when made into hay at the time of flowering, possesses double the nutritive properties that it will do if made into hay at the time the seed is ripe; in fact, at the latter period the culms are not as nutritious as good oat straw, and are commonly known in many parts of the country under the name of *windlestraes*. At the time of flowering, the produce is much less than at the seed-time; but, as at the former period the hay will possess as much nutriment as when cut at the latter, practically there is no disadvantage in cutting at the time of flowering, whilst the benefit of a more lengthened period for the aftermath growing decides the question as being more advantageous to cut this grass at the time of flowering: when well made at this period, it possesses a beautiful flavour, and is of that short crisp character so much liked by horses. It was remarked by Mr. Sinclair, "that in some parts of Woburn Park this grass constituted the principal part of the herbage, on which the deer and Southdown sheep chiefly browse; whilst, at another part of the park, which consisted chiefly of the *Agrostis vulgaris fasciculeris* (tufted-leaved bent), *Agrostis vulgaris tenuifolia* (slender leaved bent), *Festuca ovina* (sheep's fescue), *Festuca duriuscula* (hard fescue), and *Festuca cambrica* (Welsh fescue), is seldom touched by them; but the Welsh breed of sheep almost constantly browse on them, and almost entirely neglect the *Cynosurus cristatus* (crested dogstail), *Lolium perenne* (perennial rye-grass), and *Poa trivialis* (rough-stalked meadow-grass). May not the fact here named in a great degree explain the circumstance why certain breeds of cattle and sheep, when removed from their native pastures, are found not to thrive equally with other breeds placed on the same pastures? A full enquiry into these circumstances might be found advantageous to those farmers who are located near the extensive and uncultivated districts found in the West of England, such as Exmoor, Dartmoor, and the mountainous districts of the North of England, Scotland, and Ireland. None of our cultivated grasses tends so much to form that fine, springy, and green turf so characteristically British, as this grass: this is owing, in some measure, to the firm and close character of the herbage which it is constantly throwing up; but also in consequence of its roots penetrating to a considerable depth, thus drawing up moisture and food during dry weather, when many other plants would either lose their luxuriant appearance, or perhaps perish. In consequence of these properties, wherever it is important to secure a sward of the best quality, this grass ought to form a considerable portion of it, particularly where sheep-grazing forms an important object. The last remark applies with still greater force when the pasture is to be formed on a dry upland soil: for soils of this character the crested dogstail is the grass *par excellence*. The culms have been found valuable for the manufacture of straw-bonnets. It flowers towards the end of June, and the seed ripens towards the end of July.

Holcus lanatus, or Woolly Soft Grass, is known by several other names, such as Yorkshire bent, Yorkshire fog, White grass, &c. It is a very common grass, and grows on all soils, from the richest to the poorest; in fact, when once introduced into meadow or pasture land, it is very difficult to eradicate it, unless the soil is an exceedingly dry one: this arises partly from its profuse seeding property, and also to its constantly throwing up culms, until the severity of winter checks their growth. Mr. Sinclair observes, that, where the soil is light and silicious, it will increase to a degree injurious to the superior grasses of the pasture, and should, consequently, under the circumstances of the soil just mentioned, be introduced with great caution. It would appear, however, that this remark was founded upon observations made in Devonshire, where the moisture of the climate may in some measure compensate for the natural aridity of a silicious soil; for our experience tends to show that it is much easier to eradicate from silicious soils than from any other. In doing so, however, it must be borne in mind that such silicious soils ought to be sufficiently well manured to be able to support the superior grasses; otherwise this, and grasses of a similarly inferior character, will take possession of the soil, affording, by that means, the most unmistakeable evidence of bad, slovenly, and exhausting farming. The woolly soft grass yields enormous crops of hay on bogs reclaimed by paring and burning, even without the application of a calcareous dressing. It particularly affects a moist soil, and attains the greatest perfection on peat. It is much grown on the latter class of soils in Ireland for hay, though we never observed that the cattle fed on it did much better than when fed on straw; but as hay is only sparingly given to cattle as a winter food in that country, and as we were never made acquainted with the relative weight of the two kinds of forage supplied as food, it is quite possible that the starved condition of the beasts in spring may be, in some degree, attributed to the scanty quantity, as well as the inferior quality, of the hay afforded them. Under the inspection of Mr. Sinclair, Francis, late Duke of Bedford, made trial of this grass on a large scale: the result proved that it was a very inferior grass for pasture or for hay, its merits consisting in being productive and easy of cultivation; but it was disliked by the cattle, and was found not to be an early grass, and, when once in possession of the soil, could hardly be rooted out. Mr. Sinclair found it in the richest grazing grounds in Devonshire, from which circumstance he judged that it ought in a small degree to be sown with other seeds on laying down land for permanent pasturage. To this opinion we demur, particularly as we feel well convinced that if the opinion is a sound one, viz. that it ought in a small degree to constitute a part of all permanent pastures, that object will be attained by means of naturally sown seeds, for this grass produces a profusion of light seed easily dispersed by the wind, by which means it soon becomes widely spread; for though a late flowering grass, the seed ripens sooner than that of most other grasses, and before hay harvest begins is generally perfected. We do not consider that the fact of its being found in the richest grazing lands of Devonshire sufficiently warrants its introduction into any mixture of grass seeds intended for laying down land; we rather attribute its presence to mismanagement, either through deficient drainage or superabundance of inert carbonaceous peaty soil being present, indicating the want of a calcareous dressing. The only case in which the growth of this grass is pardonable is in the case of peat-bogs, where a calcareous application is either difficult to procure, or when the expense is too great. Its inferiority as a grass is clearly indicated by the fact that cattle prefer almost any other grass to this, as it is frequently seen in pastures with full-grown perfect leaves, while the grasses that surround it are cropped to the roots. The soft cottony downy hairs which cover the surface of the whole plant render the hay that is made from it soft and spongy, and in this state it is disliked by cattle, particularly by horses. The best mode of eradicating this grass is to plough up the pasture, and take not less than than a five years' course of crops, and then return the land to other grasses. This may, however, be partially produced by hard stocking, so as not to let this grass run to seed; top-dressing, with rich composts and accompanying the dressing, by sowing other and suitable grass seeds. Harrowing the latter in at the time of sowing with a bush harrow, flowers, and ripens the seed in July.

SMOOTH-STALKED MEADOW. WOOD MEADOW. CRESTED DOGTAIL.

Poa annua (Annual Meadow Grass—Suffolk Grass).—Perhaps no plant, certainly none of the *Gramineæ*, is so widely spread as this minute but beautiful plant; being found within the Torrid Zone and the Arctic Circle, from the plain to the heights on the confines of constant snow, also on the most barren silicious soils and the richest pastures. It will produce flowers and seeds, when it cannot attain to more than an inch in height from the soil being in the next degree to sterility. The seed is perfected in a shorter space of time than that of any other species of grass, or, perhaps, of any plant; and a great reproductive powers may be imagined from the circumstance of its flowering and seeding during winter, a smart frost not even putting a stop to it. It is a troublesome weed to gardeners, being found frequently growing in gravel walks, from which it is best eradicated by sprinkling salt over it. This grass forms a large part of the herbage of light sandy lands, and is generally the cause of that green appearance which is to be seen about the gateways or entrances to rough moors and bogs, where the soil is much trodden by cattle. Citizens' grass plats are in general largely composed of this grass.

FERTILE MEADOW. WOOLY SOFT. ITALIAN RYE.

essing only short roots, pastures containing a large amount of this ass are liable to suffer much from drought, which is speedily seen the herbage turning brown. This grass is deficient both in quant y and nutritive qualities, but it adds much to the density of old ard. It is an annual plant; and the farmer need not be at any care out sowing it, for its light seeds are being wafted about by every nd that blows.

Poa fertilis (Fertile Meadow-Grass).—Few grasses are more gene- lly useful and have more claims on the attention of the farmer than is. Its yield is far from insignificant, being greater than the crested gatail, though its culm or seed stem is not so tall as the latter. In gard to early growth it stands next to meadow foxtail, cocksfoot, d tall oat, and continues to send forth flowering culms until their owth is arrested by frost; from which circumstance the terms *fertilis* artile) and *serotinus* (late flowering) have been derived. It will grow almost every kind of soil; pure siliceous, and peats not dressed with lcareous matter, are, however, the most inimical to its growth; and it tains the greatest perfection in a rich moist open loam, of a carbona- ous quality. It is one of those grasses that thrive best when combined ith others, as it will not make a superior turf of itself, but adds much the value of a sward from its nutritive qualities and powers of early d late growth. As it perfects an abundance of seed, it may be easily propagated. When in flower, from its large, loose, and wide-spreading nicle, it forms one of the handsomest plants grown in the British les. It should take a prominent place among the grasses intended r permanent pasture, and ranks with those best adapted for irrigated eadows; in fact it might, with great propriety, be mixed with grasses ch as rye-grass, &c., intended for only one crop, as it would add to e weight of forage and aftermath. We shall, however, make some ob- servations on this point at a future stage. It flowers in the begin- ning of July, and the seed is ripe towards the end of the month.

ANNUAL MEADOW. HARD FESCUE. LADIES' TRESSES.

Poa trivialis (Rough stalked Meadow-grass).—In Mr. Young's "Annals of Agriculture," it is stated that so long ago as 1785, Mr. Boys, of Betshanger, in Kent, a farmer of the highest reputation, raised, at much expense and several years' attention, from twenty to thirty bushels of seed of this grass, which he then offered for sale at three shillings per pound. His statement was that it made a very fine thick turf, and produced a great quantity of very excellent grass from moist rich soils. He used the straw after the seed was thrashed, instead of hay, for his riding horses; and they preferred it to his best meadow hay. To have the land covered thick, more than seven pounds of seed should be sown to the acre. Dr. Smith observed of this grass, that it does not bear the frost so well, nor does it shoot so early in the spring, as the smooth-stalked meadow-grass; but when the weather becomes warm enough to make grasses in general shoot, this grows faster, and produces a greater crop of bottom leaves than most others. The seasons in which this grass arrives at perfection, together with its highly nutritive qualities, and the marked partiality which oxen, horses, and sheep have for it, combined with the circumstance of its forming a close thick sward, are merits which distinguish it as one of the most valuable of those grasses which affect moist rich soils and sheltered situation; but on dry and exposed uplands its yield is altogether inconsiderable. It yearly diminishes, and ultimately dies off, sometimes in the course of four or five years. Its produce is always much greater when combined with other grasses than when cultivated by itself: with a proper admixture, it will nearly double its produce, though on the same soil, so much it delights in shelter. Those spots in pastures that are most closely eaten down consist for the most part of this grass. It flowers towards the end of June, and ripens the seed in the middle of July.

Poa pratensis (Smooth stalked Meadow-grass).—This species sends forth its stems but once in the year. On the whole, it is an inferior grass: its strong, creeping roots exhaust the soil; its growth, after mowing, is slow; and its spring growth, though early, is inconsiderable. It flowers in the beginning of June, and ripens seed in the beginning of July.

Festuca pratensis (Meadow Fescue).—In point of early produce in the spring, this grass stands next to the meadow-foxtail, and is superior in this respect to the cocksfoot. It is eaten by horses, oxen, and sheep, but particularly by the two first. The meadow fescue constitutes a very considerable portion of the herbage of all rich pastures and irrigated meadows. It makes excellent hay; and though a large plant, the leaves or herbage are succulent and tender, and apparently much liked by cattle, as they never form rank tufts, which is often the case with the larger grasses. It does not arrive at its full productive powers from seed so soon as either the cocksfoot or foxtail, and, though essential for permanent pasture, is not, by itself, well adapted for alternate husbandry, but should be combined with the larger grasses already noticed. This grass is not so plentiful in the deep alluvial soils of Lincolnshire as in the clay districts. In the vale of Aylesbury, it constitutes a considerable portion of the most valuable and fattening pastures of that rich grazing district. It appears more particularly to affect rich clayey soils than any other. It flowers in June, and ripens the seed at the end of July and the beginning of August.

Festuca duriscula (Hard Fescue).—This grass prevails most in down lands, sandy elevated soils, and dry pastures; but it also enters into the composition of rich alluvial meadow lands, and thrives under irrigation. It withstands the effect of drought better than most other grasses; and when not cropped after midsummer, constitutes one of the best ingredients for winter sheep feed. It is found to attain the greatest perfection when combined with the meadow fescue and rough-stalked meadow-grass. It springs rather early, and the produce is remarkably fine and succulent

Bromus arvensis (Field-Brome.)—The Bromes are all annual grasses, though supposed to be perennial by many in consequence of the same species occupying a field continuously; the circumstance, however, arises from the great quantity of seed which it sheds. Like most of the annual grasses, the bromes possess the most nutritive qualities about the time of flowering, and if cut at that period will afford a considerable quantity of nutritive hay; but if left uncut until the seed ripens, it is then comparatively of no value. The greatest objection to this grass is the sharp awney character of the florets, which makes it disagreeable to cattle. Few grasses grow better on stiff clays inclined to be wet and sour: this, combined with the facts that it affords an early bite in spring, and withstands the effects of frost better than many of the superior grasses, recommend it to the attention of the farmer. Brome grasses should only be introduced with great caution, as the seeds fall from the husks as soon as ripe, and speedily vegetate amongst the root leaves of the perennial grasses, and before autumn draws to a conclusion attain to a considerable size.

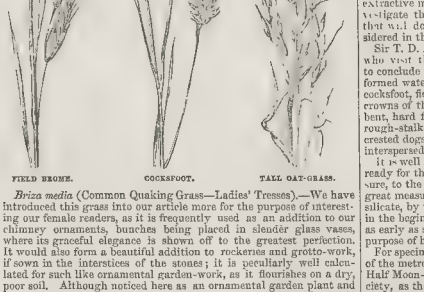
Agrostis solonifera (Large-leaved Creeping Bent—Fiorin).—Some years ago this grass attracted much attention, through the efforts of Dr. Richardson, of Belfast, at which time it was generally known by its Irish name "*fiorin*," which means grassy. There cannot, however, be a doubt that that gentleman greatly overrated its good qualities. At the same time, a number of the opponents to its introduction were equally wrong in denying to it any merit. The circumstance arose, in many cases, through experiments with two or three other varieties which so much resemble the true form that the distinction between the species is exceedingly difficult to discover. This plant is wholly unfit for alternate husbandry in consequence of its mode of growing, which is like that of the strawberry, by shooting out stolones, from the joints of which roots descend. It is an exhausting grass, as might be anticipated from its large produce and very short roots. It grows well on damp meadows, and such as are occasionally overflown, and is one of the most useful grasses in irrigated meadows, where it will generally be found at the bottom of the ridges. It forms a great part of the winter herbage of our richest pastures. It is easiest propagated by spinning the grass into ropes and cutting it to pieces with a chaff-cutter—every joint will grow.

Avena flavescens (Golden Oat—Yellow Oat-grass).—This grass affects a dry calcareous soil, and is always found in the richest natural pastures. Its produce is not great, nor its nutritive qualities considerable. On elevated dry soil this grass thrives better than most others, and in such situations is well worth cultivating. It flowers the first week in July, and ripens the seed early in August. There are a very great number of varieties of the agrostis or bent grasses, but none are worthy of notice except the above.

Lolium italicum (Italian or Annual Rye grass).—The Italian rye-grass is easily distinguished from the perennial species by its taller and more slender growth, being also more of a pea-green colour. The spikelets are also set much further apart, in this respect approaching the darnel in appearance. The general habit of rye-grass is too well known to need any very lengthened description; it may, however, be remarked, that if intended for hay it ought to be cut while in flower. Its principal qualities are that it throws up a great quantity of herbage in spring, and on rich land can be cut two or three times advantageously during the summer: it is usually sown with red clover.

Lolium perenne (Perennial Rye-grass).—Of late years, a great number of varieties of this grass have been brought forward. The following general characteristics will, perhaps, serve as a sufficient guide for selecting the sorts best adapted to particular purposes. The nearer the variety approaches in appearance the one just described, it is less likely to be a true perennial. The truest perennials are those kinds whose spikelets lie very close on each side of the culm, and are branched. This branched variety is the truest perennial, and is the sort best adapted for stiff soils. The number of species of this grass may be imagined, when it is stated that Mr. Whitworth, who paid great attention to this subject, possessed a collection, in 1829, of not less than sixty varieties: this, however, will cease to be so surprising, when it is stated that all the varieties are apt to change their character according to the soil on which they are cultivated. All kinds of rye-grass readily vegetate on most kinds of soil that are free from stagnant moisture: it soon arrives at perfection, and produces, in its first years of growth, a good supply of early herbage. These circumstances uphold its use among farmers, though, for alternate husbandry or permanent pasture, it is greatly inferior, both as regards quantity and quality, to the catstail, cocksfoot, foxtail, &c. The latter-math of rye-grass is very inconsiderable, and the plant impoverishes the soil in a high degree, if the culms (which are invariably left untouched by cattle) are not cut before the seed advances towards perfection. When this is neglected, the field, after Midsummer, exhibits only a brown surface of withered straws.

Poa nemoralis (Wood Meadow Grass).—This grass is seldom if ever found growing naturally other than in shady situations, such as under trees, high hedgerows, &c.: nevertheless, the seeds vegetate readily when sown on exposed situations; and the plants grow freely, and attain to a greater size and strength, than those in the woods and in the shade. It is remarked by Mr. G. Sinclair, that before the period of coming into flower the plants that are cultivated in open places are invariably attacked by the disease termed *rust*, which pervades every part of the plant; and that in moist and cloudy seasons the disease is much less severe, being chiefly confined to the leaves. No trace of this affection is ever found in plants of this grass growing in shady situations. The fact is the more remarkable, as it is the very reverse of the circumstances which commonly accompany the appearance of rust amidst wheat. The early growth of this grass in the spring, and its remarkably fine, succulent, and nutritive herbage, recommend it for admission to the permanent pasture grasses. It is particularly well calculated for sowing in plantations and orchards, accompanied by cocksfoot, sweet-scented vernal, and crested dogstail grasses. Wood meadow grass flowers in the third week of June, and ripens the seed in the end of July.



FIELD BROME. COCKSFOOT. TALL OAT-GRASS.

Briza media (Common Quaking Grass—Ladies' Tresses).—We have introduced this grass into our article more for the purpose of interesting our female readers, as it is frequently used as an addition to our chimney ornaments, bunches being placed in slender glass vases, where its graceful elegance is shown off to the greatest perfection. It would also form a beautiful addition to rockeries and grotto-work, if sown in the interstices of the stones; it is peculiarly well calculated for such like ornamental garden-work, as it flourishes on a dry, poor soil. Although noticed here as an ornamental garden plant and chimney ornament (if kept dry and free from dust, it will remain perfect for years), it is not without a fair share of utility to the husbandman, as its nutritive powers are considerable, as compared with other grasses affecting soils of a similar character. It is eaten by horses, cows, and sheep. These merits, therefore (it is observed by Mr. Sinclair), demand attention; and though it is unfit, comparatively, for rich, permanent pasture, yet for poor sandy, and also poor tenacious soils, where improvements in other respects cannot be sufficiently effected to fit them for the production of the superior grasses, the common quaking grass will be found of value. It flowers the second and third weeks in June, and the seed is ripe about the second week in July.

The preceding details respecting the habits and properties of the most generally useful grasses will in a great degree enable the reader to select an assortment adapted for any particular soil.

Strange as it may appear to many, we confidently assert, that in no branch of British husbandry does so much ignorance exist as in the proper management of meadow and pasture land. From the varied habits of the grasses already noticed, it will be seen that, in order to produce the largest amount of herbage at all seasons of the year, recourse must be had to such a variety of grasses as will be continually throwing up herbage at all seasons of the year. The superiority of old natural pastures will be found to arise principally from the variety of different habits and properties which exist in a combination of numerous different grasses. Some grasses withstand the injurious effects of long-continued dry weather better than others and *vice versâ*; the same remark applies to frost, excessive wet, or other meteorological vicissitudes. Hence, the never-failing supply of nutritive herbage obtained from old natural pastures, which cannot be found in fields laid down with only one or two kinds, such as is commonly done by using rye-grass and clover.

Mr. Sinclair found that turves one foot in diameter, cut from rich ancient pasture land in Endsleigh, Devonshire, belonging to the Duke of Bedford, contained the following plants:—From Hurdwich Ground: sweet-scented vernal, perennial rye, smooth-stalked meadow-grass, rough stalked meadow-grass, cocksfoot, woolly soft, meadow fescue grasses, yarrow white clover, perennial red clover, narrow-leaved plantain (rib-grass or cock's grass), daisy, buttercup, and sheep's sorrel. Turf from Endsleigh Ground: Meadow fescue, hard fescue, meadow foxtail, cocksfoot, soft brome, rough-stalked meadow, crested dogstail, creeping or purple fescue, fiorin, perennial rye, woolly soft grass, common bent, sweet-scented vernal grasses; and perennial red clover, white clover, spear-leaved plantain, yarrow, sheep's sorrel, daisy, hawk-weed, self-heal, &c.

In the rich pastures of Lincolnshire, which are the richest feeding-grounds in the world, a similar admixture was found, the only difference being that, in the Lincolnshire pastures, the natural or proper grasses were in a much greater proportion, and, excepting *yarrow* and the *clover*, there was scarcely a plant to be found out of the family of the proper grasses.

The result of an examination of the pastures in the Vale of Aylesbury was in accordance with the above. In concluding his observations on these pastures, Mr. Sinclair justly observes: "The chief properties which give value to a grass are, nutritive powers, produce, early growth, regerminating powers or the property of growing rapidly after being cropped, and the facilities which it offers for its propagation by seed. But the results of these (the Woburn) experiments have proved that a combination of all the merits and properties which give value to a grass is not to be found in a superior degree in any single grass." Such being the case, the important question arises, what is the best selection of grasses to lay down land in permanent pasture? Mr. Sinclair gives the following selection:—

Cocksfoot (*Dactylis glomerata*)	2 bushels.
Meadow fescue (*Festuca pratensis*)	2 ditto.
Meadow foxtail (*Alopecurus pratensis*)	2 ditto.
Rough-stalked meadow grass (*Poa trivialis*) ..	2 ditto.
Tall oat-like soft grass (*Holcus avenaceus*)	½ bushel.
Meadow catstail (*Phleum pratense*)	15 lb.
Hard fescue (*Festuca duriuscula*)	2 bushels.
Crested dogstail (*Cynosurus cristatus*)	1 ditto.
Nerved meadow grass (*Poa nervata*)*	½ ditto.
Wood meadow grass (*Poa nemoralis*)	½ ditto.
Narrow-leaved meadow grass (*Poa angustifolia*)	½ ditto.
Fiorin (*Agrostis stolonifera*)	½ ditto.
Perennial rye-grass (*Lolium perenne*)	1 ditto.
White clover (*Trifolium repens*)	15 lb.
Buck vetch (*Vicia sepium*)	½ bushel.
Sweet-scented vernal grass (*Anthoranthum odoratum*)	½ ditto.
Perennial red clover (*trifolium pratense perenne*)	12 lb.
Yarrow (*Achillea millefolium*)	4 lb.

We may observe that the above selection is well adapted for fertile loams and stiff soils, but not for light lands. On very stiff soils the cocksfoot may be increased one half, diminishing the foxtail. On fertile sandy soils the cocksfoot may be diminished, and the foxtail increased in a like proportion. On light lands the cocksfoot and catstail may be diminished three-fourths, leaving the other seeds as above. Having made these remarks, we will return to Mr. Sinclair's observations. "If the seeds of the before-named grasses and plants be mixed in the different proportions before stated, one bushel of such mixture of seeds, sown on an acre of land, will (omitting fractions) afford but two seeds to every square inch, while the most productive ancient natural pasture examined had seven plants to every square inch;" but, as many of the seeds are infertile, a proportional allowance ought to be made on that account: on the other hand, as the seeds grow very luxuriantly the first year, and are annually scattering fresh seeds, ten pecks of the preceding assortment may, perhaps, be about the quantity which ought to be sown to a statute acre. For alternate husbandry, the cocksfoot is best adapted to dry, stiff, and fertile loamy lands, whilst the catstail is best calculated for cultivated peats, and moist, stiff soils; the rye-grass for light lands. Of the time of sowing there can be no doubt but the autumn is the best season, if intended for permanent pasturage; but for alternate husbandry, perhaps, there is no more profitable mode than that usually adopted, namely, sowing in spring with a grain crop.

Having made several allusions to the Woburn experiments and the grass garden, it may be well to explain that these experiments were made by Mr. Sinclair, at the sole expense and at the instigation of Francis Duke of Bedford: the experiments occupied a number of years, and were conducted with the greatest care, every plot being separated by boards. The produce of each grass on different plots and soils were accurately weighed at various periods of their growth: their nutritive properties were investigated by Sir Humphrey Davy, Bart. We have not included the weight in this account, deeming our general observation not only sufficiently accurate but also more practically useful; and, with regard to the nutritive properties of the different kinds, it may be remarked, that in Sir H. Davy's time organic chemistry was very little understood, and some of the matters which were then deemed least nutritive may at the present period be considered most so. As an illustration, we may mention that what Sir H. Davy called bitter extractive may prove to be legumin. Professor Way is about to investigate this subject; and we feel assured that it is in able hands, that will do it the fullest justice. Clovers, &c., have not been considered in this paper, as they do not belong to the order *Gramina*.

Sir T. D. Acland, Bart. M.P., having drawn the attention of those who visit the Exeter Meeting to his water meadows, it may be well to conclude this essay with an account of the grasses usually found in the best formed water meadows. They consist as follows:—Meadow foxtail, cocksfoot, field-brome, meadow fescue. These generally occupy the crowns of the ridges. In the furrows grow the creeping bent, March bent, hard fescue, lesser variety of the meadow catstail, woolly soft, rough-stalked meadow, meadow fescue grasses; whilst the golden oat, crested dogstail, perennial rye, and sweet-scented vernal grasses are interspersed over the whole, in company with the tufted vetch.

It is well known that old meadow grasses are much later in being ready for the scythe than "*seeds*." We attribute this, in some measure, to the tendency of the stimulant in old turf: this ought to be a great measure remedied by manuring old meadows with a soluble silicate, by which means the flowering culms would be forced forward in the beginning of the year, and would thus become fit for the scythe as early as seedling grasses. The value of old meadow land for the purpose of haymaking might in many places be thus doubled.

For specimens of some of the grasses, not easily procured in the vicinity of the metropolis, we are indebted to Messrs. T. Gibbs and Co., of Half Moon-street, Piccadilly, seedsmen to the Royal Agricultural Society, as the Grass Garden at Kew is only in course of formation. We hope, however, that by next year there will be a complete assortment of British Grasses, to which all may refer to. The necessity of getting this part of the Kew Garden complete by next year is the more urgent, as we shall have a great number of foreigners visiting us to view the Great Exposition; many of whom, from the interior parts of Germany, feel a great and growing interest in agricultural improvements.

* A kind not much used, though deserving of more notice on account of its winter herbage: it was imported originally from North America.

PICTURES FROM THE EXHIBITIONS.

(Continued from page 25.)

Academy: it hangs in the East Room, and is, in the Catalogue,

8. "The Wind on Shore."—This is a highly poetic scene: the bright lights and dark shadows, the threatening clouds, and the flattering horizon, are charmingly painted.

The circular picture, engraved on this page, is from the Exhibition of the Society of Painters in Water Colours, and is

190. "The Angels' Whisper." Painted by J. J. Jenkins.—The scene is the cabin of a peasant, where two guardian angels are keeping watch over a sleeping innocent. This is a beautiful little picture, of a class now very popular.

Next is one of Mr. M'Ian's ten contributions to the Exhibition of the National Institution, in Regent-street. It is a touching scene.

79. "The Highland Coronach."—Niel Macdonald, son of the Laird of Achtreachtan, "indweller in Glencoe," and one of the "most stiff-necked of the Popish clan Donald," was "slaine by certain righteous men," friends of Master John Nevoy, preacher, who was instructed to "teache the uncivil natives of the Hielands and Isles both *Inglische* and *Godliness*." This young man, whilst hunting on the hills between Glencoe and Fasnacloigh, was "shot unto death." His brother escaped at the time of the massacre of Glencoe, and flew for safety into Yorkshire, and subsequently assumed the name of Blair—a field (of battle)—or Blair. The present member for Bolton is one of his descendants. "Coronach," in the Gaelic, signifies "Lament."

THE ANGELS' WHISPER."—PAINTED BY J. J. JENKINS.

LITERATURE.

In Memoriam.—Moxon.

This volume is the great poetical product of the present season. The year's literary vains will be measured by it hereafter. It is in all respects extraordinary and meritorious. It comes before us simply with its appeal as pure poetry, addressed to universal sympathies, without borrowed aid, whether from a high-sounding title or a salient subject. It is merely a friend's lamentation for a friend's death a series of doubts and regrets, of reminiscences, hopes, fancies, fears, and speculations, having their origin in sorrow for that one calamity. The book is anonymously published, but is well known to be the work of Mr Tennyson; and the friend whose virtue it celebrates was Mr. Arthur H. Hallam, the son of the historian.

Grief is monotonous in its tone. Accordingly, all these elegies are in the same measure. Some are very brief; others extend to several stanzas; none have any titles; all are properly breathings, or effusions—sudden thoughts, accidental associations—shadows and fantastic relations, such as Sorrow makes the universe tributary withal to the expression of her moods.

The book may be opened anywhere, and a complete poem found, embodying some form of sadness, some phantom of melancholy. Let us take one at random. We open, by chance, at pages 70 and 71. Here are two poems that happen to explain the purpose and tone of the whole memorial.

If these brief lays, of sorrow born,
Were taken to be such as closed
Grave doubts and answers here proposed,
Then these were such as men might scorn.

Her care is not to part and prove:
She takes, when harsher moods remit,
What slender shade of doubt may flit,
And makes it vassal unto love.

And hence, indeed, she sports with words;
But better serves a wholesome law,
And holds it sin and shame to draw
The deepest measure from the chords:

Nor dare she trust a larger lay,
But rather loosens from the lip
Short swallow flights of song, that dip
Their wings in tears, and skim away.

Such is the manner, metre, and character of this elegiac series. The uniformity of measure gives them somewhat the impression of sonnets on the mind; only the form is so much more simple and facile. Notwithstanding the general simplicity of style, the thoughts, however, are frequently abstruse, and the reflections profound—even scientific, as in the two following examples, borrowed from geology.

The wish, that of the living whole
No life may fall beyond the grave,
Derives it not from what we have
The likest God within the soul?

Are God and Nature then at strife,
That Nature lends such evil dreams?
So careful of the type she seems,
So careless of the single life;

That I, considering everywhere
Her secret meaning in her deeds,
And finding that of fifty seeds
She often brings but one to bear,

falter where I firmly trod.

* * * * *

"*So careful of the type?*" but no.
From scarped cliff, and quarried stone,
She cries, "A thousand types are gone;
I care for nothing—all shall go.

"Thou makest thine appeal to me:
I bring to life, I bring to death,
The spirit does but mean the breath:
I know no more." And he, shall he,

Man, her last work, who seem'd so fair,
Such splendid purpose in his eyes,
Who rolled the psalm to wintry skies,
Who built him fanes of fruitless prayer,

Who loved, who suffer'd countless ills;
Who battled for the true, the just,
Be blown about the desert dust,
Or seal'd within the iron hills?

Thus it is that knowledge itself to the sorrowful becomes sorrow. Such sceptical investigations the pensive poet thus justifies:—

"There lives more faith in honest doubt,
Believe me, than in half the creeds."

These philosophical difficulties, it would seem, it was his friend's habit to

ired in the student who under-
s the perusal of these fine poems.

VIS FROM A LADY'S DIARY OF HER
RAVELS IN BARBARY. 2 Vols. Col-
rue

ary is comparatively a novel sub-
for a traveller's investigation for, a

"THE CHILD'S PRAYER."—PAINTED BY F. A. J. HEDGMAN, A.R.A.

lady-traveller's, a somewhat curious adventure. The point of departure was Marseilles, and the earliest description relates to the wretched condition of the streets in Algiers, and the Court of the Duchess d'Aumale. Of course, the monument to the Duke of Orleans is not forgotten, and other signs of French dominion. Among the native curiosities, we are presented with a Harem of Dolls. We have also a description of Blida, and afterwards of Philippeville. We may form some notion of the miserable life of the Colonists, from the fact that "the only inhabitants are the military and a bad class of civilians—bankrupt tradesmen, dissipated mechanics—the very refuse of France." Our lady records:—

"Our Polish friend, Colonel K—— brought me to-day a small ancient coin, which he had picked up among the ruins of the amphitheatre. This gentleman, whose wife and family are in Paris, has obtained the permission of the French Government to found a commercial establishment in Philippeville; he and some other Polish refugees proposing to unite together to form a company. He has been here only twenty-four hours, and the bad climate has already so disheartened him, that he has some misgivings as to the practicability of carrying out his scheme. He passes his evenings with us; for evenings to a solitary man, in a town like this, are dreary indeed We dine down stairs in the public *salle*, the only way by which we can secure our dinner being warm. Besides ourselves and the Polish Colonel, there are in this hotel about fifty other guests, all French military officers. The dinners are wretchedly cooked, and the appearance of the waiters, who attend on the guests in their shirt sleeves, is not very seemly."

Some of the ancient Roman remains in this place are interesting; but the tract of country is for the most part desert and incommodious; and travelling in an omnibus far from pleasant. Nature is nevertheless sublime, and sunrise and sunset are both beautiful. Our authoress shews a feeling of this, and her snatches of description are pleasing. Of incident there is not much, or of much account in her pages. Her position as a female was odd, but nothing occurred of a striking character. She thus describes the Hôtel de l'Europe at Constantina:—

"This hotel is an old Moorish house, a circumstance which, I confess, led me to give it the preference over some other places, where we might doubtless have been better accommodated; but I have repented of my injudicious predilection, and the few hours I have passed here have sufficed to convince me that these Moorish houses, though very interesting to look at, are not dwelling-places suited to Europeans. The rooms are like dungeons; they have no regular windows, but are lighted from glass-doors, which open on galleries looking into the court-yards. The rooms are consequently very deficiently supplied with light and air. Then there is such a labyrinth of passages and corridors, with little flights of steps leading up and down, that it would require the thread of Ariadne to avoid losing one's way in the many intricacies."

The French military, according to our traveller, regard Algiers as the most miserable exile to which they can be doomed. The disposition of the Arabs towards the French is not good; nor, in fact, towards Europeans generally. It is only fear which restrains the natives from open hostility. These volumes afford very satisfactory information as to the mode of life in the parts described, with ample accounts of the beautiful scenery about Bona, the ruins of Hippo, the peculiarities of Tunis, and of numerous other places which lay within the writer's route. It is true that her reflections are not profound, but her descriptions are graphic.

"MARKET BOATS ARRIVING AT ANGERS."—PAINTED BY E. A. GOODALL.

MORNING DRESS.

PARIS FASHIONS FOR JULY.

ALTHOUGH London and its season, the country-seats, the sea baths, the Baden, Homburg, and Vichy waters carry away the aristocracy, we have, nevertheless, found in the various establishments here many novelties. Paris, which, during four months of the year, works night and day to create these elegances, never witnesses these light dresses in its public walks. They require the shade of large trees for shelter, and the verdure of lawns, studded with flowers, to set them off.

CAP.

Silk Dresses continue general; we also see plain taffetas, and chiné, or foulard taffetas. The great novelty in barèges consists in chintz patterns of running flowers or large nosegays, on white, Pensée green, maroon, and dust-grey grounds. The flowers and nosegays are in very vivid colours. Some foulards have also similar patterns, but the grounds are generally black. There are not so many white muslin *mantelets* worn as were seen during late summers. Black worsted lace shawls have supplanted them this year. Black worsted lace is in great vogue; its novelty alone can keep it in fashion, for it cannot in any way rival the real silk lace. *Pardessus* are the height of the fashion: the *pardessus* similar to the *peignoir* morning dress; the *pardessus* trimmed with wide fine lace for morning visits; the chintz dress, with a similar *pardessus* for the country. Besides these, there are others for the evening.

STRAW BONNET.

IN-DOOR DRESS.

Alençon lace cap, ornamented on the side with bows of ribbon with long ends. *Pardessus*, ornamented with two flounces, the head of the upper flounce having a *ruche à la vieille. Manches engageantes*, trimmed with a treble row of Alençon lace.

Children's nankeen dresses are embroidered in braid of the same colour, coming down to the legs; the sleeves embroidered to match, with plain muslin under-sleeves. The short trousers of cambric muslin are trimmed with English embroidery.

Gentlemen wear small frock-coats of ladies' cloth, short skirts, long waist, *manteau Amelie d'évêque*, violet and English blue colours. The dress-coats are short and narrow in the skirts, and long-waisted. Almost all the fashions for gentlemen are founded on those of London. White hats are worn by some fashionables; and the brims are somewhat wider than those of last year.

Straw bonnets have the crown plaited with ribbon of a dark colour and straw, ornamented with a little straw edging on each side; Malines lace cap, three rows of lace, and two of gauze ribbon, the crown with similar ribbon. These delightful novelties are from Madame Laure's establishment, Rue des Capucines.

The most elegant riding habits are those made by Lavigne, Rue Vivienne. They have the highly-sought-for merit of a very close fit to the waist. This advantage is due to the use of busts moulded from nature, and invented by Lavigne. The summer riding-habits are very open in front, and kept buttoned at the waist by a few buttons only. The *basques* in front are short. At the back there are three double plaits, at the top of two of which there is a button. Down the front and the *basques* are edged with lace. The stuffs more generally used are *grain de poudre* cloths, of a blue or fine green dragon colours. Some riding-habits have been made of Indian nankeen. The buttons are always convex, covered with stuff. Some ladies have been seen with precious-stone buttons.

OPERA DRESS.

THE OPERA DRESS

Is of silk, with a straight upper dress, and three flounces on the cross; the body pointed, having a lace *berthe*, with five or six rows of lace of the like sort, but the width of which decreases at each row in approaching the point of the body.

SIR ROBERT PEEL.

His qualifications as an orator, and his manner as a debater, have been well and graphically pourtrayed by an able Parliamentary reporter, who thus speaks of him:—

If posterity shall decide to rank Sir Robert Peel among great men, he will rather be classed among the statesmen than among the orators. He may be talked of with Walpole, but not with Pitt or Fox. Oratory is a severe and exacting art. Its object is not merely to excite the passions or sway the judgment, but also to produce models for the delight or admiration of mankind. It is a study which will not brook a divided attention. The orator speaks rarely—at long intervals—during which he saturates his mind with his subject, while casting it in the mould to which his taste guides him, as being the most calculated to enhance by its charm the intrinsic worth or beauty of his thoughts. Like the poet, he works either from the love of his theme, or in the anticipation of triumph. But the exigences of modern political warfare have called into being a class of public speakers whose effusions fall as far short of those of the professed orator in permanent beauty as they excel them in immediate utility. As the character of the House of Commons, remodelled under the Reform Bill, has become more business-like, so the most popular and powerful speakers there are those who, rejecting the beautiful, apply themselves to the practical. Eloquence has become a positive element of power. A party leader is compelled to enter with almost equal energy into the most trifling as into the most important affairs. He must be always ready with facts, with arguments, with stimulated enthusiasm; he must identify himself with all the interests of those whom he would lead. Even were there time for that preparation which a great orator needs, there is no scope for his display.

At the head of this class of public speakers—of those who either do not aim at or fall short of acquiring, the divine art which, harmonising language till it becomes a music, and shaping thought into a tall-man, gives a man the right to be called an orator—stands forth conspicuously Sir Robert Peel. We have already said that he sacrifices much possible fame as an orator, in order to secure substantial influence as a statesman. Some may be prepared to combat this; to say that Sir Robert Peel's inherent mediocrity is such that he could not, if he would, have rivalled even the most distinguished of living orators, much less the mighty dead. But it is difficult to suppose that a man of such high and varied attainments, one in whom the scholastic fervour has survived amidst the uncongenial pursuits of a stormy political life—one who, as for instance in his speech at Glasgow, and in some few of his speeches in Parliament, or at public places, has breathed the purer atmosphere of poetry and philosophy it is scarcely possible to believe that, had he early devoted himself to the study and imitation of the greatest models, to the perfection of style, to the discriminating choice of language, he could not have elevated himself as an orator to the highest rank. No, Sir Robert Peel's aim is different; his political weight depends on his power of charming or influencing the House of Commons. He has studied political opinion until even its minutest shades are made palpable to him. They are all more or less represented in the popular assembly, and there he displays his knowledge of all their wants, and awaits himself, concealing his purpose, of all their rivalries and prejudices. Not one hint finds, from time to time, an echo in the speeches of Sir R. Peel. His caution, and, at the same time, his determination, are so well known, that the slightest hint he lets fall as to his purposes is instantly caught up. One cause of the breathless attention with which he is heard, is, that each section of the House is anxious to penetrate the mystery of his future policy, knowing well that he will not utter any direct promise as a mere flourish, or unless he means to fulfil it. If he be oracular in his mystery, he is often equally so in his studied mystification. As no man can more clearly explain himself when he pleases, so no man can more adroitly wrap up his real meaning in an unintelligible involvement of words. Look at him while in power from 1841 to 1846, while still he was concealing his intentions with respect to the commercial policy of the country. Sometimes a sturdy Radical, or an indignant agriculturist, determines to catch the eel by the tail and electrify him. He put some plain, direct question, and demands an answer. You think Sir Robert must now be fairly posed—he will must be rent—parties must soon resume their own habits—for he must say something positive on which a war-cry can be raised. He rises, leans forward on the table, plays with his fingers, or puts his hands under the tails of his blue frock-coat, and in the most open and candid way declares his determination to answer frankly the question which has been put to him. This is satisfactory—it propitiates. All are on the qui vive. There is hushed silence. All heads are stretched forward in expectation of the announcement of policy. Perhaps Lord John Russell and Lord Palmerston exchange a glance or smile of incredulity, for they know their man. Meanwhile, the soft, bland voice has poured forth its sentences in the most remote corner. The bearing he speaks a full consciousness of the responsibility of the duty of the moment—the face wears the placid expression of innocence. You are fairly prepossessed for such a man. But what is he saying? By that cheer from Mr. Cobden, and the Sancho, Mr. Bright, he appears to have said something pleasant to the manufacturers. But that roar of delight from the other side? Oh, he has promised the country gentlemen by some well-turned compliment to protection, but it is not yet the object of his rhetoric. And now another cheer, more general, as the reward of some pompous maxim of the public good. It is clear he has warmed to him. The more kindly they entertain, the more candid grow the speaker's tones—the more earnest is he to do the best which the state of things allows. An elaborate statement all ays of the different courses open to him—of the several advantages and disadvantages—in all of which he adroitly rouses the prejudices slumbering for the moment around him, and establishes a sympathy with each, centering hopes in himself, and setting old hatreds new against each other, until having thus led the various parties to a mental *mêlée*, he winds up with an "upon the whole" leading with pompous affectation of resolves to a declaration of what he means to do, which, in fact, comprises—in an artful woof of phrases, sounding, but bootless—almost everything that he does not mean to do. Meanwhile he has skilfully diverted the attention of all from the real point at issue to their mutual jealousies and asperities. Ten to one he sits down "amidst loud cheers," having uttered much, but avowed nothing. It may be said, "How can such a boy be so transparently cajoled?" The answer is, "It is done—done every day, in almost every speech; and the more it is done the more they seem to like it."

This, however, is but one phase of Sir Robert Peel's Parliamentary character. There are occasions—and they have multiplied during the last year or two—when he boldly throws aside all these arts of *finesse*, and assumes a much more lofty position. Patient, painstaking, a dissembler, even—politically speaking—a hypocrite, in order to obtain power, he no sooner felt the supreme firm in his grasp than his mind seemed to expand; he grew in moral stature; he disdained to look back at the tortuous path by which he had ascended, but pressed with proud confidence forward. A magical change came over Sir Robert Peel from the hour that he finally resolved to make the last appeal to obtain a pure majority of the House of Commons without the aid of the agricultural members to be the Minister, not of a party, but of the nation. Whether it was that the desperate nature of the game, and the magnitude of the stake (both no less than the fealty of a party, and the reputation of a life) inspired an unwonted magnanimity, or that, a long-sought opportunity having arrived for throwing off a mask of hateful subserviency, Sir Robert Peel, now, for the first time, displayed his real character; assuredly there was in his speeches during the last two years, and especially in the last six months, of his official life a tone to which his contemporaries were wholly unaccustomed. With a sense of power, and a consciousness of self-sacrifice, he assumed the air, now of a dictator, now of a martyr. Defiance to the agriculturists, and threats to the legitimate opposition, were backed by a kind of covert appeal to the public out of doors. Occasional flashes of spirit, rare but emphatic, and decisive instances of plain-speaking, induced a momentary doubt whether this man, so metamorphosed by a great peril and an unparalleled responsibility, could hardly be the same Sir Robert Peel whose name had long been a by-word for plausibility and slipperiness in statesmanship, whom you had often seen shivering with loquacious indecision on the very brink of a positive declaration. But it is a singular fact, illustrating the real character of Sir Robert Peel, that at every great crisis of his public life—on bringing in the Emancipation Bill; on assuming office in 1834; and, finally, on introducing the measure for Repeal of the Corn-Law—he has thus flung aside his disguise, and has spoken out plainly and boldly his real mind, regardless of personal consequences. There may have been magnanimity—it may have been moral hardihood: political passions will always usurp in such cases the decision of a calm judgment.

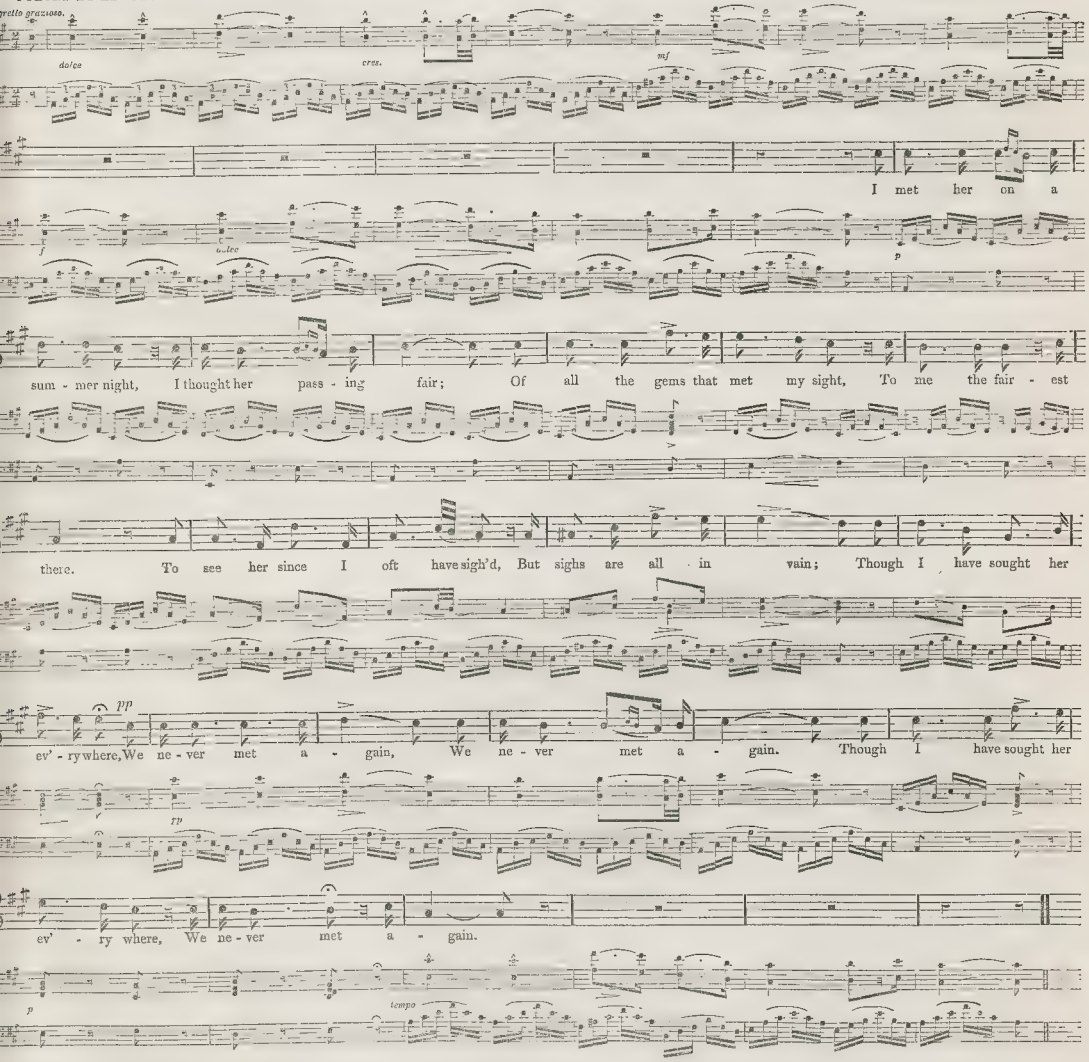
If Sir Robert has acquired, by long study and practice, the art of leading and moulding to his will a body of several hundred intelligent men, he may be pardoned if the matter of his speeches be not first-rate. Excepting occasional passages of the kind just referred to, the character given already of his earlier speeches applies to his later ones. Neither the thoughts nor the languages ever rise above the level of common sense. They are political manœuvres and purposes put into language, because a free constitution requires that the people shall at least seem to be parties to the policy of statesmen. The difference between Sir R. Peel and other statesmen is, that he does not think in public—does not invite the public to think with him. He forms his plans out of the elements of thought he finds in the House of Commons, and trusts to each party liking the ingredient it has separately contributed to the hash.

A stranger to the House of Commons, who, having heard of Sir Robert Peel's influence there, had conceived some ideal portrait of a great orator, would assuredly be disappointed. He would observe in his speeches a want of strong reasoning on fixed principles—a lax, loose, many-sided mode of viewing the most vital questions, and a great command of that sort of logic which takes in common minds by clever fallacies. He would look in vain for vivid imagination or profound thought. He would find no outline of a complete scheme of policy, nor any one ruling idea with which his own views and political sympathies could associate. The style he would pronounce as inarticulate; not that there is no attempt at construction, but the speech is so crowded with extraneous matter, and so many ends have to be gained by it, that a perfect plan would be impossible. He would complain of verbosity, of repetition of ideas—nay, of whole arguments, in different words, and these imperfectly expressed—of a pervading pretension to something very profound, which constantly falls short of accomplishment. Of the action used by the speaker, he would be tempted to say that it was neither modest, as becomes an unassuming reasoner, nor impassioned, as ought to be the action of a great orator. He would see at one time a pompous solemnity leading to nothing; at another, the most trivial gestures of every-day, after dinner conversation, ushering in the most important topics. He would notice with surprise the orator's elbow resting on the table before him, while his pointed finger shakes ominously at his opponent, and one leg is crossed over the other—the posture of a man laying down an argument to a familiar friend; or his thumbs buried in the pockets of his capacious waistcoat, while his coat is thrown back ostentatiously, as some foreigners do to show their fine velvet linings; or, as is more commonly the case, his hands hidden under his coat-tails, while he stands much as he might with a back to a fire. These are not exactly the positions or the gestures of a great orator.

But, on the other hand, whatever the defects of Sir Robert Peel, when his speeches or his actions are looked at critically, you cannot fail to admire a sense and self-possession—the thorough knowledge he has, even to the minutest details, of every subject he undertakes; the adroitness with which he enters into all the different feelings, prejudices, and interests which surround him; and the art he evinces in yielding them, so as to produce all the appearance of enthusiasm, and in moulding them to his purpose of subduing their varieties to one harmonious course of action. In the art of managing the House of Commons, he is, indeed, unrivalled."—(*Francis's "Orators of the Age,"* pp. 31, 32.)

WE NEVER MET AGAIN.

POETRY BY EDWARD MORDAUNT SPENCER. COMPOSED BY G. HERBERT RODWELL.



I met her on a
sum - mer night, I thought her pass - ing fair; Of all the gems that met my sight, To me the fair - est
there. To see her since I oft have sigh'd, But sighs are all in vain; Though I have sought her
ev' - ry where, We ne - ver met a - gain, We ne - ver met a - gain. Though I have sought her
ev' - ry where, We ne - ver met a - gain.

SECOND VERSE.

I led her through the merry dance,
She won my heart's good will,
I listen'd to her dulcet song—
I think I hear her still.

To see her since I oft have sigh'd,
But sighs are all in vain;
Though I have sought her ev'ry where,
We never met again.

THE WASHINGTON NATIONAL MONUMENT, AT WASHINGTON CITY.

THIS grand memorial originated as follows:—In 1783, Congress passed a resolution to erect an equestrian statue to Washington, in the national capital, wherever that should be permanently located. The capital was afterwards established on the border of the broad and beautiful Potomac, and very appropriately called "Washington City." In 1804, after Washington's death, the subject of a monument to his memory was again broached, but no steps were taken on the matter.

In 1833, the "Washington National Monument Society" was organized, with Chief Justice Marshall at its head; and measures were at once taken to collect the necessary funds. In order that it might truly be a national work, and that the humblest individual could contribute his share, the subscriptions were limited to a dollar. During several years only some thirty thousand dollars were obtained; the hard times of 1837 succeeded, when the entire pecuniary resources of the country were prostrated, and this majestic project seemed hopeless for a time.

But, in 1847, new measures were taken, new men and leaders arose; the collections were increased until they reached eighty thousand dollars; and the corner-stone was laid, with imposing ceremonies, by the Hon. Speaker Winthorp, on the 4th July, 1848. The plan adopted is one worthy of the object. The chief idea in the structure is an obelisk, fifty-five feet square at the base, and intended to be six hundred feet high! This will exceed, in its altitude, any steeple or monument in the world. From a thickness of fifteen feet the walls diminish to thirty inches, leaving an open space of twenty-five feet square. The top of this noble monument is to be reached by flights of iron steps at the four sides; and the hand-rail, being hollow, will serve as a conductor of gas, so that the whole of this prodigious cavern will be rendered as light as day.

As to the circular structure—which (to say nothing of its mixed and incongruous architecture) gives such a muffled-up appearance to the base—it will be 100 feet high, on a platform 300 feet square. This is intended to serve as the mausoleum of the illustrious dead.

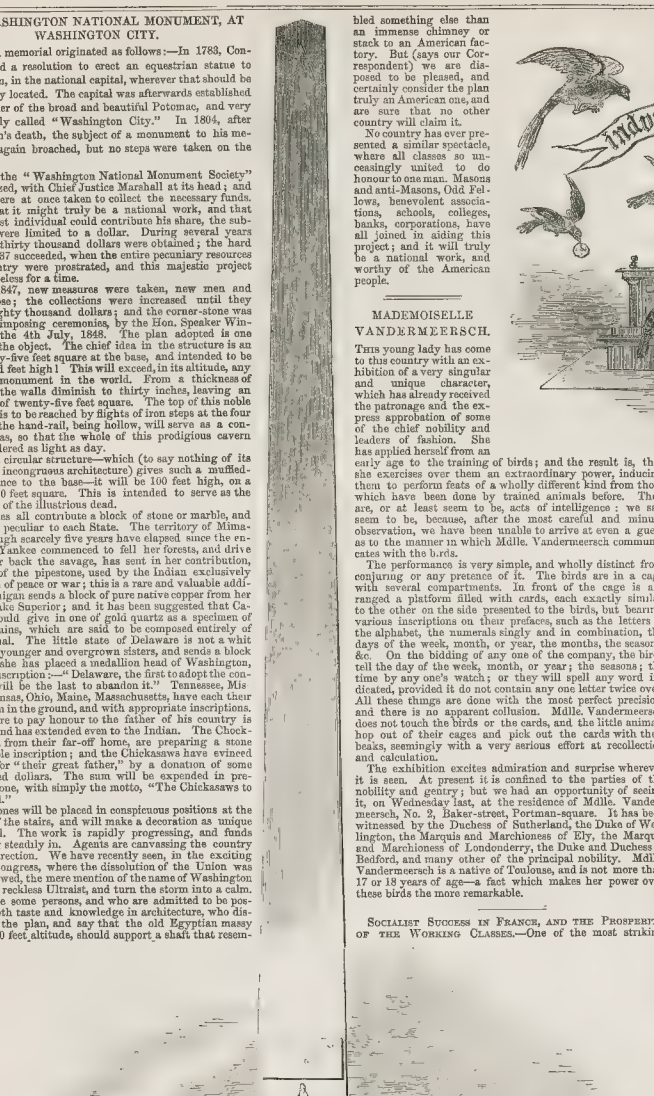
The States all contribute a block of stone or marble, and of the kind peculiar to each State. The territory of Minnesota, although scarcely five years have elapsed since the enterprising Yankee commenced to fell her forests, and drive still further back the savage, has sent in her contribution, viz. a slab of the pipestone, used by the Indian exclusively for the pipe of peace or war; this is a rare and valuable addition. Michigan sends a block of pure native copper from her mines in Lake Superior; and it has been suggested that California should give in one of gold quartz as a specimen of her mountains, which are said to be composed entirely of that material. The little state of Delaware is not a whit behind her younger and overgrown sisters, and sends a block on which she has placed a medallion head of Washington, with this inscription:—"Delaware, the first to adopt the constitution, will be the last to abandon it." Tennessee, Missouri, Arkansas, Ohio, Maine, Massachusetts, have each their contribution in the ground, and with appropriate inscriptions.

This desire to pay honour to the father of his country is universal, and has extended even to the Indian. The Chocktaw nation, from their far-off home, are preparing a stone with suitable inscription; and the Chickasaws have evinced their love for "their great father," by a donation of some two hundred dollars. The sum will be expended in preparing a stone, with simply the motto, "The Chickasaws to their friend."

These stones will be placed in conspicuous positions at the landings of the stairs, and will make a decoration as unique as beautiful. The work is rapidly progressing, and funds are coming steadily in. Agents are canvassing the country in every direction. We have recently seen, in the exciting scenes in Congress, where the dissolution of the Union was openly avowed, the mere mention of the name of Washington silence the reckless Ultraist, and turn the storm into a calm.

There are some persons, and who are admitted to be possessed of both taste and knowledge in architecture, who disapprove of the plan, and say that the old Egyptian massy work, of 100 feet altitude, should support a shaft that resembled something else than an immense chimney or stack to an American factory. But (says our Correspondent) we are disposed to be pleased, and certainly consider the plan truly an American one, and are sure that no other country will claim it.

No country has ever presented a similar spectacle, where all classes so unceasingly united to do honour to one man. Masons and anti-Masons, Odd Fellows, benevolent associations, schools, colleges, banks, corporations, have all joined in aiding this project; and it will truly be a national work, and worthy of the American people.



THE WASHINGTON NATIONAL MONUMENT, AT WASHINGTON CITY.

MADEMOISELLE VANDERMEERSCH.

THIS young lady has come to this country with an exhibition of a very singular and unique character, which has already received the patronage and the express approbation of some of the chief nobility and leaders of fashion. She has applied herself from an early age to the training of birds; and the result is, that she exercises over them an extraordinary power, inducing them to perform feats of a wholly different kind from those which have been done by trained animals before. They are, or at least seem to be, acts of intelligence: we say seem to be, because, after the most careful and minute observation, we have been unable to arrive at even a guess as to the manner in which Mdlle. Vandermeersch communicates with the birds.

The performance is very simple, and wholly distinct from conjuring or any pretence of it. The birds are in a cage with several compartments. In front of the cage is arranged a platform filled with cards, each exactly similar to the other on the side presented to the birds, but bearing various inscriptions on their prefaces, such as the letters of the alphabet, the numerals singly and in combination, the days of the week, month, or year, the months, the seasons, &c. On the bidding of any one of the company, the birds tell the day of the week, month, or year; the seasons; the time by any one's watch; or they will spell any word indicated, provided it do not contain any one letter twice over. All these things are done with the most perfect precision, and there is no apparent collusion. Mdlle. Vandermeersch does not touch the birds or the cards, and the little animals hop out of their cages and pick out the cards with their beaks, seemingly with a very serious effort at recollection and calculation.

The exhibition excites admiration and surprise wherever it is seen. At present it is confined to the parties of the nobility and gentry; but we had an opportunity of seeing it, on Wednesday last, at the residence of Mdlle. Vandermeersch, No. 2, Baker-street, Portman-square. It has been witnessed by the Duchess of Sutherland, the Duke of Wellington, the Marquis and Marchioness of Ely, the Marquis and Marchioness of Londonderry, the Duke and Duchess of Bedford, and many other of the principal nobility. Mdlle. Vandermeersch is a native of Toulouse, and is not more than 17 or 18 years of age—a fact which makes her power over these birds the more remarkable.

MDLLE. EMILIE VANDERMEERSCH.

SOCIALIST SUCCESS IN FRANCE, AND THE PROSPERITY OF THE WORKING CLASSES.—One of the most striking proofs of the effects of the Socialist success is found in the condition of the savings'-banks of Paris. In all the weeks of January and February, confidence prevailed; the artisans and shopkeepers were tolerably well employed: they could save something, and, relying on the Government, they invested their savings. In the second week in March the deposits fell to nearly half the amount of the first week in February, and in the third week of March they declined nearly one-third more. As there was a prospect of the success of those who claim for themselves exclusively the character of the workman's friends, the workman's wages dwindled away, and his savings were lessened. When the workman's friends actually succeeded, those effects were augmented, work was almost suspended, and saving almost ceased—adding to the many proofs afforded by every page of modern history, that none suffer so much by political disturbances and revolutions as those on whose behalf they are said to be made. The usual pretext for them is the distress of the labourers, and in all cases they increase that distress. They suspend productive industry; and, if the capitalist lose his profit, and the landowner his rent, the labourer loses his wages, and becomes a pauper or starves. He may, by the suspension of his industry, cease to benefit others, but he infallibly ruins himself. The politicians who claim to be the friends of workmen, and are continually planning political changes to serve them, are their worst enemies.—*Economist.*

NEGLECTING THE ANTECEDENT.—Some very whimsical instances of this occur continually, especially in the answers of witnesses when given literally as they speak. In a late assault case the prosecutor swore that "the prisoner struck him with a broom on his head till he broke the top of it!" In narrating an accident some time since, it was stated that a poor old woman was run over by a cart *aged sixty*. So in a case of supposed poisoning: "He had something in a blue paper in his hand, and I saw him put his head over the pot, and put it in!" Another swallowing a base coin: "He snatched the half-crown from the boy, which he swallowed," which seems to mean the boy, not the money. An old fellow, who for many years sold combustible matches in London, had the following cry: "Buy a pennyworth of matches of a poor old man made of foreign wood!"—*New York Christmas Bell.*

"HESIONE;"

STATUETTE, BY WILLIAM BOYTON KIRK, A.R.H.A.

"Reges quoque filia monstro
Poscitur æquoreo. Quam dura ad saxa revinctam
Vindicat Alcides." OVID.

THE classical and beautiful figure above represented is from a Daguerréotype, taken from a statuette in marble by a young Irishman, who gives promise of attaining the first eminence in that proud department of art to which he has devoted himself.

The fable of Hesione chained to a rock, to be devoured by a sea-monster, and her subsequent release by Hercules, is familiar to all readers of the Heathen Mythology. The figure tells the story in a simple, graceful, but most effective manner.

Young Kirk is the third son of the late Thomas Kirk, R.H.A., whose numerous works are scattered through every part of Ireland, and several in England. The statue of the late Sir Sydney Smith, in Greenwich Hospital, ordered by Parliament during the administration of Sir Robert Peel, is a telling monument to his ability. The colossal statue of Nelson on the pillar in Sackville-street, Dublin, executed when Kirk was a pupil in the schools of the Royal Dublin Society, speaks also well for his fame.

The anecdote we are now about to relate, and which has never yet met the public eye, is most interesting. When the Right Hon. John Wilson Croker was in Ireland, he was not slow in finding out and encouraging the genius of Kirk. He saw in his *atelier* a charming bust of "Ariadne," one of the first original conceptions of the young sculptor, became the purchaser, and brought it to London. On one occasion, having had the honour of entertaining Sir Robert Peel and others of the *cognoscenti*, this last, really charming from its simplicity and beauty, attracted the attention of all who were in the *salon* in which it was placed. The distinguished host was asked eagerly where he got this "gem of antiquity." The reply was, "It is the production of an Irish stone-cutter." All were credulous, until Mr. Croker said, "Give me an order, and I will have as many as you like executed for fifty pounds each." Sir Robert Peel, never lost sight of the artist until he had obtained for him the commission

HESIONE.

(Continued from page 32.)

for the national tribute to the memory of one of her greatest Admirals—Sir Sidney Smith.

The subject of the present notice is scarcely out of his minority; and in his sculpture gallery will be found a statue of her most gracious Majesty, executed during her stay in Dublin. Here, too, is the statue of "Iris ascending," which was reduced by the artist for the Art-Union of London, cast in bronze, and distributed as prizes to the subscribers; besides a miniature group from the "Midsummer Night's Dream," representing *Titania*, *Bottom*, and fairies. An engraving from the latter was recently published in the "Amateur." The group of "Lear and Cordelia" is familiar to all visitors of the Exhibition in 1848. Mr. Kirk has recently finished a colossal statue of Justice, which stands on the apex of the pyramid in front of the New Court-house of Belfast.

STATUETTE OF "HESIONE," BY WILLIAM BOYTON KIRK, A.R.H.A.

This work has won the warmest commendations from the cold and severe critics of the Athens of Ireland.

The work upon which he is now engaged is a group, life size, entitled "The Enchantress." A youth is seated listlessly on

"a bank
Whereon the wild thyme grows,"

holding a Pandean pipe in his hands; while a lovely nymph with flowing locks gracefully reclines on his shoulder, with one hand rested upon a tambourine, singing to the air her lover had been playing; while he with breathless attention catches the soft syllables as they are warbled forth. The head and face of the female, from its perfect *abandon*, seem to utter the sounds which entrance her lover. It is, indeed, a piece of that pure nature such as can alone make the marble live. This group is only in clay, and, when transferred to the Carrara, is intended for the Great National Exhibition of 1851.

HOLD OF THE BARQUE "ELEANOR."—SUPPLY OF STOCK BY THE CAPE OF GOOD HOPE TO THE MAURITIUS.

(*From a Correspondent.*)

June 13th, 1850.

I SEND you a Sketch, taken in rather an uncommon situation—namely, the hold of the barque *Eleanor*, of London, on a voyage, with stock from Simon's Bay, Cape of Good Hope, to the Mauritius—illustrating the trade now carried on to a very considerable extent between the ports of the colony of the Cape and Port Louis, Isle of France.

The voyage, during which the Sketch was taken, was more than ordinarily successful; not a single sheep or goat, out of 200 of the former and 40 of the latter, being lost by death from any of the causes which usually conduce to such a result. Since the measures of Ranavalona, Queen of Madagascar, have closed the ports of that island against the whites, the export of cattle and sheep from the Cape has increased to a very considerable amount. With fair winds and good weather, the passage from Table or Simon's Bay averages about twenty-five days; from Algoa Bay and Natal, of course, somewhat less. This being but a short period, and the price given for sheep and oxen in the Mauritius being high, when compared with the cost price at the Cape, induces considerable speculation. As an instance, I give a venture in which, with another party, I was personally engaged.

We took on board the *Eleanor* in Simon's Bay 200 sheep and 40 goats, for which 7s. 6d was paid per head cost price; the freight was 8s. for each; and we were at other charges for oat-hay (of which we took a good deal), bran and oats in sufficient quantities, and about 60 barrels of water. Our passage took 26 days, during which we had some very rough weather and ten days' continuance of strong head-winds; but, from the precautions taken to pen the sheep in parties of twenties and thirties only (which not only prevented their jamming and suffocating one another, but also hindered them from being thrown in a mass to leeward as the ship rolled), we did not meet with any casualty—a result which amply repaid us for any extra trouble that we took at the beginning.

In the Sketch, I have shown the starboard side of the *Eleanor's* hold, as taken at sea, with the hurdles exactly as placed, and a gangway running fore and aft, interrupted only for about a yard by the chain-locker. The lee side, though not shown in the Sketch, was exactly similar.

Upon our arrival at Port Louis, the sheep sold for 28s., and the goats for £2 each.

I send you also a Sketch of a tree very plentifully scattered over the country in a quarter daily becoming of more interest and importance—*i. e.* Port Natal. The plant is the Chandelier Euphorbia (*Euphorbia grandidens*), which has a strikingly foreign appearance, and adds a picturesque effect to the surrounding scenery, mingling to advantage its angular, spinous, upright stems with the more beautiful foliage of the *Erythrina Caffra* (Kaffir coral-tree), dotted over with its long spikes of large crimson, pea-like flowers—the acacias, and the graceful date-trees, a dwarf species of which is very plentiful, as also immense sized specimens of the scarlet geranium. It is in Africa alone (I have been told by a clever German naturalist, resident at Port Natal) than any species of cactus attains to the growth of a tree; and it is with the acrid juice of these (readily discharged upon incision) that the wild Bushmen poison the barb of their small but deadly arrows. By the side of the tree I have placed another species of euphorbia, with thick fleshy stems of large size, of which there are several kinds which the South African Dutch, or Boers, are accustomed to place *en masse* under the name of *mase doorn* (nasty thorn), which is surely no misnomer, as many a good jacket of mine, nearly torn to pieces in making a way through the bush, has testified. The beauty and luxuriance of the vegetation around Port Natal is indeed very great.

HOLD OF THE BARQUE "ELEANOR," ON A VOYAGE WITH STOCK FROM THE CAPE TO THE MAURITIUS.

PUNS are, I believe, the wit of words. They are exactly the same to words which wit is to ideas, and consist in the sudden discovery of relations in language. A pun, to be perfect in its kind, should contain two distinct meanings—the one common and obvious, the other more remote; and in the notice which the mind takes of the relation between these two sets of words, and in the surprise which that relation excites, the pleasure of a pun consists. Miss Hamilton, in her book on Education, mentions the instance of a boy so very neglectful that he could never be brought to read the word *patriarchs*; but whenever he met with it he always pronounced it *partridges*. A friend of the writer observed to her that it could hardly be considered as a mere piece of negligence, for it appeared to him that the boy, in calling them partridges, was *making game* of the patriarchs. Now here are two distinct meanings contained in the same phrase: for to make game of the patriarchs is to laugh at them; or to make game of them is, by a very extravagant and laughable sort of ignorance of words, to rank them among pheasants, partridges, and other such delicacies, which the law takes under its protection, and calls *game*: and the whole pleasure derived from this pun consists in the sudden discovery that two such different meanings are referable to one form of expression. I have very little to say about puns; they are in very bad repute, and so they *ought* to be. The wit of language is so miserably inferior to the wit of ideas, that it is very deservedly driven out of good company. Sometimes, indeed, a pun makes its appearance which seems for a moment to redeem its species; but we must not be deceived by them: it is a radically bad race of wit. By unremitting persecution, it has been at last got under, and driven into cloisters—from whence it must never again be suffered to emerge into the light of the world.—*Rev. Sydney Smith.*

THE CHANDELIER EUPHORBIA.

OCTAGON VILLA, ANTIGUA.

THIS neat specimen of house-building in Antigua is the property and country residence of Andrew Coltart, Esq. It is situated one mile from St. John's, on Gray's Hill, at an elevation of about 800 feet above the level of the sea, and commands a beautiful view of the city and harbour. It has eight sides, as its name implies; and, being nearly surrounded with jalousie windows, it admits the refreshing sea breeze. The dome at the top is roofed with galvanised corrugated iron, and gives a pleasing effect to the structure.

OCTAGON VILLA, ANTIGUA.

ILLUSTRATED LITERATURE.

INSTINCT AND REASON. By ALFRED SMEE, F.R.S.—Reeve, King William-street.

It is our purpose in the present article to give a short account of this contribution to literature, which has lately appeared, inasmuch as the subject cannot fail to interest both the old and young of various classes of the community. Mr. Smee opens the work with an enunciation of its object. "A man can hardly journey through the path of life without pausing to consider in what respect he differs from a dog, a daisy, a common stone, or a piece of mechanism like a steam-engine." Keeping in view this opening paragraph, he considers minutely the various properties of these several bodies. The great difference between animals and plants he maintains to exist in the presence of the nervous system; and "whenever the dog or any other animal sees, hears, or remembers, he is properly said to evince mental action, and mind is thus the term we assign to the action of the brain and nervous system."

In comparing the dog and other animated creatures with man, Mr. Smee examines the relative excellence of the organs of sensation; and whilst he illustrates every assertion by an anecdote, he shows that there is an exquisite adaptation of those organs to the wants. Speaking of the vision of birds, he says that—"If they had not the power of adjustment, they would not be enabled to settle with precision from a great height upon any definite object, but they would dash against masses of matter, and be destroyed. With respect to clear glass, birds require some experience, as they are not aware that it is a solid body, and will fly against the windows with such force as to pass out or enter through them." "The parlour of the Bank of England is a most beautiful room, from which emanate those edicts of the directors, which are, in times of distress, as terrible and fearful to speculators of the mercantile community as the bulls of the Pope are to believers in the potency of the holiness The windows of this room are double, to exclude sound and to preserve the temperature of the room. One day, great was the astonishment of the gentlemen assembled, to observe a hen pheasant dash completely through the two panes of glass, and alight upon the carpet—a little shaken by the concussion, but not killed. I saw the bird the same afternoon, and she seemed to be but little the worse for the damage which she received in the course of her unceremonious intrusion."

Our author states that all sensations produce either pleasure or pain, and demonstrates the necessity of the latter state. "It has been asked by some men why pain has been allowed; but, if we interrogate nature, we find that pain is necessary for our preservation in the present scheme of the construction of the universe." Without pain, "he would not be able to tell whether he sat upon a red-hot iron plate or upon his chair," and thus would run the chance of being destroyed. In cases of insensibility, where there is no pain, the result actually happens. I remember a man who fell during a fit in the boiler room of a steam-engine. His comrades, anxious to assist him, placed him upon the top of the boiler. The man did not feel the effect of the heat, and a most dangerous wound resulted."

From the consideration of pleasure and pain, Mr. Smee passes to the consideration of memory. "The impressions in man, the dog, and in all other animals, are not transient; they are carried to the brain, where they are registered, and may rise again to produce or to modify an action at any future period." As an example of memory even in wasps, Mr. Smee states that, "after I had utterly destroyed a whole horde and filled up the hole, I watched the next morning to see how many stragglers were from home, and generally some half dozen would visit the spot. These stragglers would exhibit the greatest perplexity, and would alight exactly where the hole existed before my operations were conducted. They would then crawl about rapidly for a few minutes, take a short fly round and reconnoitre, then settle upon precisely the same place. Some of these unfortunates would continue to search in vain for the hole for several days, after which I have generally lost sight of them altogether."

Having shown that all animals evince memory, and are the subjects of pleasure and pain, Mr. Smee details instances of reason where man and animals are equal, and shows that all have the faculty of judgment and the capacity to act from the experience of former ideas. "I have seen instances in which the dog and his master have been actuated by the same idea. Two boys were very fond of taking a dog to bed with them, although it was strictly forbidden for them to do so. The mamma was determined to put a stop to this matter, and at night into the room and turned the dog out, when he was compelled to sneak down stairs, with his tail between his legs. On the next night, however, the boys put the dog into one of the drawers, and shut them up; so that when the mamma came no dog was found, and the boys afterwards took him to bed. The dog seemed fully to appreciate the boys' movements, and used perfectly to fall in with their plans."

But, although up to a certain point animals are equal to men, yet there are powers of mind by which a human being incomparably surpasses the other members of creation. Upon this subject Mr. Smee has a very distinct view, in which he shows that man, and man alone, can act upon the knowledge of chemical affinity, light, electricity, sound, &c.; and he exemplifies the effect of the application of this knowledge for the benefit of mankind mostly by examples of a character but little known; and at the conclusion remarks that "we have now had abundant examples of the facility which man possesses of learning the properties of matter, and of arranging this knowledge into general laws, to be afterwards employed for his amusement or advantage. Upon a close investigation of the faculties of animals, we find that no other living creature but man has the capacity to obtain this result. By virtue of a knowledge of the laws of nature, we find that man has dominion over the fish of the sea, and over all the earth, and over every creeping thing which creepeth upon the earth." As one of the examples in this chapter, we may quote the following:—"As a general principle, everything placed in the air has a portion adherent to itself, and upon this account resists wetting by water. Now, before the Bank notes are printed, it is necessary that the paper should be damped. To damp 10,000 pieces of paper every day would labour was required, and the late Mr. Oldham contrived a pretty apparatus to remedy the evil. The paper is placed in the receiver of an air-pump, and the air is then pumped out. When the air is removed the water is allowed to rise, and thus it thoroughly wets the paper. The wetted paper is then passed though rollers, to expel the surplus water, when it is ready to be printed for the Bank purposes."

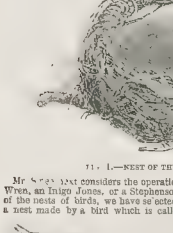

FIG. 1.—NEST OF THE EUPLECTES LAVICEPS.

Mr. Smee next considers the operations of instinct "works of which a Sir C. Wren, an Inigo Jones, or a Stephenson might justly be proud." Amongst many of the nests of birds, we have selected the following. "I have lately purchased a nest made by a bird which is called the *Euplectes flaviceps*. It is so like a basket, that, curiously enough, it has a handle to it like the basket known by the name of a cobble. It is composed, not of twigs, but of a coarse grass, and the handle is so interwoven with the whole mass as to cause no wonder at its construction. I cannot conceive for what purpose this handle can be made; but not the least curious part of the structure is the finish which is given to the handle by grass bound round and round it." (Fig. 1.)

Again:—"Remarkable as the nest of the [illegible] is, it by no means equals the [illegible] the *Ploceus penduli*— which I possess. It is suspended from a bough like that of the Oriole, but the upper part is not supported by so slender a pedicle, but has a more extensive support (Fig. 2.) Like the nest of the Oriole, the aperture is at the bottom, but a long neck, a foot long, depends from the true nest, and forms a passage through which the bird must pass on visiting or leaving its young. This remarkable contrivance is, no doubt, [illegible] to prevent snakes or other animals from entering its dwelling." There is another class of birds which are truly curious, inasmuch as they literally sew their nests to the leaves of trees. I have two nests of the *Ducicus* [illegible] bird, which literally has pierced the leaves with regular holes, and then, with a little wool, has made an in-and-out stitch, precisely similar to that used by man." (Fig. 3.)

Of the instinctive operations of insects Mr. Smee has given very beautiful examples. The material of which the nests of wasps are made he has divided into paper, card, cardboard, pasteboard, and *papier maché*. As a beautiful specimen of paper, he has figured the nest of the *Vespa holsatica*, which is common in the north of England. Of the hornet's nest he says that "the cells have their aperture passed downward, like those of the wasp before mentioned, but the entire structure is composed of paper of a coarser kind. The hornet makes its paper of wood which is partially decayed. Last summer we had a garden-seat which was in that condition, and the creatures used to excavate it for their purposes. I was much interested to observe how they excavated the wood to the very verge of the outer coat, leaving it as thin in that situation as a piece of paper. (Fig. 4.) In foreign countries very remarkable paper nests are made upon the leaves of trees. One made by the *Polistes Dombleayii* (Fig. 5), as large as a pint bottle, is very curious; so are also the beautiful structures of the *Polistes Smeei* (Fig. 6). Of a *papier-maché* nest, a remarkable example is to be found in one imported into this country by Mr. W. Hawkins. "It is as large as a three or four gallon bottle, and is suspended by a very strong pedicle to a bough. Its exterior is rough, and covered with a series of nodules or prominences, which are supposed to protect the nest from the jacuars, who, desiring to obtain the honey, jump at it; but, when their noses come in contact with the knobs, are frightened, and retire." (Fig. 7.) "In all these cases, the wasps display organs directly formated to them by Providence, and construct their habitations from external material, according to some definite plan—always the same in the same species. When circumstances interfere with the plan, still the general design is maintained, which is shewn in a nest belonging to Mr. Bowerbank (fig. 8). In this case, after the nest had proceeded to a certain extent, the bough bent, and the creatures proceeded with their cells, so that they were parallel with the earth. Instinct is not only shewn in the more elaborate designs, but even in the mere position of the egg, by snails (fig. 9), as in the case of the *Bulimus Mudorensis*, the eggs of which are covered with a hard covering like the egg of a bird. "In all these instances the animals are only enabled to carry out a certain plan, in fact to execute a design given to them by Providence. As far as the design is concerned, it is as perfect as that of any other of Nature's works, and, there fore, man may well marvel at their excellence." Passing from instincts Mr. Smee considers the intuitions of man, such as the ideas of the Deity, of Heaven, of Hell, of Good and Evil, which he considers to be inherent in us. The comparison of the power to use words between men and animals shows a wide difference.

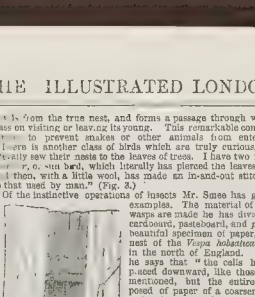

FIG. 4.—NEST OF THE HORNET (VESPA CRABRO).

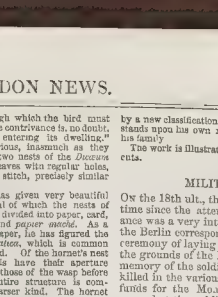

FIG. 5.—NEST OF THE POLISTES DOUBLEDAYII.

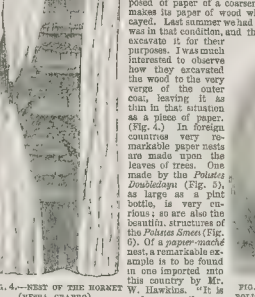

FIG. 6.—NEST OF THE POLISTES [illegible].

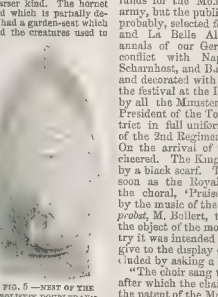

FIG. 7.—NEST OF MYRAETRA [illegible].

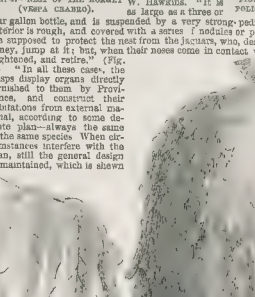

FIG. 8.—NEST, WHICH CALLS IN TWO AXES.

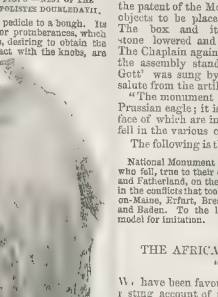

FIG. 9.—NEST OF SNAIL (BULIMUS MUDORENSIS).

The theory of Instinct and Reason which Mr. Smee propounds, is based upon his experiments on Animal Electricity. The chapter contains figures of the fibrous structure of the brain, also figures of the electro-biological arrangement. Mr. Smee has succeeded, by using an injection of carm. d. in forming the most exquisite preparations of the blood-vessels of the brain and spinal chord. From these objects the microscope has shown that the grey matter is intensely vascular, and that the white matter, or fibrous part, has but a limited supply of blood. We have figured a small portion of the cerebellum of a cat, though the figure is quite inadequate to convey an idea of the beauty of the real specimen (Fig. 10). Speaking of his theory generally, Mr. Smee says, "I have full confidence that when this theory, from the accumulated wisdom of other philosophers, shall be amended, enlarged, and perfected, it will be of great importance to mankind, by tending to reduce mind and mental operations to the certainty of mathematical demonstration. Of the relation of this theory to faith, it states that "These two causes, although opposite, cannot be contradictory; and, in the progress of human knowledge, like two roads to the same spot, they appear, for a time, to lead to a different end; yet the believer in true religion need never fear that reason can shake his faith, nor need the disciple of true science ever fear that reason can interfere with the exercise of the faculties of the mind which it has pleased Providence to afford to man." The chapter on perverted religion is designed to point out the sources of errors, and contains a abundance of curious anecdote.

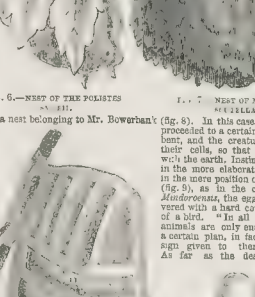

FIG. 10.—BLOODVESSELS OF CEREBELLUM OF CAT.

Mr. Smee considers the relative mental power of the various races, which may be considered as various sections of the one great family of man; and concludes by a new classification founded upon Electro-biology, and under which every man stands upon his own merits, apart from the peculiarities inherent of the rest of his family.

The work is illustrated by ten beautifully-coloured plates and numerous woodcuts.

MILITARY MONUMENT AT BERLIN.

On the 18th ult., the King of Prussia appeared in public for the first time since the attempt on his life. The occasion of this re-appearance was a very interesting one, and is thus minutely described by the Berlin correspondent of the *Times*:—"It had been fixed for the ceremony of laying the first stone of the Monument to be erected in the grounds of the Military Hospital (the Prussian Invalides), to the memory of the soldiers and officers of the army of Prussia who were killed in the various revolutionary conflicts of 1848 and 1849. The funds for the Monument have been raised by subscription in the army, but the public has also contributed freely. The above day was, probably selected for the ceremony as the anniversary of Waterloo and La Belle Alliance, marked as memorable in the military annals of our German allies in the last campaign of the great conflict with Napoleon. As usual, the statues of Blucher, Scharnhost, and Bulow, in the Place of the Opera, were garlanded and decorated with flowers. But the great celebration of the day was the festival at the Invalides; it was attended by the King and Queen, by all the Ministers, by the Municipality, with the Burgomaster and President of the Town-Council, and all the general officers of the district in full uniform. The choristers of the Cathedral and the band of the 2nd Regiment of Guards executed appropriate pieces of music. On the arrival of the King and Queen, their Majesties were loudly cheered. The King wore a general's uniform, his right arm supported by a black scarf. The Prince and Princess Charles were present. As soon as the Royal party had taken their places, the choir sang the chorale 'Praise and Honour to the Highest,' accompanied by the music of the military band. The Military Chaplain, or *Feldprobst*, M. Bollert, then delivered an address, in which he described the object of the monument, the zeal and devotion for King and country it was intended to commemorate, and the encouragement it would give to the display of the same virtues hereafter. The address concluded by asking a blessing on the work.

"The choir sang the psalm from Mendelssohn's oratorio of 'Paul;' after which the chairman of the committee, Lieutenant Harkort, read the patent of the Monument, and a description of the papers and other objects to be placed under the foundation-stone, in a brass box. The box and its contents were then deposited, and the stone lowered and fixed in its place, with the usual ceremony. The Chaplain again asked a blessing on the work so commenced, all the assembly standing uncovered. The hymn 'Nun danket alle Gott' was sung by all present, and the proceedings closed with a salute from the artillery.

"The monument consists of a simple pillar, surmounted by a large Prussian eagle; it is surrounded by a wall or inclosure, on the inside face of which are inscribed the names of the officers and soldiers who fell in the various conflicts.

The following is the inscription to be placed upon the Monument:—

National Monument to the memory of the Brothers and Companions in Arms who fell, true to their duty, in the cause of Law and Order and for their King and Fatherland, on the 18th and 19th of March, 1848, in Berlin, and afterwards, in the conflicts that took place in Posen, Schleswig-Holstein, Mayence Frankfort-on-Maine, Erfurt, Breslau, Dresden, Iserlohn, Elberfeld, Dusseldorf, the Pfalz, and Baden. To the living generation an illustrious example; to posterity, a model for imitation.

THE AFRICAN SLAVE-TRADE.—CAPTURE OF THE "ANNE D. RICHARDSON."

We have been favoured by a Correspondent with the following interesting account of the recent capture of the *Anne D. Richardson* by H. M. steam-frigate *Pluto*.

"On the morning of the 14th of February, about 6h. 30m. A.M., a sail was seen from the deck, but owing to a dense fog she could not be made out. We immediately got steam up, and proceeded in chase. About seven o'clock she was made out to be a large barque, standing along the land on the starboard tack. On approaching her she did not hoist any colours; although ours had been up from the time we first sighted her. As we passed under her stern, the Captain was ordered to hoist her colours, which he did, viz. America. On being requested to heave to, he refused, saying he could not afford to lose time. On his again being requested to heave to, he did so. The Captain of the *Pluto* then went on board, and asked for his papers, which he produced, with the exception of the manifest of his cargo. On closely examining his papers, the Captain observed that two signatures, which should be the same hand, were signed by different hands; this immediately excited suspicion. (It should here be explained that the whole of the vessel's sails were made of light cotton canvass, and of such a size, that no legal trader could afford to carry a sufficient number of men to work them.) The Captain stated his doubts, and pointed out the signatures, which not being accounted for, he returned on board; and, on referring to the officers and ship's company, he decided upon detaining her on suspicion; and this he did by sending Mr. Shewell, with a party of men, to take charge, and of whom the Captain of the barque inquired what was to be done with his vessel; the reply was, that he would be sent to an American man-of war, unless he opened his hatches and proved he was an honest trader. The main hatchway was then opened, and, on our men going below, they found the slave deck, and a Brazilian crew, 18 in number, concealed there. The Captain then hauled his colours down, and threw them overboard. We took him in tow, and brought him to an anchor off Ambrix; but he protested against the whole proceedings, stating he was a lawful trader, and should defend his vessel; still, on our preparing to send him away the following morning, he withdrew his protest and gave certificates stating that he did not claim the protection of any nation, and did not wish to defend his vessel. We then landed him with the passengers and crew, at their own request, and sent the barque to St. Helena on the following morning."

CAPTURE OF THE BRAZILIAN STEAM-BRIG "PACQUETE DE SANTOS," LATE "PROVIDENCIA."

The recent capture of this vessel has excited considerable interest, from her notoriety as a most fortunate slaver, known to have made several voyages from the Coast of Africa to the Brazils, conveying from 1000 to 1500 slaves each trip. On one occasion she escaped, with 1500 slaves on board, from her Majesty's sloop *Contest*, after a chase of many hours; and on another, with 1000 slaves on board, from the boats of her Majesty's steam-frigate *Penelope*.

Since July last, this notorious slave-steamer had been under the close *surveillance* of her Majesty's steam-sloops *Hydra* and *Rifleman*. In the above month, she left Rio de Janeiro with complete equipments for a slaving voyage, ostensibly bound to Santos, a port on the coast of South America, but, in reality, to the opposite direction, the coast of Africa. Before she was well clear out of the port at Rio, she was chased by the *Hydra*, but escaped and took refuge in Santos harbour; where, notwithstanding several representations made by the British Vice-Consul, and Commander Skipwith, of the *Hydra*, the more suspicious portion of the slaver's cargo and equipments were allowed to be landed, and afterwards transhipped to a sailing vessel.

In July last, the *Hydra* being under orders for England, her Majesty's steam-sloop *Rifleman* was ordered to remain at Santos, to keep a watch on this noted slaver, which, being thus prevented from leaving the harbour without detection, continued there unemployed for six months. The *Rifleman* having, at length, in December last, left the port, with the view of intercepting the arrival of several vessels expected with slaves from the coast of Africa, the *Pacquete de Santos* made an effort once more to pursue her voyage to the coast of Africa; when, on January 10, the day of her leaving Santos, she was captured by the *Rifleman*. When first discovered, she was standing away from the land; but, on observing the *Rifleman*, she altered her course, and made every effort to escape; a well-directed shot from the *Rifleman*'s long gun, however, astonished the crew of the slaver, and brought her to; she was then boarded and searched by Lieutenant Croton, the commander, and Mr. Beckett, a midshipman, when she was seized, and sent to St. Helena for adjudica-

NEW BOOKS, &c.

This day is published, in one vol., post 8vo, with numerous Illustrations, price 9s. handsomely bound and gilt,

NINEVEH and PERSEPOLIS: an Historical ... of Ancient Assyria and Persia, with an Account of the Recent ... searches in those countries. By W. B. W. VAUX, M.A., of the British Museum.
London: ARTHUR HALL, VIRTUE, and Co., 25, Paternoster-row.

Now ready, and may be had at all Circulating Libraries,

THE SECRETARY: a Novel, in 3 vols. By Lieutenant-Colonel HORT, Author of "The Horse Guards," "The Days when we had Tails on us," "The White Charger," "Penelope Wedgebone," &c.
London: J. and J. A. DARLING, 126, Bishopsgate-street.

Just published, royal 16mo, price 1s 6d, cloth, gilt edges,

MONUMENT AT BERLIN TO THE PRUSSIAN SOLDIERS KILLED IN 1848 AND 1849.

CAPTURE OF THE BRAZILIAN STEAM-BRIG "PACQUETE DE SANTOS."

(*Continued from page 34.*)

tion, and there decreed to be condemned to her Majesty the Queen, for being engaged in the African Slave Trade. She is stated to have belonged to one of the richest slave-ship owners in the Brazils.

This notorious vessel had long eluded the vigilance of the whole of the squadron under the command of that able officer, Commodore Sir Charles Hotham. On one occasion, a boat from the *Penelope* (flag-ship) missed capturing her, just after she had shipped 1200 slaves: at another time, when she had 1500 slaves on board, she stood a twelve hours' chase by her Majesty's ship *Contest*, and escaped by changing her course after dark; but during this chase, the *Providencia's* engines were so hard worked that she lay at Rio de Janeiro until she had been repaired by engineers expressly sent for from Europe. In December last, when captured by the *Rifleman*, the *Providencia* had ventured to sea under a different name and owners, with the pretext that she was intended as a trading vessel between Santos and Rio; but her real character and object were proved by the slave deck being found temporarily nailed up.

The *Anne D. Richardson* is the second vessel which has been lately taken with American colours flying, and an American master and crew on board. The first, *Lucy Anne*, captured by H. M. S. *Rattler*, had on board 537 slaves; when boarded, her hatches were battened down, but the boarding-officer, hearing an extraordinary noise below, insisted on their being opened, when a most horrible scene presented itself: a hot vapour, like smoke, ascended from the human beings crammed into the vessel's hold, and among them was found a Brazilian crew; they were struggling in the agonies of suffocation, for the hatches had only been shut down when the man of war's boat was close alongside. Had it not been for want of air, the slaves would have been kept quiet, and the ship allowed to pass as a legal American trader; but as soon as the Yankee skipper found himself caught, he hauled down his national flag, threw his papers overboard, and would not claim any country—cunning cosmopolite as he was.

The *Anne D. Richardson*, engaged in the same horrible traffic, was captured by the *Pluto*, (Commander Jolliffe), through the incorrectness of the ship's papers, when the master hauled down his colours, rather than be taken to the American Commodore: the search of the ship's hold would at once have proved his guilt, since it contained the usual slave provisions, which the prohibition of the right to search American ships would have defeated our officers in detecting.

There can be no doubt that American vessels, and the protection afforded by their flag, have enabled the Brazilians to import vast numbers of slaves, as well as to baffle the squadrons under the command of Commodores Jones, Hotham, and Fanshaw; but the latter will, doubtless, take active measures, in future, to defeat this Yankee-Brazilian artifice.

CAPTURE OF THE "ANNE D. RICHARDSON" SLAVER, BY H.M. STEAM-FRIGATE "PLUTO."

THE BRAZILIAN STEAM-BRIG "PACQUETE DE SANTOS" CAPTURED BY H.M. STEAM SLOOP "RIFLEMAN."

LONDON: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by WILLIAM LITTLE, 198, Strand, aforesaid.—SATURDAY, July 6, 1850.—SUPPLEMENT.

THE ILLUSTRATED LONDON NEWS

No. 436.—VOL. XVII.] FOR THE WEEK ENDING SATURDAY, JULY 13, 1850. [SIXPENCE.

THE POST-OFFICE QUESTION.

THE House of Commons has virtually rescinded its obnoxious resolution forbidding the transmission of letters and newspapers on Sundays. We could have wished that, in agreeing to a further inquiry into the whole subject, it had agreed to restore the practice which its interference with the question has superseded; but we are, nevertheless, well content, after the significant vote of Tuesday night, to leave the matter in the hands of the House. The investigation which is to be forthwith commenced can have but one result. In the meantime, a few words upon the subject may lead to a clearer comprehension of it than yet prevails in some quarters.

In the first place, the illegality of the recent stoppage of the delivery of letters and newspapers upon the Sunday is universally conceded by the best lawyers. It is a question whether any inhabitant of a provincial town, who could prove pecuniary loss by the non-transmission of a letter upon any Sunday since the change was made, could not recover damages against the Postmaster-General. Indeed, it is evident that a mere resolution of either House of Parliament cannot have the force of law. It is as competent for one House as for the other, to pass a resolution; and quite within the bounds of probability that the two Houses might have different views upon the same subject, and that, while the Commons might order the non-delivery, the House of Lords might order the usual delivery of letters upon the Sunday.

Nor is this the only legal question that might be raised, for, as

BORN, 5TH JULY, 1788.
DIED JULY 2ND, 1850.

THE LATE SIR ROBERT PEEL, BART.

regards the transmission of newspapers, the case is more complicated. When the subject of the newspaper stamp-duty was discussed, in the year 1835, the Government were prepared to abolish the stamp altogether, but it was suggested that if the stamp-duty were reduced from 4d. to 1d., newspapers, in consideration of this smaller charge, should have the privilege of free transmission by post. The duty was, therefore, acquiesced in, not as a perfectly fair or wise charge upon newspapers, but as one that seemed to give satisfaction to all parties in the Legislature, and as the only practicable compromise of the question. But, in the case of the weekly newspapers, the Government, the Post-office, and the House of Commons, urged by the Sabbatarian party, deliberately broke through this bargain, in making the recent disarrangement. The privilege of transmission by post was thus deprived of all its value to the Saturday and Sunday newspapers. Twenty-four hours difference in the age of a newspaper is like twenty-four hours difference in the age of a mackarel. News, like fish, deteriorates by keeping; and yesterday's *Times* or *Morning Chronicle* bears no comparison in value with the *Times* or *Morning Chronicle* of to-day. All the weekly papers were subjected to this deterioration and pecuniary loss by the pertinacious zeal of Lord Ashley and his friends, and the foolish acquiescence of the Ministry, which, however, we are glad to learn they have repented of. In fact, it became a point for the serious consideration of the weekly press, whether the bargain as to the stamp was any longer binding upon them—and whether they would not be legally justified in publishing their papers without troubling the Stamp Offices at all? We do not imagine that this view of the case occurred either to Lord Ashley and his supporters or to the Government; but when the question was the first time decided, by a minority of the House, justice and common sense would have seen so evidently on the side of the newspapers affected by the change that the Government would have had considerable difficulty in maintaining a prosecution against them for any supposed breach of the Stamp Act in this case, if they had determined to try the question. It would not have been politic on the part of the present or any succeeding Government to goad the weekly press to this point, supposing—which is not true—that the Chancellor of the Exchequer had any wish to retain the newspaper stamp duty, either for revenue or as a guarantee for the responsibility and respectability of the press.

But even if it were admitted that the course taken by the Sabbatarians were perfectly legal, both as regards letters and newspapers, and that no questions of justice, legal compact, or revenue were mixed up with it, two other very serious objections to the change would have to be considered. The first is one that appeals strongly to the Sabbatarians themselves. Their object is to diminish Sunday labour. Granting that their object is praiseworthy (and this is a point that no one disputes, for all are agreed that no works should be done on the Sunday, except works of necessity and mercy), we would ask the most rigid Sabbatarians to open their eyes, to view dispassionately the debate on Mr. Locke's motion, and to judge impartially whether the change had produced in "the past, or would be likely to produce in the future, the result anticipated." The pulse of life throbs on the Sunday as on any other day of the week—and to stop works of necessity upon that day is simply impossible. The rigid Sabbatarians might succeed to a certain extent in stopping works of mercy, but the deeds of necessity are beyond the reach of human laws, and would continue to be performed, however stringent or Judaical the outward observance of the day might be made by the law or the custom. This point was well argued by Lord John Russell. In the few weeks that have elapsed since the vexatious disarrangement of the old practice and routine commenced, there has been no diminution of the number of persons employed in the transmission of private letters, parcels, and newspapers; and the advertising columns of the daily and weekly press show that private companies were in rapid and successful course of formation, for transacting the Sunday business which the Post-office had for a time—and only for a time—relinquished. No fair and candid observer of events can fail to admit that such private companies would necessarily employ as large, if not a larger, number of persons than the Post-office; and that, instead of leading to a diminution of labour, the efforts of the rigid Sabbatarians would defeat their own object. Besides, when a question like this is taken up on the broad ground of right or wrong, there is no stopping it. If it be sinful to transmit letters or newspapers on a Sunday, it must be equally sinful to transact other business on that day; and omnibus-drivers, cab-drivers, steam-boat captains and stokers, policemen, coast-guard officers, and domestic servants, from the Bishop's coachman to the tradesman's housemaid, might claim, on the same ground, the protection of Lord Ashley and his too zealous supporters. It is also worthy of remark, in reference to this point, that only one out of the six daily morning newspapers published in London supports the views of the ultra-Sabbatarians, and that this very paper, as a matter of necessity, is compelled to employ its compositors, editors, and contributors on a Sunday evening, or give up its Monday-morning's publication. To render its advocacy of the slightest moral value, the newspaper in question ought immediately to emancipate its compositors, and neither receive nor print news of a Sunday.

But another and a greater question lurks under this question of compulsory Sabbath observance—a question which is dearer to the English people than any other—the question of civil and religious liberty. It is evident, at all events, whatever may be the relative numbers of the friends of the Sabbath and its distinctions from the friends of the Sunday, that the people of Great Britain are not unanimous upon the subject, and that, while one party claim for the day an observance approaching the Judaical for its outward rigidity, another party, strong in Christian feeling, assert that such rigidity and outward formality are as contrary to the humane and genial spirit of the Gospel as to public convenience. If one of these two parties is to coerce the other, what becomes of the religious liberty which we so dearly prize? Whether a majority or a minority of the people be the coercing party, does not signify. There is an end of religious liberty if the power of the state and the penalties of the law are enlisted upon either side. The friends of the Sunday in England neither seek nor desire to use compulsion upon others. They willingly allow any man to refuse to receive letters or to read newspapers, or to ride in an omnibus, or to travel by the rail to visit his dying mother on a Sunday. They would not object if all the Sabbatarians chose to observe the day with a super-Judaical strictness, and would not interfere even if they refrain from lighting fires, cooking victuals, or washing themselves on that day, or thought with the Jews of old that Sabbath-breakers ought to be stoned to death. In their conduct and principles there is no violation of the principle of religious freedom. They seek not in the slightest degree to interfere with the opinions or conscientious feelings of other people, but allow the fullest liberty to all. If a clerk or other person in the employ of the Post-office be aggrieved by having to perform Sunday labour, let him remonstrate or resign, or pay for that day one of the many substitutes that could easily be found. The sacrifice for conscience sake would prove its own reward, and would be no great martyrdom. But, while the friends of the Sunday desire in no degree to interfere with the feelings, observances, or enjoyments of the Sabbatarians, they ask, in the name of religious freedom, for the same forbearance towards them. All they want is to be let alone. The Sunday, take it all in all, is better observed in England than in any other country in Europe—better than in Scotland, where there is so much outward display, and so much inward drunkenness and indecency; and it is not wise for any party, however conscientious and well meaning, to excite discussions such as those which have taken place during the last few weeks. By attempting too much, they may undo a great deal that they may be sorry for. The sooner the subject is allowed to drop, the better; and we trust that the result of the inquiry promised by the House and the Government will lay it finally to rest, and that we shall have no more Sunday persecution from men who are free to please themselves, and whom nobody seeks in any way to coerce or interfere with.

FOREIGN AND COLONIAL NEWS.

FRANCE.

Louis Napoleon, if not a Royal Sovereign, has attained to one of the least agreeable of the distinctions of Royalty in modern times—that of being the intended object of the assassin's murderous aim.

On Saturday afternoon last, about three o'clock, as Colonel Vaudrey drove out of the court-yard of the Elysée, a lad of about seventeen years of age went up to the carriage, placed his hand under his coat, and closely reconnoitred the features of the persons in the carriage. As this had been the second time on which this singular proceeding had occurred, he was arrested, and was found to have on him a pistol, full cocked, and loaded to the muzzle with powder and ball, with which he evidently intended to have assassinated the President of the Republic. His name is George Alfred Walker; he is a compositor, and is described as being a youth of debauched and dissolute habits. Though the name is an English one, Walker is a native of Paris, and the son of a Frenchman, also a compositor, who died of protracted illness on the morning of his son's arrest, leaving a young family in great distress. On the report of the two medical men, who have thoroughly examined Walker, and pronounced him of insane intellect, he has been ordered to the hospital of the Salpêtre.

The French Assembly was thrown into a high state of excitement and confusion on Monday, during the discussion on the Press project, the Minister of Justice, while defending the measure, having designated the Revolution of February as "a veritable catastrophe." No sooner was this emphatic phrase pronounced, than the Mountain broke forth into unconvertable fury, with shouts of "Order, order!" "It is disorderly!" "The Republic has been grossly insulted!" and such like expressions. M. Girardin declared that he would not sit in an Assembly where such an odious sentiment was uttered, and that if the Minister were not called to order, all the Opposition members ought to resign their seats. This opinion, however, received but a very feeble response from the Left, while the Right laughed and jeered, which increased the uproar. The sitting was adjourned in the greatest disorder.

M. Girardin and his party afterwards held a meeting, which was throughout most tumultuous, but the proposition of resigning *en masse* obtained no favour. It was, however, resolved that a protest against the Minister's language be laid formally before the Assembly, which was accordingly done on Tuesday; but the calls for the order of the day were so frequent and so loud, that no further notice was taken of the document in question, and Victor Hugo resumed the debate on the Press law. He condemned the measure as most unjust and tyrannical, and claimed the right of the human mind to unfettered liberty. M. Savoye spoke on the same side, and proposed that no caution money should be paid by the journals, which was lost by 438 to 197.

Ultimately, the Assembly passed the clause establishing the payment of caution money by the journals. The discussion was carried on amidst the greatest uproar, the Montagnards refusing to hear the Minister of Justice, who, as soon as he rose, was met by the most insulting sneers and abusive exclamations.

On Wednesday the debate was resumed by M. Tinguy, who proposed that each leading article should be signed by the writer's name. The Government opposed the amendment, but it was eventually carried. The adoption of this amendment is of much importance, for the Attorney-General will now be obliged to proceed against the author of a libel, instead of against the journal containing it, and the opponents of the Government measure consider this a great triumph.

The Legitimists intended to celebrate St. Henry's day (the 15th inst.) by a banquet, and invitations were sent to several persons of distinction; but the fact having reached the ears of Government, the Prefect of Police has publicly notified that the *fête* will not be allowed to take place.

The electoral lists, drawn up in virtue of the new law, have been published in the mayories. The number of electors for Paris is about 74,000—that is, less by 150,000 than the number of electors for Paris on the lists of March last, according to the old law, which amounted to 224,000. The difference in the provinces will not be so enormous.

The report of the committee on the bill relating to the contributions of France to the great London Exhibition, drawn up by Charles Dupin, recommends the adoption of the credit proposed for this object.

The new paper written in London, called the *Proscrit*, has been seized for an article signed "Ledru Rollin," and addressed to the people.

Gen. Boyer, formerly President of Hayti, died on Tuesday last, in Paris.

BELGIUM.

The *Moniteur Belge* announces that the Prussian Government has given notice of its intention not to continue the treaty between Belgium and Prussia, which was made in 1844, and which expires on the 31st of December next, but which was to have effect for a year after that time, if notice to the contrary was not given six months before by one of the contracting parties.

MALTA.

Accounts from Malta of the 2d instant state that great alarm had been felt by the reappearance of cholera. The seamen of the fleet had been refused permis sion to land, but some of the cases which had occurred on board had proved fatal. Among the troops already had been almost entirely confined to the 44th Regiment, quartered at Florian. The city was generally healthy; but the total number of persons attacked, including on sea and shore, were 82; 60 of which cases had proved fatal.

UNITED STATES.

Our accounts this week from New York mention, on the all-absorbing topic of the abolition of slavery, the greatest probability which existed, that the Compromise Bill, as reported by the committee of the 13th ult., would certainly pass the Senate, and the opinion was gaining ground that it would likewise pass the House of Representatives.

The *Courier and Enquirer* mentions that, from some unaccountable cause, the amount of foreign immigration into New York had experience a sudden and unexpected decrease, not more than one-third the usual number having arrived in the first two weeks of June. Shipments of specie to Europe had commenced in New York. The steamer *America* took 198,855 dollars, principally in specie. About 200,000 dollars, principally in specie, had been engaged for the Havre packets.

The temple of Nauvoo, erected by the Mormons in 1845, but purchased in March, 1849, by the French Icarian community, under Cabet, was totally destroyed by a hurricane on the 27th of May. A new edifice of magnificent dimensions is to be erected in its place.

The grand jury at New Orleans had found true bills against General Lopez, M. Ligne, Governor Quitman, Judge C. Ruckney Smith, of Mis., ex-Governor Henderson, Mr. O'Sullivan, and ten other of the Cuban invaders.

A new and formidable crevasse has broken out in the Mississippi, at the Grand Levee, in the parish of Point Coupée, which threatens the most serious damage to some of the richest and most fertile portions of Louisiana. The first breach took place on the 10th ult, and in two days was found, by measurement, to be 150 yards wide. Every attempt to arrest its progress has been abandoned, and the worst fears, in regard to it, are likely to be realised. Hundreds of plantations must be destroyed, and a tract of country as large as some whole states in the Union completely deluged.

The American prizes taken by the Spanish war-steamers had not been released, as was stated by previous telegraphic despatches from New Orleans. Their trial was still in progress on board the Spanish 74, lying in the port. A strict guard was stationed around the vessel, so as to prevent any communication. The United States Consul, Mr. Campbell, and the Naval Commander, Commodore Randolph, were refused permission to hold any intercourse with the prisoners. The authorities declared that they should be tried by the laws of maritime nations, and, if found guilty, visited with just punishment. Several deaths have occurred amongst the prisoners. The United States vessels of war were lying off the harbour, awaiting further orders.

CALIFORNIA.

There is a fortnight's later news from the gold country. A great fire, supposed to be the work of an incendiary on May 4, had consumed a large portion of the city of San Francsco, damaging property in the value of 1,000,000 dollars. Some estimate the loss at 5,000,000 dollars. The mining operations were reported as being more successful than ever. Business had improved at the capital; but many articles were low in price, in consequence of an over supply. Numbers of emigrants were about to pour into the country by all the routes, and a very prosperous season was confidently anticipated.

IRELAND.

PROSPECTS OF THE IRISH BAR.—At the assizes just ended for the county of Longford, only two barristers, along with the Crown counsel, attended the judges in court. In that county, as well as in Cavan, there was not a single record for trial at the civil side; and in Fermanagh there were but two records, one of which was settled, thus enabling only one record for trial in half of the north-west circuit! Anything like this decay of litigation has not been witnessed for many a year; and the change must be sorely felt by the members of the bar, in common with the attorneys. Several members of both branches of the legal profession have ceased to go circuit.

ENCUMBERED ESTATES.—The petitions for the sale of estates have already run beyond a thousand. Within the week ending the 2nd inst., twenty-six additional petitions were lodged, making the entire number 1008.

THE LAND QUESTION.—The general assembly of the Presbyterian Church have, "by a sweeping majority," adopted at their annual meeting, held in Belfast, a petition to the House of Commons in favour of the tenant-right of Ulster.

The visitors in the Lake district at the present moment are not so numerous as for some years past at this period of the season. At Keswick, the lodgings have hitherto found ample accommodation at the inns, and very few, if any, private lodgings are consequently occupied.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

SUNDAY LABOUR IN THE POST-OFFICE.

Lord HATHERTON presented a petition from the inhabitants of Torquay against the recent Post-office regulation with respect to Sunday deliveries, and praying that their Lordships would take proceedings to procure its reversal. He did not believe that the regulation in question was acceptable to a majority of the people, and he thought such a change ought not to be made except by a separate legislative enactment.

Lord BROUGHAM said that he concurred in the view stated by his noble friend. The Bishop of LONDON expressed his approval of the recent alteration. Some secular inconvenience, he admitted, might be the result, and on this point he did not express any opinion; but, as a Christian, he exulted in the change which had been made. (Hear.)

Lord KINNAIRD and Lord LYTTELTON took the same view.

The Earl of MALMESBURY said that he hoped the Government would not proceed too hastily in dealing with the subject. At present, in the country, a person might be kept in a state of anxiety from Friday to Monday morning, in consequence of not being able to obtain a letter which, during the Sunday, was lying in the neighbouring post-office.

The Bishop of OXFORD advocated the necessity and propriety of a strict observance of rest on the Sabbath. A professional man in Bath or Bristol, for instance, received a letter which he was bound to act at once upon; and, in fact, if he did not do so he might subject himself to an action, and thus he not only worked himself, but set others to work also. He must say that Parliament was bound to protect those who wished to spend the Sabbath aright. (Hear, hear.)

Lord CAMPBELL said that he did not deny the accuracy of the right rev. Prelate's law. If a professional man received a letter on a Sunday, and he at once recognised the familiar names of John Doe and Richard Roe, he would no doubt place it aside, and let it remain unopened and unnoticed until Monday. He had been born and brought up in a country in which the Sabbath was most strictly observed, and he must say that he regretted the present movement, as he thought it would be subversive of the best interests of religion (Hear, hear.)

The Duke of GRAFTON said he must express his thanks to the House of Commons for having agreed to such an address

Lord BROUGHAM said that, on the northern circuit, after three o'clock on Sundays, the bar held consultations, and afterwards enjoyed the hospitality of the Archbishop. (Hear.) The subject then dropped.

BOARD OF HEALTH

On the motion of the Earl of CARLISLE, that the General Board of Health Bill be committed,

The Earl of LONSDALE moved, as an amendment, that the bill be referred to a select committee, to inquire whether certain preliminary forms had been complied with.

On a division, there were—

For Lord Lonsdale's amendment—	
Contents	18
Non-contents	47
Majority against the amendment	—29

The House went into committee on the bill, and agreed to all its clauses.

On the motion of Lord BROUGHAM, the Court of Chancery (Ireland) Bill was read a second time.

FACTORIES BILL.

The Factories Bill was read a second time, on the understanding that the discussion shall be taken in committee, when the Duke of Richmond will move an amendment similar to the one proposed by Lord J. Manners in the House of Commons. The committee was fixed for Monday next.

The Masters' Jurisdiction in Equity Bill and the Removal of Obstructions in the Corn Trade (Scotland) Bill were read a third time and passed.

EXTENSION OF COUNTY COURTS.

Lord BEAUMONT moved the second reading of the County Courts Extension Bill.

Lord BROUGHAM was willing to agree to the second reading, but he gave notice that it was his intention to propose several amendments in committee.

Lord CAMPBELL said, that, finding that the feeling of the country was in favour of the extension of the County Courts, he would not oppose an extension, though he sincerely wished that more time had been given to test the working of the existing act. He, however, felt bound solemnly to warn their Lordships against the danger of extending the jurisdiction of county courts over actions for tort. Should the bill pass in its then shape, he believed that it would lead to great confusion and mischief.

The bill was read a second time.

On the motion of Lord LYTTELTON, the House went into committee on the Benefices in Pluralities Bill, and agreed to its clauses, with amendments.

The Registration of Deeds (Ireland) Bill was read a second time.—Adjourned

HOUSE OF COMMONS.—MONDAY.

The House had an early sitting, at twelve o'clock.

MERCANTILE MARINE BILL

Mr. LABOUCHERE moved the committal of the Mercantile Marine Bill

Mr. MAGAN very opposed the bill, and moved, as an amendment, that it be committed that day six months.

Mr. CLAY seconded the amendment.

Sir W. CLAY spoke in favour of the bill, which he considered would operate beneficially for the shipping interests.

Lord J. MANNERS thought it advisable to refer the bill to a select committee.

Mr. LABOUCHERE entreated the House neither to agree to the amendment nor to the proposition to refer the bill to a select committee. In his opinion, the adoption of the latter course would be tantamount to consigning the measure to the tomb of all the Capulets.

Mr. HUME admitted that the object of the bill was such as nobody could oppose; but he did not think it should be hurried forward without full consideration; and, therefore, he thought that, in order to render it as perfect as possible, some delay was necessary.

Mr. CARDWELL and Mr. M'GREGOR supported the bill.

Mr. MOFFATT then withdrew his amendment, and Lord J. MANNERS moved, as an amendment to the original motion, that the bill be referred to a select committee.

The House having divided, there were—

For going into committee	120
Against it	34
Majority against the amendment ..	—86

The House went into committee on the bill, but no progress was made. The chairman obtained leave to sit again next day at twelve o'clock.

The House then adjourned, and re-assembled at five o'clock.

Mr. HAWES stated, in reply to Colonel Dunne, that the Lord High Commissioner to the Ionian Islands had prorogued the Assembly, in the hope that such a step might induce the adoption of more moderate measures, and not because the Assembly had appointed a commission to inquire into the proceedings of the Lord High Commissioner.

ECCLESIASTICAL COMMISSION.

The House went into committee on the Ecclesiastical Commission Bill.

On the first clause.

Mr. HORSMAN moved an amendment, the intention of which was to place the whole administration and financial management of the commission under the control of the three paid and responsible commissioners. The hon member said that his object was to save the Bishops from being burdened with business which they could not attend to, and to relieve them from the necessity of proceeding in a course of secularisation calculated to interfere with the spiritual duties of the Bishops, and to degrade them in the estimation of the public

Lord J. RUSSELL opposed the amendment, as directly adverse to the report of the committee of the House of which the hon. gentleman himself was a member. He considered that two commissioners, one nominated by the Crown, and the other by the Archbishop of Canterbury, would adequately represent the highest interests of the Church and State, and their authority would have the greatest weight

Sir R. INGLIS, Sir B. HALL, Mr. GLADSTONE, and other hon. members addressed the committee, after which a division took place—

For Mr. Horsman's amendment	22
Against it	60
Majority against the amendment ..	—38

Clauses up to 15 were agreed to, with amendments, after much discussion and two divisions. Progress was then reported.

The Incorporated Boroughs Contributions (No. 2) Bill, the Population Bill, and the Population (Ireland) Bill passed through committee.

On the motion by Lord NAAS to go into committee on the Home-made Spirits in Bond Bill,

The CHANCELLOR of the EXCHEQUER moved as an amendment that the bill be committed that day three months, and the House divided—

For going into committee	120
Against it	121
Majority against the motion	—1

The bill was consequently lost.

Lord NAAS thereupon gave notice that he would, early next session, move for a committee to consider the subject.—Adjourned at a quarter to two o'clock

HOUSE OF LORDS.—TUESDAY.

HIS LATE ROYAL HIGHNESS THE DUKE OF CAMBRIDGE

The Marquis of LORDONDERRY passed a graceful and well-merited eulogium on his late Royal Highness the Duke of Cambridge, and proposed the adjournment of the House, as a slight mark of respect to his memory

The Marquis of LANSDOWNE opposed the motion for adjournment, because such a course was not usual, because the House of Commons had not done so, and because, by adjourning, their Lordships would be deprived of the opportunity of addressing her Majesty and the Duchess of Cambridge on this melancholy event which their Lordships and the country so deeply deplored.

The Marquis of LONDONDERRY withdrew his motion for adjournment in deference to the general opinion of the House; and, on the motion of the Marquis of Lansdowne, an address of condolence to her Majesty was voted *nem. con.*; likewise a message of condolence to the Duchess of Cambridge, the letter to be presented by the Marquis of Normanby and the Earl of Powis.

The report of the Parliamentary Voters, &c. Bill was received, and the bill, as amended, was ordered to be read a third time.

The Commons amendments to the Drainage and Improvement of Land Advances Bill were agreed to.

The report of the Benefices in Pluralities Bill was received.

The Elections (Ireland) Bill was read a second time
The Metropolitan Interments Bill passed through committee.—Adjourned.

HOUSE OF COMMONS—TUESDAY.

The House had an early sitting.
The clauses of the Mercantile Marine Bill up to 23 were considered in committee, and agreed to
Progress was then reported, and the chairman obtained leave to sit again at 12 o'clock on Thursday.
At the evening sitting,

SUNDAY POSTAL LABOUR.

An immense number of petitions were presented, praying for the rescinding of the new regulations stopping the delivery of mails on the Sunday, and several in favour of the existing rules.

NEW WRIT.

On the motion of Mr. P. BUTLER, a new writ was ordered to be issued for the county Mayo, in the room of Mr. Dillon Browne, deceased.

HIS LATE ROYAL HIGHNESS THE DUKE OF CAMBRIDGE

Lord J. RUSSELL then moved an address of condolence to her Majesty, on the loss her Majesty and the country have sustained by the death of His late Royal Highness the Duke of Cambridge. The noble Lord paid a fitting tribute to the numerous virtues, the universal benevolence, the kindness in political and private life that distinguished the illustrious prince who has been removed from the earthly sphere of his usefulness, his patriotism, and his charity.
The Marquis of GRANBY seconded the motion in a few remarks expressive of his deep sorrow for the loss of so kind a friend, so exemplary a prince, and so good a man.
The address was agreed to unanimously
Lord J. RUSSELL then moved an address of condolence to the Duchess of Cambridge, which was seconded by Mr. DISRAELI in a few sentences, and voted *nem. con.*

THE COUNTY FRANCHISE.

Mr. LOCKE KING moved for leave to bring in a bill to make the franchise in the counties of England and Wales the same as that in boroughs, by giving the right of voting in all occupiers of tenements of the annual value of £10.
Mr. HUME seconded the motion.
Sir DE LACY EVANS moved an amendment, the purport of which was to give the franchise to every man who paid income tax, or who was assessed to the poor-rate in respect to annual value, with a twelvemonth's residence; also to those who had deposited a certain amount in the savings-banks. The hon. and gallant member having expounded and enforced his proposition, withdrew it, in order to allow a fair division to be taken on the original motion.
Mr. ALCOCK, Mr. G. THOMPSON, and Lord DUDLEY STUART supported the motion.
Mr. H. DRUMMOND could not avoid voting for the motion, because he had always heretofore supported such a proposition; but he repudiated the arguments used by those who urged it on the House.
Mr NEWDEGATE opposed the motion
Lord J. RUSSELL, without going into the particular merits of either Mr. Locke King's or Sir De Lacy Evans's proposition, could not assent to the introduction of a bill of so much importance in the middle of July. With respect to Parliamentary reform generally, he had nothing to retract from or add to what he had stated on former occasions.
Mr. BRIGHT spoke in favour of the motion.
After some observations from Mr. GRATTAN, relative to the amendments made by the House of Lords in the Parliamentary Voters (Ireland) Bill,
Mr DISRAELI called on hon. gentlemen opposite, the parliamentary reformers, to declare candidly what they meant by their several proposals. As matter they considered the ancient constitution of the country unendurable, and were prepared to go the length of a revolution by giving, as they phrased it, every "full-grown man" a vote. He (Mr. Disraeli) was for a system that would preserve in the country a free and effective Government, and, therefore, he was for making the franchise a privilege open to the virtues and civic duties of our citizens. He was for raising men to the franchise, and not for lowering the franchise to the men. The ordinary tactics he might leave the Government and the Liberal party their usual "supporters" to fight this battle out between themselves; but he would not take that course, because he held it to be a principle to uphold by his vote against the motion, which would make the country great. Therefore he should vote against the motion, assuring those but by bit reformers—those vampers and veneerers of the constitution—that if they established their pet full grown franchise to-morrow, they would not again be returned to misrepresent the people the day after.
Sir B. HALL charged Mr Disraeli with having been formerly a reformer, with having gone down to High Wycombe under the patronage of Mr. Hume and Mr. Grote, and with having addressed the electors of Marylebone as a Liberal. The hon. baronet said he could produce the address, written by Mr. Disraeli in a chandler's shop, in Crawford-street, Bryanstone square.
Mr. DISRAELI declared that he was ready to defend all the opinions he had ever deliberately given
The House having divided, there were

For Mr. Locke King's motion	100
Against it	159
Majority against the motion	—59

THE COFFEE TRADE.

Mr. ANSTEY moved for a select committee to inquire into the declining state of the colonial and foreign trade in coffee, and of the public revenue thence derived, and whether such decline is attributable to any frauds practised by the sellers of coffee or others, and as to the best means of preventing such frauds.
The CHANCELLOR of the EXCHEQUER opposed the motion. There was no difference of opinion upon the facts, and, therefore, a committee of inquiry would be useless. To mother of the two remedies suggested by the hon. and learned gentleman, either to take off the duty on chicory or to institute rigorous regulations to prevent the adulteration of coffee, could he (the Chancellor of the Exchequer) consent.
Major BLACKALL, Mr. M. GIBSON, and Sir J. TYRRELL made a few remarks.
The House then divided.

For the motion	60
Against it	205
Majority against the motion	—145

SUNDAY LABOUR IN THE POST-OFFICE.

Mr. LOCKE rose, a few minutes after eleven o'clock, to submit his motion relative to the new regulations in the Post-office, but opposition was raised to his proceeding at that late hour. After a turbulent scene, the hon. member was allowed to go on. He moved—
"That, whilst this House acknowledges with satisfaction the diminution in the amount of Sunday labour effected by the recent arrangements in the Post-office, it cannot but be sensible of the great public inconvenience which has arisen from the total cessation of any delivery or collection of letters on Sundays, and that an humble address be therefore presented to her Majesty, praying that she will be graciously pleased to cause an inquiry to be made whether the amount of Sunday labour might not be reduced without completely putting an end to the collection and delivery of letters, &c., on Sundays, and that, pending such inquiry, her Majesty will be graciously pleased to give orders that the collection and delivery of letters, &c. on Sundays shall be continued as heretofore."
The hon. member condemned the Puritanical spirit which had been raised on the question of the Post-office Sunday labour; and described the exertions made by the Government to reduce this labour exertions for which they had not received due credit. By the regulations made by them, previous to the late resolution of the House, not less than 6000 persons had been relieved from five hours a half labour on the Sundays. The hon. member also described the great additional Sunday labour caused by the stoppage of the regular mails, and showed how the new system operated most grievously on the poorer classes. He could see no reason why this cessation of all Sunday labour should be confined to the Post-office, and why it should not be enforced in all public and private establishments.
Mr. HORSFALL seconded the motion. He denied that the question was a religious one, for it was not the Jewish Sabbath whose observance it was sought to enforce, but the Christian Sunday, which was a day of rest. The question then was, how could the House ensure the greatest quantity of rest for the largest number of men. He asserted that, so far from abridging labour on the Sunday, the late regulation had increased it five-fold. The resolution of the House had been called a surprise, and it was so—a surprise on those who voted for it, in the firm belief that it would never be carried into effect.
Lord ASHLEY contended that a full, fair, and sufficient trial had not been given to the order founded on the resolution of the House, which had been accepted by her Majesty, on the recommendation of her Ministers, and should therefore not be rescinded without grave deliberation. He denied that any serious inconvenience had arisen, or could arise, from the abolition of the delivery of mails on the Lord's Day.
Mr. AGLIONBY spoke in favour of, and Sir R. INGLIS against the motion.
Lord J. RUSSELL explained the reasons that induced him as a duty to recommend her Majesty to comply with the address of the House, viz. that as the original vote had assumed the form of an address to the Crown, it was not competent upon the Ministry to withhold it from her Majesty, and they had felt it their duty to recommend a trial of its results. His opinion had throughout been opposed to the vote, and remained unaltered after witnessing the consequences that had followed the changes it recommended. He wished, however, that some further time had been given to try the effect of the new regulation. It appeared to him, that if the commercial correspondence of the country was alone concerned, it would be right that the Sunday mails should cease; but he could not see on what principle a public department which was alone authorised to do what others could cease to do, thereby causing domestic affliction in many cases of a grievous kind. The noble Lord, in voting for the motion, would do so in the sense that the inquiry should be whether the delivery of letters on Sunday should not be for such short time as would allow the clerks in the town to have time to attend divine service. He recommended the modification of the latter part of the motion, leaving out the preamble.
Mr. MUNTZ opposed the motion.
Mr. GLADSTONE also opposed it. He admitted that the question was not settled, and that it was necessary to judge it by experience, but he considered that it would be prejudicial to the character of the House, and disrespectful to the Crown, to rescind the resolution so lately voted and acted upon
Lord J. RUSSELL suggested a compromise, viz. an address to the Queen, praying for an inquiry into the "means of diminishing Sunday labour in the Post-office, without wholly excluding the delivery of letters on that day."
Sir T. D. ACLAND approved of this compromise, and hoped it would be adopted without a division.
Mr HUME wished the sense of the House to be taken on the original resolution.
Mr. CARDWELL supported Lord J. Russell's amendment.
Mr. SCHOLEFIELD was assured that his constituents wished the restriction to be at once withdrawn
After a few words from Lord DUDLEY STUART,
Mr DISRAELI criticised the grammatical construction of the amendment, which was vindicated by Sir G. GREY.
Lord J. MANNERS opposed the resolution.
The House divided

For the resolution	92
For Lord J. Russell's amendment	233
Majority	—141

Some conversation as to the course which should follow this vote led to explanations from Lord JOHN RUSSELL, who stated that the Ministry would not change the existing system without inquiry, but when the inquiry was completed would feel themselves authorised to act without delay, whether Parliament were sitting or not.
After a confused and noisy discussion, protracted for more than half an hour, a second division took place upon Lord John Russell's amendment, put as a substantive motion. The numbers were—

For the motion	195
Against it	112
Majority	—83

Adjourned at a quarter to three o'clock.

HOUSE OF COMMONS.—WEDNESDAY.

The House sat from noon to six o'clock.

NATIONAL MONUMENT TO SIR R. PEEL.

Lord J. RUSSELL gave notice that it was his intention, on Friday night, to move an address to the Crown, praying her Majesty to give directions to have a monument erected in Westminster Abbey to the memory of the late Sir Robert Peel, bearing a suitable inscription, commemorative of the great and irreparable loss the country has sustained by the death of that illustrious statesman.
The House went into committee on the Weights and Measures Bill; and, after much discussion, the first two clauses were agreed to. Progress was then reported, and the chairman obtained leave to sit again at twelve o'clock on Friday

MARRIAGES BILL.

Mr. J. S. WORTLEY moved the third reading of the Marriages Bill.
Mr. HADFIELD opposed the bill, believing it to be repugnant to the feelings of this country; and moved, as an amendment, that the bill be read a third time that day three months.
Colonel SIBTHORP, Mr. ANSTEY, and Mr. WESTHEAD spoke in favour of, and Mr. M'NEILL and Mr FOX MAULE against, the bill.
The House divided

For the third reading	144
Against it	134
Majority for the third reading	—10

The bill having been read a third time,
Mr Osborne moved the addition of a clause to exempt Scotland from the provisions of the bill.
The House divided—

For the clause	180
Against it	237
Majority against the clause	—7

Six o'clock having arrived, no further progress was made.

HOUSE OF LORDS.—THURSDAY.

THE LORD CHANCELLOR.

Lord BROUGHAM had expressed the high satisfaction at the putting of the Great Seal in Commission. He understood that an end was to be put to that arrangement, but he still continued of opinion that that arrangement was a good one; but, if any arrangement was to be made by which that Commission was to be terminated, and the Great Seal to be intrusted to any individual, he knew no person more fit than one of the most learned, able, and efficient lawyers in Westminster Hall, and he begged to add that he did not know a more honourable or more honest man to whom it could be intrusted than Chief Justice Wilde.
Some bills on the table were forwarded a stage, and their Lordships adjourned.

HOUSE OF COMMONS.—THURSDAY.

The House had an early sitting at twelve o'clock.

MERCANTILE MARINE BILL.

Mr. LABOUCHERE moved the postponement of the committee on this bill to Monday next, at twelve o'clock, owing to the impossibility of some hon. members attending to-day who felt an interest in the measure.
The Convict Prisons Bill was read a third time and passed.
The Poor Relief Bill passed through committee.
The House then suspended its sitting until five o'clock.

ACCIDENTS IN MINES AND COLLIERIES.

Mr. HUME presented a petition from Ashton-under-Lyne, signed by between 6000 and 7000 persons employed in mines and collieries, praying that inspectors might be appointed to inquire into and report upon the state of mines and collieries. The hon. member took the opportunity of asking the Secretary for the Home Department whether there was any probability of the bill which had been introduced into the House of Lords being passed this session?
Sir G. GREY said, the bill which he had prepared was read a second time in the House of Lords the other day, and he hoped it would be brought down for the consideration of this House at an early period.

PUNISHMENT OF DEATH.

Mr. EWART, after presenting petitions in favour of the abolition of the punishment of death from Liverpool, Brighton, Shrewsbury, Sunderland, Glasgow, Colchester, Edinburgh, King's Lynn, the Liverpool Peace Society, and other places, proceeded to bring on his motion for leave to abolish the punishment of death.
Mr. HUME seconded the motion; which was opposed by Sir G. GREY on the part of the Government, and supported by Mr. BRIGHT and Mr. SHARPE ADAIR.
The House divided—For the motion, 40; against it, 46: majority, 6.
The motion was accordingly lost

THE CHARTER.

Mr. FEARGUS O'CONNOR then brought on the following motion:—"That this House, recognising the great principle that labour is the source of all wealth; that the people are the only legitimate source of power; that the labourer should be the first partaker of the fruits of his own industry; that taxation without representation is tyranny, and should be resisted; and believing that the resources of the country would be best developed by laws made by representatives chosen by the labouring classes in conjunction with those who live by other industrial pursuits; that (in recognition of the above great truths) this House adopts the principles embodied in the document entitled the People's Charter, and gives orders that elections, universal suffrage, vote by ballot, equal electoral districts, no property qualification, and payment of members."
The hon. member was proceeding to develop the motion, when the House was counted out, there being only 29 members present.

COURT AND HAUT TON.

THE COURT AT BUCKINGHAM PALACE.

The gloom which pervaded the Court has not been, owing to the lamentable demise of Sir Robert Peel, has been increased since Tuesday last by the somewhat sudden and unexpected death of her Majesty's uncle, his Royal Highness the Duke of Cambridge. Her Majesty's second Drawingroom, which was to have taken place on Tuesday, was postponed on Monday, owing to the illustrious Duke's alarming illness, and since the demise of his Royal Highness it has been put off *sine die*. The Court ball, and all the other announced festivities of the fashionable world, have also been postponed, and there is reason to fear that the London season is now at an end
We can confidently state that her Majesty will leave town for Scotland immediately after the funeral of the Duke of Cambridge, which is fixed to take place at the latter end of next week.

THE PRINCE OF PRUSSIA.—HIS ROYAL HIGHNESS THE PRINCE OF PRUSSIA left Buckingham Palace at five minutes before eight o'clock on Saturday evening for the London-bridge terminus of the South Eastern Railway. Her Majesty and his Royal Highness Prince Albert, attended by the Ladies and Gentlemen in Waiting, took leave of their illustrious guest at the garden entrance of the Palace Before leaving town the Prince of Prussia visited her Royal Highness the Duchess of Gloucester, at Gloucester House, and also honoured the Duke of Wellington with a visit at Apsley House. His Royal Highness Prince George called at the Palace on Saturday afternoon, to take leave of his Royal Highness.

CHURCH OF ENGLAND SELF-SUPPORTING VILLAGE SOCIETY.—

On Tuesday, a public meeting was held at Willis's Rooms, King-street, St. James's, for the purpose of presenting the prizes offered by the committee for the three best essays by clergymen upon the objects of this society; the Hon. Arthur Kinnaird in the chair. The object of this meeting was to award prizes to those gentlemen who had written the three best essays upon the principles of this society, and to receive a report from the committee respecting the condition and progress of the institution. The secretary read the report, which stated that the society desired to raise a sum of £40,000, for promoting the religious, moral, and general improvement of the working classes, by forming establishments of 300 families on the land, and combining agricultural with manufacturing employment for their own benefit. The report having been received and adopted, the prizes (which had been awarded by Mr. J. M. Morgan, the founder of the institution) were delivered to the following gentlemen: £50 to the Rev. H. Smith, senior chaplain of the Parkhurst Prison; £30 to the Rev. W. B. Ady, M.A., vicar of Little Baddow; £20 to the Rev. H. S. Finch, B.A., curate of St. James's, Curzon-road, Shoreditch. The reverend gentlemen respectively acknowledged the compliment bestowed upon them; and a vote of thanks having been passed to Mr. Morgan and others who had exerted themselves in behalf of the society, the meeting separated.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

The proposal for the erection of a national monument to Sir Robert Peel, by subscriptions limited to one penny each person, with Lord John Russell, Viscount Hardinge, Mr. Gladstone, Mr. Hume, and Mr. Masterman as trustees, is being responded to in Bristol and other localities in the country, in a manner that will ensure success to the project.
On Monday, the 1st inst., the United Service Institution elected W. R. O'Byrne, Esq., an honorary member of the society, as an acknowledgment from the council of the sense they entertain of the value of his excellent "Naval Biography," and of the essential benefit the author has conferred upon the naval service
On Saturday afternoon, two audacious thieves stole all the copper tops of the gas lamps on the Quai des Tournelles, from the Rue de Bièvre to the Pont Marie in Paris. One of the men ascended with a ladder, and another placed the stolen articles in a light cart. A *sergent de ville*, who came up, asked the thieves what they were about. "Oh!" said they, "these things have got out of fashion, and they are about to be changed!" The officer went away, and the thieves quietly continued their depredations
A parliamentary document has just been issued, from which it appears that the expenditure for maintenance and out-door relief in Ireland, for the half-year ended the 30th March last, was £357,334, whilst in the corresponding half-year of 1849 it was as much as £620,511, showing a decrease of no less than £263,177
Twenty boys from the *Venus* the Marine Society's *dépôt* at Woolwich, are to proceed in the course of the present month in the *Owen Glendower*, one of Mr. Green's Indiamen, for service in the Indian navy.
Lord Castlereagh has addressed a letter to some of the Irish papers to contradict a rumour which originated in the *Galway Vindicator*, to the effect that Lady Castlereagh had become a Roman Catholic, and that he himself intended to follow her example.
The board of Trinity College has conferred the degree of LL.D. on Mr. O'Donovan, the professor of Irish in the Belfast Provincial College, as an acknowledgment of his eminent services and learning in Celtic literature. Mr. O'Donovan is the translator of many of the most important manuscript records of Irish history, which have recently been discovered and rescued from oblivion
The grand juries of the city and county of Limerick, and of the county of Clare, have unanimously passed resolutions, to be laid before government, calling for a mitigation of punishment of Smith O'Brien.
On Sunday night, about half past ten o'clock, an explosion of gunpowder as Ilford toll-house, on the turnpike road, near the gaol, by which the house was destroyed and five persons seriously injured. Four of the sufferers are in the London Hospital, and the fifth is not expected to survive
The aggregate amount of the precious metals imported into Southampton from all quarters, for the six months ending the 30th of June, including 50,000 dols. from the United States, is 14,695,600 dols., or £2,939,120, against £3,372,724 in the corresponding period of 1849, showing a falling-off in the total receipts of £433,604, caused by the homeward steamships from Alexandria, Constantinople, and the Mediterranean. The specie imported into Southampton from all quarters during the six months ending the 31st of December last amounted to 16,378,650 dols., or £3,275,831, an excess when compared with the half-year just ended of £356,811 sterling.
Lord Dunboyne expired on the 6th instant, at the Château Beaughen, Pas de Calais, after a protracted illness, in his 70th year.
Accounts to May 14 from Rio Janeiro mention that the returns of deaths from yellow fever are 14,000 inhabitants, 120 English residents, 190 English seamen, including 8 masters and 18 mates; a great number of foreign seamen, not computed, the Portuguese line-of-battle ship *Vasco da Gama* lost 150, and the *Constitution* 100: her Majesty's ship *Cleopatra*, 18 officers and seamen; and the *Cormorant* 12. The disease was abating at each of the Brazilian ports, except among the shipping
The following is a return of the state of the French fleet in commission during the last 30 years:—In 1820 there were 76 vessels, carrying 6750 men; in 1835 they amounted to 158 vessels with 15,000 men; in 1839, 205 vessels and 28,000 men; in 1840, 228 vessels and 35,000 men. In 1848 a reduction commenced; France had only about 222 ships, as well sailing as steam vessels, with 33,000 men, and in 1850, on account of successive reductions made in the budget of the navy, the total amount of naval forces (squadrons and stations included) did not quite reach 200 vessels of all classes with 22,000 seamen.
On Saturday, at the general quarter sessions for the city of London, the following proclamations of proceedings to outlawry were made; John Ellis, late of No. 4, Elm court, Temple, at the suit of James Henderson and Edward Cox, of No. 5, Chancery-lane, late of the Middle Temple, as the suit of William Eldridge, George Wood described as late of the city of London, at the suit of Francis Lynn; the same, at the suit of Francis Lynn and Charles Christopher Davis, and William Strange, of No. 21, Paternoster-row, St. Paul, at the suit of William Henry Smith
The following gentlemen have been elected Fellows of the Royal College of Physicians:—Dr. Basham, Dr. Peacock, Dr. Herbert Davies, Dr. G. Johnson, Dr. Acland (Oxford), and Dr. Ormerod. The censors chosen for the year are—Dr. Mayo, Dr. Barker, Dr. Barlow, and Dr. Jeaffreson.
The Imperial Library at Vienna has just been enriched with a very old Greek manuscript on the advent of Christ, which was discovered a short time since at Constantinople, by M. Waldici, a Hungarian philologist. This work appears, from an indication at the bottom of the last page, in the same writing as the body of the manuscript, to have been composed by a bishop of the second century, named Clement, whose existence had hitherto unknown.
The dinner to Lord Palmerston at the Reform Club has been postponed until Saturday, the 20th inst., out of respect to the memory of Cuming's death.
The Council of the Art-Union of London held their usual weekly meeting on Tuesday, Mr. Sergeant Thompson in the chair, and, in consequence of the lamented death of his Royal Highness the Duke of Cambridge, president of the society, immediately adjourned.
The annual resolution of thanks to the director of the Musical Union is deferred, in consequence of the demise of his Royal Highness the Duke of Cambridge, the late president of the society. The last public performance attended by his Royal Highness was at the Musical Union the day previous to the fatal attack of fever which has thus deprived this institution of its most zealous patron, and artists of a kind friend
Mr. C. Bonomi, the artist, has received the commands of her Majesty to paint a large picture of the grand coronation scene in the opera of "Le Prophète," as represented at the Royal Italian Opera, Govent-garden.
According to accounts of the appearances on the moors in Scotland, grouse and deer are plentiful; but some of the sportsmen state that, owing to the snow-storm in May, one half of the birds will be late in arriving at maturity
The valuable rectory of Penshaw, near Houghton-le-Spring (Durham), has become vacant by the death of the Rev. Thomas Thompson, who reached the patriarchal age of 90 years, and had officiated as Sub-Curate, Perpetual Curate, and Rector, for more than half a century. The patronage of the rectory is in the gift of the Bishop of Durham.
A grand council was opened with great pomp at Lyons (France), on Sunday last, in the Cathedral of St. John, by the Cardinal Archbishop of Sardes, the Bishops of Puy, Dijon, Autun, Langres, and Saint-Claude. The ceremony, which lasted four hours, was attended by an immense multitude, who observed a religious silence.
The Abbé Mathieu, Archbishop of Besançon (France), has been elevated to the rank of Cardinal.
The Rev. M. Montaudin, secretary to the Protestant Society of Primary Instruction, and the Rev. M. Carier, president of the Lutheran Consistory (Paris), have been elected to sit in the Superior Council of Education of France.
The Archbishop of Lemburgh (Austrian Poland) has prohibited his clergy from wearing long hair like the peasants, and from smoking in public, "like disreputable sons of Baal."
On Friday week the inhabitants of St. Michael, Queenhithe, and Holy Trinity, presented, through Alderman Hooper, a testimonial of their respect to the Rev. T. Hill, upon the occasion of his resigning that curacy for the incumbency of Holy Trinity, in the Minories
The convict John Griffiths, who escaped a few days since from Woolwich Dockyard, has been apprehended, and is in custody at Chatham
The sittings of the approaching Peace Congress at Frankfort will commence on June 23; and careful arrangements are making to convey the British delegates and visitors from London on the 19th August. The movement has already secured a large amount of attention, and the friends of peace throughout the continent are manifesting a deep interest in the enterprise
The 24th or 25th of this month is the day appointed for the floating of the fourth and last iron tube, which, when hoisted and placed, will complete the Railway Bridge across the Menai Straits.
It has been determined that the chief town of the new settlement of Canterbury, in the middle islands of New Zealand, shall be called "Lyttelton," in honour of the noble Lord who is chairman of the committee The seat of the new diocese will be in that town, and Dr. Jacobson, who is about proceeding thither, will take the title of "Bishop of Lyttelton," instead of "Bishop of Christchurch," as was at first intended
A sealed bottle was picked up in the inner harbour, Falmouth, on last Tuesday morning, containing a paper with the following:—"*Ship Georgedown*, off the coast of Guinea, half-past 11 o'clock, P.M., blowing a heavy gale of wind, leak in the vessel, working all pumps, not expecting to see land again, wishing the best.—Captain Thomas, First Mate James, Second Richards.—January 2, 1845"
On Saturday morning, at Bristol, Captain Heinrich Lange (the commander of a very fine Prussian barque, the *Borussia*), committed suicide in the state room of the cabin of this ship, by cutting his throat and then dashing on a tile into the wound. He had been obliged at considerable expense to have his vessel fitted with iron knees, &c., in order to get her classed A 1 at Lloyd's, and to comply with the regulations of the emigration officers of the port (the vessel being chartered to take emigrants to New York); and his fears that the owners in Prussia would dismiss him, and that his wife and three children would become destitute, prayed upon his mind. £323 were found in his cabin.

LANDING, AT STOCKHOLM, OF HER ROYAL HIGHNESS THE PRINCESS LOUISA, OF THE NETHERLANDS, AT BISKOPSUDDEN, IN THE PARK AT STOCKHOLM.

ROYAL MARRIAGE AT STOCKHOLM.

WE are enabled, by the courtesy of a Correspondent, to present our readers with the accompanying Sketch of the Landing of the Princess Louisa of the Netherlands, accompanied by her father and mother the Prince and Princess Frederick, at Stockholm, on the 16th of last month, to be married to Carl, Crown Prince of Sweden

The Sketch is taken at a point in the Royal Park of Stockholm, where a landing-place had been prepared for the Royal party. In the foreground are seen the King Oscar, the Queen and Princess, and the Prince Gustaf of Sweden: the Prince and Princess Frederick, and the Prince and future Princess Royal of Sweden all portraits

In the distance is seen the squadron of corvettes, commanded by his Royal Highness Prince Oscar of Sweden

EXTRAORDINARY BALLOON ASCENT.

GREAT interest was excited in Paris on Sunday, by the announcement that M. Poitevin, an aëronaut, would ascend on horseback with a balloon on that day. Upwards of 10,000 persons paid for admission to the Champ de Mars to witness the ascent, and, outside, on the heights of Chaillot, &c., more than 150,000 individuals were collected. The President of the Republic was present, and was received with great enthusiasm. The balloon was 15 metres in diameter, 47 in circumference, and 20 high, but it only weighed 150 kilogrammes. It was a matter of considerable difficulty to fill the balloon with gas, owing to the violent wind which prevailed: and when it was filled, it was beaten to and fro by the wind so strongly, that several of the spectators had to assist in holding it. At a little before six o'clock, the horse, a handsome dapple grey, was brought out; a stout cloth was placed round the body of the horse, and several straps, passed over the shoulders and loins, were united in rings, and by these rings the animal was attached by cords to the network of the balloon. A platform of basket-work, seven or eight feet above the horse, contained the ballast, and to this platform the aëronaut had access by means of a rope-ladder. A cord passing through an opening in the platform, enabled him to open the valve of the balloon. The aëronaut was dressed as a jockey, and had with him several bottles of wine and some bread. Some confusion was caused by the crowd attempting to force their way into the reserved place, but they were kept off by the soldiers. At length, at ten minutes past six, the horse was duly attached to the balloon, and M. Poitevin having mounted its back, the signal to rise was given. The horse plunged a little as it lost its footing, but when fairly lifted from the earth it dropped its legs, as is the case when horses are slung for embarkation on ship-board. The balloon rose majestically over the Ecole Militaire; but at times the wind was so violent as to drive it in such a position, that it appeared on a level with the aëronaut. The emotion of the spectators was very great, and one lady fainted. M. Poitevin display[illegible] extraordinary *sang froid*, and saluted with his cap and whip. After a while, he was seen to leave his saddle, and ascend by means of the rope-ladder to the platform containing the ballast, in order to throw some of it away, so as to rise higher. This done, he descended, and again mounted the horse. There was no net-work or anything to protect him or the animal. The balloon went in the direction of Fontainebleau, and M. Poitevin intended to remain in the air about an hour.

ASCENT OF M. POITEVIN ON HORSEBACK, IN A BALLOON, FROM THE CHAMP DE MARS, PARIS.

The following details are from the aëronaut's own account of his ascent:—"I had much difficulty in moderating the too great ascensional power, which, in a few minutes, carried me to too great a height for the horse. There was a copious flow of blood from his mouth. I passed through several counter-currents, which produced an almost constant rotatory movement. I found the cold almost insupportable. When clear of the clouds, I saw some splendid rainbows, and other phenomena of the solar rays. About seven o'clock I made preparations for descending, and in three-quarters of an hour after my grapples were on the ground, but they did not take hold. I proceeded in this way for more than a league, when I arrived at the wood of Vilcmain, near the forest of La Lachelle, commune of Grisi, canton of Brie-Comte-Robert (Seine-et-Marne). During this time my horse was close to the fields, and bit off the tops of the corn as he passed over it; and when passing over the high trees he cropped off their leaves. At length I was fortunate enough to put an end to this dangerous state of things. Seeing myself near the edge of a dry pond, I vigorously laid hold of a branch of a tree which grew near it, and for an instant checked the course of the balloon, and assistance being at hand, 40 men laid hold of the ropes and it was easily secured. The balloon was emptied, and the only thing to be regretted is some slight injury to it, from coming in contact with the trees."

M. Poitevin was heartily welcomed by the people; at Grisi he was hospitably received; and at 11 o'clock he left for Paris.

CHURCH, UNIVERSITIES, &c.

UNIVERSITY COLLEGE, LONDON.

The council have appointed Mr. J. E. Erichsen, late of the assistant-surgeon at the hospital, to be professor of surgery at the college, and surgeon to the hospital, offices lately become vacant by the resignation of Mr. Arnott.

ANDREWS SCHOLARSHIPS. The council have determined that the Andrews scholarships to be offered for competition in October next, to students of the Faculty of Arts, and pupils of the junior school of the college of the preceding session, shall be as follows: one of £100, free from the condition of continued studentship; two of £50 each, subject to that condition.

PREFERMENTS AND APPOINTMENTS.—The Rev. Francis Fulford, to be first Bishop of the newly-constituted see of Montreal. The Hon. and Rev. Leland Noel, to an Honorary Canonry in Peterborough Cathedral. The Rev. Gerard Fenwicke, to the Rectory of Blaston St. Giles, Leicestershire. The Rev. John Haymes, to the Rectory of Galby, Leicestershire. The Rev. Duncombe Steel Perkins, to the Rectory of Clifton Campville, with Chilcote Chapel, Staffordshire. The Rev. William Williams, to the Rectory of Llanynis, Brecknock. The Rev. Henry Edwards, jun., to the Rectory of Wambrook, Dorsetshire. The

TESTIMONIALS.—The following clergymen have recently received testimonials of esteem and affection: The Rev. B. Howell, Rector of Hughley Salop, from the subscribers to the Hughley Bridge improvement; the Rev. W. Rigg, from the inhabitants of the township of Lower Holker and chapelry of Flookburgh; the Rev. R. B. Claiborne, from the parishioners of Holton; the Rev. James Pelham Pitcairn, from the congregation of St. Thomas, Ardwick; the Rev. W. Turner, late Master of the Grammar School, Uppingham, from the pupils; the Rev. W. Bewsher, late Curate of Astbury, Cheshire, from the patron, rector, and parishioners; the Rev. William Dawson, of Ramsile, Dalton-in-Furness, from the inhabitants; the Rev. John William Grier, Perpetual Curate of Ambaccote, Staffordshire, from his congregation.

CONSECRATION OF ST. THOMAS'S CHURCH, BETHNAL-GREEN.—On Monday, the church of St. Thomas, situated in Nova Scotia-gardens, Bethnal-green, the last of the ten new churches, the erection of which was commenced on the 23rd February, 1839, was consecrated by the Bishop of London, who, with his chaplains, was received at the door of the church by the Rev. William Kerr, the incumbent, the registrar, &c. After the ceremony an appropriate sermon was delivered by his Lordship. Some gentlemen attached to the choir of St. Paul's Cathedral and of Westminster Abbey assisted at the choral service. The church is capable of containing about 800 persons, the majority of the seats being free. The cost of its erection, together with the school-house, was defrayed by the Rev. Mr. Cotton, and amounted to £4000.

THE GORHAM CASE.

On Monday the Court of Exchequer decided on the rule obtained by Sir Fitzroy Kelly, to show cause why a prohibition should not issue against the Archbishop of Canterbury and Sir Herbert Jenner Fust, to stop them from giving Mr Gorham institution to the vicarage of Brampford Speke. Sir F. Pollock, the Chief Baron, read the judgment of the Court. After detailing the various proceedings connected with the suit, reserving that the statute of the 25th Henry 8, c. 19, which gave the appeal from the Archdeacon to the Bishop, and from the Bishop to the Archbishop, and from the Archbishop to the King, was merely the restoration of the constitutions of Clarendon enacted in the reign of Henry II., 1164, against the usurpation of the Church of Rome, one of the great bulwarks of the liberties of the subject, the Court concluded by saying that it entertained no doubt that the appeal was rightly made, and that the rule nisi for the prohibition ought to be discharged. The rule was discharged accordingly, with costs.

STEAM COMMUNICATION WITH AUSTRALIA.—A meeting of several influential members of both Houses of Parliament took place on Monday to devise the best course of proceeding in order to induce her Majesty's Government to approximate the Australian colonies by means of steam to Great Britain. Amongst those present were Earl Nelson, Lord Monteagle, Lord Wodehouse, Lord Naas, M.P., Hon. F. Scott, M.P., Sir William Molesworth, Bart, M.P., Sir William Verner, Bart., M.P., Sir R. Gore Booth, Bart., M.P., Mr Aldridge, M.P., Mr. Divett, M.P., Mr. Somers, M.P., Mr. M'Gregor, M.P., Mr. Scholefield, M.P., Mr. S. Dickson, M.P., Mr. C. Fortescue, M.P. After a full discussion of the various features of the question, its present position, and the obstacles opposed to the carrying out of the object, it was unanimously resolved that active steps should be immediately taken to bring the whole subject under the special attention of both Houses of Parliament, with a view to its speedy and final settlement. As a preliminary course, it was arranged, amongst other measures, that an address to her Majesty should be proposed in the House of Commons by Lord Naas, M.P., praying for the immediate establishment of steam communication with the Australian colonies. It was also announced that the petitions to the Legislature on behalf of the object were in course of signature. The meeting was attended by Mr. De Salis and Mr. Logan on the part of the Association for the Promotion of Steam Communication with Australia.

Accounts from Port-au-Prince (Hayti), of the 7th June, state that the Emperor Soulouque sadly requires some one of sound practical mercantile knowledge to guide him in the administration of matters relating to trade and commerce, and to whose opinion, judgment, and counsel he would give an attentive ear

Papers from Nassau, New Providence, state that a whirlwind and waterspout passed, over that island on the 6th of May, and did considerable damage.

WRECK OF THE BRIG "RETRIEVER."

We have been favoured by our correspondent, from Trinidad, June 6, with the accompanying Sketch of the wreck of the brig *Retriever*, Captain Galloway. The catastrophe happened in the Boccases, Trinidad, where the vessel was driven under calm inside the rocks by the strength of the current, which is exceedingly rapid in these passages. The situation of the brig is truly curious, on account of the narrowness of the passage; probably, had the captain wished to go through so narrow an entrance, he would not have been able without touching one of the rocks on each side. The scene represented is a few days after the catastrophe; the wind was blowing strongly and the sea running very high.

WRECK OF THE BRIG "RETRIEVER," IN THE BOCCASES, TRINIDAD.

CALIFORNIA—SAN FRANCISCO.

There is no place in the world that has undergone, and is still undergoing, such rapid changes as the city of San Francisco. In Ryan's work on California, lately published, for instance, there is an engraving of the principal street in San Francisco, which is so unlike any of the principal streets as they existed in February last, that no one would recognise it now (it is, probably, intended for Kearney-street); for, in all the principal streets, the houses are continuous, and none of them made of canvas, but, for the most part, tolerably substantial-looking affairs, the majority two and three storeys high, interspersed with larger buildings as high as four storeys. No doubt, the engraving alluded to was an accurate representation of the street at the time it was sketched; indeed, it is very like some of the back streets as they were in February last, which again, probably, by this time (June), are as much altered in appearance as this.

The principal part of the town is situated in a valley, but buildings are making their appearance so rapidly in every direction, and people are beginning to find out that the higher ground is the best, that in a short time we may expect to find the principal part of the town on the hills instead of in the hollow.

The Fremont Hotel, shown in the foreground of the Sketch, is the first house one sees as you are going round the Point. At this hotel the writer lived for nearly four months. The expenses are moderate, nay, cheap for California: sixty dollars per month was paid for a small room about fourteen feet square, without any furniture; while an attorney, Mr. H., was paying 400 dollars a month for a smaller room, but in a better situation for business; each meal cost a dollar. A small loaf of bread, that one could eat at a meal, varied from 1s. to 2s., but it was more frequently the latter.

We are indebted for these details, as well as for the accompanying Sketch, to a correspondent, who has very lately returned from California. The locality is further described in Bayard Taylor's "El Dorado, or the Gold Regions," a cheap reprint of which has appeared in the "Popular Library."

"The barren side of the hill before us was covered with tents and canvas houses, and nearly in front a large two-story building displayed the sign, 'Fremont Family Hotel.' As yet we were only in the suburbs of the town. Crossing the shoulder of the hill, the view extended around the curve of the bay, and hundreds of tents and houses appeared, scattered all over the heights, and along the shore for more than a mile. A furious wind was blowing down through a gap in the hills, filling the streets with clouds of dust. On every side stood buildings of all kinds, begun or half-finished, and the greater part of them mere canvas sheds, open in front, and covered with all kinds of signs, in all languages. Great quantities of goods were piled up in the open air, for want of a place to store them. The streets were full of people hurrying to and fro, and of as diverse and bizarre a character as the houses. Yankees of every possible variety, native Californians in *serapes* and sombreros, Chilians, Sonorians, Kanakas from Hawaii, Chinese with long tails, Malays armed with their everlasting creeses, and others in whose embrowned and bearded visages it was impossible to recognise any especial nationality. We came at last into the plaza, now dignified by the name of Portsmouth Square. It lies on the slant side of the hill; and from a high pole in front of a long one-story adobe building, used as the Custom House, the American flag was flying. On the lower side stood the Parker House, an ordinary frame house of about sixty feet front, and towards its entrance we directed our course.

"I set out for a walk before dark, and climbed a hill, back of the town, passing a number of tents pitched in the hollows. The scattered houses spread out below me, and the crowded shipping in the harbour, backed by a lofty line of mountains, made an imposing picture. The restless, feverish life in that little spot, and the thought that what I then saw and was yet to see will hereafter fill one of the most marvellous pages of all history, rendered it singularly impressive.

"Walking through the town the next day, I was quite amazed to find a dozen persons busily employed in the street before the United States Hotel, digging up the earth with knives, and crumbling it in their hands. They were actual gold-hunters, who obtained in this way about 5 dollars a day. After blowing the fine dirt carefully in their hands, a few specks of gold were left, which they placed in a piece of white paper. A number of children were engaged in the same business, picking out the fine grains by applying to them the head of a pin, moistened in their mouths. I was told of a small boy having taken home 14 dollars as the result of one day's labour. On climbing the hill to the post-office, I observed in places where the wind had swept away the sand several glittering dots of the real metal; but, like the Irishman who licked the dollar out of his way, concluded to wait till I should reach the heap. The presence of gold in the streets was probably occasioned by the leakings from the miners' bags and the sweepings of stores; though it may also be, to a slight extent, native in the earth, particles having been found in the clay thrown up from a deep well."

CALIFORNIA: THE FREMONT HOTEL, SAN FRANCISCO; FROM A RECENT SKETCH.

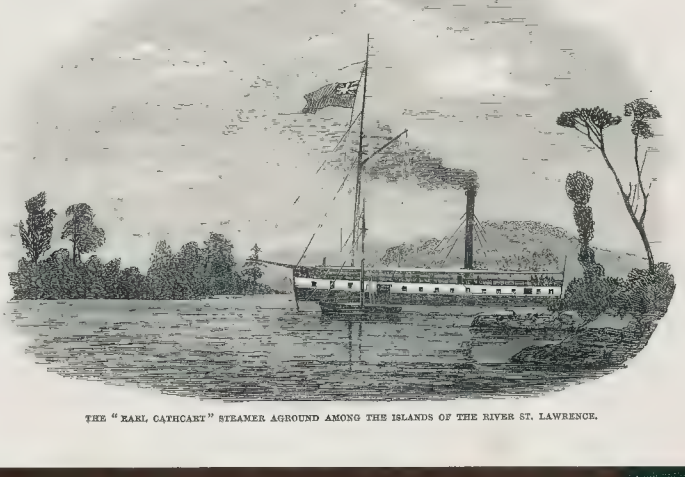
THE "EARL CATHCART" STEAMER.

(From a Correspondent.)

The accompanying Engraving shows the *Earl Cathcart* steamer, with troops on board from Montreal to Fort Stanley, *en route* to London, Canada West—as she appeared hard and fast among the islands of the river St. Lawrence. The *Cathcart* left Montreal on Tuesday, 11th June, having on board No. 4 company 4th battalion Royal Artillery, commanded by Major W. Fraser; and a draught of the 23rd Fusiliers (Royal W.), under the command of Lieut. Brock. After a tedious passage of three days up the river, and through the various canals constructed to avoid its rapids, we found ourselves, one fine evening, opposite the picturesque town of Brockville, while the declining sun was gilding a number of straggling isles, covered with stunted pine, oak, and brushwood. A few hours afterwards we were in the midst of them, and the moon was pouring down its silver flood on the quivering waters. It was one of the most beautiful passages of American scenery the Lake of the Thousand Islands.

Ere the dawn of day, a dense fog crept over the face of the waters. Our Palinurus, Captain Duncan, found it necessary to proceed with caution. To find anchorage in that rocky bed, was impossible: to allow the vessel to float down with the current, was dangerous in the extreme; by doing so, we might have found ourselves, at sunrise, tumbling broadside over the bed of the Long Sault, the most impetuous and dangerous rapid of the St. Lawrence. It was, therefore, necessary to risk running ashore on one of the islands. At about four o'clock the passengers were awoke by finding the vessel suddenly checked. The commotion was general, but some lay very quietly in their berths, in happy indifference, fancying that the shock was caused by the bumping of the boat against the pier at Kingston. There was considerable consternation, however, exhibited on discovering that we had lost our course, and that we were either aground, or on shore, or on a reef of rocks—the mist was so thick, it was impossible to say which. Every endeavour was now made to get us off, but in vain. The sun rose high over the waters, and lighted up the beautiful scenery, but the prospect before us was as dismal as ever—we were fast on a shoal. The commanding officer, at length, ordered the men on shore accordingly, they were landed on the nearest island, the first boat's crew taking formal possession in the name of her Majesty, and as the regimental boot of Dr. Hunter was the first to touch the strand, his comrades suggested that it should henceforth be called "Hunter's Island." In the meantime, every device was employed to entice the vessel from her resting-place. Fortunately, a small flat-bottomed sloop, with a slip-keel, approached, in answer to the flag lowered to half-mast. A quantity of iron ballast, and some of the baggage, was now removed; and, after protracted haulings on cables, and taggings of ropes, and energetic workings of paddles, to our great joy, she was once more afloat. "Hunter's Island" was evacuated; and, having found the proper channel, we made our way, very little damaged, to Kingston.

G. H. Fitzgerne.



THE "EARL CATHCART" STEAMER AGROUND AMONG THE ISLANDS OF THE RIVER ST. LAWRENCE.

The National Assembly of France on the Death of Sir Robert Peel.—On Friday week, at the meeting of the Assembly, at half-past two o'clock, M. Dupin, President, having taken the chair, said: "At a moment when a neighbouring and friendly nation is expressing its painful sentiments for the loss which it has recently suffered in the person of one of its most eminent statesmen, I think it would be honouring the French tribune to proclaim here our sympathetic regret, and to manifest our high esteem for that illustrious orator, who, during the whole course of his long and glorious career, was always animated with sentiments of justice and kindness towards France, and ever spoke of its Government in the most courteous terms." (General approbation.) "In consequence of the adhesion given to my words by the Assembly," added M. Dupin, "they shall be inserted in the *procès-verbal*." ("Very well, very well," on all sides.) The following letter has also been addressed, on the same melancholy subject, to Prince Albert, by M. Charles Dupin, President of the National French Committee for the Exhibition of all Nations: "Prince,—I am requested to transmit to the committee presided over by your Highness the expression of the feelings of grief which animate us. On the first rank amidst the members of your committee, the foreign nations to which your exhibition appeals, were flattered at numbering amongst them the illustrious legislator who for a long time administered his country with good-will and justice to other states. Our French hearts are yet moved by the last words uttered by him in the British Parliament,—words of esteem and friendship for our country. On learning the unexpected and lamentable loss of this great man, the National Committee of France has unanimously decided that its president should express to you the deep-felt regret which it shares with the generous spirits not only of the United Kingdom, but of all the states where genius, moderation, love of art, and respect of peace, are held in esteem. If anything can console us, it is the thought that the equitable and liberal spirit of Sir Robert Peel, far from being extinct, will survive and increase in the committee of which he was so great an ornament.—I have the honour, &c., Baron C. Dupin."

Brighton and South Coast Railway.—The Dividend.—The accounts for the past half-year having been submitted to the directors, they have decided upon recommending a dividend at the rate of 30s. per cent. for the half-year, on the consolidated stock of the company.

Lord Palmerston.—The portrait of the right hon. Lord Viscount Palmerston, by Mr. John Partridge, of which we presented our readers with a full-length copy a fortnight ago, is now on view at Messrs. Colnaghi's, of Pall-mall East. It is intended, we understand, to publish a highly-finished engraving of it; which will, no doubt, from the merits both of the picture and the subject, soon become highly popular.

The amount of expenses paid by the Common Council of the borough of Manchester, during the year ending October 10, 1848, for the management and collection of the customs and several duties, was £2713 3s. 10d. The amount of the same for 1849 (not yet paid at the time the return was made, but assured of being paid in due course) had slightly decreased. It was £2707 2s. 2d. The amount of duties received on the quantities of goods entered for home consumption was, for 1848, £246,537; and for 1849, £316,367.

CALENDAR FOR THE WEEK.

SUNDAY, July 14—Seventh Sunday after Trinity.
MONDAY, 15. St. Swithin.
TUESDAY, 16.—Madame de Staël died, 1817.
WEDNESDAY, 17.—Length of day, 16h. 30m.
THURSDAY, 18. John Hampden killed, 1643.
FRIDAY, 19.—George IV. crowned, 1823.
SATURDAY, 20.—St. Margaret.

TIMES OF HIGH WATER AT LONDON-BRIDGE,
FOR THE WEEK ENDING JULY 20, 1850.

Sunday		Monday		Tuesday		Wednesday		Thursday		Friday		Saturday

FRENCH PLAYS.—LAST WEEK BUT ONE of MDLLE. RACHEL'S ENGAGEMENT.—Mr. MITCHELL respectfully announces that, notwithstanding the extraordinary success which has attended Mdlle RACHEL'S Representations, her Engagement cannot be prolonged, owing to arrangements made at Berlin and Vienna.—On MONDAY EVENING, JULY 15, will be repeated the new and successful Play of ADRIENNE LECOUVREUR. The remaining Nights Representations will be devoted to the Performance of POLYEUCTE MARTYR, with LE MONNIAU DE LESBIE, ANDROMAQUE, MARIE STUART, and LES HORACES.—Scene and Stalls may be obtained at Mr. Mitchell's Royal Library, 36, Old Bond-street; and at the Box-office.

LYCEUM THEATRE.—Mr. ALLCROFT'S BENEFIT, MONDAY NEXT.—PATTER versus CLATTER. Captain Patter, Mr. Charles Mathews. By Desire, the FOLLIES of a NIGHT, in which will appear Mr. Robert Roxby, Mr. Frank Matthews, Mr. Charles Matthews, Miss Julia Power, Miss Julia Glover. After which CONCERT. Vocalists. Miss Birch, Miss Bassano, Mdme. F. Lablache, Mr. Ledler, Mr. Allcroft, and Mr. Sims Reeves. Solo performers: Harp, Mr. Aptommes; Flute, Mr. Richardson; Piano, Mdlle. Sophie Dulcken; Concertina, Mr. G. Case. Conductor, Mr. Lavenu. To conclude with RAISING the WIND. Boxes, 5s.; Pit, 3s.; Gallery, 1s. Doors open at Half-past Six, the performance to commence at Seven. Private Boxes, Tickets, and Places may be had of Mr. Allcroft, 15, New Bond street, or at the Box-office.

ASTLEY'S ROYAL AMPHITHEATRE.—Proprietor and Manager Mr. W. BATTY.—Continued Success of the Popular Spectacle of Mazeppa and the Wild Horse.—On Monday, July 15, 1850, the Entertainments will Commence at Seven o'Clock with MAZEPPA and the WILD HORSE. Mazeppa, by Mr. Hicks.—To be followed by an Incomparable Routine of Indoor Feats of Equitation in the SCIENCE of the ARENA To Conclude with the LONDON CARRIER.—Box-office open from Eleven till Four.—Stage Manager, Mr. W. West.

ROYAL SOHO THEATRE, 73, Dean-street.—Madame DE LOZANO'S CONCERT at the above Theatre, on WEDNESDAY EVENING, 17th instant, to commence at Eight o'Clock. Will introduce during the Concert some new Spanish Songs (accompanied by herself on the guitar); one of them, "La Feria de Frisna," by herself, on guitar.—Boxes, stalls, and Tickets to be had at Madame de LOZANO'S, 11, Barton-street, Eaton-square; and at the principal Marseellaes.—Doors open at Half-past Seven.—For further particulars, see programme.

MR. JOHN PARRY'S NEW ENTERTAINMENT, Music-Hall, Store-street.—Mr JOHN PARRY will have the honour of repeating his new Entertainment, entitled "NOTES, VOCAL and INSTRUMENTAL," at the above rooms, on MONDAY EVENING NEXT, July 15th, commencing at Half-past Eight. Tickets to be had of the principal music-sellers. Stalls and private boxes to be had only of Messrs. CLAUTIER, 41 and 42, New Bond-street, and at the Hall.

CREMORNE GARDENS.—DARING EXPLOIT of LIEUT. GALE, and NARROW ESCAPE of the gallant Aeronaut. On MONDAY, JULY 15, a BALLOON NIGHT ASCENT, with Discharge of Fireworks from the Car by the Chevalier Mortram, in celebration of Lieut. Gale's safe descent upon the French coast on the 8th inst., after a perilous voyage across the English Channe.—On TUESDAY and THURSDAY, by general desire, repetition of the SCOTTISH FETE and Grand Assault of Arms. On WEDNESDAY, JULY 17, the LAST JUVENILE FETE of the Season.—On SATURDAY, a MONSTRE BAL AL FRESCO; Dancing to commence at 8; no Charge for Admission except by Refreshment Card. 1s.—MADAME ASCENT every Evening; New Ballet, Dogs and Monkeys; and innumerable other attractions.—Doors open at 3.—Admission, 1s.; Children, Half-price. -No Charge for Admission on Saturday or Sunday, except by Refreshment Card

RE-ENGAGEMENT of Mons. JULLIEN.—ROYAL SURREY ZOOLOGICAL GARDENS.—On MONDAY, JULY 15th, and Three following Days, PROMENADE CONCERT, conducted by M. Jullien and Mr Godfrey.—Brilliant Display of Fireworks by Mr. Ashby; concluding with a Co ossal Tableau of Napoleon on Horseback, from Lauri's well-known picture.—Doors open from 9 A.M.; Feeding the Animals at 5; Concert at Half-past 6; Fireworks and Ball at 8; Fireworks at 10. Half-past 8. Admission, 1s.

GRAND FLOWER SHOW of the Royal South Florticultural Society, TUESDAY, 23rd JULY

THE HIPPOPOTAMUS, presented by H.H. the Viceroy of Egypt to the Zoological Society of London, is exhibited daily from One to Six o'clock, at their GARDEN in the REGENT'S PARK. The Public are informed that, by permission of Colonel Hall, every Saturday, at four o'clock. Admission, ONE SHILLING; on Mondays, SIXPENCE. D. W. MITCHELL, B.A.

TRAFALGAR MODEL.—This beautiful Model is unequalled in the world, not only as regards a faithful representation of that great battle, but also in the effect portrayed in the moonlight and sunset. Regent-street, Quadrant, daily opening on a large surface of beautiful ly-imitated sea.—Admission, 1s; Children, half-price.—Open from 10 in the Morning till 10 in the Evening, brilliantly illuminated at 168, New Bond-street, next to the Clarendon Hotel.

COLONEL FREMONT'S OVERLAND ROUTE to OREGON, TEXAS, and CALIFORNIA, across the Rocky Mountains, as surveyed for the United States Government, illustrated by a Grand Moving Diorama from Washington City; now exhibiting at the EGYPTIAN HALL, Piccadilly, every Morning at a Quarter to Three, Evening, a Quarter to Eight Admission, 1s; Stalls 2s

ROYAL POLYTECHNIC INSTITUTION.—During this week the ALPINE SINGERS will perform daily at Four, and in the Evenings at Half-past Eight.—LECTURE by Professor Pepper, Esq., on CHEMICAL AFFINITY, at Quarter-past Three, and every Evening at Eight.—LECTURE by Dr Hachbuchner on VOLTAIC ELECTRICITY daily at Two, and in the Evenings at Half-past Eight.—DISSOLVING VIEWS, daily at Half-past Four, and in the Evenings at a Quarter to Ten.—Also a series, exhibiting scenes in the ARCTIC REGIONS and CEYLON, daily at One o'clock.—Admission, 1s.; Schools, Half-price.

TO CORRESPONDENTS.

F G.—The Naval and Military Prize Medals are engraved in our Journal, No. 318
R. u. Ravensworth Castle.—See Illustration next week
H R, York.—The paper we only appear in its present form
MUSICUS.—The songs are declined. The address of organ-builder is 8, New Burlington-street
A Y.—Apply at the Royal Dispensary for Diseases of the Ear, 10, Dean-street, Soho-square
A CONSTANT READER, Manchester.—The corps has not, we believe, been formed
X, Clapham common.—We are not in possession of the address
B R G, South Moulton, will, perhaps, send a wax impression of his coin. The subject of [illegible] and PAVOR DIURNUS are articles explained in the work entitled "Popular Errors."
A POOR LEIGH should buy the "Handbook to California," which will cost him but a trifle
A A and CO., Liverpool.—As the demi-figure was sketched on the wood from life, we have no further history
T B, Hadley.—We do not interfere in wagers
J H L.—The Times' new printing machine was described in the Times for December 29, 1848, quoted in the "Year-book of Facts," 1849. The machine now works 10,000 per hour
A SUBSCRIBER, Manchester.—The landlord will not be liable unless the robbery be committed through his wilful neglect
INCA.—The passage is in Shakspeare's play of "Julius Cæsar."
D R S, Banbury.—Apply for "List of Governors of the Hospital," published annually, in March, and to be had at the counting-house of the Hospital
S W B, Bamsgate; but we had not room for the above sketch
A LEE CAL FREEMASON.—The "Female Orphan Asylum is at Croydon; but the building is not yet complete.
E T, Enfield, is thanked. We have not room for the engraving
LEIGH N SQUARE MAJOR never can be in at the Charing Cross
T J E, St. Albans, may receive the paper direct from our office, by remitting his subscription in advance
AN ANXIOUS MINISTER should order our latest edition
H L O is thanked for his amiable letter on "Baptism," though we have not room to print it
B B R, Chatham, and C F YORK Hose, though useful in Ireland, do not reach the rhythm at all
W —The Whites of Yaxvil, county Somerset, bear "quarterly 1st and 4th, per pale or and azure, on a fesse engrailed az. between three greyhounds courant counterchanged a fleur-de-lis between two lozenges gu. *for White*; 2nd, az. a demi-lion ramp. az. charged on the shoulder with a fleur-de-lis or. *for Horsley*; 3rd, az. an eagle regardant between two lions ramp. as three annulets or, *for Lambert, Crest*: An arm embowed, habited or, charged with two bands wavy gu. holding in the hand a sword ppr. hilt and pommel of the last, wings expanded ppr. headed and legged of the first."
THE MENDELSSOHN SCHOLARSHIP.—As yet the arrangements at Leipsic have not been carried out.
MUSIC.—There are 19 stops in the grand organ, 10 in the swell, 9 in the choir, 8 in the combination for solo, 17 in the swell, in the pedals, and 6 pedales in all. 87 stops, or 4062 pipes in the organ at the Hall.
L M.—Study the standard works on "Composition," by Czerny, Albrechtsberger, Rink, Reicha and Logier.
SUBSCRIBER asks: "Can you tell two disputants what is the real question at issue between Professor Sedgwick and Sir Roderick Murchison," Murchison never dealt with the geology of Cumberland. In North Wales years long ago, and also on some other occasions, he differed with Professor Sedgwick as to the relative ages of the Cambrian and Silurian rocks; but the geological names above named never differed on the spot.
A LADY.—If you proceed by the Peninsular and Oriental Steam Navigation Company's steamer, which leaves Southampton on the 20th July, the amount of passage-money from Southampton to Alexandria and back is £70. If you proceed by the City of Derry Steamer, which leaves Southampton on the 27th July, the amount of passage-money from Southampton to Alexandria and back is £80. If by the steamer leaving in a later month of the year, the amount will be £90. If you proceed by the overland route, the amount will be £120. If by steam to Alexandria, and thence by stages, the journey will occupy six or seven weeks, and it will cost about £100.
F E W, Watford.—Apply to Mr. MOYES, Aldermanbury.
C C C is thanked for the numbers, but we have not room for a letter-column of Curiosities.
C C F.—There is no question but there is a considerable fall of barometer previous to the passage of the squall.
EDITH MARIA.—The present Earl of Ellesmere is second son of the late Earl and brother of the present Duke of Sutherland
OAK PLANT.—Yes, apparently so, though "a bird" without saying what bird is somewhat general for heraldry
ZEBULON.—The Hercules' College would not sanction such an adoption, though we see nothing illegal in it.
SILHUET H L.—We are assured, upon the authority of the proprietor of the farm on which silhuery-hill is situated, that no excavations have been made there since those by the Archæological Institute in the summer of last year. The report of the discoveries made at Silbury, illustrated at page 398 of our last volume, and inadvertently inserted without the customary authentication, is therefore a fabrication. We regret to see the position to a pernicious purpose at Marlborough College, to whose stores it was presented by the shakespeare Forgeries of W H Ireland, which ever embittered his after-life. The lesson may not be lost upon the Silbury hoaxer

NEWBURY.—No 1. A copper coin of Carlists, in Spain. No. 2. A copper coin of Ferdinand, King of Portugal, 14th century. No. 3. A quinarius of the Julia family
C, Bishop Stortford.—A medal of Charles II.; its value we cannot tell, without seeing the medal
C K BUTT.—The property being, as we take it, property in her own right, will if real descend to her eldest son of the first marriage—if personal, it will be divided among all the children share and share alike
A Z Z Halifax } LOCOMOTIVE.—Received
A V, Chatham. } E S J, Halifax, is thanked
*** Replies to several Correspondents are unavoidably deferred.

BOOKS, &c., RECEIVED DURING THE WEEK
Remains of Roman Art.—Cruikshank's Three Courses and a Dessert.—Vasari's Lives of the Painters.—Howitt's Year-Book.—Fun, Poetry, and Pathos.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, JULY 13, 1850.

THE growth of kindly sentiments between the civilised nations of the world—nations too long and too unhappily estranged—has of late years received many gratifying exemplifications. Perhaps, however, no proof of this good feeling has ever been given equal in value to that which France has just afforded. On the 5th inst., at the suggestion of M. Dupin, President of the French Legislative Assembly, minutes expressive of condolence on the death of Sir Robert Peel were inserted in the *procès-verbal*; and a letter has also been addressed on the same mournful subject to Prince Albert, by the French Committee for the Exhibition of all Nations. Such expressions do honour to both nations—honour to Great Britain for having produced a statesman like the lamented Sir Robert Peel, worthy of such an affectionate and respectful tribute from a great and once hostile nation; and honour to the French Legislature and people, for having had the good feeling, at such a time, to adopt so unparalleled a course. To the bereaved family of the illustrious statesman such a tribute will, of itself, be a lasting monument to the fame of their lamented relative; while to the English people it is, and will be, a testimony that the heart of France, like the heart of England, is "in the right place;" and that it will, for the future, be difficult, if not impossible, to raise enmity between two nations—the foremost in power, as they are the foremost in civilization and right-mindedness.

The proposal to erect a monument to the memory of Sir Robert Peel, by the penny subscriptions of the working classes, is also a gratifying proof that party warfare, with all its bitter animosities, is not sufficient to deaden the enthusiasm of the people of our time. We are glad, however, much as we approve of the idea of a penny subscription—an idea somewhat difficult to bring into practical operation—that a popular subscription, including and inviting poor men's pence, but not refusing the shillings or pounds of wealthier people, has been substituted for it. If a properly-organised machinery of collection be instituted, there can be little or no doubt that a sum will speedily be raised, more than sufficient to erect an appropriate and enduring monument to the memory of Sir Robert Peel. With much modesty and delicacy, and acting in obedience to the often-repeated wishes of the dead, the family refused the public funeral offered by Lord John Russell, on behalf of her Majesty and the nation; but even the wishes of his relatives, supposing them to be expressed, would not be allowed to stand in the way of such an expression of the popular respect as would be conveyed by a subscription for a public monument. The nation owes it, not simply to the memory of departed greatness, but to its own sense of what is right, and also in a degree to the influence of such memorials upon the minds of living and yet unborn statesmen, to erect to the memory of Sir Robert Peel a monument which shall unmistakeably testify its gratitude and respect for one who served it so wisely and so well. That monument will be finally be raised; and prove to after ages that the great statesman did not miscalculate or misinterpret the character and temper of his countrymen, when, in the day of his defeat, and on the last occasion when he addressed the Legislature as a servant of the Crown, he expressed his hope "that he would leave a name to be remembered with expressions of goodwill in the abodes of those who earned their daily bread by the sweat of their brow." Among the thousands and tens of thousands who may contribute towards the monument, none will give their aid more cheerfully than the working-men, who shall pour into the fund their hard-earned pence, difficult, perhaps, to spare, but bestowed with cordiality, to do honour to the memory of their and their country's benefactor.

THE death of the Duke of Cambridge—full of years and full of honour—is an event which, however naturally to be expected at his advanced time of life, will excite the regret of all classes. It is not, however, an event of any public importance; and into the private sorrows of the immediate relatives and friends of his Royal Highness it is no part of the duty of the public journalist to enter. We may be permitted, however, to unite our testimony to that of our contemporaries, and to bear our humble tribute to his honest merits and his spotless character. It was not until a comparatively recent period that his Royal Highness became intimately known to the people of this country. In Hanover, where he passed the prime of his life, in the distinguished position of governor and Viceroy, he endeared himself to his people by the excellence of his administration, by his steady adherence to the cause of sound constitutional freedom, and by the unimpeachable virtues of his private life. On his return to the land of his birth, when by the death of King William IV. the Crown of Hanover was dissociated from that of Great Britain, the people of England, though but imperfectly acquainted with his virtues, were quite prepared to receive him with loyalty and affection. It was not long before he became a favourite. The frankness and cordiality of his manners, his good-humoured *bruxquerie*, the intense nationality which a long residence on the Continent seemed rather to have developed and fostered than to have impaired, and his constant readiness to lend his name, his presence, and his purse to the furtherance of any good and humane object, endeared him not alone to every one with whom he was more immediately brought into contact, but with the great bulk of the public. The "good Duke of Cambridge" became the common epithet with which he was spoken of, and the epithet might, on unjustly or unappreciatingly, be made his epitaph. Great Britain has been peculiarly fortunate—at least, as far as the experience of the present generation is concerned—in the estimable private character of the various members of her Royal Family; and the late Duke of Cambridge did much to increase the effect of the peaceful and unobtrusive example set to the nation by his illustrious relatives of a younger growth. The public regret at his loss is accompanied with respectful gratitude to his memory. Though he leaves no brilliant fame behind him, he leaves a fair and honest reputation; and he who does this, whatever may be his station, has not lived in vain.

NEW LORD CHANCELLOR.—Sir Thomas Wilde has been appointed to the high office of Lord Chancellor, and will discharge its duties as Speaker of the House of Lords and Judge of the Court of Chancery until the measure for separating those functions shall have come into operation, when he will retain the former portion of the office only. Sir John Jervis will replace Sir Thomas Wilde as Chief Justice of the Common Pleas. Sir John Romilly is to be the new Attorney General, and will be succeeded in the office of Solicitor-General by Mr. Cockburn.

POSTSCRIPT.

HOUSE OF LORDS.—FRIDAY.

The Metropolitan Interments Bill, the Court of Chancery Bill, and the Parliamentary Voters (Ireland) Bill were each read a third time and passed

The Commons' Amendments to the Railways Abandonment Bill were, on division, rejected by a majority of 38 to 34. Adjourned.

HOUSE OF COMMONS.—FRIDAY.

The House had an early sitting, at twelve o'clock, which was occupied in the discussion of the clauses of the Medical Charities (Ireland) Bill.

In the evening sitting, the House resumed at five o'clock.

NEW WRIT FOR SOUTHAMPTON.

On the motion of Mr. HAYTER, a new writ was ordered for the election of a burgess to serve in Parliament for the borough of Southampton, in the place of Alexander James Cockburn, Esq., who had accepted the office of her Majesty's Solicitor-General, and thereby vacated his seat for Southampton

NEW WRIT FOR DEVONPORT

On the motion also of Mr. HAYTER, a new writ was ordered to be issued for the election of a burgess to serve in Parliament for the borough of Devonport, in the place of Sir John Romilly, who had accepted the office of her Majesty's Attorney-General, and had thereby vacated his seat for that borough.

NEW RIDE IN KENSINGTON GARDENS.

Mr COCHRANE asked her Majesty's Government whether they would support an humble address to her Majesty, praying her Majesty to assign a part of Kensington Gardens as a ride for ladies for next year, in consideration of the ground which would be taken for the Exhibition, and the injury done to the ride in Rotten-row

Lord SEYMOUR replied that a motion for an address would be quite unnecessary, because her Majesty had some time since given directions that an inquiry should be made with the view of ascertaining what further accommodation ought to be given to those who rode in the park, without interfering with the enjoyments of any other portion of the public.

IMPOSITIONS ON EXPORTS OF PORTUGUESE WINE TO ENGLAND.

Mr. Alderman THOMPSON wished to know whether the noble Lord the secretary for Foreign Affairs had received any satisfactory answer from the Portuguese Government to the remonstrance of the importers of wines, the produce of Portugal, against the impost of £6 per pipe on wine exported to England, when 6d. per pipe only was charged upon wine exported to America

Lord PALMERSTON said communications had been made to the Portuguese Government on the subject, which was of considerable importance to the British consumers, but he was not able at present to state that the Government had received any satisfactory answer. There could be no doubt that this difference of duty was not only a great injury to the British consumer, but also a great injury to the Portuguese wine-grower. The hon. gentleman might be assured that her Majesty's Government would make those representations which they thought most likely to induce the Portuguese Government to alter their intentions

SUNDAY LABOUR IN THE POST-OFFICE

Mr. SPOONER asked the First Lord of the Treasury whether it was the intention of her Majesty's Government to lay before Parliament the report of the Commissioners appointed to inquire into the working of the Post-office regulations respecting Sunday labour, together with the evidence taken before these Commissioners? Also, whether permission would be given to any parties who might require it, to produce evidence before such Commissioners?

Lord J. RUSSELL said he would lay the report of the committee on the table of the House as soon as it was made. With respect to the other question, he did not think it would be necessary for that Commission to take any evidence, except of a documentary character

PATE'S TRIAL.—BARON ALDERSON.

In reply to Mr. G. Thompson, Sir G. GREY said he had read the report of the Judge's observations in passing sentence upon Pate for the recent outrage upon her Majesty, but that he had not thought it necessary to make any communication to the learned Judge on the subject.

NATIONAL MONUMENT TO SIR ROBERT PEEL.

Lord JOHN RUSSELL moved that the House resolve itself into committee of the whole House, upon the subject of an address to the Crown, praying her Majesty to be graciously pleased to direct a monument to be erected in Westminster Abbey to the memory of Sir Robert Peel. It was unnecessary for him (Lord J. Russell) to adduce reasons why that course should be pursued, for the House had already evinced the deep sense it entertained of the services of the late great statesman. With respect to the other question, he precedents in the cases of Mr. Perceval and Mr. Canning; for in these, provision had been made for the families of the deceased statesmen. Her Majesty had intimated to Lady Peel her wish to confer upon her the same honour which had been conferred upon Viscountess Canning; but Lady Peel had declined to change the name by which her late husband was known to the world. It was found, also, that Sir Robert Peel had, in his will, expressed a desire that no mention of his name should be made of any title or public reward for any public services supposed to have been rendered by him. Under these circumstances they could only erect a monument to the memory of the late Right Hon. Baronet. The noble Lord mentioned the names had accordingly chosen Mr. Hampden and Lord Falkland to carry out that object in the most appropriate manner.

The House then went into committee, and on Mr. Bernal putting the question, it was agreed to.

NEW WRIT FOR TAMWORTH.

Mr. GOULBURN then moved that a new writ be issued for the borough of Tamworth, in the room of the late Sir R. Peel.—Agreed to.

THE PIRATES OF BORNEO.

Mr HUME moved an address to her Majesty, to appoint a Royal Commission of Inquiry into the causes which led, since the year 1841, to the employment of the naval and military forces of her Majesty and the Hon. East India Company on the north-western coast of the island of Borneo; and which resulted in a state of war of life on the part of certain native tribes of that island, called Sarebas and Sakarran, reputed to be pirates

After a short discussion, in which Sir F. BARING opposed the motion on the part of the Government, it was negatived by a majority of 169 to 78

The House then went into Committee of Supply on the miscellaneous estimates, the discussion on which occupied the rest of the evening.

Adjourned at a quarter past one o'clock

FUNERAL OF HIS LATE ROYAL HIGHNESS THE DUKE OF CAMBRIDGE.—The remains of the late Duke will be removed on Tuesday morning, at an early hour (it is at present stated about seven o'clock), for interment at the private chape. of New Palace. The inscription on the coffin is as follows:

DIEPOSITUM HUJUSCE MORTALITATIS
DIEPOSITUM HUJUSCE MORTALITATIS

JUDGMENT ON WALTER WATTS.—At the Central Criminal Court, yesterday (Friday), *Walter Watts*, the late lessee of the Olympic and Marylebone theatres, was placed at the bar to receive judgment. Mr. Baron Alderson, in passing sentence upon the prisoner, said he had been convicted at the May session of the offence of stealing a piece of paper, the property of the Globe Assurance Company, to whom he was a servant; but a question having been reserved for the opinion of the Criminal Court of Appeal, which had been decided against him, and he was now to receive sentence upon that conviction. The offence, according to the finding of the Jury, appeared to be of a very trifling character, merely stealing a piece of paper; but, in point of fact, the piece of paper in question was a cheque representing the sum of £1400, which sum he had appropriated to his own use, and his object in stealing and destroying the cheque was to prevent a discovery of his offence. Although, therefore, he was only convicted of stealing a piece of paper, it was perfectly clear that he must have either forged the cheque in question, or that he had stolen it from his employers; and in either case the offence was of a most serious character: and there was very little doubt that this was not the only case in which he had plundered the company The Court would therefore pass a sentence upon him for what he really had done, and not for the particular charge upon which he had been convicted; and he thought it right to make these observations because it might otherwise have been thought that the punishment he was about to direct was a very severe one for the offence of which he had been convicted. Under the circumstances the sentence was not known. His Lordship then sentenced the prisoner to ten years' transportation. Mr. Bodkin said, that it was not intended to proceed with any of the other indictments against Mr. Watts, which were lodged in court that the whole amount of the prisoner's defalcations was £80,000.

LATEST FOREIGN NEWS.

FRANCE.

Our accounts of yesterday (Friday) show that the French journals are all in dignified state over the vote of the Assembly on Wednesday, compelling the writers of leading articles to affix their names to their several contributions. The *Journal des Débats* and the *Ordre* consider this revolution in journalism as injurious to the best interests of the press, and as altogether useless in the suppression of licentiousness, inasmuch as all reasonable guarantees exist at present to effect that object.

On Thursday a motion was made in the Assembly to rescind the decision of the previous day; but, after some discussion, it was rejected by a majority of 128—thus ratifying the vote that all leading articles must have attached the names of their authors

By the returns made in compliance with the new Electoral Law, we learn that the individuals deprived of their franchise will not be less than 6,000,000, or equal to two-thirds of the whole electoral body

The project of an act for paving the bed and of Guadaloupe in a state of siege was carried by 447 to 195.

Thepalics have discovered 3690 ball-cartridges in a house at Perpignan

METROPOLITAN NEWS.

PUBLIC MEETINGS.

WORKING MAN'S MONUMENT TO SIR R. PEEL.—A special meeting of the committee, appointed for carrying out the proposed plan for the erection of a monument to the late Sir R. Peel, was held on Monday evening, at the Committee Rooms, Belvidere Tavern, Pentonville, Mr. [illegible], in the chair. The secretary, Mr. J. Downes, entered into an explanation of the plan which had been suggested for the purpose of raising subscriptions. It had been proposed that a large number of subscription lists should be provided, each to contain 240 penny subscriptions, amounting to one pound, which, after being officially sealed by the secretary, should be distributed in every part of the kingdom, and be returned to the metropolitan committee when full: he then read the letter from Mr. Cobden. Mr. Hume, M.P., expressed his approval of the general outline of the plan proposed, but warned the committee against wasting their energies in attempts to do too much. He suggested to them, that instead of attempting to organise a plan of operations which should embrace the whole kingdom, they should limit their own exertions to the districts in their immediate vicinity; their secretary merely communicating with the mayors of towns, the leading men in the various parishes, and with a large manufacturing establishments, &c., enclosing forms of subscription-lists, and an explanation of the course they were themselves pursuing, but leaving the details to be arranged as those who undertook the matter might judge to be most advisable. He stated that he had already received communications from the mayors of Southampton and Bilston, and from other gentlemen of influence in various parts of the country, all of whom had expressed their cordial concurrence in the object they had in view, and their willingness to do their utmost to promote it; and he had no doubt that if the course as recommended were adopted, the appeal which was made to the country would be warmly and universally responded to. The business should be proceeded with, afterwards retired, in order to attend to his duties in the House of Commons. Mr. Coppock objected to the word "penny" in the title of the subscription fund, which limited the subscription to so small an amount, and contended that the expenses which must necessarily be incurred in the collection would be so great as to deduct very largely from the sum subscribed. He moved that the word penny be expunged, and that the title should be "The National Working Men's Subscription Fund." The motion was seconded by Mr. Finch, and after a little opposition, was agreed to.

ROYAL FREE HOSPITAL.—At the quarterly meeting of the governors of the Royal Free Hospital, Gray's-inn-road, held in the board-room, on Wednesday, the report stated, that during the past three months, 183 in-patients and 6389 out-patients had been relieved. Regret was expressed that one of the large wards, containing fifty beds, was still unavoidably closed, for want of funds.

ROYAL FREEMASONS' SCHOOL FOR FEMALE CHILDREN.—On Thursday a general court of the governors of this society was held in the Freemasons' Tavern, Great Queen-street, Lord Ashburton in the chair. The expenditure for the last quarter, amounting to £418 14s., was approved, leaving a balance in the treasurer's hands of £684. Five children having been admitted to the school, the meeting separated.

ROYAL ASYLUM OF ST. ANN'S SOCIETY.—A special meeting of this society was held on Thursday, at the London Tavern (the Rev. D. Laing, LL.B., in the chair), to consider a proposition for taking the next at future elections from one to four, instead of twelve in June, as heretofore; the society meeting, as usual, at eleven o'clock, and thereby extending the time for the conduct of other business from one to ten hours. After considerable discussion, in which it was pointed out that the ordinary business was usually transacted in about twenty minutes or half an hour, the meeting separated.

THE WALKER TESTIMONIAL.—On Wednesday afternoon a public meeting was held at Herbert's Hotel, Palace-yard, Westminster (Lord Ingestre, M. Stuart, M.P., in the chair), to adopt measures to present to George Alfred Walker, Esq., surgeon, a testimonial of gratitude for his eminent and successful efforts in abolishing intramural interments. The noble chairman, Messrs. B. Cabbell, M.P., C. Lushington, M.P., G. Thompson, M.P., Dr. Johnson, Dr. Reid, Dr. Smith, Mr. Geeson (churchwarden of St. James's, Westminster), and Dr. Aldis addressed the meeting in terms highly laudatory of Mr. Walker's public services, and condemnatory of the slight with which they had been treated. It was ultimately resolved to present that gentleman with a solid testimonial of his country's gratitude, and a committee was appointed to take measures for that purpose. Lord Ingestre, M. Stuart, and Mr. Cabbell, treasurer, and Mr. Thompson that of honorary secretary. The chairman and Mr. B. B. Cabbell subscribed £10 each.

ESTABLISHMENT FOR GENTLEWOMEN DURING ILLNESS.—A number of the subscribers to this interesting association was held on Wednesday at the Queen's College, Harley-street, for the purpose of having submitted to it a report of the progress hitherto made by the managers of the association. The Earl of Carlisle presided on the occasion. The Hon. W. Spring Rice, the hon. secretary, read the report of the managers, from which it appeared that the liberal assistance which had been afforded to the undertaking had been quite sufficient for the committee to take premises suitable, though a small scale, for the purpose of the institution, for a period of three years and a half, at No. 8, Chandos-street, Carundish-square. The total amount of subscriptions already exceeded £2000, the balance in the hands of the bankers amounting to £403 The number of patients admitted since the opening of the institution had been thirteen, of whom six were at present inmates of the establishment. The services of the medical staff attached thereto had been obtained, the physicians being Dr. Watson, Dr. Ferguson, Dr. H. Jones, and Dr. Weber; surgeons, B. Travers, Esq., C. Hawkins, Esq., and W. Bowman, Esq.; Mr. Hawksley, of Margaret-street, having been appointed the general apothecary. The Rev. C. Baring, the rector of All Saints, had also consented to act as honorary chaplain to the institution. The report was adopted after addresses from the noble chairman and the Bishop of Oxford in advocacy of the institution

ROYAL HUMANE SOCIETY.—At the half-yearly general court of the governors and directors of this society, on Wednesday, at their office, 4, Trafalgar-square, Mr Benjamin Bond Cabbell, M.P., in the chair, R. S. Trestary (Mr. Hartley) reported that the number of persons rescued from the ice, in the three parks, during the last skating season, amounted to 79. The number of bathers in the Serpentine during the present year has been estimated at 60,000, of whom 40,000 were in the habit of resorting to the Serpentine, and all unsafe parts have been strictly forbidden, by which there can be no doubt many accidents have been prevented. The secretary reported several cases which the committee had recommended, and in each of which the silver or silver medal was awarded. Mr. Oliver brought before the notice of the society a useful and ingenious invention which had recently been made by Lieutenant Halkett, R.N. This article, which is called the boat-cloak, has the appearance, when uninflated, of a large common cloak, and may be worn as such upon the shoulders; it is made of many a bellows in 34 minutes, when it forms a kind of boat, capable of supporting six or eight persons, and which is almost impossible to overturn. He invited the directors to appoint a day for witnessing further experiments, and thus having the opportunity of judging for themselves of the practical value of the invention. It was ultimately resolved that an experiment should take place on the Serpentine, this (Saturday) morning, at 11 o'clock.

HIGHLAND SCHOOL SOCIETY.—The anniversary festival of this excellent society, established in the year 1701, for the education of destitute in the islands and highlands of Scotland, was celebrated at the London Tavern on Tuesday evening, Captain Forbes (described by Mr. B. B. Cabbell, M.P., in proposing his health, as the worthy son of a worthy sire) presiding. The usual loyal and patriotic toasts having been drunk, and appropriate testimonies borne to the memories of the Duke of Cambridge and Sir R. Peel, both of whom were patrons of the society, the chairman made an eloquent appeal on behalf of the charity, and was responded to by a subscription of nearly £200, including £10 from her Majesty, £50; the late Duke of Cambridge, £10; the Chairman, £10 10s.; two of his youthful sons, £1 is. each, the chairman's piper, £1 1s., &c. The harmony of the evening was much increased by the exertions of the chairman's piper, the boys of the Caledonian Asylum, and an efficient corps of vocalists, under the direction of Mr. Land, Mr. Milne being specially called upon to sing "The rose among the heather," composed, in honour of her Majesty's first visit to the Dee side, by Mr Robert Taylor, of Aberdeen.

BIRTHS AND DEATHS.—Births registered in the week ending Saturday, July 6:—Males, 640; females, 607; total, 1247. Deaths during the same period, males, 466; females, 388; total, 784; a return which shows that the diminished rate of mortality continues, and which, taking the corresponding weeks of ten previous years, is less than in the week of any year since 1842. The average of the ten weeks is 877; or, augmented in the ratio of increased population, 957, compared with which the decrease of last week amounts to 163 The whole number of deaths recorded as caused by the zymetic or epidemic class of diseases is 159, whereas in the same week of last year they rose to 393, and the corrected average of corresponding weeks is 227. To take particular epidemics: small-pox carried off six persons, the half of whom were children; measles was fatal in 17 cases; scarlatina in 30; hooping-cough in 52; all of these exhibiting a mortality less than the usual amount. Typhus, of which 33 persons died, shows the ordinary amount of mortality; but it is much less fatal than in the same weeks of 1847-9. On the other hand, diarrhœa continues to increase, as is usual at this season, but its progress is not remarkable. In the week just four weeks the deaths from it, for the most part among children, have been 17, 18, 33, and (last week) 40. The average is 27. A case of English cholera is thus recorded:—"On the 4th of July, at No. 3, Pembroke-place, Upper Marsh, Lambeth, a boy of seven years, the son of an engineer, died of 'English cholera (14 hours), dropsy (9 days), effusion into the pleura (12 hours)." Excessive intemperance, from diseases of the respiratory organs, is recorded as only 70, which is less than in any corresponding week of 1840-9, having ranged from 76 to 96. From consumption there were 121, whereas they fluctuated in the ten corresponding weeks from 116 to 152 On the 3rd of July, at Sir George's assistant, aged 18 years, died in St. George's Hospital, to which he had been brought from Kensington, of "chorea (9 days), softening of spinal chord," *post mort.* In the sub-district of Saffron-hill, a skin-dresser, aged 43, died from "diffuse inflammation of cellular membrane of chest and neck from the absorption of some animal poison (3 days)" A man and woman died from intemperance.

METEOROLOGICAL OBSERVATIONS.—The mean reading of the barometer in the week was 29·765 inches. The temperature varied little during the week, and the mean was 59·6 deg., slightly below the average of the same week in seven years. The wind blew during the first four days from the south-west, and afterwards generally from the west.

THE NEW POSTAL DERANGEMENTS

The public mind in town and country is beginning to awake to a sense of the vast inconvenience and practical absurdity of the restrictions recently imposed on postal communication upon Sundays. Meetings are held, resolutions passed, and petitions to Parliament adopted, earnestly demanding the immediate abrogation of the mischievous obstruction to the intercommunion of thought—of charitable and affectionate sentiments, hopes, and wishes on the Lord's Day, which has been foisted, by a Judaizing fraction, upon the great body of the Christian community of this country.

The following curious piece of private Parliamentary history on the subject has found its way into the columns of the *Times*, in a letter to the Editor. It bears the significant signature, M.P.:—

TO THE EDITOR OF THE "TIMES."

SIR,—The leader of a political party, whether he be in office, and actually enjoying the good things thereof, or in opposition, and therefore only indulging in the prospect of future advantage, owes something not only to the party which he [illegible] interests and connivance, but to the care of the [illegible] The very [illegible], and aims [illegible] interests of the party [illegible] its selected chief. Good faith is needed to beget confidence [illegible] quisite for success. He, then, who as party leader breaks faith with his friends, paralyses their efforts, chills their zeal, and frustrates their legitimate hopes. And he thus not only thwarts and offends his followers, but he does a disservice to his country, by checking the advance of those opinions which he has been chosen to advocate Unfortunately for the so-called Liberal party, such is their present unhappy condition. Last night, sir, gave us an instance of Lord John Russell's own peculiar mode of dealing with his party. I am divulging no very hidden mystery when I say that the motion made by Mr. Locke with respect to the regulation of the Post was a motion concerted with and agreed upon by the Ministers themselves. [illegible] were sent round marked with the usual signs of official urgency, certain divisions were privately scored, and all the usual machinery for powers removed inwards of the Twelve in consequence of the Ministerial mandate The debate began Mr. Locke supported his motion by a very temperate, yet effective array of arguments and of facts; and when everybody supposed that a distinct division was about to be taken on the question, Lord John Russell—without pressure from his opponents—without suggestions from his friends—adopts the diminution of the resolution by two-thirds. The opponents of the noble Lord were not slow to profit by his unskilful-for generosity. Lord Cardwell at once conceived a resolution for the noble Lord and that which, coming from a declared and earnest friend, would have been coldly refused, was eagerly accepted and earnestly supported, because it came from a hostile quarter. The result was inevitable: the real pith of Mr. Locke's resolution was taken away, and the course which Mr. Hume proposed to Lord John Russell *before* the alteration in the plan of Sunday delivery, and which he—Russell—suggested to Mr. Hume, a steady supporter—was contumeliously put aside, was adopted *after* the mischief had been done, simply because Mr. Cardwell proposed it. "Inquire," said Mr. Hume, "before you alter the established custom." "Inquire," said Mr. Locke, "and while inquiries return to your old long-established custom." To both a deaf ear was turned. "Inquire, if you like," said Mr. Cardwell; "but adhere while inquiring to the novel scheme which you yourself say is fraught with inconvenience to the public." There was something so captivating in an opponent's proposition that resistance was impossible. That arrangements had been previously made, arrangements entered into, bets booked, and sweeps commenced on the part of friends—all these things were considered as worthy of no consideration. Many old friends were consequently hurt and offended: but Mr. Cardwell was conciliated. Such is the new process of framing and maintaining friends and supporters adopted by the leaders of the Liberal party. The indignation and surprise openly expressed behind the Treasury bench could hardly have escaped the ear of Lord John Russell; but his colleagues are beginning to get familiar to us all practically, they could not fail to hear ominous murmurings of discontent and anger, and hearing to understand them. When next a rally of friends is needed to prevent a Ministerial defeat, the sufferations of the eager underlings may be dangerously rebuffed by a most efficient medicine to the contemptuous disregard of old friends last night evinced by the Ministerial leader.

July 10. I am, Sir, your obedient servant,

M. P.

(*Petition from Lloyd's.*)

The following is a copy of the petition of the underwriters of Lloyd's on the question.

To the Honourable the Commons of the United Kingdom of Great Britain and Ireland in Parliament assembled, the petition of the undersigned merchants, underwriters, and others, members and subscribers to Lloyd's, humbly sheweth

That your petitioners have already experienced great commercial inconvenience from the recent alteration of the postal arrangements, by which the Sunday transmission of letters throughout the kingdom has been declared illegal.

That the evils which will ensue from the present prohibition are calculated to outweigh any advantage that can possibly arise from it. That in a commercial country like England, unless the business of the empire can be stopped simultaneously with the stoppage of the correspondence by which that business is carried on, the effectual action of such legislation as that referred to by your petitioners is dangerous and impracticable. That cessation of the law must and will take place, and the penalties on the correspondent will not be regarded by the mass of the community as any stigma on those who incur them; and that to give rise to such a feeling in the country as is implied in this result is to expose the legislation of the British Parliament to disgrace and vilification.

That your petitioners do not think it necessary, so obvious do they conceive the mischief to be which will arise from this proceeding of the legislature, to do more than allude to a few of the effects which will flow from it, and which appear to them to stand conspicuously forward for its impolicy.

That it frequently happens that the American, West Indian, Brazilian, and other foreign mails, all bound to outports, and all conveying important commercial intelligence, and frequently the speculations of the country, acquires to be immediately acted on, arrive on the Saturday too late for post, or on Sunday, in which case, under the present disabilities imposed on the collection, forming, and despatch of letters, are kept over the Monday, thereby causing a detention of the advices brought by such conveyances until the Tuesday's delivery. That in order to anticipate the effects of such an injurious state of things, means will be found to evade the breach of the present law to convey information through private channels, and that consequently the practical operation of such a law will be in numerous cases to insure its own violation.

That by this detention of letters in the Post-office your petitioners will be deprived of the opportunity of protection of nearly £200,000 sterling premium of insurance, a matter respecting which a single day's delay is often of the most vital consequence

Your petitioners therefore humbly and earnestly pray your honourable House, that measures may be taken to ensure the despatch of letters by mail, by steam, under the recent limitations of the Postmaster-General. And your petitioners will ever pray, &c.

(From the *Birmingham Journal.*)

It gives us great pleasure to state that, with one dissentient, the Town Council has resolved to petition Parliament to rescind the last vote for stopping postal communication on Sunday. The experience of two weeks has more than justified all the objections made as to the peculiar circumstances of the country. A mode of written communication; for not only have social interests and affections been grievously pacified, but the restriction has also had the effect of compelling Sunday desecration. Sunday trains for the purchase of the present law to convey what have been started: country news-agents, hitherto transacting their seventh-day business by means of a metropolitan despatch, on Saturday night, have been obliged to open their establishments on the Sunday; messengers, during the duty for one man which the Post-office did for thousands, are employed in every case where delay would be inconvenient; and, to crown all, the law is systematically evaded by letters being delivered by private hand in the form of parcels There are a few of the consequences of a departure from the simple elements of common sense. Let any of the Sabbatarians for a moment consider the economy of his own household, and it will be evident to him that it is impossible as it is absurd to attempt to keep the Sabbath in the judaical sense of the term. While we are at this point, let us remind them of the remarkable saying of Jeremy Taylor—"Though we have more natural and proper reason to keep the Lord's Day than the Sabbath, yet the Jews had a divine command for their day, which we have not for ours." This is the marrow of the question, the Sabbath was made for man. There is no reason, human or divine, for the sacrifice of social affections on the altar of a puritanical formality;

Of the meetings which have been held, to petition Parliament against the obstruction, we have only space to notice a few of the more prominent:—

A public meeting was held on Monday evening, at the London Tavern, for the purpose of considering the steps necessary to be taken for immediately rescinding the vote which brought about the present postal derangement. Mr. Douglas Jerrold was announced to take the chair, but was from some reason or other unable to attend, and Mr. Williams, late member for Coventry, presided over the meeting, which was so numerous (consisting of upwards of 2000 people) that an adjournment took place to the large room up-stairs, which was immediately crowded to excess. The Sunday resuscitationist party mustered in full voice, if not in full force, and the whole meeting passed off in uproar, which was not diminished by the appearance of Duncan, the bearded "Chartist poet," who, after jumping on the table in his usual style, and scattering dismay among the bystanders, was borne off by the police. The first resolution, "That the closing of the Post-office on Sunday for the delivery of letters and newspapers, is arbitrary and unjust, and that this meeting considers such a proceeding opposed to the wishes and feelings of a large mass of the people, and pledges itself to make every lawful exertion to get the recent order for closing the Post-office on Sunday immediately rescinded," was proposed by Mr. Hodgkin, and seconded by Mr. [illegible]. To this the following amendment was moved by Mr. Lee and seconded by Mr. Grey:—"That this meeting is of opinion that the new postal arrangements, being the result of a constitutionally expressed wish of a large and influential portion of the community, ought not to be rescinded until they have had a fair trial." Mr. R. R. Moore then spoke against the amendment; and several other gentlemen having also addressed the meeting, amid continued interruption from one part of the assembly or another, the original motion was carried almost unanimously, there being only two or three dissentients; and a petition to Parliament was founded upon it was agreed to. The meeting then separated

At Newcastle, on Monday, a public meeting was held in the Guildhall, convened by the Mayor, in compliance with a requisition numerously signed, for the purpose of petitioning Parliament to re-open the Post-office on Sundays. The Mayor, Joseph Crawhall, Esq., was in the chair. Dr. Headlam moved the first resolution, which was, "That the closing of the Post-office on Sundays has been attended with great public inconvenience." The motion was seconded by C. Allhusen, Esq.—The Rev. J. C Bruce moved, as an amendment, "That the present arrangements at the Post-office be continued, and that a memorial to that effect be signed by the Chairman on behalf of the meeting."—The Rev. Richard Oliver seconded the amendment. The subject was very warmly discussed by the above-named gentlemen, and by the Rev. J. C. Rogers, Mr. George Charlton, and Mr. John Benson, in favour of the amendment, and by Mr. J. Shield, Mr. Stanley Hicks, and Mr. G. Crawshay, in support of the original resolution. A show of hands was then taken, which showed a large majority against the amendment, and in favour of the original motion The meeting was then unanimously agreed to, the subject was very ably discussed on both sides, and the proceedings excited the liveliest interest. On the motion of Sir John Fife, seconded by Mr. N. G. Lambert, petitions to both Houses of Parliament were agreed to for the repeal of the recent regulations for the closing of the Post-office; the petition to the Lords to be presented by Lord Brougham, and that to the Commons by Mr. Ord. Thanks were then voted to the Mayor, and the meeting broke up.

An influential meeting was held in the Town Hall, Bakewell, on Friday week, for the purpose of petitioning Parliament against the recent Post-office regulations. The petition set forth the injustice of the step taken by Government on an unshaken resolution of the House of Commons alone. That the petitioners were as zealous as any men could be to preserve the sanctity of the Sabbath, and expressed their conviction that, on the aggregate, Sunday labour had been increased rather than diminished by the new regulations. William Underwood, of Castle Hill, one of the magistrates for the county, was called to the chair, and briefly explained the object of the meeting. Joseph Paxton, Esq., of Chatsworth, stated that the petition just read should be adopted by the meeting, and circulated for general signature. He pointed out at some length the excessive inconvenience to which men in business were liable from the non-delivery of letters on Sunday, and forcibly illustrated, from his own practical observation, how greatly the general labour throughout the country was increased. Mr. Nineteen, Esq., a county magistrate, seconded the motion. The Rev. Mr. Ellison, of Edensor, opposed the motion.—Mr. Bell, Esq., of Bakewell, replied to Mr. Ellison. He entirely agreed with Mr Ellison on the necessity of the observance of the Sabbath, which was, indeed, the emphatic prayer of the petition. He concluded the oratorical speech of Mr. Underwood, the magistrate, by a quotation from Canning in the Congress on the same [illegible] ried almost unanimously, four hands only being held up against it. In the course of a couple of hours the petition received a great number of signatures, and was forwarded the same evening to the Hon. G. H. Cavendish, one of the members for North Derbyshire, for presentation

OFFICIAL NOTICE OF CONTEMPLATED REDUCTION IN LETTER CARRIERS' WAGES.

The following Post-office instructions, which have been issued to the deputy postmasters since the cessation of Sunday duty, is a fitting pendent to the Ashley-Derangement:—

"A great inconvenience has resulted from postmasters having in many instances neglected to dispatch bags on Sunday last, I am directed by the Postmaster-General to inform you that the bags must always be dispatched on Sundays, as heretofore, whether there are letters or not to be forwarded in them, and that in either case the bag must contain a bill in accordance with the usual practice.

"To enable the Postmaster-General to decide what reduction shall be made in the wages of letter-carriers and rural post messengers, in consequence of the diminution of their labour effected by the arrangements which came into [illegible] the 23rd ult., I have to desire you will immediately furnish the [illegible] made by each letter-carrier [illegible] and the [illegible] have been relieved from work on Sunday within the last twelve months, without any reduction being made in their wages?—What are the wages of such messengers? reduction being made in their wages?—What are the wages of such messengers? —The grounds of the relief which may have been afforded to the clerks will be the subject of a future consideration."

With reference to the latter instruction, there are nearly 20,000 town and country letter-carriers, whose wages average about 14s. or 15s. a week. A reduction of one shilling per week from the wages of each of these persons would economise the Post-office expenditure to the amount of £50,000 a year.

O'Connell,

THE FUNERAL PROCESSION PASSING DRAYTON MANOR.

FUNERAL OF SIR ROBERT PEEL.

ACCORDING to his own solemnly expressed desire, the body of Sir Robert Peel was, on Tuesday last, borne, without pomp or parade of any kind, by his private friends and blood kindred, to its holy but humble resting-place beneath the simple aisle of the parish church of Drayton Bassett. Meagre as was the ceremonial, unostentatious the rites with which the great Commoner was laid in the narrow bed, public feeling could not have been more profoundly and universally moved -public sympathy and deep and sorrowing respect could not have been more genuinely excited, had the illustrious dead been borne to its resting place in the chancel where Fox and Pitt lie side by side with all the gorgeous pomp and pride of funereal blazonry officially put forth in token of a nation's gratitude and woe. The accounts which have reached us from all parts of the country show that at the solemn hour when his body was being borne, attended by troops of weeping friends, to the grave, demonstrations of sympathy and of mourning were being made in every great centre of population, rural and manufacturing, throughout the kingdom. Although a few mutes and mourning-coaches made up the simple procession at Drayton, at the hour when it was slowly wending its way through quiet country fields and roads which the dead statesman had loved so well, shops were darkened—business suspended—funeral bells were tolling, and half-mast colours flying, in every notable town of England. Nominally, the funeral was private; but the British public were loth to give up, even in the hour of death, their claim to their greatest statesman; and the simple Tamworth hearse bore to the tomb all which was mortal of a man with whose great name, and whose untimely death, all the island was ringing.

In the immediate neighbourhood of Drayton Manor, the ordinary tokens of public grief were displayed during the whole period from Sir Robert's death until his funeral. In Tamworth and Fazely, especially, blinds were kept closely drawn, and shop shutters partially up. Indeed, the solemn influence of the time appeared to extend to the hay-fields, and meadows, and pastures around. A Sabbath-like quiet was everywhere, and the very haymakers seemed to pursue their task more soberly and sedately than is their wont.

Drayton Manor is situated in the midst of a rich undulating park, presenting to the eye a wavy sea of green herbage, broken by fine old elms, and oaks, and thriving clumps of coppice-wood. The house is a handsome turreted Elizabethan structure, lying in the midst of shrubberies and Italian gardens, with their trim walks, statues, and vases. Not far from one extremity of the park lies the rural manufacturing village of Fazely. Here the first Sir Robert Peel erected cotton-mills, in the old fashioned style, driven by water, a plentiful supply of which is still collected into ready dams and reservoirs, from the neighbouring Tame. Skirting the park, nearly on the opposite border, lies the little hamlet and church of Drayton Bassett. The former consists simply of a score or so of scattered houses lying irregularly dispersed round the church, an unpretending structure, composed of a simple aisle and a square tower, in all respects similar to hundreds of unknown little parish churches which lie scattered throughout the nooks and corners of rural England. The body of the church has been rebuilt within the present century. The tower, with its arched, grouped, and pointed windows, and embrasured battlements, belongs probably to a late and debased period of Gothic architecture. The interior is quite as plain as the exterior. Beneath the tower is a small organ loft, with an instrument not much bigger than those Italian boys carry about the streets. A double row of bare pews carries you towards the altar, which is lighted by a large window of unstained glass, and near which stands an exceedingly plain pulpit and reading-desk. Several monuments connected with local families break the white-washed uniformity of the walls, but the attention naturally concentrates itself in a single marble slab, on which is placed the following inscription:—

In a vault
Beneath this church
Are deposited the remains of
SIR ROBERT PEEL, BART.,
Of Drayton Manor,
And of ELLEN LADY PEEL, his Wife
Daughter of William Yates, Esq.,
Of Bury, Lancashire.
Sir Robert Peel
Was born 5th April, 1750,
And died 3rd May, 1830;
Lady Peel
Was born 5th May, 1766,
And died 28th December, 1803.
Their children have raised this monument to the memory of their beloved parents,
as a token of their affection and gratitude.

The vault in question, which extends all the way beneath the church, is divided into three compartments, of which the principal belongs to the Peel family. The first Sir Robert and his wife lie in niches upon one side of the vault. Their illustrious son has been placed in the centre, upon a slab of black marble, raised some two feet above the floor of the sombre chamber. The churchyard in which the sacred structure is erected is very small, and pleasantly shaded by elm and yew trees. Altogether, the place is an excellent specimen of a humble rural parish church.

All round Drayton and Drayton Church extends a rich sweep of fertile, wooded country, intermingled with the bright green of meadow and pasture land. The white walls of many gentlemen's seats are seen shining amid their groves of ancestral trees, and many comfortable farm-steadings may be descried, surrounded by well-stocked barn-yards. Through this rich and perfectly English landscape the river Tame takes its slow way to join the Trent—its sluggish water sometimes collected into dams, in order to drive corn and a few cotton mills; the slow-moving stream, at other spots, spreading itself out into shallow ponds, clustered with thick jungles of water-weeds, and overhung by embowering willow trees. Tamworth is about two miles and a half from the Manor—the village of Fazely lying about half-way between the two places.

The hour fixed on for the funeral was half after one o'clock. The day, however, was yet early when scattered groups of people began to appear, making their way from all points of the compass towards Drayton. In both Tamworth and Fazely the shops and places of business were closely shut, while nearly the whole population, decently dressed—if not wholly, in almost all cases partially—in black, poured out to pay the last tribute to their illustrious neighbour. The morning trains brought down groups of mourners from Birmingham, on the one hand, and Stafford and Lichfield, on the other. But the greater proportion of the crowd which collected on Drayton lawn, and round the church, was composed of the population of many scattered hamlets, the very names of which are unknown out of their parishes, and of the general rural population of the district—labourers and hinds, in most cases accompanied by their wives and daughters. These poor people either exhibited some humble token of mourning, a morsel of black ribbon or crape—or they were attired in their Sunday clothes. Taking this class as forming the substratum of the assemblage, there were mingled with it many respectably attired persons, burgesses and tradesmen from the neighbouring towns. The crowd, as I have said, spread itself over the lawn, and took up stations in the vicinity of the church. A short cut across the park to Drayton, was crowded during the day with passengers; and before the old-fashioned inn there was drawn up a multitudinous army of dog-carts, tax-carts, gigs, and so forth—all varieties, in fact, of rural conveyance.

About noon a special train arrived from London, conveying a mournful party of Sir Robert's personal and old political friends, who came to officiate as pall-bearers. Their names, as well as those of all who took a part in the ceremony, will, in order to avoid useless repetition, be only given in the programme subjoined below. The gentlemen in question were at once conveyed to the Manor in mourning carriages-and-four; and about one o'clock it was expected that the funeral party would start. At this time, however, the weather, which had been gradually becoming gloomy, quite broke up. The sky to windward became a mass of dull, dense vapour. A strong cold wind came sighing and roaring through the trees, speedily bearing before it a drenching fall of rain. This delayed the departure of the procession from Drayton Manor. Upon the crowd, however, the wet made singularly little impression. A few, certainly, sought the shelter of the trees, but the great majority were not to be driven from the occupation of their vantage ground by the pelting of the storm, and stood it out staunchly in the churchyard, or around the Manor gates.

The rain lasted some twenty minutes. The day having partially cleared, preparations were made for the melancholy departure. The mourners and others were mustered by the undertaker in the hall, the coffin was lifted by twelve of

Five Carriages of Clergymen, with their carriages
The late Sir R. Peel's Private Carriage.
Mr. Rhoades, junior, on horseback. Mr. Rhoades, senior, on horseback.

The procession defiled slowly through the park, the noise of the wheels on the wet gravel and the trampling of the horses forming the only sounds of its measured progress. The attendant crowd uncovered, and in perfect silence accompanied the *corège* upon the pressyard on either hand. The hearse was covered with a rich pall, having the armorial bearings of the illustrious deceased wrought upon it in coloured satin. The motto is a significant one, and it was remarked and commented upon by many. As the greater part of our readers may be aware, it consists of the word "Industria." The prescribed route for the funeral led through the park, out upon the open road, and thence by a pleasant rural lane skirting the park to Drayton Church. At the lodge-gate 50 of the principal tenantry of the estate, bearing crape scarves and hat-bands, and well mounted, joined and headed the procession, moving two and two. After seeing the *corège* start from Drayton, a considerable portion of the crowd made for the church by the short cut, and augmented the numbers who filled the quiet churchyard, clambering upon wall and tombstone, and forming a double line from the wicket-gate to the church porch. Meantime the funeral proceeded slowly by the circuitous route adopted to the churchyard. In the midst of the most reverent stillness, it passed through the crowd, which all but blocked up the main and only street of Drayton. Then, the tenantry having reached the churchyard wicket, defiled past, and the mourning coaches set down their occupants, who clustered round the gate, waiting to be arranged in the second order of procession, in the midst of which the body was to be carried upon men's shoulders

ROOM IN THE MASTER'S HOUSE, HARROW SCHOOL.

to the church. At this moment the sky again darkened, and a smart shower of rain fell. It was at its height when the coffin was disengaged from the hearse, and from many a lip around burst involuntarily forth the old and quaint legend—

Happy is the bride that the sun shines on;
Happy are the dead that the rain rains on.

In the midst of this drenching pour, the crimson-covered coffin was borne to its last resting-place; the Bishop of Gibraltar, with a loud yet occasionally faltering voice, repeating the sublime sentences of the service for the dead. This

was the order of the sad and short march through the churchyard graves to the porch of the tower

The body having been conveyed into the church, was placed upon a settle close to the opening of the vault, and the mourners and pall-bearers were shown into the black-covered pews appropriated to them. The pulpit and reading desk were also covered with sable. The solemn service was now proceeded with amid a reverent silence, only broken now and then by irrepressible outbursts of affliction from the deeply-affected sympathetic voice of the right rev. Bishop frequently faltered and broke. It was only too obvious to all that he was performing with stern self command a most harrowing task. At length the juncture came when the dead is finally committed to the tomb. At the awful words "dust to dust, and ashes to ashes," the coffin was lowered amid without some little delay, for it was very heavy and unwieldy down into the vault, and presently reposed upon the marble slab prepared to receive it. Upon the pronunciation of the final benediction, the three sons of the late Sir Robert Peel approached the aperture, gazed down into the gloomy chamber, and took mental adieu of the illustrious dead

The rite was over—the last duty paid. Silently, with swimming eyes and pallid cheeks, the mourners came forth, leaving the famous dead, the great and good, the wise and patriotic Sir Robert Peel, to slumber peacefully with his fathers, his memory embalmed, as it will be for ages to come, in the hearts of Britain, and the story of his life handed down to all posterity in proof of the deathless honour in which a statesman should be held, who, when he sees the right, has the moral courage and the moral steadfastness undauntedly to sacrifice every party claim, in order that he may pursue [illegible] to the people.

HARROW SCHOOL.—THE SPEECH DAY.

On Wednesday, the day appointed for the delivery of the Speeches at this celebrated Academy, a numerous and fashionable assemblage met in the dining-hall at one o'clock, to witness the proceedings. The following is a list of the prizes awarded:—The Peel Medal (for Latin prose), Mr. C. S. Bayldon; the Gregory Medal (for Latin translation), Mr. H. M. Butler; Latin Alcaics and Latin Alexanders, Mr. C. S. Bayldon; Greek Iambics, H. M. Butler; Greek Translation and English Essay, H. M. Butler; English Poem, Mr. Cuningham. We regret that we have not room for a fuller notice of the interesting proceedings.

Long before the hour appointed for the speeches, a vast number of persons visited the old school-room, to see the autograph of the late Sir Robert Peel, carved in the panel, one remove from the seat of the head master. The same panel were the names of his three eldest sons—"R. Peel, 1835;" "[illegible]" and "W. Peel, 1837."

Another interesting memorial of the lamented statesman exists on a brick just removed from the wall of the house of Mr. W. Winkley, jun., at Harrow, whereon is carved the name of "Peel," which corresponds with his handwriting in ciphering-book of the same date. This autograph is engraved at page 45, with the room occupied by Mr. Winkley, and the house, then tenanted by the Rev. Mark Drury, Second Master of Harrow School

We may here remind our readers, that, in the ILLUSTRATED LONDON NEWS, Vol. III., No. 74, page 311, is an interesting anecdote of Sir Robert Peel, and a stone, on which he is said to have carved his name and a remarkable line, at Hyperholm School.

SIR ROBERT PEEL AS A STATESMAN.

In previous articles upon the lamented statesman who has been taken from among us by so sudden and so untimely a fate, we have recorded, in a biographical form, the leading events of his long, distinguished, and pre-eminently useful career, and those first retrospections and feelings of sorrow which were suggested by a deep sense of the loss the country had sustained. We now propose to enter more at length into the mental and personal character of the late Sir Robert Peel, and the influence of his legislative conduct and his public example upon his contemporaries.

It is at all times a difficult and a dangerous task to anticipate the functions of history. Impartiality is a virtue often arrogated by public writers, but seldom attained by them while they still breathe the political atmosphere in which lived and moved the personages on whom their thoughts and pens are engaged. We do not hope wholly to avoid the influence of this disturbing element; but we will we prepare ourselves to approach our duty in as reflective a spirit as is possible under the circumstances holding aloof, on the one hand, from those party passions and prejudices which seek to stain themselves under the garb of an effective political justice; and, on the other, guarding against that tendency to eulogy which is so natural when a great man passes abruptly from under the world's eye.

Many years must elapse before the effects of Sir Robert Peel's distinctive character as a statesman can be fully developed in the institutions of his country. This consummation has been still further postponed by his premature death. It will be ours to endeavour to approach our duty in as reflective a spirit as is possible under the circumstances holding aloof, on the one hand, from those party passions and prejudices which seek to stain themselves under the garb of an effective political justice; and, on the other, guarding against that tendency to eulogy which is so natural when a great man passes abruptly from under the world's eye.

Many years must elapse before the effects of Sir Robert Peel's distinctive character as a statesman can be fully developed in the institutions of his country. This consummation has been still further postponed by his premature death. It will be many rapids dexterously glided over; but the very impetus given by the accelerated action of public opinion rendered it the future more difficult of management more exigent of a firm and experienced hand. Without so far prejudging contemporaries, and anticipating the future, as to say that there is no living statesman competent to seize the helm, if [illegible] it to it a new grasp, was moved in the track marked out by his sagacity, we may at least go so far as to assume that a very extraordinary combination of unusual qualities will be required in the man who shall attain to a position to be the place which he occupied during so important a period in his country's history.

Compelled by the very nature of the subject to deal with the political career of Sir Robert Peel, we shall not regard it from a party point of view. The great [illegible] against the late Sir Robert Peel was, that, from period to period, in his public life, he devoted his extraordinary energy to resisting salutary and necessary changes in the institutions of his country, which changes he subsequently himself made, defending them and carrying them out with equal energy. It was urged against him that his whole life had been one continuous course of insincerity; that it was impossible to suppose the same mind capable, except on that supposition, of arguing on both sides of every great question with equal apparent zeal and earnestness. It is yet too early to assume the verdict of mankind on this serious imputation; but we are able, without fear, to estimate the political value of the principle on which these changes of policy were avowedly made, and to found an estimate of the statesman's motives upon his known personal character. Of all the tributes paid to his memory by his contemporaries, the most touching and the most trustworthy was that which fell from the faltering tongue of the illustrious chieftain who had been his colleague and his friend almost from the commencement of his career. The Duke of Wellington put the key stone to the character of the deceased statesman's political reputation, when he said that his distinguishing trait was the love of TRUTH. A public judgment must necessarily be arrested and suspended by this solemn evidence, derived from long private knowledge. The Duke of Wellington would not have committed himself to so pointed and emphatic a declaration, if he had not felt that this element was wanting in the imperfect materials out of which posterity would have to form its opinion of Sir Robert Peel. Our own view of this question in political morals rests upon conditions wholly different from those which regulate an estimate of private and personal character; but, as the grave imputations, laid during his life, against Sir Robert Peel, and hinted at since his death, touched his motives, it is only just to him to dwell upon this commendatory testimony. The Duke of Wellington's guarantee of the private probity of his illustrious friend, receives, we are bold to say, an emphatic support in the deep conviction of mankind in general that no man did for his party what he did for his country. The Duke of Wellington also well knew how difficult it is for the contemporaries of Sir Robert Peel to come to a judgment, because he was himself the founder and teacher, by example, of the new system of constitutional policy, whose action, within the last quarter of a century, has saved England from those internal convulsions which, in other countries, have threatened the very existence of society itself.

In having [illegible] that this new system of policy was necessary, and in having adopted it [illegible] of all imputations on his character, lies the justification of the late Sir Robert Peel against this charge of inconsistency and deliberate political treachery. It is a striking proof of the imperfection and infelicitousness of human judgment that a charge of political cowardice and its baser accompanying errors should have been founded on that very feature in Sir Robert Peel's character which, in most minds, must attract his moral courage and statesmanlike spirit. He it was who, on introducing the Roman Catholic Relief Bill, first dared to become the interpreter, in a totally new reading, of the British Constitution. Looking at the Bill, as it was then viewed by the country, and so long kept up, against the doctrine that "expediency" should be the rule of conduct for British statesmen, one is only the more disposed to admire the foresight and intelligence of the statesman who, in the full zenith of his fame, had yet the moral courage to dictate to the nation, when we perceive how entirely the public mind in this country has become impregnated with the principle he then laid down. If we except a comparatively few members, but exceedingly narrow-minded statesmanlike spirit. He it was who, on introducing the Roman Catholic Relief Bill, first dared to become the interpreter, in a totally new reading, of the British Constitution. Looking at the Bill, as it was then viewed by the country, and so long kept up, against the doctrine that "expediency" should be the rule of conduct for British statesmen, one is only the more disposed to admire the foresight and intelligence of the statesman who, in the full zenith of his fame, had yet the moral courage to dictate to the nation, when we perceive how entirely the public mind in this country has become impregnated with the principle he then laid down. If we except a comparatively few members, but exceedingly narrow-minded, and some who shiftily uphold "consistency" as a mere party cry, it would be almost impossible to find any man in the country, however high or low his station, with whom it is not an article of faith that, good of the whole nation, more especially if defined by the recognised [illegible] of the public will, ought to be the sole consideration with statesmen and legislators. Yet, what is this but the doctrine of expediency? What but this has dictated every great measure passed by the statesmen the living and the dying and subordinate minister first had the courage to stamp the idea on the public mind? Catholic Emancipation had been already virtually conceded by successive, if occasional votes of the House of Commons, when it was proposed by no unanimous upon the question, at least a very large and influential minority of the people were in its favour. In Ireland, the organisation carried on so triumphantly by Mr. O'Connell had reached a height which imperatively recalled to the philosophic statesman the first principles of the constitution. There was no alternative but a concession, or a risk of public tranquillity. Mr. Peel had consistently, and from conviction, opposed the Emancipation of the Roman Catholics, but he had not done so on religious grounds. From his first speech to his last on that question, you will not find any tinge of anchristian or contraversial feeling. If the bigotry of some of his followers manoeuvred his liberality into emphatic statements, and saw in him the opponent of a hostile religion, he was not answerable for their errors. His objections, over and over again elaborately stated, rested entirely on political grounds. It was not to the Roman Catholic as a religionist, that he objected; it was to the civil subject of the Crown obeying an external organisation which rendered it difficult to govern him. When Mr. Peel gave way, he gave way emphatically on political grounds. It was not "for the good of the nation" that every Cabinet should be weakened, and the country divided, that public business should be virtually suspended on a question, the solution of which must at least be an experiment, and which could not, on abstract principle, be absolutely precluded. Still less was it for the "good of the nation" that a rebellion should culminate in Ireland, under the sanction of a "great name," in the hope of [illegible] that direct evil should be put a stop to, even although Mr. Peel, the Duke of Wellington, and other statesmen still considered the experiment a hazardous one; and notwithstanding that a year session, when the danger was more imminent on the State, [illegible] refused to co-operate with Mr. Canning in emancipating the Catholics. In [illegible] ions avowedly remained unchanged. In this instance, expediency and State necessity were synonymous terms In the other great changes it was his lot as a public man to carry through the Legislature, his opinions had gradually become modified by the same processes which had modified those of the public, and the cup he had to taste was not so bitter Still, we insist that the moral courage he then so signally exhibited, ought not to be confounded with that vulgar inconsistency which changes for the sake of place or power. If the inducement was a love of fame, a desire to have his name associated with a great act of popular benignity and justice. Least, at least, that was a noble and self-redeeming error. With all our admiration, however, of Sir Robert Peel's conduct at this crisis, we doubt whether he had yet attained the full consummation of his new principle as he was immediately whether it was not rather an instinct than a deliberate ratiocination which impelled him to the self-sacrifice.

At this point we must notice another grave objection to Sir Robert Peel's public character, which, however, applies with still more force to his conduct in repealing the corn-laws. It is argued that if conviction, or expediency, or State necessity, or whatever name it had but Robert Peel to see that the time had come for a change of policy, he ought not to have been the Minister to introduce the measures which he had consistently and perseveringly obstructed. It was contended, and it is still urged, with every force derived from the principle of justice, that what Peel and the Liberal party had effected in the way of boon upon political privations in the advocacy of reforms, Sir Robert Peel ought to have made way for the accession of other statesmen to power, giving the party to whom the glory was due. An irrepressible aspiration which itself, that ambition and a love of fame may have influenced Sir Robert Peel in seizing on two such great and tempting occasions to inscribe his name on the page of history There may be some truth in the imputation that he was disinclined to forego the dazzling reward. It may be urged, on the other hand, that the life of a British statesman, especially one of Sir Robert Peel's order, is in the future [illegible] of the past—that the only recompense for a career of toil and of endurance, is the hope of being remembered by posterity [illegible] that throughout our Parliamentary history there has been a continuous struggle between rival orators and rival leaders of the House—that in the most brilliant and dramatic epochs fame was acquired by splendid oratory, while in our more prosaic and practical times, it is acts rather than speeches which make the head roll of a statesman's fame. All these excuses and palliatives, however, are beyond the pale of argument. The great moral question under which Sir Robert Peel's great changes of policy have been achieved. Living in an era during which the struggle has been, not between rival sections of any country, but between the opposing principles of aristocracy and democracy, the leader of the former party found before him the alternative of precipitating convulsion, or of influencing his followers to concession. We must remember how large a proportion of that leader must have in the formation of the public opinion by which those changes were to be carried. It was not a game of mere tactics. If the leader, from time to time, of the Tory party, had not come forward on the altar of public opinion, the new principle of constitutional government could not have been carried out. A party man must stand or fall with his party. He must lead them to a resistance which, if carried out in obedience to the dictates of principle, may be fatal to the public tranquillity. The very majority which keeps him in power, precludes his rival from carrying the measure already resolved upon. In the case of Catholic Emancipation, this was signally the dilemma. When Sir Robert Peel determined on flying in the Corn Duty, he gave Lord John Russell the opportunity of taking office. Whether has not doing so arose from his own conviction of his inability to carry the measure, or whether Sir Robert Peel gave to him to prepare an insurmountable difficulty for his rival, it is not now possible to determine; but, at least, the objection to which we have referred was taken cognizance of in both cases, and the result was an enlightened, and therefore conscientious, concession.

The struggle between Protection and Free-Trade [illegible] still too near in point of time to allow of an expression of opinion as to the policy of the great measure introduced by Sir Robert Peel, but we may safely venture to speak of the character as a statesman. It has been insinuated as being significant of a gigantic treachery, that the man sprung from the commercial community should have led through life the landed interest, and at last have succeeded in it to a new power with which formers alone were formerly allied. Sir Robert Peel, though the son of a successful cotton-spinner, was an aristocrat by education. We count his origin and personal position for nothing, unless that his long and [illegible] service of the aristocracy enabled him to mould public opinion has later yielding to his earlier sympathies. The characteristic of Sir R. Peel's mind which made him so useful as a statesman, was its capacity for receiving facts, and the habits of close reasoning forced upon him by the necessity of understood Toryism of the earlier portion of his career, resulted naturally from the education he had received—first from his father, afterwards at Oxford University. Gradually, and step by step, he was forced to the conviction of facts and ideas forced upon him by events; and the attentive reader of his speeches will perceive that from the first he sought to investigate the principles on which his party was led blindly on by the dogmas of others, and to ascertain the basis of their opposites. It should be remembered, too, that for some twelve or four teen years before his commercial reforms he had gradually prepared his party for the abandonment of old dogmas and fixed principles. Every session virtually gave to the House of Commons the assurance that the Conservative leader was prepared to carry out, from conviction, that principle of expediency and deference to public opinion which he had first adopted by compulsion. When he entered on public opinion which he had first adopted by compulsion. When he entered on office, in 1841, the whole political atmosphere was changed, rather than comprehensive, indicated his conviction that a change in the commercial policy of the country was at hand. If his followers failed to take the hints thus thrown out, or to read the signs of the times, it was their own want of foresight—political sagacity that was to blame. The concurrent influence of the Potato famine, as it bears upon the personal character of Sir Robert Peel, we have already spoken. It only remains to remember, in connection with this conclusion, that within less than a year and a half of the consummation of that great change, political events occurred which proved that, had it not been effected, an impetus might have been given to democratic agitation in this country which even now commences [illegible] would be deplored, because it would have been inspired, not by a belief in the abstract principle, but by a very low order of political passion.

In following out Sir Robert Peel's practical illustrations of the novel [illegible] taught his party, we have disregarded the order of time. In one great instance, circumstances did not favour his ambition. Whether, if Sir Henry Parnell's motion on the Finances, or Lord John Russell's Administration of the Duke of Wellington would have dealt with Reform as they did with Catholic Emancipation, it is impossible to say. This time Fortune threw the game into the hands of Sir Robert Peel's political antagonists. The Administration of Lord Grey and Sir Robert Peel's course had presented one striking feature, seemingly incompatible with political sincerity. He had resisted sternly, and without a hint of improvement, the three measures which the country deemed vital. We are inclined to think that his strenuous opposition to the Reform Bill was the most sincere act of his public life. Personal feeling and ambition combined with long-cherished fabric of political thought to dictate a [illegible] fear of the [illegible] Statesman to develop, in a very extraordinary manner, his now theory of the duty of his party alike to themselves and to the country. He saw in the [illegible] of sovereignty, a political experiment, which, we must now secure under the new system, to recover the ascendancy which you had been able to maintain under the old, but you must modify your principles and practice, if you mean to reform yourselves in the popular mind or the country. Where is your lost ground." Although history will dwell rather on the more salient points of Sir Robert Peel's career, the political philosopher will always regard with a divided sentiment that part of his public life which dates from the commencement of his leadership of the Conservative Opposition, and terminates with his second assumption of power in the year 1846. The Sandon Parliamentary Reform Speeches, and those which he delivered in Parliament and elsewhere about the same period, contain what was at that time a new interpretation of the old creed of the Tory party—one which exercised a most important influence on the future destinies of the country. Whether Sir Robert Peel was or was not sincere in the adoption of this new policy, it is not now our province to inquire. Judged by his subsequent conduct, it would seem to have been a *bona fide* resolve to reconcile with the nation a party which certainly had become decreasingly unpopular. His own political fate, also, depended on his ceasing to be the leader of a merely obstructive faction. He could only hope to maintain the eminence he had already acquired by appearing before the people at large as a practical statesman, who was prepared, with more or less of reservation, to become the executive instrument of public opinion. Still, the process of "letting down" a party avowing such pretensions as those which had hitherto been maintained by the Tories, was a difficult and delicate one. It involved, while they were still in opposition, an habitual resistance, which was assisted by the embodied manœuvres of the Whigs, and their fear of that popular power which they had called into existence.

When the sudden *coup d'état* of King William IV. brought Sir Robert Peel from Italy to take the reins of office without the numerical majority in Parliament which alone could confer power, the Conservative leader was placed in a position which taxed to the utmost his prudence, his tact, and such political character as he had acquired. His measures introduced during the brief administration of 1834—the first formed under such indications of altered intentions, than as specific propositions to be permanently adhered to. He had not yet arrived at that eminence or at that command o the public attention which subsequently emboldened him to turn round upon his party and almost to defy them. Every [illegible] concession to liberal principles tended to restore the *prestige* of the Whigs; and a speedy dissolution of Sir Robert Peel's experimental administration would have been inevitable, even if the appropriation principle had not been a test which soon exposed the hollowness of the new Tory dispensation But Sir Robert Peel had accomplished his object when he had led his party to full reform and concession, however little they might be disposed to yield in practice; and his conduct now was certainly much more legitimate and honourable than had been his former practice of uncompromising resistance, followed suddenly by an equally uncompromising abandonment of all his avowed principles.

It was at this period of his life that Sir Robert Peel first imbued the public mind with an idea of the grander proportions of his character. His nomination to the Premiership fell like a thunderbolt upon the country, and nothing less was expected than a signal punishment of such ridiculous temerity. But his bold and dignified bearing in the House of Commons, in the face of a hostile majority, by which every step to stop the way was deliberately declined, startled the public mind, and there was a lofty tone in his speeches at that period which augured an immense reserve of moral courage and intellectual power. Hitherto it had been the fashion to regard him as a mediocrity; but now that charge was silently [illegible] as it proved, for ever.

Driven [illegible] on office, in which his conduct had broken forth like a flash of light from the eternal darkness of party, Sir Robert Peel re-entered upon the question system of obstructive tactics. If we ought to apply the test of morality to the conduct of political men, this change was in the highest degree reprehensible; but, well read as the British public are in the rights guaranteed by their constitution, and familiar with the [illegible] hampered by compromises of how, in Parliamentary tactics, for the purpose of cementing and inspiring a party, whether in opposition or in power, principles and precedents are made subservient to the [illegible] of the hour, they will not [illegible] demands. It is not our province here to defend, even if that were possible, the course by which Sir Robert Peel re-enforced the old prejudices of his party in favour of abuses, by support of the Sliding Scale, and in refusing the compromises offered by the Whigs on various questions, but more especially on the Corn-laws We fear the British public, with all their aspirations towards political freedom, are in the habit of [illegible] men not so much by their abstract principles as by the success or failure of their political manœuvres. At all events, the dwindling majority of the Whigs, and the immense accession which a dissolution finally brought to the Conservative party, rendered [illegible] a practical triumph for Sir Robert Peel There can be no doubt that he returned to power in 1841 as ostensible the champion of Protection, although a careful perusal of his speeches during his opposition campaign will show that he carried [illegible] almost to the point of deliberate deception, and that he had left [illegible] loopholes of escape from the charge of intentional [illegible] Looking back with unbiased mind, we can see that he had determined to release himself from the obligations to his party on what might be called open questions Exasperated as the Tories were, with reason, at his latest desertion, it is right to remind them that Sir Robert Peel studiously, as far as he dared, threw the onus upon them. He chanced to have his conduct considered as a whole and when indicted for specific breaches of contract, he demed having, of late years, bound himself down. Over and over again, he told the country plainly through them his intention, that he was [illegible] as a free agent The public had not forgotten the facility with which he had [illegible] the dictates of political necessity on the Catholic question, and again in his address to his constituents on the dissolution of 1841 there can be little doubt that an expectation of a re-performance of [illegible] role helped the public in according him the sudden popularity that attended his second Premiership. We are too near those times to be [illegible] in the spirit of impartiality, in proceeding to [illegible] the positive opinion on his measures; in the Income-Tax; on the revisions of the tariff; the modifications of the Corn-Duties; and, finally, on the Repeal of the Corn-Laws. On these points the readers will long since have made up their minds. Looking at the [illegible] upon Sir Robert Peel's character, we may, without courting the suffrages of one party, or provoking the resistance of the other, at least affirm, that he was the most persuasive orator and best-supported [illegible] public opinion, but, also, that in his manner of propounding them, and carrying them through Parliament, Sir Robert Peel evinced a faculty for governing mankind which, in our time, is unparalleled. Even he may have been surpassed by any statesman who ever lived. He took, in this respect, a higher position than Sir Robert Walpole himself. If we remember how largely bribery and corruption entered into that statesman's means of government, and how Sir Robert Peel carried his plans by fair, if sometimes tortuous, methods, recognised in Parliamentary warfare His policy was to play off parties against each other, thus securing good for the public out of the evil tendencies of the rest—to [illegible] setting consistently, in his new character of interpreter of the nation, will; but, to the merit of having adopted a policy so entirely in accordance with the new conditions of the Reformed Constitution, and to superintend the perpetual glory of working out his mission with an unparalleled tact and skill.

Leaving the purely political part of Sir Robert Peel's career, we may dwell with more unmingled satisfaction on other legislative acts with which his name is associated. He was never, in his purely legislative capacity, an originator. He embodied, in Acts of Parliament, the principles which other men had spent their lives in developing. The great and glorious line of Irish orators was that the public feeling which enabled Sir Robert Peel to carry emancipation, so to Adam Smith, to Mr. Huskisson, some Whig statesmen, and, finally, to Richard Cobden, that he owed the principles of commercial reform. Sir Robert Peel honourably acknowledged in emphatic terms his obligations to these several predecessors For Sir Samuel Romilly and Sir James Mackintosh the country was indebted for that persevering system of criminal law reform which paved the way for the consolidation acts in which Mr. Peel, as Home Secretary, swept away a multitude of confusions and abuses, and [illegible] the severity of our criminal code. The restoration of our currency system is another [illegible] to which a measure with the name of Sir Robert Peel is imperishably allied Here, too, he acknowledged his obligations to M Horne and others, who had pressed this reform on Parliament at a time when Sir Peel firmly opposed it, and to which measure Sir Robert Peel's consistency and perfidelity with which Sir Robert Peel throughout his career adhered to the great principle of cash payments, and the repression of a too expansive paper currency, entitle to appropriate to himself a meed cannot equal to that of originator In this position, if in no other, he had a permanent and prospective fame, and his consistency was shown in his introduction, towards the close of his political life, of the Bank Charter Act. Public opinion, it is true, is not altogether unanimous as to the probable future effects of this general policy on the well-being of society; but no one will deny that the views of Sir Robert Peel were conscientiously sought out, and accepted to the support of a commercial community. There is one other measure, of a practical nature, which Sir Robert Peel had the merit of originating, as well as of introducing—that which commenced with the re-organisation of the constabulary force in England, and subsequently established a police system in Ireland. We are proposing and carrying this last measure. Sir Robert Peel showed that, when occasion required, he could brave popular clamour, which was excited even to a point of personal danger to himself. We look upon the general value of the institution he then established, and the general verdict in its favour, in spite of some occasional and inevitable defects, as one of the more disposed to admire the foresight and intelligence of its originator, who [illegible] of an ultimate public good.

The influence wielded by Sir Robert Peel over his contemporaries, and transmitted to his successors, has been considerable. In his having been the emancipator of the Catholics from the dominion of bigotry; of the Tory party from the thraldom of political dogmas and prejudices; or of the country at large from the repressive and commercial influence of the protective system. Nor, useful as have been his various practical reforms, and his improvements in the details of official administration, above all, important as was the change which he commenced in our system of taxation, were these his highest claims. The action of his character embraced a wider range, and the results of upwards of forty years of public activity exhibit themselves in permanent traits imprinted on the national mind. In his celebrated address on being inaugurated Rector of the University of Glasgow, he spoke in a sentiment which goes to explain his ascendancy first in the national councils, and then in the wider arena of public opinion. In advising the students to a course of sedulous study orators and romantic statesmen. If he formed his character on any model, it was that of Sir Robert Walpole. But we incline to think he rather trusted to the instincts and impulses of his own nature, which was, in all respects, pre-eminently practical. He was the incarnation of common-sense. His mind was first, last, and always, an information, and pondering, not so much on abstract principles, as on practicabilities. He taught the House of Commons that habits of business were of more value than conspicuous talent or quick qualities of debate. He had taught this to his older contemporaries, by his assiduous and persevering example He impressed it on the young men growing up around him, alike by a continued example, and the more weight of his precepts. Not the least of his sources of glory is that he should have trained up a band of young statesmen, all imbued with his general opinion of the true action of the British Constitution, and educated for practical statesmanship with a perfection which leaves them without rival either in this country or elsewhere. His memory will live, not in his public acts alone, but by the spirit of moderation and the love of safe and steady progress which he instilled into the national character. He taught, from the highest pea-

tion which a subject can occupy in the civilised world, lessons never to be forgotten by mankind; lessons of duty to the governing power, of obedience to the written law, and of respect for the public opinion out of which new laws spring. He taught, also, the duty of public faith—faith as regards the pecuniary engagements of the country, faith as regards the established institutions, and of international engagements with foreign countries. His public errors, his sudden changes of policy, might be chargeable on the necessities of party combination. Whenever he sacrificed party ties, he also invigorated his own power, his well-earned reputation, and his private friendships. At a season, from circumstances, he became almost the dictator of his country, the blemishes of his past career were obliterated in the effulgence of his intellectual power and his moral dignity. When he was free again, all his thoughts, and all his energies were devoted to the welfare of the nation at large. Unlike many statesmen of more brilliant and captivating qualities, his worth is not only appreciated immediately, but it promises to be held in still higher estimation by the lapse of time, and the effects of his policy, shall more and more diminish contemporary animosities. If, as in the opinion of many, the tendency of his policy has been to give a stimulus to democratic influences, and to offer a premium to agitation, it should be remembered that such a part as he has played is not likely ever to be played again—because such a period of transition can scarcely again occur. The best tribute to his practical genius is found in the universal and heartfelt grief of all men at his loss, and the spontaneous tribute of respect paid to him by the Legislature of our hereditary rival—a tribute the more valuable because Sir Robert Peel was emphatically a British Minister, and one who, while always conciliating the good will of foreign nations, never lost sight of the interests and the dignity of the empire. If, in his case, the age made the man, he was not the less to be admired for the intuitive wisdom with which he adapted himself to his age; and, brilliant as are his fame and the illustrious orators and statesmen to whom the public admiration has awarded national monuments, no name among those inscribed in Westminster Abbey, and in the still less perishable tablets of the world's love and respect, will be surrounded with a more glorious halo than that of Sir Robert Peel.

THE PUBLIC SENTIMENT ON SIR ROBERT PEEL'S DEATH.

Both in the metropolis and the provinces the general sorrow at the late disastrous event, which has bereaved the country of one of her most valuable public men, is evinced by the spontaneous and almost universal resolve to do honour to the memory of the deceased statesman by some public monument or testimonial.

On Wednesday a preliminary meeting of merchants and bankers of the metropolis took place at the London Tavern, to consider the propriety of calling a public meeting in the city of London on the subject of promoting a subscription for raising a testimonial in honour of the lamented statesman. Sir E. N. Buxton, Bart., was in the chair. Amongst those present were Mr. Hume, M.P., Sir M. Montefiore, Bart., Mr. Gladstone, Sheriff Nicoll, and other influential gentlemen Letters were read approving of the object, and expressing regret that the writers could not attend the meeting, from Mr. George Glyn, Mr. Raikes Currie, M.P., Sir James Duke, Alderman Salomons, Mr. W. Gladstone, Mr. R. D. Mangles, M.P., and several others. The meeting unanimously agreed to a resolution to apply to the Lord Mayor for the Egyptian Hall of the Mansion House upon the occasion; and the Lord Mayor, who was forthwith waited upon, received the deputation with marked respect, and appointed Monday next to take the meeting. His Lordship will take the chair on that day, at two o'clock precisely. It is expected that the attendance will be most numerous. The Rev. Mr. Marshall and Mr. Wire were appointed secretaries

On Tuesday (the day of the funeral), in Liverpool, Manchester, Birmingham, Leeds, Bury (the native place of the deceased), and several other towns, the general sorrow at the late right hon. Baronet's untimely death was manifested by the closing of the shops and a partial suspension of business.

On Wednesday, at a meeting of the committee appointed by the tenantry of the deceased Baronet, which was held in Fazeley, an address of condolence to Lady Peel and family was unanimously adopted.

On the same day, at Bury, a similar address was agreed to at a meeting of magistrates, gentry, manufacturers, farmers, &c., and a subscription to erect a monument to the late distinguished statesman, in Bury, was opened, £1500 being subscribed on the spot.

MONUMENT TO SIR R. PEEL.—At a meeting of merchants, manufacturers, &c. held in the Mayor's parlour, Manchester, on Monday, it was resolved:—"That this meeting deeply deplores the sudden and lamentable death of Sir Robert Peel, and now determine to erect a statue or monument to perpetuate the memory of his very eminent services; and that, in order to give to this determination, the following committee be appointed (with power to add to their number) to obtain subscriptions, and to take all requisite steps to carry out the intention of this meeting:—The Mayor of Manchester, the Mayor of Salford, Sir Elkanah Armitage, Thomas Ashton, Middleton, James Atherton, Thomas Barley, Thomas Barge, jun., Robert Chadwick, Edward John Cleather, James Constantine, Samuel Fletcher, J. C. Harter, Thomas Hoyle, Alexander Kay, P. M. James of these horses. A claim was made upon Captain Wallington, Lloyd, jun., William Nield, Benjamin Nicholls, John Reid, Malcolm Ross, C. H. Rickards, Sam Schwabe, Thomas Sowler, Benjamin Schofield, John Sharp, Benjamin Shaw, Walker, Edward Weatherall, Absalom Watkin, Joseph Whitworth, Lewis Williams." The subscriptions were commenced at once in the Mayor's parlour, and in the course of a very short time reached the amount of £615. It is hoped that such a sum, or a much larger one, will be raised, before a penny will be taken, in order that the memorial may mark as much as possible the general esteem in which Sir Robert was held by all classes. No limit to the amount of money to be raised, but the meeting were of opinion that the subscription should reach several thousand pounds, so as to make the memorial worthy of the town as well as the man; nor was the site absolutely fixed, that will probably be determined hereafter by the committee of the monument which it is found the amount of subscriptions will enable them to erect.

COURT OF COMMON COUNCIL.—THE LATE SIR ROBERT PEEL.—At a Court, held on Monday, the following resolution was agreed to, expressive of the sense entertained by the Court of the deep loss sustained by the lamented death of Sir Robert Peel:—"Resolved—That this Court has received with the deepest emotions of sorrow the painful intelligence of the death of that eminent statesman, the Right Hon. Sir Robert Peel, Bart., an event which may be justly regarded as a great national loss. That, while submitting with reverential awe to the wisdom of Divine Providence, this Court desires to express its admiration of the great talents, the mighty eloquence, the administrative capacity, and the disinterested conduct of the deceased statesman. This Court duly appreciates the laborious exertions and the extraordinary sacrifices made by Sir Robert Peel, and is fully satisfied that all his efforts were intended to lay wide and deep the foundations of the lasting prosperity, honour, and glory of his native land. Nor can this Court refrain from recording its sense of the purity of his private character, and his eminent domestic virtues; and it dese de to convey to Lady Peel and to all the members of the family, its heartfelt and unanimous sympathy with them in the irreparable loss which they and the nation have sustained." (Hear.) The Lord Mayor was requested to transmit a copy of the resolution to Lady Peel.

LONDON UNION ON CHURCH MATTERS.—On Tuesday a general meeting of the members of this society was held in St. Martin's Hall. The attendance of members was unusually large. The annual report stated that, previous to the year 1848, great fears were excited in the minds of churchmen by measures adopted and propositions made in Parliament, and by the grave decision by the advisers of the Crown in respect to the Church, but the absolute necessity for the union of churchmen on such subjects was made apparent by the circumstance under which Dr Hampden was consecrated a Bishop. The power which so then obtained and exercised of forcing upon the Church as Bishop a person against whom charges of unsoundness of doctrine were solemnly preferred, and the refusal of any inquiry into those charges, made it clear that the Church could no longer expect from the Legislature any protection, and that it had enjoyed when the union of Church and State was more a reality in principle and practice, and the want of practical means by which the members of the Church could act in concert became evident. Under those circumstances, the London Church Union was formed, and a deputation waited upon the Bishop of the diocese to explain its objects. The right rev. prelate thought it would not be advisable for him to join the union; but expressed his wish for its success, and good and hearty understanding between it and himself. Of the other subjects which have occupied the attention of the union, the report thus speaks:—"The great question of education and the dealings of the Privy Council with the National Society, the attempt to legalise marriages prohibited by the Church, the bill called the Clergy Relief Bill, the subject of the Ecclesiastical Commission, and the attempt made to amalgamate the fund applicable to the increase of the episcopate with the fund held by that body, are among the principal matters which have in turn occupied the attention of the committee, who have used every means in their power, by the circulation of papers and petitions, and by the collection of evidence, to call the attention of churchmen generally to those matters, and to resist the evils likely to arise from them. They have endeavoured also to promote the very desirable objects of the Foreign Chaplaincies Bill." A resolution was passed to the effect that the union should continue to call their attention, and which they now deemed of the most pressing importance, were those which had arisen out of the case of the Rev. G. C. Gorham against the Bishop of Exeter. A committee for the ensuing year was appointed, consisting of Viscount Campden, the Hon. R. Cavendish, the Very Rev. G. Chandler, D.C.L., Dean of Chichester; Viscount Feilding, the Earl Nelson, Sir George Prevost, Mr. Simeon, M.P., Lord John Thynne, Mr. F. R. Wegg-Prosser, M.P., Mr. W. Page Wood, M.P., Archeacon Thorp, Sir Stephen Glynne, Bart., Lord Lyttelton, Lord John Manners, M.P., Mr. A. J. Beresford Hope, M.P., and other gentlemen.

DEFALCATION BY A LATE INSPECTOR OF THE POOR.—John Henderson, who for some years discharged the duties of collector of the assessment and inspector of the poor for Montrose, was, a few days since, apprehended in Edinburgh, and charged with the embezzlement of £261 of the moneys intromitted by him in his official character. The accused was taken to Forfar for further examination; in which gaol he at present remains, not, as yet, being fully committed

EXTENSIVE ROBBERY.—NEARLY £1000 WORTH OF JEWELLERY STOLEN.—On Thursday morning, at an early hour, an electric telegraph message was received at the Waterloo-road terminus of the South-Western Railway, describing a most serious burglary which was committed during the preceding night in the premises belonging to Mr Emanuel, pawnbroker and silversmith, carrying on business in High-street, Southampton. It appears that on Mr. Emanuel coming down stairs in the morning, to his no small astonishment he discovered that the premises had been entered, and every article in the window stolen.

CENTRAL CRIMINAL COURT.

THE LATE OUTRAGE ON THE QUEEN.

On Thursday morning, which was fixed for the trial of *Robert Pate*, who stood charged with committing an assault upon her Majesty, a good deal of interest appeared to be created, and the Old Court, in which the trial was to take place, was filled before the usual hour for the commencement of the proceedings.

Soon after ten o'clock the learned Judges, Mr. Baron Alderson, Mr. Justice Patteson, and Mr. Justice Talfourd, took their seats on the bench; and the prisoner was immediately placed at the bar.

The prisoner was very well dressed. He pleaded "Not Guilty" in a loud tone.

The indictment charged the prisoner with wilfully striking at her Majesty with intent to injure her, and other counts with intent to alarm her and to break the public peace.

The Attorney-General, the Solicitor-General, Mr. Welsby, and Mr Bodkin appeared for the prosecution. The prisoner was defended by Mr. Cockburn and Mr. Huddleston.

The Attorney-General opened the case for the Crown. He said that upon all the occasions where he had been compelled to appear as public prosecutor, he had never felt so much regret as upon the present occasion, not on account of the circumstances of the case and the object of the attack made by the prisoner, but from the position of the person accused, who was a gentleman, and formerly held her Majesty's commission. He then proceeded to state the facts of the case, and the following evidence was adduced:

Colonel Grey, examined by the Solicitor-General. I hold the office of Equerry to her Majesty. I remember her Majesty leaving Buckingham Palace on Tuesday, the 27th of June, in an open barouche. The carriage drove to Cambridge House, where her Majesty alighted. She returned to the carriage about half-past six, going out by the east gate. Several persons had assembled outside. The carriage went out of the gate very slowly, and at the same moment I saw a well-dressed man step up to the carriage, and immediately afterwards he was seized by the footman. That man was the prisoner. He was taken into custody immediately. When her Majesty arrived at Buckingham Palace, Sir James Clark was sent for, and I saw her Majesty's head bandaged, and saw blood coming through the bandage

Robert Renwick said, I am sergeant-footman to her Majesty. I remember her Majesty going to Cambridge House on the 27th of June. I was sitting behind the carriage when it came out of the gate of Cambridge House, and I saw the prisoner strike the Queen with a stick on the forehead. I seized him immediately. The crowd closed upon him, and he was secured

By Mr. Cockburn. He was roughly handled by the crowd. [The cane was produced, and identified by the witness.]

Other evidence to the same effect having been adduced,

Sir James Clark said, I am physician to her Majesty. I was sent for to see her Majesty on the evening in question, and arrived at the Palace between eight and nine. I examined her forehead, and found a considerable tumour on the outer angle of the right brow and a small cut. It had been bleeding, but had not been much stopped. I was surprised to see so much injury done by so small a stick, and I, therefore, infer it was struck very violently. Her Majesty's bonnet was cut through: I think the skin was cut by the stick, and not by the wire margin of the bonnet.

By Mr. Cockburn: The wire was bent, but I do not think it as stiff to cause the injury.

This was the case for the prosecution.

Mr. Cockburn then addressed the jury for the prisoner, and said it must be idle to attempt to deny the fact that the prisoner had committed the act imputed to him, and the defence he was instructed to make was that the prisoner was not of sound mind, and that on this ground he was not responsible for his conduct on this occasion. The learned counsel then stated that the very nature of the act itself went far to show that the prisoner was not of sound mind, and after a very few brief remarks the following witnesses were examined:

Colonel John Vandeleur said: I was Lieutenant-Colonel of the 10th Hussars when Mr. Pate joined the regiment, in 1841, as cornet. He afterwards became Lieutenant. He remained in the regiment till March, 1846, and during that time the regiment was quartered in England and Ireland. While we were stationed at Cahir, I remember an accident happening to the prisoner's horses and dog. From the moment I saw him I formed the opinion I thought there was something strange in his conduct. His hair was cut very short, and I found his head had been shaved. He discharged his duties as an officer very well, and as to his being a gentleman, there is no doubt about that. He was a person of mild demeanour, and very much respected by the regiment. He had three horses and a Newfoundland dog, and he was very much attached to them. The prisoner's horses and dog were bitten by a mad dog belonging to another officer, and they were all destroyed. From this period I observed a great change in his conduct, and he appeared very much excited in consequence of a correspondence that took place between his father and the Duke of Wellington upon the subject of these horses. A claim was made upon Captain Wallington, to whom the dog that bit the prisoner's horses belonged, through the Duke of Wellington, and the prisoner seemed hurt that his father should have written upon a subject which Captain Wallington was to avoid company, and used to take long solitary walks by himself, and he complained to me that he was ill just before we returned to England. He said he had applied to the doctor of the regiment, and he could give for a pound, a shilling. I asked him what was the matter with him, and he said his stomach and bowels were full of bricks, and that the doctor had not the skill to remove them. To the best of my knowledge the prisoner never required, but the meat were killed, except when he was in the sick list after this. I considered he was labouring under a delusion. I sent him in command of a detachment from Newbridge to Dublin in 1845, and he had orders to return the next day; but he left his detachment at Dublin without leave, and went to England. This was a serious military offence, and I communicated with General Wyndham upon the subject. He returned in ten days. He was not brought to a court-martial. I think he came back as he appeared very well, and he gave no explanation for his going away. I communicated with his father in as delicate a manner as I could, and the prisoner left the regiment two months afterwards

By the Attorney-General:—I asked the prisoner where he had been, and he said he had been to England, but entered into no further particulars. He was put in arrest for the military offence, and after he was relieved he continued to perform his military duties as before. I am not certain whether he was on the sick list at the time he made this extraordinary statement to me, but he was shortly afterwards, and I have no doubt that he was really sick. A claim was made upon Major Wallington to pay for the horses, as his dog had been the cause of their being killed. I think it right to say that Major Wallington made an honourable compensation

Re-examined: The general ordered that he should resume his duty, and he did so, but not with the same zeal as formerly

By the Court: If I had thought the prisoner was of sound mind I should not have ordered him, as the general did, to resume his duty, and I presume the general acted upon the impression that his mind was affected.

The testimony of other officers and some soldiers of the 10th Hussars having been given to the same effect, the following were also called:—

Robert Francis Pate: I am the father of the prisoner. I remember his coming to me from Ireland to Wisbeach. He said he came away without leave. I was astonished at seeing him there, and asked him the reason of it. He said that he had been homeless in the Dublin streets, and had seen some people about the barracks waiting for him. He said he had made his escape from Dublin in a vessel going to Liverpool. I said to him that he must not remain with me, but return to the regiment; and told him that he would be court-martialled in consequence. He might be shot. He promised to go away the following morning, and he did go. I wrote the same post to the colonel, who returned a very kind reply, asking me to find out if he was in argument. He came to London and sold his commission without communicating with me. I came to London, and, on meeting him, asked if he had sold out? He said he had, for £1800. He kept the money. He applied to me several times for money, and I afterwards by parties to whom he had become indebted in London. I came a second time to London, and when I met him, in Duke-street, I became much alarmed at his manner. I consulted Connolly (a medical gentleman), and he said I was to go home and avoid giving him any little more time, and not to confine him when his sister was in town. Dr. Connolly did not see him.

By the Attorney-General: When I told him that he might be shot for leaving his regiment in the manner in which he did, he seemed not the least apprehensive. When I ascertained that he had sold out, he told me that he got £1800 for his commission, and should have £1200 left after paying all his debts. I seldom saw him, but I heard of him. I always left him in a very uncomfortable state, and did not know what steps to take to get him into an asylum, but always felt that he must go into one.

By Mr. Cockburn: When I told him he might be shot, he said he could not help it.

Charles Dodson: I was formerly in the 10th Hussars, and was servant to Mr. Pate after he had accident to his horses. His manner was always strange, and unlike that of other people. Accompanied him with the detachment from Newbridge to Dublin; but on his arrival there he was missed. Heard that he had gone to England. He came into quarters on the 17 or 18 days, and appeared to me to be more melancholy state of mind than before he left. He was liked in the regiment by both the officers and men; but latterly he became very reserved. Was engaged as his servant when he left the regiment in 1846. He lived in a house in Jermyn-street, where I lived. I remember that in 1847 he was thrown from his horse. His habits were always regular. He always washed his head in a basin that contained two pails of water. He mingled whisky and camphor in the water. A pint and a half of whisky and 2oz. of camphor served him for three mornings. When washing himself he sometimes made a noise, and at other times sang songs, to the no small amusement of the people of the house. He was a good deal, and always kept the same walk. He generally began to dress himself at a quarter to twelve, and at a quarter to three he came down to his cabman, and when he paid him, the money always consisted of shillings; he would never have half-crowns nor halfpenny-pieces His dress was always the same, and he always continued his fire in summer. Never saw him in society but once, and that was on the Derby day of 1847

By the Attorney-General: Was regular in the payment of his ordinary debts, and in the payment of his lodgings every Wednesday. Was regular in his habits. Was sometimes very noisy, and went about the house whistling and knocking his self down in his room

By the Court: He read books. At one time witness got a pile of books, among which were some "Nursery Rhymes." Always read the newspaper. Never knew him to go to church. He went out on Sunday in his cab as on other days.

William Baker Lee: I drive a cab, and used to drive the prisoner regularly every day. I was obliged to wait upon him at a quarter past three o'clock. I always drove by the same route, down the Brompton-road and over Putney-bridge to Putney-heath. At one particular spot he alighted when he got there. He then went through the thicket, after he had ordered me to meet him at a pond on the other side of the Heath. Sometimes he would order me to gallop, and at other times to drive at a slow pace. After leaving the Heath I always drove towards Barnes Common, where he again ran through the bushes. I again met him at a particular point and drove him back over Hammersmith-bridge. His manner in the cab was always strange, and, through curiosity, I frequently looked in to see what he was about. He sometimes would jump and start from one side of the cab to the other, flourishing as if sweeping with a sabre. He was at other times very quiet and never moved. I was frequently stopped by parties who met us, who wished to know what sort of character he was. I drove him every day for 18 months. He first paid me 10s. a day, but afterwards reduced the fare to 9s. The sum was always in shillings, the man upwards, and always looking the same way. He paid a shilling and a penny every day for tolls, which was regularly laid on the cushion.

Some further evidence of a similar character having been adduced, the case for the defence was closed

The Attorney-General replied, reminding the Jury that, if they were of opinion that the prisoner was incapable of distinguishing between right and wrong, he could not be subjected to imprisonment for life; while, if they found otherwise, the punishment would be of a minor character

The Jury, at twenty minutes past three o'clock, retired to consider their decision, and returned into court at ten minutes past seven o'clock with a verdict of GUILTY.

Mr. Baron Alderson, in a feeling address, sentenced the prisoner to be TRANSPORTED FOR SEVEN YEARS, observing that it was only out of respect to his family that the Court refrained from ordering him to be publicly whipped

The prisoner, who remained unmoved to the last, was then taken away.

NATIONAL SPORTS.

The race meetings next week will be Nottingham on Tuesday and Wednesday, Stamford on Wednesday and Thursday, and Salisbury on Thursday and Friday. The fixtures of this batch have been placed under a vigorous management, and hold out very fair promise of sport of a better description than formerly. Salisbury will about keep its own.

The "sports of the Thames" seem likely to have a tolerably busy week of it, the Limehouse and Lambeth Regattas being announced for Monday, and the apprentices' match for the following day; Great Yarmouth Regatta, which comes off on Wednesday and Thursday, will be a very attractive affair for the locals.

The Cricket fixtures include a match at Lord's, on Monday, between the North and South, and one on the same day (return match) between I Zingari and the Hyde Park Gardens Club; a match at Cosenington Rectory, between the Islington, Alston, and West Wickham Clubs; a match between the Union and the Three Arrows, on the Oval, on Wednesday; on Thursday, at Vincent-square, between the Marylebone Cricket Club and the present gentlemen of Westminster; and on Saturday, at Harrow, between the Marylebone Cricket Club and present Harrovians; besides several interesting country matches.

TATTERSALL'S.

MONDAY. Some very languid betting on the Liverpool Cup resulted in the retreat of Windischgratz from 7 to 4 to 4 to 1, and in the elevation of Cockermouth, Man of Team Valley, and Vampyre, each of whom was in very good odour. The closing averages stood as under:

LIVERPOOL CUP		
4 to 1 agst Cockermouth	4 to 1 agst Man of Team Valley	10 to 1 agst The Juggler
4 to 1 agst Windischgratz	8 to 1 — Vampyre	
GOODWOOD STAKES

TOWER REGATTA.

This annual regatta took place on Tuesday, and, notwithstanding the unfavourable state of the weather, was extremely well attended. The prize was a new skiff, to which was added some money or losing men; the second receiving four guineas, the third three, and the remainder £1 5s. each. The subscribers were the officers in the Tower and the influential residents and merchants in the vicinity. The race was in our boats, with six scullers

Grand Heat: Benjamin Voss (yellow), 1; George James (red), 0. The men had alternate leads, so sharp was the contest, but Voss ultimately won cleverly

THE WATERING-PLACES OF ENGLAND.

HERNE BAY.

THIS is a Watering-place as yet in its infancy, and giving more signs of precocity and forcing than of steady and natural growth. Nothing can be more agreeable than its situation. It affords fine bathing and safe boating, and has a fine expanse of open sea in front, and in the rear, a beautiful and diversified country, abounding in scenery full of attractions, both to the pedestrian and equestrian wanderer. In addition to these advantages, it is considered to have a fine climate. But, notwithstanding all these things in its favour, Herne Bay is not popular. Its founders attempted too much, and failed; and Ramsgate, which neither French nor English undertakings can bear up against and crush, has come into its utmost to deter people from visiting it. In the course of time, however, we cannot doubt, the advantages of Herne Bay will be better appreciated, and it will become what its projectors intended—a fashionable and prosperous watering-place.

Its name is derived from the rural and beautiful village of Herne, about 2½ miles distant on the road to Bury and Canterbury. Less than fifty years ago, as the local guide-book informs us, the place was not inhabited by more than a dozen persons. In the year 1830, some of the attached members of the Government as a convenient station for military encampment; and between that time and the year 1880, some small additions were made to its buildings and its population. Visitors from London occasionally arrived, disembarking from the Margate steamers in small boats, that put out for three miles from the shore, to take them up. Some of these visitors, it appears, took a fancy to the place, as scheme was got up for building a pier, and for erecting houses for the accommodation of families. Mr. Telford, the celebrated engineer, was consulted; and the first pile of the present handsome pier and breakwater was driven on the 4th of July, 1831. The pier is 24 feet wide, and 3200 feet in length. It was projected and built by Mr. George Burges, of Herne Bay; and was considered at the time the best specimen of pile-driving. Unfortunately, the processes of Mr. Payne or Mr. Bethel, for preserving timber against the worm and other casualties, were then unknown. The piles have been much injured by this insect, and many replaced by piles prepared by Payne's process and a few iron ones, so that the pier is now in a tolerable state of repair.

The favourite mode of reaching Herne Bay is by steam-boat: but the pier-dues, 1s. 6d. each person, being added to the steam fare, renders it excessive, and, doubtless, injures the interests of the inhabitants, and others connected with this delightful watering-place.

Herne Bay is fifteen miles westward from Margate; four miles

WATERING-PLACES OF ENGLAND.—HERNE BAY AND PIER, KENT.

westward from the Reculvers, the twin towers of an old church now used as a lighthouse and sea-mark; and about the same distance from Whitstable, which is in railway communication with Canterbury, and by the South-Eastern line with the metropolis.

FOLKESTONE.

Whoever turns to the Second Volume of our Journal, may there see how Folkestone started in the year 1842 from a little town of narrow streets and fishermen's cottages; its harbour choaked up with earth, sand, and beach; and the place altogether, notwithstanding its excellent sea-bathing, overlooked and neglected. Within ten years, the entire face of the locality has been changed; the harbour has been rendered commodious; and detached villas, terraces, streets, pavilions, hotels, and inns have sprung up, so as to render Folkestone a place of first-rate accommodation. All this has been effected by the *touch* of the South-Eastern Railway; and the easy transit from this point to Boulogne, the shortest route to Paris.

Thomas Ingoldsby has left us an odd notice of the place. He says:—

"A limb of one of the Cinque Ports, it has (or lately had) a corporation of its own, and has been thought considerable enough to give a second title to a noble family. Rome stood on seven hills; Folkestone seems to have been built upon seventy. Its streets, lanes, and alleys—fanciful distinctions without much real difference—are terrible enough to persons who do not mind running up and down stairs; and the only inconvenience at all felt by such of its inhabitants as are not asthmatic, is when some heedless urchin tumbles down a chimney, or an impertinent pedestrian peeps into a garret window."

Folkestone is seventy-one miles from London by the almost-disused turnpike-road, and eighty-two miles by the railway. The town appears to have been originally built on the side of an almost precipitous cliff, the great inducement to build in such a situation being, possibly, the protection afforded by the castle, which is said to have been erected on the brow of the hill.

According to the last census of 1841, there were 975 houses in Folkestone, and the population was—males, 2126; females, 2287; total, 4413. Since that period, however, owing to the introduction of the railway, the houses and population have greatly increased, and the latter may now be fairly computed at nearly 5000.

The approach to Folkestone from London is by the magnificent railway viaduct which crosses the Foord Valley, and consists of nineteen arches, each 30 feet span, the entire length being 758 feet. About half a mile eastward of this viaduct is the railway station, from which the town is but a short distance.

Our Artist has sketched his view from the West Cliff, not far from the church—a cruciform structure, with three aisles and three chancels, and one of the five churches of which Folkestone formerly boasted.

The extreme point of the long line to the distance of the view is "Shakspeare's Cliff."

Amongst the number of new houses which have been erected at Folkestone, the first that claim attention are some detached villas on the Lees. These are chiefly of the Elizabethan or Tudor style of architecture, and are delightfully situated both for land and sea views. Near these is a terrace, consisting of ten large-sized houses, and in the immediate vicinity, in the Sandgate Road, a new terrace of seven first-class houses, with the London and Provincial Bank, and several other buildings.

FRENCH PLAYS.—SCENE FROM RACINE'S 'PHEDRE."

THE FUNEBRAL CYPRESS.

(*CUPRESSUS FUNEBRIS.*)

AMONGST recent importations of hardy ornamental evergreens, calculated to afford hereafter a new feature in our garden and landscape scenery, there is nothing to rival this beautiful tree. Graceful in outline, interesting in its foliage, and novel in general contour, it deserves all the eulogiums which have been passed upon it by the distinguished botanists, Professor Lindley and Sir William Hooker.

The traveller who appears originally to have noticed the Funebral Cypress, or at least the first who has left any recorded facts in relation to it, was Sir George

THE FUNEBRAL CYPRESS

Staunton, when exploring China in the embassy of Lord Macartney. Subsequently, however, Mr. Fortune met with it near the celebrated tea country of Whey Chow; and through the interest of that gentleman, Messrs. Standish and Noble, of the Bagshot Nurseries, in Surrey, have been enabled to import both seeds and young plants.

Mr. Fortune describes this Weeping Cypress as quite new; it is a noble-looking fir-tree, about sixty feet in height, having a stem as straight as the Norfolk Island pine, and pendulous branches like the weeping willow. The branches grow at first horizontally with the main stem, then describe a graceful curve upwards, and droop again at the points. From these main branches, others, long and slender, hang down towards the ground, and give the whole tree a weeping and graceful form. It is also very symmetrical, and reminds one of a large and gorgeous chandelier. In regard to its effect in scenery, Mr. Fortune remarks:—"It has a most striking and beautiful effect upon the Chinese landscape, and in a few years the same effect will, doubtless, be produced by it upon our own. It will be particularly valuable for park scenery, for lawns, for the entrance to suburban residences, and as an ornament for our cemeteries. I have no doubt that it is quite as hardy as *Cryptomeria japonica* and the Indian Deodar, and will be a fit companion for both in our parks and pleasure-grounds." The fact of its being perfectly hardy, as conjectured by Mr. Fortune, has now been perfectly established—hundreds of young plants have stood the past winter uninjured in the Bagshot Nurseries; and some young seedlings, in a growing state, were removed from a cold house to the open ground without protection, and subjected to eight degrees of frost, in the first week in May, without injury.

GIGANTIC LAND TORTOISE.

THIS enormous Land Tortoise, just brought to England by Captain Brown, in her Majesty's ship *Geyser*, is a present to her Majesty the Queen, from Dr. Shea, Surgeon of the Royal Naval Hospital, at the Cape of Good Hope. It is said to be a native of the Galapagos Islands, and was brought to the Cape of Good Hope a few years since, in a whaler. From its very unusual size, it is justly considered a rare and valuable specimen of this tribe of animals, and highly interesting to the lovers of natural history. Pliny, and other ancient authorities, assert, that in their days there were Tortoises of such magnitude, that a single shell formed the roof of a house! The subject of the Illustration, although not able to compete in size with its illustrious ancestors, yet still is of very creditable dimensions, as the following measurements will show:—

Its length is exactly seven feet, measuring from the point of the nose to the extremity of the tail, including the curve of the back; its height, when walking, is three feet; and the circumference of the body, at the largest part, seven feet eight inches. The head is only eight inches in length, and six in breadth, being very small in proportion to the size of the body, which is the case in all animals of this class. The legs are each one foot six inches in circumference, and the strength of the animal is in proportion to their size; for, torpid and lazy as it may appear, it will carry three or four men, standing upon its back, with apparent ease. It weighs about five hundred pounds, and its age is supposed to be not less than one hundred and eighty years. This, however, is quite conjectural, but it does not appear in the least degree an exaggeration, as it is well known that all the Turtle and Tortoise tribe are of very slow growth, and live to a great age: a Tortoise, formerly at Lambeth Palace, was 150 years old; and another, at Peterborough, was known to be upwards of 200 years of age. This animal, like all its kindred, seems to lead a torpid life, doing little else than eat, drink, and sleep. Its food is entirely vegetable, being fond of grass, green succulent plants, potatoes, and pumpkin.

We are indebted, for this communication, to Mr. J. Jolliffe, Surgeon of her Majesty's ship *Geyser*.

MDLLE. RACHEL'S PERFORMANCES.

WE now present our readers with the Portrait of Mdlle. Rachel, in the tragedy of "Phèdre," the performance of which was noticed at large in our last.

On Wednesday week Racine's tragedy of "Bajazet" was presented, the part of *Roxane* by Mdlle. Rachel. This character is not so well constructed for the display of the chief actress as *Phèdre*. The interest is more than divided with *Atalide*, who, besides, has the final situation. The plot, moreover, is complex; and Racine has fewer of those master-strokes in half lines and brilliant points which distinguish the former production. In fact, this piece, though somewhat romantic in its materials, is heavy in its *formules*; the oriental despotism, too, by which it is overshadowed, is oppressive. It is passion minus heroism—however tender, generous, or true. It is not virtue; it is impulse, uncontrolled in its development by foreign rule; and, wanting that antagonism, has nothing to compel it to an elevation above the natural instincts. We recognise different degrees of excitement, but not principle in its sublimity, but not sentiment in its purity. Nevertheless, the dialogue throughout is animated with the beauty, the staidness, and the harmony for which Racine's verses are remarkable. The barbarism, likewise, is, after all, in the subject; and the play is classical both in its style and method. The influence behind the scenes of the absent *Amurat*, who from a distance issues his fatal decrees, operates like the destiny of Greek tragedy, and impresses on the action a resemblance in tone and colour in all save the mystery which belonged to the elder power.

The persons are the victims of a false social state, the stern necessities of which are embodied in *Amurat*. If *Roxane* is ambitious, she is wronged. The favourite Sultana of the despot, she is precluded by law from ever becoming his wife. All-powerful at present, if she can but procure a repeal of the odious law by giving her hand to *Bajazet*, and saving him from the sentence of death now in the keeping of the vizier, *Amurat*, she may be happy. But the heart of *Bajazet* is pre-engaged, and his honour and his prudence revolts from the treacherous scheme. The rage of the proud, imperious, and ambitious beauty, terrible in the energy of her will, fierce in her pride, and implacable in her resentments, calls upon Rachel's least feminine histrionic qualities. She appeals to the object of her passion on the score of policy and interest, but in vain—at last she confesses her love. But this one touch of tenderness is most fugitive. Possessed of her sentiments, she has given an advantage to *Bajazet*, which she would fain recall, and

GIGANTIC LAND TORTOISE.—A PRESENT FOR HER MAJESTY.

A convention has been entered into between Belgium and Prussia, for the establishment of an electric telegraph between the two countries. It will connect Berlin with Aix la Chapelle, Antwerp, Brussels, Ostend, and the French frontier.

resolves to sacrifice the man she loved to the vengeance of the "woman scorned."

In this scene gave large scope for the keen irony which sits so well on the lips of [illegible]. The [illegible] is [illegible] than the [illegible] of the incestuous mother.

The [illegible] sequent scenes, in which *Roxane* awakens to the suspicion, and ultimately to the jealousy of *Bajazet*'s love for *Atalide*, rise in power and subtlety of effect. [illegible] er interviews with both are searching, grand, and overwhelming in scorn, [illegible] er, and rage, when, at last, convinced by circumstantial evidence of *Bajazet*'s simulation and deceit, her wrath rises to phrenzy; she draws her dagger to slay him with her own hand, but immediately flinging it from her, commands him to leave her presence. A previous scene, also, in which she intimidates *Atalide*, and proves the intensity of her passion for *Bajazet*, by producing to her *Amurat*'s warrant for his death was remarkably fine. With what exquisite contempt the haughty and scornful Sultana triumphed in the agonies of her humbler rival; with what lofty emotion she announced the conviction that she had thereby attained. In general, also, there is in Mdlle. Rachel's [illegible] a charming facility and precision. In all, the least possible seemed to be done, yet was that the most effective. There is, in such art, a wise economy [illegible]

[illegible] "Polyeucte Martyr" of Lucie Louise was, indeed, exquisite for the first time in England on Friday week. It is a Christian tragedy, and so abounds in religious references, that the Licenser, it seems, had a difficulty in permitting its representation. It is [illegible] though, as we should propose, somewhat different in form. Among the American criticisms on Shakspeare, is one that complains that the subject and spirit of his plays is mainly heathen. Some reference occur to historical and [illegible] but [illegible] Moreover, [illegible] exactly like this of the Corneille school. The desideratum is a drama which, while it is eminently pious in spirit, should be sparing of the technical terms of theological debate, and should manifest the religious character vitally rather than verbally. The story of the "Polyeucte" is highly interesting, and the tragedy is altogether exceedingly fine [illegible] character in which gentleness is the prime attribute, and its assumption by Mdlle. Rachel is a novelty. It has even been doubted whether she can give due expression to the more tender emotions; her *Pauline* is a triumphant proof that she can. Married to a Christian husband at the bidding of her father, though affianced to an absent lover, believed dead, but who returns at the commencement of the play as a soldier high in the Emperor's favour, she has an early struggle commences in the heart of *Pauline* between love and duty. *Severus* [illegible] acute, his grief is intens... Nothing supports him but [illegible] heroic virtue. His [illegible] *Pauline* [illegible] in their creeds, the want of which she feels in her relations with her actual husband. Nevertheless, both are capable of the greatest sacrifice, and fortify themselves [illegible] the purity of their purpose. Alas! for *Pauline*, her father is [illegible] scrupulous. Selfish, as well as unconverted, *Felix* consults his interest [illegible] seeking to remove *Polyeucte*, to make way for a new husband in the prosperous *Severus*. The religion of the former presents the point of attack. *Polyeucte* is commanded to the Temple, to attend a [illegible] and [illegible] at the gorgeous ceremonial, and even blaspheme against Jupiter himself. [illegible] *Polyeucte* is made prisoner. It is hoped that he may be induced to recant, particularly as his companion had hitherto been secret. *Pauline* entreats; but, so far from yielding, *Polyeucte* commands [illegible] since she is not a Christian. He dare [illegible] husband. The conflict between the natural and religious sentiments are strongly brought out in these scenes. In all, Rachel was graceful and pathetic. Her *poses* were invariably fine, whether expressing sorrow, pity, "the pangs of despised love," supplication, or anger; and through the whole range of those passions she diffused a thrilling tenderness which vibrated on the heartstrings. No more must be said of Rachel's nonconformity after this performance. It was as admirably various as it was pathetically intense. But the triumph of her art was reserved for the catastrophe. *Pauline* has been the spectatress of her husband's martyrdom: that sight has convinced her of the truth of Christianity. She returns to the stage converted: the new inspiration full upon her, and gives eloquent expression to the divine ecstasy. The situation was by Rachel correctly realised—wonderfully interpreted. The spiritual exaltation with which the following lines were delivered astonished and enraptured the entire audience:—

> "Mon époux en mourant m'a laissé ses lumières;
> Son sang, ainsi la bourrasque influence de ma couvrir,
> M'a dessillé les yeux, et me les vient d'ouvrir.
> Je vois [illegible]
> Je vois [illegible]
> Je suis chrétienne enfin,"

[illegible] with which this passage was rewarded was several times repeated. [illegible] *Polyeucte* [illegible] of Rachel's [illegible] tragedy concludes. Altogether, it is a work highly honourable to the French stage, and merits frequent repetition.

THE THEATRES.

HER MAJESTY'S.

Cimarosa's lovely opera, "Il Matrimonio Segreto," has seldom been rendered with such excellence as under its present revival. In this work it is essential that the several exponents should not only be possessed of fine natural voices and executional facility, but that they should be good musicians, and acquainted with the "traditions." The opera is as essentially melodious as the orchestration is tuneful and lucid. The composer's view of a proud work is fully carried out in this opera. His ruling principle was, that the melodies should repeat their first audition seize upon the ear and linger there; but that science should [illegible] [illegible] [illegible]

"Miss Warner's Musings shall long respect by their own worth; for, while the style does not present considerable ability, the matter bespeaks a cultivated, as well as a disciplined and pious mind."—Cheltenham Chronicle. "An intellectual piety is manifest throughout the work."—Worcester Herald. "Such a design cannot but recommend itself to the approbation of every Christian reader, and its style does not a certain originality which tends to quicken the reader's attention."—Southwestern Magazine. "The religious and moral duties and the consequent responsibility of Christians are treated of with great ability and truth."—Church and State Gazette. "A clear, earnest, and often heart-searching application of its doctrine to several classes of readers. There is an evident desire on the part of the young author to do good by this effort of her pen."—Dumfries Courier

A HISTORY of BRITISH BIRDS. By the Rev. F. O. MORRIS, B.A., Member of the Ashmolean Society.

"The work, beautiful, in its pictorial illustrations, and interesting in its elaborate meditations, promises to form a valuable addition to British Ornithology. Mr. Morris combines with his task a genuine spirit in the part now before us. It contains an able and novel history of four species of the Falcon family, the Peregrine Falcon, the Sea Eagle, and the Gos Hen Eagle. Some of the details are very graphic. In conclusion, we cannot but express the exquisite taste of the coloured portraits of the birds which the author describes. When complete, Mr. Morris's book will form a very superb volume."—*Sir James Maxwell.*

London: GROOMBRIDGE and SONS, Paternoster-row; and sold by all Booksellers.

Proofs before letters, £6 6s.; Artists Proof £10 10s.

PORTRAIT of SIR ROBERT PEEL.

Messrs. LLOYD, BROTHERS and Co. beg to announce that they will have ready for delivery in a few days a most striking PORTRAIT of the late SIR ROBERT PEEL, drawn on Stone, from a picture by JAMES PALMER, Esq. For the remarkable accuracy of this Portrait the publishers have only to refer to the following letter, addressed by Lady PEEL to Mr. Palmer, a few days after the decease

"Whitehall Gardens, London.

"SIR,—The Portrait you have taken of Sir Robert Peel, is in my opinion the most satisfactory one I have seen; and I shall therefore be most happy to become a subscriber. "Yours, &c.

"To Mr. James Palmer." "JOHN PEEL."

Prints, price 15s.; proofs, 21s; artists' proofs, £1 11s 6d. The number of proofs will be so limited that early application is quite essential to obtain copies.

LLOYD BROTHERS and Co., 22, Ludgate-hill, London.

Every description of the watch, and a two-month's trial allowed.

SARL'S ARGENTINE SILVER PLATE.—This beautiful metal continues to stand unrivalled amongst all the substitutes for silver, in intrinsic value, combined with its brilliant appearance, duties all composition. It is upwards of 10 years since this substitution was introduced by SARL, Manufacturer to her Majesty, and notwithstanding the many spurious and unprincipled imitations, the present increased premises, and increasing prices, evince the increasing proof of its having answered the end proposed, which was to produce an article equally durable with silver, and resembling it in colour, which it still does. The magnificent stock has recently been enriched with many splendid novelties in dinner, tea, and dessert services, and the purchaser is respectfully solicited to call at the present time. The spoon and fork department includes all the various patterns that are in general use, and the prices are marked in plain figures, and can be immediately executed. A new and enlarged pamphlet of sketches and prices is just published, and may be had gratis, or forwarded by post. Illustrated gratis by applying at the manufactories SARL and SONS, 3, Cornhill.

THE DEANEAN PLATE.—All young Housekeepers should lay in a stock of the Deanean Plate as their first furnishing. Its colour is the nearest approach to that of silver which has yet been produced, and it will wear for many years, both as bright and wear No other mean equals it in durability. It is manufactured after genuine silver patterns, by the Patentees, GEORGE and JOHN DEANE, Dessert and Table-knives, Fish-carvers, Waiters, Candlesticks, Tea sets of Fish and Table-stations, Liqueurs, Bottle-stands, &c. &c. Gentlemen's Dressing-cases have a most elegant appearance, and are constantly on hand. Also, the DEANEAN PLATE POWDER, at 6d. and 1s. per box. GEORGE and JOHN DEANE, opening to the Monument, London Bridge.

THE BLACK PRINCE STRAWBERRY.—The above S.awberry has been several years tested, and has remained two Prizes—one from the Horticultural Society, the other from the Royal Botanic. It is deemed by the best early strawberry, an enormous bearer—many plants that are standing will afford fruit upon them. The fruit is of a medium size, and when fully ripe is of a dark mulberry colour, with a rich flavour. It is now sold by all the principal Nurserymen, Seedsmen, and Florists, and plants can be had of the Royal Botanic Gardens, Regent's-park, at £2 per hundred, or 30s. per fifty. Also, will be published at the same time, a NEW BOOK, containing the whole of the POTATO sent to the Prince Consort, with the entire History and Treatment of the Potato Disease, Rhubarb for the Million, the Strawberry, Cucumber, Melon, Celery as a Salad, and Mushroom Culture, price 1s. 6d. CURE of STAMMERING.—Mr. HUNT, late of the Strand, begs to announce that he has REMOVED to No. 6, GERRARD-STREET, Soho, where he will be happy to receive Pupils on the first of August, and September. Every advantage is now given to the Stammerer at the Institution, combined with the Day Master. Terms from Town, at 4 P.M., on Mondays, Tuesdays, Thursdays, and Saturdays. The Rev. W. CROSS, M.A. affords considerable accommodation at a very large or decrease, and combines most desirable views of the Institution. Mr. HUNT, assisted by his Sons, continues to receive Pupils at his residence,

HIS ROYAL HIGHNESS THE LATE DUKE OF CAMBRIDGE, K.G., G.C.B., &c.—FROM AN ORIGINAL DRAWING.

DEATH OF HIS ROYAL HIGHNESS THE DUKE OF CAMBRIDGE

We regret to announce the death of his Royal Highness the Duke of Cambridge, at Cambridge House, Piccadilly, on Monday night.

On Monday, a bulletin was issued by his Royal Highness's medical gentlemen, stating the Duke to have been in a very exhausted state during the night, but to have rallied in the morning.

At mid-day, the Queen and Prince Albert arrived at Cambridge House.

Her Royal Highness the Duchess of Gloucester, who arrived at Cambridge House in the morning to learn the state of her Royal brother, returned at half-past nine o'clock in the evening, and ten minutes afterwards the Royal Duke expired. The following bulletin, signed by the medical attendants, announced the death of his Royal Highness:—

Cambridge-house, July 8, 1850, ten o'clock P.M.

His Royal Highness the Duke of Cambridge, after passing a tranquil day, expired somewhat suddenly, and without suffering, at twenty minutes before ten o'clock.

The melancholy intelligence was immediately announced to the Queen and Prince Albert by Major Baron Knesebeck, principal Equerry to the Royal Duke, directly after which Prince Albert paid a visit of condolence to the Duchess of Cambridge and Prince George.

His Royal Highness the Prince Adolphus Frederick, Duke of Cambridge, Earl of Tipperary and Baron of Culloden, K.G., G.C.B.; Grand Master and First Principal Knight Grand Cross of the Order of St. Michael and St. George; Knight of the Prussian Order of the Black Eagle; Field-Marshal in the Army; Colonel of the Coldstream Guards; Colonel-in-Chief of the 60th Foot; Commissioner of the Royal Military College and Royal Military Asylum; and Chancellor of the University of St. Andrew, was the seventh and youngest son of George III. He was born the 24th of February, 1774. At an early age he was destined for the army, and received his education at the university of Gottingen, with his two brothers, the present King of Hannover and the late Duke of Sussex—each being accompanied by a governor, a preceptor, and a gentleman-in-attendance. At the completion of his military studies, Prince Adolphus had his first commission as ensign at the age of sixteen; and having become a master of the German language, by his stay of three years at Gottingen, he visited the court of Prussia, and returned to England in 1793. During that year he served with the British forces before Dunkirk, and came back wearing a coat which exhibited several sabre-marks, and a helmet through which he had been wounded in the eye. He is stated to have received nine wounds in action. In 1794 he attained the rank of Colonel, and in 1803 he was placed at the head of an army of 14,000 men, destined for the defence of Hanover; but finding, on his arrival in the electorate, that its inhabitants evinced but little inclination to aid him against the enemy, he soon solicited his recal, and, after some delay, procured permission to return to England, leaving the army under the command of Count Walmoden, who was shortly afterwards compelled to surrender

His Royal Highness was, on the 27th November, 1801, created Baron of Culloden, Earl of Tipperary, and Duke of Cambridge, and he accordingly took his seat in the House of Peers.

The Duke married, on the 7th May, 1818, at Cassel, her Serene Highness the Princess Augusta Wilhelmina Louisa, third daughter of the Landgrave Frederick, of Hesse-Cassel. This marriage was re-solemnised on the 1st June of the same year, according to the ritual of the Church of England.

The Duke gradually rose to the rank of Field-Marshal; and, on the restoration of Hanover, he was appointed its Governor-General, or Viceroy, in 1816. His administration of the affairs of that kingdom was marked throughout with wisdom, mildness, and discretion. On the breaking out of a popular commotion there in the revolutionary period of 1831, the Duke's conduct was such as to eventually pacify all parties, and to effect the perfect restoration of order, in fact, the great regard the people of Hanover had for a Prince so kind and conciliatory, and yet so firm and so tenacious of his honour, went a great way to preserve the Hanoverian Crown for his family. The Viceroyalty of the Duke ceased in 1837, at the death of William IV., when his brother, the Duke of Cumberland, succeeded to the throne of Hanover. On the evening of the 4th July, 1837, his Royal Highness left Hanover.

In this country his Royal Highness has been always popular, and, certainly, most deservedly so. He took the greatest interest in the furtherance of every means likely to improve the knowledge or the happiness of his fellow-subjects. He was indefatigable in the cause of charity; he was a munificent contributor to most of the charitable establishments in this country; and, as every one knows, he was always ready to support them by his personal attendance and exertions, and by his patronage. The *Times* thus alludes to his conduct in this respect. "He was not," says that journal, "to and always in smooth water. He did not think it his sole duty to preside over balls and venison, or to angle for Lushington. He did not seek solely to dignify that which was harmonious, or to give grace and solemnity to the administrative skill of others. On the contrary, wherever there was difficulty or dispute, there was the Duke of Cambridge in the midst of it. If a close committee of sons charity in which he was interested became split into parties or torn by professional rivalry, he would suddenly make his appearance on a committee-day, take the chair as president of the charity without notice or ceremony, and, in a very short time, either compose the quarrel, or, what was equally important, put the burden and disgrace of the dispute on the right shoulders. He would sacrifice none of his own dignity in investigating the most minute circumstances, and he took care that others should not peril the charity by their disputes or intrigues. This habit of rushing into the breach was strongly shown in 1847, when the very existence of the German hospital at Dalston was perilled by a dispute amongst its officers, and still more successfully exhibited in the same year at the Middlesex Hospital, where, from similar causes, a disturbance had taken place." He evinced, too, the same fostering care towards learning and the fine arts. His private character was ever unexceptionable. When young his habits were very studious, and his acquirements as a scholar were far more considerable than was generally supposed. His manners were affable and pleasing, no person, perhaps, possessing more completely that characteristic which the French term "*bonhommie*." He was a thorough English prince in habits, disposition, and bearing, and he roamed at all times at home with the English people, and they with him. His demise will be deeply regretted by all parties.

In the House of Lords the Duke of Cambridge spoke but rarely, and then only upon very important occasions. In politics, he had from the beginning of his career acted generally in favour of the Tory party: his deep affection for his father made him resist all overtures on the part of Fox, Sheridan, his brother the Prince of Wales, and the other Whigs of that day; and, though latterly always ready to support the measures of the Government as chosen by his Sovereign, if he conscientiously could, he on all occasions displayed Conservative calmness and caution. His mode of address, though not eloquent, was sensible and impressive, and he was ever listened to with attention and respect.

As a friend to the soldier's widow and the soldier's orphan, his Royal Highness worthily imitated the example set by his brother the Duke of York: he almost weekly visited the Military School at Chelsea.

The Duke was the favourite son of George III., and the following anecdote marks the opinion that Sovereign entertained of his merits. When it was proposed to grant his Royal Highness the allowance of £12,000 a year (since raised to £27,000), George III. said, in speaking of him, "that he had not committed his first fault." The whole tenour of the Duke's subsequent life perpetuated the truth of this assertion.

The Duke leaves issue, with two daughters, one son, Prince GEORGE WILLIAM FREDERICK CHARLES, now DUKE OF CAMBRIDGE, K.G., G.C.H. and G.C.M.G., a Major-General in the Army, and Colonel of the 17th Lancers. The daughters are the Princess Mary Adelaide Wilhelmina Elizabeth, and her elder sister, the Princess Augusta Caroline Charlotte Elizabeth Mary Sophia Louisa, who was married, June 28, 1843, to Frederick William Charles, Hereditary Grand Duke of Mecklenburg-Strelitz, and has issue.

CHESS.

TO CORRESPONDENTS.

PRESIDENT—The rules in question will be amply sufficient for your new club. With regard to the boards, we should strongly recommend you to use the very handsome pattern just brought out by Mechi, which is decidedly superior to any others of the kind in use.

R. H.—The review of the "Chess-Player's Handbook," and the "Companion," which appeared in our last Number, is by an eminent provincial player, but not, we believe, the writer who reviewed the same works in the "Quarterly" some time back. We fear you will have some difficulty in obtaining the notice now, as it appeared only in the early editions, and was thus omitted, for the more important particulars connected with Sir Robert Peel's lamented decease.

PIGEON.—The remedy rests with the amateurs themselves. Let them resolve HENCE, *under any circumstances, to play for a stake at Chess in a public room*, and the class in question would soon be heard of no more.

G ♕ is thanked for the drawings of his Antique Chess-men, and we shall now look forward with redoubled interest to the promised particulars regarding them.

PROFESSOR S.—Our best acknowledgments are due for the games between the great player of Germany, Von Der Lasa, and the American amateur, Mr. Schulten.

CAISSA, MARCH, C F S, H E B, C M J.—They shall be examined.

CANON, Lichfield.—You will, no doubt, obtain the new chess men in ivory or wood, of Jennens and Bettridge, the well-known papier-mache manufacturers, of Birmingham. We shall be glad to see a list of the proposed club.

P C H.—There is nothing problematical in such positions.

ETONIENSIS.—There is no difference in merit between our Problems on Diagrams, and those called Chess Enigmas; but we have space sufficient only for one Diagram, and are, consequently, obliged to give the others, however excellent, less conspicuously.

GUARDIAN.—We must refer you to the advertisement in our last Number for particulars as to Mechi's new chess-board.

HINDUS.—His Excellency Jung Bahadoor and suite occasionally visits the St. George's Chess-Club, but he has not yet been tempted to test his skill with any of our players.

SOLUTIONS by CAIUS, R D, F J G B, AGNES, SOPHIA, W N, A B, DERBYITE, FERDINAND, W S T, TREN. COL. CAMB., TOM FUM, J F, Hythe, BOLDS, C S, ST. EDMUND, REMNEY, M F, Rev J C, F R S, Rev T P N, Rev H B, R FIELD, J A R, Royal Artillery; E H, M H S, R F, Bombardier; SIR EDMUND, B A Q, M E S, BELLAMY, are correct. All others are wrong.

* * Any amateur of moderate pretensions, in *Lincolnshire*, who is desirous of playing a Match at Chess, may hear of an opponent by addressing X A, 42, Silver-street, Lincoln. The stake to be a set of the "Staunton Chess-Men."

SOLUTIONS OF PROBLEMS NOS. 336 AND 337.

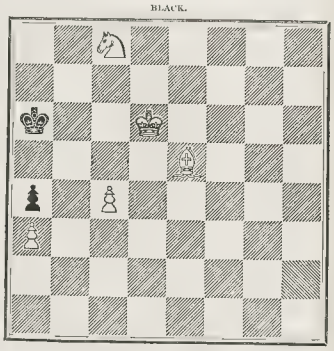
PROBLEM No. 338.

"THE NEPAULESE PROBLEM." Presented by his Excellency JUNG BAHADOOR KOONWUR RANAJEE, Ambassador from the kingdom of Nepaul.

BLACK.



WHITE.

White, having to play, checkmates in four moves.

SECOND MATCH BY CORRESPONDENCE,

BETWEEN THE LONDON AND AMSTERDAM CHESS CLUBS.

WHITE (London).	BLACK (Amsterdam).
9.	Q Kt to B 3d
10. B to Q Kt 2d	

Amsterdam to play.

CHESS IN THE METROPOLIS.

Mr. BUCKLE gives the Pawn and move to Mr. C. F. SMITH.

(Remove White's K B Pawn from the board.)

BLACK (Mr. S.)	WHITE (Mr. B.)	BLACK (Mr. S.)	WHITE (Mr. B.)
1. P to K 4th	P to K 3d	12. Q to K R 3d (c)	Q to K Kt 3d
2. P to Q 4th	Q Kt to B 3d	13. K B takes Q P	K to his sq
3. P to K 5th	P to Q 3d	14. K B to K 4th	Q to K B 2d
4. K B to Q 3d	K Kt to K 2d	15. K B takes Kt (ch)	Kt takes B
5. Q B to K Kt 5th	Q Kt takes Q P	16. Q R to Q 2d	K B to K 2d
6. Q to K 5th (ch)	K to Q 2d (a)	17. B takes B	Q takes B
7. Q Kt to B 3d	Q to K sq	18. K R to Q sq	P to K Kt 3d
8. Q to K Kt 4th	Q Kt to B 3d	19. Q Kt to K 4th	Kt to B 2d
9. K Kt to B 3d	P to Q R 3d	20. Kt to K B 6th	Kt takes P (d)
10. Castles on Q side	P to Q 4th	21. Kt takes Kt (ch)	K takes Kt
11. K B to Q B 4th (b)	P to K R 4th	22. Q to her B 3d	Q to K R 2d
	And Black mate[d]	in three moves.	

(a) Mr. Buckle has not opened this game with his usual tact and discretion.

(b) Bishop to K 4th would have been stronger play.

(c) If we mistake not, Black omitted here to make the most of his fine position. We should at once have taken off the Queen's Pawn. [Examiner.

BLACK.	WHITE.	BLACK.	WHITE.
19. Q Kt takes Q P	K Kt takes Kt (if he take the Q, Black obviously mates next move)	18. R takes Kt (ch) 14. Q to K R 3d, with a winning advantage.	K B to Q 3d

(d) K R to Q sq might still have enabled White to keep the field, but the move made amounts to a surrender.

CHESS IN THE PROVINCES.

Slight affair, in which Mr. SPAUNTON gives the Queen's Rook and Knight to a Member of the Chess Club at Ryde, Isle of Wight.

(Remove Black's Q R and Q Kt from the board.) (R's Gambit declined.)

BLACK (Mr. S.)	WHITE (Mr. J.)	BLACK (Mr. S.)	WHITE (Mr. J).
1. P to K 4th	P to K 4th	12. R to K R 4th	Q to K Kt 2d (d)
2. P to K B 4th	P to Q 3d	13. R to K Kt sq	Q B to Q B sq (e)
3. K Kt to B 3d	Q B to K Kt 5th	14. B to K 6th (f)	Q Kt to R 3d
4. P takes P	P takes P	15. Kt to K B 5th	Q to her B 2d
5. K B to Q B 4th	Q to K B 3d (a)	16. B takes Kt	Q R takes B
6. Castles	K B to Q 3d	17. Q to K 6th (ch)	B to K 2d
7. P to Q B 3d	K Kt to K R 3d	18. Kt takes B (g)	K to Q sq (h)
8. P to Q 4th	Q to K 2d	19. Kt takes R	Q takes Kt
9. Q to her Kt 3d	P to Q B 3d (b)	20. Q takes P (ch)	K to B 2d
10. Q B to K Kt 5th (c)	P to K B 3d	21. Q takes K P (ch)	K to Q Kt 3d
11. B takes Kt	P takes B	22. P to Q Kt 4th	
		And White surrenders.	

(a) Imprudent, because it subjects the Queen to the danger of a discovered attack from the adverse Rook.

(b) To defend the Q Kt P, aggressive move; but not so good, in the present case, as Castling at once.

(c) The object of this is to compel the advance of the K B Pawn, so that, on taking the Kt, the disruption of White's Pawns may be more effectual.

(d) Threatening R to K R 6th anon.

(e) Anticipating the coming on of Black's K R P.

(f) An important step towards the subsequent attack.

(g) With such an overwhelming force on the other side, Black has still to fight with care and caution. Had he been tempted now to try for mate, by taking K P with Pawn, or checking with the Knight at K Kt 7th, he must have lost the game. For example, suppose in the first instance :—

BLACK.	WHITE.	BLACK.	WHITE.
18. P takes K P	Kt to Q B 6th	20. Q takes B (ch)	Q to her sq
19. Kt to Q 6th (ch)	Q takes Kt		And White should win.
Second :—			
BLACK.	WHITE	BLACK.	WHITE.
18. Kt to Kt 7th (ch)	K to B sq	20. Kt to K 6th (ch)	K to B 2d
19. Q to K Kt 4th (best)	K R to Kt sq	And Black must lose.	

(h) And odd-looking move, but quite as good a one as he can find at this crisis.

LONDON: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by WILLIAM LUTTLE, 198, Strand, aforesaid.—SATURDAY, JULY 13, 1850.

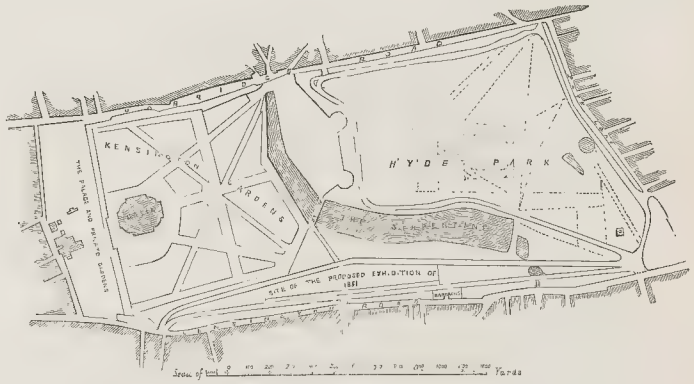
THE ILLUSTRATED LONDON NEWS

No. 437.—VOL. XVII.] FOR THE WEEK ENDING SATURDAY, JULY 20, 1850. [SIXPENCE.

THE GREAT EXHIBITION OF 1851.

MR. PAXTON'S design and estimate for the structure in Hyde Park for the Exhibition of 1851 (an Engraving and description of which appeared in the ILLUSTRATED LONDON NEWS of the 6th instant), have, we are glad to find, been adopted, after lengthened deliberation, by the Building Committee of the Royal Commission, as the best and most acceptable, in every point of view, of the various tenders submitted to their consideration. We have already entered so fully on the merits of Mr. Paxton's plan, that it is only necessary, on the present occasion, to state that the cost of the erection is to be £87,000; that all the materials are to remain the property of Mr. Paxton, to be removed by him, or otherwise, at the appointed time, according to the directions of Parliament, and that the building will be commenced in a few days.

A great, but, as it appears to us, very senseless and unjust outcry, has been raised by a certain portion of the press and the public against the erection of any building in Hyde-park for the purposes of the Great National Exhibition of 1851. We are inclined, however, to treat this outcry, fomented as it is by all sorts of prejudices and misrepresentations, as of exceedingly little worth. When the Exhibition was first proposed, all classes of the people, from the highest to the lowest, united in approval of a scheme so vast, and so likely to be beneficial. It was hailed as an undertaking of world-wide importance, and as calculated, more than any other project ever broached in our time, to strengthen the mutual good feeling of all the civilized nations of the earth. It is still viewed in this light even by those who object to placing it in Hyde-park. It is evident that such an exhibition, if we are to have it at all, must have a local habitation somewhere on *terra firma*. We cannot have it in the clouds. Hyde-park was mentioned from the very first as the site in every way most eligible and advantageous, and further and most careful consideration has but confirmed the original decision. Whatever site might have been selected would have been open to the objections of those whose failing it is to be never satisfied with any arrangement which satisfies other people; and sensitive owners of property, and hypochondriacal old gentlemen and ladies, would still have been found to complain of the building, and the traffic it would cause, in whatever part of the metropolis or its environs it had been determined to place it. But the objectors to what is absurdly called "the profanation of Hyde Park," are less entitled to sympathy than any other class of objectors whatever, as it was never seriously proposed to place it anywhere else. There might be some toleration for objectors, if it were at this late period determined to place it on Primrose Hill, or any other public site. They might plead that they never heard of the proposition before, and insist that even at the eleventh hour they were justified in complaining of it. But those who so vehemently declaim at the present time against making Hyde Park the site, have no such plea. They knew from the very first what was intended and agreed upon; and it is rather too late in the day for them to come forward with such objections as they now make. The whole civilised world has been officially informed of the Exhibition, and of its proposed site; all the manufacturing nations of the earth have been invited to send to it the specimens of their taste, skill, industry, and enterprise; many of them, at considerable expense, have appointed commissioners to co-operate with the commissioners in this country; some have even sent their agents over; and others have already agreed to transmit at their own expense to Hyde Park the articles—many of them most bulky and cumbrous—which they intend to exhibit. The people of Great Britain have subscribed about £64,000 in aid of the project, which sum includes the small but graceful and grateful contributions of many thousands of working journeymen in various trades. Committees in all our large cities and towns have been formed, and a vast machinery has been set in motion, all whose operations would come to a stand-still, if at this, the eleventh hour, any other place than Hyde-park were to be



PLAN OF HYDE PARK.

THE "HELENA SLOMAN" STEAM SHIP.—(SEE NEXT PAGE)

selected. The result of a change of place would, probably, lead to the postponement of the Exhibition for a whole year, or even to its total abandonment. Rather than such a national disgrace should befall us, we might well consent to make some sacrifices even of the beauty and amenity of Hyde-park. But the sacrifice, if any, will be so exceedingly small as to be inappreciable except to the microscopic eyes of professional and constitutional fault-finders A glance at the map in the preceding page will show better than whole columns of description, how little of the really ornamental or available portion of the Park is to be occupied for this magnificent purpose. Twenty acres out of 387 would be no such formidable inroad upon the space set apart for the public health and recreation, were there no other parks in London; but, when we remember that there are Kensington-gardens, St. James's-park, the Green-park, Regent's-park, Greenwich-park, the Victoria Park, Richmond Park, and Bushy Park, or about 1568 acres in all—which will still be as available as ever they were to the public comfort and necessity, it becomes almost ludicrously evident that the objections of those who allege injury to the health of the people—a loss of needful enjoyment and recreation to any classes—by being deprived for a short time of these twenty acres, are of the most infinitesimal, if of any, value. The general public, we are convinced, do not share either their alarm or their objections; and would be quite content, in case of need, to make a real and not a fancied sacrifice for such a great purpose as the Exhibition. Fortunately, no sacrifice is required; but, if it were, the public heart is so set upon this matter, that a sacrifice twenty times greater would be cheerfully made, if put to the vote of the great bulk of the community.

We cannot conclude this subject without a word upon another point. So determined are some writers to find fault, or so incapable are they of considering the proposed Exhibition without an effort to thwart it, that no design for the building, from whomsoever it may emanate, is allowed to have any merit. Brick will not suit them, stone does not please them, iron is distasteful to them, and the magnificent iron and glass house, designed by Mr. Paxton—at all events a novelty—is not considered worthy of a second thought. In fact these critics are determined to be dissatisfied; and will neither approve of a site nor of a building, wheresoever the site may be, and whosoever may be the competing architect. If they would boldly state at once that they object to the whole Exhibition, we should be able to understand them; but to approve of the Exhibition, and yet to object to all possible means of carrying it out, is as senseless as it is mischievous.

THE "HELENA SLOMAN" STEAM-SHIP.

THIS splendid screw steamer was built at the works of Messrs. T. and W. Pim, engineers, English-street, Hull, for R. M. Sloman, Esq., Hamburg, and is intended for passenger traffic between that port and New York. She is the first of a line of steamers designed for the conveyance of emigrants from Germany to the United States; which, considering the great number that annually leave their Fatherland for the shores of America, will probably become an equally extensive and important. Their route has hitherto been from Hamburg to Hull, and thence to Liverpool, where they embark in the English or United States liners. They will now be able to leave Hamburg, and proceed direct, and by the best and quickest conveyance, to their adopted country.

The *Helena Sloman* is the largest screw steamer that has been built at Hull, and is the tenth of that class completed in the building-yard of the Messrs. Pim. She is propelled by two engines of 80 horse-power each, and the steam is supplied by tubular boilers on a new construction, patented by her builders; the peculiarity of which consists in an economical application of steam navigation, namely, a great saving of fuel, the consumption being on an average only 12 cwt. per hour, steaming at the rate of nine knots, on her passage between Hull and Hamburg, with a head wind, and carrying upwards of 600 tons, coals and cargo.

The model and rig of the *Helena Sloman* are calculated equally for steaming and sailing; and her performance has proved her to be a first-rate sea-boat. The hold is divided into six water-tight compartments; space between decks, 6 feet; and fitted with iron bedsteads, and well ventilated. She is capable of carrying 300 third-class passengers, and 60 each first and second class. For the accommodation of the two latter, she has a spacious and handsome saloon, lighted from the sides and top, and is entered both from the main deck and poop; the latter entrance leading into a smoking-room apart from the principal saloon. No expense has been spared to render the apartments as well as those for the second class passengers, the state-rooms and sleeping berths for ladies and gentlemen, cheerful and convenient. The saloon extends the whole breadth of the ship, and is, consequently, not confined; but gains additional space by panelling in of bird-eye's maple, highly polished, with gilt mouldings and spiral columns of the same beautiful wood, between which are placed several mirrors. The seats and sofas are also of the same wood, covered with green velvet. The *Helena Sloman* has given complete satisfaction to her owners, whose overseer, Mr. Holt, superintended her construction.

The *Helena Sloman* left Hamburg, on the 9th ult., with upwards of 400 passengers, which she accommodated with ease and safety.

NAVAL AND MILITARY INTELLIGENCE.

THE ROYAL YACHT.—The Royal yacht, *Victoria and Albert*, has arrived at Lisbon. The yacht has made the most wonderful passage on record (the quickest ever made by a steamer from England hitherto occupied 78 hours). The *Victoria and Albert* has made it in 65 hours. The distance she ran is about 760 miles. The current was against her crossing the Bay of Biscay, by which she lost 30 miles; consequently she averaged a mean speed per hour of 12 knots 2fms, for 65 consecutive hours, an achievement never before accomplished by any steamer, and altogether unparalleled. The yacht brought out copies of the London journals, containing Lord Palmerston's great speech in defence of his foreign policy, and delivered them at the residence of the British minister at Lisbon in 66 hours from England! The *Victoria and Albert* is expected back at Portsmouth the latter end of this month.

The pay of the Colonel-in-Chief of the 60th Rifles, vacant by the death of the late Duke of Cambridge, only amounts to the sum of £338 15s. 5d. per annum, or 18s. 1d. per day.

REWARDS FOR DISTINGUISHED SERVICES.—An augmentation of £100 has been granted to Major-General Alexander Thompson, C.B., and Major-General Sir Thomas Henry Browne, K.C.H., in addition to the sums already enjoyed by each of those distinguished officers.

MAJOR EDWARDES.—The Honourable East India Company have granted an allowance, during life, of £100 per annum to the gallant Major Herbert Edwardes, in consideration of his eminent services and the serious injury to his right hand.

INCOME AND EXPENDITURE OF GREENWICH HOSPITAL.—The total revenue of Greenwich Hospital for the year 1849 was £149,731 6s. 8d., and the expenditure £146,557 18s. 2d., leaving a surplus of £1773 8s. 2d. The revenue is made up in the following manner:—Net produce of estates in Northumberland, Cumberland, and Durham, £29,219; ditto of estates in Greenwich, £2531; interest on vested property, £82,491; grant from the Consolidated Fund in lieu of merchant seamen's expenses, £20,000; fortfeitures on treasure, £10,405. The principal items of expenditure may be thus described: Household and contingent expenses, comprising the maintenance and clothing of 2110 pensioners and 97 nurses, salaries, allowances, £112,376; paid on account of sch ols, £18,683; purchase of ground to keep the river frontage opposite clear from unsightly buildings or manufactories affecting the health of the inmates of the hospital, £12,820.

MILITIA ESTIMATES.—The report just issued from the select committee appointed to prepare the Militia Estimates for the year 1850-51, sets forth that the estimated charge of the disembodied militia of Great Britain and Ireland from the 1st April, to the 31st March, 1851, is £109,800; viz. £86,650 for that of Great Britain, and £23,200 for that of Ireland. The numbers are 3341 for Great Britain, and 457 for Ireland. The total decrease on the estimates, as compared with those for the year 1849-50, are of numbers 166, of charge £2950. The detail of charge of the out-pensioners from the British and Irish regular militia, and from the local militia for the year ending 31st March, 1851, shows their united numbers to be 22376, and the estimated charge to be for the regular militia, £30,000; and for the local militia, £850.

A CAPTURE NO PRIZE.—Captain the Hon. G. F. Hastings, of the *Cyclops*, has been recently cast in £5000 damages, by the Slave Commissioners on the Coast of Africa, for illega. detention of a Portuguese ship.

Captain Dumont, one of the survivors of the melancholy shipwreck of the *Medusa*, died last week at Maintenon, in France, in the 76th year of his age.

In the year ended 5th January last, the wine imported into this country amounted to 7,970,067 gallons. The quantity retained for home consumption was 6,20 ,362 gallons. The quantities remaining in warehouse under bond at that date were 8,0 3,957 gallons. Of spirits 10,509,774 gallons were imported in the year. Brandy was much imported last year on account of the cholera—no fewer than 4,479,549 gallons, of which 2,187,3 8 gallons were retained for home consumption. On the 5th January last there were of spirits 8,698,174 gallons in warehouse under bond

FOREIGN AND COLONIAL INTELLIGENCE.

FRANCE.

The bill for the restriction of the public press has passed the Legislative Assembly, and the Paris journals, with very few exceptions, denounce the measure as the most fatal blow ever aimed at the liberty of thought and the freedom of its promulgation. They declare that it is the more galling, because this work of destruction has been accomplished by the Republic.

The news-agents have been prohibited from selling the *Pouvoir*, in consequence of the attack on the Assembly published in that journal of Monday last

On Wednesday a resolution passed the Assembly, according to which it is to be prorogued from the 11th of August to the 11th of November.

The Minister of Finance on the same day brought forward the budget for 1851, and stated that the receipts of the year would more than realise the calculations he had made on admitting the financial statement to the House on the 4th of April. From the prosperous state of the revenue, he should neither require a loan, nor any additional taxes. He had great pleasure in stating that the persons unemployed were not so many by one-half as at this period last year, and that commerce was daily improving.

Rumours were in circulation that a change in the Constitution would, in all probability, shortly be proposed, the President of the Republic being desirous of creating a Senate of about 240 persons of distinction. Count Montalembert is to bring forward the measure, and, if carried, is to be the President, with full power over the Church, in which he has ever felt a deep interest. Such are the reports; but, whether or not they rest upon any substantial authority, is more than we can undertake to say

M. Victor Hugo is so unwell that he has been compelled to apply to the Assembly for leave of absence. An affection of the throat is the cause of indisposition.

The *Moniteur* publishes a statement of the revenue for the first six months of 1850. The receipts total exactly to 350,467,000 francs. This result, compared with the corresponding returns of 1848 and 1849, presents in increase in the first case of 18,640,000 francs, and in the second of 16,031,000 francs.

The President of the Republic went on Compiegne on Sunday, and was received with great applause by the townspeople and the inhabitants of the village. There is, however, little real political importance in such demonstrations as these

The annual exhibition of the works of living artists is to take place in the Louvre, and is to commence on the 1st September.

A fire broke out on the 10th inst., at Fontenay, near Versailles. Firemen were at once despatched in considerable force, and after great difficulty, succeeded in getting the fire under. The celebrated Horace Vernet, wearing his uniform as Colonel of the National Guard, was on the spot at the head of his men.

SPAIN.

Notwithstanding all the costly preparations which had been made on so extravagant a scale to welcome the little stranger," the hopes of Isabella Segunda of a direct heir to her throne have been bitterly disappointed. Her Majesty was delivered, at four o'clock on the afternoon of the 12th inst., of a son, who died a few minutes after birth. The health of the Queen was progressing satisfactorily.

AUSTRIA.

The utmost astonishment, as well as joy, has been created both in Austria and Hungary by the disgrace into which "the butcher Haynau," as the sanguinary Commander-in-Chief of the Austrian forces in the recent Hungarian insurrection was called, has suddenly fallen. He has been dismissed from the civil and military government of Hungary, as appears from the following official announcement in the *Wiener Zeitung* of the 8th inst.:—"His Majesty, on the respectful proposition of his Ministers, has been pleased, by an order of the 6th inst., to remove Lieutenant-General Baron Haynau from the post of Commander of the Third Army, and from the full powers arising from the present exceptional state of affairs in Hungary, and connected therewith." No motives are assigned officially, but there exists a prevalent impression that the General, falling from the excess of severity to the opposite extreme, has not shown desired discretion in the complete and unconditional pardons accorded by him to persons recently condemned, especially in the case of the members of the Debreczin Parliament.

From the official report of the state of the cholera, made at Vienna on the 11th inst., it appears that it is on the increase; 139 cases had occurred from the 10th of June to the 8th, of which 62 proved fatal. Of these cases 82 appeared in the faubourg of Leopoldstadt alone, where this disease has appeared in the form of an epidemic with great severity. Sanitary committees have been appointed, and all the laws and regulations reiterated which were prescribed last year.

DENMARK AND SCHLESWIG-HOLSTEIN.

The German powers having to all intents and purposes withdrawn from their hitherto hostile attitude against Denmark in favour of the Duchies of Schleswig-Holstein, the Danes appear determined to fight out the contest on their own account; and, accordingly, the disputed territory is bristling with the movements of troops, preparatory to striking the first blow.

Accounts from Hamburg to the 12th inst. state that Gen. Willisen had marched into Schleswig towards Eckernforde. At the latter place he was advancing beyond Hadersleben. Schleppergell, the Danish general, was in Flensburg on the 10th, and had a conference with the commander of the city, Von Kasen. Strong preparations are making for defence.

The Duchy army increases in strength. German officers continued to arrive. Colonel von Gerbard would, it was believed, command the advanced guard. An order had just issued for the mobilisation of the Duchies of Kiel, which announces the terms on which alone Germans can take part in the defence of the Duchies. Subaltern officers and soldiers under thirty-five years of age will be welcomed;—1. Certificates of character; 2. Proofs of their having a fostering way with the people; 3. they must take an oath to serve for the term of the war, and not be discharged. Persons disabled in the war will receive a pension from the Duchies.

UNITED STATES.

We have accounts this week from New York to the 6th instant.

Professor Webster, who was, a short time since, tried and convicted of the murder of Dr. Parkman, in Boston, had made a confession of his guilt, but solemnly declared that it was unpremeditated, and that murder was not contemplated by him when he appointed a meeting with his victim. The Irvine, Mexico. Ten American citizens were murdered by the Apaches in the month of May. The mail with which they were entrusted was found completely rifled of its valuable contents, and the bodies of the slain were stripped.

The excitement growing out of the attempt of the executive authority over New Mexico is of a highly serious character. A convention of delegates assembled at Santa Fe have formed and promulgated a constitution for the government of New Mexico. The convention met on the 12th May; the session lasted nearly ten days; and the constitution was to go into operation on the 1st of July. The boundaries of the State were defined, and slavery prohibited. An election was to take place in a few days for the choice of members to the State Legislature. Two senators and representatives to Congress were also to be elected, and efforts would be made to procure their acceptance at Washington.

The Vesuvius steam-ship, on her way to Halifax, was wrecked on the 23th ult., on Shag Island, between Cape Sable and the Sea Islands, and sustained considerable injury. Fortunately no lives were lost, and the passengers have come to England in the *Cambria*. It was expected that the vessel would be got off. The disaster is ascribed to the same cause assigned for the loss of the *Great Britain*—the effect of an iron ball on the compass.

CANADA.

From Toronto we have advices, stating that the bill to increase the number of representatives in the East Indian and Chinese Seas, on reaching a vote of 24 against 24, two-thirds of the whole House, consisting of 84 members, being necessary to a decision. The address to the Queen in favour of placing the Clergy Reserves at the disposal of the Legislature, and also expressing satisfaction with England, and a desire to continue the existing relation, was adopted by a large majority.

INDIA AND CHINA.

The despatches which hitherto arrived, *viâ* Marseilles, in anticipation of the heavier portion of the East Indian and Chinese Mail, are rejoicing themselves anticipated now by electric telegraph despatches, *viâ* Trieste. We thus learn of the arrival of the Calcutta parcels at Suez, on the 4th inst., with papers and letters of the 1st ult.

The Bombay mail had not reached Aden. There was no political news of the least interest, if we except the statement that the Sikhs at Hydrabad had shown symptoms of rebellion. Marquis Dalhousie, the Governor-General, was still suffering from indisposition. The heat of the season prevented all activity, and the military complained of Sir Charles Napier, on account of his unnecessarily moving the troops during the hot season.

The accounts from China mention the death of the President of the Cabinet. The negotiations between that country and Great Britain were at a stand still, neither had the commercial treaty between America and China been concluded.

Disturbances continued at Bantam, on the island of Java.

Some pirates had been seen in the waters of Kiel, and a junk had been plundered

The cholera was raging at Kambodia as much as formerly at Siam and Cochin China.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

Sir Thomas Wilde took the oaths and his seat as Baron Truro, and presided as Lord Chancellor

The Royal assent was given by commission to fifty-one public and private bills.

FACTORIES BILL

The Earl GRANVILLE moved the committal of the Factories Bill, and stated that the measure had been adopted by the Government as a fair compromise between the millowners and the operatives. He declared that, should the amendment to be proposed by the Duke of Richmond be carried, the Government would give up the bill, which would in that case be probably lost, to the great disadvantage of the operatives.

Their Lordships having gone into committee on the bill,

The Earl of HARROWBY moved an amendment similar to that proposed by Lord Ashley in the House of Commons, relative to children.

Lord STANLEY could not support this amendment, because it was a restriction on the millowners not contemplated by the act of 1847. But he was quite ready to support the amendment to be proposed by the Duke of Richmond, the object of which was to render the measure a substantial Ten Hours Bill.

The committee divided—For Lord Harrowby's amendment—Content, 25; Not-content, 58:—Majority against the amendment, 33.

The Duke of RICHMOND moved his amendment, the same as that proposed in the Commons by Lord J. MANNERS, the object of which was to limit the period of factory labour really to ten hours. The noble Duke said he would not put the question on the low ground of expediency, or admit the right of requiring the operatives to listen to any compromise whatever; but he would boldly call on their Lordships to keep their faith, to uphold their own act of Parliament, and to reject with disdain the proposal to take any paltry advantage of a flaw in the law they had so lately passed. He assured the Government that he was not deterred by the threat of their abandonment of the bill. Should his amendment be carried, he was himself prepared to adopt the measure in that House, and Lord J. MANNERS was equally prepared to take charge of it in the House of Commons.

Lord STANLEY and the Bishop of OXFORD spoke in support of the amendment, the Earl Granville, the Bishop of Manchester, the Earl of Galloway, and the Marquis of Lansdowne against it.

The committee divided. For the Duke of Richmond's amendment:—Content, 39; Non-content, 52. Majority against the amendment, 13.

The bill passed through committee.

The Larceny Summary Jurisdiction Bill, the Master's Jurisdiction in Equity Bill, and the Spiritual and Capital Consulting Disorders Prevention Continuance Bill, were read a third time and passed.

The Vestries and Vestry Clerks Bill was read a second time.

The Municipal Corporations Bill, and the Registration of Deeds (Ireland) Bill, went through committee.—Adjourned.

HOUSE OF COMMONS.—MONDAY.

The House had an early sitting, at which a few more clauses in the Mercantile Marine Bill were agreed to, after much discussion.

At the evening sitting,

SUNDAY POSTAL LABOUR.

Lord MARCUS HILL brought up her Majesty's reply to the address of the Commons, announcing that her Majesty had directed an inquiry on the subject of the Sunday Post-office deliveries.

FOREIGN AFFAIRS.

Lord PALMERSTON stated, in answer to a question put by Mr. Stanford, that some correspondence had taken place with the various German Governments relative to the contemplated re-construction of the Zollverein Customs League, but the correspondence was not in a state of sufficient forwardness to be laid before Parliament

In reply to Mr. B. COCHRANE, the noble Lord (Palmerston) stated that no remonstrance had been addressed by her Majesty's Government against the continued occupation of Rome by the French.

ATTORNEYS' CERTIFICATE DUTY.

Lord R. GROSVENOR moved the second reading of the Attorneys' Certificate Bill.

The CHANCELLOR of the EXCHEQUER opposed the bill, on the ground that, if the condition of the national finances was such as to allow of a reduction of taxation to the extent of £100,000, there were many ways of giving that reduction more advantageously to the general community than by taking off the attorney's certificate duty. Should this duty be taken off, it would be impossible to maintain the duties on auctioneers, horse-dealers, and others.

Mr. HUTCHINS and Mr. MUNTZ supported the bill.

Mr. BASS opposed it.

Mr. GOULBURN condemned attacks upon minor branches of taxation, and the fluttering away of the public revenue in this small way.

Mr. BRIGHT opposed the bill.

The House having divided, there were, for the second reading of the bill, 129; against it, 122:—majority against the Government, 17.

The bill was read a second time.

ECCLESIASTICAL COMMISSION.

The House went into committee on the Ecclesiastical Commission Bill, and agreed to the remaining clauses.

Mr. HUME proposed the addition of a clause to enable towns containing 100,000 inhabitants, by subscribing £30,000 as an endowment for a Bishop, to have one appointed for the district, with the consent of the Bishop of the diocese and of the Government.

Lord J. RUSSELL objected to such a new constitution of bishoprics, different from, and independent of, the present episcopal order. He considered the increase of the clergy more desirable than the increase of Bishops such as those proposed

After some observations from Lord J. MANNERS, in support of the clause, Lord J. RUSSELL promised to consider it; and, with that understanding, the clause was withdrawn.

Mr. S. HERBERT proposed a number of clauses, which he had framed with the view of effecting cathedral reform.

Sir G. GREY admitted that the subject was deserving of serious attention, but he thought that a plan of such importance, involving so many details, should be introduced, if introduced at all, in a separate bill

After a short discussion, the clauses were divided—For Mr. Sidney Herbert's clauses, 84; against them, 104: majority against the clauses, 20.

The bill went through committee.

The Militia Ballot Suspension Bill, the Loan Societies Bill, and the Ecclesiastical Jurisdiction Bill were read a third time and passed.

MONUMENT TO SIR ROBERT PEEL.

The report of the resolution of Committee on the Monument to Sir Robert Peel was agreed to unanimously.

The Militia Pay Relief Bill, as amended, was received, and the third reading was fixed for twelve o'clock on Friday.

The Stock in Trade Bill went through committee.

The Population Bill and the Population (Ireland) Bill were read a third time and passed.

The Highway Rates Bill was read a second time.

MARRIAGES BILL.

Mr. J. S. WORTLEY moved the passing of the Marriages Bill.

Mr. HUME opposed the bill, that, as he had already divided the House on the proposal that the bill should be extended to Ireland, he would not again put the House to the trouble of dividing.

The bill was then passed. Adjourned at a quarter to one o'clock.

HOUSE OF LORDS.—TUESDAY.

REDUCTION OF OFFICIAL SALARIES

Lord BROUGHAM asked the Lord President if it were true that the office held by the late Sir Thomas Murrable, in the Board of Green Cloth, had not been, and was not to be filled up. He desired to know this, because it had been noticed elsewhere that most important reductions were to be made in the salaries of the diplomatic and judicial functionaries of the country. Should these ill-judged retrenchments be made, Lord Brougham gave notice that he would feel it his duty to insist that these reductions should begin at the very top, so that no man in this country should be exempt from the rule of retrenchment. The noble and learned Lord then said he would, on a future day, move an address to the Crown, praying her Majesty to order a return to be laid before the House of the amount of all the savings in the Civil List revenue made since 1838, distinguishing the classes of savings, and the years in which they were effected. Lord Brougham added that if any person could have had the audacity to say—as had been said to the late Duke of Cambridge—that the time was come for lowering aristocracy, whoever that person might be, he should be sorry to find that Parliament was not resolved to lower the English aristocracy; although the English aristocracy would indeed be lowered if the things that were now passing should be allowed to go on—if a lady of the highest rank, connected with the families of the highest nobility in this country, were forced to the necessity of advertising for employment

The Marquis of LANSDOWNE made a remark across the table, but it was impossible to catch its import, further than that the subject should not be discussed without notice.

Lord PORTMAN moved the second reading of the Landlord and Tenant Bill.

Lord Brougham opposed it, and moved as an amendment that it be read a second time that day six months.

After a short conversation, the amendment was agreed to without a division, and the bill was consequently thrown out.

The report of the Elections (Ireland) Bill was received.

The Earl of EGLINTON drew attention to a petition complaining of the fraudulent manufacturing of pentions in reference to the Liverpool Waterworks, and moved that three persons charged with the fraud be called to the bar on Friday.

The Marquis of LANSDOWNE seconded the motion

After a few remarks by Lord MONTEAGLE and Lord STANLEY, the motion was agreed to.

The Municipal Corporations (Ireland) Bill was read a third time and passed, on the motion of the Earl of CARLISLE. Adjourned.

HOUSE OF COMMONS.—TUESDAY.

The House assembled at twelve o'clock, and sat till three o'clock, discussing the clauses of the Mercantile Marine Bill in committee.

The clauses from 28 to 61 inclusive were agreed to.

Mr. Scott then moved the adjournment of the House, as a mark of respect to the memory of the late Duke of Cambridge.

The House accordingly adjourned to twelve o'clock next day.

HOUSE OF COMMONS. —WEDNESDAY

The Public Libraries and Museums Bill went through committee.

The Sunday Trading Bill was postponed to next Wednesday.

Mr. Alcock moved the committal of the Copyright Extranchisement Bill.

Sir G. Strickland opposed the measure, and moved as an amendment, that the bill be committed that day six months.

After a discussion, the House divided. For going into committee, 49; against it, 40: majority against the amendment, 9.

The House went into committee on the bill, and after a lengthened discussion several amendments were made in some of the clauses. Progress was then reported, and leave obtained by the House to sit again next Wednesday.

Mr. Barnes moved the second reading of the Smoke Prevention Bill, which had come down from the House of Lords.

Mr. Alderman Copeland, opposed the bill, and moved, as an amendment, that it be read a second time that day three months.

Mr. Hume, Mr. Muntz, and Sir G. Grey expressed several objections to the bill.

Mr. Barnes then withdrew it for the present session.

The Borough Gaols Bill passed through committee

LANDLORD AND TENANT (IRELAND) BILL.

On the motion for the second reading of the Landlord and Tenant (Ireland) Bill, brought down from the House of Lords, Mr. S. Crawford condemned the measure as arbitrary in its clauses, and as calculated to increase the power of the landlord, to take away the rights of the tenant, and to encourage the system of middlemen. He should, therefore, move, as an amendment, that the bill be read a second time that day three months.

Mr. E. B. Roche seconded the amendment

Mr. Watkins Pierce supported the amendment

Mr. Bright and Mr. Hume supported the amendment

Mr. J Stuart, Mr. French, Colonel Dunne, and Sir W. Somerville spoke in favor of the principle of the bill

Mr. Anstey opposed the adjournment of the debate for a week.

Mr. E. B Roche proceeded to address the House, and spoke until the hands of the clock pointed to six, when the House necessarily stood adjourned.

HOUSE OF LORDS.—THURSDAY.

ADDRESS TO THE DUCHESS OF CAMBRIDGE.—HER ROYAL HIGHNESS'S ANSWER.

The Marquis of Normanby and Lords—The Earl of Powis and myself have, in obedience to your Lordships' directions, waited upon her Royal Highness the Duchess of Cambridge, and presented to her Royal Highness the address of condolence on the demise of the late Royal Highness the Duke of Cambridge, to which your Lordships were pleased to agree. Her Royal Highness has requested us to present to your Lordships the following answer :—

"I am deeply sensible of the kindness of the Lords spiritual and temporal in proceeding to me in address on the subject of my late severe bereavement in the loss which I have recently experienced. I request that you will convey to the House of Peers the deep feeling which I entertain for this mark of sympathy on their part. The remembrance of my late dear husband will be ever treasured in my heart, and I shall never forget the just appreciation of his virtues which the House of Lords entertains."

The answer was ordered to be entered on the journals.

ANSWER OF HER MAJESTY TO THE ADDRESS OF CONDOLENCE.

The Marquis of Westminster reported that the Lords with white staves had waited on her Majesty with the address of condolence to which their lordships had returned on the death of his late Royal Highness the Duke of Cambridge. Her Majesty had been graciously pleased to receive the same, and had returned the following gracious answer:

"I thank you for the warmth and proof of your loyalty and affection which your address has furnished me expression of your participation in my feelings on the death of my Silowel uncle the Duke of Cambridge, and for the attachment which you have expressed to my person and to my family.

The answer was ordered to be entered on the journals.

The County Courts Extension Bill passed through Committee.—Adjourned.

HOUSE OF COMMONS.—THURSDAY.

The House had an early sitting at 12 o'clock, in which several clauses of the Mercantile Marine Bill were disposed and agreed to.

Mr. Bouverie Ronald was introduced, and took the oaths and his seat for the borough of Devonport.

The House then adjourned, and resumed at 5 o'clock.

DEATH OF THE DUKE OF CAMBRIDGE

Lord Marcus Hill appeared at the bar of the House, and stated that, in obedience to the order of the House, he had presented the address of condolence on this subject to her Majesty, to which her Majesty had been graciously pleased to return the following answer:

"I have received with satisfaction, and as another gratifying proof of your attachment to my person and family, the loyal and dutiful address of condolence on the loss I have sustained by the death of my beloved uncle, the late Duke of Cambridge

MONUMENT TO THE LATE SIR R. PEEL.

Lord Marcus Hill also stated that he had the honour of presenting the address on the subject of a monument to the late Sir Robert Peel, and her Majesty had been graciously pleased to return the following answer:—

"I have resolved your address, praying me to give directions for the erection of a monument in the Cathedral Church, Westminster, in the memory of the late Sir Robert Peel. It is an inscription expressive of the sense of the country at the great and irreparable loss which it had sustained by the death of that right hon. Baronet, and I shall give directions accordingly."

THE DUCHESS OF CAMBRIDGE.

Lord Seymour appeared at the bar of the House, and stated that he had caused the address of condolence to be forwarded to the Duchess of Cambridge, to which she had been pleased to return the following answer:—

"I am grateful to the hon. House of Commons for presenting to me an address of condolence on the death of my late husband, and I beg you to convey to that hon. House my heartfelt thanks for this honourable mark of respect, and to assure the hon. House that nothing can be more consolatory to me at this moment than the knowledge that the character of my late husband is duly appreciated.

SUNDAY LABOUR IN THE POST-OFFICE.

Mr. Clay presented a petition from the Chamber of Commerce of Hull, praying for a return to Sunday Post-office delivery. The petitioners were of opinion that if government would not undertake the delivery of letters on Sundays, they ought to empower the railway companies to do so.

REPEAL OF THE UNION.

Mr. F. O'Connor gave notice that on this day fortnight he should move that the Legislative Union between Great Britain and Ireland be repealed. (Laughter.)

PROVISION FOR THE FAMILY OF THE DUKE OF CAMBRIDGE.

Lord John Russell brought a message from her Majesty, which was to the effect that her Majesty, having taken, in consequence of the death of the Duke of her Royal uncle, the Duke of Cambridge, that some provision should be made for her Royal Highness the Princess Mary of Cambridge and the present Duke of Cambridge, recommended the subject to the consideration of the House, and relied on the attachment of the House to adopt such measures as might be suitable for the occasion

The Members remained uncovered while the message was being delivered.

Lord John Russell then rose and said—It is her Majesty's most gracious desire that the subject be taken into consideration by the House to-morrow.

The subject was then fixed as the first order of the day for the next day but one.

IRISH AND ENGLISH UNIVERSITIES.—ADJOURNED DEBATE

The adjourned debate on this subject was resumed by Mr. Roundel Palmer, who contended that there was no necessity whatever for the Commission of inquiry into the Universities which had been issued by the Government.

Sir G. Grey defended the appointment of the commission.

Mr. J. Stuart moved, as an amendment on Mr. Heywood's original motion, that the management of the Universities, that such an inquiry was a violation of the law and constitution of the kingdom, and of the rights and liberties of the subject

After a lengthened discussion, in which Mr. Gladstone strongly contested the propriety of the Government Commission of Inquiry, and Lord John Russell advocated its necessity,

Sir G Grey moved that the debate be adjourned to that day three months, with the view of getting rid of the original motion by Mr. Heywood for an investigation into the revenues and management of the Colleges and Universities of Oxford, Cambridge, and Dublin.

On a division, the adjournment was carried by a majority of 160 to 138

Lord J. Russell fixed the Bill for Altering the Oaths taken by Jews for Monday next, when he will state what course he proposes taking with respect to it. —Adjourned.

AMERICAN EXHIBITION OF THE WORKS OF ALL NATIONS, 1852.

—The proposal for transfer to America of selections from our own forthcoming great Exhibition of next year has just been submitted to the commissioners at the City office, Moorgate Street. The American gentlemen who have proposed it it professes to be actuated by motives equally honourable and almost equally disinterested with those of the distinguished originators of the London Exhibition. The improvement in communication with the world is their first object, and the [illegible] to be given to that American city which will make the most liberal arrangement for its reception. In other relations the undertaking is intended to be thoroughly commercial, and strong inducements are held out to all the European nations by proposing the vast and increasing market of the transatlantic continent for the display and competition of their productions. The occasion will, it is considered, be earnest y embraced by our own manufacturers for impressing their American customers with an increasing sense of the immense variety and excellence of the productions of the looms and the lathes, the moulds and the anvils, the chisels and the gravers, and all the other apparatus and implements of the industry of Britain.

THE ILLUSTRATED LONDON NEWS.

TOWN TALK AND TABLE TALK.

The session and the season are waning together. Lord John has perpetrated the usual massacre of the legislative innocents. Parliamentary orations are getting shorter and shorter, more practical and more to the point. The business-like comes in the dog-days to be the grand quality aimed at in St. Stephen's; and the consequence is that bills, which, in the early part of the session, would have drawn forth torrents of party eloquence, are shot into the Statute-book like so many knobs of Wallsend into a coal-cellar. Members begin to have visions of purple heather, and shining Highland lochs, and sure-footed stalkers bearing holocausts of slaughtered grouse, or of pleasant yachting work round the western coast, fine working breezes, and brilliant regattas, and complicated signals to the Club-house at Cowes for another batch of raised pies and iced champagne; or, perhaps they are cultivating stubbly moustaches, and looking forward to merry pic-nics in German woods, or stiff climbing among Swiss glaciers, or sunny lounges on the Mole at Naples. Any way and any how only the very drugs of the session remain to be swallowed. A very few brief weeks, and London—all its concerts, and operas, and operas over—will sink into that dismal state of solitude and emptiness which is compatible with the presence of a couple of millions of people or so within its walls.

As might be expected, numberless portraits of Sir Robert Peel are springing into existence. I believe I speak the sentiments of all who were intimately acquainted with the features of the departed statesman, when I say that it seems to have been almost beyond the power of art to produce anything like a characteristically faithful likeness of the great representative of Tamworth. His features might be reproduced with mathematical accuracy; to neither eyes, nose, or mouth might the spectator have any fault finally or untrue to attribute, and yet, after all, the portrait give no idea of what that strange and thoughtful face really was. The subtle expression, continually varying and shifting; the indefinable play of spirit round every facial muscle; the strong bewildering glamour-like spirituality, constantly shifting its shades and blending its altering phases—all this, which in reality gave its character, its indefinable but most remarkable character to the face, never could be, or at all events never has been, reproduced upon canvas. Nobody who has not seen Sir Robert will ever have the true and perfect idea of his visage. In fact it would be as easy truly to paint the appearance of shot silk at the moment when different-coloured rays of light were striking, and at the same time, on the warp, the subtle play of shifting colours, as it was to catch and fix for ever, by brush or pencil, the face of Sir Robert Peel. And these strange, undefined qualities of the man's countenance extended themselves to other parts of his person. His legs, for example, were very peculiarly formed; and his walk, a species of stately, pompous glide, of which "H. B." in even his most successful efforts, has only caught the meagre outside silhouette. Sir Robert's legs went to more straightly and unfalteringly outwardly on a bat, so to speak, to slide furtively and slily round each other, as if the one were continually trying to steal a march—to get forward unknown to its colleague. Besides this peculiarity of gait, the late Sir Robert had a habit of stumping his right foot as he walked, which, as not even

ROYAL AGRICULTURAL SOCIETY OF ENGLAND.

TWELFTH ANNUAL MEETING AND EXHIBITION.

(From our own Reporter.)

EXETER, Thursday, July 18.

THIS ancient city being selected for this year's exhibition of the Royal Agricultural Society, the inhabitants, in order to do honour to the occasion, have decorated the streets in the most superb manner, the main streets being ornamented with from two to half-a-dozen triumphal arches of tasteful and varied design with mottoes appropriate to the occasion; in addition to which, streamers, banners, and flags, many of which were richly executed, were flying from almost every house: all the public buildings were similarly ornamented. The display was not confined to the main streets, but pervaded the entire city, down to the narrowest alley, some of which latter that diverged from High-street were so highly bedecked with laurel branches and similar ornamental shrubs, that it required only a little stretch of imagination on the part of the passer-by to conceive that he was passing through a series of rustic arbours rather than the heart of an ancient city. We counted more than twenty triumphal arches, when we ceased the enumeration. Several of the triumphal arches were ornamented with crowns and stars, and other devices, which in the evening were illuminated with gas or variegated lamps. Several of the principal shops had also honoured the occasion by illuminating. A faint conception of the appearance of the city may be had by imagining the display made by every house being more or less covered with evergreens, and a countless number of flags of varied colour waving in every direction. The extent to which this enthusiasm has gone may be conceived when we state that Queen street, from the Post-office to High-street, has been converted into a temporary boulevard, by planting some scores of larches. The whole appearance of the city is such as that usually presented in honour of some triumphant destroyer of his species, and this is the first time we have had the pleasure of witnessing a like compliment to the more useful arts of peace.

The lamented death of the late Duke of Cambridge has cast a slight gloom over this occasion, as his Royal Highness was to have attended the Exhibition: and there was a faint anticipation, also, that their Royal Highnesses Prince Albert and the Prince of Wales would also have been present.

Last night, and, in fact, up to an early hour this morning, the streets were so

ARRIVAL OF CATTLE AT THE SHOW-YARD

thronged, that it appeared as though the whole population had turned out of doors; the numbers of fashionable and gaily-dressed ladies being not the least conspicuous. The occasion has been looked upon as a complete festival, and all who witnessed the general scene will long remember it. The highest praise is due to the inhabitants of Exeter for their spirited efforts in compliment to the Society, as well as the general courtesy exhibited to the strangers who have visited their ancient city.

Amongst a few of the more important persons who attended the meeting, we may enumerate the Marquis of Downshire, the President; the Duke of Richmond, President Elect of the Society; Earls Chichester, Falmouth, Leicester, Ilchester, Spencer; Viscounts Chetwynd, Hill, Courtenay. Lords de Tabley, Portman, Wharncliffe; Sir T. D. Acland, Bart., M.P.; Sir M. W. Ridley, Bart., M.P.; Sir J. Johnston, Bart., M.P.; Sir C. Lemon; the Hon. D. Pelham, M.P.; R. H. Clive, M.P.; H. W. Wilson; Colonel Challinor; Fisher Hobbs, Esq.; Professors Way and Simonds.

From the distance of Exeter, and the want of a continuous line of railway from the eastern and midland agricultural counties, neither the numbers of stock or visitors from those districts have been anything equal to that seen at several former Exhibitions This diminution was more particularly seen in the classes of short-horns and Leicesters: in quality, however, they have never been excelled. To compensate for this diminution, the entries of Devons, as might have been anticipated, are exceedingly numerous, and of excellent quality: the same remark applies to the pigs. In sheep, the entries are smaller than usual. The show of horses was superb, being both numerous and of great merit—particularly the draught-horses and mares with foals. The class of roadsters and generally useful horses were also uncommonly good.

We may here remark that the decisions of the judges of horses at the last Exhibition, held at Norwich, gave rise to considerable, but we believe ill-founded, complaints. It must be borne in remembrance, that action and many other points of consequence have to be considered by the judges of horses—amongst which may be stated that of any incipient appearance of turning out a roarer; all of which the judges have the opportunity of testing—not so the ordinary spectator. From a personal knowledge of the character and ability of the judges engaged in the horse class on this occasion, we can only say that their decisions ought to give satisfaction

The implements exhibited were not so numerous as on former occasions, but the deficiency of number was amply made up in superior excellence and workmanship; there was a total absence of the agricultural gimcrackery which formed so great a nuisance in this department at many former exhibitions. Another favourable symptom was that really good useful implements were reduced in price, which in many instances has caused increased sales. This extra demand will amply compensate the maker for his lower profit. Amongst those most worthy of notice we observed an excellent plough for general purposes, prize £7, Mr. William Ball, of Northampton, Rothwell: some excellent drills by Messrs Richard Hornsby and Sons, of Grantham, and Richard Garrait and Son, Saxmundham; these two parties divided the prizes in the class of drills. There were three excellent steam-engines, the prize of £50 being awarded to Messrs. R. Hornsby and Son, and £25 to Messrs. Clayton, Shuttleworth, and Co. An excellent corn dressing machine, by Messrs. R. Hornsby and Son, obtained the prize of £10. We notice this particularly, because the winnowing machines in general throughout England are very inferior compared with the implement under notice. A very useful implement combining the offices of paring plough, cultivator, grubber, and scarifier, obtained a prize of £10; manufactured by Messrs. Smith and Co. (Stamford). No very particular improvement was visible in the horse-hoes nor liquid manure distributors. Some excellent cottage grates were exhibited, combining the qualities of economy of fuel, and the application of heated air to the upper apartments of the dwelling; a prize of £5 was awarded to one exhibited by Mr. W. N. Nicholson. Some good haymaking-machines were shown: these implements are coming into much more general use.

With respect to the cattle exhibition, it may be remarked that the principal fault to be found was in the exhibition of bulls of the short-horn breed, boars, Leicester and long-woolled rams, in too fat a condition for service. With this solitary exceptional remark, the Exhibition may be pronounced pre-eminently excellent as regards quality of stock

At the earlier Exhibitions of this Society, the prizes for each description of stock were generally obtained by some particular locality famed for a distinctive breed; on the present occasion, however, the prizes have been very widely diffused. This remark applies in a remarkable degree to the short-horn class. The Herefords, not being so widely disseminated, had, consequently, a narrower range.

The Devons had the prizes awarded almost solely to stock bred in the county, Mr. James Quartly, of Molland, near South Molton, having taken away the greater portion of the prizes: some of the young animals in this class were remarkable for their symmetrical beauty. Some South Hams cows possessed much merit as milkers, and are well calculated for a mountainous district. The prizes for pigs were very widely diffused: the whole of the class of young pigs were of an uncommon degree of merit.

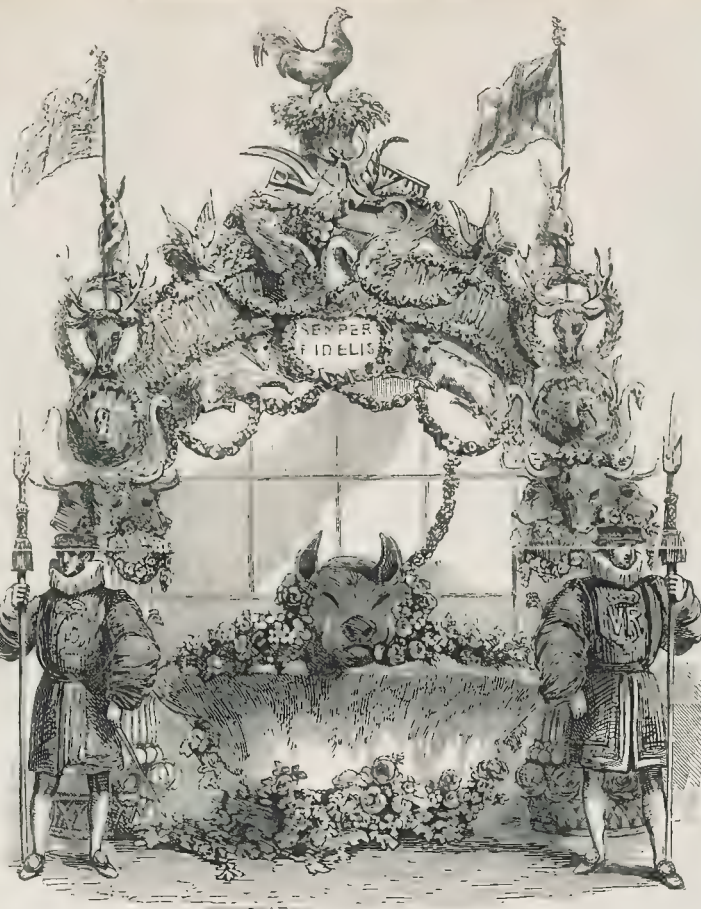
We have not space to dwell on a fractional part of what might be said on the merits of the different stock; but we cannot conclude without making a few remarks on some of the horses. The best animal at the show was a two-year-old cart stallion (Mr. F. T. Bryan, of Knessington, Leicester, owner), which obtained the first prize in his class: the sire of this horse won the prize at Northampton. The fillies were a most splendid lot; a two-year-old filly belonging to Mr. R G. Barthropp, near Woodbridge, Suffolk, being an admirable animal. The second prize of this class was awarded to Mr. Fisher Hobbs. The show of mares in foal was large and excellent, the first prize being given to Mr. J. Ward, of East Mersey, near Colchester. In the class of roadsters the prize was given to an aged stallion belonging to Mr. C. Poulton, Reading. This horse had been ridden seven years by the Queen's huntsman. In the South Downs the usual winners have been thrown out, Mr. Sainsbury, of Devizes, being the most successful. The long-wool prizes were nearly equally divided between Mr. W. Gaim and Mr. George Hewer, Northleach.

On Wednesday evening Professor Simonds delivered a lecture at the Athenæum, on Diseases of the Liver in Domestic Animals; the Marquis of Downshire, the President of the Society, in the chair. The learned Professor, after detailing some of the principal functions of the liver, which were further illustrated by some splendid coloured drawings, entered into an elaborate detail of the circumstances attending the rot in sheep. This disease he attributed to the fact that the functions of the liver became disorganized in consequence of being called into an abnormal action in depurifying the blood from feeding on innutritious food, and that the flukes were the result, not the cause, of the disease. In illustration of this statement, the Professor adverted to the circumstance that he purchased some diseased animals, intending to slaughter them for the purpose of dissection, but having more than he required, two were kept, and fed upon dry wholesome food, the result of which was that, combined with the fact of being sheltered, the animals perfectly recovered. He considered the rot a curable disease, and recommended the use of tonics, particularly sulphate of iron. Salt was also found beneficial, and ought not to be neglected.

At the time of writing, the railway trains and other sources of conveyance are pouring in their thousands of visitors, and the city is becoming literally crammed

The Devon Horticultural Society got up an extra exhibition, distributing upwards of £200 in prizes on this occasion.

This Exhibition may be safely pronounced the finest provincial one that has ever been held. The grand Pavilion Dinner will take place this afternoon; and the exhibition of Sir T. D. Acland's



ARCH IN THE DINNER PAVILION, DESIGNED BY M. SOYER.

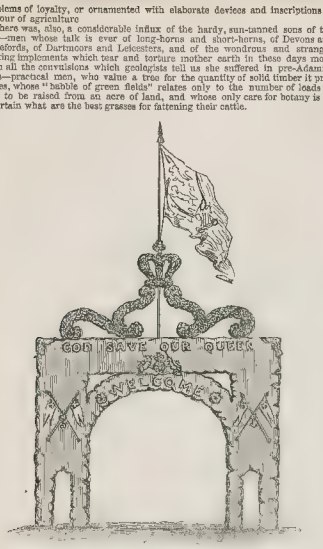
and Mr. Turner's water meadows will take place to-morrow—a notice of which must be reserved for next week.

The excitement which wrought so remarkable a change in the ancient city seemed to wax stronger as the week progressed; Union Jacks and St. George's Crosses appeared to have the property of self-multiplication, and triumphal arches, already almost weighed down with laurels and oak-branches, were now surmounted with ponderous crowns and large transparencies, hung with other

ARCH ACROSS QUEEN-STREET EXETER.

emblems of loyalty, or ornamented with elaborate devices and inscriptions in honour of agriculture

There was, also, a considerable influx of the hardy, sun-tanned sons of the soil—men whose talk is ever of long-horns and short-horns, of Devons and Herefords, of Dishleys and Leicesters, and of the wondrous and strange-looking implements which tear and torture mother earth in these days more than all the convulsions which geologists tell us she suffered in pre-Adamite Ages—practical men, who value a tree for the quantity of solid timber it produces, whose "babble of green fields" relates only to the number of loads of hay to be raised from an acre of land, and whose only care for botany is to ascertain what are the best grasses for fattening their cattle.



The dinner, by M. Soyer, promised to be a *recherché* affair; the baron of beef, weighing more than 3 cwt., was to be roasted in the Castle-yard, on Wednesday evening, at a gas apparatus, invented by M. Soyer. He also devised a sw pudding, to be called "the Exeter pudding," of which all the matrons of the ancient city were striving to obtain the recipe. The dinner was to take place on Thursday afternoon, in the immense pavilion erected in Queen-street, at the bottom of Northernhay, the Marquis of Devonshire presiding. The following is the

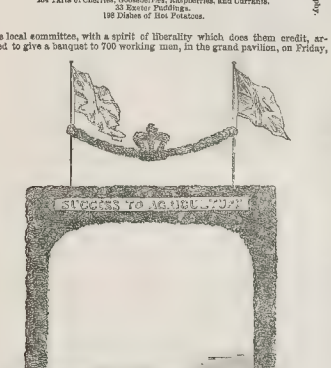
GENERAL BILL OF FARE.

FOR ONE THOUSAND PERSONS.

Roast of Beef à la Magna Charta.
35 Dishes of Ribs of Beef.
38 Dishes of Roast Loins.
99 Dishes of Galantine of Veal.
99 Dishes of Ham.
66 Dishes of Pressed Beef
2 Rounds of Beef à la Garrick.
264 Dishes of Chicken
33 French raised Pies à la Soyer.
198 Spring Mayonnaise Salad.
264 Tarts of Cherries, Gooseberries, Raspberries, and Currants.
33 Exeter Puddings.
198 Dishes of Hot Potatoes.

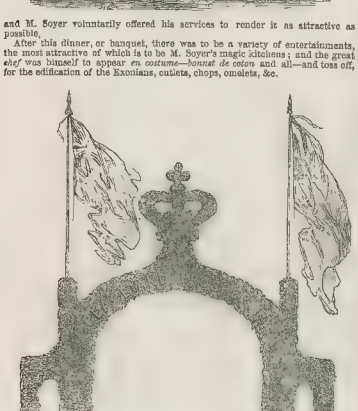
Grand Agricultural Trophy.

The local committee, with a spirit of liberality which does them credit, arranged to give a banquet to 700 working men, in the grand pavilion, on Friday,

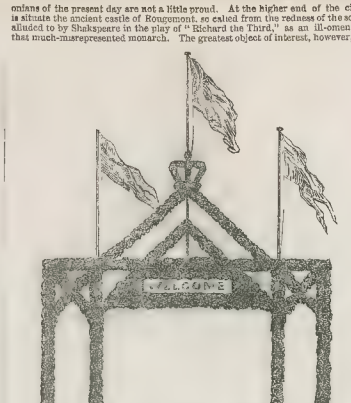


and M. Soyer voluntarily offered his services to render it as attractive as possible.

After this dinner, or banquet, there was to be a variety of entertainments, the most attractive of which is to be M. Soyer's magic kitchens; and the great *chef* was himself to appear *en costume—bonnet de coton* and all—and toss off, for the edification of the Exonians, cutlets, chops, omelets, &c.



In the head illustration is a vignette view of the ancient cathedral town. In times of peril it became a "City of Refuge," and was subjected to many sieges, which it endured with such constancy, always on the side of the Sovereign, that it gained the motto of "*Semper Fidelis*"—a mark of character of which the Exonians of the present day are not a little proud. At the higher end of the city is situate the ancient castle of Rougemont, so called from the redness of the soil, alluded to by Shakspeare in the play of "Richard the Third," as an ill-omen to that much-misrepresented monarch. The greatest object of interest, however, is



the venerable cathedral. It consists of a nave with two side aisles, two short transepts, formed out of two massive and highly-decorated Norman towers, the only remains of an earlier structure, in a remarkable manner; a choir, with side aisles; and two oratories dedicated to the Archangels and Apostles. The "Ladye" Chapel, in which the early matin service is performed, is at the east end, and is separated by a screen from the choir.

In the High-street stands the Guildhall, the very ancient portico of which was formerly portion of an ecclesiastical building. The hall is panelled with carved oak, and ornamented with pictures, some the gifts of Royalty. Modern improvements have done more for Exeter than for almost any other ancient city in England.

The greatest novelty was, however, the characteristic arch erected in the Dinner Pavilion, and which we have engraved. It is 17 feet high, and 12 feet wide, and, flanked by two stalwart beefeaters, had a noble appearance. Beneath the arch was placed the baron of beef, surmounted by a boar's head, &c. The arch itself was constructed with a large white swan, two turkeys, four geese, four large rabbits, two lambs, two pigs' heads, six bullocks' heads, four ducks, four hams, one large hare-door cock, six white pigeons, two stags' heads, a quantity of carrots, cucumbers, turnips, cabbages, onions and leeks, two sheaves of corn, various fruits, flowers, laurels, coloured ribbons, and two flags; a plough, rake, hoe, and spade; all most architecturally disposed by Mr. A. Adams

Next week we shall engrave some of the novelties of the Prize Implements, and a few of the Prize Cattle.

The Arches here represented have been designed and erected by Mr. John Mason

CALENDAR FOR THE WEEK.

SUNDAY, July 21.—Eighth Sunday after Trinity.
MONDAY, 22.—Battle of Salamanca, 1812.
TUESDAY, 23.—*English Mercurie*, first newspaper printed, 1588.
WEDNESDAY, 24.—Sun rises 4h. 12m., sets 7h. 58m.
THURSDAY, 25.—St. James.
FRIDAY, 26.—St. Anne. Penny pieces first issued, 1797.
SATURDAY, 27.—Mary Queen of Scots married to Darnley, 1565.

TIMES OF HIGH WATER AT LONDON BRIDGE.

FOR THE WEEK ENDING JULY 27, 1850.

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
Morn. Time / Height	0 20 / 15	0 45 / 15	1 10 / 15	1 35 / 15	2 0 / 15	2 25 / 15	2 50 / 15
Even. Time / Height	3 10 / 15	3 35 / 15	4 0 / 15	4 25 / 15	4 50 / 15	5 15 / 15	5 40 / 15

FRENCH PLAYS.—FINAL ARRANGEMENTS.—LAST NIGHT but TWO of Mdlle RACHEL.—Mr. MITCHELL respectfully announces that the popular new Play of ADRIENNE LECOUVREUR will be repeated on MONDAY EVENING, JULY 22nd.—The last appearance of Mdlle. Rachel, and likewise the last night of the season, will be on FRIDAY EVENING NEXT, JULY 26, when will be presented Racine's celebrated Tragedy of LES HORACES; Camille, Mdlle. Rachel.—Boxes and Stalls may be secured at Mr. MITCHELL'S Royal Library, 33, Old Bond-street.

ASTLEY'S ROYAL AMPHITHEATRE.—Proprietor and Manager Mr. W BATTY. On MONDAY, JULY 22, 1850, the Entertainments will commence at Seven o'Clock with Lord Byron's magnificent Spectacle of MAZEPPA, followed by an Incomparable Display of Batty's SCENES in the ARENA; to Conclude with the Pedi Ballet of LOVE in the HIGHLANDS.—Box-office open from Eleven till Four.—Stage Manager. Mr. W. West.

MR. JOHN PARRY'S NEW ENTERTAINMENT, Music-Hall, Store-street.—Mr. JOHN PARRY will have the honour of repeating his new Entertainment, entitled "NOTES, VOCAL and INSTRUMENTAL," at the above rooms, on MONDAY EVENING NEXT, July 22nd, commencing at Half-past Eight.—Tickets to be had of the principal music-sellers.—Stalls and private boxes to be had only of Messrs. OLLIVIER, 41 and 42, New Bond-street, and at the Hall

SOCIETY OF PAINTERS IN WATER-COLOURS.—The FORTY-SIXTH ANNUAL EXHIBITION will CLOSE, at their Gallery, 5, PALL-MALL EAST, on SATURDAY, JULY 27th.—Admittance, One Shilling. Catalogue, 6d.
GEORGE FRIPP, Secretary

WILL CLOSE SATURDAY NEXT, 27TH INST.

THE SIXTEENTH ANNUAL EXHIBITION of the NEW SOCIETY of PAINTERS in WATER-COLOURS is NOW OPEN, at their GALLERY, 53, PALL-MALL, opposite St. James's Palace, daily from Nine till Dusk. Admission, 1s.
JAMES FAHEY, Secretary

HER MOST GRACIOUS MAJESTY'S VISIT TO IRELAND.—Illustrated by a Grand Moving Diorama, with scenes of the most charming scenery in that country, including the lovely lakes of Killarney, by Mr. F. Phillips, now open at the Chinese Gallery, Hyde Park Corner. Daily at 3, Evening at 8. Admission 1s., Reserved Seats, 2s. An interesting historical record of the event may be had at the Gallery.

INDIA OVERLAND MAIL.—DIORAMA GALLERY of ILLUSTRATION, 14, REGENT-STREET.—Additional Picture, MADRAS.—A Gigantic MOVING DIORAMA, ILLUSTRATING the ROUTE of the OVERLAND MAIL to INDIA from Southampton to Madras and Calcutta, is now OPEN DAILY.—Morning, Twelve; Afternoon, Three; Evening, Eight.—Admission, 1s; Stalls, 2s 6d; Reserved Seats, 3s. Doors open half-an-hour before each representation.

THE NILE.—IMPORTANT ADDITIONS to this Panorama.—The Nubian Desert from the second Cataract to Dongola. War Dance by Fire-Light. March of a Caravan by Moonlight. Morning Prayer. The Mummy of a High-Priest is added to the Curiosities. Both banks of the River are shown in the Painting.—EGYPTIAN HALL, Piccadilly, Daily, at Three and Eight.—Admission, 1s; Pit, 2s; Stalls, 3s. Children and Schools, Half-price.

TRAFALGAR MODEL.—This beautiful Model is unequalled in the world, not only as regards a faithful representation of that great Battle, but also in the effect portrayed in a number of small but well-rigged ships, apparently floating on a large surface of beautifully-imitated sea.—Admission, 1s; Children, half-price.—Open from 10 in the Morning till 10 in the Evening, brilliantly Illuminated, at 168, New Bond-street, next to the Clarendon Hotel.

COLONEL FREMONT'S OVERLAND ROUTE to OREGON, TEXAS, and CALIFORNIA across the Rocky Mountains, as surveyed for the United States Government, illustrated by a Grand Moving Diorama from Washington City; now exhibiting at the EGYPTIAN HALL, Piccadilly, every Morning as a Quarter to Three; Evening, a Quarter to Eight. Admission, 1s; stalls 2s.

ROYAL ASYLUM OF ST. ANN'S SOCIETY, BRIXTON-HILL, SURREY, and ALDERSGATE, LONDON.
By Voluntary Contributions.
Affording a Home, Clothing, Maintenance, and Education to the Children of those once in Prosperity, whether Orphans or not, and from all Nations. Incorporated 1843.

PATRONS.
HER MOST GRACIOUS MAJESTY.
HIS ROYAL HIGHNESS THE PRINCE ALBERT
The Prince of Wales. | The Duchess of Gloucester.
The King of Hanover. | The Duchess of Kent.
The King of the Belgians. | The Duchess of Cambridge.
President, the Archbishop of Canterbury.

TWO SERMONS, in AID of this particular Institution, will be PREACHED on SUNDAY, JULY 21st, 1850, at St. MATTHEW'S CHURCH, BRIXTON: that in the Morning by the Right Rev the LORD BISHOP of NORWICH, and that in the Evening by the LORD BISHOP of SALISBURY.

THE PECULIAR CLAIMS OF THIS INSTITUTION ARE
ITS OBJECTS—Orphans or not, Children Born in Affluence, whose Parents (Clergymen, Solicitors, Surgeons, Naval or Military Officers, Merchants, or Traders) are now in Adversity.
ITS UNIVERSALITY—It has no local bounds, the Children of any country are eligible.
ITS DEPENDENCE—By Voluntary Subscriptions and Donations, affording a Home, Clothing, Maintenance, and Education to nearly Three Hundred such Children.

Annual Subscriptions ..	.. One Guinea	Life Presentation ..	.. 20 Guineas
Life ditto ..	.. .. 10 Guineas	Perpetual Presentation	.. 100 Guineas

Executors of Benefactors by Will become Life Governors, according to amount of bequest
Subscriptions and Donations gratefully received by the Committee, or
E. F. LEEKS, Secretary.
3, Charlotte-row, Mansion House.

THE HIPPOPOTAMUS, presented by H.H. the Viceroy of Egypt to the Zoological Society of London, is exhibited daily from One to Six o'clock, at their GARDENS in the REGENT'S PARK. The Band of the 1st Life Guards will perform, by permission of Colonel Hall, every Saturday, at four o'clock. Admission, ONE SHILLING; on Mondays, SIXPENCE
D. W. MITCHELL, B.A.

ROYAL POLYTECHNIC INSTITUTION.—During this Week the ALPINE SINGERS from Styria will perform daily at Four, and in the Evenings at Half-past Eight. LECTURE on CHEMISTRY, by J. H. Pepper, Esq. LECTURE by Dr. Bachhoffner on VOLTAIC ELECTRICITY. NEW SERIES of DISSOLVING VIEWS daily at Half-past Four, and in the Evenings at a Quarter to Ten. Also a Series, exhibiting SCENES in the ARCTIC REGIONS and CEYLON, daily at One o'Clock. DIVER and DIVING-BELL, &c.—Admission, 1s; Schools, Half-price.

TO CORRESPONDENTS.

A CORRESPONDENT.—The well-known epigram,

"I do not like thee, Doctor Fell,"

is merely a version of the 33rd epigram of the first book of those by the witty Roger de Bussy, Comte de Rabutin—

"Je ne vous aime pas, Hylas,
Je n'en saurois dire la cause,
Je sais seulement que chose,
C'est que je ne vous aime pas."—*Notes and Queries.*

M M.—See Levasseur's "Art of Rowing," fourth edition, lately published
J C, Barnsbury Park, is thanked for his communication; though we had not room to print it
Z E D.—"Gretna-green marriages" have not yet been repealed by statute
H J, Edinburgh.—The line

"When Greeks joined Greeks, then was the tug of war,"

is from Nat Lee's "Alexander the Great"
Y G.—Apply to Messrs Reeve and Co, publishers, King William-street, Strand
H A G, Mayfair, will, perhaps, favour us by sending one of the letters
CURIOSITY, Edinburgh.—We cannot inform you
G, Bishop's Stortford.—The "model of the oven" has not reached us
J M P.—The distance is reckoned from the spot at which the cab is engaged
MUSICUS had better apply to the editor of the "Repertory of Patent Inventions"
H H B, Belfast.—When the engraving of the medal appears
H J N, Tottenham.—See the communication on the comet, in the present Number
R P S.—"Very superior" is the preferable form
L G.—The London and North-Western Railway, from the Camden-town station to Euston-square (more than a mile), is by a descent, the gradients varying from 1 in 63 to 1 in 96
V X, Winchester.—The Royal Academy Exhibition opens in May, and closes in July
L M F, Holyhead.—The extent of Hyde park is 395 acres
J A B.—See Mr Christopher's recently published work on Port Natal
O B, Temple.—The report did not reach us in time
J F, Bridport.—We regret that we cannot entertain the proposition
ELISEE is thanked, though we have not space for her communication
A Z.—The contents of the Medal Room at the British Museum can be seen only by particular permission of the keeper
A SUBSCRIBER, Newcastle-on-Tyne.—See Crivelli's "Art of Singing."
L L A may learn the time of the services at the respective places of worship: we cannot undertake the inquiry
J B K may obtain the last papers by order of any bookseller
LISETTE may obtain the information in question from any music-seller
D D, Mecklenburgh-terrace.—We shall be glad to see the Sketch
FANNY N, Hammersmith.—"God tempers the wind to the shorn lamb" is from a French proverb
S T B, Bury.—We cannot make the requisite inquiry
ORIGINATOR, Newbury, will find an excellent practical paper on "Organs and Organ-building" in the *Penny Cyclopædia*
C J W, Newington.—We do not think Irish Peel-log illustrators of last year took anything but supplement by their discovery. The entire matter was strikingly dealt with in the ILLUSTRATED LONDON NEWS, No 384
J W H, Hull.—See the List of Works published by Fisher and Co, London
GEORGE WILLIAM MARY C, and M. G, Dublin.—The title of Duke of Cambridge was conferred on Prince Adolphus-Frederick (the late Duke) by patent, dated 27th Nov., 1801, with the usual limitation to the heirs male of the body of the grantee, and is consequently inherited by Prince George, who became, the moment his father died, second Duke of Cambridge
ASHBY DE BANKER.—The charge is made by the notary, and not by the banker. For every prosecution within the city, 1s. 6d. is the charge, and the expense increases as the boundary extends
L L D.—One guinea.

AN OLD SUBSCRIBER, Limerick, is too late	A M, Hackney-terrace.—Thanks
P R N Natal	T G, Highworth, Wilts, is thanked

BOOKS, &c. RECEIVED DURING THE WEEK.

Ten Years in India. 3 Vols.——The Charterer's Hand-book.——The Garland —Wayte's Manual.——The Water of Life.——The Windings of the River.
Music. "The Dream is over."——"Fare thee well."——"Sweet Summertime."

THE SIXTEENTH VOLUME OF
THE ILLUSTRATED LONDON NEWS
is NOW READY, elegantly bound in cloth, gilt edges, price 18s.; or, stitched in an ornamental wrapper, price 13s.
The whole of the Volumes, from the commencement, may be had, stitched in an elegant wrapper, price 13s. each; except the First Volume, which is 16s.
A new and beautiful design has been prepared for the Cover for Vol. XVI., which may be had, by order, of any Bookseller or News Agent, price 2s. 6d. each.
Portfolios for keeping the Numbers clean during the six months, price 4s.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, JULY 20, 1850.

THE English people know, by sad experience, the distressing consequences that ensue to the great bulk of the population during a year of scarcity. Trade is impeded—the working classes become pauperised—poor-rates press with fearful severity upon the owners of property—crime is increased throughout the length and breadth of the land, in the agricultural as well as in the manufacturing districts—prison rates increase as alarmingly as poor-rates – starvation and crime go hand in hand—and the country trembles upon the brink of political and social convulsion. The recent measures of the lamented Sir Robert Peel—measures that had been in progress for years, and that only received their crowning and complete consummation by the abolition of the Corn Laws—will, in future, mitigate, as far as human agencies can, the unhappy consequences of a scarcity in the supply of the food of the people. The markets of the world are open to us; the deficiences of the East will be supplied by the West; the New World will come to the relief of the Old; and the vast corn-producing plains of Russia and Poland will be laid under tribute to feed the swarming multitudes of Great Britain.

But a deficiency of food, though the most serious, is not the only scarcity with which this great country may be afflicted. We have but to imagine that the countless mills of Lancashire and Yorkshire were obliged to discharge their hands during a whole winter, or even for a shorter period, in consequence of a failure of the cotton crop, to picture a state of things which would cause the most imminent peril to our commercial security and our national well-being. Two or three hundred thousand men thrown out of work in the manufacturing districts, would form an army of misery, whose support would fall upon the poor-rate and the prison-rate, to the disturbance of all trade, commerce, and industry within their sphere. The stoppage of the usual weekly expenditure of so large a body of wealth-producing men would affect all classes, and press with especial severity upon the small traders, who form the great majority of the rate-paying public. All the evils of a food-scarcity would thus extend over the country. Credit, that most sensitive plant of our political and social system, would receive a shock which would level many a proud commercial fortune with the dust. Political and social strife, calling loudly for unsafe political changes —a strife which always gathers its greatest ailment among needy men, willing to work, but unable to find any to employ them—would flourish in its rankest luxuriance. These are not probable, at least possible dangers. Our statesmen have as yet taken no means whatever to guard against or to mitigate them. Year after year, the cotton manufacture of England increases in importance; but year after year we neglect to take any means to increase and equalise the production of a raw material on which our prosperity so greatly depends. We can, fortunately, buy corn in all the markets of the world. We are not compelled to rely upon any one spot more than upon another, for a supply. But cotton, which next to corn is the most essential article of food for our natural well-being, is only produced in any thing like a sufficient quantity to supply our wants in one part of the world. The American Union and Brazil are the great cotton-farms on which we depend; and if a bad season seriously diminishes the total yield, there is no other place to which we can resort to make up the deficiency, and keep our mills going. Is it wise in us to rely entirely upon America for our cotton? The question has often been asked before, and as often answered in the negative by those who understood the subject either theoretically or practically. But, as the

danger seemed remote, the question has been suffered to remain in abeyance, for the consideration of the speculative politician and economist, rather than for the decision of men of business and the support of the Government. It would seem, however—if all the statements be true that find their way into the public journals with reference to the scarcity of the present supply of cotton, and the gloomy prospects of the approaching season—that the question must speedily force itself into prominence, and demand a remedy at the hands of the Legislature.

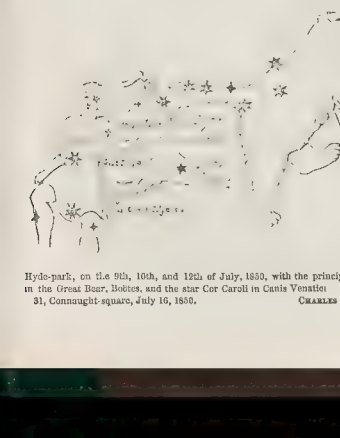
The steam-ships *Cambria*, which arrived at Liverpool on Tuesday morning, and the *Pacific*, which arrived on Wednesday last, bring advices which confirm previous accounts of the backward state of the crop, and hazard the prediction that it will be more than usually precarious upon the question as to which of these is right, and which is wrong. The subject is too complicated, and would occupy far more space than we could afford for its discussion. But whether there be or be not an actual scarcity, and whether we may dread a prospective scarcity still greater in amount, it is surely time that, as a nation, we should seriously consider the advantage, the policy, and the necessity of being no longer solely dependent on Brazil and the United States for an article of such prime importance. India, Africa, and the West India Islands have been spoken of as valuable sources of supply. Cotton will grow in them all; and from Egypt and Bombay, it is estimated that we may expect to receive, during the approaching six months, about 100,000 bales. But from the West Indies—so well calculated to supply us—we can expect nothing. Those fruitful islands are ruined for want of labour. In the June Circular of Messrs. T. and H. Littledale, of Liverpool, the greatest produce brokers in England, the following remarks—to which we wish to direct the attention of our readers—occur upon this subject :—

Much has been said (observe these gentlemen) upon the growth of cotton in the East Indies, but the climate and character of the natives appear formidable obstacles. Many other parts of our vast dependencies would no doubt grow cotton in abundance—Australia, New Zealand, the Cape and Port Natal —but probably none are so well adapted for the purpose, from their locality, climate, and population, as the West Indies, which are known to be capable of producing cotton quite equal and even superior to American. On this point we give an extract from the letter of an intelligent and highly-respectable estate manager in Demerara, received by a large proprietor in Liverpool by the last mail. In answer to some queries on the subject he writes: "I note what you say regarding the cultivation of cotton in this colony. There is no country under the sun more favourable for growing all sorts of it, from Sea Island to Upland Cotton; and besides the immense tract of coast from the Courentyne River to the Essequibo, there is a tract of land to the northward of nearly one hundred miles square (having large rivers and creeks) of the finest description in the world for producing cotton, and will produce two crops per annum for an unlimited time, and a great deal of this land is perfectly well adapted for producing two crops per annum of cocoa and coffee; I say this advisedly, having served my time to cotton, coffee, and cocoa planting, as well as to cane planting, and having many years ago visited the above-named tract of land. If the British Government would only give a fair play, *i. e.* unlimited emigration from all parts, especially from India, China, and Africa, for some years, this colony would produce as much cotton as would clothe every individual on the face of the globe with cotton garments, and also produce an abundance of sugar, rice, coffee, cocoa, indigo, &c.; all we require is plenty of labour and fair play."

"Surely," as Mr. Littledale remarks, "this is a subject worthy the attention of the Government; and it is in the highest degree impolitic to have so large a mass of our population dependent on one source of supply, and that from a country our most formidable rival and most precarious friend, which, should a change of policy be adopted, or any hostile movement occur between us, could, by the imposition of a high protecting duty or a prohibition of export, inflict ruin on our manufacturing classes." What is it, therefore, that prevents the immigration of free labour into the West Indies to enable those colonies to produce cotton for us? We must say, without the slightest desire to pen a syllable that would give offence to the estimable men who oppose slavery in any and every form as vehemently as they have opposed the Slave-trade, that the great and only obstacle is their ungenerous fear that British planters, if allowed to import free labourers from Africa, would, in time, convert these free labourers into slaves. We believe the fear to be utterly groundless; and we believe that, supported as it is by the Legislature, it not only causes the depreciation and ruin of all West Indian property, but that it tends more strongly that any other cause to increase that very slavery which good men so earnestly and piously desire to diminish, and to make this great manufacturing country dependent upon slave-holding America and slave-trading Brazil for the cotton which it requires. Dreading to encourage slaves in our colonies, we actually encourage and extend it in other countries. Here is a fear which is worse than a reality. It is, indeed, time that this great question should be earnestly considered by men of all parties. It is bad enough that our colonies should be ruined, but it is still worse, that, in addition to their ruin, we should imperil our commerce and manufactures, and run such serious risks as a general stoppage of work in the manufacturing districts would inevitably bring upon the nation. Upon every ground this question is of the highest importance; and the fears of a scarcity in the cotton crop, which have been rapidly gaining ground for the last few months, will not have been excited in vain if they lead to the examination of the claims of the West Indies to be allowed to import labour. Not only questions of slavery abroad, but questions of peace and prosperity at home, depend on its solution. It is to be hoped that common sense in this great matter will soon be allowed to govern us.

THE NEW COMET.

THE accompanying plan shows the situation and path of the Comet discovered by Dr. Peterson, of Altona, as seen by me, Captain Charles Shea, H. C. S., with a three foot telescope of Cary's, *not inverted*, at No. 31, Connaught-square



Hyde-park, on the 9th, 10th, and 12th of July, 1850, with the principal stars in the Great Bear, Bootes, and the star Cor Caroli in Canis Venatici

31, Connaught-square, July 16, 1850. CHARLES SHEA.

POSTSCRIPT.

HOUSE OF LORDS.—FRIDAY.

The County Courts Bill passed through committee.

FACTORY BILL.

On the motion for the third reading of this bill,

The Earl of HARROWBY moved, as an amendment, that the operation of the bill be extended to children.

Earl GRANVILLE opposed the amendment, which, on a division, was negatived by a majority of 30 to 14.

The bill was then read a third time and passed.—Adjourned.

HOUSE OF COMMONS.—FRIDAY.

The House had an early sitting, at which it passed some clauses of the Mercantile Marine Bill.

THE NEW SOLICITOR-GENERAL.

Mr. COCKBURN, the new Solicitor-General, took the oaths and his seat for Southampton. The hon. and learned member was introduced by Mr. Hayter and Lord Marcus Hill. The hon. gentleman, after taking the oath, took his seat on the Ministerial bench, amid the congratulations of several members.

In the evening sitting

RICHMOND PARK.

In answer to a question from Lord Duncan, Lord SEYMOUR said that the last communication which he had received from the late Duke of Cambridge was to desire that the orders and regulations of the Park might be modified, so as not to interfere with the public convenience. (Cheers.)

POST-OFFICE ENQUIRY.

Mr. FOSTER enquired whether the inquiry respecting the Post-office, had commenced, by whom it was conducted, and how long it would last, and also whether Government would take any steps before the report was presented

Lord J. RUSSELL said that it had already commenced, and that it was conducted by Lord Charricastle, Mr. Labouchere, and Mr. Grey. He did not apprehend that it would take much time, and he did not think it advisable to take any steps until the report was presented

THE QUEEN'S MESSAGE.—PROVISION FOR THE DUKE OF CAMBRIDGE.

The House having gone into committee, Lord J. RUSSELL proposed, as the future allowance to be made by Government out of the Consolidated Fund for the maintenance of the present Duke of Cambridge (late Prince George), an annuity of £18,000 a year. He also proposed that the Princess Mary of Cambridge should have £3000 a year, the present Duchess of Cambridge had £6000 a year, and the Duchess of Mecklenburgh-Strelitz had £3000 a year, making altogether £24,000, which would be £3000 less than the late Duke of Cambridge had

Mr. HUME proposed as an amendment that the annuity of the Duke be £8000 a year instead of £18,000.

On a division, the amendment was negatived by a majority of 205 to 53.

Mr. HUME then proposed that the annuity be £10,000 instead of £12,000 a year

The amendment was negatived on a division by a majority of 177 to 55, and the resolution was agreed to.

Resolutions were also agreed to granting £3000 a year to the Princess Mary (of Cambridge), and confirming the grant of £3000 a year to the Princess Augusta (now Duchess of Mecklenburg-Strelitz), and the jointure of £6000 to the Duchess of Cambridge; making the vote altogether £24,000, or £3000 less than the sum granted to the late Duke of Cambridge.

The House then went into Committee of Supply, and the discussion of the vote occupied the rest of the evening.—Adjourned at a quarter before two o'clock.

ANOTHER EXPLOSION AT THE HOUNSLOW POWDER-MILLS.—On Wednesday evening, at about a quarter to six o'clock, another explosion took place at Messrs Curtis and Harvey's powder-mills, Hounslow Heath. The consternation excited was not allayed until it was ascertained that no person was killed or injured. During the latter part of the afternoon the lightning was extremely vivid, and the men, women, and children, of whom there are nearly 200 employed in this dangerous occupation, left their work much earlier than usual in consequence. In a short time afterwards the lightning struck one of the buildings, the roof of which was blown off, and everything in the building destroyed

THE CHOLERA.—It is with much regret we have to announce that three cases of decided Asiatic cholera have been admitted into St. Bartholomew's Hospital. *Medical Times.*

On Wednesday, Sir J. Romilly, the new Attorney-General, was re-elected for Devonport.

LATEST FOREIGN NEWS.

FRANCE.

Our accounts of yesterday (Friday) state that on the grant of 300,000f. for the payment of the Duchess of Orleans' jointure being proposed in the Assembly, the Mountain raised objections, but it was carried by 368 to 177.

On Thursday M. de Lamartinière appeared at the bar of the Assembly, accompanied by his counsel. M. Chaix d'Estange, to answer to the charge alleged against him of having published an article in the *Pouvoir* of Monday, of which journal he was the director, reflecting upon the dignity of that legislative house. M. Chaix d'Estange defended his client at great length and with much power, contending that he had exercised no more than his legitimate right in printing the critical remarks which had given such offence. The right of the press to discuss the acts of public bodies and of public functionaries, had been recognised at all times; and he could not conceive why the Assembly, who had suffered much severer criticism to pass in silence, should manifest such unwillingness to should now select the *Pouvoir* for its resentment, which had shown itself the friend of order, even at a time when the most subversive doctrines were promulgated. M. de Lamartinière was found Guilty of "insulting conduct and offence against the Assembly," and was adjudged to pay the maximum fine of 5000f.

The Red party are assiduously engaged in concocting their plans for a Congress to be held out of Paris as soon as the Assembly shall be prorogued, where they are to determine upon their future course of proceeding

The differences between General Changarnier and the Minister of War have reached such a pitch, that the latter has resigned his office. It is now said, is irrevocably fixed, the former having triumphed over his opponent at the Elysee.

The Government has adopted in Council two important decisions—one is to refuse the demand of extradition in the case of M Cernuschi, made by the Roman Government; the other, to give orders to the prefects of the departments to adopt strong measures to prevent the threatened agitation of the Mountain during the prorogation—all public dinners and meetings are to be strictly prohibited.

ITALY

Accounts from Naples of the 11th inst. announce the marriage on the previous day of the Count de Montemolin, eldest son of Don Carlos, with Princess Caroline of Naples, sister of King Ferdinand. The Princess, it is said, has a dower of 12,000 reals a year (about 90,000f.). As to the Count, he receives 30,000f from Vienna, and as much from St. Petersburg. At the same hour as which the nuptials were celebrated, the Duke de Rivas, the Spanish Ambassador, quitted Naples in a Spanish steam frigate, which had brought him, a week back, in order to apply for his passports, in case he should not induce the King to put off the marriage

In Rome his Holiness has named Mr. Edmond Molyneux Sexl, an Englishman, his supernumerary secret Chamberlain

SCHLESWIG-HOLSTEIN.

By letters from Berlin, of the 15th instant, the fact of the Holstein army having taken possession of Rekernforde is confirmed. Hostilities have therefore fairly commenced. A general was found among the killed on the Danish troops; but it was not deemed probable that much time would elapse before the opposing parties were brought in sight of each other, when a regular engagement would inevitably ensue

WEST INDIES

The West Indian Mail arrived in town yesterday (Friday), with dates from Jamaica of the 22nd ult. The Protectionist manifesto of Lord Stanley had given great satisfaction to the people of Jamaica, who attribute the decline of their prosperity to the operations of Free-Trade.

Cholera was decreasing at Havannah; but at Mexico it was raging with the most direful results, the medical practitioners being unacquainted with the best methods of treatment. Rain had not fallen for some time, and thousands of cattle had died from want of it.

COAL-PIT EXPLOSION.—An explosion took place on Sunday last at the Whynyar coal-pits, about two miles and a half from Whitehaven, Cumberland, which did considerable damage. From the circumstance that it fortunately occurred on a Sunday the men were not at work, and no lives have been lost; but the shaft has been so much injured from the fire, that it will be some time before operations can be again resumed. The cause of the explosion was an accumulation of foul air

FUNDS OF FRIENDLY SOCIETIES.—The total amount belonging to friendly societies invested with the Commissioners for the Reduction of the National Debt on the 20th of November, 1849, was £2,103,261 4s. 3d. Of this amount, interest at the rate of 3d. per cent. per diem was payable on £1,539,821 18s. 6d., and 2½d. per cent. per diem on £534,581. The number of members in the societies ranged from 8 to 5000

ADVANCES OF PUBLIC MONEY FOR DRAINAGE, &c.—On Wednesday the new act to authorise further advances of money for drainage and the improvement of landed property in the United Kingdom, and to amend the acts relating to such advances, was printed. By this act, which contains 14 sections, the Treasury is empowered to advance two millions for the improvement of landed property in Great Britain, and £200,000 for Ireland. A further sum of £500,000 for drainage and works of public utility in Ireland may be advanced. It is provided that loans to the same owner of property shall be restricted to £5000 The act took effect from Monday, when it received the Royal assent

CHEAP POSTAGE IN AMERICA.—The cheap postage system (says the *New York Courier*) continues to work well. The last four years of cheap postage, compared with the last four years of high postage, produced as follows :—

	Mail Letters.		Cheap Postage.
Year 1845	4,564,000 Dols.	Year 1846	3,987,000 Dols.
„ 1847	4,424,000 „	„ 1847	4,370,000 „
„ 1848	4,227,000 „	„ 1848	4,757,000 „
„ 1849	3,800,000 „	„ 1849	4,760,000 „

THE COURT AND HAUT TON.

THE COURT AT BUCKINGHAM PALACE.

The Queen held a Privy Council at one o'clock on Saturday afternoon, at Buckingham Palace. At the Council, Henry Tufnell, Esq., was introduced, and, by command of the Queen, was sworn of her Majesty's Most Honourable Privy Council, and took his seat at the board. The Court was attended by the Treasurer of the Household, the Vice-Chamberlain, Viscount Combermere, Gold Stick in Waiting; Lord Camoys, Lord in Waiting, and Colonel Berkeley Drummond, Groom in Waiting.

The Queen and Prince Albert, with the Princess Royal, the ladies and gentlemen of the court, and the domestic household, attended divine service on Sunday morning, in the private chapel of Buckingham Palace. The Hon. and Rev. Gerald Wellesley officiated.

The Queen held a Privy Council at one o'clock on Monday afternoon, at Buckingham Palace. Lord Langdale and the Hon. Baron Rolfe, two of the Commissioners of the Great Seal, attended the Court, and Lord Langdale had an audience of her Majesty, and delivered up the Great Seal to the Queen. At the Privy Council, her Majesty in Council was pleased to deliver the Great Seal to the Right Hon. Sir Thomas Wilde, whereupon the oath of Lord High Chancellor of Great Britain was by the Queen's command administered to him, and the Lord Chancellor took his place at the Board accordingly.

DEPARTURE OF THE COURT FOR OSBORNE.

The Queen and Prince Albert left town at three o'clock on Thursday afternoon for Osborne, Isle of Wight. Her Majesty and his Royal Highness were accompanied by their Royal Highnesses the Prince of Wales, Prince Alfred, Prince Arthur, the Princess Royal, the Princesses Alice, Helena, and Louise, and also by his Serene Highness Prince Leopold of Saxe-Coburg and Gotha, his Excellency Count Mensdorff Pouilly, and Count Alphonse Mensdorff-Pouilly. Her Majesty and the Royal party went in six carriages from the Palace to the Nine Elms station of the London and South-Western Railway, and left by a special train for Gosport.

The Queen, with Prince Alfred, the Princess Royal, and the Princess Alice, visited the Zoological Gardens in the Regent's Park, on Thursday morning. His Royal Highness the Duke of Cambridge visited the Queen on Thursday, at Buckingham Palace.

The Duke of Wellington had an audience of the Queen, at Buckingham Palace, on Monday

COUNTRY NEWS.

RE-ELECTION OF MR. COCKBURN FOR SOUTHAMPTON.—On Wednesday morning, the nomination of a candidate to serve in the present Parliament, in the room of A. E. Cockburn, Esq., appointed Solicitor-General to her Majesty, took place at the Audit House: R. Andrews, Esq., the Mayor, presiding. T. L. Cockburn, amidst considerable applause, proposed the re-election of the Solicitor-General, which was seconded by Edward Harrison, Esq. There being no opposition to the return of the hon. and learned gentleman, he was declared duly elected The electors were then addressed in a lengthened and eloquent speech by the hon. representative and others, and the proceedings terminated.

PROPOSED EXHIBITION OF THE WORKS OF INDUSTRY OF ALL NATIONS.—A numerous meeting of operatives delegated by the different large manufacturers in its neighbourhood, was held at the Tailors' Hall, Bristol, on Tuesday night, for the purpose of devising means to form a fund so as to enable the working men to visit the Great Exhibition in 1851. A society was formed, and a code of rules adopted, and it was agreed to divide the city into ten districts, with receivers for each, whose duty it will be to receive the weekly contributions of the working men towards the proposed fund. The Mayor of Bristol and Messrs. W. H. G. Langton and J. Bates were appointed trustees, and the West of England and South Wales District Bank bankers.

STAMFORD HORTICULTURAL SOCIETY.—The second flower-show of the above society took place on Wednesday afternoon, in the grounds of Arthur Craven, Esq., and the visitors were both numerous and fashionable. The exhibition itself was not remarkable for the numerical extent of the specimens, but those which were on view were extremely fine, and quite equal in character and beauty to any that have been recently displayed at the more pretentious shows in the Regent's Park and the Chiswick Gardens The awards were granted for pelargoniums, cinclines, cereus, verbenas, coleoders, cockscombs, roses, greenhouse plants, and cut flowers; besides various fruits and vegetables. The company, however, seemed to care less for the horticultural show than for the pleasure of walking about the grounds attached to the residence of Mr. Craven, whose domain is probably not equal ed for scenic beauty and variety of effect in the neighbourhood of London There are some fifty or sixty acres of lawn and shrubbery, laid out in the most charming manner—every advantage that good taste and ingenuity could devise having been thought of to produce a series of picturesque *ensembles*. The band of the 2nd Regiment of Life Guards were in attendance, under the direction of Mr Gratian Cook

CHOLERA IN NORFOLK.—A correspondent writes from Lynn Regis:—The potato crop in this district will be a failure. The wheats never looked better; the oats are promising; the peas never were surpassed; the beans rather backward.

DISCOVERY OF FRESCOES IN STEDHAM CHURCH, SUSSEX.—The workmen at present engaged in pulling down this venerable church prior to the erection of a new one, have discovered some beautiful frescoes, and which are now laid open. The subjects are admirably executed, and occupy the entire north wall of the nave of the church. One of them represents the Virgin Mary, with Christ by her side, his hands and feet pierced, and supplicants imploring the Virgin to intercede for them Another, St. Christopher carrying Christ over the river Jordan. The figure of St. Christopher is very large, reaching almost from the base to the top of the wall, and the colouring of his dress and shield are in good preservation. Another is supposed to be the Day of Judgment. The Rev. W. D. Willis, of Elster Rectory, as well as several other members of the Archæological Society, have inspected the frescoes

THUNDER-STORM IN LANCASHIRE. A terrific thunder-storm broke over the manufacturing district of Lancashire on Tuesday night, attended with fatal consequences. The thermometer indicated a change of weather on Monday, and during that and the following day two or three light showers fell. On Tuesday morning, after a close and sultry afternoon, vivid flashes of lightning were observed in Manchester and its neighbourhood, and as the darkness of night approached the heavens were almost continuously illuminated by the lightning. But very little rain fell, and the tremendous peals which succeeded some of the most vivid flashes of lightning was not very loud. [illegible] much harm was done both by the water that fell and by the lightning. [illegible] named Samuel Hulme, whilst riding between two milk-cows on a horse, near Littlewood Cross, was struck by lightning, and both he and the horse were killed. Much less damage to some thousands of pounds extent was done to the growing crops, and on Wednesday morning the river Irwell, from Bolton to Manchester, was much swollen, showing that there had been a very large fall of water in that direction. At the Fern-hill Colliery, near Bury, by which is ascending a coal-pit, when near the mouth of the shaft and about to land, were precipitated to the bottom of the mine by the sudden snapping of the rope, which, it is supposed, was cut in two by the lightning. Strange to say, the mine was not damp, as compared with most of the collieries in that district, and the men, though much injured, were not killed. On the same afternoon Chatham and Rochester were also visited by a severe storm of thunder and lightning, accompanied by a heavy fall of hail and rain.

DESTRUCTIVE FIRE AT HENDON.—On Tuesday afternoon a fire broke out on the property of Mr. Howett, the extensive linendraper of Holborn, situate on Hendon, near the parish church. The flames enveloped an old barn nearly fifty feet long, and about thirty feet wide. Owing to the easily ignitable nature of the materials of which the building was composed, but few minutes elapsed ere the whole mass became one immense sheet of flame, together with three ricks of hay that stood near. Ultimately the fire was extinguished, after a large [illegible] of property, farm stock, &c. Mr. Howett was insured in the Phœnix Fire Office.

FAMILY GROUP EMIGRATION.

Under this title, a plan by Mrs. Chisholm, a lady who has resided for many years in Australia, and has turned her attention to the best modes of colonizing, is sought to be distinguished. She has, indeed, formed a system, by which all who contribute six guineas may obtain another stake in a farm from her "Colonization Loan Society," and be conveyed to the place of their adoption, in family groups previously formed among the subscribers a system eminently calculated to provide protection to orphan girls and friendless females, both during their passage and after their landing. About £2000 have already been contributed by the working classes towards the object; and it is now proposed to give publicity to the scheme, in order to promote its greater success.

On Tuesday, accordingly, one of the usual "group meetings" of the society was publicly held at the Royal British Institution, Old City road, Lords Ashley, Montearle, and Grosvenor, with the Earls of Harrowby and Surrey, and also several members of Parliament, being present. Among the latter were Mr Sidney Herbert, Mr. Stuart Wortley, Mr. Vernon Smith, and Mr. Francis Scott

The Earl of Harrowby addressed the meeting, in favour of Mrs. Chisholm's plan, remarking on the advantages of mutual helpfulness, and of a system of organized emigration, such as that proposed. Mr Robert Lowe, member of the House of Assembly at New South Wales, was then called upon to give the meeting the benefit of his experience in the matter. His testimony was highly in favour of Mrs. Chisholm's plan; moreover, the facility of recovering debts in the settlement made the loan to the intending emigrants a perfect [illegible] ment. Other speakers followed. Lord Grosvenor spoke highly in favour of a publication by Mrs. Chisholm, entitled "The A B C of Colonization." Lord Ashley stated that some of the emigrants had succeeded so well, that they had sent over for their sweethearts. Mr. Vernon Smith thought that the plan obviated all the usual objections to Emigration Societies, and had heartily wishingly subscribed to it, and Mr. Nelson, the actuary, [illegible] the details of a financial scheme, as appropriate to the object pursued. A working man, named Thomas Lutts, also addressed the meeting. He had already [illegible] more than £30 of his passage money, and, indeed, the manner in which the proposal had been altogether taken up by the working classes was sufficiently satisfactory evidence that the utmost reliance could be placed on their honesty, perseverance, and earnestness in the cause. The meeting was very numerous. At the conclusion many subscriptions were entered in aid of the undertaking.

VIEW OF THE GARDEN, AT SIR ROBERT PEEL'S, TAKEN FROM THE DINING-ROOM.

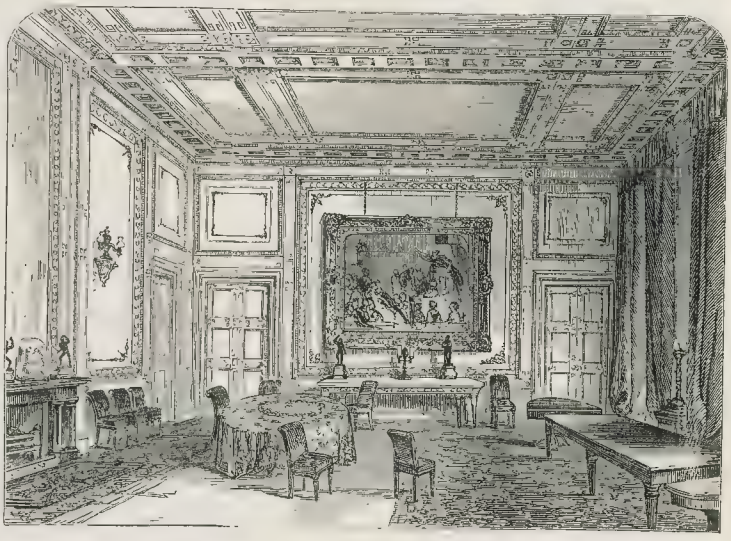
THE LATE SIR ROBERT PEEL.

THE accompanying Illustrations possess a truly melancholy interest. One represents the apartment in the mansion at Whitehall-gardens wherein Sir Robert Peel breathed his last. It will be recollected that upon the lamented Baronet being conveyed to the mansion, immediately after the accident, he was placed upon a sofa in the nearest apartment (the dining-room). From this apartment Sir Robert was never removed; for so extremely sensitive to pain did he speedily become, that it was only after very considerable difficulty that he could be lifted from the sofa to a hydraulic bed.

The mansion is the centre house in the Privy Garden, behind Whitehall. In the apartment (the dining-room) hangs the celebrated picture of John Knox preaching, painted by Wilkie

This, as well as the companion Illustration, is from a sketch taken a few months since. The latter shows the Lawn, in the rear of the mansion, the garden of which extends to the Thames.

THOUGH pensive grief above th' untimely bier
Sheds o'er the dead the tributary tear,
Yet worth unburied shall survive decay
When glory wanes and pageants pass away;
Yet shall the deeds to filial hands resign'd
Restore the parent blessings to mankind.
Hereditary might from sire to son,
In youth renews what sages have begun.
So shall the power, which made reluctant laws
The poor man's birth-right and the patriot's cause,
Led to the heights whence hope might proudly scan
Through future visions, coming good for man,
Now rolling from afar in lands unreaved,
Lament an empire widow'd, and a wife bereaved.—W. T. Y.
Phœnix Park.



THE ROOM IN WHICH SIR ROBERT PEEL DIED.

FUNERAL OF HIS ROYAL HIGHNESS THE DUKE OF CAMBRIDGE.

ON Tuesday the mortal remains of this estimable Prince were conveyed to their temporary resting-place, in a vault beneath Kew Church, and in the immediate vicinity of his Royal Highness's residence. We learn that it is intended to erect a family mausoleum in a portion of the Royal grounds, where the deceased Prince had more than once expressed a desire to be laid after death; and to this spot the coffin containing the remains of his Royal Highness will hereafter be removed. The late Duke was not singular in his wish not to rest in the Royal vault at Windsor; and his attachment to Kew, his native village, was often expressed in a marked manner; so that we are not surprised at his anxiety to rest in the parish wherein he had so long lived and where he was universally esteemed and beloved

The temporary vault in Kew Church is immediately beneath the entrance porch, at the west end of the edifice, engraved in the ILLUSTRATED LONDON NEWS for June 30, 1849, and now reinvented with additional interest.

The funeral arrangements were of the most unostentatious description—this being also in strict accordance with the illustrious Duke's wishes; and still further to insure the privacy of the ceremonial, it was ordered that the procession should move from Cambridge House shortly after six in the morning, and that the interment should take place shortly after ten o'clock. This arrangement was carried out to the letter.

THE COFFIN.

On Monday night, the outer coffin was removed fro[m] Messrs. Banting's, in St. James's-street (who, as undertakers to the Royal fa[mily], had the superintendence of the funeral), to Cambridge House, where [it] received the inner shell containing the Royal remains, and was finally screwed down.

The following is a copy of the inscription on the outer coffin:—

Depositum
Illustrissimi Principis
ADOLPHI FREDERICI
De Brunswick-Lunenburg,
Ducis Cantabrigiæ,
Comitis de Tipperary ac Baronis de Culloden;
Nobilissimi Ordinis Periscelidis
Et
Honoratissimi Ordinis de Balneo
Equitis;
Patrui Augustissimæ et Potentissimæ
VICTORIÆ
Dei Gratia Britanniarum Reginæ,
Fidei Defensoris
Obiit die octavo Julii,
Anno Domin. MDCCCL.,
Ætatis suæ LXXVII.

THE PROCESSION FROM CAMBRIDGE-HOUSE.

Piccadilly—looking west—at daybreak, on a fine summer's morning, ordinarily presents a striking scene. The broken architectural outline of the houses on the right, the Green-park on the left, with the Royal Palace and the triumphal arch on Constitution-hill in the distance, contribute to form a picture of surpassing beauty. There was something peculiarly solemn and interesting in its aspect on Tuesday morning. As early as five o'clock, some few hundred persons had assembled on the brow of the hill opposite Cambridge House. Many were evidently attracted by motives of curiosity—many, judging from their garb and demeanour, by feelings of a much more praiseworthy character.

Shortly after five o'clock, the 1st and 2nd battalions of the Coldstream Guards (the late Duke's regiment) marched through Piccadilly, *en route* from St. George's Barracks to Kew, where it had been arranged they should form a guard of honour to receive the Royal remains upon their arrival. One hundred men of the regiment filed off at Cambridge House, under the command of Lieut.-Colonel Gordon Drummond, Captain Baring, and Lieut. Burton, and formed in the courtyard in front of the mansion. A squadron of the 2nd Life Guards, under the command of Colonel M'Douall, arrived about the same time to take part in the ceremonial

At six o'clock the number of persons assembled had considerably increased, and all the windows of the houses within view were occupied. The hearse and other funeral paraphernalia now arrived, and the marshalling of the procession was at once proceeded with

As the half-hour chimed, the *cortège* left Cambridge House in the following order:—

THE FUNERAL PROCESSION LEAVING CAMBRIDGE HOUSE, PICCADILLY.

FUNERAL OF HIS ROYAL HIGHNESS THE DUKE OF CAMBRIDGE.—THE PROCESSION AT KEW.

Four Mutes on horseback, bearing staves covered with crape
A detachment of Life Guards
A mourning coach, drawn by four horses, conveying the Pages of the late Royal Highness
A mourning coach drawn by four horses conveying [illegible] of the Medical Attendants upon the late Royal
Highness Dr. Bright, Dr. Hawkins Dr. Watson and Mr. Longmorth
A mourning coach, drawn by four horses conveying Medical Attendants and Chaplains to the late Royal
Highness the Rev. J. Sumner, Rev. M. Wood Rev. Mr. Wellbank and Mr. Keate
A mourning coach drawn by four horses, conveying the Equerry of her Royal Highness the Duchess of
Gloucester [illegible] to her Royal Highness the Duchess of Kent and the Equerry of the late
Royal Highness, Colonel the Hon. A. Liddell, General the Hon. A. Upton, Sir William Davison, and
Major Shepherd
A mourning coach drawn by four horses, conveying three Equerries of his late Royal Highness, Sir
[illegible] Bowyer, the Cornwall and Major the Hon. John Mildmay
A mourning coach, drawn by four horses conveying the Equerry of the King of Hanover, the representative of the Hanoverian Embassy and the Secretary of her Majesty the Queen Dowager to the late Duchess of Cambridge Baron Knesebeck, General Count Baron Kniesebeck Dramm-ond.
A mourning coach, drawn by four horses conveying the Lord in Waiting to the Queen and two of the Equerries of the late Duke of Cambridge, Sir James Macdonell and Sir William Gomm
A mourning coach drawn by four horses, conveying the Vice Chamberlain of her Majesty's Household, and two [illegible] bearers of the pall, Lord Edward Fitzalan Howard, Sir Alexander Woodford, and Sir Henry Beaver
The State carriage of his late Royal Highness drawn by six horses, conveying the coronet and cushion, and the belt and cushion of his late Royal Highness borne respectively by Baron Knesebeck and Colonel Hay

The Undertaker—Mr Banting
A detachment of Life Guards

THE HEARSE,
Covered with a black velvet pall, emblazoned with the royal escutcheon, and drawn by eight horses.
A detachment of Life Guards closed the *cortege*

The procession, on leaving Cambridge House, moved slowly towards Hyde Park corner, before reaching which one of the most imposing pageants of the day occurred. Seated at one of the partially closed upper windows of Gloucester House was observed the venerable sister of the deceased Prince, her Royal Highness the Duchess of Gloucester evidently absorbed in grief. Her Royal Highness was attended by a lady in Waiting, whose aid appeared to be quite necessary for the support of the afflicted Princess at the moment when the hearse containing the body of her beloved brother passed the casement.

The greatest possible respect was paid to the memory of the illustrious Duke by the masses of the inhabitants along the line of route traversed by the procession. At Knightsbridge, Brompton, Kensington, and Hammersmith, the church bells were tolled, and both grounds and houses, while the shops were for the most part closed. At Hyde Park Corner, the Royal standard floated half-mast high from the church tower, and the children of the parochial schools were drawn up in the churchyard. The inhabitants of the place also came out in large numbers to witness the progress of the procession through the town.

At Kew, the people were stirring at an early hour. It had been arranged that the procession should be met on the bridge by the parochial authorities and principal inhabitants of the place, who had requested permission to precede it to the church. The arrival of the military, as usual on such occasions, had created a considerable excitement in the town, and other authorities of the place, together with the boys and girls belonging to the Duke's school, had assembled at the appointed spot. The military had scarcely formed in front of the Royal cottage when notice of the approach of the procession was given.

Her Royal Highness the Duchess of Cambridge, with her daughters the Hereditary Grand Duchess of Mecklenburg-Strelitz and the Princess Mary, arrived at Kew shortly before [illegible] o'clock, from Cambridge House. His Royal Highness Prince George of Cambridge and the Hereditary Grand Duke of Mecklenburg-Strelitz arrived at the same time. Their Royal Highnesses Cambridge Cottage being under extensive repair, proceeded to Hanover Lodge, a mansion closely adjoining, and immediately between the late Duke's cottage and the church, where they awaited the arrival of the procession, now [illegible] the village and round Kew Green.

His Royal Highness Prince Albert arrived at Hanover Cottage at a quarter to ten o'clock. His Royal Highness was attended by the Marquis of Abercorn (groom of the Stole) and Viscount Torrington (Lord in Waiting).

His Grace the Duke of Wellington arrived at nine o'clock in an open phaeton. His Grace wore a plain suit of black, and having been furnished with a crape scarf and hatband, he walked across the road into the church, and after looking at the vault and the interior of the sacred edifice, returned to the churchyard and sat down under a tree to await the arrival of the *cortege*.

KEW CHURCH

Among the noblemen and gentlemen who arrived at the church before ten o'clock, we remarked Lord John Russell, the Marquis of Lansdowne, Viscount Palmerston, the Earl of Jersey, the Earl of Minto, Viscount Bodmin, Lord Fitzroy Somerset, Lord Forester, and Lord Frederick Fitzclarence. Pews were scarce and hatbands, and were seated in pews facing the altar, but neither themselves nor the Duke of Wellington took any part in the ceremony except as spectators.

The entrance porch and body of the church were covered with black cloth, as were also the pulpit and reading-desk, the former having a royal escutcheon emblazoned upon a white ground; and another escutcheon was placed on the wall of the church, near the entrance of the royal vault. The pews were but scantily filled, very few tickets having been issued, and none being admitted without them. All the persons present were attired in deep mourning.

The Duchess of Cambridge, with the Princesses her daughters, entered the church by a private door, and [illegible] o'clock all proceeded to the lower pew, which was lined and with black curtains. Their Royal Highnesses were followed by the Lady Augusta Gordon, the Baroness Venningen, and the Ladies in Waiting on the Hereditary Duchess of Mecklenburg-Strelitz Baron Knesebeck and the Duchess of Cambridge, and Mr. Mildmay was also in attendance on their Royal Highnesses.

THE PROCESSION TO THE CHURCH.

The cavalcade occupied nearly three-quarters of an hour in its progress from the bridge to the front entrance of Cambridge Cottage, where the hearse length drew up. The military had already lined the path through which the coffin was to be borne to the church, and this portion of the ceremonial having been arranged, the procession moved across Kew-green and the churchyard in the following order

Equerries of his late Royal Highness, Mr Edmund Mildmay, Colonel Cornewall, Colonel Keate, Lieut Col Sir William Davison, and Major Stephens.	Equerry to the Queen in Waiting, Colonel Grey.
Equerry to her Royal Highness Prince Albert in Waiting, Lieut-Col Hon A Gordon.	Groom in Waiting to Prince Albert.
Groom of the Bedchamber to his Royal Highness Prince Albert in Waiting, Lieut-Col Francis Seymour.	Colonel Berkeley Drummond
Lord of the Bedchamber to his Royal Highness Prince Albert in Waiting, Viscount C ifden.	Lord in Waiting to the Queen, Lord C Canopy.
Groom of the Stole to his Royal Highness Prince Albert, the Marquis of Abercorn, K.G.	
The Baton of his late Royal Highness, borne upon a black velvet cushion.	
The Coronet of his late Royal Highness borne upon a black velvet cushion.	
Major Baron Knesebeck.	
The Gentleman Usher of the Sword of State, Sir William Martins Pall-Bearer, Lieutenant-General Sir William Gomm, K.C.B.	The Lord Chamberlain of her Majesty's Household, the Marquis of Breadalbane, K.T.
	The Vice-Chamberlain of her Majesty's Household, Lord E P. Howard Pall Bearer. Lieutenant-General Sir James Macdonald, K.C.B.

THE BODY,

Borne by Twelve Non-commissioned Officers of the Coldstream Guards.

Pall-Bearer, Lieutenant General Sir Alexander Woodford, K.C.B.	Colonel Hay	Pall-Bearer, Lieutenant-General Sir Henry Bouverie, K.C.B.

The Chief Mourner,

His Royal Highness the Hereditary Grand Duke of Mecklenburgh-Strelitz.	His Royal Highness Prince George, now Duke of Cambridge, attended by his two Supernes, Colonel Chaplin and Colonel Henry Bentinck, and his Aide-de-Camp, Major the Hon James Macdonald.	His Royal Highness Prince Albert.

Servants of his late Royal Highness.

Pages of his late Royal Highness—Messrs. Meyers, Ebeling, Owen, Oppermann, Sindon, Hardy, Gilbeart, Kamatham, and Prentice.

Medical attendants upon his late Royal Highness Dr. Hawkins, Dr. Watson, Dr. Richard Knight, Mr. Keate, and Mr Illingworth.

Chaplains to his late Royal Highness—Rev John Sym Wood, Rev. Mr. Kaper, Rev. John Ward.

Equerry of her Royal Highness the Duchess of Nassau, Baron Hon. Arthur Upton.	Equerry of her Royal Highness the Duchess of Gloucester, Colonel the Hon. Augustus Liddell.
Equerry of his Majesty the King of Hanover, Lieutenant-General Sir Charles Thornton.	The Representative of the Hanoverian Legation, Count Charles Kielmansegge (brother of the Minister).
The representative of his Majesty the King of Hanover, General Prott.	The Representative of the Hanoverian Legation, Count Charles Kielmansegge (brother of the Minister).

At the entrance of the church the procession was met by the Rev. James Hutchinson, M.A., one of the domestic chaplains of his Royal Highness, and the Rev. R. B. Byam, vicar of Kew; and the coffin was consigned to them, reading the impressive service for the burial of the dead as the coffin was borne into the church. The measured tread of the soldiers as they proceeded up the south aisle in the direction of the altar had a most solemn effect. The coffin having been placed upon trestles in front of the altar, a black velvet pall, emblazoned with Royal escutcheons, was thrown over it, and the coronet and *bâton* being deposited thereon, the service proceeded, the Lord-Chamberlain and the Vice-Chamberlain, with their wands of office, standing at the head and foot of the Royal corpse, and the chief mourner taking his station at the head. At the proper period, the coffin was again uncovered, and borne on the shoulders of the colour-sergeants, down the north aisle, to the entrance of the vault, into which it was gradually lowered on an inclined plain. On the removal of the remains from the altar, the Duchess of Cambridge, with the Princesses, left the Royal pew, and joined the procession to the mouth of the vault, the Duchess resting on the arm of Prince George, and the Princesses supported by the Hereditary Grand Duke of Mecklenburgh-Strelitz. His Royal Highness Prince Albert walked a few paces apart. When the coffin had been lowered into the vault, and the mourners had taken their places around, the organ, which had played the "Dead March in Saul" during the progress of the procession from the altar, ceased, and the service again proceeded. When the rev. chaplain commenced reading the "Lord's Prayer," the Duchess of Cambridge knelt down at the entrance of the vault, and remained in an attitude of fervent supplication for some moments.

The service having been concluded, the Duchess of Cambridge, with the Princesses, the Duke of Cambridge, and the Hereditary Grand Duke of Mecklenburgh-Strelitz, retired from the church by a private entrance and returned to Hanover Lodge. The procession was conducted out of the church by the usual entrance; and the noblemen in attendance also took their departure for town.

The organ played Martin Luther's Hymn as the mourners retired.

The funeral was conducted in accordance with his Royal Highness's expressed desire, under the exclusive superintendence of the Lord Chamberlain's office. The College of Arms took no part in the ceremony; nor was Garter present to proclaim the style and titles of the deceased Prince, as is usual in the case of all Royal interments.

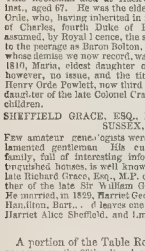
At nightfall, the Duchess of Cambridge, with the Princesses her daughters, Prince George, and the Hereditary Grand Duke of Mecklenburgh Strelitz, proceeded to the church to take a last view of the coffin containing the remains of their beloved relative. The Princesses were observed to strew a basket of flowers into the vault, after which the illustrious mourners retired, and the workmen were immediately summoned to close in the vault.

Thus closed the obsequies of the lamented Duke. They were distinguished by little of the pageantry incidental to a Prince, but rather marked by characteristics of deep affection, and by endearing observances which imparted a simple solemnity to the rite unattainable by what may be termed the pomp of woe.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

LORD DUNBOYNE.

JAMES BUTLER, Baron of Dunboyne, in the county of Meath, was the son of James Butler, Esq., of Kilcash, in the county of Clare. He was born on the 25th July, 1780. He married, first, the 17th August, 1799, Eleanor, daughter of David O'Connell, Esq., of Cork, by whom (who died the 15th March, 1817) he leaves, besides five other sons and a daughter, his eldest son and successor, Theobald Fitzwalter, the present Baron. The late Baron married, secondly, the 19th December, 1843, Mrs Vaughan of Belle-hutch House, Oxon His Lordship assumed the title of Lord Dunboyne in 1829, on becoming the representative of the family, at the death of the prior titular Peer. He was legally confirmed in this assumption by a reversal on the part of the Crown of the outlawries against the Barony in 1827. Lord Dunboyne died on the 6th instant, at the Château Kenngen, Pas de Calais.



CAPTAIN OWEN STANLEY, R.N.

This distinguished naval officer, who was born on the 13th June, 1811, was the eldest son of the Right Rev. Edward Stanley, Bishop of Norwich, by his wife Catharine, daughter of the Rev. Oswald Leicester, Rector of Stoke Salop: he was also nephew of Lord Stanley, of Alderley. His youngest brother, Charles Edward, is a Captain of the Royal Artillery.

Captain Owen Stanley entered the Royal Naval College the 5th August, 1824, and embarked, the 8th January, 1826, as a volunteer on board the *Druid* frigate. Having become a midshipman the following March, he rose through a continued course of hard and active service to the rank of Captain, which he attained the 23rd September, 1844. While Commander in the *Britomart*, he aided in forming the colony of Port Essington, and made a track survey of the Arafura Sea, of which he drew him, this able and promising seaman died off Sydney, the 13th March, 1850.

WILLIAM, SECOND LORD BOLTON.

This nobleman died at Hackwood Park, his seat in Hampshire, on the 13th inst., aged 67. He was the elder son and heir of the late Right Hon. Thomas Orde, who, having inherited in right of his wife, Mary Jean, natural daughter of Charles, fourth Duke of Bolton, the great estates of the Powlett family, assumed, by Royal licence, the surname and arms of Powlett; and was raised to the peerage as Baron Bolton, of Bolton Castle, county York, in 1797. The Peer, whose demise we now record, was born 31st October, 1782; and married, 8th M.., 1810, Maria, eldest daughter of Guy, first Lord Dorchester, K.B He leaves, however, no issue, and the title and estates devolve to his nephew, William Henry Orde Powlett, now Hon. Lord Bolton, who is married to Letitia, youngest daughter of the late Colonel Crawfurd, of Newfield, in Ayrshire, and has several children.

SHEFFIELD GRACE, ESQ., LL.D., F.S.A., OF KNOLE HOUSE, COUNTY SUSSEX, BARRISTER-AT-LAW.

Few amateur genealogists were more accomplished or more gifted than this lamented gentleman His curious and comprehensive history of the Grace family, full of interesting information, referential to many of our most distinguished houses, is now in the press. Mr. Grace was second son of the late Richard Grace, Esq., M.P. of Boley, in the Queen's County, and next brother of the late Sir William Grace, Bart., of Grace Castle, county Kilkenny. He married, in 1829, Maria Anne, daughter of Lieutenant-General Sir John Hamilton, Bart.. d leaves one son, Sheffield, born in 1834, and two daughters, Harriet Alice Sheffield, and Emily Anne Sheffield.

A portion of the Table Rock at Niagara Falls, about forty feet long, gave way on the 29th ult. A carriage was passing at the time with six passengers, who saved their lives by leaping from the carriage, which was thrown over the precipice It is reported that a guide and several visitors were under the rock when it fell, but this statement is not confirmed. The shock was felt to the distance of several miles.

THE ILLUSTRATED LONDON NEWS.

METROPOLITAN NEWS.

CITY MONUMENT TO THE MEMORY OF THE LATE SIR R. PEEL.

An influential meeting of the citizens of London was held on Monday, in the Egyptian Hall, Mansion House (the Right Hon. the Lord Mayor in the chair), to take steps for securing the erection of a suitable monument within the city of London to the memory of the departed statesman whose loss is so universally deplored by all parties in the country, whether agreeing with or opposed to his political opinions.

The Lord Mayor was supported on the platform by Baron Lionel de Rothschild, M.P., Baron de Goldsmid, Alderman Sir T. Lawrence, Sir J. J. Pelly (chairman of the Hudson's Bay Company), Sir E. N. Buxton, M.P., Sir Moses Montefiore, Sir J. Weir Hogg, M.P., &c

The chairman stated, that he had called the meeting, and undertaken to preside on the present occasion, from a sincere wish to do honour to the memory of the late Sir Robert Peel. (Cheers.) They were met together to promote a subscription for the purpose of erecting a suitable testimonial to perpetuate the memory of that eminent statesman whose loss they all deplored

Sir Peter Laurie, as one of the senior aldermen of the city of London, felt honoured in having entrusted to him the task of moving the first resolution, which was as follows:—

That this meeting desires to give expression to the profound and universal regret which pervades all ranks and conditions of the people at the irreparable loss which this country has sustained in the decease of the Right Hon. Sir Robert Peel, and feels that, in seeking to perpetuate the record of his public services and his private virtues, it commands the sympathy and enlists the cordial co-operation of all.

Captain Shepherd had the melancholy gratification to second the resolution proposed by Sir Peter Laurie. (Cheers.)

The chairman was about to put it to the meeting, when a gentleman, who gave his name as "Mr. Beardmore, of the Park, near Nottingham," rose to propose an amendment.

The Chairman wished to know whether the gentleman who wished to speak was a citizen of London?

Mr. Beardmore replied that he was a freeholder of Middlesex and a freeman of the Brewers' Company.

The Chairman said, as the meeting was called for a specific purpose, he should like to see the amendment.

Mr. Beardmore accordingly handed in his amendment; and the chairman being engaged apparently in consulting his friends relative to it, there were loud cries of "Read, read, read."

Mr. Under-Sheriff D. W. Wire, who acted as secretary, accordingly read the amendment as follows:—

This great meeting does, at the same time, with the deepest feelings of anguish and regret, look back upon the public career of the departed statesman, in so far as he supported Lord John Russell, by voting for the admission of save-grown sugar into this country, which admission has sorely increased the trade of the slave-owning States of America, and has rendered the horrors of the middle passage more appalling ever since the fall of 1846, when the charge of British law became known in Cuba and the Brazils

Upon the reading of the amendment, there were loud cries of "Shame, shame;" "No politics," "It can't be put," &c.

The Chairman having decided that the amendment could not be put, the original motion was unanimously passed

Sir John Henry Pelly moved the next resolution:—

That a committee, consisting of the gentlemen now on the platform, be formed, with power to add to their number, to collect subscriptions, and to consider the best means of carrying out the objects of the meeting; and that the Lord Mayor, Sir James Duke, Bart. M.P., and Baron Rothschild, M.P., be requested to act as treasurers.

Sir James Weir Hogg, M.P., seconded the motion, which was unanimously carried.

The Rev. Charles Marshall, M.A., and Mr. Under-Sheriff Wire, having consented to act as honorary secretaries, the latter read a list of subscriptions entered into in the room, amounting to £500 or £600, including the Merchant Tailors' Company, £210; the Lord Mayor, £25; Sir E. N. Buxton, £21, Baron Lionel de Rothschild, M.P., £21 Truman, Hanbury, Buxton, and Co., £21. Sir Moses Montefiore, £21; Sir Peter Laurie, £10 10s.; Alderman Salomons £10 10s.; the City Police, one day's pay, about £50, &c.

ARCHBISHOP TENISON'S GRAMMAR-SCHOOL.—The annual distribution of prizes at this school took place on Monday afternoon; the Rev. Henry Mackenzie, M.A., vicar of the parish, in the chair, supported by the Hon and Reward Cust, Bart., Mr. Churchwarden Cole, trustees; the Rev. M. D'Orsan, the Rev. W. W. Babington, M.A., and Thomas Jones, Esq., B.A., &c. In distributing the prizes, the rev. chairman made appropriate remarks; and in presenting (as the prize for general proficiency in the lower school) to Broadbent Dominey, "Nicolas Dominey's Voyage Out," he elegantly remarked that it was the work of one who to the gallantry of the soldier and the gracefulness of the courtier added the piety of a Christian The Rev. W. F. Babington, following in the same strain on the occasion, bore powerful testimony to the marked improvement which he observed in the school. A letter was then read from the Rev. A. G. Edc..t, expressing his entire satisfaction with the management of the boys in their studies and in their divinity studies. The head master announced that the school would re-assemble on the 20th of August.

BRITISH ORPHAN ASYLUM.—On Monday, the half-yearly meeting of the subscribers to this charity was held at the London Tavern, Mr. S. Harrison presiding. The report stated that, at a preceding meeting, allusion was made to the then existing necessity for the enlargement of the building, as well for the sake of the health of the children as for the sake of the general accommodation The directors had been enabled to effect these alterations, which had entailed a considerable expense, and an increase of funds would be necessary to maintain the efficiency and usefulness of the institution. At the last year election having taken place in consequence of the cholera. To meet the additional expense incurred, the directors had been compelled to sell out a portion of their funded property. The receipts for the half-year, including £1,000 from the estate of Mrs. Jones, £1,404 10s.; in annual subscriptions, £240 14s.; and in collections, dividends, &c., various sums, making a total of £2,967 18s. 8d. The disbursements during the same period, including the payment of £1,000 to the building fund, had amounted to £2,491 16s. 8d.; leaving in favour of the asylum a balance of £211 1s. 9d The chairman announced that eight children would that day be elected. At the close of the meeting, twenty-five votes were given for the names of the successful candidates were announced, and the meeting separated

HORTICULTURAL SOCIETY.—The third and last *fête* of this society took place on Saturday, at Kew. The grounds of the Duke of Devonshire, at Chiswick, were thrown open to the visitors on the occasion by Her Highness of his Grace The gardens of the society were in the best possible order, and the whole of the arrangements were in the best taste The show of fruit was good, the specimens exhibited being of the first class; the show of flowers was also good, some of the single specimens of rare plants being very fine. An improvement was obvious in the general appearance of the grounds The grounds of the Duke of Devonshire were in splendid order, and had the appearance of a fairy land. The number of visitors was very great, although the recent deaths of the Duke of Cambridge and Sir R. Peel kept many fashionables away. There were present Prince George of Cambridge, the Hereditary Grand Duke, the Marquis of Normanby, Lord Bradford, Lord Sondes, Lord and Lady J. Russell, &c.; the American Minister, the Neapolitan Envoy, &c., and other persons of distinction. The Band of the 1st Life Guards, or the Coldstream Guards, and of the Horse Guards (Blue) were not in uniform, but were mourning in respect for the late Duke of Cambridge.

DISPENSARY FOR CONSUMPTION.—The half yearly meeting of the directors of this charity was held on Monday, in the parish of St. Marylebone, 26, Margaret-street, Regent-street, Mr. Thomas Stevenson in the chair. The report stated that since the last meeting the number of patients from the parish of St. Marylebone who had received relief, while those from other parishes had also greatly increased The total number of persons who have received benefit from the dispensary since its commencement in 1847 amounted to 2056. The number of patients at present remaining on attendance was 452. Thirty patients have been visited at their own homes, twenty-seven cured, 11 have died, and 14 have been relieved. To these must be added the number of patients who have ceased to attend without giving notice, but are supposed to have been relieved, amounting to 182. The whole number of patients relieved, those from the parish of St. Marylebone are 173; from St. Pancras 56, St. George's, Hanover-square, 17; St. James's, 34; St. Giles's, 14; other parishes collectively, 97.

ROYAL CALEDONIAN ASYLUM.—On Wednesday the anniversary festival of this institution took place at the Freemasons' Tavern, Great Queen-street, Lincoln's Inn-fields; the Earl of Eglinton in the chair. Upwards of a hundred gentlemen sat down to dinner, and among the guests at the principal table was one of the brothers of the Nepaulese Ambassador, attended by Captain Cavanagh, polite at agent to the embassy. In proposing the toast of the evening, "Success to the Royal Caledonian Asylum," the chairman stated that he greatly regretted to say that while the poor majority of the charitable institutions of this great city were in a prosperous condition, this valuable society had not received the support which it deserved. The objects of the institution were the general education of the children of soldiers or sailors who had lost their lives in the service of their country, and also to the offspring of those indigent Scotchmen in London who were not entitled to parochial relief. At the close of the evening subscriptions were announced amounting to nearly £700, exclusive of a donation of £1000 from Captain Matheson.

COURT OF ALDERMEN.—THE DEATH OF THE DUKE OF CAMBRIDGE.—On Wednesday, Sir Peter Laurie, after having made some observations upon the public loss sustained by the death of the late Chief Commoner, moved the following resolution:—"That this Court has received with unfeigned sorrow the intelligence of the decease of his Royal Highness the Duke of Cambridge, and desires to record its sincere sympathy with the domestic virtues which adorned his public and private life, setting a brilliant example to all ranks of his fellow subjects, of attachment to his native land, domestic virtue, amiable decorum, and unostentatious benevolence; and that this Court sympathizes with the nation at large, it feels, by this painful event, called upon to mourn the loss of an illustrious citizen, and the numerous charitable institutions of the metropolis that of a liberal benefactor and friend. That this Court respectfully condoles on this occasion with her most gracious Majesty, her Royal Highness the Duchess of Cambridge, the amiable and afflicted widow of his Royal Highness, and every member of the Royal family."—Alderman Farebrother seconded resolution, which was carried unanimously, and was, upon the motion of Alderman Kelly seconded by Alderman Humphery, ordered to be entered upon the minutes of the Court, and published in the usual papers.

EVENING CLASSES FOR YOUNG MEN.—On Monday evening, a public meeting of this society was held at St. Martin's Hall, Long-acre. In consequence of the Bishop of London being absent (from illness), the Rev. Dr. Russell was called to the chair. On the platform were noticed the Bishop of Toronto, the Rev. Dr Croly, C. B. Dalton, T. B. Murray, &c. The Bishop of Toronto, in a lucid and forcible speech, showed the advantages to be obtained by knowledge when combined with sound religion, and that thus it fitted the recipient for larger knowledge and for greater happiness; and concluded by moving—

That this meeting gratefully acknowledges the divine blessing indicated in the measure of success which has attended this effort.

The motion was agreed to.—On the motion of Dr. Croly, it was also resolved—

That, considering the importance of this movement, it is with the most grateful feelings this meeting hails the information that his Royal Highness the Prince Albert has accorded his patronage to it; as it is well known that his Royal Highness's discriminating and cultivated mind is always active to encourage and promote the welfare of those institutions which seek to advance the happiness of his adopted country.

LONDON JOINT STOCK BANK.—A meeting of the proprietors of this company took place on Thursday, at the offices, Princes-street, City; Mr. C. Taylor in the chair. The report shewed that the net profits realised by the Bank, during the six months ending June 30th last, amounted to £45,939 18s. 11d., which, after the appropriation of £15,000 to the Reserve Fund, left a balance of £30,939 18s. 11d., whereupon it was proposed that the half-yearly dividend, at the rate of 5s. per cent per annum, would leave a balance of £8,939 18s. 11d. unappropriated. The report was adopted, and, after a vote of thanks to the chairman, the meeting separated.

NEW ZEALAND COMPANY.—A meeting of the proprietors of this company took place on Monday morning, at the offices, Broad-street-buildings, Sir Ralph Bernal, M.P., in the chair. A twelve o'clock hour named for the adjourned meeting, a sufficient number of directors and proprietors were not in attendance, and, before an adjournment could take place, it was necessary to wait until two o'clock. In the meantime several of the proprietors present put questions to the chairman, with a view of ascertaining the precise position of the affairs of the company as they now stood. In replying to these questions, the chairman stated that the committee appointed at the last general meeting had addressed a long letter to Earl Grey on the subject of the surrender of the charter, and calling his attention in strong but respectful language to the rights of the shareholders To that communication no reply had been received, and the committee were in a complete body as to the course they had so unanimously expressed their readiness to surrender the charter, and the surrender had not actually been accepted. It was possible that some terms might be offered to them by the Colonial Office The company possessed the colonising functions and the power for the sale of lands; but they would still, he imagined, derive an interest in the sale of lands in New Zealand until the sum of £265,000 was paid them. The committee had also been informed that they were from lands would be placed in their possession for the exercise of their colonising functions; but it was found they had had to purchase the Crown domain lands before they could do anything with them. The surrender of the charter would not very materially affect the Canterbury Settlement Association, as they would have to surrender land from the Government instead of the New Zealand Company, as heretofore. It did not appear to him necessary that the Canterbury Association should have any new act; and yet he knew of no reason why there was in course of preparation, if not actually completed. No expenses would now be allowed except those necessary for winding up the affairs of the company. New Zealand House would be closed, and very few changes would be contingent on the nature of the answer from the Colonial Office After some further discussion, the meeting was again adjourned for a fortnight.

SOCIETY IN AID OF THE FISTULA INFIRMARY.—On Monday the seventh anniversary festival of this society was held at the Highbury-barn Tavern, Islington, when upwards of 100 of the friends and supporters of the charity sat down to dinner. William Eade, Esq., presided. From the report of the committee of management for the past year, it appeared that the subscriptions had exceeded those of the two previous years, having amounted to £38, a fact from which it was considered that the majority of the subscribers were not of a fluctuating character, whose circumstances might lead them to have recourse to the benefits of the Infirmary The total receipts of the society had amounted to £71., and the expenditure to £36, leaving a balance of £36 which had been handed to the treasurer of the Infirmary During the year 1849, 843 patients suffering from diseases of the rectum had been admitted into the Fistula Infirmary, of whom 571 had been cured, 1 had partially relieved; 6 patients had been discharged incurable; 38 for irregularity of attendance; and 72 remained under treatment. Only one death had occurred. The total number of patients received since the foundation of the infirmary was 6968. In proposing the toast of the evening, the chairman said that of all the noble institutions which existed in the metropolis for the relief of the suffering poor, the Fistula Infirmary was the only one to which a charitary had been formed by members of the working classes, who had been relieved through its instrumentality. That last-named fact spoke volumes in favour of the charity. The health of Mr. Salmon, the honorary surgeon and founder of the infirmary, was received with loud and long-continued cheers; and other toasts having been disposed of, the company separated

LONDON COFFEE-HOUSE-KEEPER'S ASSOCIATION.—On Monday the 13th annual meeting of the donors and subscribers to this benevolent institution was held at the Freemasons' Tavern, for general business; Mr. H. Sherwood in the chair The report stated that, during the past half-year, the funded property had increased about £200, and the interest previously invested amounted to the sum of £2443 14s., invested with the commissioners for the reduction of the National Debt. The secretary then heard the receipts to the half-all sources £417, whilst the expenditure left a balance of £6 7s. 4d. The anniversary dinner in May last, presided over by J. Masterman, Esq., M.P., added nearly £200 to the funds.

COLONIAL REFORM SOCIETY.—The members and friends of this society dined together at the Trafalgar Tavern, Greenwich, on Wednesday evening; the Right Hon. Lord Monteagle presiding, supported by Lord Lyttleton, the Bishop of Oxford, Sir W. Molesworth, M.P., Hon. W. Wrottesley, Hon. P. Scott, M.P., Hon. F. Campbell, M.P., Mr. J. Hume, M.P., Mr. H. Aglionby, M.P., Mr. Wakefield, M.P., Mr. J. Wyld, M.P., the Rev. Mr. Jackson (Bishop elect of Victoria), Mr. Sandford, Mr. Samuel Bowley, Mr. Rowe, Dr. Black, Mr. Thring, Mr. Crawley, M.P., &c In the course of the evening the company were addressed by the noble chairman, Sir W. Molesworth, the Bishop of Oxford, Lord Lyttleton, Mr. Hume, Mr. Scott, Mr. Rowe, and Mr. Lowe. The latter gentleman, who is a resident of New South Wales, and a member of the Legislature of the Colony, in a very eloquent speech, advocated the right of the Australian colonies to self-government, and deprecated the policy of Earl Grey, which would ultimately tend to put to hazard the prosperity of all our colonies, and to do away with that feeling of devoted loyalty which now especially characterised the Australian colonies.

METROPOLITAN CONVALESCENT INSTITUTION.—The half-yearly meeting of this society was held in their offices, No. 32, Sackville-street, on Tuesday—Mr. George Poupart in the chair—when a report was presented, and it appeared that the second year of the society was in a very satisfactory condition. The Rev. R. Baxter, of Kingsthorpe, Northampton, had bequeathed them £500 to be paid on the decease of his widow Since the 1st of January last they had enrolled 84 subscribers, and 23 persons had given them donations. The additions to the building fund had not been so great as they could have wished, being only £220, including the dividends upon stock, which now amounted to £2710 During the half-year, 365 persons had been received into the institution, of whom one had died and 56 were now in the houses In consequence of want of sufficient room in the asylum, persons were often compelled to wait two or three weeks before they could be admitted, after being approved as fit objects for admission. Several letters were also read from the building committee, which stated that the plans and elevation of the proposed asylum were in a forward state Lord Ellesmere had offered them five acres of land, subject to a condition that it should not be used for the purposes of the charity, it should revert to his Lordship. The condition having been submitted to the consideration of counsel, the committee were advised it would bring them under the Statute of Mortmain, and they had every reason to believe that it would be shortly brought to a satisfactory close. The two reports were adopted.

LONDON SOCIETY FOR THE PROTECTION OF YOUNG FEMALES.—A meeting of this society took place on Tuesday evening, at the Office, 2, New Broad-street, when a resolution of condolence to the Duchess of Cambridge and Prince George, on the death of the late Duke of Cambridge, was unanimously adopted, and a request was made that the present Duke of Cambridge be earnestly solicited to become one of the patrons of the society, in the place of his deceased father.

PUTNEY COLLEGE.—The annual distribution of prizes for proficiency in the various departments of knowledge cultivated in this establishment took place on Wednesday; the Earl of Devon in the chair. The reports of the Principal and Professors having been read all of which were highly satisfactory, the chairman delivered the prizes, accompanied by suitable addresses to the students, after which the proceedings closed.

SWEARING-IN OF THE NEW LORD CHIEF JUSTICE OF THE COMMON PLEAS.—On Tuesday, at one o'clock, Sir John Jervis, the late Attorney-General, was sworn in as Lord Chief Justice of the Common Pleas, at the private mansion, in Eaton-square, of Lord Truro, the new Lord Chancellor. J. Naylor, Esq., the Clerk of the Crown in Chancery, was present to administer the oath. Sir John Jervis, immediately after being sworn in, proceeded to Lincoln.

ST. THOMAS'S HOSPITAL.—On Wednesday the annual court of the governors of this ancient charity was held in the board-room of the hospital. The report for the past year was read, which stated that during that period there had been admitted of sick, wounded, maimed, and diseased persons, 4737 in-patients, and 7169 medical and surgical out-patients. There were remaining under cure 417 in-patients, and 2631 out patients.

LYING-IN HOSPITAL, DALSTON.—At a meeting of the members of this institution, held on Wednesday, addresses of condolence to the Duchess and the present Duke of Cambridge were unanimously agreed to, and to, accompanied by a request that his Royal Highness would consent to become the patron of the Hospital A subscription was also entered into for the establishment of an "Adolphus ward," in commemoration of the charity and many virtues of the illustrious deceased.

THE DRAINAGE OF LAMBETH.—A public meeting of the inhabitants of Lambeth took place on Thursday last, at the Vestry Hall, Church-street, for the purpose of representing, in a petition to Parliament, the present defective condition of the drainage of Lambeth, and to record publicly an expression of opinion of the inefficiency of the present Commission of Sewers; the Rev. C. B. Dalton in the chair. Mr. Taylor, a churchwarden, moved the first resolution expressive of the inefficiency and incapability of the present commission of sewers. Since August last they had levied two 8d. rates on the parish, and had received nearly £20,000, and yet the parish was in just the same state as when the cholera visited it. A committee of investigation was appointed and a petition to Parliament agreed upon, and the meeting broke up.

LONDON, BRIGHTON, AND SOUTH COAST RAILWAY.—The report of this company was issued on Thursday. It shows the total receipts for the half-year to have been £229,099 17s. 6d., and the expenditure £93,923 17s. 3d., leaving a balance of £130,466 0s. 3d. to the credit of the company; of which £61,107 8s. 10d. is required for the payment of interest; leaving £69,348 11s. 8d. applicable for dividend, at the rate of 9½. per cent. for the half-year.

SAMBRE AND MEUSE RAILWAY.—A general meeting of this company took place on Thursday, at the offices, 62, Moorgate-street, City; Mr. W. P. Richards in the chair. The report stated that since the last report there had been, if not a great and rapid extension of traffic, a gradual and increasing progress; for last year the receipts averaged £133 per week, whereas they now amounted to £194. The expenditure had, at the same time, been reduced, and would not exceed £160 per week. The total receipts for the half-year amounted to £4042. After some discussion the report was adopted, and a vote of thanks to the chairman concluded the business of the meeting.

THE EXHIBITION OF 1851 AND THE PRINTERS' DRAMATIC SOCIETY.—The members of this society, instituted a few months since, with the primary object of affording pecuniary aid from dramatic and musical performances to benevolent objects connected with the printing trade, have determined to devote one evening to a performance in aid of the Exhibition fund, and for that purpose have engaged the Strand Theatre on Saturday (this) evening, when the "Hunchback," the "Eton Boy," and "Sketches in India" are to be represented.

JUDGES' SALARIES.—On Tuesday, a Parliamentary paper was printed (obtained by Mr. W. Patten), containing a return of the salaries and emoluments (1790) of the Judges of the Court of Chancery, and of the Judges of the Common-law Courts, in the United Kingdom. In 1790 the salary of the Lord Chancellor of England was £5000, besides fees; and in 1832 it was fixed at £10,000, and no fees allowed. There is, in addition, a salary of £4000 a year as Speaker of the House of Lords. The present income of the Lord Chancellor in Speaker of the House of Lords. The present income of the Lord Chancellor is £14,000 a year. From another return to Parliament, it appears that the salaries of the Judges of the Court of Chancery and the Common-law Courts amount to £120,000; and in 1815 the salaries amounted to £62,500; and the number of 15 had increased to 20.

CHINESE FIREWORKS.—A vessel which has just arrived in the docks from Canton, has brought several cases of fireworks as a portion of her cargo, consigned to order. The importations from that quarter are now much more various than was formerly the case, but this appears to be a totally novel arrival from China.

BURGLARY AND EXTENSIVE ROBBERY.—On Monday night, the shop of Mr. Miller, a watchmaker and silversmith, carrying on business in the Kennington-road, within one door of Penton-place, leading to the Surrey Gardens, was burglariously broken into by some expert thieves, and property amounting to upwards of £100 carried off. Mr. Miller seems to have been marked out as the peculiar victim of thieves; for, in the month of January last, and soon after he had opened his shop, his door was made fast by a strong cord to the iron scraper outside, and one of the thieves, who smashed in a pane of square of plate glass, succeeded in carrying off watches and other property to a considerable amount. In the present instance, the thieves had succeeded in getting to the back of the house of Mr. Miller by getting over the wall of a neighbour, and, having reached thus far, they forced open the back parlour shutters, and then, by means of a "jemmy," reached the shop, and stripped it of goods of all descriptions. The robbery was discovered at six o'clock next morning, by the servant, on coming down-stairs to attend to her usual domestic offices; and it was evident, from the quantity of the candle burnt, that the thief or thieves must have been for some time on the premises.

SUICIDES IN NEWGATE.—On Saturday last, verdicts of "Temporary insanity" were returned on two inquests held in Newgate, by Mr. W. J. Payne, deputy coroner, and a jury of 23 citizens of London. The first was on the body of Daniel Blackstaff Donovan, aged 33, an ex-pugilist, who, on the previous day, had undergone the extreme penalty of the law, after conviction of having thrown his wife out of a window with intent to murder her; the second was on the body of Walter Watts, also aged 33, recently clerk in the Globe Insurance Office, and formerly lessee of the Marylebone and Olympic Theatres in Tiviot Dale. Watts had been sentenced to ten years' transportation. Donovan hanged himself by means of a handkerchief from the bars of his cell-window, at half-past two o'clock in the day (Friday), a few hours after he had received his sentence. Watts, who was confined in the infirmary of the prison, hanged himself from the bars of the water-closet window, about midnight on Friday night.

BIRTHS AND DEATHS.—Births during the week ending Saturday, July 13.—Males, 662; females, 637: total, 1299. Deaths during the same period:—Males, 393; females, 388: total, 781. The average derived from ten corresponding weeks of 1839-48 is 866, or augmented in the ratio of increase of population, 967. Compared with this latter number, the deaths of last week exhibit a decrease of 186. Taking the ten weeks of previous years, namely, the 28th of each year, it appears that the lowest mortality recorded in 1845, when it was 707; the highest occurred in 1849, and was 1369, when cholera was making considerable progress. According to the above statement, 7 deaths from cholera were registered last week; but in the same week of 1846 there were 9. In that of 1848 there were 30, while at this period last year the epidemic had made such progress, that in the corresponding week 339 deaths from it were registered.

METEOROLOGICAL OBSERVATIONS.—At the Royal Observatory, Greenwich, the mean reading of the barometer in the week was 29.875 inches. The mean temperature of the week was 59·4 degs. Except on the last two days, the mean temperature was below the average of seven years. On Saturday the highest in the sun was 110 degs.

CHURCH, UNIVERSITIES, &c.

PREFERMENTS AND APPOINTMENTS.—The following appointments and preferments have recently been made:—The Rev. George Jehosaphat Mountain, to be Bishop of Quebec. The Rev. Robert Wentworth Cracroft, to the Rectory of Harrington with Brinkhill. The Rev. Edward Robert Spencer, to the Rectory of Stoke Climsland, Cornwall. The Rev. Edward Robert Pemberton, to the Rectory of St. Mary Steps, Exeter. The Rev. Haviland De Saumarez, to the Rectory of St. Peter's, Northampton, with the Chapelry of Upton. The Rev. Thomas Brown Beauseworth, to the Rectory of Rockland All Saints, with St. Andrew, Norfolk. The Rev. G. H. Scott, to the Rectory of Rhos Crowther, near Pembroke. The Rev. George Stable to the Vicarage of Westow-next-Welton. The Rev. Edward Nowells, to the Vicarage of Holme with Huntingdon, Herefordshire. The Rev. Edmund Alderson, to the Vicarage of Aslackby, Lincolnshire. The Rev. Sweyn Macdonald Mackay, to the Vicarage of Skillington. The Rev. Henry Robert Lloyd, to the Vicarage of Cwrtwy, with Kirkby and Asgarby annexed. The Rev. Henry Malpas, to the Vicarage of Corse, near Gloucester. The Rev. Thomas Lowe, to the Vicarage of Willington, near Eastbourne.

TESTIMONIALS.—The following clergymen have recently received testimonials of esteem and affection:—The Rev. William Dry, chaplain of Oatlands, Tasmania; the Rev. Henry Clissold, minister of the Stockwell Episcopal Chapel; the Rev. W. G. Giles, from the inhabitants of Ryde; the Rev. C. B. F. Fortiscary, late of Blackheath, Kent; the Rev. T. Hill, late of St. Michael, Queenhithe; the Rev. Henry Malpas, on retiring from the curacies of Brickhampton, and Holy Cross, Pershore; the Rev. Thomas Scott Rundall, late of Lyndhurst, Hull, from the parishioners; the Rev. M. Tylee, late curate of Lyndhurst, from the parishioners; the Rev. G. H. Scott, from the inhabitants of Ifield, Sussex, on his leaving.

VACANCIES.—Northleach R., Wilts, dio. Gloucester and Bristol; value, £438, with residence; patron, J. Neeld, Esq.; Rev. H. F. Bythesea, deceased. Halton, Runcorn, P.C., co. and dio. Chester; value, £197, with residence; patron, Sir R. Brooke; Rev. H. Waddell, deceased. Hoyland, co. and archdeaconry and dio. York; value, £150, with residence; patron, Earl Fitzwilliam; Rev. F. Mande, deceased. Chaplaincy of Gloucester co. Gaol; Rev. R. J. Cooper, resigned. Mastership of Amersham, Bucks, Grammar School; Rev. W. S. Newman, promoted.

CHURCH EXTENSION.—The Incorporated Society for Promoting the enlargement, Building, and Repairing of Churches and Chapels held its last meeting for the present season on Monday last; his Grace the Archbishop of Canterbury in the chair. There were also present the Bishops of Salisbury, Gloucester and Bristol, Lichfield, and Chichester; the Revs. H. Howarth, T. Kluger, and Messrs. W. Cowburn, W. D. Adams, Jurors, Jones, Scobell, Cocks, H. J. Barchard, A. J. C. Lawrie, B. Harrison, and William Salt. The business before the meeting was, as might be expected, larger than in the earlier months, comprising thirty-four new applications for assistance, the number of which was so imperfect as to render it necessary that the consideration of them should be deferred. Ten cases received aid for the erection of additional churches, three for rebuilding, and the remainder, sixteen in number, for enlarging or improving the accommodation in existing churches. The ten new churches were intended for the following districts: -Forest Gate, in the parish of West Ham, Essex; St. Stephen's district in Willenhall, Staffordshire; North Malvern, Worcestershire; Ashton and Moss, two townships in the extensive parish of Campsall, near Doncaster; Shippon, a hamlet in the parish of St. Helen, Abingdon, Berkshire; in the parish of Llandilolaybout, near Swansea; St. Leonard's-on-Sea, in the parish of St. Mary Magdalen, Hastings; and the new district of St. Paul Pudsey, near Leeds; and Eastwood, in the parish of Keighley, York-shire. The churches to be rebuilt are at Ballure, in the Isle of Man; Halstead, Essex; Hedgerley, near Gerard's Cross; and Oddington, near Chipping Norton. The churches to be enlarged or altered are those at Child Okeford, near Blandford; Mapledurwell, near Winchfield; the Holy Trinity Chapel, Miklegate, York; Upton, near Slough; Stow Bedon, near Laringford, Norfolk; Overton, Hants; Monkham, near Chelmsford; Llanellen, near Abergavenny; Saxmundham, Suffolk; St. Mary's, Southwark; Castle Combe, near Chippenham; St. Luke's, Birmingham; Wrenghten, near Sedgley, Wilts; Bedworth, near Coventry; Castle Rodingham, near Halstead, Essex; and Penally, near Tenby.

CHESS.

TO CORRESPONDENTS.

R B P.—If a Pawn, on being first played, is advanced two squares, the adversary is not obliged to take it in passing.

JUVENTUS.—It is quite allowable to claim a Bishop for any Pawn advanced to his 8th sq, although at the time you may have the two original Bishops on the board.

G S.—A private communication has been forwarded.

M P.—It is quite possible that the same, or a very similar position as the "Napoleon Problem," has been published. It was introduced by his Excellency not as a composition of his own, but as one which was known and admired in Nepaul.

B W F, R M, OXONIENSIS, M K—They are now under consideration

W S, Glasgow.—See our office above to M F. Upon further inquiry we find that the problem, which is possibly of Indian origin, first appeared in the "Chess Player's Chronicle."

B W F is thanked for the information. Before we can reply to his query, he must tell us what he means by "first-rate."

TUM TUM.—You are mistaken.—Look at the position once more.

SCHACHFREUND, Grantham.—You will get the "established" now Chess-men and Chessboard at Meshi's, in Leadenhall-street, or at Lenthar's, in Piccadilly. 2. There have been several editions of "Salvio." The last, published in 1725, intituled "Il Guoco degli Scacchi del Dottor Allesandro Salvio," is the one we should recommend you to obtain.

ANGLICUS.—The articles on Chess in the ILLUSTRATED LONDON NEWS are not likely to be published in a separate form at present. 2. The periodical mentioned appears in monthly numbers, at is 6d each, has already extended to the eleventh volume, and forms an indispensable accompaniment to the chess-table of every amateur.

CAISSA.—1. In the "*Pion Coiffé*," the Pawn capped is usually the K's Kt's Pawn. 2. If that Pawn can be taken by the adversary, no matter at what sacrifice, he wins the game. 3. The capped Pawn, unlike the others, is not permitted to become a Queen or any other piece, but, to win the game, must give checkmate as a Pawn. 4. Your Problem is marked for insertion.

Q R.—We apprehend the game you speak of never reached us. Have you another copy?

H Y.—It now seems free from error.

C F S.—Always acceptable

SOLUTIONS of the NEFARIOUS PROBLEM by L F, Royal Artillery; M P, Rev J T, Rev C F L, MISTR. SELBY, CHERUBS, P B S, N A, CAISSA, C H C, S G, F H G, BY EDMUND, W R, J S, Sheffield Chess Club; B W F, H V, JUVENTUS, C B, Hornsey Chess Club; TEM TUM, SELLABY, W S T, R G G J, HERACLES, C H P, INVENTY, C M J, R D M, DERWENT, MACRUS, are correct. All others are wrong

3. K B to Q B 4th (a)	Kt takes P	19. P to Q 5th (d)	P takes Kt
4. P to Q 4th	Q Kt to B 3d	20. P takes P (e)	Q to her sq
5. K Kt to Q B 3d	P to K 3d	21. R takes R	R takes R
6. Castles	K B to K 2d	22. B takes K B P	Q to her 3d
7. K B to Q Kt 3d	Castles	23. B to Q B 5th	Kt to Q sq
8. P to Q B 4th	K Kt to K B 3d	24. Q to her 3d	P to Q B 3d
9. Q Kt to B 3d	P to K R 3d	25. Q to K R 7th (ch)	K to B sq
10. K B to Q B 2d (b)	P to C Kt 3d	26. B to K Kt 6th	Kt to B 5d
11. Q B to B 3d	P to K Kt 3d	27. P to Q R 6th	Q to K R 3d
12. Q to her 2d (c)	K Kt to his 5th	28. P to Q 6th	P to Q B 4th
13. P to K R 3d	Kt takes B	29. B to K R 5th	R to Q sq
14. P takes Kt	K B to K Kt 4th	30. B to K Kt 6th	R takes Q P
15. Q Kt to K 4th	P to K B 4th	31. Q to K Kt 3d	Q to K Kt 4th
16. Q Kt takes B	Q takes Kt	And Black wins.	

(a) The accredited move is—3. K B to Q Kt 5th (ch). See the "Hand-book," page 37

(b) At this point we much prefer the disposition of White's forces.

(c) Premature. He should rather have played K Kt to his 3rd, to prevent the advance of the adverse K Kt.

(d) P to K R 4th seems to us a far better move.

(e) A great blunder. By simply taking off the Kt he would have had at least as good a game as his opponent. His present play costs an officer.

CHESS ENIGMAS.

THE POSTAL DERANGEMENTS.

IN every direction throughout the country, the voice of the people is raised against the Pharisaism of the Sabbatarians. From a host of country meetings on the subject we have space only to notice one in Boston, at which one of the speakers put the whole question as to religious observance of the Sunday in the most concise and pointed form.

The meeting was held on Friday week pursuant to requisition numerously signed, at the Town-hall, to petition Parliament in favour of the rescinding of the recent resolution of the House of Commons abolishing Sunday Post-office labour. The meeting comprised the principal merchants and tradesmen of the town, and the Mayor occupied the chair.

Amongst the resolutions agreed to were the following :—

That this meeting has seen with surprise and alarm, that, on a resolution of the House of Commons, a Ministerial Order has been issued, suspending the delivery of letters and newspapers throughout the kingdom on Sundays—an order the consequences of which have already inflicted great inconvenience and injury on the commercial community.

That a petition to the House of Commons, embodying the above resolution, be prepared, and when signed be entrusted to R. B. Cabbell, Esq., M P., for presentation, and that the Hon. Capt. Pelham and the County Members be requested to support the prayer.

Mr. Fricker, in seconding the motion, said no argument was necessary to enforce the proposition, the expediency of which was self-evident. He concurred in the object of the meeting for three reasons—first, that great inconvenience flowed from the late alteration; secondly, that the Post-office officials were not relieved by it; and, thirdly, that the cause of religion was not benefitted by it. It was a remark often made, that it was impossible to make people religious by Act of Parliament, and it was very true. They would spend their leisure time according to their own inclinations and dispositions; and so long as they did not encroach on or interfere with their neighbours' conveniences, they might safely be let alone.

METROPOLITAN MOVEMENT ON THE SUBJECT.—An influential committee is in the course of formation to embody and effectually direct the expression of public opinion in the metropolis and throughout the country against the Sabbatarian postage regulations. The following gentlemen have already consented to act upon the committee:—Colonel Thompson, M.P.; Joseph Locke, Esq., M.P.; W. Mackinnon, Esq., M.P.; F. Scully, Esq., M.P.; M. P. Forster, Esq., M.P.; William Williams, Esq.; Herbert Ingram, Esq.; Richard Taylor, Esq.; J. Wrightson, Esq.; Robert R. R. Moore, Esq.; Thomas Hodgkin, Esq.; William Little, Esq.; T. J. Serle, Esq.; J. Richardson, Esq.; C. Oakley, Esq.; H. J. Wood, Esq.; G. Stiff, Esq.; R. Palmer, Esq.; S. P. Clarke, Esq. (Princes Risborough); the Rev. G. J. Dickson, M.A. (Lincoln); G. H. Lamb, Esq.; E. Landells, Esq.; W. Thomas, Esq.; John Clarke Searle, Esq.; J. K. Chapman, Esq.; Neville Wood, Esq., M.D.; and F. Ledger, Esq. The committee meet at Peele's Coffee-house, Fleet-street, and all communications and subscriptions in aid of the movement will, we understand, be gladly received by Mr. J. Irving Scott, the secretary

(From the Dublin World.)

MODERN PHARISEES.—In the recent Post-office regulations, we see intolerant fanaticism triumphant over both the Government and the people—the former is made the agent, the latter the victim of one of the most unmeaning hypocrises that recent times have witnessed. It is almost ludicrous to deal seriously with a question so contemptible in every point in which we can consider it. In the first place, Sunday labour is not abolished in the Post-office. The bags are made up at a late hour on Saturday night, and forwarded during Sunday. The clerks must be in attendance to hand them to the guard, and to receive others in exchange. The whole retinue of postal auxiliaries are at full work—guards, coachmen, horses, helpers, engineers, stokers, porters—the entire staff, in fact, of the coach and railway-train are excluded from the benefit of the Ashley Sabbatarian legislation. In one respect, only, has the move been successful. It has decidedly prevented the poor from either reading or receiving letters on Sunday. But for the rich, the electric telegraph and the special messenger supply every deficiency. In latter respect, the aggregate Sunday labour is largely increased instead of being diminished.

(To the Editor of the ILLUSTRATED LONDON NEWS.*)*

SIR,—Being a subscriber to your paper, I find that in your last Number you gave an account of the different towns that had petitioned Parliament against the new Postal arrangements. I beg to come forward you what we have done to-day in Leicester. The petition was carried in council, with only four dissenting from it. It was proposed and agreed that the borough members should present it to the Postmaster-General.—I remain, sir, yours respectfully,

Leicester, July 17, 1850. THOS. MOXON.

SWEARING-IN OF THE NEW LORD CHANCELLOR AT LINCOLN'S INN.—On Wednesday morning, the occasion of Sir Thomas Wilde, now Lord TURTON, taking the oaths and his seat as Lord Chancellor, attracted a numerous attendance of counsel to the court at Lincoln's Inn, the inner bar (that appropriated to the Queen's counsel) being insufficient to accommodate the members of that body. At 10 o'clock Lord TURTON entered his Court, attended by the two senior Masters in Chancery, J. E. Dowdeswell, Esq., and James Farrer, Esq., the entire bar rising to receive his Lordship. After the usual obeisance he ascended the bench and seated at the left side of the chair. Lord Langdale, Master of the Rolls, and the Vice-Chancellor Knight Bruce, having entered the court on the opposite side, and taken their stations on the bench, Lord Langdale advanced, and placing the Chancellor in the hands of Lord TURTON's clerk of the Crown in Chancery administered the customary oaths of allegiance and supremacy, &c.; after which Lord Langdale, the Vice-Chancellor Knight Bruce, as also the Masters in Chancery, congratulated his Lordship on his elevation, and retired from the Court. The Lord Chancellor then attended the usual levee, and took his seat; upon which Mr. Swanston, the senior Queen's counsel present, rose and moved that the oaths taken by his Lordship should be entered on the records of the court, which was ordered. The Lord Chancellor then proceeded with the ordinary business of the court.

THE IRISH VICEROYALITY.—A numerous and influential meeting of Irish members, and some Irish peers, took place at Haldercrose House, the residence of the Marquis of Londonderry, on Wednesday morning, for the purpose of adopting measures for petitioning and organizing every possible legal opposition, during the ensuing recess, against any renewal, next session, of the bill for the abolition of the Viceroyalty of Ireland. Among the members of the Lower House present were—Sir Henry Winston Barron, the O'Gorman Mahon, Colonel Chatterton, Mr. Ormsby Gore, Mr. Edward Grogan, Mr. Fitzstephen French, Colonel Dunne, Mr. Dickson, &c. Several members sent excuses, but the most perfect unanimity was stated to prevail among all as to the necessity of the most vigorous exertions on the part of all the opponents of the measure in Ireland, especially of those resident in the city of Dublin.

GOVERNMENT SCHOOL OF DESIGN, SPITALFIELDS.—On Wednesday, the eighth annual meeting for the distribution of prizes, &c., was held at Crosby Hall, Bishopsgate-street. The chair was taken at three o'clock by the Right Hon. the Earl of Carlisle. The secretary read the report, which gave a very satisfactory account of the state of the school, and stated that since the last meeting the students in the school had wrought a magnificent silk dress which had been presented to her Majesty. The report having been adopted, the chairman addressed the meeting in support of the objects promoted by schools of design, and proceeded to distribute the prizes to the successful competitors. The thanks of the meeting were then given to the committee and to the chairman, and the proceedings terminated.

MEDICAL RELIEF IN IRELAND.—The total number of dispensaries in Ireland is 860; fever hospitals, 53; and infirmaries, 41. The presentments made for their maintenance in 1849 was £78,011 18s. 8d., and the subscriptions amounted to £29,470 18s., making a total of £107,482 16s. 8d.

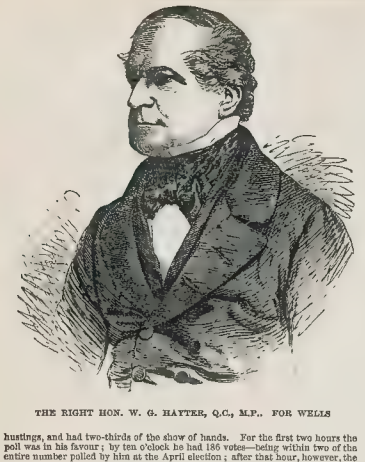
PARLIAMENTARY PORTRAITS.

THE HON. EDWARD PLEYDELL BOUVERIE, M.P.
FOR THE KILMARNOCK BURGHS,
UNDER-SECRETARY OF STATE FOR THE HOME DEPARTMENT

THE HON. E. P. Bouverie, second son of the present (third) Earl of Radnor, by his second wife, the third daughter of the late Sir Henry Paulet St. John Mildmay, Bart., was born at London, April 26, 1818. In 1829 he was sent to Harrow School, which he left in 1834, after completing the preparation for the university under a private tutor, entered Trinity College, Cambridge, in 1834.

In 1838 he went to Canada with Lord Durham as unpaid *attaché*; and, on his return, in the following year, was admitted as a student of the Inner Temple. In 1840 he was appointed Precis Secretary to the Foreign-Office, the duties being to prepare abstracts of all despatches sent from the office. This appointment, however, he soon resigned, from ill-health. In 1842 he was called to the bar, and went the Western Circuit once.

In April, 1843, he was invited to stand for the representation of Salisbury, and contested it with the late Mr. Hussey, but was defeated, the numbers polled being—Hussey, 292; Bouverie, 188. Mr. Bouverie, however, pledged himself to his supporters again to contest the seat on the next vacancy, which occurred on the elevation of Mr. Wyndham to the Bench following November. This election is memorable in Salisbury as the great Free-Trade battle of 1843. Mr. Bouverie, though his father (Lord Radnor) was on the council, threw himself, at that time, into the ranks of the League. In the previous April, however, he had been defeated as a Free-trader. The League had, meanwhile, triumphed at the city of London election; and, being invited by a public meeting of the electors to stand, Mr. Bouverie was returned at the head of the issue of the writ, the canvass was carried on with the utmost eagerness; bills were placarded declaring a reward of £100 for sufficient information to convict any one even of offering bribes. Every evening—sometimes twice of an evening —public meetings were held. These were altogether independent of Mr. Bouverie's meetings—were held in the largest places in the city and, although the speakers confined themselves strictly to their one topic of Free Trade, were crowded night after night. The enthusiasm amongst the working-classes knew no bounds. Some prize-fighters, imported for the expected rough work of the nomination and election days were quickly obliged to be hidden and sent off. But by no power of public speech, no amount of enthusiasm, was the election to be won. Old influences prevailed, and, spite of warning and rewards, bribery did its work. Mr. Bouverie spoke ably at the



THE RIGHT HON. W. G. HAYTER, Q.C., M.P., FOR WELLS

hustings, and had two-thirds of the show of hands. For the first two hours the poll was in his favour; by ten o'clock he had 186 votes—being within two of the entire number polled by him at the April election; after that hour, however, the tide turned, though by twelve o'clock Mr. Bouverie had polled a larger number than had served to return Mr. Hussey; and the numbers at the close stood—Campbell, 315; Bouverie, 270. But one of the pledged voters to Mr. Bouverie voted against him, and the turn of the poll kept back but twenty-two of his promised supporters—a circumstance unusual at elections. On the same evening a final meeting of Mr. Bouverie's friends was held, an association formed to attend to the register; and at the general election in 1847 two Liberals were returned by large majorities

After this election Mr. Bouverie joined the League, and became a member of its council; and in May, 1844, was returned for the district of Burghs, in Scotland, which he now represents, including Kilmarnock, Dumbarton, Fort Glasgow, Renfrew, and Rutherglen. On this occasion he was opposed by Mr. Princep, a Protectionist, and Henry Vincent, as a Chartist. The numbers polled were—Bouverie, 389; Princep, 379; Vincent, 98.

Mr. Bouverie's first speech in the House was in opposition to Mr. Philip Miles' amendment to the late Sir Robert Peel's sugar measure of 1844. That measure proposed to retain the duty of 24s. the cwt. on colonial sugars, to admit free grown foreign at 34s., and continue the exclusion of slave grown (which, owing to the favoured nation clause in treaties, it was afterwards found impossible to do). Mr. Miles proposed, as an amendment, 20s. on colonial-free labour, 30s. on foreign brown Muscavado, or clayed; and 34s. on foreign free labour white clayed, or equivalent to white clayed. If this amendment had been carried, Sir Robert Peel must have resigned. Mr. Miles expected the support of the Free-trade Whigs, as his duties were, for what seemed, the most part, lower than the proposed ministerial duties, and if the Free-traders voted with Mr Miles the Government must be beaten, and the Whigs come into office. O'Connell was at that time, under the State prosecutions, a prisoner in Richmond Bridewell, and it was said he would be forthwith set at liberty if the Whigs came in. As to political party, the position of the Free-traders, who had always declared themselves to be of no party, was extremely difficult; and it was rendered more so that on Friday, June 14, the Government proposal was defeated by a majority of 20; the numbers being 241 to 221.

Mr Lewis Ricardo, M.P. for Stoke-upon-Trent, was the first, in consultation with Messrs. Cobden, Bright, and others, to point out that, in fact, all foreign free-labour sugars were white-clayed, or equivalent to white-clayed. He procured samples of the several kinds, and produced letters and statements from the late Mr. Thomas Travers and other eminent merchants, and completely satisfied his colleagues that the practical effect of Mr. Miles' success would be a differential duty of 14s. instead of 10s. In this view of the case, Mr. Bouverie, though he was sure of office if the Whigs came in, voted in support of the Government; and on the following Monday Sir Robert Peel had a majority on going into committee against Mr. Miles' motion of 22, the numbers being 233 to 255. Of these, eleven were Free-trade Liberals, who came in for no small share of abuse, both in Parliament and throughout the country, for having kept their opponents in office. Mr. Bouverie also took an active part in the Free-trade debates of 1845 and 1846.

In the year 1847, he obtained a committee to inquire into the circumstances of the refusal of sites to the Free Church party in Scotland. The committee reported, recommending concession on the part of landowners. In the following session he brought in a bill founded upon the report; it was defeated on the third reading; but in the next year public opinion in Scotland obtained the concession without Parliamentary assistance. In 1848, he moved a set of resolutions condemnatory of the present mode of procedure in Ecclesiastical Courts; and in the same year succeeded Sir John Romilly, as chairman of the committee on Fees in Courts of Law and Equity. In 1849, he carried through the Commons the Clergy Relief Bill, for releasing clergymen of the Church of England, becoming Dissenters, from their orders. He was a member of Mr Fuseyy's Tenant-Right Committee, and of which he prepared the report; and of the committee on Sir Thomas Turton's defalcations in India. He is on the chairman's panel for Election Committees, and has served as chairman in the cases of Kinsale, Longford, and Kidderminster, and, in short, has bestowed so much attention upon committees, that no other member has been more constantly selected, or has more diligently and usefully served upon them He is a member who knows how, upon occasion, to speak well; and who always works, and is in his place to vote.

On the changes resulting from the retirement of Mr Tufnell, he was appointed Under-Secretary of State for the Home Department, into which office he was duly inducted on Tuesday, the 9th inst., in the room of Mr. G. C. Lewis, M.P. for Herefordshire, who has succeeded Mr. Hayter as Financial Secretary to the Treasury.

In 1842, Mr. Bouverie married Elizabeth, youngest daughter of the late General Balfour, of Balbernie, Fifeshire; and by her has one son and two daughters

Our Portrait is from a Photograph by Beard.

THE HON. E. P. BOUVERIE, M.P. FOR THE KILMARNOCK BURGHS.

THE RIGHT HON. WILLIAM GOODENOUGH HAYTER, Q.C., M.P. FOR WELLS, SECRETARY TO THE TREASURY.

THE subject of our memoir (the youngest son of John Hayter, Esq., of Whiteborne, Stoke, in the county of Wilts, was born January, 1792 In 1805 he was sent to Winchester School, under the head-mastership of Dr. Goddart, since a canon of St. Paul's; in 1811 he entered Trinity College, Oxford, and in 1813 took a second class in classics. In 1814 he entered at Lincoln's Inn, prepared himself for the Equity bar, was called in 1819, and went the Western Circuit. But his Chancery practice increasing so rapidly as to demand his entire attention, he early gave up the circuit. In 1830 he was appointed a magistrate for the county of Wilts; and in 1837, at the general election, on the death of William IV., came forward as a candidate for the city of Wells, and was returned without a contest. In 1839 he enjoyed a very large practice in Chancery, received his silk gown from Lord Chancellor Cottenham, was appointed to the commission of the peace for Somersetshire, retired from practice at the bar, and devoted himself exclusively to his parliamentary duties and agricultural pursuits

As a practical farmer the right hon. member has been eminently successful. His farm of Lindsay, about half-a-mile from Leighton, Bucks, is in the highest state of cultivation, and is a model to the surrounding districts for its order, economy, and profitable management. He was one of the council of the Agricultural Society from its commencement until he took office; and, though largely dependant upon Mr. Villiers, in 1839, and on every subsequent occasion, for the total repeal of the Corn laws, was never absent from a division in favour of Free-Trade, and has always consistently opposed every scheme of protection to agriculture. At the general election in 1841, he was a second time returned, without opposition, for Wells, and had further the rare good fortune of unopposed returns both at the general election in 1847, and at his re-election, in the same year, on his assuming office as Judge Advocate-General, vacated by the appointment of the late lamented Charles Buller to the Chief Commissionership of the Poor-laws.

In February, 1848, the right honourable member was sworn in a Privy Councillor; in May, 1849, was appointed Financial Secretary to the Treasury; and on Tuesday, the 2nd inst., succeeded, in the laborious office of patronage Secretary, Mr. Tufnell, whose constant kindliness and courtesy, coupled with the most efficient zeal for his party, won him in that office so difficult to manage, and of such vital importance to a party in power, the goodwill of all parties, the highest respect and confidence of every member of the Government, and the regret of all that insufficient health should have obliged his retirement.

Although not a frequent speaker, Mr. Hayter has, on all important occasions, taken part in debates upon matters of which he had any peculiar cognizance; and in every session he has served upon important committees He took an active part upon Lord Duncan's committee for an inquiry into the management of the department of Woods and Forests, was chairman of the committee upon Mr. Fergus O'Connor's Land Scheme, and last year was present at 140 of the 219 divisions of the session.

Throughout his parliamentary career he has made himself essentially useful, by his constant attention to the practical details of business in the House, not only to his party, but to Parliament; and, by his popular and accessible manners, has so won the esteem of all parties as at once to point him out as especially fitted to fulfil the peculiar and arduous duties of the office to which he has been appointed

In 1832, the right hon. member married Ann, eldest daughter of William Pulsford, Esq., of Wimpole-street, London.

Our Portrait is from a photograph by Beard.

HER MAJESTY'S THEATRE.

The "Puritani" of Bellini was presented on Monday—the change from the accustomed night being in consequence of the interment of the Duke of Cambridge. Madame Frezzolini appeared for the first time in the character of *Elvira*. The music is admirably adapted to her voice, for it affords especial opportunities for the exercise of the upper notes of her register; and the dramatic portions require the first order of tragic talent. Her graceful facility or execution found ample scope in the famous polacca of the first; and the various phases of a distraught intellect were artistically reflected in the difficult arcas in the second act. Madame Frezzolini fully established, by this performance, her claim to be ranked amongst the great *prime donne* of Europe. Bancardé, who was the *Arturo*, seems to think that his exquisite voice and excellent natural means are all sufficient of themselves, that study is unnecessary, care a bugbear, and attention supererogatory. Nature has been prodigal of her favours, but, like other ladies, she must be courted to render those favours lasting. Lablache as *Giorgio*, and Colletti as *Riccardo*, fully sustained their great reputations; and we need hardly add that the famous "Sinona la tromba" won its accustomed honours.

The chief feature of the night, however, was the first appearance of Senora Martinez, the coloured songstress. The fame of this lady had reached us, and, as a mark of social progress in the "black race," was to us fraught with peculiar interest. The music which she sings, and the mode adopted, must not be tested by the forms of Italy, France, or Germany. It is a thing *per se*, wild, quaint, and graceful; its dominant qualities are its picturesqueness, and its strong and unanticipated contrasts. The quality of her voice is sweet and luscious; but the absolute terror caused by the strangeness of the vocalist's position on so extended an arena, doubtless had the tendency to impart a weakness and a tremor which custom will quickly remove. Her performance on the guitar is full of talent and character, and the comic humour with which the dark Senora invested the melodies of Andalusia and Cuba, gave a peculiar zest to their utterance. The medium of her introduction is a scene in a Seraglio, to which she is conducted to wile away the exercise of the Soldan, who is played by his Galanaks. Senora Martinez was warmly applauded, and produced a marked sensation

The "Black Malibran," as she has been most unwisely surnamed, is a native of the ancient Spanish town of Havannah, the chief port of the island of Cuba. She was born of free parents, both of them members of an African stock called the Gambas. The father of Maria Martinez was a carver in wood of great artistic taste and feeling His reputation was well known in Havannah; and the family being in all respects an interesting one, the musical talents of the little Maria were soon recognised, and ultimately carefully and skilfully developed. The child was, in fact, by the special request of the Intendant of the Havannah, Don Francisco Aguilar, received into his family and educated with his daughters. The musical sensibility of Maria was now so marked, that every means were taken to cultivate her obvious talent; while her precocious cleverness as a *guitarrista*, by which she was distinguished, pointed plainly to what was destined to be her future career. Still, however, her rising genius might have met with no other reward than local celebrity, had it not chanced that the removal of the Aguilar family to old Spain gave her an opportunity of extending her technical knowledge of music, while it introduced her to an entirely new school of melody, the characteristic beauties of which she was quick to see, and skilful to avail herself of. In Seville, one of the most unceasingly national cities of Spain, full of the traces of old Moorish civilisation, and one of the head-quarters of the wandering gypsy race, Maria Martinez found ample materials or characteristic musical study. She devoted herself to the old Spanish and Moorish minstrelsy, striving to catch the full spirit and racy significance of every merry, every impassioned, and every plaintive lay she heard. Time flew by, and Maria married Don Mariano Morena, an officer in a native Cuban regiment. Subsequently to this event, the good fortune of Maria seemed to cease. Death broke up the family of the Aguilars, and with that disruption a pension which she enjoyed from them ceased to be paid. Then her husband embroiled himself with the corrupt Cuban Government, and after various alternations of ill fortune, they were forced to quit the island. Back to her favourite Seville—back to the land of castanets and gitanas—of duennas and balconies—flew the song-loving Maria. Here, however, she found herself obliged to give lessons in music for a livelihood. Pupils poured in upon her, and, a comparatively short interval was sufficient to enable her to lay by the requisite sum for obtaining admission to the Conservatorio of Madrid. Queen Isabella, who is the patroness of the institution, was delighted with the Cuban songstress, and named her one of her *pensionnaires*. Donna Maria, anxious to enlarge the circle of her musical fame, applied for and received a *congé*. She visited Paris, and the French journals recorded the triumphant success of her concerts there. Flushed with her reception in *La belle France*, Maria Martinez crossed the Channel, to appeal to a London public for a ratification of the favourable verdict pronounced by the music-lovers of Paris and Madrid.

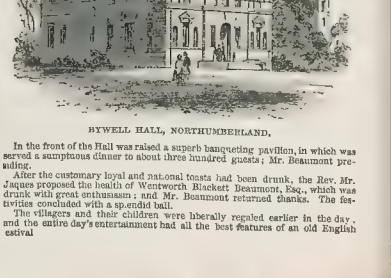
SENORA MARTINEZ, "THE BLACK MALIBRAN," AT HER MAJESTY'S THEATRE.

CELEBRATION OF THE MAJORITY OF WENTWORTH BLACKETT BEAUMONT, ESQ.

On Friday (yesterday week), the celebration of the auspicious event (which had been postponed from April last, in consequence of the indisposition of Mr. Beaumont) took place at Bywell Hall, Northumberland, under circumstances of no ordinary description. The arrangements were on a scale of great liberality. Independent, however, of which, few places could be chosen for such a festive occasion more replete with rich and picturesque scenery than Bywell and the surrounding country

The estate verges on the banks of the Tyne, at the romantic village of Bywell, so long the seat of the Beaumont family.

Among the most prominent scenic objects, stands as fine a model of a bridge as can be seen anywhere (spanning the Tyne from side to side), erected some years ago by the late Mr. Beaumont, at a cost of £15,000, and munificently presented to the county. Next in order, and jutting above the lofty trees surrounding it, are the towers of Bywell Castle, a Norman structure, an once the seat of the Nevilles, famed in Border warfare; beyond this is the salmon lock, the dam, and the mill, together with the well known Inn kept by Mr. Trotter, and celebrated for its hospitality and comfort to all who honour it with a visit. Then to fill up this sketch there are the ancient churches of St. Peter and St. Andrew, both hoary with age. Between these venerable piles lies the entrance to the lawn leading to Bywell Hall, a light and elegant stone building.



BYWELL HALL, NORTHUMBERLAND.

In the front of the Hall was raised a superb banqueting pavilion, in which was served a sumptuous dinner to about three hundred guests; Mr. Beaumont presiding.

After the customary loyal and national toasts had been drunk, the Rev. Mr. Jaques proposed the health of Wentworth Blackett Beaumont, Esq., which was drunk with great enthusiasm; and Mr. Beaumont returned thanks. The festivities concluded with a splendid ball.

The villagers and their children were liberally regaled earlier in the day, and the entire day's entertainment had all the best features of an old English festival

FINE ARTS.—NEAPOLITAN FISHER FAMILY. BY RIEDEL.

MOSAIC OF BELLEROPHON.

THE exquisite Mosaic, of which our Engraving gives a representation but, unfortunately, not being in colours, can give no idea of the softness and richness of the colour of the tesseræ composing the Mosaic—is, we believe, the most beautiful example remaining in Europe of the taste and skill of the Romans in such decorative pavement. It was discovered, some years since, at Autun, in France—the ancient Augustodunum—and was one of three pavements which marked the site of a villa or edifice of great richness of decoration, as other relics of antiquity, marbles, bronzes, &c., were found there also. Of these pavements, one, the subject of our Engraving, only has been preserved: it was the finest of them, and is truly admirable in expression and colouring; indeed so fine is it, that in France it has been imagined by antiquaries to be a re-production of some superb antique picture, rather than a design made for the purpose. The subject is Bellerophon mounted on Pegasus, which Minerva had added him with, and by whose help he killed the Chimera—the young Prince being represented in the act of destroying the monster.

The Mosaic is of tesseræ of stone and marble, not artificially coloured, and the utmost care was taken to detach it from the soil in which it had been imbedded for so many centuries, and to cement or fix it carefully to slabs of stone, so that it is now imperishable.

It is to be observed that the medallion of Bellerophon is not the whole of the pavement of one saloon or apartment, but only the chief portion of it. When discovered, the whole measured about 35 ft. by 30 ft., including panels of ornamental designs now removed.

The pavement was found at the depth of 9 ft. from the surface; and its discovery was owing to some workmen digging for stones for the purpose of [illegible]. Like Mosaic and many hundreds of the site of so many other similar relics of antiquity, inasmuch as, when first discovered, its value was not understood, and, therefore, it narrowly escaped destruction; but a building was erected over it, on the foundation of the Roman walls, and thus preserved it from the atmospheric and other changes; and thus the pavement which, 1800 years since, had formed the floor of a magnificent saloon, served the same purpose [illegible].

It is now exhibited by the proprietor, Mons. Dovet, at No 11, Pall-Mall, East.

THE NEAPOLITAN FISHERMAN'S SONG.

WHAT joy attends the fisher's life!
Eccomi! Eccolà!
The fisher and his faithful wife!
Eccolà!

When morning blushes from afar,
He takes his well-beloved guitar,
And sitting by the smiling sea,
He strikes its chords, and thus sings he—
Oh, happy may the fisher be!
Fidolin! lin! là!"

With steady keel and favouring gales,
Eccomi! Eccolà!
The fisher's harvest never fails—
Eccolà!
He drives no plough on stubborn land,
His fields are ready to his hand;
No nipping frosts his orchards fear,
No blights assail his gardens clear:
He has his autumn all the year—
Fidolin! lin! là!

The husbandman has rent to pay,
Eccomi! Eccolà!
And seed to purchase every day—
Eccolà!
But he who farms the rolling deeps,
Though never sowing, always reaps;
The ocean fields are fair and free,
They may be plough'd without a fee—
There are no rents upon the sea.
Fidolin! lin! là!

Then joy attend the fisher's life!
Eccomi! Eccolà!
The fisher and his faithful wife!
Eccolà!
And when his daily toil is over,
Still may he sing upon the shore,
"Oh, happy may the fisher dwell,
May fav'ring winds his bark impel,
And aye his nets be laden well!"
Fidolin! lin! là!—C. M

ROMAN MOSAIC OF BELLEROPHON AND CHIMÆRA.

The subscription to the Manchester monument in honour of the late Sir Robert Peel, although it has only been [illegible] a fund of above £1000 has been raised, wherewith to erect a statue of the late right hon. baronet.

A CLASS OF LETTERS TO BE DELIVERED ON A SUNDAY.—The following notice has been issued [illegible] command of the Postmaster-General. [illegible] and letter-receivers [illegible] another, dated [illegible] tion No. 21, 1850, relative to the discontinuance of the collection and delivery of letters on Sunday, it must be clearly understood that the regulations therein laid down do not apply to letters addressed to Cabinet Ministers or to the [illegible] letters must still be forwarded on Sunday by the ordinary despatch."

MUSIC.

CONCERTS.

At the morning concert, given at the Royal Italian Opera, on the 12th inst., in aid of the Italian refugees, Madame Pasta appeared for the last time, singing, with Mdlle. Parodi, Rossini's duo "Questo cor," from "Demetrio," and Pacini's aria "I tuoi frequenti palpiti," from "Niobe;" accompanied on the pianoforte by Signor Alari. Madame Pasta was encored both in the duo and aria, but it is to be hoped that this once great singer has taken her final farewell, her warmest admirers must have been pained by the melancholy signs of vocal decay. Rossini's "Guillaume Tell," Herold's "Zampa," and Beethoven's "Prometheus" overture, were played by the band, conducted by Costa; and Festa's madrigal "Down in the flowery vale," was sung by the chorus. The trio from "Semiramide," "La del Gange," sung by Lavia, Tagliafico, and Tamburini, and the finale of the third act of Rossini's "Zora" (Moïse), were the concerted pieces. Salnton and Piatti played the "William Tell" concertante duo admirably. The remainder of the scheme was filled up with popular solos and duets, by Mdlle. Parodi, Viardot, Madame Castellan, Mdlle. de Meric, Marzo, Tamberlik, Ronconi, Formès, &c. The event of the programme was the wonderful vocalisation of Viardot in the "Cenerentola" finale. "Non più mesta," which was one of the grandest displays of executive skill that we have ever heard.——Viardot, in a succession of novel, elegant, and striking cadenzas, in which the most intricate violin and flute passages were alternately sung, quite electrified the house, band and chorus joining with the auditory in the universal demand for the encore. On the second time, she changed the variations with amazing facility and grace.

Mdlle. Graumann, the vocalist, gave a *matinée musicale* on Monday, at the residence of Mr. Salaman, the pianoforte music by Herr Molique, Signor Piatti, and Mr. Salaman, in the instrumental department; and Mdlle. Rummel, Mdlle. Charton, and Signor Marchesi, in the vocal selections.

Madame de Lozano, whose clever singing of the melodies of her native country (Spain) is well known, gave her annual concert on Wednesday, at the Soho Theatre, with Signor Pilotti and Mr. Frelon as accompanyists.

Signor Biletta, the composer, and a singing professor of note, had his annual *matinée musicale* at the Queen Anne-street Rooms, several of his new popular compositions being included in the programme. The vocalists were——Madame Frezzolini, Mdlle. Bertrand, Misses C. Hayes, Birch, Dolby, Ransford; Signori Gardoni, Brignoli, Bazzardé, Coletti, Ciabatta, Marchesi, Belletti, Mr. Lefort, and Mr. Whitworth. The solo instruments were Mr. Herrmann, Mr. Lucas, and Signor Piatti (violoncello), and the accompanyists Signori Schira, Pilotti, Pinsuti, and Biletta.

MUSICAL EVENTS.—The dates for the Gloucester Musical Festival are Sept. 17, 18, 19, and 20. The Bishop of Gloucester and Bristol will be present at the meeting. The *artistes* already engaged are Sontag, Castellan, Misses Dolby and M. Williams, Messrs. Reeves, Lockey, and Phillips.——Mdlle. Lind will sing at Liverpool at two concerts in the Philharmonic Hall, on the 16th and 19th of August; on the 21st of August she will embark in the *Atlantic* steamer for the United States, accompanied by Mr. Benedict, Signor Belletti, and Herr Deichmann, the violinist.——Miss Louisa Pyne has been engaged by Merelli as *prima donna* for the Italian Opera in Vienna; the season commences in March next. We are pleased to record this flattering engagement of a vocalist whom we had so frequently the opportunity of praising during her career at the Princess' Theatre.——The notices of the new four-act opera, "Geneviève," produced at Leipzic on the 26th ult., are contradictory. The work is by Robert Schumann; it is admitted on all hands to be clever, but the non-contents declare that it lacks dramatic power.——Mdme. Laborde has renewed her engagement at the Grand Opera for three years.——Massol will appear in Auber's new opera, the "Prodigal Son."——Mr. Hatton, the composer and pianist, has returned to London from the United States.——In consequence of the death of the Duke of Cambridge, Herr Deichmann abandoned the concert he proposed to have given last Tuesday.——Mr. John Parry will present his "Notes" next Monday, at the Music Hall. Bellini's "Puritani" has been produced this week, at the Surrey Theatre, with Mdlle. Nau as *Elvira*, Miss Jane Coveny *Henrietta*, Mr. Travers *Arturo*, Mr. Borrani *Giorgio*, Mr. Salabert *Walton*, Mr. Delavante *Riccardo*, and Mr. G. Tedder *Bruno*.

THE LATE DUKE OF CAMBRIDGE.—Art and artists have lost a liberal patron in the late Duke. His Royal Highness was the Chairman of the last Festival of the Royal Society of Musicians, to which he was a generous subscriber. For many years he was one of the Directors of the Concerts of Ancient Music. he was President of the Musical Union: Vice-Patron of the Royal Academy of Music; Patron and President of the Melodists' Club; honorary member of the Catch Club; subscriber to the Philharmonic Society; Patron of the Central Fund, and Society of Female Musicians; and a constant visitor to both the Italian Opera houses. The late Duke was an excellent performer on the violin, and constantly was in practice with Mr. Henry Blagrove. The kind-hearted Duke was never sparing of his applause, and testified his gratification at some fine point in the execution audibly, to the amusement of the auditory.

THE THEATRES.

ROYAL ITALIAN OPERA.

Meyerbeer's "Prophète" was performed on Saturday night. On Monday there was a subscription night, the theatre being closed on Tuesday, on account of the Duke of Cambridge's funeral. On Wednesday "Otello" was the first second time, Tamberlik electrifying the house by singing C sharp in his chest voice. The famed *ut de poitrine* of Duprez was *C natural*; so that the Italian tenor has surpassed the prodigious feat of the French singer. On Thursday the "Prophète" was given for the seventh time. Next Thursday Scribe and Halévy's five-act opera, "La Juive," will be performed for the first time; Mario will be *Eleazar* the dev, Tamberlik *Prince Leopold*, Massol *Ruggiero*, and Ronconi *Cardinal de Brogni*. Mdlle. Cruvelli will be *Eudoxie*, and Viardot as *Rachel la Juive*. The *mise en scène* is described as surpassing in gorgeousness any former displays at this establishment.

DRURY-LANE.

Mrs. Glover's farewell benefit on Friday week was marked by especial circumstances, calculated to excite an interest in the career of this veteran performer. Her cause was assisted by the presence of our greatest performers, and a crowded audience assembled to testify the public sense of the *beneficiare's* merits. It was announced that Mrs. Glover should pronounce a farewell address, which had been prepared, but this her excessive sensibility prevented her from doing. The audience readily accepted an apology; and when the curtain was re-drawn, and exhibited "the mother of the stage" seated in a chair, and surrounded by the most illustrious members of the profession, their admiration was unbounded.

With deep regret we add that within four days of this popular demonstration in her honour, Mrs. Glover ceased to be among us. For the fortnight antecedent to Friday she had been confined to bed. She died, nevertheless, determined to keep faith with the public, and appear at her benefit; and to her carrying this resolve into effect is attributed her death. The distressing event took place on Saturday or Tuesday morning, as was, happily, unaccompanied by any perceptible evidence of physical suffering.

Next week we shall present our readers with a Portrait and Memoir of this celebrated actress

NATIONAL SPORTS.

Following upon a dull one—of which, by the way, some country stewards might have availed themselves, instead of waiting until autumn, when their meetings will inevitably clash with one or more of the monster gatherings—we shall have, in the week, a tolerably busy week. Canterbury and Winchester both commence on Tuesday, and each with a moderate programme, for two days; Wenlock will be confined to one day Tuesday; Rochdale on Thursday, and Guildford, Odiham, and Bridgenorth on Friday. That Guildford should still be thrown away at such a wretched meeting as Guildford, is a disgrace to the Master of the Horse.

The water-sports will keep the metropolitans on the *qui vive* for four days out of the six, commencing on Monday with the Barkside Regatta (Southwark); the Bill Inggsate and Wapping Regattas on the following day, and the St. Katherine's on Wednesday; the Champion four-oared race, and the Below-bridge (apprentices) match, come off on Friday.

The Cricket fixtures in town and country are so numerous, that we may as well give them in the shape of a calendar

Monday—At Lord's: The Gentlemen v. Players. At Wimbledon: South-London v. Windsor and Eton House Park: Hampstead v. the Farm: Hampstead v. Oval at Barnes: Peckham v. Beckenham: Kennington v. Clapham.

Wednesday—At Kennington Oval: Surrey Paragons v. Peckham Rye. At Liverpool, 11 of Liverpool against 9 of Liverpool Club.

Thursday—At Denne Park: 1 Zingari v. Denne Park Eleven. Kennington Oval: 14 of Surrey v. most 11 of England. At Copenhagen, return match between the Albion and Rickmansworth Club

Friday—The annual Juvenile match at Barton

TATTERSALL'S.

MONDAY.—A slack day, but not altogether an unimportant one, as Windischgratz became what is vulgarly termed "a pot" for all his engagements, to the detriment of the layers of odds on the favourite. Report that he may find the weather too hot or the ground too hard before Goodwood.

GOODWOOD STAKES.	
6 to 4 agst Windischgratz (t)	12 to 1 agst Woolycombe (t)
9 to 1 —— Bruno	Out-to-night (t)
	30 to 1 —— Buchanalian (t)
GOODWOOD CUP.	
3 to 1 agst Windischgratz (t)	5 to 1 agst Canezou
ST. LEGER.	
7 to 4 agst Voltaire	7 to 1 agst Windischgratz
7 to 1 —— Cloucher	11 to 1 —— Bolleybroke
DERBY.	
9 to 1 agst Gresham	20 to 1 agst Marlborough Buck
17 to 1 —— Hippolytus	(t)
	40 to 1 agst Juggernaut (t)

THURSDAY.—No business transacted.

NOTTINGHAMSHIRE HANDICAP of 20 sovs each, with 200 added.—Mdle of Meadows, 1. Maid of Team Valley, 2.

TWO-YEAR-OLD STAKES.—Payment, 1. Light Weight, 2.

SHERWOOD STAKES of 5 sovs each, and 50 added.—Mr. Shepherd's Alp walked over

PLATE of 50 sovs.—Michael Brunton, 1. Alp, 2.

WEDNESDAY.

The CHESTERFIELD HANDICAP of 15 sovs each.—Vanguard, 1. Penthesilea, 2

The QUEEN'S PLATE of 100 guineas.—Maid of Team Valley, 1. Maid of Lyne, 2.

SWEEPSTAKES of 5 sovs. each, with 50 added Unity, 1. Vigilant, 2.

STAMFORD RACES.—WEDNESDAY.

The STAMFORD ST. LEGER STAKES of 25 sovs each.—Duke of Richmond's Officious, 1. Lord Exeter's Clelia. 2

SWEEPSTAKES of 20 sovs each. Lord Clifton's Beaufort. 1. Lord Exeter's Midas, 2.

The HUNTERS' STAKES of 5 sovs each.—Mr. Rayner's Pulcherrima, 1. Mr. Treherne's Coglia, 2.

The BURGHLEY STAKES of 25 sovs. each.—Lord Exeter's Little Jack, 1. Lord Clifton's Wanota, 2

£250 given by Lord Exeter.—Captain Lowther's Watchdog, 1. Mr. Lister's Peasant Girl, 2

LAMBETH REGATTA.

Twelve free watermen belonging to St. Mary's, Lambeth, amongst whom were many who have distinguished themselves in various contests upon the Thames, contended on Monday for a purse of sovereigns, given by the ladies and gentlemen of the neighbourhood. The race was in two heats, six pairs of oars, and some thousands of persons assembled to witness it.

GRAND HEAT.—James Maynard and William Perry (Green), 1. William Wilson and John Maynard (Pink), 2.

FULHAM REGATTA.

The periodical contest amongst the watermen belonging to Fulham, for a purse of sovereigns subscribed by the nobility and gentry of the neighbourhood, took place on Monday in the afternoon of Mr. T. S. Walford, a well known aquatic amateur, and Mr. W. Cuscmore, an influential patron of aquatics. It was a double scull match, in three heats, and was throughout capitally contested.

FINAL HEAT.—James Maynard and John Kelly, sen. (Pink) 1. Joseph Powell and John Phelps (Green) 2.

THAMES BOAT-RACES

The second of the series of periodical races under the above title, in lieu of the Royal Thames Regatta, took place on Wednesday evening over the old course at Putney, the great contest for the cost, badge, and freedom, annually presented by Mr. Evan Morris for young watermen in the sixth or seventh year of their apprenticeship, and which has been the foundation of many a distinguished first-rate sport, and has been watched with considerable interest, as bringing out the best men of the season. The scene was altogether most gay and animated; thousands of spectators had assembled upon the shore at various points where the best view could be obtained of the rowing, while the river was studded with boats of every description, from the patrician eight down to the humble dingy. There were three heats, the following is the result of the

GRAND HEAT.—J. M. Mackenney, Twickenham (Green) 1. G. Shaw, Westminster (Red), 2.

A match at cricket came off at Sutton-in-Ashfield, on Tuesday last, which caused much amusement. The competitors were two females, one married and the other single; and the single beat, having scored one notch, and the married none.

MONETARY TRANSACTIONS FOR THE WEEK.

(From our City Correspondent.)

Business in the English market during the week has been nearly limited to settling the Account, which nominally closed on Wednesday. The tendency has been rather buoyant, but the readiness with which money could be borrowed at one-and-a-half per cent. upon the security of stock operated favourably for those who were obliged to accept it, or continue. Continuations were about 3-16 per cent. One-eighth per cent. has been paid for carrying over bullion during the Account, the highest price having been 97, and the lowest 95⅞. The week's prices of Consols have only varied between 96⅝ ⅜ and 97 to ⅝, in both cases for Money. Consols being now exhausted, Exchequer Bills have been purchased by the Government broker during the week; that market is, consequently, a trifle firmer. India Bonds quote a few shillings advance, the result of temporary investments made out of the payment of the dividends. At the close of the week the market appeared flat, a year appearing the favourite Price at the end of the week were, for Buenos Ayres Bonds, 6 per Cent., Act. 85⅞; Mexican, 5 per Cent., 1846, ex Jan. Coupons, 29⅝; Ditto, Account, 30⅛; Peruvian Bonds, 4½ per Cent. Account, 82; Ditto, Deferred, 35¾; Russian Bonds, 111½; Ditto, 4½ per Cent., 1822, Account, 97⅜; Dutch 2½ per Cent., 19 Gulph., 57⅜; Ditto. 4 per Cent. Certificates, 88⅜.

Shares are a trifle firmer, but without any increase of business, the general feeling being to wait for the half-yearly meetings. Closing quotations are, for Aberdeen, ¾; Ditto, Preference, 1⅛ dis.; Buckinghamshire, 17⅞ x. l.; Caledonian, 7⅛; Ditto, New £10 Preference, 9; Chester and Holyhead, 1⅛ dis.; Ditto, New, 1½ dis.; Eastern Counties, 1⅛ dis.; Eastern, Five per Cent., No. 1, ⅜ x. l.; Ditto, Ditto, No. 2, ⅜ p.; East Lancashire, 6⅞; East Lincolnshire, Guar. Six per Cent., 29, x. l.; Great Northern, 8⅜ x. l.; Ditto, Five per Cent., 104; Ditto, 4½ per Cent., Brighton, and South Coast, 80⅞; Ditto, New, Guaranteed Six per Cent., 146; London and North-Western, 99⅜; Ditto, New, Quarters, 17⅜; London and South-Western, 55; Manchester, Sheffield, and Lincolnshire, New £10 Pref., 8½; Midland, 33⅝; Ditto, £50 Shares, 9⅜ x. l.; Ditto, Consolidated Bristol and Birmingham, Six per Cent., 120⅜, 2 x. l.; Norfolk, Ext., Guar. 6 per Cent., 17⅜ x. l.; N. British, 5½; Do., Pref., 4⅜; N. Staffords., 9⅛; Shrewsbury and Chester (Oswestry), 5¼; South-Eastern, Registered No. 4, 8¾; South Wales, 90; West Yorkshire, Six per Cent., Guaranteed, 93½; Wilts, Somerset, and Weymouth, 40¾ x. l.; York, Newcastle, and Berwick, 14⅜; Ditto, Newcastle Extension, 8½; Ditto, G. N. E., Preference, 4 x. l.; York and North Midland, 14⅜; Ditto Preference, 7⅜; E. Hooligans and Ambens, 7⅛; Great Indian Peninsular, 1; Northern of France, 14⅜; Paris and Rouen, 23½; Paris and Strasbourg, 6⅜; Sambre and Meuse, —.

SATURDAY MORNING.—Consol Market was flat yesterday, in consequence of money sales. At closing, the price was 96⅞ ⅜ for money, and 96⅝ ⅜ for Account. In the Foreign Market, there was nothing of importance: Peruvian, 84½ 82. Shares were dull.

THE MARKETS

CORN EXCHANGE (Friday).—The quantity of English wheat received fresh up on this morning's market, coastwise, was moderate, and that of foreign was but a large portion of Monday's unsold supply was on offer. Owing to the showery weather, factors were tolerably firm in the early part of the day, but subsequently they were compelled to accept 1s per quarter less money for the middling and inferior kinds of wheat than was obtained last Monday. Barley 17,000 quarters of foreign wheat have come in this week. For all descriptions the demand was wholly in retail, and the currencies were nearly the same as on Monday. Scarcely a sample of English barley was shown, but the supply of foreign was good. Malting parcels were held to full prices. In other kinds, scarcely anything doing. The quantity of malt actually sold is 1,950 quarters; yet last week's arrivals were barely supported. Very few home-grown oats were received, but no less than 31,000 quarters have arrived from abroad. Good seed oats were quite as dear, but damp qualities were easier. Beans, peas, Indian corn, and flour were excessively dull.

ENGLISH.—Fresh wheat, 1820; barley, 40; malt, 1130; oats, 890; flour, 2910.

IRISH.—Wheat, 610; barley, 2850; oats 31 540; flour, ——quarters.

FOREIGN.—Wheat, 17,000 quarters; barley, 4; oats, 4; flour, 4.

Norfolk and Suffolk, red, 38s to 42s; ditto, white, 41s to 43s; rye, 25s to 26s; grinding barley, 19s to 21s; malting ditto, 34s to 36s; Kingston and Ware, 42s to 45s; Chevalier, 42s to 44s; Hertfordshire and Essex, white, 42s to 45s; Kingston and Ware, 40s to 42s; Chevalier, 42s to 44s; Hertfordshire and Lincolnshire feed oats, 15s to 18s; potato ditto, 17s to 19s; Scotch and Cork, black, 14s to 16s; ditto, white, 16s to 18s; tick beans, new, 30s to 32s; ditto, old, 34s to 37s; grey peas, 32s to 34s; maple, 34s to 36s; white, 32s to 34s; boilers, 35s to 37s per quarter. Common flour, 34s to 40s; fine ditto, 42s to 46s; Suffolk and Essex, 40s to 44s, per sack. Foreign: Dantzig red wheat, —s to —s; white, —s to —s; barley, —s to —s; oats, —s to —s; beans, —s to —s; peas, —s to —s, per quarter. Flour, American, 29s to 32s per barrel; household ditto, 24s to 26s per barrel.

The Seed Market.—The demand for all seeds is still exceedingly inactive, and most kinds may be purchased on lower terms.

Imperial Weekly Average.—Wheat, 41s 3d; barley, 21s 3d; oats, 16s 11d; rye, 22s 3; beans, 27s 8d; peas, 26s 5d.

The Six Weeks' Average.—Wheat, 40s 6d; barley, 21s 10d; oats, 16s 9d; rye, 21s 10d; beans, 26s 11d; peas, 26s 6d.

Duties on Foreign Corn.—Wheat 1s 0d; barley, 1s 0d; oats, 1s 0d; rye, 1s 0d; beans, 1s 0d; peas, 1s 0d.

TEA.—The private contract market is well supplied with most kinds of tea, in which a steady business is going on, at full prices. Consuming Congou is selling at 11d to 11d per lb. 3000 packages have been disposed of by public sale, at fully late prices.

SUGAR.—For most kinds of colonial sugar, the demand is decidedly steady, at fully last week's quotations Refined goods are in request. Brown lumps, 49s; and good to fair grocery, 46s 6d to 48s per cwt.

Coffee.—Fine native kinds have given way 1s to 2s per cwt Good ordinary native Ceylon is selling slowly, at 49s. In foreign qualities very little doing

Rice.—Fine Bengal, 10s 6d; fine Patna, 12s per cwt. Otherwise, the market is in a very inactive state.

Lard.—Our market is very unsettled, and prices are on the advance

Provisions.—For Irish butter the demand has become steady, and last week's prices are well supported. Carlow, Kerry, landed, 86s to 88s; Cork, 82s to 87s; and Limerick, 82s to 85s per cwt. Foreign butter has improved in value 4s to 8s per cwt. At that advance very little is doing. Fine Friesland, 68s to 70s per cwt. English butter moves off freely, and fresh has advanced 6d to 1s, per dozen lbs. Fine weekly Dorset, 76s to 78s. Inferior, 56s to 66s; fine Devon, 60s to 66s, inferior, 48s per cwt. fresh, 8s to 10s 6d per dozen lbs. Irish bacon a very dull sale, at 1s to 2s per cwt less money. Prime sizeable Waterford, landed, 57s to 60s; heavy, 56s to 57s per cwt. Lard, steady. Waterford, bladdered, 50s to 52s; Belfast, in firkins and kegs, 5s to 4s per cwt.

Tallow.—Our market is steady for the time of year P. Y. C. on the spot, 36s 6d to 36s 9d, and our delivery, 37s 6d per cwt. Town tallow, 35s to 35s 6d per cwt not cash

Spirits.—Very little is doing in Scotch, yet the importers will not sell except at very full prices Leeward Island rum steady, at 1s 4d to 1s 4½d proof. The best brands of cognac, of late vintages, 2s 6d, 1s 4s 6d to 4s per gallon

Oils.—For export as well as for home use, the demand is in a very sluggish state; but we have had no change in the value of anything.

Hay and Straw.—Old meadow hay, £2 10s to £3 10s; new ditto, £2 5s to £3, 0 d clover, £3 10 £4 5s; new ditto, £2 10s to £3 5s; and straw, £1 7s to £1 8s per load

Wool.—The next public sales will commence on the 23rd proximo. Large importations continue to take place, yet the private contract market is steady, at full prices.

Potatoes.—The supplies of both English and Scotch potatoes are increasing, yet a good business is doing, at from 70s to 90s per ton.

Coals (Friday).—Lambton, 14s 6d; Hetton Kellioe, 14s 6d; West Kellioe, 14s; South Durham, 14s 3d; Tees, 13s 3d; Stewart's, 13s 3d per ton.

Cattle.—Although the accounts from the plantations are favourable, the demand for the best hops of last year's growth is steady, at full prices In all other kinds scarcely any business is doing.

New Mid and East Kent pockets, £8 2s to £10s; Weald of Kent ditto, £7 10s to £7 7s; Sussex ditto, £6 5s to £6 15s; Yearlings, £1 15s to £4 us; Old hops, £1 0s to £3 0s.

Smithfield (Friday).—There was a very limited supply of beasts on to-day's market than on Friday last, and its general quality was inferior. Owing to the warm weather all breeds of cattle moved off heavily, and some unsaleable animals remained. The sheep had a downward tendency, without offering a clearance. For the time of year the numbers of sheep were good, nevertheless the demand was extremely inactive, and the trade altogether firm, at Monday's decline in value. Prime Down lambs were scarce, and in moderate request, at late rates. Otherwise the supply was large. The quality of calves was tolerably good, which moved off slowly, at late rates In pigs scarcely any business was doing, at from our previous currency.

Beasts, 3,740; sheep and lambs, 23,000; calves, 316; pigs, 290. Foreign supplies: Beasts, 84; sheep and lambs, 810; calves, 10s. Beasts, 3,740; sheep, 80.

Newgate and Leadenhall (Friday). These markets are in a very depressed state, and prices were not supported.——

Per 8lb to sink the offal—Coarse and inferior beef, 2s 6d to 2s 8d; middling ditto, 2s 8d to 3s 8d; prime large ditto, 2s 10d to 3s 0d; prime small ditto, 3s 2d to 3s 4d; large pork, 2s 10d to 3s 4d; inferior ditto, 2s 8d to 3s 0d; middling ditto, 3s 2d to 3s 4d; prime ditto, 3s 6d to 4d; prime coarse-woolled ditto, 3s 4d to 3s 6d; prime South Down ditto, 3s 8d to 3s 10d; large coarse calves, 2s 6d to 2s 10d; prime small ditto, 3s 0d to 3s 6d; large lambs, 3s 8d to 4s 0d; small ditto, 4s 2d to 4s 4d; lambs, 3s 8d to 4s 8d. Suckling calves, 16s to 22s; and quarter-old store pigs, 18s to 24s. Total supplies: Beasts, 740; calves, 110; sheep and lambs, 14,000; calves, 316; pigs, 290. Foreign supplies: Beasts, 84; sheep and lambs, 810; calves, 10s. Beasts, 740; sheep, 80.

Newgate and Leadenhall (Friday). These markets are in a very depressed state, and prices were not supported.——

Per 8lb to sink the offal—Inferior beef, 2s 6d to 2s 6d; middling ditto, 2s 8d to 3s 8d; prime large ditto, 2s 10d to 3s 0d; prime small ditto, 3s 2d to 3s 4d; large pork, 2s 10d to 3s 4d; inferior ditto, 2s 8d to 3s 0d; middling ditto, 3s 2d to 3s 4d; prime ditto, 3s 6d to 4d; prime coarse-woolled ditto, 3s 4d to 3s 6d; prime South Down ditto, 3s 8d to 3s 10d; large coarse calves, 2s 6d to 2s 10d; prime small ditto, 3s 0d to 3s 6d; large lambs, 3s 8d to 4s 0d; small ditto, 4s 2d to 4s 4d; lambs, 3s 8d to 4s 8d. Suckling calves, 16s to 22s; and quarter-old store pigs, 18s to 24s. Total supplies: Beasts, 740; calves, 110; sheep and lambs, 14,000; calves, 316; pigs, 290. Foreign supplies: Beasts, 84; sheep and lambs, 810; calves, 10s. Beasts, 740; sheep, 80.

Newgate and Leadenhall (Friday). These markets are in a very depressed state, and prices were not supported.——

Per 8lb to sink the offal—Inferior beef, 2s 6d to 2s 6d; middling ditto, 2s 8d to 3s 8d; prime large ditto, 2s 10d to 3s 0d; prime small ditto, 3s 2d to 3s 4d; large pork, 2s 10d to 3s 4d; inferior ditto, 2s 8d to 3s 0d; middling ditto, 3s 2d to 3s 4d; prime ditto, 3s 6d to 4d; prime coarse-woolled ditto, 3s 4d to 3s 6d; prime South Down ditto, 3s 8d to 3s 10d; large coarse calves, 2s 6d to 2s 10d; prime small ditto, 3s 0d to 3s 6d; large lambs, 3s 8d to 4s 0d; small ditto, 4s 2d to 4s 4d; lambs, 3s 8d to 4s 8d. Suckling calves, 16s to 22s; and quarter-old store pigs, 18s to 24s. Total supplies: Beasts, 740; calves, 110; sheep and lambs, 14,000; calves, 316; pigs, 290. Foreign supplies: Beasts, 84; sheep and lambs, 810; calves, 10s. Beasts, 740; sheep, 80.

NORTH SURREY INDUSTRIAL SCHOOLS, AT ANNERLEY, SURREY

The melancholy event that took place at the late Mr. Drouet's establishment, at the early part of the last year, will do good to the rising and future generations of superior children, by attracting the attention of the public to the manner in which those establishments were conducted, and producing a very general and just prejudice against the system of "farming out" pauper children, and, in consequence, an act (7 and 8 Vic. c. 101) was passed to enable Boards of Guardians in populous unions to undertake the erection of schools, away from work, houses, for the education of these children

The guardians of the Wandsworth and Clapham, Croydon, Kingston, Richmond, and Lewisham Unions, were the first to set a good example to the rest by forming a district school for the education of the children of the sick and destitute, and more efficiently carrying out their object; they purchased 50 acres of land by the Annerley station of the Croydon Railway in the county of Surrey; and they have erected, from the designs and under the superintendence of Mr. Charles Lee, of Golden-square, London, buildings for the proper accommodation of 600 children, which will be ready for occupation in two months

The establishment will be strictly industrial, and no pauper officers or servants will be allowed on the premises. There are three large school and class-rooms, with apartments for school mistresses, school and trade masters, for steward, matron, nurses, and servants, and a spacious dining-room, chapel, chaplain's room (for examining and instructing the children), lavatory, wash-room, cutting-out, work and store-rooms; two receiving wards, with bathes-rooms and baths attached; two kitchens, scullery, servants' hall, and private rooms; infirmary, nurses, and servants' rooms, with bathes and lavatory; a separate lunary building, with drying, ironing, mangling, and mending rooms; likewise a detached infirmary-building, containing eight wards, nurses' day and night-rooms, surgery, kitchen, bathe-room, &c. There are also baker's house and offices, dairy, cowhouses, and other farm buildings; likewise large gardens; so that the boys will be instructed in trades, farming, and gardening, and the girls in the duties of domestic servants, such as cooking, washing, mending, and the thoroughly ventilated by flues and shafts. The boys', girls', and infants' departments are quite distinct; and as the servants in the house are to be women, to allow the girls of practice in cooking, and house-work, and the whole is considered a model for other districts.

GREAT FIRE AT SAN FRANCISCO.

By the United States mail, received on Wednesday morning, a correspondent has forwarded us a *Lithograph* of a conflagration, which took place at San Francisco on the night of May 4, and intelligence of which had been received in New York just prior to the mail leaving on the 3rd inst. The lithograph is roughly executed, but it shows, by one, as well as view, the extent of the conflagration, stated to have consumed 400 buildings.

The View represents the fire as seen from Portsmouth square.

Another Correspondent sends the following hints for gold-seekers:—"A man going to the diggings could not do wrong in bringing a canvas tent, lined, to hold four. I would not go in company with more than that number. All companies have quarrels, and parted before reaching this place. The quarrels I have had with mine I have witnessed are awful. I ought to state that the fare to the "diggings," by per steamer (from New York), fifty dollars; and the lowest conveyance costs £2. The commonest men sail up. The *Tennessee* steamer, from Panama, two days ago, brought 581 passengers."

NEW BOOKS, &c.

NOW READY,
ONGFELLOW'S POEM, "The VOICES of the NIGHT," illustrated by a Lady. Price 10s. 6d. boards.

Just ready, price 10s 6d, cloth lettered,

METCALFE and CO.'s new Establishment, 130B, Oxford-street.—Observe, 130B, Oxford-street, Corner of Vere-street.

DECORATIVE PAPER-HANGING MANUFACTORY and General FURNISHING ESTABLISHMENT and FLOOR-CLOTH WAREHOUSE, 491, Oxford-street.—The Proprietors beg to announce that their Paper-Hangings (made by an entirely new process), fixed up on the walls of the Great Exhibition, and pronounced to Parody, by the Jury, in a style of artistic arrangement, and for every kind of room. In addition, they have added to their stock other superior Patterns (many in plain figures the price), giving at one view a drawing-room 8 for reception-room and other Paper-Hangings, 4d per yard. French and all Foreign Hangings (of the same description as those fixed in the Palace), at 3s to 3s 6d per yard. Best warranted Floor-Cloth (8 yards wide), cut to any dimensions, 2s 6d per yard. N.B. 491 next door.

PAPER-HANGINGS.—COTTERELL BROTHERS, 500, Oxford-street, a few doors from Holborne, invite attention to the very superior character of their PAPER-HANGINGS, selected with much care from all the principal French and English manufacturers. A stock of from 30,000 to 50,000 pieces is always on hand, so that they can supply any quantity of every grade, name, and colour, for immediate use. Parties in the country should write for the Tokens of Patterns, which, with a variation of Lists, dated 1850, will be sent post-paid on application. COTTERELL BROTHERS display quite designs for walls and ceilings are well worth the inspection of persons of taste. The Oxford-street Paper Hanging Warehouse, No. 500, a few doors from Holborne; also at Brixton, and Bath

BATHS of HOMBURG, near FRANKFORT-ON-THE-MAINE.
The Mineral Waters of Homburg take their rise at the foot of the Taunus mountains, two hundred yards below the level of the sea. To the original springs, the reputation of which is so perfectly established in Germany, there have been recently found fresh sources, which, from the intensity of their mineralisation and the energy of their action on certain morbid cases, have elevated them to the first rank among the known mineral waters of Europe.
The springs of Homburg are five in number. They have been analysed by the celebrated Professor [illegible] and [illegible] considered as the

[illegible]

The Kursaal, or Public Assembly Room, is magnificent, and the Theatre of Homburg are stimulant, tonic, alterative, and aperient. They are suited to all cases requiring an aperient or bloodless state of the stomach and other intestines, by giving a powerful stimulus to those organs, and thereby increasing the secretion and circulation, to assist the excretory processes, and to regularise menstruation and assimilation, which are generally deficient in dyspepsia, enlargements of the liver, in affections of the spleen, in hypochondria, jaundice, the haemorrhoidal complaints, and constipation. In gout and all affections produced by derangement of the digestive functions, most beneficial results are derived from them.
During the eight years which have elapsed since these springs first obtained their celebrity, the city of Homburg has greatly improved. A new town has grown up on the east side of the old, and new hotels and private houses afford to visitors all the comforts required by invalids, and which is not to be found at the most favourite watering-places.
The forests, which surround Homburg like a rich zone, are pierced with rides and drives by which the residents at the Baths may, with ease and pleasure, visit the Falkopf, the Rock of Elisabeth, Luther's Oaks, and all the picturesque sites of the Taunus.
The Kursaal, this grand Establishment have constructed a magnificent Casino, which, for the beauty of its arrangement, the commodious of its distribution, and the richness of its decorations—surpasses any building hitherto erected in any part on the side of the old town. It contains splendid saloons for balls and concerts, rooms for the games of Trente et Quarante and Roulette (where a Cabinet for reading, in which are most of the German, French, English, Russian, Belgian, and Dutch journals, a Coffee-room, a Divan for smoking, openings on to a fine terrace laid with asphalte, and a grand Dining-room with a table d'hote, served in a Francaise, twice a day, viz. at 1 and 5 o'clock.
An excellent Orchestra performs three times a day; in the morning at the Springs, in the afternoon on the Terrace of the Casino, and in the evening in the grand Ball-room
Concerts, Balls, and Fêtes of every description succeed each other without interruption.
The Directors speak from an unwillingness to remove this watering-place as delightful as possible to its visitors, and to this end have rented about 50,000 acres of forest, fields, and plains, all abounding in game of every description, and which serve as a nearer Park for the Grandes Chasses at the close of the winter season. The Casino of Homburg is the only establishment of the kind that has enjoyed hitherto the privilege of remaining open all the year, and the continuation of its tables for pay its halls, its concerts, and its burning parties throughout the winter season, make it attract a numerous and select society from every quarter of Europe, and there is now a great number of strangers of distinction there.
The Journey from London [illegible] Ostend, Cologne, Mentz, and [illegible] Frankfort to Homburg is got over in one hour and a half. Mail Coaches and Omnibuses run between these places every hour.

NEW MUSIC.

NEW SONGS.—"THE RICH MAN'S BRIDE" "THE KILLER'S FAREWELL," "THE STRANGER'S GRAVE." Price 2s. each (post postage free).
These songs are by the author of "Will you love me then as now." &c. They form a series of charming melodies, and are exceedingly graceful and effective. "The Rich Man's Bride" will be an immense favourite; both are simple and pretty in every superior description, and calculated to remain in a permanent favourite.
DUFF and HODGSON, 65, Oxford-street

NEW POLKA.—The VERY LAST POLKA, composed by F. BERNARD, price 2s 6d (post-free). This original and characteristic polka, performed by J. Wellpert's band at her Majesty's last Bal Costumé, June 28, at Buckingham Palace, was one of the most effective and attractive compositions of the night. It is supposed to be the last dance at the ball, and is descriptive of the clock striking, regret at parting, resolution of making the last not the least merry, &c. The pianoforte copy is exceedingly well adapted to dancers. DUFF and HODGSON, 65, Oxford-street.

NEW PIANOFORTE MUSIC.—"LE PRO-[illegible]

street, and 67, Paternoster-row. N.B. New editions of "Partlett," "Home, Sweet Home," [illegible] "Last Rose of Summer," &c. each 1 arranged and corrected by the Author. A specimen of these pieces may be had gratis.—Also May 11, 1850.

CHESS.—A Lady, proficient in this fashionable and interesting pastime, ATTENDS LADIES requiring INSTRUCTION, in London and its vicinity. High references given and required. Address, A. Hamburg-square.

FROM FIFTY to SEVENTY GUINEAS, according to acquirements, are the inclusive TERMS of a LADY who receives Ten Pupils. A resident French and German Governess and eminent Masters. For particulars address (pre-paid) to D., care of Mr. Griffin, Physician, Museum, 83, Baker-street, Portman-square.

ITALIAN FRESCO PAINTING and DECORATIONS.—MESSRS. GALLI and COTTI have just completed two rooms at Buckingham Palace, and having now at their disposal every convenience, they are desirous to be favoured with orders for the execution of decorations either in Oil Fresco or Water-Colour. (Distemper)

REGENT HOTEL, LEAMINGTON.—THOMAS [illegible] respectfully solicits the attention of the nobility and gentry visiting Leamington to the above Establishment, which he has recently undergone very extensive alterations, by which he is enabled to offer improved accommodation at very moderate charges. A tariff is placed in each room, including every item necessary for the comfort and convenience of those who may be pleased to favour the Regent with their support; and in preparing this tariff, the Proprietor has endeavoured to satisfy the public generally of the great advantages this hotel now offers.

THE LONDON and WESTMINSTER BANK issues CIRCULAR NOTES, for £10 only, for the use of travellers and residents on the Continent. These Notes are payable at every important place in Europe, and thus enable a traveller to vary his route without inconvenience, or to expose a sovereign, and when cashed no charge is made for commission. They may be obtained at the Head Office of the London and Westminster Bank, in Lothbury, or at its branches viz 1, St. James's-square; 214, High Holborn; 3, Wellington-street, Borough; 87, High-street, Whitechapel; and 4, Mansion-place, Oxford-street.
J. W. GILBART, General Manager

CHEAP PLEASURE TRIP.—Fares: First Class, 6d, Second Class, 4d.—Persons really desirous of enjoying themselves should, on Sunday next, HALF-HOLIDAY, North Woolwich Trams leave Shoreditch Station at a quarter before and a quarter past every hour except at a quarter past 12 and a quarter before 1, and from North Woolwich at the same times, and a quarter before Ten at night. Shuttles, Carts, &c., on a peasant laws sloping down to the Thames.

STEAM PLEASURE-YACHT for SALE.—The Iron Hull, with or without Boiler and Engines, or the whole complete, as required. TOLLBAR-KEEPERS.—A Committee is formed for the relief of a large class of persons now employed on the high-roads of England keeping turnpike-gates. These men are employed night and day without intermission, and at present cannot leave even for a minute on Sundays. Their number is 30,000, double the number of persons employed in the different post-offices, and whose postal duties seldom exceed one hour a day or even less on Sundays. It is proposed that money should be given to throw open the turnpike-gates on sundays, or that they should be permanently closed on Sundays. Subscriptions to be sent to Peto's Coffee-house, Fleet-street

DRAWINGROOM, LIBRARY, and DINING-ROOM ORNAMENTS, consisting of Vases, Groups, Candlesticks, Tea-us, Watch-stands, Inkstands, Tazzas, &c., &c., imported and manufactured by J. TENNANT (late MAWE), 149, Strand, London.

THE NORTH SURREY INDUSTRIAL SCHOOLS, AT ANERLEY.—(SEE PAGE 66.)

GREAT FIRE AT BRISTOL.

GREAT FIRE AT BRISTOL.

On Monday night, soon after nine o'clock, great alarm was spread throughout the city of Bristol by the reflection in the sky of a large body of flame in the direction of the railway terminus. On arriving at Bath-bridge a terrific scene presented itself. At Hillsbridge-wharf, situate just over the bridge, on the Avon, Messrs. Hare and Co., the extensive floor-cloth manufacturers of that city, have three japanning houses, lying in line, and undetached. They were filled with floor-cloths in different stages of preparation, and consisted of the varnishing and drying departments. In the first-named of these, the farthest of the line, an immense fire was raging, sending up large flashes through the half-consumed roof high up into the atmosphere, and spreading myriads of sparks in all directions. A light smoke hung in a wide-spreading canopy over the burning mass. Between the spectator and the fire lay the bridge of the Bristol and Exeter Railway, an airy-looking structure, upon which, at the moment, one of the railway engines was standing. At some distance in the rear, a vast mass of dense sombre clouds had gathered, from which every now and then the lightning flashed vividly, making even the fire pale by contrast. Added to all this was the tumultuous noise of the fire-engines, which came up in quick succession and dashed into the yard, followed by hundreds of people, shouting, hooting, and giving utterance to a complete Babel of sounds. There could not have been less than 15,000 or 16,000 people who had assembled in St. Philip's, in front of the Cattle Market, and other available spots where a view of the conflagration could be had.

It unfortunately happened that the tide was out; and no means of obtaining a good supply of water being elsewhere obtainable, the Norwich, as well as the other engines which subsequently came up—viz. the West of England, the Sun, the Imperial, the Police, and Mr. Carter's, of Clifton—were unable to make any impression upon the flames.

About eleven o'clock, the fire had attained its greatest height, and uneasiness on account of the contiguous property was proportionately increased; but, owing to the extreme calmness of the night—there not being air enough in motion to stir a leaf—the flames and sparks flew upwards, and were not directed at all towards the other buildings; and the firemen, being thus left comparatively at liberty to check the operation of the heat on the side next the fire, effected that which a very light wind would probably have prevented, namely, confined the fire to the building in which it originated. A heavy shower of rain fell at twelve o'clock, and, continuing for some time, effectually stayed the flames, and at half-past four they had subsided so much, that several of the fire-engines left the spot.

It is not known how the fire originated; it was first observed bursting through the roof by a man who lives in a cottage in the neighbourhood, and who immediately gave an alarm at Messrs. Hares' factory, at Temple-gate. The process of japanning is very hazardous, requiring stoves to be kept constantly burning, in order that a certain rate of temperature might be maintained. It is thought that some waste cotton used in cleansing became ignited by these stoves, and quickly spread to the surrounding inflammable materials. The place was apparently quite safe when left by the men at half-past six o'clock. The building and its contents are destroyed, and the damage is estimated between £1500 and £2000. The Messrs. Hare are not insured.—*Bristol Gazette.*

DESTRUCTIVE FIRE AT SAN FRANCISCO.—(SEE PAGE 66.)

THE ILLUSTRATED LONDON NEWS

No. 438.—Vol. XVII. SATURDAY, JULY 27, 1850. [Sixpence. { WITH SUPPLEMENT, GRATIS.

PAUPERISM IN 1849.

The Report of the President of the Poor-law Board for the year 1849 has just been issued. This annual document invariably contains matter well worthy of consideration. It has seldom happened of late years that the social phenomena indicated, by means of its elaborate and careful statistics, have been of a nature more calculated to inspire confidence in the whole course of our legislation and the character of the people, than the document which has just appeared. The first "great fact" which these statistics disclose in reference to the year 1849, as compared with the year preceding, is a similar diminution of the amount of pauperism. The year 1849 was one of abundance and cheapness, of reviving confidence and increasing trade. In our social system, which is dependent so largely upon the prosperity of manufactures, abundance of food invariably produces increased activity in all the industrial occupations by which the people live; and this activity leads, as a matter of necessity, to a correspondent increase in our internal and external trade. Poor-rates diminish, and the prisons are relieved of a portion of their customary inmates. The general history of the year 1849 affords subjects of national thankfulness upon all these points. The various parochial returns of all the largest cities and towns of the kingdom have from time to time, as they were published, shown in detail the diminution of pauperism within their respective boundaries, and the simultaneous, if not consequent, diminution of police and prison charges. It only remained for the aggregate Poor-law return for the kingdom during the whole year, to corroborate these partial statements. The document just issued is, in this respect, as satisfactory as could be expected. A glance at the return will show the diminished cost of the pauperism of 1849, as compared with 1848. The total sum expended for in-door and out-door relief of the poor in England and Wales, during the year 1848, was £6,180,765, or 7s. 1¾d. per head on the whole population. The cost for the same purposes in 1849 was £5,792,963, or 6s. 6¾d. per head on the whole population—making a diminution of about 6½ per cent. Taking the adult male, or working population, at one-fifth of the whole population of England, the lower estimate would still indicate a severe pressure upon the bones and muscles of the nation. It would show that the working-men of England—in which we include both rich and poor—the head-worker as well as the hand-worker—the trader as well as the operative—the owner as well as the producer of wealth—pay an annual tax of upwards of 31s. each individual towards the support of the able-bodied and impotent poor; a tax equal in amount to the sums levied in some countries for the whole machinery of Government, and all general and local burdens, political and social. It is, therefore, matter of congratulation to find that so heavy a burden is not permanent; and that, if the dispensations of Providence on the one hand, and the mistakes and misgovernment of Legislation on the other, may temporarily increase its magnitude, so the bounty of Providence in sending abundant harvests, and the enlarged experience of public men, in removing obstructions from the path of industry, and giving fair play to the energies of the people, may as sensibly, and, perhaps, more permanently decrease it.

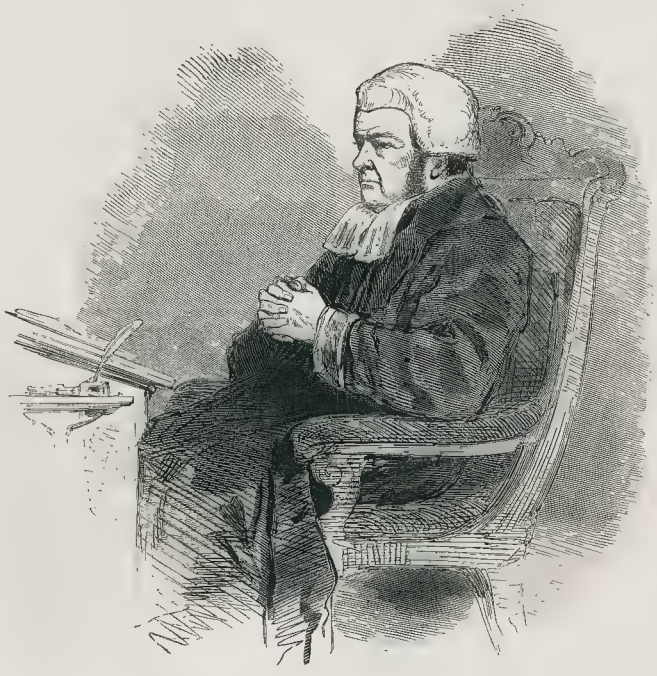
A comparison of the number of paupers during the two years is still more favourable than the comparison of cost. The number relieved in 1848 was 893,743; the number relieved in 1847 was 827,919: a diminution of 65,824, or nearly 7½ per cent. If we consider that these 65,824 persons were principally of the class of able-bodied paupers, relieved by the returning prosperity of the nation from the unhappy necessity of living upon the public alms, and transformed from idle and useless wealth-consumers into industrious and useful wealth-producers, our reason for thankfulness will be still further increased.

It appears from the report, that an erroneous idea of the amount of English pauperism has been extensively circulated both in England and elsewhere, and that much unnecessary lamentation has been raised over the assumed fact, that every ninth person in England was a pauper. The Poor-law Board was itself to blame for this error. The document just issued—though it does not exactly explain by what mode of calculation the Poor-law officials allowed this inference to be fairly drawn from their published statements in the year 1848—proclaims the fact that the error was committed, and affirms the pauperism of 1848 to have in reality amounted to only one in sixteen of the whole population. This is a very different result, which we recommend to the serious notice, not alone of those who have been building theories upon, and devising remedies for, such a deplorable state of things—but of those whose prophecies of impending ruin to this nation have had no better, if any other foundation.

One of the greatest evils consequent upon a lax administration of the Poor-law was the encouragement formerly, and in some parts of the country still, given to those wandering armies of idleness, filth, and vice, known as tramps or vagrants. Tramping within the last few years has become a regular profession. Tramps of both sexes, young and old—enemies alike of work, of decency, and of cleanliness—have scoured the country from end to end, begging by day, and using the Union-houses or vagrant-sheds as regularly and systematically as richer travellers use hotels and inns. Too commonly they were received to all the privileges of these establishments on their mere application, and were provided with a supper, a bed, and a breakfast. Most of these tramps knew perfectly well the "Union" or "shed" where the most liberal allowances were given, and duly informed their more ignorant companions of the places which it was best to frequent and encourage for their liberality, or to avoid for their parsimoniousness. The evil at last became so enormous, that, in obedience to the reiterated complaints of those who saw its whole extent and its daily increase, the President of the Poor-law Board issued in August, 1848, a minute, urging upon boards of guardians throughout the country the necessity of discriminating between real and simulated destitution. Regulations of a more stringent character were consequently adopted; the pauper hostelries were made less luxurious than they formerly were; the dirty applicants, whose horror of cold water and soap is only equalled by their dread of labour in any shape, were subjected to a nightly purification as a *sine quâ non* of relief; and their tattered garments were strictly searched for hidden coin. These wholesome measures soon produced their effect. The Irish tramps, who, after making a few pounds at haymaking, or other agricultural work in England, sowed up their treasure in their rags and did not scruple to beg their way back to Ireland, were deterred by the strictness of the search to which they were subjected; and the English vagrants took alarm at the compulsory ablutions by which they could alone become qualified for their nightly lodgings, and ceased, to a considerable extent, to trouble the rate-payers with the infliction of their presence. The number of such tramps relieved in one day before the issuing of this salutary measure was 13,714. The number relieved in the corresponding day of the year subsequent to its promulgation was only 5622; showing a diminution of 8052, or nearly 59 per cent.

The return is, in other respects, as gratifying; and proves generally a greatly improved state of things, as compared with the preceding year. In an old and artificial state of society, we cannot expect entirely to eradicate pauperism. It is evident, however, that, aided by the bounty of Heaven, the nation may find means to diminish its pressure, to lessen its numbers, and, by educating the children of the poor who are thrown upon its hands, to elevate the moral and social position of the next generation. Upon the last-mentioned point, the success of the Poor-law Board has not been so great as could be wished; but, notwithstanding the insufficient means at its command, and the inefficient power which it wields, it has been enabled, even in this respect, to effect some good. In the metropolis alone, it has, in conjunction with the guardians of various parishes and unions, made provision during the year for the proper education and industrial training of upwards of two thousand children, and has devoted its best attention to the improvement of workhouse schools in every part of the country.

This is an important work; and, until that apparently remote period when sects and parties shall cease to squabble upon the great question of national education, it is, perhaps, the most important which the Poor-law Board is called upon to perform. We are glad to see that the work has not been neglected.



THE RIGHT HON. LORD TRURO, LORD HIGH CHANCELLOR.—(SEE NEXT PAGE.)

THE NEW LORD CHANCELLOR.

SIR THOMAS WILDE, who has just been promoted to the Woolsack, as Baron Truro, was born in 1782. After practising as an attorney, he was called to the bar by the Hon. Society of the Inner Temple, the 7th Feb., 1817. He joined the Western Circuit, and soon rose into considerable practice. His knowledge of the law, combined with his great eloquence, made him one of the most successful advocates of his time. He was for many years the confidential and legal adviser of the late Alderman Sir Matthew Wood, and his connexion with that gentleman caused him to be engaged as one of the junior counsel for the Queen on the celebrated trial of Queen Caroline. Though surrounded by rivals of the highest eminence and the brightest fame, Wilde always stood among the foremost, and obtained briefs in some of the greatest causes ever tried. For instance, he was engaged on the winning side in the famous action of Small *v.* Attwood, in which he first used to have associated to him something enormous. In 1824 he became a serjeant-at-law; and he was appointed King's Serjeant in 1827, and Solicitor-General in 1830, when he received the honour of Knighthood. In 1841 he first became Attorney-General; and after a second time holding that office, he succeeded the late Sir Nicholas Conyngham Tindal, as Lord Chief Justice of the Common Pleas: his recent appointment as Lord Chancellor places him at the very summit of his profession.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The accounts from Paris this week are of little interest. In the Legislative Assembly, the sole subject that attracted attention was the nomination of the Commission who are to watch over public affairs during the prorogation. All parties have been trying to get some friends elected: the general character of the Commission, however, is Conservative. The President of the Republic is said to be much annoyed that all his own friends should have been purposely rejected from the Commission.

The individuals who signed a violent petition against the electoral law, and who were ordered by the Assembly to be prosecuted, were tried on Monday, and acquitted.

Fifteen persons were arrested on Monday night in the Rue St. Victor, upon the charge of being members of a secret society, having unlawful designs. A quantity of red caps and flags, besides arms, papers, pamphlets, &c., were seized by the police, which leave no doubt that a conspiracy existed against the present Government. Upon the execution of the warrants issued on the occasion, it was discovered that many persons of respectability formed part of the secret society, which was called Nemesis, and composed of all shades of Democrats. It was intended to have Paris revolutionized into nineteen sections, under as many committees, with the view of "arresting the progress of reaction, of making the democratic principle triumph by all possible means; and assuring the consequences of a veritable republic."

On Monday, a house was searched at Bonnelles, in the department of the Seine-et-Oise, when 400 bullets, a great deal of gunpowder, and other kinds of ammunition, were discovered. They were taken possession of by the police, who also arrested the occupier of the dwelling.

An extraordinary commission has been ordered to Marseilles to replace the municipal authorities, who would not comply with Government orders to release from quarantine vessels from Malta not having sick on board.

The President of the Republic is shortly to take a journey to the departments of the east.

DENMARK AND SCHLESWIG-HOLSTEIN.

The hostile forces are in presence, but no engagement of any consequence had taken place up to the latest dates, which are from Hamburg to the 22nd inst. By those we learn that the Danes had given up the two small vessels they had captured, and that the Danish troops had evacuated Apenlin. Two or three trifling skirmishes had taken place between the opposing armies, but more with the view of ascertaining the number of the respective forces than with any other object. They were, however, drawing nearer to each other, each demonstrating their men; so that a determined engagement will probably soon take place. Intelligence had been received that the Schleswig-Holstein steam gun-boat, *Von der Tann*, commanded by Lieut. Lange, had recently run on shore in Seeburg, fearing that the vessel might fall into the hands of the Danes, Lieut. Gaie gave orders for the crew to take to the boats, and then to blow up the gun-boat, which instructions were strictly complied with.

PORTUGAL.

We have news from Lisbon of the 19th inst., announcing that Mr. Clay, the American *Chargé d'Affaires* not deeming the reply of the Portuguese Government satisfactory, respecting the demands of the United States' Cabinet, had demanded his passports, which were of course granted, and was preparing to leave upon his return home. The dispute must now be referred to Congress, and, therefore, no immediate hostilities need be apprehended.

UNITED STATES.

We have accounts this week from New York to the 11th inst. The news thus conveyed is important, viz. that of the unexpected death of the President of the United States, Zachary Taylor, who expired at Washington on Tuesday night, the 9th inst., at 35 minutes past ten o'clock. The President's indisposition first became known at Washington on the 4th inst., when he was stated to be suffering from diarrhœa. He was attended by Drs. Hall and Witherspoon, of Washington, who reported that his condition at that time was "serious, but not critical." It appears, however, that the disease took a fatal turn. On the President's son-in-law, Dr. Wood, of Philadelphia, who arrived on the 7th and expressed an opinion that the situation of the President was quite as serious as it was when he was visiting Hills' tomb, when he suffered severely from the same complaint. On the morning of the 8th the President was reported to be "very feeble, but somewhat easier." A subsequent bulletin stated that his malady "had assumed the appearance of remittent typhoid." Colonel Taylor, the President's son, arrived from Baltimore during that day. In the evening the physicians reported "that the President was much better, though not beyond danger." This was the last account received at New York prior to the packet sailing on the 11th inst. All the subsequent particulars are by telegraph, and they state that the diarrhœa ended in congestion of the brain which proved fatal. The Vice-President, cabinet, mayor, marshal of the district, the attending physicians, and his family surrounded his bed. His last words were, "I am prepared—I have endeavoured to do my duty."

Immediately upon the death of the President, Mr. Fillmore, hitherto Vice-President, assumed the government of the country. He was finally sworn into office on the 10th. President Taylor's cabinet as a matter of course tendered their resignation. Various changes were predicted: among others it was said that Mr. Webster would be called to office as one of the Secretaries of State; but all this was mere speculation. The general impression was, however, that comparatively few of the ministers would resume office, and this belief was supported by the circumstance that only two days antecedent to the President's death they had received a check in Congress upon the question of a money claim by an individual upon the Treasury.

The funeral of the President was fixed for Saturday, the 13th, at noon. In Congress several eulogies had been delivered on his character.

The cholera has reappeared in several of the western cities, taking much the same course as it did last year. At Cincinnati there had been 63 fatal cases in one day. The Washington despatch states that the Rev. Father Coombs, priest of Leonardtown, died suddenly without previous illness. Two fatal cases (and numerous others who have recovered) had occurred there, resembling much the Asiatic cholera.

The confession of Professor Webster of the killing of Dr. Parkman had been, in a measure, supplanted in the public mind by the discussions as to his probable fate. The governor and council of Massachusetts were examining petitions in favour of the wretched man; but the subject would not be resumed until the 18th of the month. One of the petitions in his favour was signed by 984 inhabitants of New York; another was from one of the jurymen who tried him; and three from individuals who said that they committed the murder.

A dreadful fire occurred in Philadelphia on the 9th inst., and one in Brooklyn, near New York, on the 7th. The latter destroyed upwards of 300 buildings. A quantity of gunpowder and saltpetre, stored in a cellar, exploded, and nearly twenty persons were blown into the river, of whom several were dreadfully injured. Moore's Telegraph Office was burned, and Bailey endangered, but saved. At Brooklyn the amount of property destroyed was much less, but, by a singular coincidence, several explosions of saltpetre occurred, greatly increasing the mischief done by the conflagration.

A severe storm visited Albany (capital of the State of New York), tearing up the pavement in many of the streets, and flooding many dwellings and warehouses. A railroad bridge was carried away, and a train precipitated into the water, and several lives lost. The canal in that region was much damaged.

The ratifications of the Nicaraguan treaty had been exchanged, and the treaty would be proclaimed on the 15th.

The case of Lopez and other Cuban invaders had been adjourned until the December sitting of the United States District Court at New Orleans.

On the 4th inst. a serious riot occurred near Baltimore, in which several persons were shot, and one killed on the spot.

The Texas and Santa Fe difficulty deepens in interest and danger. Public meetings have been held at Austin and other towns of Texas, in favour of asserting the claims of Texas to Santa Fe, by force of arms, if necessary, and in defiance of the declared independence of Santa Fe by the people of that extensive region, and in defiance also of the Federal Government of the United States. But it is understood that the authority of the general Government would be interposed, should such a step be unfortunately rendered indispensable.

CALIFORNIA.

We have accounts, viâ New York, from St. Francisco to the 1st June. The Government of New Granada, in compliance with the remonstrances of the American Minister, had discontinued the requirement of passports from persons crossing the isthmus. Serious collisions had occurred between the United States, troops and the Indians of the Sacramento Valley; but the loss being chiefly on the Indian side, they had sued for peace, and a treaty had been concluded. The mining tax upon foreigners gave much dissatisfaction, and proved difficult of collection, very energetic resistance being offered in many instances. The Chilian, French, and one or two South American flags have been raised as rallying points for resistance. Two or three persons have been stabbed, and a large number of armed Americans having marched out of Stockton and Sonora to suppress the insurrection, a collision was anticipated at the latest dates. The foreigners in that region of California are said to number 10,000, and they do not resist either the right or the payment of any moderate tax; but they complain that the price of licences as fixed by the act of the Californian Legislature, is enormous, unjust, and tyrannical; and private letters say that many of the Americans are of the same opinion. The accounts of rich placers and heavy lumps of gold are as dazzling and hyperbolical as ever, but an unusually good gold crop is expected during the season.

2,500,000 dols. have been received by this arrival.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

PROVISION FOR THE DUKE OF CAMBRIDGE

The Marquis of LANSDOWNE presented a message from her Majesty, requesting their Lordships to concur with the Commons in making a suitable provision for the Duke of Cambridge and the Princess Mary of Cambridge. The noble Marquis gave notice for next evening to move an address in reply to her Majesty's most gracious message.

On the motion of Earl of ELLESMERE, three men, Joseph Byrne, Joseph Hinde, and Duncan M'Arthur, were committed to the custody of the Black Rod for forging signatures to a petition relative to the Liverpool Corporation Waterworks Bill.

The Earl of St. GERMANS having mentioned a day for the second reading of the Marriages Bill,

Lord STANLEY complained of such a bill having been brought up so late in the session, and expressed his objection to it, suggesting that the best course for the noble Earl to adopt in respect to it would be to withdraw it, and introduce it at an early period next session in their Lordships' House.

The Earl of St. GERMANS, in reply, said that he would take till next evening to decide upon what course he should take in regard to the bill.

The County Courts Extension Bill was read a third time and passed.

The Population Bill, the Ecclesiastical Jurisdiction Bill, the Loan Societies Bill, and the Registration of Deeds (Ireland) Bill went through committee.

The Borough Courts of Record Bill was read a second time.

Several other unopposed bills on the table were forwarded a stage.

Adjourned.

HOUSE OF COMMONS.—MONDAY.

In the early sitting, the remaining clauses of the Mercantile Marine Bill were agreed to.

At the evening sitting—

Lord J. RUSSELL gave notice that he would, on Tuesday, the 30th instant, at a morning sitting, move for the consideration of the Lords' amendments to the Parliamentary Voters, &c. (Ireland), Bill; that he would on Friday next, at twelve o'clock, move the consideration of the Lords' amendments to the Australian Colonies Government Bill; and that he would not proceed this session with the Parliamentary Oaths (Jews) Bill, but would bring it forward at the earliest period next session.

DEMERARA.

On the motion to go into Committee of Supply,

Mr. HUME called attention to the petition from Demerara, praying for British institutions. The hon. member said that the colonists of British Guiana complained of many grievances, which he considered were caused by the Governor having a casting vote, which made him practically absolute.

Lord J. RUSSELL refused to discuss statements which were not yet received in an official form. The noble Lord said that Governor Barkly had planned, and partially executed, a scheme by which the colonial legislature would receive a large amount of the popular revenue.

Mr. HUME's motion was negatived without a division.

Mr. HOTT called attention to the petition of Mr. G. C. Redman, who claimed compensation for losses inflicted by the seizure of his vessels in 1833, by the French Government, at Fernando, on the coast of Africa, but after a short conversation, it was ruled that the hon. member could not make a motion.

SUPPLY.

The House then went into Committee of Supply, and several votes were agreed to, after a great deal of discussion, and several amendments.

At one o'clock the chairman reported progress.

The reports of the resolutions on the Duke of Cambridge and the Princess Mary's annuities were received, and leave given to bring in bills founded thereon.

The Ecclesiastical Commission Bill was read a third time, and, some amendments having been made in it, passed.

QUICK MODE OF DESPATCHING BUSINESS AT THE CLOSE OF THE SESSION.

At this time, past two o'clock on Tuesday, and the House having been sitting, with a short cessation, since twelve o'clock at noon on Monday, Mr. BROTHERTON, by way of joke, proposed that the remaining thirty-seven orders of the day be got rapidly through, and that the House proceed with the business on Tuesday, without going through the form of adjournment.

The long list of orders of the day having been either postponed or forwarded a stage at railway pace, without discussion, and amidst laughter and confusion,

The motion for the further consideration of the Attorneys' Certificates Bill, as amended, was moved by Lord R. GROSVENOR.

The bill was accordingly considered.

Lord R. GROSVENOR then moved that the bill be read a third time on Tuesday.

The CHANCELLOR of the EXCHEQUER thereupon moved, as an amendment, that the bill be read a third time on that day three months.

The House divided—For Lord R. Grosvenor's motion, 88; against it, 112. Majority against the bill, 24.

The House again divided on the question that the bill be read a third time that day three months. For this motion, 113; against it, 84: majority for the Government, 29.

The bill was consequently lost.

The House then adjourned at three o'clock on Tuesday morning to twelve o'clock the same day.

HOUSE OF LORDS.—TUESDAY.

MARRIAGES BILL.

In reply to a question from Lord STANLEY, the Earl of ST. GERMANS said he should be prepared to state on Thursday whether he intended to proceed with this bill; and, if so, on what day he would propose the second reading.

PROVISION FOR THE FAMILY OF THE LATE DUKE OF CAMBRIDGE.

The order of the day having been read for taking into consideration on this subject, the Marquis of LANSDOWNE said he begged to move an address in pursuance of her Majesty's message, and in conformity with its terms. It was hardly necessary for him to call their Lordships' attention to the circumstances of the case; there must be but one general feeling on the subject. Their Lordships knew that there was a bill before the other House the object of which was to give £6000 a year to the Duchess of Cambridge, £12,000 a year to the present Duke of Cambridge, and £3000 a year to the Princess Mary of Cambridge. (Hear, hear.) He would make no further observation, but at once move "that a humble address be presented to her Majesty to return thanks for her most gracious message, and to assure her that the House will avail itself of every opportunity to testify its dutiful attachment to her Majesty's person, and of its readiness to concur in any measures which may be necessary to carry out the objects of her Majesty's message." (Hear, hear.)

Lord BROUGHAM would only say what he had stated on former occasions, that, as long as the unfortunate law disfigured our statute book which restrained the Royal family from marrying, it was a matter of strict justice that Parliament should provide for those illustrious persons. As long as they were not allowed to intermarry on subjects of the country endowed with wealth, they should be guaranteed against the effects of such a law.

The Earl of GLENGALL presented a petition from Tipperary, complaining of agricultural distress, in spite of the working of the present Poor-law. The noble Earl bore out the facts set forth, and enforced the prayer of the petition, which was laid on the table.

The Population Bill and the Population (Ireland) Bill were read a third time and passed.

THE MILITARY FORCE OF THE NATION.

On the motion for the third reading of the Militia Ballot Suspension Bill,

The Earl of DALHOUSIE protested against the state of military insecurity in which, he contended, the country stood in relation to foreign countries. He considered that, as we had adopted a new foreign policy, we should keep a force in hand sufficient to maintain our pretensions; and he thought that if the Austrian

enable a man to marry his grandmother. He should seriously consider the subject during the recess.

The order of the day for the second reading of the bill was then discharged.

Lord MONTEAGLE presented a petition praying for the establishment of steam communication with Australia.—Adjourned.

HOUSE OF COMMONS.—THURSDAY.

The House had an early sitting at twelve o'clock, at which the amendment, in the Mercantile Marine Bill were considered and agreed to. The report was received, and the third reading fixed for Monday next, at twelve o'clock.

The nine first clauses of the Medical Charities (Ireland) Bill were also discussed and agreed to

In the evening sitting:

SUPPLY. STEAM TO AUSTRALIA.

The House having resolved itself into a Committee of Supply, before the vote was taken for the Contract Packet Service,

Lord NAAS rose to move that an humble address be presented to her Majesty praying that she will be graciously pleased to order such measures to be taken as will ensure the immediate establishment of regular steam communication with her Australian colonies. The noble Lord proceeded to call the attention of the House to the delay and uncertainty which occurred in the transmission of intelligence from the Australian colonies to this country, and to the fact that the members of the Governments were frequently indebted to the colonial newspapers for important information which reached this country before their own official dispatches from those colonies. During last year, on one occasion, four or five months had elapsed without any communication between this country and the Australian colonies. In the year 1847 the average length of the passage was 121 days, and in 1848 it was 119 days. From this it would be seen that the ordinary time for conveying letters and communications from this country to Sydney varied from 120 to 130 days; but if the plan which he was about to propose now were adopted, or something like it, the passage would be reduced to 70 days. Three routes had been suggested for this steam communication. First, the western route by Panama, a distance of 13,500 miles; second, the southern route by the Cape of Good Hope, a distance of 15,530; and thirdly, the eastern route by Singapore, a distance of 12,099 miles. The first route, however, though the shortest, was objectionable, on account of the want of fuel on the Pacific, and the difficult sea voyage between Singapore and Australia. The second route, in his opinion, was decidedly the best, as it would include many intermediate ports and places of importance, and would be the best adapted for the purposes of emigration. The third route by Singapore would take in the present Overland Mail to India, and it had this advantage over the others, that it placed India in direct communication with Australia, but against this was the sea-sickness which would have to be performed by screw steamers, he could not see why both this and the Cape route could not be adopted together. The Legislature of New South Wales had voted 20,000*l.* towards carrying out that scheme of postal transmission between that country and England, and calculated that the revenue which would be derived from such transmission would amount to £20,000. Van Diemen's Land was ready to assist in the same object, and in the last session of Parliament the great benefit which would result to that colony and the mother country, and so likewise in respect of the other colonies. A quicker and more regular communication with England would prevent the masses of the colonies being overstocked with commodities, which was one of the greatest evils to which they could be subject. He thought it quite clear that the greatest advantages would result to this country as well as to the colonies in a commercial point of view, if the regular and rapid steam communication which he proposed was established

The CHANCELLOR of the EXCHEQUER said he should be obliged to oppose the motion of the noble Lord, but he presumed his object had been gained effected in calling the attention of the House to the subject. The House was well aware that he was as desirous as any one to effect a rapid and regular communication with the colonies, and he only regretted that he would not be able before the end of the session to announce that some definite arrangement had been made to accomplish that object. But the fact was, that the East India Company had objected to the contract for the Peninsular and Oriental Steam Navigation Company being extended to comprise communication with Australia; and, as the East India Company were parties to the contract, it could not be altered until the charter of the East India Company expired, in two years hence.

After a short discussion, the motion was negatived without a division.

Several votes were then agreed to, and the House adjourned.

MUSIC.

CONCERTS.

Mdlle. Ida Bertrand, the contralto of Her Majesty's Theatre, gave a *matinee musicale* on Monday, at the Queen Anne-street Rooms, under the patronage of M. Drouyn de Lhuys. The room was fully and fashionably attended, and the fair *bénéficiaire* had the concurrence of Madame Sontag, Madame Frezzolini, Madame Gulnani, Mdlle. Parodi, Signor Calzolari, Lorenzo, Lablache, sen. and jun., and M. Lefort; the accompanyists being Balfe, Eckert, Bietsta, and Frelon

Mr. John Parry gave his "Notes, Vocal and Instrumental," at the Music Hall, last Monday.

Mr. W. T. Best, organist of the Liverpool Philharmonic Hall, gave a performance of organ music last Monday, on one of Mr. Bishop's new instruments.

MUSICAL EVENTS.—The *Revue et Gazette Musicale* of Paris announces that the Minister of the Interior has issued orders to put a stop to the puffaces that have been made, from the directors of theatres, of their performances. It appears that the chief of the *claqueurs* regularly contracted with managers for the exercise of their functions; and the Minister is of opinion that, by the suppression of the *claqueurs* he necessary, it is better that they should be in the pay of the managers, than that the managers should be in the pay of the *claqueurs*. It would be better if the system of *la claque* were altogether abolished in Paris; it is terrible for art and artists to be exposed to the tender mercies of these moral assassins.——Mdlle. Lind quitted Stockholm on the 29th ult., for Lubeck; she gave £200, prior to her departure, to the Swedish Temperance Society.——Negotiations are in progress for the engagement of Sontag for St. Petersburgh, in addition to Grisi, Mario, Tamberlik, Tamburini, &c., who return, in September, to the Russian capital, —Ernst, Vivier, the celebrated horn player, is engaged for the forthcoming season on a short visit.——It is rumoured, in the musical circles, that a project is in course of organization to commence, in October next, a series of performances at Her Majesty's Theatre, under the title of "Grand National Concerts," at cheap prices. ——Mdlle. Lind, at Liverpool.——M. Benedict has gone to Scotland, to fulfil his engagements under the management, it is affirmed, of a committee of noblemen and gentlemen. By the term "National Concerts" it is not intended that English music is to be performed, but every school and class of music are to be included in the programmes, for which the first foreign and native vocal and orchestral talent will be engaged. Any plan having legitimately for object the promotion of art among the masses, is worthy of support; and the undertaking will begin at a period of the year before our established musical societies and concerts have commenced their ordinary season.——We have on frequent occasions referred to the compositions of Signor Alari; at the commencement of the first occasion by Signor Alari, was sung by Mdlle. Masson, with great effect. The communion of the Comte de Paris, last Saturday, a "Salutaris," written for the Duchess of Orleans, as a mark of her satisfaction, has presented the composer with a handsome pin, as well as a brooch, in the fair recipient's name.——Blagg's "Malbrun" is to appear next Monday, at the Hanover Rooms, with the guitarists, the Cebras.

THE THEATRES.

HER MAJESTY'S.

Those who have witnessed the various dramatic efforts of Madame Sontag, since her return to the stage, must have remarked a mighty improvement not only in the [illegible]ling up the several characters which she has assumed, but an increase of firmness, and a breadth of colouring. Her voice, which was ever clear, limpid, and sweet, has, from continuous exercise, gained in power; and, therefore, those who had formerly supposed her vocal and dramatic means were confined to a peculiar style of lyrical art, are now convinced that there is hardly a character in the lyrical *repertoire*, that is beyond her successful achievement. The announcement of Madame Sontag to appear in Donizetti's "La Figlia del Reggimento" caused considerable surprise in musical circles. By many it was deemed hazardous to her well-earned fame and peculiar histrionic principles. The *prestige* of the suttler maiden required a comic spirit, a dashing style, a rollicking manner, and a stage aptitude which were thought beyond the grasp of "my lady the Countess:" and that Jenny Lind created without doubt, a character of originality of delight, she had been so affluently sonneted, and statuized, and portraited, that the name of Jenny Lind was seemingly identified with the "Daughter of the Regiment." The risk was great, and the courage and energy of the attempt seemed as ambitious as the hope was thought futile; but, despite all the doubts and dilemmas and former impressions, the essay has been made, and the result has proved how the *obliging* spirit

SHIPPING THE GREAT BULL FROM NIMROUD, AT MORGHILL, ON THE EUPHRATES.

Jonas, I.N., whose influence with the natives is all-powerful, and to whose assistance we are much beholden in effecting this difficult operation on the muddy and deserted banks of the Euphrates. The *Apprentice* was sent out from this country by Mr. Alderman Finnis, at the instance of the Trustees of the British Museum; and to that gentleman and his nephews, Messrs. Lynch, we are indebted for a regular periodical communication between the Thames and the Euphrates. Another vessel belonging to the Alderman is now on the point of leaving, and we trust that she may, in like manner, return home laden with the precious relics of a great empire—bringing to our shore the monuments and trophies of what we had been too apt to regard as the semi-fabulous metropolis f the antique world.

PARISIAN RAILWAY EXCURSION.

EARLY on the morning of Sunday, the 14th inst., the inhabitants of the quiet town of Dunkerque were agreeably surprised by a large body of Parisians parading their streets in the highest holiday glee. It appears that, on the preceding evening, three *monstre* trains started from Paris, conveying 2100 passengers, consisting of *badauds* (Paris Cockneys), while half that number was left behind for want of room. The low fare of 9f. (7s. 6d.) was a sufficient inducement to clerks, shopmen, and *employés* generally, to avail themselves of this Sunday trip, rightly calculating that they might leave their shops and offices on Saturday evening at eight o'clock, and appear again at their posts on Monday morning at the same hour; and thus pass twelve hours of the Sunday in one of the cleanest and best regulated towns in France; which can boast also of possessing the most capacious and commodious harbour, with nearly two miles of quay room.

The reception of the Parisians by the people of Dunkerque of all ranks was so spirited as to give the town the appearance of a holiday fete. The enthusiasm of the Parisians knew no bounds when they arrived upon the Place de la Republique, where is the statue of the celebrated Jean Bart, already engraved in the ILLUSTRATED LONDON NEWS; and the Rue Arago from this point presented a multitudinous display of flags and standards floating from the roofs and windows of the houses, and garlands of roses and other flowers, and ribbons; the entrance was spanned by a tasteful arch of flowers and evergreens; and at one end of the street was suspended by wreaths a medallion, bearing the following inscription:—

AUX PARISIENS

Perdus aux confins de la France,
Dunkerquois, dans vos flots on nous croyait périr,
Quand la vapeur un jour abrégeant la distance,
Nous mit aux portes de Paris.

Venez, fils de la Capitale,
Avec nous échanger un fraternel accord,
Venez, le ciel est pur, la marée est étale,
Et trois cents willes sont au port.

The reverse bore—

DUNKERQUE. UNION. PARIS.

The Rues de la Marine, and de la Vierge, and the Quai were equally decorated; whilst the vessels in the Harbour vied with each other in their display of colours.

The weather was splendid; and the earliest curiosity of the Parisians was excited to behold the sea, to which they flocked by hundreds; then came the review of the National Guard, and next a fine band played several delightful airs in the park, and attracted vast numbers of promenaders

At three o'clock, the harbour presented a very animated spectacle; for, at that hour, there were scarcely 100 of the 2100 visitors who did not avail themselves of this opportunity of a trip on the ocean. On each of the steamers, *City of London* and *Princes van Orange*, there were not less than 300 passengers. Meanwhile, pilot-boats, fishing-boats, and every kind of craft was laid under contribution by the holiday crowd.

An excellent dinner was provided at the splendid Bath Rooms; and the afternoon having been passed in the utmost festivities, between seven and eight o'clock, the excursionists in a body, accompanied by 10,000 of the people of Dunkerque, reached the railway station, on their return; and the trains left amidst shouts from the Parisians of "Non pas adieu, mais au revoir! Vive les Dunkerquois!" The holiday folks were expected to arrive in Paris at about six o'clock in the morning, after passing two nights, and travelling 450 miles *sur un chemin de fer*.

We understand that it is in contemplation to have a pleasure excursion from London to Dunkerque and back at low fares, when a reception will be given to our countrymen on landing upon a more extensive and brilliant scale than was given to the Parisians.

RECEPTION OF PARISIAN RAILWAY EXCURSIONISTS AT DUNKERQUE—RUE ARAGO.

THE LATE MRS. GLOVER.

IN our Journal of last week we recorded the melancholy death of this admirable actress, whose histrionic career, extending over half a century, presents many very interesting points for the biographer. She had been the associate of Mrs. Siddons; and she had acted with John, Stephen, and Charles Kemble; with Edmund Kean, Charles Young, Dowton, Munden, Incledon, Farley, Knight, Lewes, Jones, Liston, Elliston, Blanchard, Mrs. Dickens, Mrs. Bartley, Mrs. Powell, Madame Storace, Braham, Miss Stevens, Mrs. Bland all artists who have shed lustre upon their art, and thus rendered their times one of the brightest eras of the British drama.

Mrs. Glover is said to have been a lineal descendant of the celebrated Betterton, "who ought to be recorded with the same respect as Roscius among the Romans." Her immediate antecedent was Mr. Betterton, an actor on the Dublin stage, of considerable celebrity, and who subsequently attained some reputation at Covent-Garden Theatre in the parts of fops and coxcombs. Lord Byron, when a member of the Drury-Lane committee, thus humourously speaks of him:—"I was seated in the library one morning early in the month of February; the weather was very cold and the snow deep on the ground; my servant announced a gentleman in the hall, and on his being introduced I saw before me a fine-looking man, stricken in years, who was desirous for my interest to procure him an appearance as *Archer* in the 'Beaux Stratagem.' His costume at that season of the year was a pair of light small-clothes, white silk stockings, and pumps."

Julia Betterton, the subject of our present memoir, was born on the 8th of January, 1780, in the town of Newry (Ireland), where her father was, at the time, manager of a small provincial company. She was thus cradled in the theatre, and played Cupids, fairies, and infant princesses, as soon, almost, as she could walk. At the age of ten she was a little phenomenon, and her exertions were of considerable value in the maintenance of the theatre. It was about this time that her father gave up management, and joined the York company, of which the eccentric but kind-hearted Tate Wilkinson was the manager. Here the young Julia obtained a *début* as the *Page* in Otway's tragedy of "The Orphan," in which Mrs. Siddons played *Monimia*. Little Julia played so well in this part, that old Tate Wilkinson, after the play was done, placed half a guinea in her hands, telling her that she should have a similar sum for every night she played, being exactly double the salary she had been engaged for. In this circuit she played the *Duke of York* to the *Richard* of George Frederick Cooke, and *Tom Thumb* in the farce, the eccentric tragedian himself playing *Glumdalca, the Queen of the Giants*, on the occasion. So rapidly did she advance in her art, and spring into early womanhood, that at fifteen she played with great success the *Miss Hoydens*, *Lydia Languishes*, *Julias*, and *Imogenes*; though her comic efforts were considered happiest. She was next seen at Bath, by Mr. Harris (of Covent Garden), who offered her an engagement of £10 per week, which she declined; but, in a few months, she signed an agreement for five years, at £15, £16, £18, and £20 a week.

THE LATE MRS. GLOVER.

On October 12, 1797, Miss Betterton made her *début* in London, at Coven Garden Theatre, as *Elwina*, in Hannah More's heavy tragedy of "Percy," with great success. She then played, in quick succession, *Charlotte Rusport* ("West Indian"), *Portia* ("Merchant of Venice"), *Miss Dorillon* ("Wives as they Were"), *Julia* ("Way to get Married"), and *Miranda* ("Busy Body"). Cumberland, the querulous author of "The West Indian," was so delighted with her performance of *Charlotte Rusport* in that comedy, that he assigned her the principal character, *Emily Fitzallen*, in his new comedy of "False Impressions," and gave her, then a rare favour, the epilogue to speak.

The retirement of Mrs. Abington in 1799 left a wider field for Miss Betterton, who bore in person and manner a striking resemblance to the "tragedy Queen" On May 12, in the above year, Miss Betterton played for her father's and her own benefit *Lady Macbeth*, for the first time. We find her in the following season playing *Charinda*, "Suspicious Husband," first time, 20th September, 1799; *Mrs. Sullen*, "Beaux Stratagem," first time, 11th October, 1799; *Letitia Hardy*, "Belle's Stratagem," *Miss Richland*, "Good-natured Man," *Miss Wateringham*, "School for Wives," and other characters in high comedy. In 1800, Julia Betterton gave her hand to Mr. Samuel Glover, said to be heir to a large fortune. This proved a fallacy. He was extravagant and unkind. After a few years they separated; the idle and dissolute husband leaving his exemplary and accomplished wife to rear and educate by her own industry eight children. At the end of her engagement at Covent-garden Theatre, Mrs Glover was engaged by the Drury-Lane management. She made her first appearance there as *Mrs. Oakley*, "Jealous Wife," on the 21st October, 1802; and afterwards played during the season, *Charinda*, *Miss Hardcastle*, *Miranda*, *Lady Restless*, *Lady Townley*, and *Lady Bab Lardoon*, ("Maid of the Oaks"). Mrs. Jordan, then in the zenith of her popularity, who was engaged at the same time at this theatre, kept possession of all the leading comedy parts. At the close of her first season Mrs. Glover returned to Covent-Garden Theatre, where she played high comedy, and occasionally tragedy parts until June, 1806, when she made her first appearance at the Haymarket, as *Florantha*, in "The Mountaineers," to the *Octavian* of Rae. She returned to Covent Garden for the winter season. We find her again at the Haymarket in 1809, playing *Estifania* to Jones's *Copper Captain*, *Mrs Haller* to C. Young's *Stranger*; *Mrs. Sullen*, *Lady Racket*, and *Lady Teazle*, to Jones's *Archer*, *Sir Charles Racket*, and *Sir Peter Teazle*. On the 21 of July, 1810, she played *Millwood* ("George Barnwell") with great success. When the burnt-out Drury-Lane company were performing at the Lyceum, Mrs. Glover joined them, and made her first appearance at that theatre, as *Mrs. Oakley*, on the 26th of September, 1810. On the opening of the new Drury-Lane Theatre, in 1812, Mrs. Glover made one of the company, where she greatly increased her dramatic reputation. On the revival of "Richard the Third," for Kean (February 12, 1814), her fine person and rich voice procured her the part of *Queen Elizabeth*, to his *Duke of Gloster*. Her pathos in the scene with the young Princes, her regal demeanour and general pourtrayal of the part, were highly praised. She afterwards played *Emilia*, to the great tragedian's *Othello*. She had now attained to an eminence in her profession that made her future career comparatively easy. The summer season of 1816 was passed at the Haymarket; and, on the 16th of September in that year, she re-appeared at Covent-Garden, after an absence of ten years, and played *Andromache*, in "The Distressed Mother," to the *Orestes* of Mr. Macready, whose first appearance it was on the London stage. In 1817 she was a member of the Haymarket company, playing with Jones, Warde, Liston, Terry, &c.; and, in 1818-19, we find her again at Drury-Lane, while Kean was engaged there. At the same time she was sustaining in comedy such parts as *Mrs. Candour* ("School for Scandal") and *Kitty* ("High Life Below Stairs"), in which she danced a minuet with Elliston. She joined the Haymarket company at the new theatre, under Morris's management; and at this house and at Drury-Lane continued, with but little intermission, up to her last engagement at the Strand Theatre. Just previous to the retirement of Mrs. Davenport we find her assuming such parts as *Old Lady Lambert*, *Mrs. Hardcastle*, *Lady Wronghead* ("Provoked Husband"), *Mrs. Malaprop*, *Mrs. Occatonkery* ("Who Wins a Coronet?") and *Mrs. Heidelberg* ("Clandestine Marriage") all for the first time—in the year 1825, at the Haymarket. She was the original *Mrs. Subtle*, in Poole's comedy of "Paul Pry" a piece which, it was said, brought Morris, the lessee, £6000 the first season. With Mr. Morris and Mr Benjamin Webster, at the Haymarket, she passed the last twenty-five years of her professional life, with the exception of the last two seasons. She played for some time with Osbaldiston, and subsequently with Macready, at Covent-Garden, and with Vestris, at the Olympic. During the time she remained with Mr. Webster, at the Haymarket, from 1837, she had several excellent parts, as the *Widow Green*, in Knowles's "Love-Chase;" *Miss Tucker*, in Jerrold's "Time Works Wonders;" *Lady Franklin*, in Bulwer's comedy of "Money," &c. Mr. Webster cherished high respect for Mrs. Glover's sterling talent, which he testified by presenting her with a very handsome silver cup in the green-room of the Haymarket Theatre on the 8th of January, 1846, the day on which she attained the sixty-sixth year of her age, and her fiftieth as an actress on the stage.

Her last engagement at the Strand Theatre, and her farewell night at Drury-Lane, are fresh in the recollection of our readers

We agree with a contemporary (the *Sunday Times*, whence are condensed the majority of these details) that, looking back to Mrs. Glover's "long and brilliant career upon the stage, we may pronounce her one of the most extraordinary women and accomplished actresses that have ever graced the profession of the drama." Mrs. Glover had a daughter, Phillis, a very clever young actress, at the Haymarket Theatre, who has been dead several years. Her two sons are distinguished, the one as a popular musical composer, and the other as a clever tragedian—the latter with considerable talent, also, as an amateur painter.

WATERSPOUT AT NEW GALLOWAY.

WATERSPOUT IN SCOTLAND.

(From a Correspondent.)

THE little borough of New Galloway was visited, on the evening of the 17th, by a terrific thunder-storm, accompanied by the most extraordinary meteorological phenomenon it has ever fallen to our lot to witness. A large Waterspout appeared about the centre of the town, where it seemed to rest for some time. It then travelled southwards for a mile or two, after which it turned to the east, and burst above the river Ken, near the lake. The strange appearance now presented by the river baffles our powers of description. The foam rose to the height of fully 60 feet, boiling and blazing like a cauldron, and much more resembling dense volumes of smoke than anything to which we can compare it. This extraordinary foam ascended rapidly against the stream, which whizzed as though hot metal had been thrown into it. While the inferior portion of the watery column was gradually subsiding, the upper part separated itself from the foam, and ascended rapidly towards the north-east, coiling and extending itself like a snake among the clouds, and travelling even more quickly against the wind than the boiling surge beneath seemed to move against the stream. Though the atmosphere was close, even to suffocation, the air in the immediate vicinity was powerfully agitated by the whirlwind, which seemed to accompany the Waterspout in its progress. A cart loaded with hay was drawn towards it, the poor terrified horse having apparently no power to resist; and the most strenuous exertions were necessary to withdraw the animal and its load from the fearful vortex, which in one instant more would have drawn them into the boiling river.

The accompanying Sketch will serve to give some idea of the appearance of the Waterspout immediately after it burst.

AERIAL MACHINE AT VAUXHALL GARDENS.

ON Monday evening, Mr. H. Bell made an ascent from these gardens in his "Patent Aërial Machine," which the inventor states to be capable of being controlled by the aëronaut. We have engraved this aërostatic novelty, in addition to the scene of the ascent.

The machine is of a cylindrical form, with conical ends, having its greates

ASCENT OF BELL'S AERIAL MACHINE, FROM VAUXHALL GARDENS.

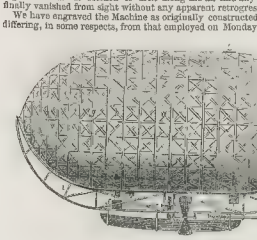
ength placed horizontally, or in the direction in which it is to travel. In place of the rope netting in ordinary use, the patentee uses flat silken bands, for the purpose of strengthening the balloon, and affording an attachment to the framework and car. These are placed longitudinally, transversely, and diagonally round the balloon. Mr. Bell has also introduced some improvements in the valve apparatus.

The car is formed so as to fulfil the purposes of a canoe or boat, if required, and would, when a long voyage was contemplated, be provided with every requisite for sea. The propellers are on the principle of the screw-propeller. If two are used, they are placed one on each side of the car, as in the Engraving; if but one, it is placed between the car and the balloon, supported in a strong but light framework, to which is attached a rudder, the shape of which will often resemble its similarity to the tail of a bird). This apparatus is so constructed as to have a hinge and a rotating motion, so as to obtain the necessary movements of an external surface or fan, in all respects similar to the tail of a bird, so that the guiding or directing of the machine may be under the control of the aëronaut. By the combination of the above motions, the steering apparatus may be moved in any direction, either up or down, laterally, or in any diagonal of these, thus regulating the direction of the machine in its passage through the air.

The patentee has also a very ingenious apparatus, which he terms a water grapnel, for the purpose of arresting the progress of the machine, if required, when over water.

The machine which Mr. Bell has constructed upon this principle is capable of sustaining a weight of between 500 and 600lb., when inflated with the ordinary carbureted hydrogen. Its dimensions are about thirty feet in length by twenty-two feet diameter, made of the finest white silk, manufactured expressly for the purpose. The netting is composed of stout amber silk bands, two inches wide. These are placed double, and stitched together, having been previously carefully tested. On Monday night, after a long and wearisome preparation of the apparatus which was to effect the "locomotion," the balloon ascended in the presence of a considerable number of spectators—among them several individuals of scientific eminence. Mr. Bell himself was the only occupant of the car. The balloon, when it was fairly released from the tethers which held it to the ground, at once followed the course of the wind, and passed over the trees towards Cremorne, in which direction it continued to travel. We did not observe that the aëronaut had any specific control over the machine, beyond that of turning it round. It seemed to drift along the air like any other balloon; and it finally vanished from sight without any apparent retrogression.

We have engraved the Machine as originally constructed by the inventor, and differing, in some respects, from that employed on Monday.



In the Illustration, the car (*l*) is placed parallel to, and fastened beneath, the buoyant apparatus (*a*) by the bands *g g*, placed longitudinally and transversely round the balloon (*a a*), and diagonally, if great strength be required, as shown in part, and stitched where they cross one another, at *h*. *i i* is the framework of the balloon motor machine, and is composed of metal tubes. *e* is the top emptying valve. The tail apparatus is composed of a frame (*m*), more or less in the form of a bird's tail, over which some membrane may be stretched; or it may be made wholly of metal. This frame is moved upon a horizontal (*l*) by means of a running cord or chain (*y y*), passing from either surface of the tail fan (*m*), over pulleys on the ends of the branches of tubing (*n n*), passing down into the axis tubing (*o*), through which it is conveyed, and fixed to the periphery of the wheel (*p*) situated at the extremity of this tubing, as represented in the framework; or it may be in the car or boat: by these means a complete lateral motion is obtained. By turning the wheel (*p*) on its axis by the handle (*s*), in either direction, the one cord will be taken up on the periphery, while the other will be slackened out, causing the extremity of the tail to depart from the centre line. The partial rotation of the whole tail apparatus, just mentioned, is effected by the motion of a small lever (*y*), attached to the arms on either side of the wheel in which its pivot works; the arms being firmly attached to the tubing (*o*) on which the hinge of the tail fan (*m*) works. This tube is rotated by moving the lever (*y*) to either side, and hence it is called the axis tube; the tube in which it has the rotary motion is marked *r*. Two ratchets or fixing wheels (*x* and *x*), for the purpose of securing the tail (*m*) in its different positions, are attached to the wheel, which is held at any required point by the click *x*, which adjusts the position of the tail on its hinge motion (as before explained) by the cords *y y*; while the ratchet wheel *x* with its tube (*r*) affixed to the framework, secures the whole apparatus in any position obtained by its rotation with the tube (*o*), by means of the click *x*.

CALENDAR FOR THE WEEK.

SUNDAY, July 28.—Ninth sunday after Trinity.
MONDAY, 29.—Spanish Armada destroyed, 1588.
TUESDAY, 30.—William Penn died, 1718.
WEDNESDAY, 31.—Greenwich Hospital founded, 1696.
THURSDAY, August 1.—Lammas Day.
FRIDAY, 2.—Eruption of Vesuvius, 1847.
SATURDAY, 3.—Bank of England incorporated, 1732.

TIMES OF HIGH WATER AT LONDON BRIDGE,

FOR THE WEEK ENDING AUGUST 3, 1850.

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
M. h. m. 4 30	A. h. m. 4 45	A. h. m. 5 0	A. h. m. 5 20	A. h. m. 5 40	A. h. m. 5 55	A. h. m. 6 15
M. h. m. 6 40	A. h. m. 7 1	A. h. m. 7 17	A. h. m. 7 37	A. h. m. 7 55	M. h. m. 8 20	A. h. m. 8 32

MRS. FANNY A. KEMBLE.—ST. JAMES'S THEATRE.—READINGS of SHAKESPEARE.—Mr. MITCHELL respectfully announces that Mrs. FANNY A. KEMBLE is engaged for Six Readings of Shakspeare, beginning on MONDAY NEXT, July 29, with Shakspeare's play of THE TEMPEST; the Second Reading on WEDNESDAY, JULY 31, of the HIGHLAND SCOTTISH BALLADS; and the Third Reading, on FRIDAY, AUGUST 2nd, MEASURE FOR MEASURE; to commence each evening at Eight o'Clock precisely.—Stalls, 7s.; Boxes, 5s.; Pit, 3s.; Amphitheatre, 2s. Private Boxes, One Guinea, One Guinea-and-a-half, and Two Guineas.—Boxes, Stalls, and Tickets, may be secured at Mr. MITCHELL'S Royal Library, 33, Old Bond-street. Also at the Box office of the Theatre, which is open daily from Eleven till Five o'Clock.

ASTLEY'S ROYAL AMPHITHEATRE.—Proprietor and Manager, Mr. W. BATTY.—On TUESDAY, JULY 30, 1850, the Performances will commence at Seven o'Clock, with the magnificent Hippodrama of MAZEPPA and the WILD HORSE. Mazeppa, Mr. E. T. Hicks. To be followed by an unprecedented display of Equestrian and Gymnastic SCENES in the CIRQUE OLYMPIQUE. To conclude with a Comic Ballet.—Box-office open from Eleven till Four.—Stage-Manager, Mr. W. West.

MR. JOHN PARRY'S NEW ENTERTAINMENT, Music-Hall, Store-street.—Mr. JOHN PARRY will have the honour of opening his new Entertainment, entitled "NOTES, VOCAL and INSTRUMENTAL," at the above room, on MONDAY EVENING NEXT, July 29, commencing at Half-past Eight.—Tickets to be had of the principal music-sellers. Stalls and private boxes to be had only of Messrs. OLLIVIER, 41 and 43, New Bond-street, and at the hall.

THE HIPPOPOTAMUS, presented by H.H. the Viceroy of Egypt to the Zoological Society of London, is exhibited daily from One to Six o'clock, at their GARDENS in the REGENT'S PARK. The Band of the 1st Life Guards will perform by permission of Colonel Hall, every Saturday, at four o'clock. Admission, ONE SHILLING, on Mondays, SIXPENCE.
D. W. MITCHELL, R.A.

RE-ENGAGEMENT OF MONS. JULLIEN.
ROYAL SURREY ZOOLOGICAL GARDENS.—MONDAY, JULY 29, and three following days, Danson's PANORAMIC VIEW of the ALPS. Superb MINERVA and Recent Additions. Another Splendid ELEPHANT. PROMENADE CONCERT, conducted by Mr. Julien and M. Jullien's Band. Brilliant display of FIREWORKS on Saturday.—Doors open from 9 A.M. Feeding the Animals at Five; Concert at Half-past Six; Passage of the Alps, Night; Fireworks, Half-past Nine. Admission, 1s.

HER MOST GRACIOUS MAJESTY'S VISIT TO IRELAND illustrated by a Grand Moving Panorama, with some of the most charming scenery in that country, including the lovely lakes of Killarney, by Mr. F. Phillips, now open at the Queen Gallery, Hyde Park Corner.—Daily at 3, Evening at 8. Admission 1s.; Reserved Seats, 2s. An interesting historical record of the event may be had at the Gallery.

INDIA OVERLAND MAIL.—DIORAMA GALLERY of ILLUSTRATION, 14, REGENT-STREET.—Additional Pictures, MADRAS.—A Gigantic MOVING DIORAMA, ILLUSTRATING the ROUTE of the OVERLAND MAIL to INDIA, from Southampton to Madras and Calcutta, is now OPEN DAILY for the Season.—Twelve, Afternoon Three; Evening, Eight.—Admission, 1s.; Stalls, 2s. 6d.; Reserved Seats, 3s. Doors open half-an-hour previous to each Exhibition.

THE NILE.—IMPORTANT ADDITIONS to the Panorama of the Nile, direct from the Original Sketches. New Views of Cairo, Alexandria, Grand Cairo by Moonlight. Mosque of Mehemet Ali, Tombs of the Caliphs, Banks of the River are shown in the Panorama.—EGYPT and the PYRAMIDS Daily, at Three and Eight. Admission, 1s.; Private Boxes, 10s. 6d.; Children and Schools, Half-price.

ROYAL POLYTECHNIC INSTITUTION.—During this Season the ALPINE SINGERS from Styria will perform daily at Four, and in the Evening at Eight. LECTURE on CHEMISTRY, by J. H. Pepper, Esq. LECTURE by Dr. Bachhoffner on the VOLTAIC ELECTRICITY. NEW SERIES of DISSOLVING VIEWS. Grand Fête, and in the Evenings at a Quarter to Ten. Also a Series, exhibiting the SCENERY of the ARCTIC REGIONS and CEYLON, daily at One o'Clock. DIVERS and DIVING-Bells, &c. Admission, 1s., Schools, Half-price.

TO CORRESPONDENTS.

A CORRESPONDENT.—The quotation is from Thomson's "Autumn:"—
"Loveliness
Needs not the aid of foreign ornament,
But, when unadorn'd, adorn'd the most."

A CONSTANT READER.—The line,
"Procrastination is the thief of time,"
is from Young's "Night Thoughts."

G M, Stockton.—In our Journal for May 25, in the account of the *Atlantic* steamer, 95 feet is a misprint for 95 inches. A model of the *Great Britain* steam-ship appeared in No. 63. The *Oriental* steam-ship has not been *launched* in our pages; it is said to be built on the precise plan of Noah's Ark. The *Oriental* is engraved and described in the *London Saturday Journal*, No. 4.—Never.

C F S.—The following are EQUIRIES: 1. The sons of all Peers and Lords of Parliament; the eldest sons of the younger sons of Peers, and their eldest sons in perpetual succession. 2. Noblemen of other nations. 3. The eldest sons of Baronets and Knights. 4. Esquires created expressly with a collar of SS. 5. Persons to whom the Queen gives arms by her own letters patent, with the title of Esquire. 6. Esquires of the Bath, and the eldest sons of those Esquires. 7. Barristers-at-Law. 8. Justices of the Peace and Mayors. 9. Persons chosen Esquires to the body of the Prince. 10. Persons attending on the Sovereign's Coronation, or employed in any superior office of trust under the Crown. 11. Persons who are styled Esquires by the Sovereign in their patents, commissions, or appointments, such as Sheriffs of counties and Captains in the army and navy. 12. Attorneys in the Colonies where the departments of counsel and attorney are united.

W S C S.—A person who has no paternal coat of arms cannot bear the shield of his mother or grandmother.

HELEN.—"Always the same" is the required translation.

A SUBSCRIBER.—The Red of Battle Abbey is published by Mr. Churton, 26, Holles-street, Cavendish-square.

T ELLIS, Wexford.—A coin of James I. of no value.

H B.—A Nuremberg jetton struck by Hanss Krawwinckel, of no value.

AN ADMIRER.—"Carpenter's Angling," and "Falls on the Rat;" of any bookseller.

S P.—The present population of the metropolis is 2½ millions.

H D had better apply to the keeper of the Print Room for the precise conditions.

S A Y.—Synonymous; divination by the dead.

W P S, Edinburgh.—We have not room for your letter.

J W, Windsor.—We shall be glad to see a sketch of the line.

A R, Cheshire, is thanked; but we have not room for the illustration.

F ELLS, Montreal.—The Queen is addressed as "Falls on the Rat."

M W.—Observations on the Wire-Worm are contained in No. 387 of the ILLUSTRATED LONDON NEWS.

AN ORIGINAL SUBSCRIBER.—Address Thurloe-square, Brompton.

R U M Canterbury.—London Stone remains in *statu quo*, within a large stone case built into the outer or west wall of St. Swithin's Church, Cannon-street.

A G, Birkenhead.—The population of Scotland, at the last census, was 2,569,000; of London, 1,824,510.

ZERO.—Apply, with your cob, to Mr. Webster, 17, Great Russell-street, Covent-garden.

T P, Malta.—Is thanked for the extended copy to a few copies.

A TOURIST, Queenstown, may purchase a Daguerréotype apparatus, with Instructions, of Horne and Co., 13, Newgate-street.

M and R, Plymouth.—The views in our Journal are copyright.

J K.—Apply to Sir Henry Ellis, British Museum.

A SETTLER ON LAKE SIMCOE.—Received.

SIGMA, Paisley.—The address of Mr George Hudson is Albert Gate, Hyde Park. Of Mr. I. K. Brunel, 18, Duke-street, Westminster.

H M, Dublin.—The hedgehog is a full destroyer of cockroaches.

ARGOLA.—See the "Shilling Handbook of Oil-Painting."

M H, near Cricklade, is thanked, though we could not avail ourselves of his suggestion.

GRATTAN.—François Benjamin Courvoisier was executed July 6, 1840, for the murder of Lord William Russell.

STUDIOS, to rightly understand Specific Gravities, should learn the use of the Decimalsystem.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, JULY 27, 1850.

No public man who ever lived or died in England ever received more approbrium from some sections of the community in his lifetime, or more honour from all sections and classes of the community after his death, than the lamented Sir R. Peel. The opprobrium has died away, and no one now remembers anything except to his credit and renown. From the most illustrious of our living senators to the humblest mechanic earning his daily bread by the honest labour of his hands—all ranks of the people have vied with each other in consigning to oblivion the party-heats and animosities which his name once excited, and in testifying their high sense of his merits as a legislator and a minister, and his unsullied character as a man. Every imaginable honour has been rendered to his memory. The Sovereign offered rank to his family, which was refused. The Parliament unanimously voted him a monument in Westminster Abbey. City after city, and town after town, resolved to erect in their thoroughfares some enduring memorial of stone or bronze to carry down his features to posterity, and incite the young and the aspiring to imitate his good example. Pitt and Canning, beloved and lamented as they were, received no such heartfelt tributes of regretful admiration as have been poured upon the untimely grave of Peel. One reason of this, doubtless, to be found in the fact that their deaths were not so melancholy or so sudden; though, perhaps, another reason less suspected, is the fact that the popular sympathies of those days were not quite so well educated as they are at present; and that the kindly feelings, which it must be admitted that our press, with all its short-comings and imperfections, now strives most successfully to inculcate, daily and weekly in every corner of the realm, were not brought, in those earlier periods, within the sphere of a great multitude of toiling and struggling men. It is highly creditable to the intelligence of the people of this country, that the death of the great statesman should have excited such feelings. It is equally creditable that the public men who have been engaged on opposite sides of the political questions with which his name is identified, and who in his lifetime may have been unsparing in their denunciations of his acts, and in their criticisms of his motives, should have come forward with such a perfect unanimity of gentleness, regret, and charity, when it was a question of doing honour to his memory. The war of politics and parties has been said to be suspended, and to encrust it with suspicion and selfishness. That it does not always happen so, the events of the last three weeks sufficiently prove. It needed but one more manifestation of sympathy, to complete the tribute of Great Britain to the memory of her illustrious son. That tribute was afforded in the meeting which was held on Tuesday last, at Willis's Rooms, to devise the means of erecting a monument to his memory in the city of Westminster. The Duke of Wellington, the colleague and staunch personal friend of the deceased in all the great measures of his career, and Sir R. Peel is indelibly associated in the page of English history, attended the meeting, and gave it the crowning grace in the eyes of the country.

But, while cordially agreeing with the numerous cities and towns which have resolved to do honour to the memory of Sir Robert Peel, we would ask some of the more populous of them to consider whether a statue is, after all, the best mode of carrying out their own good intentions? A national statue in Westminster Abbey, among the great men of British history, another in the open street contiguous to the Houses of the Legislature, and a third in the city of London, are surely sufficient in the way of sculpture to do honour even to the memory of Sir Robert Peel. The man who refused rank for himself and title for his family, who was an enemy of ostentation, glitter, and pomp, and whose pride it was to be remembered as the friend of the poor, would not, if by any possibility he could be consulted in the matter, give his assent to the erection of so many costly and useless statues as it is now proposed to set up. The three statues we have named might well suffice; and we think that the town or city which shall first set the example of founding some useful establishment in connexion with the name of the departed statesman, will do more honour to itself than by erecting a statue, and effect more good in other parts of the country. A Peel Park for the people—a Peel Institute, where the poorest might receive instruction—a Peel Botanic Garden, open free to all classes—a Peel Library, to lend the treasures of literature to the young and old—these are but a few of the many modes in which the memory of Sir Robert Peel's admirers might be expended with advantage to the world, and with fully as much, if not more honour to his name, than by the multiplication of statues. We trust that something of the kind will yet be done, and that the practical man will be practically honoured. Were he alive to give his aid in doing honour to the memory of another, we may be tolerably certain that a useful memorial would enlist his sympathy and aid in preference to a useless one. Not that we think statues to be useless, but that we think three, or even one, to be sufficient. Let Birmingham, Liverpool, Manchester, or Glasgow set the example: other towns will not be slow to follow.

THE sudden death of General Zachary Taylor, the President of the United States of America, is an event to be deplored, both on personal and public grounds; and though it will not be felt in Europe with the same intensity as in America, will react even here. The late president, though commonly considered no more than a soldier, was a man of tact, prudence, ability, and strong common sense. He played a highly useful part in American politics; and kept within the bounds of moderation the powerful and hostile parties that divide the North and South on the question of slavery. He also held in check the free-trader and the high tariff or protectionist parties, and lent his great name as an equipoise. All parties confided in his honesty and his prudence. His successor, Mr. Fillmore, does not enjoy so high a political character, or inspire such general confidence. He is chiefly known as a partizan; and the experience which the world has lately had of such Presidents as Messrs. Tyler and Polk, is not of a character to make it look forward with any very great satisfaction to the enjoyment of power by another of the same class. It would appear, however, that, as far as this country is concerned, the lamented death of General Taylor will not be productive of any immediate change. Mr. Fillmore believes that the United States can not only produce, but that they can manufacture all that they need; and that English iron and English cotton goods might fairly be subjected to high duties for the encouragement of native industry. It remains to be seen, however, whether his present responsibilities will modify the new President's views in this matter, and whether the difficulty of his high position will not teach him that prudence, which need do not always display when out of power, but which they generally exhibit when they have to act as well as to speak. General Taylor, though a staunch, honest, unflinching, and successful warrior, was no friend of war. He was too sagacious not to see that war was an unmitigated evil. As a soldier, he obeyed orders, and brought the unhappy dispute with Mexico to a brilliant termination; but, as a statesman, he uniformly did his utmost to preserve to his country the blessings of peace. It was at one time suspected in Europe that he had not been altogether honest in his efforts to discourage or prevent the reckless and unjustifiable invasion of Cuba; but more authentic statements afterwards received, and cooler consideration of all that had been done by the American Executive, led to a more charitable verdict upon his proceedings. It was ultimately the belief of the best-informed politicians of Europe and America, that the personal honesty of the American Government in the whole business was not to be questioned. General Taylor has left a fair name in both hemispheres, and is sincerely regretted in his own country by men of all ranks and parties. We have yet to learn the true character of his successor.

COURT AND HAUT TON.

THE COURT AT OSBORNE.

We announced last week the departure of the Queen for her Majesty's marine residence in the Isle of Wight. The Royal movements since that date have been confined to occasional drives through the island, and in the grounds of Osborne. On Friday last, the Court visited Carisbrook Castle. The Royal party occupied two *chars-à-banc*, each drawn by four horses, the Queen riding on horseback in her Majesty by Louis Philippe, and occupying the front seat with Prince Leopold of Saxe-Coburg, the Prince Consort and some of the Royal children, with the Ladies in Waiting, being also in the same carriage. On arriving at the castle, her Majesty accompanied Prince Leopold through the precincts of the castle, and on reaching a point whence a window from which Charles I. endeavoured to effect his escape is seen to the greatest advantage, her Majesty pointed out and explained to her illustrious relative the historical incident referred to. The Royal party remained more than an hour in exploring the castle and its appurtenances, and, among other curious matters, witnessed the mode of drawing water from a well 300 feet deep by means of a donkey. Her Majesty returned to Osborne by Carisbrook Tower road, and in passing through Newport the Royal party were received with every demonstration of loyal affection.

On Saturday evening, Herr Dase had the honour of displaying his wonderful calculating powers before her Majesty the Queen, and his Royal Highness Prince Albert.

On Sunday forenoon her Majesty and his Royal Highness Prince Albert, the Princess Royal, and the ladies and gentlemen in waiting attended divine service, at Whippingham Church. The Rev. J. Protheroe officiated.

On Monday their Royal Highnesses the Duke and Duchess of Nemours arrived at Osborne, on a visit to her Majesty and the Prince.

On Tuesday Lord John Russell arrived at Osborne, and had the honour of joining the Royal dinner party. His Lordship returned to London on Wednesday morning.

The Duke and Duchess of Buccleuch, and Sir James Clarke, have enjoyed the Royal hospitality during the week.

THE DUCHESS OF KENT.—Her Royal Highness the Duchess of Kent crossed from Calais, at ten o'clock on Tuesday morning, crossed to Dover, and travelled to town, attended by her suite, by the South-Eastern Railway. Her Royal Highness alighted at the Bricklayers' Arms station, and immediately proceeded to her residence, Clarence House, St. James's, where the Royal Duchess arrived at a quarter before three o'clock. Her Royal Highness was attended by the Baroness de Speth, Sir George Couper, Bart., and Lord James Murray.

Their Royal Highnesses the Duke and Duchess of Nemours, and his Serene Highness the Prince Leopold of Saxe-Coburg-Gotha, took leave of the Queen and Prince Albert on Thursday morning, and left Osborne for London.

Colonel Wylde has relieved Colonel the Hon. C. Grey as Equerry in Waiting to Prince Albert.

His Excellency the Turkish Ambassador gave a grand banquet and ball at the residence of the embassy in Bryanstone-square, on Tuesday last. The entertainment was attended by all the members of the *corps diplomatique* and aristocracy at present in the metropolis.

The Marquis of Normanby left London on Saturday, for Dover, en route for Paris. The noble marquis is expected to visit Baden-Baden next month. The Marchioness has left town for Malmesbury Castle, Wiltshire.

The Baroness Brunnow's ball, in honour of her Imperial Majesty the Empress of Russia's birthday, which was to have taken place on the 16th instant, and was postponed, is finally fixed for Monday, the 5th of August.

Lady Howard de Walden and the Hon. Miss Ellis have left town for Brussels.

Mr. Repton, M.P., and Lady Jane Repton, have left town on a Continental tour.

We understand that the Ministerial white bait dinner is fixed for the 3rd of August.

METROPOLITAN NEWS

MEMORIAL TO SIR ROBERT PEEL.

A very numerous meeting took place on Tuesday, at Willis's Rooms, St. ..., for the purpose of promoting some scheme for perpetuating the memory of the late Sir Robert Peel. Amongst the company present were, the Duke of Wellington, the Earl of Aberdeen, Lord Monteagle, Lord Hardinge, Sir Charles Douglas, M.P., Lieutenant Colonel Estcourt, M.P., Mr. Elliot Lockhart, M.P., Lieutenant-Colonel Sir George Rice Trevor, Sir Thomas Herbert, M.P., Admiral Gordon, M.P., Sir William Verner, Bart., M.P., Lord Forrester, Lord Ashley, Earl of Bathurst, Lords Newry and Morne, Hon. Colonel Carnegie, &c.

On the motion of his Grace the Duke of Wellington, Lord Aberdeen took the chair

The noble Chairman said, there might, perhaps, be some parties present who did not concur in the opinions which the late Sir Robert Peel held; and he would, therefore, abstain from entering into any detailed review of his long political career, but confine his remarks to the numerous private virtues of that great and good man. He would allude only to the transcendent abilities and unstinting industry, the patriotic motives which had ever influenced his conduct, and the spotless integrity of his public and private character. (Hear, hear.) The Committee of England should unanimously decree that a monument should be erected to his memory in that spot which was the receptacle of the monuments of the wise, the good, and the great. (Hear.) It was for them to raise a testimonial in some fitting part of this great city, which would be appreciated by future ages, in succeeding generations, to imitate his virtues and rival the good he had so eminently effected.

The Duke of Wellington rose to move the first resolution, as follows:—

That this meeting desires to express a deep sense of the irreparable loss which this country has sustained by the death of Sir Robert Peel, and to perpetuate by some enduring memorial the recollection of his eminent talents, his unremitting and laborious exertions in the service of his country, and his exemplary private virtues.

Concurring as he did in the object they had in view, he would most willingly have taken the chair on the present occasion, had he not been afflicted with deafness, which rendered him unfit for such a position; but it was unnecessary for him to do anything to convince the world that he had ever been one of the earnest admirers of the late Sir Robert Peel. (Cheers.) He had received the highest honour in his opinion of the loss the country had sustained, and therefore it would not be necessary for him to dwell upon that point. Their noble chairman had explained the object of the present meeting, and had stated his intention to make reference to the various political events in the career of the late Sir Robert Peel. He had had occasion to applaud the magnanimity of those who had expressed their feelings of unmitigated regret at the death of the great statesman, and at the same time suppressed all allusions to political matters. He could say that no man more highly appreciated the merits of the late Sir Robert Peel than he did: he had closely watched his career for his opinion of more than a quarter of a century, and he could unhesitatingly say that no statesman had devoted more time, more energy, or more ability to the service of his country than his late lamented friend. (Loud cheers.) There could be no difference of opinion as to his talents, his acquirements, his unremitting attention to the interests of his country, and his private virtues (hear, hear); all must concur in admiration of these qualities, which he possessed in so eminent a degree. (Hear, hear.) He (the Duke) moved, in the object of this meeting, and felt a melancholy pleasure in bearing tribute to the worth of his late lamented friend. (Loud cheers.)

Lord Ashley seconded the resolution, which was carried unanimously.

Lord Harding, in moving the second resolution, said, he had no claim to the melancholy duty of taking part in these proceedings but that of being intimately connected, both publicly and privately, with the late lamented statesman. He rejoiced to see so many of his friends present. He could not venture to give expression to his feelings on the present distressing occasion, and he could beg to move—

That a committee be appointed to collect subscriptions, and to consider the best means of carrying the foregoing resolution into effect, and that the committee do consist of the following noblemen and gentlemen, with power to add to their number:—Lord Hardinge, Mr. Wortley, the Duke of Wellington, Sir J. Graham, Mr. Cardwell, &c.

Mr. B. Estcourt seconded the resolution, and expressed his condolence with he widow and family of the lamented deceased at the irreparable loss they had sustained.

The resolution was carried unanimously; and the chairman having briefly acknowledged a vote of thanks, the meeting broke up.

ELECTION OF SHERIFF.—Pursuant to a precept from the Lord Mayor, a common hall was holden on Monday at the Guildhall, for the election of a fit and able person to be one of the Sheriffs of the City of London, in the room of Andrew Caldecott, Esq., who has been elected in the week preceding by the Court of Aldermen. At a few minutes past one o'clock, the Lord Mayor, accompanied by several aldermen and the other City functionaries, appeared on the hustings; when Mr. Deputy Harrison proposed Mr. George E. Hodgkinson, of Upper Thornhaugh-street, Bedford-square, as sub-sheriff and office-keeper, to fill the vacant office.—Mr. Dakin seconded the nomination. Mr. Lowe proposed Mr. C. S. Butler, magistrate of Middlesex, a gentleman of considerable property.—Mr. Wyld seconded the nomination of Mr. Butler. The Livery had a right to take the matter into their own hands. The office of Sheriff ought not to go begging; but the Livery ought to beg their man, and then he was sure that the Livery would have no difficulty on behalf of Mr. Butler. The show of hands was declared to be in favour of Mr. Hodgkinson; when Mr Lowe demanded a poll, which would fill the office with advantage. The Rev. M. Morgan seconded the nomination. On reaching the street the Count was loudly cheered by the assembled crowd, and, in return to the greetings, the Count, just as he was stepping into his carriage, bowed to the people and said, "My friends, I thank you more I thank you all." In the afternoon Vespers was sung, and the chapel was attended by the Countess de Neuilly, the Duchess d'Orleans, the Duchess d'Aumale, and the Count de Paris. The ex-King was too fatigued to attend the latter office of the Church.

THE SECURITIES FOR ADVANCES BILL.—DEPUTATION TO LORD JOHN RUSSELL.—A deputation from the attorneys and solicitors of Ireland engaged in cases pending in the Incumbered Estates Court, waited upon the Government on the First Lord of the Treasury, at his private residence, Chesham-place, on Saturday last, to press on the consideration of Government the importance of re-introducing the Security for Advances Bill, as brought in by the present Attorney-General The deputation was accompanied by a large number of Irish members. Having stated their object, and pointed out the evils which would arise from Sir James Remilly's bill being held over till next session, they were informed by Lord John Russell that the views of the Government had not been changed in reference to the principle of the bill; considering, however, the opposition which the bill had experienced, he thought the most prudent course would be to bring it forward next session. If, however, the opposition were not persevered in, it would be matter for the consideration of the Government whether they would not yield to the wishes expressed, and re-introduce it this session. The deputation then withdrew, and proceeded to put themselves in communication with Mr. Stuart, who led the opposition to the bill in the House of Commons, the result of which was, that that hon. gentleman would not withdraw his opposition to the measure, and the bill will not be re-introduced until the next session.

SOUTH LONDON FLORICULTURAL SOCIETY.—The ordinary attractions of the Surrey Zoological Gardens were, on Tuesday, increased by the addition of a flower show by the South London Floricultural Society. The show, as a whole a good one, abounding in excellent specimens of fuchsias, ... verbenas. Cape heaths, picotees (of which the show was more than usually fine (the specimens being very large), in the various stands of cut flowers, were shown with grapes and other fruits. Prizes were as usual awarded, but the list is too long for insertion. Mr. Cole, gardener to Mr. Collyer, of Dartford, ... particularly distinguished himself; and two amateurs ...

MODE OF ARCHITECTURAL EXPERIMENTS IN THE NEW HOUSE OF COMMONS.—It has been decided by the committee to try the effect of lowering the roof of the New House of Commons. Mr. Barry's original intention, before the temporary erection of light iron roofs were erected, the cost of which will not exceed £100; and when this alteration shall be made, it is proposed to test the acoustic properties of the chamber in another sitting before the end of the session. We believe that on Monday next, the 29th inst., the new experiment will be put to the proof.

THE NATIONAL PEEL TESTIMONIAL.—On Saturday last a very numerous and influential meeting of the committee of the National Peel Testimonial was held at the Mansion-House; the Right Hon. the Lord Mayor in the chair. The committee was attended by the Chairman and Deputy-Chairman of the East India Company, Mr. Labouchere, M.P., Mr. Hume, M.P., Mr. J. Hume, M.P., Mr. Bennett, Mr. Phillips, Mr. Tite, Sir E. N. Buxton, Mr. Sheriff Nicoll, and several other gentlemen. Resolutions were passed appointing sub-committees; and after various letters from country towns, offering to get up subscriptions in aid of the fund, had been read, and other business had been transacted, it was resolved that the general committee should ... assemble on the 20th of August to receive a report as to the amount of the subscriptions, and to determine on the nature of the testimonial.

EXTENSIVE ROBBERY OF CALIFORNIAN GOLD.—An extensive robbery was committed at a late hour on Monday night, in a German lodging-house (formerly the Lambeth-street post-office), Church-street, and other houses in Church-street and Lambeth-street, Whitechapel. The house in question is in the occupation of a German named Wernsch, who is conducting a similar establishment in Liverpool, and his wife has been managing the establishment in Whitechapel On Saturday or Sunday last, an Italian named Giacomo Sentis, and a Frenchman, named Nicolo Prosper Calliaux, arrived in London from California, and hired lodgings at Wernsch's house. They had been very fortunate in the "digging" in the Californian gold country, and brought with them a large quantity of gold dust, to the amount of £3000, in a carpet bag, which contained 216 ounces of gold dust and 16 small lumps of gold, weighing an ounce each, and a small wooden box, 18 inches by 9 inches, which contained 281 pounds of gold dust. The whole of treasure was deposited in the rooms hired by the owners, in the second floor of the house. On Monday Sentis and Calliaux went to the City, and visited several bullion dealers with samples of the gold, which was declared to be of the very purest quality, and a high price was offered for it, but they deferred the sale till another day. On the same (Monday) evening, the two foreigners proceeded to Vauxhall Gardens in company with Mrs. Wernsch, having first locked up their rooms. They did not return from Vauxhall until three o'clock on Tuesday morning, when it was discovered that their apartments had been entered by means of false keys while they were absent, and their luggage ransacked; the carpet-bag and wooden box were forced open, and the whole of the gold was missing. Suspicion immediately fell upon two waiters of the house, named Christian, a German, and Peter Vanderhost, a Dutchman, formerly steward of the *Batterner*, Rotterdam steamer. Information was immediately given to the police, and on Tuesday night some of the detective officers of the H division proceeded to a German lodging-house, No. 45, Burr street, at the back of the St. Katherine's Docks, where they found Vanderhost concealed, and took him into custody, when he dropped on the floor a few lumps of gold, part of the stolen property, and equal in weight to two hundred sovereigns, of which the police took possession.—On Wednesday, he was brought up at the Thames Police-office, together with a man named Fitzhenness, a German touter; Margaret Hermann, a German; and Conrad Hermann, all of whom were charged before Mr. Yardley with the robbery. Vanderhost having made a statement implicating them and Christian. A great many witnesses were examined, who gave such a strong case against the prisoners. The police officers had no doubt that Christian was in possession of the rest of the gold, and they believed he could not escape. Mr. Yardley remanded the prisoners for a week.

BIRTHS AND DEATHS.—Births registered in the week ending Saturday, July 20—Males, 592; females, 591: total, 1193. Deaths during the same period—Males, 424; females, 439: total, 863. The return of deaths exhibits a small increase The deaths registered in the two previous weeks were 754, 781; those in the week ending last Saturday were 863. Five deaths were ascribed last week to cholera; 20 were registered in the same week of 1849, 21 in that of 1848, and 6781 in that of 1849.

METEOROLOGICAL OBSERVATIONS.—The mean reading of the barometer for the week at the Royal Observatory, Greenwich, was 29.814 inches. The mean temperature was 60 6 degrees, which is four degrees above the average of the month, and two degrees above the average of the week. Monday was ranged between 8 degrees and 12 degrees hicher than the average of the same days. The temperature was highest on Tuesday; and on that day the highest in the shade was 87 deg., and the highest in the sun 103 degrees.

CHURCH, UNIVERSITIES, &c.

PREFERMENTS AND APPOINTMENTS.—The Rev. Walter John Partridge, to the rectory of Caston, Norfolk. The Rev. James Hodges, to the vicarage of Blackmore, Essex. The Rev. J. S. Ogle, to the vicarage of Flamborough, Lincolnshire. The Rev. R. Charlton, to the perpetual curacy and new church of St. John, Kingsdown, Hingwood, Kent; patron, William Curling, Esq. The Rev. A. L. Courtenay, to St. James's Chapel, Pentonville. The H. W. Cracroft, to Harrington rectory, Lincolnshire, value £240, with residence, and Brinkhill rectory, value £137; patron, R. Cracroft, Esq. The Rev. J. Dolphin, vicar of Antingham, Norfolk, to be Chaplain to the Sheriff of Essex. Very Rev. G. E. Hiot, Dean of Bristol, to Orveston vicarage, Gloucester, value, £799, with residence; patron, the Dean and Chapter of Bristol. The Rev. G. B. Richardson, to the chaplaincy of the Borough Goal, Leeds. Rev. E. Hawkins, to Chanson Chapel, Mayfair, St. George, Hanover-square; value £400; patron, Earl Howe. Rev. H. Nicholls, to Ilmington vicarage, Gloucestershire, value £443; patron, Lord Chancellor. Rev. G. H. Scott, to Rhos-Crowther rectory, Pembrokeshire, value £307, with residence; patron, Lord Chancellor. Rev. J. Aubrey Scott, to the rectory of West Tytherley, Hants.

APPOINTMENTS.—Sheild V., Sussex, dio. Chichester; value £180, with residence; pats., Miss Debany; Rev. G. H. Scott, prom. Yarmouth, Great, St. Nicholas C., Norfolk; pat., the incumbent. Chaplaincy of Leominster Union; pat., Rev. G. Robinson, dec. St. Alban's, Herts, Second Mastership of King Edward the Sixth's Grammar-School; Rev. T. F. Lee, prom. Boston Chapel of Ease, co. and dio. Lincoln; stipend, £100; pat., the incumbent. Tunstall, Staffordshire, Lichfield dio.; pat., the Bishop; the incumbent. Gloucester County Gaol; stipend, £250; application before July 31. Kirkham, Lancashire, Second Master'ship of Grammar-School.

[illegible] The Rev. Richard Whittington, upon having the curacy of St. Peter's, Saffron-hill, from the teachers of the Sunday-Schools connected with that Church, the Rev. Manasseh Baxter Dorrington, late of Foston-on-the-Wold, Yorkshire; the Rev. S. B. Webb, from the congregation of St. John's Church, Longsight.

CONSECRATION OF THE BISHOP OF MONTREAL.—Thursday being the festival of St James, the ceremony of consecrating the Rev. Dr. Francis Fulford, the newly-appointed Bishop of Montreal, took place at Westminster Abbey, in the presence of a large concourse of people. The Archbishop of Canterbury officiated on the occasion, assisted by the Bishops of Norwich, Oxford, Lincoln, Chester, and Toronto. A sermon was preached by the Rev. Mr. Jeune, from the 28th chapter of St. Matthew; 18th, 19th, and 20th verses:—"And Jesus came and spake unto them, saying, all power is given unto me in Heaven and in Earth. Go ye, therefore, and teach all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost; teaching them to observe all things whatsoever I have commanded you: and lo, I am with you always, even unto the end of the world. Amen." The bench, or choir, chancellors, prebendaries, the chief minor canons, canon's verger, canons, dean's verger, sub-dean, Bishop's assistant, Archbishop's verger, chaplains of the Archbishop, and his [illegible] secretary and Bishop of Montreal, proceeded to perform the usual duties. Sacrifice was shall illustrate the impressive ceremony.

COUNTRY NEWS.

TAMWORTH ELECTION.—Sir Robert Peel, who has been returned for Tamworth in the room of his late lamented distinguished father, has issued an address to his constituents, in which, after thanking them for their support, he says:—"You have received from me no more specific declaration of my political opinions than that contained in my former address, and I am sure you would be as unwilling to fetter my actions, as an independent member, as I should have been to pledge myself to any particular course, which, in the rapid progress of public opinion, might hereafter be proved inconsistent with the interests of the country; I trust, however, after a certain lapse of time, that you will have had an opportunity of reviewing my conduct in Parliament, you may agree that I have discharged my duties in a manner worthy the approbation of my constituents, and entitling me to a continuance of those favours I now so sincerely acknowledge."

DINNER AT YORK TO THE LORD MAYOR OF LONDON.—His Royal Highness Prince Albert has graciously signified his intention to dine with the Lord Mayor of York upon the occasion of the entertainment of the Right Hon. the Lord Mayor of London in that city in October Prince Albert will very shortly fix the day.

F I N E A R T S.

THE POLITICIAN."—BY HASENCLEVER.

THE POLITICIAN.

THE author of this clever picture, Herr Hasenclever, is, we believe, resident in Munich. There is, at least, no mistaking the numerous beer-jugs as designating some tavern where the renowned *Baierisches bier* (Bavarian beer) is the habitual beverage. It designates a comparatively modern period, as it is only lately that the Germans have become such intense politicians as to neglect their supper, their favourite meal, for the newspaper. The principal figure in the picture is so immersed in the *Politische Zeitung* (political tidings) that he does not notice the dog eating his fish and upsetting his beer. The two other figures in the background playing at draughts and sending forth huge volumes of tobacco-smoke, are quite in accordance with the general character of the German hotel, *keller*, or *wirthshaus*. Nor is the laughing *jungfrau*, half obscured by the smoke, an unnecessary adjunct; though in the better class of coffee-houses and hotels young men are now much more employed than maidens. Waiters, in fact, are regularly brought up to the trade in Germany, and go out in *lehre*, or as apprentices, or go for their *wander-jahr* almost as regularly as artisans. To dissipate time in places of public resort like that graphically described by Herr Hasenclever, and in such amusements as he depicts, is common in all the towns of Germany as well as Munich. They are all well provided with taverns, where the inhabitants meet to play *kegel-bahn* (bowls), dominoes, draughts, smoke their pipes, and sip their coffee, or drink their beer or their old Rhenish wine. They grace the *table d'hôte* with their presence at dinner about one o'clock; they take their coffee about three or four in some garden, according to the season, their families frequently sharing that with them; and they sup in some wine-cellar or common *wirthshaus* about eight or nine, or after the play, which is generally over before ten. The Germans are a social people, very fond of conversation; and notwithstanding what Madame de Staël asserted, who had the misfortune not to understand their language, by no means bad talkers. The generally good education they receive enables them to say something useful and entertaining, if not always sprightly, on almost all subjects except politics; but they delight chiefly in discoursing about music, the theatres, and natural history. They do not bore one another with polemics, nor are they at all fanatical. In some of their large cities their public hotels are as splendid as any in Europe, and in them they generally enjoy the regal luxury of music at their meals. Even at the more common taverns, it is not unusual to find musicians and singers who entertain the smoking, sipping, playing company. Since the outbreaks, insurrections, and revolutions, political excitement and fierce political conversation interrupt the easy flow of good-natured gossip in which the Germans were wont to indulge. Herr Hasenclever has depicted the condition of politics and draughts, of beer and newspapers, to which they have now arrived. It would add much to the placid charms of life—at least, the Germans think so—could politics be dispensed with; but, as that is impracticable till nations cease to suffer from misgovernment, the next best thing is to have politics good, pure, and unmixed; and the Germans will scarcely succeed in obtaining good government for themselves till they separate their political pursuits from beer and draughts. One is about the most important business that man can engage in—the other about the most trifling amusement that ever wasted his time.

THE WINDMILL OF SANS SOUCI.

THIS Windmill possesses a very interesting association, which has just been revived by a special reference to its history in the celebrated speech of Lord Palmerston, in defence of his policy in the Greek affair, delivered in the House of Commons, on the night of the 25th ult. His Lordship, in referring to the case of Mr. Finlay, whom the Greek Government had neglected to compensate for some land taken from him, observed that their conduct "was very different from that of Frederick the Great towards one of his subjects, a man of humble rank. This man refused to sell to his sovereign a little bit of ground on which a windmill stood, the ground being necessary for the completion of a magnificent plan of a residence for the monarch. The case which occurred in Prussia was very different from that which occurred in Greece. The King of Prussia, though a conqueror in the field and the absolute monarch of a great country, respected the rights of a subject, and not only left the monument of the independence of his subject standing in the midst of his ornamented grounds, but even used to point to it with pride, feeling that if he was great and powerful, he knew at least how to respect the rights of the meanest"

THE WINDMILL OF SANS SOUCI

The famous Windmill of Sans Souci stands close behind the palace, and still belongs to the descendants of the miller who refused to give it up to Frederick, when he wanted to pull it down and include the ground in his own gardens, which are rather confined on that side. The original mill was a very small one; but after Frederick lost a lawsuit against the miller, he erected for him the present mill on a much larger scale. Some years ago, adverse circumstances compelled the owner of the mill to make up his mind to part with it. He, in consequence, offered it for sale to the late king, who, instead of availing himself of the opportunity, generously settled on the miller a sum sufficient to extricate him from his difficulties, and enable him to maintain himself on his property, saying that the mill now belonged to Prussian history, and was in a manner a national monument.

We have to thank Mr. Charles Warren, manager of the Panorama of the Nile, as the medium of our being favoured with the accompanying Sketch.

THE GORHAM CASE.

IN the Arches Court, on Saturday last, Dr. Addams, on behalf of the Bishop of Exeter, stated that, in obedience to the monition personally served on his Lordship, he now brought in the presentation. He also begged to state, that the Bishop never had the slightest intention of resisting the monition or the other Courts had refused to issue the prohibition. The presentation was accompanied by a protest to it, merely explanatory of the course pursued by his Lordship, and he did not anticipate the slightest objection to its reception.

Mr. Bowdler (the proctor for Mr. Gorham) said that he had had no opportunity of seeing the protest; its reception was a matter for the consideration of the Court. It affected the question of the regularity of the proceedings.

The learned Judge said, that, unless the presentation had been brought in, the prayer of Mr. Bowdler would have been to pronounce the Bishop in contempt. The protest ought not to have been brought in in the manner in which it was now done; it should have been delivered long ago. He thought the Court had not been well used; and directed the presentation to be received, and the protest to be rejected.

Mr. Bowdler prayed the Court to appoint a convenient time for the institution of Mr. Gorham.

The learned Judge doubted whether he could proceed to the institution without a fiat from the Archbishop of Canterbury.

Mr. Bowdler stated that an arrangement had been made for issuing the fiat. The learned Judge was quite ready to do whatever the Archbishop directed. When the fiat was obtained he would proceed to the institution, but it was not necessary that that should take place in open court.

Mr. Bowdler would, with the permission of the Court, take another opportunity of mentioning the case, which was ordered to stand over.

The following is the protest of the Bishop of Exeter, which the Judge recited. It is too remarkable a document to justify us in imitating him. We give it entire:—

THE BISHOP OF EXETER'S PROTEST.

In the name of the Holy Trinity. Amen.—We, Henry, by divine permission Bishop of Exeter, having been monished by this venerable Court of Arches to bring into the registry of the same the presentation made to us by her Majesty Queen Victoria as patron of the Vicarage of Brampford Speke, in our said diocese, commanding us to institute the Reverend George Cornelius Gorham, Clerk, Bachelor of Divinity, to the church of the said parish, and to the care and government of the souls of the parishioners of the same—which presentation aforesaid, notwithstanding we have found it to be our duty to refuse to admit and institute the said Reverend George Cornelius Gorham to the said church and cure of souls, inasmuch as it hath manifestly appeared to, and hath been adjudged by us after due examination had, that the said clerk was and is not fit to be entrusted with such cure of souls, by reason of his having held and continuing to hold certain false and unsound doctrines, contrary to the pure Catholic Faith, and to the doctrines set forth and taught in the Thirty-nine Articles of the Church of England, and in the Book of Common Prayer and Administration of the Sacraments, according to the use of the said church, against which our refusal to institute him, as aforesaid, the said clerk did prosecute his suit, called *Duplex Querela*, in this said venerable court, and such suit was by the same, after due hearing, solemnly refused and rejected, whereupon the said clerk did appeal to the judgment of her Majesty in Council, and her Majesty in Council hath remitted the cause to this venerable court, declaring that we the said Bishop have not shown sufficient cause why we did not institute the said George Cornelius Gorham to the said vicarage of Brampford-Speke, and commanding that right and justice be in this court done in this matter pursuant to the said declaration. Do hereby, in obedience to the mandion of the Court, bring into the registry of the same the said presentation—

Under protest, that whereas her said Majesty, before she remitted the said cause to this court with the declaration aforesaid, did refer the same to the Judicial Committee of her Majesty's said Council to hear the same and to make their report and recommendation to her Majesty thereupon; and the said Judicial Committee did accordingly hear the said cause, and make their report and recommendation after hearing the same, that her Majesty should remit the said cause with the declaration aforesaid; but such their report and recommendation was notoriously and expressly founded on a certain statement of the doctrines

...eld by the said George Cornelius Gorham, as it appeared to them the said Ju... Committee, which statement was in the terms following:—

"That baptism is a sacrament generally necessary to salvation, but that the grace of regeneration does not so necessarily accompany the act of baptism that ...tion invariably takes place in baptism; that the grace may be granted ... or after baptism; that baptism is an effectual sign of grace, by which God works invisibly in us, but only in such as worthily receive it—in them alone ...has a wholesome effect; and that, without reference to the qualification of the ...cipient, it is not in itself an effectual sign of grace: that infants baptized, and ...lying before actual sin, are certainly saved; but that in no case is regeneration in baptism unconditional."

And whereas the above-recited statement, on which the said Judicial Committee did so expressly found their said report and recommendation to her Majesty, was set forth by them as a just and true and sufficient statement of the doctrine held by the said George Cornelius Gorham, notwithstanding he had declared (A. 15) that, "as infants are by nature *unworthy recipients*, being born in sin and the children of wrath, they cannot receive any benefit from baptism, except there shall have been *a prevenient act of grace* to make them worthy;" and had solemnly re-affirmed the same (A. 70) when his attention was by us specially called thereto, in order that he might correct it, if he thought fit; and notwithstanding that he, the said George Cornelius Gorham, had further declared (A. 19) of baptized infants, "who, dying before they commit actual sin, are undoubtedly saved," that "therefore they must have been regenerated by an act of grace prevenient to their baptism, in order to make them worthy recipients of that sacrament." Again (A. 97), "the new nature must have been possessed by those who receive baptism rightly; and therefore possessed *before* the seal was affixed"—meaning thereby before baptism was given. Again (A. 60), "that filial state" (meaning thereby "adoption to be the sons of God"), ...

...of Religion, and the doctrine of the said Book of Common Prayer, as set forth in its offices of public and private baptism of infants and of confirmation, and especially in the Catechism, or Instruction to be learned of every person, before he be brought to be confirmed by the Bishop." Notwithstanding, too, that the Lord Bishop of London, who was summoned by command of her Majesty to attend the hearing of the said appeal, and who did attend the same accordingly, having been requested by the said Judicial Committee to read and consider the said report and recommendation before it was laid before her Majesty, did thereupon read and consider the same, and, after such reading and consideration thereof, did say and advise the said Judicial Committee to this effect, that he could not consent to the said report and recommendation, because the said George Cornelius Gorham holds that remission of sins, adoption into the family of God, and regeneration, must all take place in the case of infants, not in baptism, nor by means of baptism, but before baptism, an opinion which the said Lord Bishop declared to the said Judicial Committee appeared to him to be in direct opposition to the plain teaching of the Church, and utterly to destroy the sacramental character of baptism, inasmuch as it separates the grace of that sacrament from the sacrament itself: which said heretical opinions so held by the said George Cornelius Gorham, and thus by the said Lord Bishop of London expressly brought to the notice of the said Judicial Committee, and the manifest contradiction of the said opinions to the teaching of the Church plainly pointed out, were nevertheless wholly omitted by the said Judicial Committee in the statement of the doctrine which appeared to them to be held by the said George Cornelius Gorham, on which statement they professed to found their report and recommendation to her Majesty as aforesaid.

Now we, the said Henry, Bishop of Exeter, taking the premises into our serious and anxious consideration, and furthermore considering that the Judgment of her most gracious Majesty in Council in the said appeal was pronounced solely in reliance on the statement made in the report and recommendation of the said Judicial Committee, as being a just, true, and sufficient statement, do, by virtue of the authority given to us by God, as a Bishop in the Church of Christ, and in the Apostolic branch of it planted by God's providence within this land, and established therein by the laws and constitution of this realm, hereby solemnly repudiate the said judgment, and declare it to be null and utterly without effect *ab initio conscientiæ*, and do appeal therefrom in all that concerns the Catholic faith to the sacred synod of this nation, when it shall be in the name of Christ assembled as the true Church of England by representation.

And, further, we do solemnly protest and declare, that, whereas the said George Cornelius Gorham did manifestly and notoriously hold the aforesaid heretical doctrines, and hath not since retracted and disclaimed the same, any Archbishop or Bishop, or any official of any Archbishop or Bishop, who shall institute the said George Cornelius Gorham to the cure and government of the souls of the parishioners of the parish of Brampford Speke, within our diocese aforesaid, will thereby incur the sin of supporting and favouring the said heretical doctrines, and we do hereby renounce and repudiate all communion with any one, be he who he may, who shall so institute the said George Cornelius Gorham as aforesaid.

THE GORHAM CONTROVER... ...NG OF CLERGY AND LAITY, IN ST. MARTIN'S HALL, LONG-ACRE.

Given under our hand and episcopal seal, this twentieth day of July, in the ...ear of ...r ...ord ...ne thousand eight hundred and fifty.

...ER.

GREAT MEETING OF THE HIGH CHURCH PARTY.

On Tuesday a great meeting of the party in the Church opposed to Mr. Gorham, consisting both of clergy and laity, was held at St. Martin's Hall, Long-acre. The object of the meeting will be learned from what was done. The great room was packed as full as it could hold—not less, it is said, than 2000 persons were present. So many more desired to attend than could find room, that a supplementary meeting was held in the great room at the Freemasons' Tavern, which was also nearly filled. No stronger proof could be adduced of the intense interest excited by the subject. The two meetings were not filled with the usual idle and longing classes who crowd and annoy every meeting, but with decorous well-dressed gentlemen, chiefly clergymen or persons intimately connected with the Church. They obtained admission only by ticket. Amongst the distinguished persons present were J. G. Hubbard, Esq., a West India merchant, we believe, who took the chair; the Bishop of Bath and Wells; Archdeacon Wilberforce, Archdeacon Thorpe, Archdeacon Bartholomew, Archdeacon Manning, Lord Viscount Feilding, ...n, Lord John Manners, ...B. Hope, Esq., M.P.; F. H. Dickenson, ...B. Kenyon, Esq., of Oxford ...Q., M.P.; W. Prosser, Esq., M.P.; the Rev. Dr. Pusey, ...W. Palmer, Bar C. Andover, W. James, Dr. Lord, C. A. Denison, W. Wade, &c.

The Rev. Mr. Hughes acted as secretary.

The meeting was opened by prayers, read in a most solemn manner, and this moment—when the whole devout assembly presented an appearance that reminded us of those ancient councils and assemblies of godly men that settled the faith of mankind for centuries, or reared a new church as at the Reformation, forming a new faith and church separate from the old—is represented by our Sketch. Nor was the progress of the meeting at variance at any one point with the solemn commencement. It was orderly, decorous, patient throughout. Th... no signs of applause, nor of disapprobation. There might be a thorou... ...es...m conviction, a determination to avow opinion and a... there was no exhibition of enthusiasm. ... ...rons for counsel, while it is too decorous for t... carries with it the hearts, or rather the souls of m... sible to hide every sign of weariness at the protracted sitting ... ...rum, sou... ...stics of the meeting before it closed. ...er, very few occasions on which such a large number of p...ons can be got together, and exhibit so much order combined with so much interest and attention; and we cannot but conclude, from the character of the meeting, as well as from the language used, that it marks a very important epoch in the history of the Church of England. Our limits necessarily preclude us from giving more than an outline of the proceedings, which, not very fully reported, occupy nearly a page of the morning papers.

The Chairman opened the proceedings with an explanatory statement:—

"Why am I for what purpose," said the hon. gentleman, "are we met? Every individual in this hall feels, I am certain, that as this meeting is one neither convened by ecclesiastical authority nor directed to the purposes of any existing Church society, so, in giving it the sanction of his presence, he incurs a new and startling responsibility. But if the ... ...cumstances so ... ...ve as to engage the moral responsibility of every churchman upon a matter of eternal import, and casting into comparative nothingness the obligation of formal adherence to mere customary rules. New dangers make new laws of action; and surely no ordinary peril could have ... ...places far apart so many hundreds, not of turbulent ... ...t, and who foresee the dangers which ... ...n, call from this place upon their fellow churchmen to listen to their words, to try their truth, and, if they find them true, to join them in the cry for justice and the struggle for redress. This is no hasty or unreasoning clamour; months have passed since the Judicial Committee of her Majesty's Privy Council delivered their judgment in the case of 'Gorham v. the Bishop of Exeter;' months have passed since the First Minister of the Crown asserted, in the House of Commons (what was afterwards ro

asserted by the President of her Majesty's Privy Council in the House of Peers), 'that the judgment had given general satisfaction.' To that assertion we must here to oppose our calm, deliberate, but most emphatic denial. And if we waited thus long, it was not from indifference. While hope remained that the course of that miserable sentence might be stayed, we held our peace, while our cheeks have tingled and our hearts have burned with shame for the insult cast upon our spiritual mother, and for the oppression threatened to her children. This was no local or party question. Every diocese, the whole Church was aggrieved, and sought a place to vent her just complaints; but the synodical assemblies of the Church were silenced; and the Houses of Parliament, composed of members of all communions, but now of none of sensible and conflicting views, was no meet place for religious controversy. Where, then, could Churchmen fitly meet to join in repelling the indignity offered to them, and in deprecating the evils that they apply their sentence, but in the earnestness of their country, blessed as the diocese of a faithful Bishop, whom God preserve 9"

The Chairman then touched upon the points adverted to in the protest, petition, and addresses

He said:—"Under the authority of the judgment of the Privy Council, George Cornelius Gorham, a clergyman of the Church of England, is to be forced into a vicarage with cure of soul- the specific heresies for which Mr. Gorham had been rejected by his diocesan being excluded by the Privy Council from the delicts they apply their sentence, so that in fact Mr. Gorham's book has not been judged, although Mr. Gorham has been acquitted. In their abstract of what they collect to be Mr. Gorham's opinions, and in the laboured argument by which they sustain their decision, the Privy Council promote (possibly unawares) the negation of every article of our Christian faith, by asserting, insinuating, suggesting doubtful interpretations of the Church's voice, even when she speaks upon the most solemn subjects, and in the most authoritative and declaratory form. I will adduce a single instance. The Privy Council assert that 'the whole Catechism requires a charitable construction, such as must be given to the expression, "God the Holy Ghost, sanctify me and all the elect people of God."' The charitable construction is explained to be that same as a qualified construction, *i. e.* not strictly or literally true. Now, apply this rule to other portions of the Catechism—to the first question, 'What is thy name?' or to this other, 'What dost thou chiefly learn in these articles of thy belief?' Does, then, the child's name require a charitable construction? And must the child learn to say, but only in a charitable sense, 'I believe in God,' I hope to believe in God the Father, who made me and all the world'? And this is the charitable construction. Miserable misnomer! where did the Privy Council find their type of such a charity? Not, surely, in the Church of England, the child, the Queen of Christian graces, greater than Faith and Hope, but it is inseparable from them. The charity of Scripture is rooted in Faith, and is upheld by Hope; the charity of the Privy Council refuses both, and does not even rest on the word. Against this decision of the Judicial Committee of Privy Council, arising from a tribunal erected by the statute law into a final court of appeal, we are bound to enter our solemn protest, and we appeal from the court now judged by its composition, and unauthorized by the principles of a free and lawful ecclesiastical synod. For the grievance set forth in the protest we crave redress in our petition to the Queen, reminding her Majesty of the chartered rights and privileges of the Church, and praying the revival of the synodical action. The Episcopate of our own Church we address with a grateful acknowledgment of their recent efforts on behalf of the liberties of the Church, with an earnest hope that they will continue to add petition to the Queen, and will, the earnest desire that they will, by giving expression to their own minds upon the doctrine of baptism, relieve the disturbed and anxious hearts of many of the laity, by the judgment of the Privy Council. To the Bishops of the Church in Scotland we present our thanks for the sympathy and support we received in our distress from their declaration of our common doctrine. And, finally, we appeal to our brethren of the Church, whether at home or abroad, for their concurrence in the measures we are pursuing for the vindication of our faith and the security of our Christian liberties."

The Bishop of Bath and Wells moved, and Viscount Nelson seconded, the adoption of the following

PROTEST

Whereas, upon an appeal by the Rev George Cornelius Gorham against the sentence of the Dean of the Arches Court of Canterbury, it has been declared by the Judicial Committee of her Majesty's Privy Council, in substance, in the judgment of the said Committee, dated—"That the doctrine held by Mr. Gorham is not contrary or repugnant to the declared doctrine of the Church of England;" and that Mr. Gorham ought not to have been refused institution to the vicarage of Brampford Speke; "

And whereas the Rev. G. C. Gorham being presented to the vicarage of Brampford Speke, declared and has published

("Effineer of Baptism," p. 84.)—"That no spiritual grace is conveyed in baptism except to worthy recipients, and "(that) "as such are by nature unworthy recipients, being born in sin and the children of wrath, they cannot receive any benefit from baptism, unless there shall have been a previous work of grace to make them worthy."

herein declaring original sin (the remission of which is a promised effect of baptism) to be a bar to the due reception of baptism—

(p. 13.)—"That God is G'od to them, in accepting the Church's statement that "infants are regenerate through" before they commit actual sin, are undoubtedly saved," holds and teaches—

(p. 80.)—"That they must have been regenerated by an act of grace prevenient to their baptism in order to make them worthy recipients of that sacrament;"

And, moreover (p. 88), that "the new nature (or life) must be possessed by those "who receive baptism rightly;" and, therefore, possessed before the soul was sifted "

(p. 113.)—"That faith and holy desires are qualifications for baptism, and "God," was given to the worthy recipient before baptism, and not in baptism;"

(p. 197).—"As faith must precede beneficial baptism, so must evangelical repentance not en faith, therefore justification also precedes beneficial baptism, and cannot be consequent to it;"

(p. 80.)—"That they must have been regenerated by an act of grace prevenient to their baptism in order to make them worthy recipients of that sacrament;"

And, moreover (p. 88), that "the new nature (or life) must be possessed by those "who receive baptism rightly;" and, therefore, possessed before the soul was sifted "

(p. 113.)—"That faith and holy desires are qualifications for baptism, and "God," was given to the worthy recipient before baptism, and not in baptism;"

(p. 197).—"As faith must precede beneficial baptism, so must evangelical repentance not en faith, therefore justification also precedes beneficial baptism, and cannot be consequent to it;"

thereby declaring that the gifts of regeneration, adoption, remission of sins, and justification, which the Catholic Church—and in it our own—has ever taught and does teach to be given by God in and by the sacrament of baptism, are given before baptism, or by previous private acceptance of grace, whereof Scripture and the Church are wholly silent

And, whereas, the doctrine of the Church of England is

1. "In the Nicene Creed:—"I acknowledge one baptism

2. In her two Forms of ministration of public and private baptism of infants, wherein the priest, having baptized the child with water, in the name of the Father, and of the Son, and of the Holy Ghost, thus speaks:—In the public forms "seeing now, dearly beloved brethren, that this child is regenerate, grafted into the body of Christ's Church;" "In the private form, "Seeing now, dearly beloved brethren, that this child is by baptism regenerate, and grafted into the body of Christ's Church;" and moreover, in the previous certification to the minister, who saith: "This child, being born in original sin, and in the wrath of God, is by the laver of regeneration in baptism received into the number of the elect people of God, and of your Lord Jesus Christ's flock; we give hearty thanks unto our heavenly Father, that it hath pleased him to regenerate this infant with his Holy Spirit, to receive him for whose own child by adoption, and to incorporate him into his Holy Church."

(To which said forms the 57th Canon of the Church declares "the doctrine of baptism to be so sufficiently set down, as nothing can be added to it that is material or necessary.")

3. In the Order of Confirmation, when the Bishop prays that God will grant unto his servants whom He had "vouchsafed to regenerate by water and the Holy Ghost," and unto who m He had "given the forgiveness of all their sins "

4. In her Catechism which teaches that "in baptism we are made members of Christ, children of God, and inheritors of the kingdom of heaven;" that "baptism is a sacrament generally necessary to salvation;" that "sacrament means—an outward and visible sign of an inward and spiritual grace given unto us, ordained by Christ himself, as a means whereby we receive the same, and a pledge to assure us thereof;" and that "the inward and spiritual grace in baptism is a death unto sin, and a new birth unto righteousness."

5. In her Articles—viz. in her Twenty-fifth Article—"Sacraments ordained of Christ be not only badges or tokens of Christian men's profession, but rather they be certain sure witnesses, and effectual signs of grace and God's good will towards us, by the which he doth work invisibly in us, and doth not only quicken, but also strengthen and confirm our faith in him."

"Baptism is not only a sign of profession and mark of difference whereby Christian men may be discerned from others that be not christened, but it is also a sign of regeneration or new birth, whereby as by an instrument they that receive baptism rightly are grafted into the Church."

Now we, the undersigned, members of the Church of England, accepting without reserve these distinct declarations of her doctrine declaring, also, that her deliberate and unambiguous expression in the actual formularies of her ministration of baptism is not to be set aside by the fallible or uncertain sense, and holding that original sin is remitted to all infants by spiritual regeneration through the application of the Holy Spirit in the sacrament of Baptism, and by the sacrament of Baptism, which doctrine we, together with the whole Church, indubitably affirm whenever, in the recital of the Nicene Creed, we confess one baptism for the remission of sins" do hereby so comply repeat and protest against the said judgment of the Judicial Committee of her Majesty's Privy Council; and do appeal, therefore, unto a free and lawful Synod of the Church of England, when such Synod may be called.

Because, while the Judicial Committee excludes from their abstract of Mr. Gorham a doctrine (on which abstract only the decision of the case was grounded), and a pledge to assent to all Articles-read passages, their judgment sanctions the acceptance in a hypothetical and ideal sense of the public confessions of the Church, accepts and countenances interpretations of her doctrines, and receives restitution to a benefice, with cure of souls, of a priest who professes doctrines utterly irreconcilable with the plain meaning of her formularies, and whose views on a fundamental article of faith

And because, through the dangerous teaching doctrines of the Church, the Judicial Committee of the Privy Council do (notwithstanding the formal declaimer of "any authority in matters of faith" practically exercise in spiritual matters a jurisdiction for which they are utterly incompetent, and which cannot be given, nor ever can be, conflicted to them by the Church.

The motion was carried unanimously.

Archdeacon Wilberforce then moved, and Mr. Hope, M.P., seconded, the adoption of the petition to her Majesty. The following is a copy

TO THE QUEEN'S MOST EXCELLENT MAJESTY

The Humble Petition of the Undersigned Clergy and Laity of the Church of England,

Showeth That we, your Majesty's dutiful subjects, faithfully submitting to the governing your Royal authority as supreme governor within this to your dominions, in all causes over all persons, as the same is expressed in the Articles of the Church of England, humbly entreat your Majesty to grant us redress in a matter which agitates our consciences as members, and some of us as ministers of the said Church.

That, in the cause of "Gorham v the Bishop of Exeter," lately decided by the Judicial Committee of your Majesty's Privy Council, a clergyman has been admitted to the institution of the said Church, has been treated in such a manner as incidentally, but effectual y, to contradict the plain and obvious meaning of the Prayer Book.

That, in consequence of this decision (whatever be its legal validity), great scandals have arisen, and very many are unsettled and disturbed in conscience, who, so only weak as to serve God in peace, in the Church wherein they have been called, would have been at rest.

That it has always been allowed by the law of this country, as well as by the custom of the whole Church from the earliest ages, that religious matters of faith and doctrine should be so tried, according to scriptural precedent, by synodical assemblies of the Bishops and Clergy.

That Magna Charta begins by declaring "that the Church of England be free, and shall have all her rights and her liberties inviolate;" and amongst these it was accured by an ancient law of this realm, that no should "have her judgments free."

That the by a Royal predecessor, King Charles I., p fixed to the Articles of the Church, her synodical limits are recognized in the promise of "That, no doubt, through the grace that Christian may do the work which is proper unto them, the Bishops and Clergy, from time to time in convocation, upon their humble desire, shall have license, under our Royal seal, to deliberate of, and to do all such things as, being made plain by them, and assented unto by us, shall conserve be settled conformance of the doctrine and discipline of the Church of England now established, from which we will not endure any way to be declining in the least degree.

To the intent, therefore, that the grievance aforesaid may be remedie', and the Church herself enjoy full freedom to exercise her inherent and indubitable office of declaring and judging in all matters purely spiritual, for the welfare of your Majesty and the peace of those realms,

Your petitioners humbly implore your Majesty that all questions touching the doctrine of the Church of England, arising on appeal, or in your Majesty's temporal courts, may hereafter be referred to the spirituality of the Church of England

And, further, that your Majesty will be pleased to remove the impediments which now obstruct the exercise of the ancient synodical functions of the Church, in order to the determination of the aforesaid question of doctrine, as well as of other matters affecting her welfare, to the salvation of souls and the glory of the Divine Head.

And your petitioners will ever pray, &c

The Rev. Professor Sewell moved, and Mr. Kenyon seconded, the adoption of the following

ADDRESS

TO THE ARCHBISHOPS AND BISHOPS OF THE PROVINCES OF CANTERBURY AND YORK

MOST REV. AND RIGHT REV. FATHERS—

We, the subscribers, clergymen, and laymen in communion with the Church of England, beg leave to offer to your Lordships our very earnest and respectful thanks for the efforts which you have recently made to assert the Church's claim to judge and decide in her own inherent and spiritual authority, all questions of doctrine and discipline purely spiritual

We observe that the bill founded upon this principle, which has been recently introduced into the House of Lords, has been rejected upon grounds with an occasion as the deepest regret and surprise We earnestly implore your Lordships not to let this essential portion of the liberties of the English Church be in abeyance, but to persevere in renewing and enforcing so righteous a claim, which, if fairly brought before our countrymen, we feel sure will be cheerfully conceded.

And while we thus depend on your Lordships for the future, we are constrained to express our great disapp intment and regret that any circumstances should have hi herto restrained your Lordships, as a body, from taking steps directly to condemn the fatal error of the Church's doctrine of Infant Baptism by the recent decision in the case of "Gorham v. the Bishop of Exeter."

We consider it our duty respectfully to declare to your Lordships our solemn conviction, that we never may or can conform with that decision, which we never will, recklessc to that decision (whatever be its legal validity), or own it as part of our Church law, and that for two grave reasons:—

1. Because it reduces the institution to a benefice with cure of souls of a clergyman holding, and having published, on a fundamental point, a doctrine contrary to Holy Scripture and the Catholic tradition of the Universal Church, and subversive of the teaching of the whole English Church.

2. Because, it applies to the words of the Prayer Book an interpretation inconsistent with their plain and obvious meaning, contrary to good faith, and perplexing to honest minds; and, by allowing doctrinal statements contradictory to the essential meaning of an article of the Creed, would involve the consequence, that the Church of England does not bind that creed in a matter of faith.

For these and such like reasons we are convinced that the Church of England never can rest and, by God's grace, we never will rest, until she be relieved from this grievous scandal. And since the regular course has always been for the ch f pastors to meet synodically and declare the faith, assuring it for the time to come, so far as it had been called in question,

May it please your Lordships, reverend sirs, right reverend fathers, to express your humble desire to the Crown for that licence which in all such emergencies it is virtually (if not expressly) pledged to grant—that the Church be thus assembled once more in freedom to judge matters of doctrine and discipline. Or, if such licence cannot now be obtained, that at least you so declare your mind and intention as to secure us for the present against that utter denial of sacramental grace which we too plainly see to be permitted by the said decision.

The motion was carried unanimously.

The Rev. Sir Gerard Noel Noel Noel, and Sir C. Anderson seconded, the adoption of the address to the Bishops of Scotland, to which the chairman had referred, and it was carried *nem. con.*

On the motion of the Rev. W. Palmer, seconded by Mr. Dickinson, the following appeal to the faithful was also agreed to:—

That we solemnly and earnestly appeal to our brethren of the Church of England, in this and other lands, for their sympathy and assistance, entreating their consideration of the facts and forth in the protest, petition, and addresses adopted by this meeting, and beseeching them deliberately to weigh and examine the grievous dangers to which the maintenance of our title is exposed through the decision of the Judicial Committee of her Majesty's Privy Council, convinced that a calm investigation of the subject will assure them not only of the reality of our appeal for right to the ancient liberties of the reformed Church, and urgently implore them to join us in protesting against the wrong and violence threatened to our Church, and in vindicating her doctrinal teaching from the sinister and reproach which have been cast upon it: and to co-operate with us in a faithful and persevering effort to secure for us through the restoration of her ancient and inalienable privileges of judgment in spiritual matters, the power of maintaining the essential verities committed to her as a branch of Christ's Holy Catholic Church

The proceedings closed with a vote of thanks to the Chairman, which was moved by Archdeacon Manning, and seconded by Lord Camden.

The Chairman acknowledged the compliment; and before separating, a prayer was offered up, and a benedic ion invoked on their exertions in the cause of the Church, by the Bishop of Bath and Wells.

SUPPLEMENTAL MEETING.

Owing to the overflow at St Martin's Hall, a supplemental meeting was held at Freemasons' Hall, on Tuesday, presided over by Mr. Fielding, M.P., for Bath.

The resolutions were the same as those proposed at St. Martin's Hall, and the proceedings were quite of a similar character.

The Rev. Dr. Pusey, in moving the resolution making an appeal to the ... and clergy, said this question was one of the most vital importance, inasmuch as not merely the well-being, but the actual being of the English Church. ... was, as he would say, placed in the position of two roads leading in opposite directions if they took the one road, they would possibly smooth some loss; if they took the other, they might, perchance, gain something or lose previously lost. If the State, for instance, would not allow the Church the exercise of her duties, then it might be that the Church would have to call upon the State to liberate the Church from its connexion with the State itself. The Church had been too long hoodwinked and deluded by the hundred and one parties in the State to trust the Church's eyes, she could now see her way clearly. That was one of the advantages gained by a recent decision: another was, that worldly minded men would no longer be able to persuade themselves that they could possibly remain in connexion with Churchmen's love of peace would not permit them to reply to. Still the struggle in which they were about to embark was one of earnest, and deliberate prudence, perseverance, owing to the fact that statesmen and politicians would learn henceforward that the faith of the Church was dear, that it was not a thing to be played with like a child's toy. If they were to do nothing more than protest and petition, that great gathering would have been worse than useless. They must show that they were determined to stand by their faith, in prayer, and they would soon find the whole Church—laity and clergy—uniting hand in hand, and heart to heart, in defence of their common catholic faith. They were not there to do anything beyond providing a machinery for the ... to ... their future evils. The faith of the Church had been assailed in one point—Baptism. Perchance the next point assailed would be the office of the Holy Ghost, and the Church must be prepared to maintain that point. It could fix a limit to these aggressions. After referring to the statutes of Henry VIII., and that of Elizabeth (since abolished), which gave the right of appeal to the King's delegates in certain cases, he contended that the Church had never recognised the right of any temporal court to determine matters of faith. The Church could not—dare not—abrogate its functions in that respect. Parliament had attempted to do so when the House of Lords that the Judicial Committee, when deciding upon Mr. Gorham's appeal, had not entertained the charge of heresy. But if the question of fitness or unfitness for the cure of souls was not entertained, he should like to know what was the subject of inquiry? Was the Church to be bound by the decisions of such a tribunal? The Church did not deny the Royal supremacy, subject to constitutional limitations. It was said the Sovereign, as supreme head of the Church, had a veto upon the acts of the Church. He denied that. They might have a Sovereign of unsound faith, or it might be that the Sovereign would be advised by ministers of unsound faith. Could they, under such circumstances? Again, had it ever entered into men's minds that if the decision upon Mr. Gorham's case had gone the other way, might not Ministers have advised the Crown to refuse to sanction it? Was not the Church to say such advice would have been tendered; but he would say that such a power ought not to be intrusted to any earthly potentate. The Church of England, he rejoiced to say, was up from her slumber as to the responsibility of attaching to the decision of the Judicial Committee, but by reception they might incur that responsibility, for silence and reception would be construed into acquiescence. He trusted that the whole body of Churchmen to unite, in order that the voice of the Church might be heard. He had in his mind that the Protestant bodies on the Continent were looking with deep anxiety to the course which the English Church at the present juncture. Their whole hope of redress depended upon the firmness and unity of the ... in a little of faith in their Divine Master, who had promised never to desert His Church.

The resolutions all passed unanimously, and the proceedings terminated.

A letter from the Bishop of Exeter to the Bishop of Bath and Wells, alluded to at the meeting on Tuesday, has since been published. The rev. Prelate justifies his appeal to all the courts of law as his imperative duty. He was bound to try every legal means of stopping the fulfilment of the judgment. He is assured, he says, that the highest legal authorities, that the decision of the Courts of Queen's Bench and Common Pleas, not to have the rule argued, is contrary to the invariable practice; and that the decision of the Court of Exchequer, which did allow the rule to be argued, is contrary to the ancient law of the land. The Court laid it down that, by the constitutions of Clarendon, the ultimate appeal, in all ecclesiastical causes, is to the King; the Bishop affirms that by those constitutions the appeal was to the court of the Archbishop, but they forbad the cause to be carried to Rome. The supremacy of England is, according to the Bishop, in accordance with sound church principles of the Church of England, to decide of all spiritual causes to spiritual and not to temporal courts. He contends, were the law of England as the counsels of law have recently declared it to be, it would be contrary "to the fundamental principles of the Church of Christ," and would involve the very Catholicity of the Church of England. If the Lord Chancellor, the Court of Exchequer, and the "sons of the Church of England, especially her clergy," says the Bishop, "must henceforth hang down their heads in shame and discomfiture, and confess to the charge already urged against them by Romanists, Dissenters, and Apostates, that her doctrines are as entirely at the disposal of the State as her endowments."

THE LATE DUKE OF CAMBRIDGE.—The will of the late Duke of Cambridge has been opened. The property is stated to be divided into three portions amongst his three children, viz. the present Duke and his two sisters. In addition to other property, the sum of £60,000 goes to the Duchess. The executors are the Duke of Sutherland, Sir James Reynett, and Sir Henry Wheatley. The guardians of the Princess Mary are the Duchess, the present Duke, and the executors already named. The Princess Mary is but sixteen. By the grant of Parliament she will have £3000 per annum, as well as one-third of her personal estate by wi.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

The Mansion-house dinner before the close of the session, as it is ... to be given by the Lord Mayor to the Queen and Royal family, on ... the 6th inst.

Ely, Croly, on Sunday last, intimated that the church of St. Stephen's, Walbrook, would be closed for repairs and cleaning, of which it stands much in need; the litigation between the select vestry and the parish having ceased.

It is stated that it is the intention of the owners of the British and North American Royal Mail Steam-ships forthwith to commence the building of new steam-ships, of great size and power, to establish a line for the convenience of goods and passengers to and from New York and Liverpool, independent of the splendid ships now employed under contract with the British Government for the conveyance of the mails.

It is understood that the Nepaulese Princes and suite take their departure from this country about the middle of next month. They proceed to India via France, and the Admiralty have ordered the Commander-in-Chief in the Mediterranean to send her Majesty's steam-sloop *Growler*, to Marseilles, *en route* to Nepaul.

Storms have been prevalent of late in the United States. In New England bridges and mills have been washed away, while the floods of the Mississippi and its tributaries have inflicted unprecedented damage. In some places the inundations of the Lower Mississippi extended from 100 to 200 miles in breadth.

A despatch from Halifax, dated the 8th inst., states that the ship *Ocmaer*, from Liverpool to New York, 36 days out, with 207 passengers, had been wrecked near Cape Race. Wreckers pillaged the vessel, cargo, and passengers; but no lives were lost. The Government was to send the passengers forward immediately

The total amount of aid contributed by parishes to turnpike trusts in England and Wales during the year 1848 was £36,945, viz. £20,341 from England and £6704 from Wales. The average amount contributed is £32,000 per annum.

It is apprehended that Soulouque, or Faustin I., of Hayti, will at an early day make a descent upon the Spanish population, or the Republic of Dominica, in the same island. His agents have been endeavouring to gain time for this purpose of American claims, in order that all the resources in the island may be devoted to the prosecution of this infamous design.

The ship *Albion* of London has been seized in Oregon on charges of smuggling, and also that her men were cutting timber in American territory. She was seized by General Harney, of the United States Government, and report says that she was chartered by the British Government for the purpose of procuring timber for the Royal Navy, but that is doubtful.

The yacht fishing-boats, the *Jessy*, and *W. Corrigge*, were seized and sent into Havre, last week, for infringing the fishery laws.

The man, Robert Pate, who committed the dastardly assault on her Majesty, has, since his removal to the Millbank Penitentiary, been an object of the sympathy of that prison. In consequence of the medical and other testimony adduced at his trial, Sir George Grey was induced to direct a medical examination of the prisoner, and the result has been the recommendation that the punishment of flogging be remitted. Pate is in a very debased state of health, and he employs his time in writing letters in different languages.

Large arrivings have come on the north-west coast in great abundance, and, though selling at sunspence a dozen at present in Durham, it is not unlikely but they will be as low as nine a penny in a few days.

The *Amphitrite*, 24, corvette, from South America, with a large freight of bullion on board, arrived during this week at Portsmouth, where she discharged her treasure for conveyance to the Bank of England.

The first ecclesiastical appointment which the new Lord Chancellor will have in his gift is the rectory of St. Nicholas Cole Abbey and St. Nicholas Olave, in the city of London, rendered vacant by the death of the Rev. J. Valentine Antin.

Mr. Bell, M.P., has presented to the parish church of Dinnington, two handsome communion books, to replace those which were stolen a few weeks ago

A block of gold-bearing quartz, weighing about 125 lb., has been lately sent from Calafor ia to the United States, as a contribution towards the Washington monument.

The entire amount of taxable property in San Fransisco, taking the assessment so far as made the basis of the estimate, is over three hundred millions of dollars.

The *Surah Sands*, a steamer about the safety of which great fears have been expressed, has been met with lying about 100 miles south of Monterey (California), out of fuel. A large number of passengers had arrived at San Francisco, having left the steamer in open boats. Many had suffered much from exposure, and some ... it is said, have perished. Coal had been sent down for the vessel

Owing to the power-loom fustian weaver, to the number of about 900 in the employment of Mr Joseph Schofield, of Middlewood, Rochdale, turned out for an advance of wages to the amount of three farthings per piece.

The Paris *Presse* gives a flourishing account of the state of French manufactures. Orders are coming in every week from America, where the superior beauty of the French designs is creating a preference for French stuffs, silks, and furniture.

The committee of secretaries of the public charities of England has been formed for the purpose of organising a public subscription, through the various committees, with a view to the erection of some lasting and conspicuous monument to the memory of the great patron of charity—"the good Duke of Cambridge."

The steamer *Pilot* struck upon a sunken rock in Loch Lomond, on Friday week, off the point of Ross Macalpine. The captain who was on deck ... ran her on the shore and signalled the steamer *Waterwitch*, which, formerly, was coming down from Inverarnan, and she returned with all the passengers and crew, amounting to several hundreds. The vessel belongs to Messrs. Burns, the owners of the ill-fated *Orion*.

Meal and other articles of the miserable food resorted to by the starving peasantry on the sea-coasts of Ireland, the common "sea-weed," is becoming, even in the country, extensively used by the poor for food. It is now forwarded by rail from Shields to Manchester and Leeds, by women who gather it from the rocks at Tynemouth; and on arrival at its destination, it is regularly sold in the markets for from 3d. to 4d. per pound.

On Tuesday a public meeting of the inhabitants of the united metropolitan parishes of St. Andrew, Holborn, and St. George the Martyr, was held in the large hall of the workhouse, Little Gray's Inn-lane, for the purpose of taking into consideration the most adequate means of promoting the success of this national undertaking, and to form a local committee for the same purpose. A committee was appointed to collect and assist in carrying out the views of her Majesty's Commissioners

The Rev. Murray, Pierce K. Mahony, Esq., the Accountant-General of the Court of Exchequer in Ireland, was killed by a fall from his horse. His office rendered vacant by this melancholy catastrophe is worth £600 a-year.

The important portion of the Great Northern system of railway communication, extending over 76 miles between London and Peterborough, is now completed, and will be ready for opening to the public on the 7th of next month. The government officer is to go over it in a few days, and report to the Railway Commissioners as to its fitness for traffic.

Dr. James Adair Lawrie has been elected to the professorship of surgery in the university of Glasgow, vacant by the demise of the late lamented Dr. Burns. Dr. Lawrie has for some time occupied a similar office in the Aberdeen university. The appointment rests with the Crown.

The London Penny Bank, Commercial-street, Whitechapel, commenced business on the 30th January last, 1850, and the results up to the 23rd July, 1850, were: Deposits, 41681; depositors, 6643; receipts, £1549 18s. 8d. The object of these institutions is to encourage provident habits; the result proves that they are peculiarly adapted to attain the object.

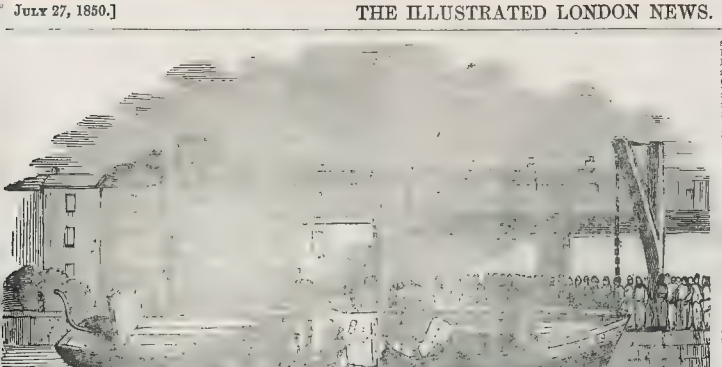
The *Leinster Express* has the following remarkable case of longevity:—We have to record the death of Peter Donovan, who died a few days ago at the foot of the Hill of Allen, county Kildare, at the advanced age of 126 years; he lived in the same townland in which he was born in the year 1724, having more than seen the reigns of England filled by six successive sovereigns. He had been in a state of second infancy for near a quarter of a century.

The first trip of a steamer between the town of Ballina, on the west coast of Ireland, in the county of Mayo, and Liverpool, took place on Tuesday last, in the starting of the *Dolphin*, with a full cargo and several passengers for Liverpool, amidst the cheers of a multitude assembled on the quay to witness the departure.

The total number of probates and letters of administration granted in the Prerogative Court of Dublin in 1847, 1848, and 1849, was 4677, and the duty paid amounted to £305,920. In the province of Armagh, during the same period, the number was 1518, and the duty paid £11,317 9s. In the province of Dublin the number was 2060, and the amount of duty paid £12,974 10s. 2d.

It has been determined by the inhabitants of Tollington and its neighbourhood to erect a column on the summit of Holcombe-hill to the memory of the late Sir Robert Peel. The view from the top of this column, which will be accessible by means of a staircase, will command a panoramic scene of 200 miles in circumference, embracing a sight of Yorkshire, over Blackstone Edge; the Derbyshire hills, overlooking Buxton; the Staffordshire range of hills, Cheshire, the Irish Channel, the Cumberland hills, and the watering places on the Lancashire coast. Holcombe Hill is within a few miles of the birthplace of the late Sir Robert Peel

Another incendiary fire at Hendon, making the third that has occurred in the same district within a week, was discovered on Tuesday morning. The flames originated in the rick yard of the premises belonging to Mr. Samuel Nicoll, known as Hyde-farm, and when discovered were raging furiously in a stack of hay containing 50 or 60 loads. The farm servants and labourers of the district, to the number of nearly 60, set to work, and eventually succeeded in extinguishing the flames, but not until one-third of the rick was destroyed.



SCENE OF THE RECENT STEAMBOAT EXPLOSION.

STEAM-BOAT EXPLOSION AT BRISTOL.

GREAT LOSS OF LIFE.

One of the small river steam boats plying up and down the floating harbour from the stone bridge near Small-street, to the lock at the bottom of the ex banks near Cumberland Basin, Bristol, blew up on Monday evening, causing great loss of life. The vessel was called the *Red Rover*, and was an iron boat. About half-past eight o'clock P.M., she had landed her down cargo, and was at the Hotwell's Wharf, taking on board passengers for the trip up to the city, when, as soon as a number of persons (about fifty) had got on board, and some others were in the act of following, her boiler suddenly exploded, with a terrific noise, and the vessel was almost instantly torn to pieces. The scene which followed was of the most horrifying description. The fragments, by the force of the explosion, were thrown to great distances, and did damage to the roofs of the houses and sheds upon which they fell. The bodies of many of the passengers were blown into the air; two or three of them, in a frightfully mutilated state, fell upon the wharf; some sank with the cabin of the vessel; while others were seen in the water struggling terribly for existence. Fortunately, a large wherry slip is located close to the spot where the accident occurred; and as there were many available boats, and their crews manned them with the most praiseworthy speed, they were successful in picking up many persons and saving them from death. Had it not been for this circumstance, and had the explosion occurred subsequently to the vessel leaving the wharf, at least a score more persons would have been sacrificed. Among the bodies recovered was that of the engineer of the vessel, William Nicholls, who was shockingly mutilated, as, indeed, were a great many of the sufferers. One poor fellow had his leg torn off at the thigh; another had his foot torn off; while many received fractures of the legs, arms, or skull. Two gentlemen named Langdon, father and son, and a gentleman named Weston, who had just returned from visiting the wife of the latter, at Portshead, were all much injured. A servant girl in charge of some children was nearly killed, and one of her charges was drowned. Two little girls named Jefferies, who were enjoying a kind of holiday, were likewise killed. The following is as near as possible a correct list of the killed and injured:—

Killed—Samuel Jefferies, a workman at the Bristol Pottery; West, musician, St. James's-street; Charles Keating, ditto, Berkely-place; William Nicholls, engineer, Alfred street; Harriett Venn, a child; two children of — Jefferies, Clifton; and three men, unknown.

Severly Injured.—William Bailey, Dings, fractured legs; William Priddy, the captain, ditto; William Brewer, tobacconist, Hill-street, ditto; Francis Lucas, Thrissell-street, ditto; Mary Ann Darston, Frogmore-street, ditto; Ellen Hodge, St. George's, fractured hip; Thomas White, accountant, Montpelier, fractured legs; David Lewis, fireman, Anchor-lane, severely scalded; A. Langdon, severe injuries of the head and fractured leg; Langdon, ditto, Maria Haynes, Blackfriars, injuries of the head: Wm. Cooper, Montague-street, musician, ditto, and much scalded; Samuel Edwards, Pipe-lane, scalded legs; Eliza Pelford, lame, severely scalded; Samuel Pelford, junior, ditto; Thos. Venn, Maryport-street, ditto; Charlotte Eliza Hodge, St. George's, ditto; Martha Hemmings, Maryport-street, ditto.

REPRESENTATION OF CHESTER.

THE polling commenced on Monday morning, and during the whole of the day the city was in the greatest state of excitement. The general opinion was that Mr. Stanley would be elected, but for the first hour or two Mr. Egerton took the lead. About ten o'clock the actual state of the poll seemed to be a matter of the greatest uncertainty, the statements put forward by the friends of the respective candidates being of an exceedingly contradictory nature. About eleven o'clock, however, it became almost certain that Mr Stanley's election was safe. From this time the majority was gradually increased; and at the close of the poll the numbers were —

The Hon William Owen Egerton	..	..	..	555
Mr. C. E. Stanley	..	..	..	751
Majority for Mr Stanley	..	..	..	—196

The Sheriff held his court at five o'clock on Monday evening, to declare the state of the poll, when the official return was declared as follows:—Stanley, 986; Egerton, 643: majority for Mr. Stanley, 241. Mr. Stanley was then chaired through the city, amid the applause of the great multitude who lined the streets.

Annexed is a Sketch of an arch erected by Mr. Humberston to Mr. Egerton.

ARCH AT CHESTER.

NATIONAL SPORTS.

The turf fixtures for the coming week are confined to three meetings—viz. Goodwood, Chewton, Monday, and Leominster. Of these, Goodwood alone excites more than local interest, and that, from the very large amount of prizes in cash and plate (nearly £30,000), and the continued exertions of its aristocratic promoters, is not likely to show any falling off. It will occupy four days, commencing on Tuesday, and will on each day present some feature of striking interest: thus, on the first, we shall have the Ham, Gratwicke, Lavant, and 300 sovs stakes; on the second, the Goodwood and Drawingroom Stakes; on the next, the Cup, and one or ten other events more or less important; and, on the last, the Chesterfield Cup, Nursery Plate, &c.: the daily averages from sing at least eight races. With such a programme, added to the popular ty of the noble owner of the property on which the races will take place, the beauty of the scenery, and the great fac lities offered to all classes by the Brighton Railway, there is every reason to anticipate a brilliant week.

The Cricketers have lots of work cut out, beginning on Monday at Lord's, with the annual match between the Old and Young, for the benefit of Caldecourt; Wednesday, Thursday, and Friday, on the same ground, will be devoted to the matches between Eton, Harrow, and Winchester. On Tuesday, a match will be played at Blackheath, between the Berkeley and Surrey Union; on the following day, at Liverpool, one between the Chester and Liverpool Clubs: and on Thursday on All England match at Newark, between 11 of England and 22 of Newark and district

The Aquatic appointments embrace the St. John's and St. Mary-ott's (Westminster); Greenwich and Woodridge Regattas on Monday; St. Katherine's on Tuesday; Wallingford on Wednesday; Doggett's Coat and Badge on Thursday, and the Thames Boat-Races on Friday (at Putney); besides two or three small affairs in the provinces.

TATTERSALL'S

THURSDAY.—Another flat afternoon, and the investments few; and, except on the Goodwood Cup, unimportant.

GOODWOOD STAKES.

5 to 4 agst Windlehgrais	10 to 1 agst Hornoo
8 to 1 — Won't-you-come-out-to-night? (t)	12 to 1 agst Snowstorm (t)
	15 to 1 agst Clothworker.

DERBY.

9 to 1 agst Grecian (t)	40 to 1 agst Black Sea
35 to 1 — Newminster	40 to 1 — England's Glory (t)

CHELMSFORD RACES. TUESDAY.

SWEEPSTAKES of 5 sovs each, and 50 added.—Mr. Dennett's Grassmopper (Boyce), 1. Mr. Stevenson's Goodwood (Dockeray), 2.

THE QUEEN'S PLATE of 100 guineas.—Capt. Lowther's The Gent (Dockeray), 1. Mr. Sheaton's Sam Hood (Sail), 2.

THE HUNTERS' STAKES of 10 sovs each, and 50 added. Mr. G. Hobson's Thoroughgood Sam (Crouch), 1. Mr. J. Cassidy's Whisper (Bartholomew), 2.

THE STEWARDS' PLATE of 50 sovs.—Mr. Rogers's f by Earl Richmond's d by Glaucus (Hammond), 1. Mr. J. Sadler's Grand Brunton (R. Sherwood), 2.

WEDNESDAY.

THE CITY STAKES of 10 sovs each.—Major Beresford's Zadoc (Dean), 1. Capt. Lowther's Ballet Girl (Dockeray), 2.

THE TOWN PLATE of £50. Mr. Lewis's Michael Brunton (Sherwood), 1. Mr. Lade's Sir Benjamin (Hackett), 2.

THE MARK HALL STAKES of 5 sovs each, and 25 added.—Mr. Dennett's Grasshopper (Boyce), 1. Mr. J. Cassidy's Diligence (Dean), 2.

THE HURDLE RACE.—Frank, 1. Shamrock, 2.

WINCHESTER RACES.—TUESDAY.

The GREAT PRODUCE STAKES of 80 sovs each.—Mr. Payne's Sergius walked over.

The ORIGINAL HAMPSHIRE STAKES of 25 sovs. each.—Duke of Richmond's Quiver (Flatman), 1. Mr. W. Sadler's Woodsprite (Gilbert), 2.

HER MAJESTY'S PLATE of 100 guineas.—Mr. H. Robinson's Confidence (Scater), 1. Duke of Richmond's Quiver (S. Mann), 2.

WEDNESDAY.

TWO-YEAR-OLD STAKES of 10 sovs each, and 50 added.—Mr. Payne's Catalpa (Flatman), 1. Mr. Elwall's Ixcandis (G. Brown), 2.

WINCHESTER STAKES of 10 sovs each, and 50 added Mr. W. V. Jenkins's Miss Larkaway (Burn), 1. Mr. Y. King's West Indian (Gilbert), 2.

FOAL STAKES of 25 sovs each. Mr. Payne's Sergius (Flatman), 1. Mr. Delme's Ranger (S. Mann), 2.

CITY MEMBERS' PLATE of £50.—Mr. Stollard's Woodsprite (Gilbert), 1. Mr. Burgess's Red Doe (Burn), 2.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

The English Market opened firmly on Monday, Consols quoting an advance of ¼ per cent., the last price marking 96¾ ⅜ for Money, and 96¾ 97 for Time. This firmness, however, did not prevail on Tuesday, prices receding to 96¾ ⅜; but on Wednesday, a rumour that the Directors of the Bank of England intended to announce a reduction in the *maximum* rate of interest, strengthened the Market, and 96¾ ⅝ for Money, with 97 for Account, were the last prices. The weekly Court of Directors having broken up on Thursday without any change being announced, prices consequently became slightly flatter. When the extraordinary abundance of money is considered, with the difficulty of getting any investments for it, the present prices of Consols must be regarded as much lower than under such circumstances might be justly anticipated. The market continues to be copiously supplied with stock, which tends to check operations for the rise. The source of this supply cannot be, of course, known, but it is surmised that small sums purchased here, on behalf of persons abroad, are now being gradually sold for home purposes, particularly as the supply has apparently increased since continental affairs have been less troubled. Exchequer Bills and India Bonds are still in demand, at high premiums, and a fair business on behalf of the public has been doing in the heavy stock. The closing quotations of the week, officially announced, are—for Bank Stock, 211, Three per Cent. Reduced Annuities, 97⅛; Three per Cent. Consols, Annuities, 96¾; New Three-and-a-Quarter per Cent. Annuities, 99⅛; Long Annuities, to expire Jan. 1865, 8 9-16; India Bonds, under £1000, 92 p; Consols for Account, 96¾; Exchequer Bills, £1000, June, 70 p; £500, June, 70 p; Small, June, 70 p.

At the commencement of the week, the Foreign Market displayed little animation; but on Wednesday, Venezuela stock advanced to 26, and Grenada was on demand. Ecuador is now attracting some attention, a Commissioner being about to start for Quito, to make an arrangement with regard to the debt of that country. The claims upon Ecuador arise out of the unsettled portion of the old Colombian debts not assumed by New Grenada and Venezuela. The intention for which Ecuador is liable is 2½ per cent., which, when the triparti arrangement is effected, gave for her share £1,430,000; but, in addition to this sum, there is a large accumulation of interest arrears to be provided for. According to the representations which have been made on behalf of the state, there does not appear an indisposition to make arrangements for a settlement, but the plea put forward is the extreme poverty of the Government. For years past—probably ever since the division of Colombia into states this Republic has struggled with difficulties, and the expenditure has far exceeded the revenue. The proposal now made to obtain a vested interest in the Galipagos Islands, which are situated to command a position in connexion with the trade of the Pacific, is a point that should be pushed with all possible firmness: although we should not like to recommend *bonds-fide* purchases upon the strength of any probable success. At present the Bonds quote 3¼ 4. Dutch Five per Cents quote 102, notwithstanding the commencement of hostilities. Russian Four-and-a-Half per Cents are 96¾. The last quotations give—Brazilian Bonds, 92; Ditto, New, 1829 and 1839, 91; Ditto, New, 1843, 90; Chilian Bonds, Six per Cent., 101¼; Danish Bonds, 1825, Five per Cent., 102¾; Equador Bonds, 3¾; Grenada Bonds, One-and-a-Half per Cent., 18¾; Ditto, Deferred, 4¼; Mexican, Five per Cent., 1846, Account, 29¾; Peruvian Bonds, Four-and-a-Half per Cent., Account, 82¼; Ditto, Deferred, 36¾; Portuguese Four Cent., 34; Russian Bonds, Four-and-a-Half per Cent., 103; Spanish, Five per Cent., Passive, 3¾; Ditto, Three per Cent., 37¾; Venezuela Bonds, Two-and-a-Quarter per Cent., Deferred, 12¾; Dutch, Two-and-a-Half per Cent 12 Guilds., 57⅞; Ditto, Four per Cent., Certificates, 89.

Shares are quiet, without any material changes. Prices at closing are—Buckinghamshire, 17¾ x. i.; Caledonian, 7¾; Ditto. New, £10 Preference, 5; Chester and Holyhead, 8¾; Eastern Counties, 6¾; Ditto, New, Preference, 6 per cent., 11¾; East Lincolnshire, guaranteed 6 per cent., 28¾ x.i.; Great Northern, 8¾ x.i.; Ditto, 5 per Cent., Preference, 10¾; Great Western, 7¾; Hull and Selby, 96¾, Ditto, Half Shares, 48; Lancashire and Yorkshire, 30¾; Leeds and Bradford, 91¾; London and Blackwall, 4¾; London, Brighton, and South Coast, 80¾; London and Greenwich, 11; London and North-Western, 108¾; Do., New, Quarters, 17¾; Do., Fifths, 1½; London and South-Western 87½; Midland, 33¾; Ditto, £50 Shares, 10 x.i.; Ditto, Birmingham and Derby, 18; North British, 7½; Scottish Central, 10¾; Scottish Midland Junction, 2¾; South Eastern, 14; Ditto, No. 3, 14; Ditto, Receipts, No. 1, 4¾; York, Newcastle, and Berwick, 11; Ditto, No. 3, 11; Ditto, New, 8¾; Ditto, G.N.E. Preference, 4¾ x.i.; York and North Midland, 15; Boulogne, 7¾; Central of France (Actions and Nouveau), 1¾ x.i.; Northern of France, 14; Orleans and Bordeaux, 3 x.i.; Paris and Rouen, 24¾; Paris and Strasbourg, 8; Rouen and Havre, 10¾

On Friday, the Consol Market was steady, although the amount of business doing was by no means extensive. The Three per Cents—Money—were done at 96⅞, and the New Three-and-a-Quarter per Cents, 99⅛. Bank Stock, 212 Reduced Stock, 97⅛. India Bonds, 88s. to 92s. ; and Exchequer Bills, 68s. to 70s. premium. Foreign bonds were tolerably steady. Brazilian, 92; Dutch Two-and-a-Half per Cents, 57⅞; Mexican, 29¾; and Spanish Three-per-Cents, 37¾. In Railway Shares, very little doing.

THE MARKETS.

CORN-EXCHANGE (Friday).—During the present week a full average quantity of English wheat—2,50 quarters has come to hand for our market coastwise By and coarge and sample the supplies have slightly increased The supply on offer to-day, and which was partly composed of that exhibited on Monday, was by no means large. Owing to the changeable state of the weather the factors were somewhat firm; but, as the millers operated with great caution, only a moderate business was doing in home grown wheats, at about stationary prices. The imports of foreign wheat have been confined to 9280 quarters. The few transactions recorded in fine dry qualities were at full rates of currency. In the middling and inferior kinds (which were plentiful) comparatively little was doing. Very little English barley was brought for sale, and the supply of foreign was smaller than for some time past. Malting Mods moved off slowly, yet prices were supported. We had only a limited quantity of malt offering for sale, the demand was in a sluggish state, at last week's currency. Good mixed oats were scarce, and the turn dearer Secondary qualities sold at late rates. Beans, peas, Indian corn, and flour without alteration.

ARRIVALS.—English: wheat 2150; barley, 140; malt 3600; oats, 2280; flour, 2790 Irish: oats, —. Foreign: wheat, 9350; barley, 9280; oats, 63 0 flour, 2000 quarters

MARK-LANE.—Wheat: Essex and Kent, red, 80s to 84s; fine white ditto, 86s to 90s; Norfolk and Suffolk, red, 40s to 42s, ditto, white, 42s to 44s; rye, 31s to 32s; grinding barley, 19s to 21s; distilling ditto, 22s to 24s, malting ditto, 30s to 37s; Norfolk and Lincoln malt, 44s to 46s; brown ditto, 40s to 44s; Kingston and Ware, 48s to 52s; Chevalier, 52s to 54s; Yorkshire and Lincolnshire feed oats 15s to 17s; potato ditto, 18s to 21s; Youghal and Cork, black, 15s to 16s; ditto white, 16s to 18s; beans, new, 28s to 27s; ditto, old, 28s to 29s; grey peas, 25s to 28s; maple, 26s to 28s; fine ditto, 27s to 29s; boilers, 29s to 27s. per quarter. Town made flour, 32s to 40s; Suffolk, 27s to 33s, Stockton and Yorkshire, 30s to 35s per 280 lbs.

Barley Barrel. Several parcels of new rapeseed have been disposed of at £32 per last. Canary seed has further sold 1 in value is to 2s per quarter In other articles very little doing

Linseed, English, sowing, 51s to 56s; Baltic, crushing, 40s to 42s; Mediterranean and Odessa, 38s to 40s; Hempseed, 28s to 30s per quarter; cake, linseed, 10s to 10s per cwt.; rape, 6l 5s to 6l 10s; Mustard seed, white into demand, 7s to 8s; brown ditto, 6s to 6s per bushel. Coriander, 22s to 24s per cwt.; ditto, foreign, 16s to 17s per cwt. Canaryseed, 44s to 45s per quarter. Carraway seed, 30s to 31s per quarter. English Clover-seed, red, 40s to 44s; ditto, white, 50s to 60s; Trefoil, 20s to 24s; Tares, 3s 6d to 4s 6d per bushel. Red Rapeseed, new, £25 to £28 per last of twenty-four quarters. Linseed cakes, English, £9 0s to £10 0s; ditto, foreign, £8 15s to £9 0s per 1000. Rapeseed cakes, 5l 5s to 5l 10s per ton. Carraway seed, 50s to 70s per quarter. English Clover-seed, red, 40s to 44s; ditto, white, 50s to 60s; Trefoil, 20s to 24s; Tares, 3s 6d to 4s 6d per bushel. Red Rapeseed, new, £25 to £28 per last of twenty-four quarters. Flour, American, 21s to 27s per barrel; Canada, 23s to 25s per barrel.

Liverpool Corn Market.—Several parcels of new rapeseed have been disposed of at £32 per last. Canary seed has further sold 1 in value is to 2s per quarter In other articles very little doing

Liverpool Provision Market.—Beef, 47s 6d; barley, 22s 3d; oats, 7s 9d; rye 35s 6d; beans, 37s 3d; peas 37s 1d

Tuesday's Mark-lane Average.—Wheat, 40s 11d; barley, 21s 1d; oats, 17s 0d; rye, 22s 7; beans, 37s 9d; peas 37s 1d

Tuesday's Liverpool Average.—Wheat, 40s 11d; barley, 21s 1d; oats, 17s 0d; rye, 22s 7; beans, 37s 9d; peas, 37s 3d

Returns from Foreign Ports.—Wheat, 1s 0d; barley, 1s 0d; oats, 1s 0d; rye, 1s 0d; beans, 1s 0d; peas, 1s 0d.

Spread.—The prices of wheaten bread in the metropolis are from 6½d to 7d of household ditto, 4½d to 5d. per 4lb loaf

Tea.—The stock of tea in the United Kingdom is now 2,603,000 lb less than at this time last year, yet the market is fairly supplied with most descriptions. Common congou continues selling at 10½d to 11d per lb. In other kinds only a moderate business is doing.

Sugar.—Although the demand for raw sugar has not been active, prices are rates are mostly supported. Refined goods move off freely, on higher terms. Brown lumps, 42s 6d to 43s; and good to fair grocery, 41s to 42s per cwt.

Coffee.—We have had a moderate inquiry for good ordinary native Ceylon, at 42s 6d to 44s per cwt. Plantation kinds are steady, at full prices.

Rice.—East India kinds are somewhat easier to purchase. Middling to good Bengal is selling at 2s 6d to 11s 6d per cwt.

Provisions.—Irish butter, the supply of which is good, is dull in sale, owing to the prevailing warm weather, at a decline of from 2s to 4s per cwt. Fine Friesland is selling at 90s to 92s; and fine Limerick, 86s to 88s per cwt. In foreign butter very little is doing, and ordinary Cork, 76s to 78s; Kerry, 76s per cwt. Bacon is dull, at from 56s to 57s per cwt. Hams are in limited request, at 60s to 64s per cwt. Lard is steady, and 6s per cwt. Irish pork is in fair request, at 70s to 72s per cwt.

Tallow.—For the time of year, our market is steady, and prices are full by supported. P.Y.C. on the spot is selling at 38s 3d; and for forward delivery, 37s 6d per cwt.

Oils.—There is less business doing in our market, yet the quotations are steady.

Linseed Oil.—Hempseed is rare in moderate request at full prices. Rapeseed oil is very few transactions can be reported. Holders of brandy are firm.

Hay and Straw.—Meadow hay, £3 15s to £5 15s; new ditto, £3 5s to £3 9s; old clover hay, £3 10s to £4 5s; new ditto, £3 0s to £3 15s, and straw, £1 2s to £1 8s per load.

Coals (Friday).—Tanfield Moor, 13s 6d, Eden Main, 14s 6d; Hetton, 16s 3d; Stewart's, 15s 3d; Caradoc, 15s; and Tees, 15s 3d per ton.

Hops (Friday). The prevailing fine rains having caused the bine to grow rapidly in nearly the whole of our districts the demand for all kinds of hops continues in inactive state. As, however, holders, for the most part, are firm, we have no decline to notice in the quotations. The duty is freely backed at £185,000.

Wool.—In the Midland and East Kent markets, 48 5s to 51 0s; new Weald of Kent ditto, 56 0s to 57 0s; new Sussex ditto, 54 5s to 56 0s; Hunts, 54 5s to 56 0s; Yearlings, 61 0s to 64 0s, old ditto, 60 0s to 63 0s.

Smithfield (Friday).—The supply of beasts on sale in to-day's markets—amongst which were 10 cows from Stanion—was very moderate, the time of year considered, and of but middling quality Notwithstanding that the attendance of buyers was limited, the best trade was dull steady, and a good clearance was effected, at prices fully equal to those obtained on Monday, the primest Scots selling at 3s 8d per 8lbs The numbers of sheep were somewhat extensive, but those exhibited on Friday last All breeds commanded a firm inquiry, and the late improvement in the sale was well supported. Prime down lambs moved off freely, at very full prices. All other breeds were quite as dear. Calves sold to a fair extent at late figures In pigs, scarcely any business was transacted. Milch cows sold at from £14 to £18 each, including their small calf.

Per 8lb to sink the offals:—Coarse and inferior beasts, 2s 4d to 2s 6d, second quality ditto, 2s 8d to 3s 0d; prime large oxen, 3s 2d to 3s 4d; prime Scots, &c., 3s 6d to 3s 8d; coarse and inferior sheep, 2s 10d to 3s 0d, second quality ditto, 3s 2d to 3s 4d, prime coarse-woolled ditto, 3s 6d to 3s 8d; prime Southdown ditto, 3s 10d to 4s 0d; coarse calves, 2s 6d to 2s 10d; prime small ditto, 3s 0d to 3s 8d; large hogs, 3s 2d to 3s 6d; neat small porkers 3s 8d to 4s 0d; lambs, 5s 6d to 6s 6d. Suckling calves, 18s to 24s, and quarter old store pigs, 18s to 20s each. Total supplies: Beasts, 310; cows, 150; sheep and lambs, 10,910; calves, 301; pigs, 300. Foreign supplies: Beasts, 1,840; sheep and lambs, 14,0; calves, 102, Scotch: Beasts, 143; sheep, 81.

Newgate and Leadenhall (Friday).—These markets were tolerably steady to-day, and late rates were well supported.—

Per 8lbs by the carcase:—Inferior beef, 2s 8d to 2s 4d; middling ditto, 2s 6d to 2s 8d; prime large ditto, 2s 10d to 3s 0d; prime small ditto, 3s 2d to 3s 4d; large pork, 2s 10d to 3s 4d; inferior mutton, 2s 6d to 2s 8d; middling ditto, 2s 10d to 3s 4d; prime ditto, 3s 6d to 3s 10d; veal, 2s 8d to 3s 6d, small pork, 3s 6d to 3s 10d, lamb, 5s 6d to 6s 6d.

ROBT. HERBERT.

THE LONDON GAZETTE.

FRIDAY, JULY 19.

BANKRUPTS.

T DYSON, Hardings-terrace, Albert-street, Newington, railway contractor. G F GIRDWOOD, Maida hill, chemist. G SHEPHEARD, Modbury, Devonshire, linen draper. T B BOLTANS, Liverpool, cotton-broker.

SCOTCH SEQUESTRATION.

P KERR, Dundee, merchant.

BIRTHS.

At Bedford, on the 12th inst, the Lady of Frederick Shepperd, Esq, of a daughter.—On the 20th July inst, Amelia-road, Regent's-park, Mrs Benj. of a son.—At Trowbridge Wells, the wife of Captain Frederick Meer, of a son.—At the Admiralty, Lady Arabella Baring, of a son.—At Beaufort-grove, Upper Clapton, the wife of the Rev. John Bourne, M.A., of a daughter.—At Sussex-gardens, the wife of Dr Doolden, of a son.—At Berkswell Hall, Coventry, the wife of the Rev Charles Bickmore, M.A, of a daughter.

MARRIAGES.

At St George's, Hanover-square, Captain Lawrence, the 3rd Company of Pioneers, and Commander of the Forces in the Province of Tenasserim, to Harriet Sarah Wade Waldo, Esq.—At Gloucester [illegible] Esq., to Elizabeth Newington, the only daughter of Robert Elizabeth, and niece of the late Rev Thomas Smart Hughes, B.D., Canon of Peterborough, and Vicar of [illegible] Northamptonshire.—At Bath, Lieut. Edward Bond, of the Royal Regiment of Artillery, to Matilda, the only daughter of Lieut-Colonel Hastings Fraser, of her Majesty's 1st Regiment of Foot, and of the Presbytery Hotel, Tonbridge, by the Rev. [illegible] Rev [illegible] W Heurs, Member of the Unitarian Baptist Church, Lewes, Sussex, youngest daughter of the late Jessop Hall, of Worcester, Esq., of Tewkesbury.—At Sandhurst, Berks, Charles Augustus, youngest son of Edward Carleton, Esq., [illegible] only daughter of Robert Henderson, Esq.

DEATHS.

In South Audley-street, the Rev Thomas [illegible] vicar of Hereford, and a vicar of Llanstinwell, Pembrokeshire, [illegible] years, one of her Majesty's justices of the peace for the county of Hereford.—At Wardle's Cottage, Hampstead Heath, Colonel [illegible] R.N., in the 85th year of his age.—At Bath, [illegible] Esq., late of the Island of Jamaica,

NEW CHURCH OF ST. JOHN THE EVANGELIST, AT GREAT STANMORE.

NEW CHURCH OF ST. JOHN THE EVANGELIST,

AT GREAT STANMORE.

THIS Church was consecrated on Tuesday, the 16th instant, by the Lord Bishop of Salisbury, in the absence of the Bishop of London. It is the third parish church which has existed in Stanmore within little more than two centuries. There remains no vestige of the first of these edifices, and its site, at a considerable distance from the present churchyard, is only known by tradition and a single tombstone. For what reason this original building was pulled down, is unknown; but the second church was commenced about A.D. 1630, and was consecrated by Archbishop Laud. In itself there was little to admire, it being built of brick in the worst style of ecclesiastical architecture, and filled with a crowd of last century and other monuments. This second church becoming insecure, and not adapted to the increased population, the present edifice was commenced during the spring of last year. The foundation-stone was laid by the Earl of Aberdeen (whose son, the Hon. and Rev. Douglas Gordon, is rector of the parish), in the presence of the late Queen Dowager, who then appeared for the last time in public. The building consists of a nave, having north and south aisles, with a tower standing at the north-west corner of the nave.

The style of architecture throughout is decorated Gothic. The dimensions are Entire length from east to west, 105 feet 6 inches; chancel, 32 feet 6 inches; nave, 67 feet; height of tower, 76 feet; height of roof, centre gable, 50 feet 3 inches. The architect is H. Clutton, Esq.

The east window, executed by Mr. Willement, is a memorial to the late Queen Dowager, erected by subscription. Besides this, there are several other stained glass windows in the Church, severally presented by the Rector, the Rev. C. G. Hill, Mr. Clutton, and Mr. Willement. The Earl of Wicklow has also presented a window of stained glass, in memory of his two daughters, the Ladies Harriet and Isabella Howard.

The font, of Caen stone, was the gift of the Queen Dowager. The site and adjoining field was given by Lieutenant-Colonel Hamilton Tovey Tennent.

On the day of consecration, at half-past eleven o'clock, the Bishop entered the Church, preceded by the churchwardens and choristers, and attended by at least 40 clergymen. The usual forms having been gone through, the prayers were impressively read by the Hon. and Rev. Douglas Gordon, and an appropriate sermon preached by the Lord Bishop of Salisbury. After the ceremony luncheon was provided at the rectory under a spacious marquée, for the clergy and other distinguished visitors, amongst whom were the Earls of Aberdeen, Howe, and Wicklow; Lady Howe, the Rev. Lord Wrothesley Russell, Lord Haddo, &c. A dinner was also given in the Priory park to 500 poor people, by the Marquis of Abercorn. Fifty old men and women were similarly entertained by G. C. Glyn, Esq., M.P. And, in the evening, all the tradesmen of the place, to the number of 90, supped in the Rectory grounds, the Hon. and Rev. Rector presiding, supported by the Rev. Charles Gray Hill and the Rev. T. Marsland Hopkins. We must not omit to mention that there was an evening service, at six o'clock, when the Rev. W. G. Humphry, the Lord Bishop of London's chaplain, preached

THE GUJERAT VILLAGE CART.

THERE are few things more necessary to good and successful agriculture than suitable farming implements, and proper vehicles for the removal of produce to market, or the conveyance of manures to the fields under culture. The carts used by the people in the cotton districts around Broach, in Gujerat, afford a striking illustration of this, and are probably the best in India, in point of usefulness and adaptation to the purposes for which they are required. Without so much as a single mile of made or metalled road in the whole country, these carts, by having the wheels proportioned so as to fit the ruts exactly, move as if on tramways, and are drawn about from village to village by one or two pairs of bullocks, carrying heavy and bulky loads, weighing from twelve to eighteen hundredweight.

The village mechanists, carpenter and blacksmith, make up the carts according to a fixed scale. The frame and other parts are all strongly morticed and fastened by wooden pegs. The pole extends from the axletree to the cross-bar by which the bullocks are yoked; it is formed of two pieces of tough wood, running separate from near each of the wheels, and uniting in front in a point. It is a powerful lever in turning or moving the cart. Round about, and forming the sides of the cart, there is, attached by ropes, a plaited basket-work, made of cotton plant stalks. The wheels are the most important parts of the whole, and exhibit great ingenuity and mechanical skill in their construction. Four equal sized segments, of the hard wood of the indigenous *Acacea arabica* tree, are contained in the tire, which is four inches broad; and forms a circle of from three to four feet in diameter. The axles are of iron, and work in plate-iron boxes, let in to the nave. It is very rare to find iron nails used in the fastening of the different pieces of the cart. The morticing is found sufficient, and the framework lasts for many years, also the wheels—in fact, until worn down by time, or broken by constant work.

One or two pairs of bullocks are yoked in these carts, and the above Sketch gives a very correct representation of the style of cart and cattle. It will be observed that the feet of the bullocks are not visible; this is because they walk in the ruts made by the wheels. They must do so, and the whole secret of the facility and speed with which they travel depends on this. The ruts, when once formed, remain as permanent roadways, and particularly in the black cotton soil are distinct and durable, like tramways. They are about five inches wide and as many deep. Very little care is taken to preserve these ruts. The earth itself becomes so hard in the dry season of the year (and it is only from then that carts can be used at all in Gujerat), that a little filling in of loose earth occasionally, by the poor villagers, where holes may happen to be worn too deep, and who get a few pice from the cartmen for their trouble, is all that is ever required, thought of, or attempted.

In nothing are the poor people of Gujerat more fortunate than in respect of cattle. The bullocks used in agriculture are remarkably fine, docile, and powerful animals. Large numbers are reared on the extensive sandy plains in the north of Gujerat, and on the borders of the Runn of Cutch, where extensive natural pasturage abounds. Their colour is generally white, with the ears, tip of the tail, and circle round the top of hoofs, black. The height at the shoulder of the largest is six feet, but a smaller-sized animal is found to be more useful for agricultural purposes. The large ones are prized by the wealthy members of the community for their carriages and travelling carts. Ordinary sized animals are valued at sixty to eighty rupees a pair.

Were it possible to give an account of the agricultural races of Gujerat, their habits and characteristics, it would astonish the best and most scientific promoters of agricultural art at Britain, to find how great is their knowledge, and how skilfully it is applied, according to the means which they possess. Drainage, the rotation of crops, the getting land into condition, manuring, and drill husbandry, all as well understood in Bhera and Lewa cultivators, and so far as in their power adopted, as are the same means by the farmers in the Lothians of Scotland.

How this knowledge has been obtained it would not be very difficult to discover; it originated in the perfect working of the *village system*, or little *republics* which this system formed. We have seen, and are acquainted with, the agriculture of both Gujerat and the Lothians, and we are confident in our belief that the practice of *drill-husbandry* is as perfectly understood in the one as in the other. Of course, we speak comparatively; for the means and appliances are very different in each, and the yield of crops, therefore, in proportion It is not in every village of Gujerat that the same amount of skill and labour will be found displayed—far from it; good agriculturists are as rare in India as in Britain. The rapid progress of ethnological science has of late years drawn attention to the influence of races of people, and the success with which the arts and sciences have been cultivated by each. The aptitude for agricultural pursuits of certain races in Great Britain has been shown to be a peculiar and very valuable property, hardly capable of being acquired under centuries of training, and then only in combination with favourable circumstances. The Highlander with his hatchet and the Lowlander with his plough retain their distinctive requirements, even in the backwoods of America. In India, we believe it will be found that the agricultural races are far more distinctly marked than in any other country. The two classes of people named above are remarkable for their skill and devotion to agriculture. There seems to be an amount of pleasure and enjoyment derived from the culture of their fields which is quite unintelligible to common observers. They are all devoted to their villages, and would endure much hardship rather than leave them to settle elsewhere.

We have seen very few Mahomedan villages the lands of which are well cultivated; and we think it will be found generally that there is a great inaptitude, in the foreign Mahomedan races that inhabit India, for the pursuits of agriculture; for the life and duties of a soldier are natural to them, and neither individually nor collectively do they ever acquire much taste for the pursuits of agriculture. How different are the real Hindoo ryots, when unfettered and unembarrassed in their operations! the lands of their villages gradually assume an appearance of the richest cultivation; every spot is turned to advantage; no rest is taken until the village is surrounded by gardens of flowers and vegetables, and the fields of grain or sugar-cane are worked into the highest possible condition.—*Abridge from the Bombay Telegraph and Courier.*

GUJERAT VILLAGE CART.

EXTRAORDINARY PENMANSHIP.—John Parsons Peckerd, the artist alluded to in our paper some few months since, who accomplished a work of great labour solely with the pen, which he was privileged to introduce to her Majesty through the influence of the Mistress of the Robes, has just completed a work of greater skill and larger dimensions, under the title of "the National Design," containing an abstract of the Bible, with emblems characteristic of the work, as it bears on the future prosperity of our manufactures. It contains 1000 folios of writing, distinct from each other in style; each subject is embellished with a suitable design, with a great variety of mottoes, written in different languages and hieroglyphic characters, tastefully embellished. We hope the merits of the artist will meet with the support which his intense application richly deserves.

NEW SHAKSPEARE PORTRAIT.—A young artist has hit upon a novel method of reconciling the differences in the various busts and portraits of the immortal dramatic poet of England. His process may be described as properly eclectic. He has resorted to compilation. The Chandos bust and portrait having served him for the basis of the likeness, he has modified it by reference to the portrait in the folio edition of the plays, and that in the possession of the Duke of Somerset. The result is a highly successful work, which the artist has painted in the severe style of the sixteenth century. The portrait is life size—a full-length. Shakspeare is exhibited as standing in his library, musing by his writing-table; on the shelves behind are certain volumes, connected with the literature of his time, and that implied or referred to in his own works; such as Plutarch, Chaucer, Boccaccio, Montaigne. The expression and attitude are pleasing, and even imposing. In a word, the production is not only exceedingly clever, but shews a sympathetic relation in the mind of its compiler to that of its great subject. In this point of view it is exceedingly suggestive. It is now in the course of exhibition at Messrs. Dickenson's, in New Bond-street. The artist's name is Mr. Ford Maddox Browne, already known for his picture of "Lear and his Daughters." It is, we understand, the intention of the exhibitors to publish an engraving of the portrait.

ROYAL AGRICULTURAL SOCIETY.

TWELFTH ANNUAL MEETING AND EXHIBITION.

EXETER, Saturday, 20th July.

IN the hurried dispatch forwarded on Thursday, so as to reach town in time for the country edition, we forgot to allude to the balloon ascent, roasting the baron of beef by gas, and agricultural ball which took place on Wednesday evening. From the balloon, when at a considerable elevation, a cat descended with safety to *terra firma*, by means of a miniature parachute. The ascent was made from the Castle yard, the aëronaut being Mr. Carter. The ball was held at the Royal Subscription Rooms, and was attended by about 700 of the principal nobility and gentry, who were visitors or resident in the vicinity. The most novel, if not the most interesting, sight was that of cooking the baron of beef in the Castle-yard, under the inspection of M. Soyer. In the centre of the yard a hole was dug, and lined with perforated pipes, from which proceeded an innumerable quantity of small jets of gas; when the beef was deposited in this hollow, a similar apparatus of perforated pipes closed over the top, so that the meat was enveloped in a continued sheet of fire.

PAVILION DINNER

On Thursday afternoon, the grand banquet took place in a handsome new pavilion, erected in Queen-street; upwards of 1200 persons sat down; the whole of the tickets were sold early on Thursday morning, more than 300 applicants being disappointed; the noble President being amongst the last who was sufficiently fortunate to obtain a ticket. The entertainment was provided by M. Soyer, which is a sufficient guarantee for its excellence. Over the President's chair was a large transparency of the Royal arms, and above the seat of the Vice-president, opposite, was placed the tastefully-formed arch, designed by M. Soyer, which was composed solely of vegetable and animal productions

ROASTING THE BARON OF BEEF BY GAS, IN THE CASTLE-YARD, EXETER

CATTLE OF ANY BREED.—SUSSEX.—SECOND PRIZE, £10.

ordinarily found in the farm-yard. An excellent illustration of this arch having been given in the last Number of the ILLUSTRATED LONDON NEWS, we need not dwell further on its description. In the same Number will, also, be found the bill of fare.

It would occupy too much space to enumerate the distinguished persons who were present on this occasion; we shall, therefore, confine our list to the more remarkable foreigners who were present.

On the right hand of the Marquis of Downshire (the President of the Society) sat, who occupied the chair, were M. Drouyn de Lhuys (the French Ambassador), the Belgian Minister, M. Rives (the American Minister at Paris), on the left were Mr. Laurence (the American Minister), the Count de Strahlendorf, Chevalier de Bunsen, the Prussian Minister, the Count de Strahlendorf, the Austrian Minister, the Count de Strahlendorf, the Russian Minister, the Count de Strahlendorf, the Spanish Minister, the Count de Strahlendorf, the Portuguese Minister, the Count de Strahlendorf, the Swedish Minister, the Count de Strahlendorf, the Danish Minister, the Count de Strahlendorf, the Dutch Minister, the Count de Strahlendorf, the Swiss Minister, the Count de Strahlendorf, the Turkish Minister, the Count de Strahlendorf, the Persian Minister, the Count de Strahlendorf, the Chinese Minister, the Count de Strahlendorf, the Japanese Minister, the Count de Strahlendorf, the Siamese Minister, the Count de Strahlendorf, the Burmese Minister, the Count de Strahlendorf, the Cochin-China Minister, the Count de Strahlendorf, the Tonquin Minister, the Count de Strahlendorf, the Cambodian Minister, the Count de Strahlendorf, the Laotian Minister, the Count de Strahlendorf, the Annamite Minister, the Count de Strahlendorf, the Tonquinese Minister, the Count de Strahlendorf, the Cochin-Chinese

THE "ALARM" YACHT ASHORE IN BARNPOOL.—DRAWN BY CONDY.

THE "ALARM" YACHT.

We regret to state that the *Alarm* cutter yacht, belonging to J. Wild, Esq., of Lulworth Castle, a few days since, in endeavouring to pick up a buoy, in Barnpool, went on shore, fell over, and filled. The damage done is not very material as far as the vessel is concerned; but the cabin furniture, bedding, linen, &c., is entirely destroyed. Fortunately there was no sea on at the time, or she might have been seriously injured. We hear that the keel is twisted off, and that she has started one or two butts. The *Alarm* is the largest cutter afloat, being 193 tons; and is so well known in the yachting world, that our eulogy would be superfluous. She was designed by her owner, and built by Inman, of Lymington. We hear she is to sail for a cup this year at Cowes, where she has been so often successful. Her captain, "old Cork," is considered one of the best fore and aft seamen in the world. The accompanying Sketch is by Mr. N. M. Condy, of Plymouth.

No blame could be attributed to the skipper, as the tide was running like a sluice, as every one knows it does in Barnpool during "the springs," and with a light air of wind which scarcely gave her steerage way, she became unmanageable. Every assistance was rendered by the officers of her Majesty's ship *Impregnable*, assisted by the Dockyard. She was got off, and taken to be repaired, and we sincerely hope that the injuries sustained will not impede her sailing qualities.

Our readers will be surprised when we tell them the racing mainsail of this beautiful vessel contains 1400 yards of canvass; her mast, which is the most beautiful "stick" ever seen, cost in Norway, *before* being cut down, £180.

THE "GRIFFITH" STEAMER, PASSING THE LIGHTHOUSE AT BUFFALO HARBOUR POINT.—(SEE PAGE 82.)

LONDON: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by WILLIAM LITTLE, 198, Strand, aforesaid.—SATURDAY, JULY 27, 1850.

THE LATE GENERAL TAYLOR, PRESIDENT OF THE UNITED STATES.

THE LATE GENERAL ZACHARY TAYLOR,

PRESIDENT OF THE UNITED STATES.

It is with great regret that we announce the unexpected death of the President of the United States. The details of the lamentable event are given at page 70.

Zachary Taylor was born in Orange county, Virginia, on the 24th November, 1786, upon the soil which, in the words of John Randolph, is "fertile in presidential candidates." While he was but a few months old, his father, Colonel Richard Taylor, who had distinguished himself in the war of the Revolution, migrated with his family to Kentucky. He was one of the early pioneers. But ten years before, for the first time, had the habitation of the white man been seen anywhere in the vast territory between the western boundary of Virginia and the far-distant Mississippi. With his rifle, even at the time of Colonel Taylor's arrival, the enterprising settler was compelled to dispute with the Indian and the beasts of prey his title to the soil. There was a great deal of useful, though rough discipline, in the hardships of a border life. The dangers to which the Inhabitants were continually exposed gave them self-possession, a readiness for emergencies, and a contempt of peril, admirably adapted to success in important undertakings. All the intellect was brought into play, sharpened and fitted for action.

Whilst young, the future President aided his father in the labours of the field, and this early exposure to the severity and vicissitudes of the weather, hardy habits, and homely fare, laid the foundation of a constitution well adapted to the hardships he afterwards encountered. He attended school in the winter months, whenever a school, however distant, was accessible, and in summer worked on the farm.

To young Taylor the adventures of the school-house somewhat foreshadowed his future life. On one occasion, an Indian, in the British uniform, was shot in his immediate vicinity; and a schoolmate, or rather predecessor of his at school, gained a brilliant reputation among his associates, from having started four Indians near the school-house, and successively shot them all in a running fight. This person, Whetsel, became afterwards tutor in the art of war to Taylor.

While he was yet under age, the movements of Aaron Burr, in the West, seemed to threaten the integrity of the Union, and he eagerly enrolled himself in a troop raised to oppose all treasonable designs. The excitement upon this subject soon subsiding, he returned to the labours of his farm and to his studies. An elder brother dying soon after, a Lieutenant in the army, he was, through the influence of his relative, James Madison, appointed to the vacancy by President Jefferson, the 3rd of May, 1808.

General Taylor no sooner entered the service of his country than he exposed his life in her cause. By his defence of Fort Harrison against great odds, he saved a frontier from devastation. From that early exploit, as from a corner-stone, his fame gradually rose, as he went gallantly on through a service of some forty years, until his successful campaigns in Mexico—campaigns that secured California for the United States—gave him a reputation extending to all parts of the world. To many points of his career his countrymen point with great pride. In the war with England, he gallantly defended the half-erected military post against a large and almost overwhelming body of Indians, and drove them off with but a handful of men. He was equally celebrated in what is known as the Indian war in the north-west; for his victories in the Florida war; and again for his two battles in the field, his capture of the city of Monterey, strongly fortified, and occupied by a superior force; and, finally, for his defeat of 25,000 men under Santa Anna, by a force of 4000 volunteers who had never been in action, aided by only 500 regulars. During the whole of the Mexican war he was remarkable for the care of the men under his command; for his readiness to expose himself to danger, and his desire to obtain peace as the best reward of all military exertion.

Many characteristic anecdotes are related of the bravery and eccentricity of General Taylor. "Old Zack," as he was called, was about 5ft. 9in. or 10 in. in height, and remarkable for the shortness of his legs in proportion to his body: he was stout, though not corpulent, and presented a straight, vigorous, and muscular figure. At the head of a troop of horse, winding down a hill near Mount Morales, he is pourtrayed as "a plain-looking gentleman, mounted upon a brown horse, having upon his head a Mexican sombrero, dressed in a brown-olive loose frock-coat, grey pantaloons, wool socks, and shoes. From under the frock appears the scabbard of a sword; he has the eye of a hawk, and every lineament of his countenance is expressive of honesty, and a calm, determined mind. The plain-looking gentleman is General Zachary Taylor, who, with his military family, and a squadron of dragoons as an escort, is on his way to the front."

After the capitulation of Monterey, the officers of the army used their exertions to get General Taylor to move from his camp at St. Domingo to the Plaza, and there establish his head-quarters. Several public buildings were examined and decided upon as suitable. After considerable persuasion, General Taylor consented to move, at the same time giving the following instructions: "Choose a pleasant location—a house that is surrounded by a garden filled with large trees; put up a tent under the trees for my residence, and you (the staff and other officers) may have the house in front." It is needless to add, that no more was said about the head-quarters being removed into the city of Monterey.

In the early part of a severe action, when the enemy had succeeded in turning the left wing of his little army, and secured a seeming advantageous position in rear of their line, at the base of the mountain; when a portion of the troops, overpowered by the superiority of numbers, were forced to retire in "hot haste;" when, indeed, the fortunes of the day seemed extremely problematical, an officer of high rank rode up to General Taylor, and announced the temporary success of the enemy, and expressed his fears for the safety of the army. Taylor's reply was characteristic of the man. "Sir," said he, "as long as we have thirty muskets, we can never be conquered! If these troops who have abandoned their position can be rallied and brought into action again, I will take three thousand of the enemy prisoners. Had I the disposition of the enemy's forces, I would myself place them just where they are." The officer resumed his duties with a light heart, considering that the battle, in spite of appearance, was already won.

A little while before the battle of Buena Vista, a party of athletic young men, direct from Saltillo, met General Taylor near his camp at Walnut-grove. "Where are you from?" inquired the good old man of the foremost of the youngsters. "Just

JOHN M. CLAYTON. T. EWING J. COLLAMER G. W. CRIST. Z. TAYLOR. W. BALLARD PRESTON. W. M. MEREDITH. BAVARDY JOHNSON.

PRESIDENT TAYLOR AND HIS CABINET.—DAGUERREOTYPED BY BRADY.

from Saltillo, General," was the reply, in a voice such as a favourite son assumes when speaking to a familiar parent. "Well, well," said the General, looking at the party with solicitude, "you had better be careful, boys, and not trust yourselves out on the road in such small force; you will get cut off some time; it is very imprudent to do so." That evening General Taylor and staff, seven persons, all told, started for Saltillo!

As an instance of the General's calmness in the hour of battle, it is related that, during the battle of Resaca de Palma, he was sitting on his horse in the thickest of the fight, with his sword drawn, while the balls were whizzing round him. Colonel C——, the amiable suitor of the 4th, remarked to the General that it was getting rather hot, and proposed to him to retire a little. "Let's ride a little nearer—the balls will fall behind us!" was the General's reply.

The General had assembled his council of officers the night previous to the conflict of Buena Vista, for the purpose of hearing their suggestions in relation to the approaching battle. A good deal of uneasiness was exhibited—objections were raised—the disadvantages of the immense "odds" were presented—propositions to retire and wait for reinforcements were urged—some were for giving the enemy battle—and one proposed that the American army should "fall back"—when the old hero's opinion was asked. "Are you all done, gentlemen?" Every one had finished. "Then, gentlemen, I will adjourn this meeting," coolly added Taylor, "*till after the fight to-morrow!*" "Good!" was the unanimous response. The battle was fought and—won.

Brevity was the soul of the General's dispatches. Secretary Marcy, it is said, complained to Taylor that his dispatches were not sufficiently in detail, to which

the old General replied that "he was sorry for it, that he put into them *all he had to say*."

On his triumphant return from Mexico his friends put him in nomination for the office of President. He was for a time an unwilling candidate, but when he at length entered to enter the lists his plain straightforward conduct gained him many new supporters. His two opponents were General Cass and Mr. Van Buren, but the real contest lay between Taylor and Cass, and its termination in November, 1848, showed the electoral votes of the States to be:—For General Taylor, 163; for General Cass, 127; majority for Taylor, 36. The term of office of the new President commenced in March, 1849. Previous to this he indicated the character of his intended policy in a speech that tended to confirm the character his friends had claimed for him for good sense:—

"I am not yet President, and when I am, let all applications be made through the proper departments; and if it is wished to remove an incumbent, let it be shown that he does not answer the Jeffersonian standard for an office-holder, and that the applicant does; and as far as lies in my power I intend that all new appointments shall be of men honest and capable. I do not intend to remove any man from office because he voted against me, for that is a freeman's privilege; but such decapitation of offices and official patronage as some of them have been guilty of to secure the election of the master whom they served as slaves, is degrading to the character of American freemen, and will be a good cause for removal of friend or foe. The officers of the government should be filled with men of all parties; and, as I expect to find many of those now holding to be honest, good men, and as the new appointments will, of course, be Whigs, that will bring about this result. Although I do not intend to allow an indiscriminate removal, yet it grieves me to think that it will be necessary to require a great many to give place to better men. As to my cabinet, I intend that all interests and all sections of the country shall be represented, but not, as some of the newspapers will have it, all parties. I am a Whig, as I have always been free to mean privilege, but I do not believe that those who voted for me wish me to be a mere partisan President, and I shall, therefore, try to be a President of the American people. As to the new territory, it is now free, and slavery cannot exist there without a law of Congress authorising it, and that I do not believe they will ever pass. I was opposed to the acquisition of this territory, as I also was to the acquisition of Texas. I was opposed to the war, and, though by occupation a warrior, I am a peace man."

His subsequent conduct confirmed the favourable impression this preliminary announcement created, and men of all parties will lament the event that has shortened the career of a man who served his country so gallantly in the field, and so moderately, fearlessly, and well in the Presidential chair.

MILLARD FILLMORE, THE NEW PRESIDENT OF THE UNITED STATES.

The career of the new President of the United States, Millard Fillmore, a Portrait and Memoir of whom appeared in the ILLUSTRATED LONDON NEWS of January 13, 1849, affords a useful lesson, by showing what may be accomplished in the face of the greatest obstacles, by intellect, perseverance, and strict integrity, in a public and private capacity.

His father, Nathaniel Fillmore, who was descended of an old respectable English family of Devonshire, was an American farmer of humble means, who lived at Summer Hill, Cayuga county, New York, where Millard, now President, was born, January 7, 1800. About the year 1802 he removed to the town of Sempronius, now Niles, and resided there till 1819, when he removed to Erie county, where he still lives, cultivating a small farm.

The narrow means of his father deprived Millard Fillmore of any advantages of education beyond what were afforded by the imperfect and ill-taught common schools of the country. Books were scarce and dear, and at the age of fifteen, when more favoured youths are far advanced in their classical studies, or enjoying in colleges the benefit of well-furnished libraries, young Fillmore had read but little more than common-books and the Bible. At that period he was sent into the wilds of Livingston county, to learn the clothiers' trade. He remained there about four months, and was then placed with another person to pursue the same business and wool-carding in the town where his father lived. A small village library that was formed there soon after gave him the first means of acquiring general knowledge through books. He improved the opportunity thus afforded; the appetite grew by what it fed upon The thirst for knowledge soon became insatiable, and every leisure moment he was apt in reading. Four years were passed in this way, working at his trade and storing his mind, during such hours as he could command, with the contents of books of history, biography, and travels.

At the age of nineteen he fortunately made an acquaintance with the late Judge Wood, a man of wealth and great business capacity, who had an excellent law library. He soon saw that under the rude exterior of the clothier's boy were powers that only required proper development to raise the possessor to distinction and usefulness, and advised him to quit his trade and study law. In reply to a question of a lack of education, means, and friends to aid him in a course of professional study, Judge Wood kindly offered to give him a place in his office, to advance money to defray his expenses, and wait until success in business should furnish the means of repayment. The offer was accepted. The apprentice boy bought his time, entered the office of Judge Wood, and for more than two years applied himself closely to business and study. He read law and general literature, and studied and practised surveying.

Fearing he should incur too large a debt to his benefactors he taught in a school for three months in the year, and thus acquired the means of partially supporting himself. In the autumn of 1891 he removed to the county of Erie, and the next spring entered a law office in Buffalo. There he sustained himself by teaching school, and continued his legal studies until the spring of 1823, when he was admitted to the Common Pleas, and commenced practice in the village of Aurora, where he remained until 1830, when he again removed to Buffalo.

His first entrance into public life was in January, 1829, when he took his seat as member for Erie county, to which office he was re-elected two following years. His talents, integrity, and assiduous devotion to public business, soon won for him the confidence of the House in an unexampled degree. It was a common remark among the members, "If Fillmore says it is right, we will vote for it."

The most important measure of a general nature brought up during his service in the state legislature was the bill to abolish imprisonment for debt. In behalf of that philanthropic measure Mr. Fillmore took an active part, urging its justice and expediency, and, as a member of the committee on the subject, aiding to perfect its details. The Bill met with a fierce, unrelenting opposition at every step of its progress; but Fillmore and a compact party fought the question so well, that imprisonment for debt was abolished in the State.

He was elected to Congress in the fall of 1832. The session of 1833-34 is remembered as the one in which that system of politics known under the name of Jacksonism was fully developed. He took his seat in the stormy session of 1833-34. In those days the business of the House and debates were led by old and experienced members—new ones, unless they enjoyed a wide spread and almost national reputation, rarely rising at once and conspicuous part. Little chance, therefore, was afforded him as a member of the opposition, young and unassuming, of displaying those qualities that so eminently fit him for legislative useful uses. But the school was one admirably qualified to more fully develop and cultivate those powers which, under circumstances favourable, have enabled him to render such varied and important services to his country. He discharged his duty with scrupulous fidelity, never committing on all proper occasions any efforts to advance the interest of his constituents and the country, and winning the respect and confidence of all.

At the close of his term of service he resumed the practice of his profession, which he pursued with reputation and success until, in the year of 1836, he consented to become a candidate, and was re-elected to Congress in the fall of 1836. In this Congress Mr. Fillmore took a more active part than he did during his first term, and on the assembling of the Congress, to which he was re-elected by a largely increased majority, he was assigned a prominent place at what, next to that of Ways and Means, it as justly anticipated would become the most important committee of the House—that on Elections.

On the assembling of the next Congress, to which Mr. Fillmore was re-elected by a majority larger than was ever before given in that district, he was placed at the head of the Committee of Ways and Means, the duties of that station, always arduous and responsible, were at that time peculiarly so. A new administration had come into power, and found public affairs in a state of the greatest derangement. Accounts had been wrongly kept, speculation of every kind abounded in most departments of the government, the revenue was inadequate to meet the ordinary expenses, the already large existing debt was rapidly swelling in magnitude, commerce and manufactures were depressed, the currency was deranged, the banks were unsettled, and political discord pervaded the community. To bring order out of disorder, to replenish the national treasury, to provide means that would enable the government to meet the demands against it, and to pay off the debt, to revive the industry of the country, restore its wonted prosperity; these were the tasks devolved upon the Committee of Ways and Means. To increase their difficulties, the minority, composed of that party that had brought the government and country into such a condition, instead of aiding to repair the evil that had done, uniformly opposed almost every measure brought forward for relief, and too often their unavailing efforts were successfully aided by a treacherous executive. But, with an energy and devotion to the public weal worthy of all admiration, Mr. Fillmore applied himself to the task, and, sustained by a majority, succeeded in its accomplishment.

The measures he brought forward and sustained speedily relieved the government from its embarrassments, introduced a more accurate system of keeping accounts, rendering them clear and intelligible, was then introduced. The favouritism and peculation when had so long disgraced the department and plundered the treasury, were the rocks of contest. The credit of the government was restored, ample means were provided for the exigencies of the public service, and the payment of the national debt incurred by the former administration.

In 1844 he was selected as the Whig candidate for governor of New York, but failed. Confident, however, that he could command the strongest vote in New York, the Whigs again selected him as their candidate for Comptroller, in 1847, and succeeded in electing him by an unprecedented majority.

Such was the man whom the Whigs presented as their candidate for Vice-President. In every station in which he had been placed he had shown himself "honest, capable, and faithful to the constitution." He was emphatically one of the people. For all that he had and was, he was indebted under God to his own exertions. Born to an inheritance of comparative poverty, he struggled with difficulties that would have appalled and crushed a less resolute man. He was elected Vice-President, and now by the death of General Taylor, the once clothier's boy is President of the United States.

CHESS.

TO CORRESPONDENTS.

NEOPHYTE.—Cazio, the celebrated writer on the game, gives the following conditions as necessary for attaining to the first excellence in playing:—1. Natural invention. 2. Great study! 3. Great practice; 4. Great perception; and 5. Playing with first-rate masters.

ENIGMA.—The first match between the old London Club and the Club at Amsterdam was decided months ago in favour of the former

C M J Let us know the place and days of meeting when your Club is formed

R H.—Stalemate renders the game a drawn battle in this country

T, Downshire.—Problem No. 334 is in every respect correct. Look at it again

S, Old Subscriber.—In the position of your favourite, there are several obvious ways of mating in two moves, we find

J E W.—Surely the Bishop may take the K Kt Pawn, giving mate on the 3d move

C M J.—There is another very obvious mode of mating in your diagram, by making a Queen

BIBLIOPOLE.—By far the most perfect and comprehensive Catalogue of Chess Literature is that entitled "Literatur des Schachspiels Gesammelt, geordnet und mit Anmerkungen herausgegeben von Anton Schadd, Custos der K. K. Hofbibliothek," published at Vienna, 1847 You will probably obtain it of Messrs Williams and Norgate, the well-known foreign booksellers

SOLUTION OF THE NEPAULESE PROBLEM, by DERVON, M H, J K, Worcester; J F S, W G W C A M, Toulon-le-Sands; J C B, ♘, DE NEDEWOOD, B R, Newcastle; CAPE TOWN, F G R are correct.

SOLUTIONS OF PROBLEM No. 339, by F G R, DERVON, M P, F R S, HARRY OF EXETER, Rev T L, MINER, are correct. All others are wrong.

R P R is much below our standard

CECIL It is marked for insertion

A SUBSCRIBER must send us the position

*** Any Provincial Amateur desirous of a Game by Correspondence may hear of an opponent by addressing a "P W H," 35, Blenkett-street, Newcastle-upon-Tyne. The stake to be a Set of the STAUNTON CHESS-MEN.

SOLUTION OF PROBLEM No. 339.

WHITE.	BLACK.	BLACK.
1. R to K 7th (ch)	B takes R	3. K B to Q R 6th	Anything
2. P to K 4th	B takes P *	4. K B—mates.	

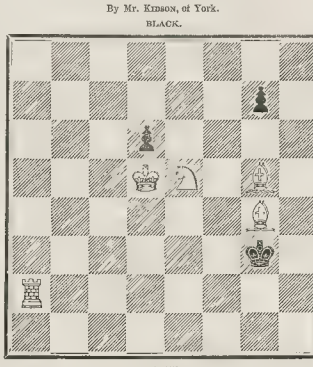
* 2 B to K B 5th

2. K B takes B—and mates next move.

PROBLEM No. 340.

By Mr. KIDSON, of York.

BLACK.



WHITE

White to play, and mate in three moves.

SECOND MATCH BY CORRESPONDENCE BETWEEN THE LONDON AND AMSTERDAM CHESS CLUBS.

WHITE (London).	BLACK (Amsterdam).
	11 B to K Kt 3d.

London to play.

BLINDFOLD CHESS.

The two following games, which were recently played by M. KIESERITZKY, without seeing the chess-board, before a society of amateurs in Paris, have been kindly presented to us by that gentleman.

GAME I.

(Scotch Gambit.)

WHITE. (M. Kieseritzky.)	BLACK. (Mr. Baring.)	WHITE. (M. Kieseritzky.)	BLACK. (Mr Baring.)
1. P to K 4th	P to K 4th	22. P to K 6th	P to K B 4th
2. K Kt to B 3d.	Q Kt to B 3d	23. Q R to Q B sq	R to Q sq
3. P to Q 4th	P to Q 4th (a)	24. Q R to B 3d	P to Q Kt 3d
4. Q P takes P	Q P takes P (b)	25. R to Q B sq	P to Q B 4th
5. Q takes Q (ch)	Kt takes Q	26. Kt to Q 4th	Q B to K Kt 3d.
6. K Kt to his 5th	Q B to K B 4th	27. Kt to Q B 6th	R to Q 3rd
7. Q Kt to Q 3d	Q Kt to B 3d	28. R takes B (ch)	Kt takes Kt
8. K B to Q Kt 5th	K Kt to K 2d	29. P to Q Kt 4th	K to Kt 2d
9. K Kt takes K P	Castles	30. P takes P	P takes P
10. P to K B 4th	P to Q 5th	31. R takes P	Kt to Q B 3d
11. K B to Q 3d	Q Kt to his 5th	32. B to his 3d	R takes P
12. K to l...2d	Kt takes B	33. B takes K Kt P	B to K sq
13. P takes Kt	Kt to Q 4th	34. K R to Q Kt (ch)	K to K sq
14. Q Kt to his 3d	Q B to K Kt 5th (ch)	35. B to K 5th	P to Q R 3d
15. K to his sq	R takes Q P	36. R takes Kt	R takes R
16. K Kt to K B 2d (c)	K B to Q Kt 5th (ch)	37. P to Q Kt 8th (ch)	K to R 2d
17. K to B sq	R to Q 8th (ch)	38. R takes B	K to Kt 3d
18. Kt takes R	B takes Kt	39. R to his 3d	K to Kt 4th
19. K to B 2d	Q B to K 4th	40. B to K R 8th	P to K R 3d
20. P to Q R 3d	K B to K 2d	41. R to K B 8th	K to Q R 5th
21. B to Q 3d	P to K B 3d	42. R takes P	

And Black surrendered.

(a) This defence is unusual, and not ill calculated, therefore, for confusing the blindfold player

(b) Hardly commendable, since it enables White to exchange Queens—a great desideratum for the party playing without the aid of the chess-board.

(c) All this is very interesting, especially when it is borne in mind that White plays only from memory.

GAME II. BETWEEN M. KIESERITZKY AND M. CARLINI, THE FORMER WITHOUT THE CHESS-BOARD.

(King's Gambit.)

WHITE. (M. Kieseritzky.)	BLACK. (M. Carlini.)	WHITE. (M. Kieseritzky.)	BLACK (M. Carlini.)
1. P to K 4th	P to K 4th	24. P takes Q (ch)	K to Q sq
2. P to K B 4th	P takes P	25. P takes Kt	B takes P
3. K Kt to B 3d.	P to Q 3d	26. B to K 5th	K to his 3d (g)
4. K B to Q B 4th	Q to K 2d	27. R takes B (ch)	K takes R
5. Q Kt to B 3d.	P to Q B 3d	28. B takes R	Kt takes P
6. Castles	Q Kt to Q 2d	29. B to B 2d	Kt to Q B 4th
7. P to Q 4th	P to Q Kt 4th	30. K to his 3d	K to Q 3d
8. K B to Q Kt 3d	Q B to Q Kt 2d	31. P to K Kt 4th	K to Q 4th
9. Q B takes P	Castles (e)	32. B to K B 6th	Kt to K 3d
10. P to Q R 4th	P to Q Kt 5th	33. Kt to K Kt 3d	K to Q B 5th
11. Kt to Q 5th	P to Q R 4th	34. Kt to K 4th	P to K R 3d
12. P to Q B 3d	P to Q B 4th	35. Kt to K Kt 3d	K to Q Kt 6th
13. Q B P takes P	Q B P takes Kt P	36. Kt to K B 5th	Kt to K B 6th
14. Q B to Kt sq (ch)	K to Kt sq	37. K to his 4th	P to Q R 6th
15. P to K 5th	Q B to K 4th	38. Kt takes K R P	Kt to K 3d
16. R takes B	P to K Kt 4th	39. Kt to K B 7th	Kt to Q B 4th (ch)
17. Q B to Kt 3d (f)	Q P takes P	40. K to his 3d	P to Q R 6th
18. Q P takes P	Q Kt to his 3d	41. P takes P	P takes P
19. K R takes K B P (c)	P to K 3d (d)	42. Kt takes K Kt P	Kt to Q R 5th
20. Q R to Q B 7th (e)	K Kt to K 2d.	43. Kt to K 4th	Kt to Q Kt 7th
21. Q to her B 2d (f)	R takes B	44. Kt to Q 2d (ch)	K to B 7th
22. Q takes R	K takes R	45. B takes Kt	K takes B
23. Q to her 6th (ch)	Q takes Q	46. Kt to Q B 4th (ch), and wins.	

(a) By Castling on this side, under present circumstances, Black is not likely to ensure his King a permanent refuge from the enemy.

(b) With the board before him, M. Kieseritzky would have preferred taking the Q P with Pawn, a move which must have brought on a crisis in Black's game very speedily.

(c) Well played.

(d) It is quite obvious that he would have lost his Queen if he had taken the Rook.

(e) The proper move we take to be Kt to Q 4th; for suppose—

WHITE.	BLACK.	WHITE.	BLACK.
20. Kt to Q 4th	R takes Kt (best)	22. B to Q B 6th (ch)	K takes B
21. R takes B (ch)	K to Q Kt 3d (best)	23. Q takes R	

And White has an easy winning game before him.

(f) The position is highly interesting at this point.

(g) Commend us to an adversary so accommodating, whenever we venture on the unprofitable task of playing blindfold!

WHY THE POST-OFFICE IS SHUT UP ON A SUNDAY.

(From a Correspondent.)

THE Post-office being a part of the Government, persons who have stopped the Sunday delivery think they have a right to dictate its proceedings. They treat it as a servant of their own. It is a public function exercised for the general benefit, and they require that it should be made to conform to the religious opinions professed by the State. Before they impeded its performance, they ought to have had a clear majority in their favour, instead of only a small portion of one House of Parliament and a few persons in the community who make up in zeal what they want in numbers. They have no more right, in fact, to determine how the Post-office shall do its work, than Mr. Smith O'Brien and his friends had to require the dissolution of the Union.

Compared to the number of sailors and soldiers, the number of the Post-office servants who work on Sundays is a mere trifle. Their work, too, is done noiselessly. There is no clang of arms, no boatswain's shrill whistle, no thumping of the drum, no loud and blustering command connected with the Post-office. Quietly does the postman go his rounds or the postmaster draw back his little slide. Rarely is there a necessity for one servant of the Post-office to be absent from church. Soldiers and sailors by thousands are forcibly detained by their duties from attendance on divine service. To account for the zeal of the Sabbatarians in stopping the Sunday delivery of letters and newspapers, and their indifference or laxity in allowing other state functions to be continued on Sunday, to their own condemnation—for what the State does is done by the power of the people and on their responsibility—we must look to other motives than their respect for religious principles. If they were as pure and consistent as they claimed to be, they would clamour against the exercise of the national power in any shape or form on Sunday, as well as against the Post-office delivering letters and newspapers. Why they direct their zeal most inconsistently to the latter, straining at this little gnat, and swallowing without a wry face that huge camel, it is our purpose to explain.

Armies, navies, policemen, of some kind or other, and ministers, are time-honoured functionaries of the State. It would be difficult to trace out their commencement. The Post-office is essentially the growth of yesterday. The very beginning does not go back beyond the days of our Commonwealth. A great deal of what is useful in it originated with Mr. Rowland Hill. Where tons of letters and newspapers are now carried, a boy with a single portmanteau, strapped on the crupper of his saddle, was sufficient to convey the whole correspondence half a century ago. The facilities given to commerce by the Post-office, and to multiculate intelligence, have so much increased since then, that the whole may be considered as of modern origin. While the antiquity of the other functions, often of doubtful utility, secures for them the respect of the Sabbatarians, the newness of the Post-office functions deprives them of all prescriptive respect, and brings them within the control of every aspiring meddler. They are dictated by Mr. Rowland Hill, or Sir Francis Freeling, or Mr. Palmer, and may, therefore, be regulated by Lord Ashley, Mr. Plumpire, or Mr. James Gilbert. It is thought at least presumptuous for individuals to dictate to the Government how soldiers or sailors should perform their duties; but every man supposes he is as competent to regulate the transmission of letters as Mr. Rowland Hill or the Ministers, and so the Sunday delivery is stopped by the interference of meddlers who would eat their fingers off before they would sign a petition to prevent armies from marching, or man-of-war from sailing, on Sunday.

The facilities afforded by the Post-office, have grown up, as it were, naturally. They were at least of such imperative necessity, before Mr. Rowland Hill's reforms, that all kinds of surreptitious methods were employed, contrary to law, to send communications without using the Post-office. The facilities were given that letters might not be smuggled, and the establishment, while it was kept up at its full strength, not be deprived of its sources of revenue. It was not possible, however, to facilitate communication by letter, without also facilitating the transmission of newspapers, and hence the Post-office became the easy and organised means of sending them all over the country.

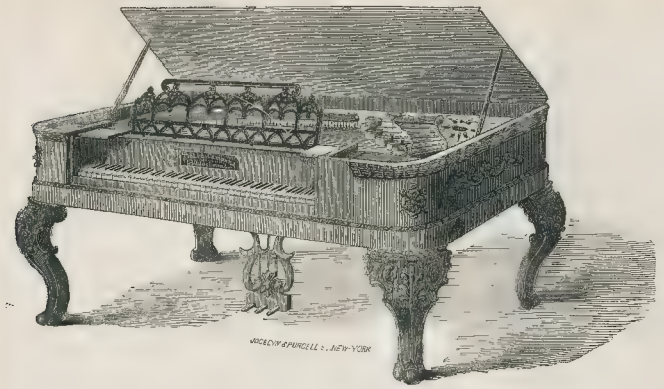
It is too late now to question the utility of newspapers. They are established. Society could no more exist and flourish, in its present form, without newspapers, than without food and clothing. The most zealous Sabbatarians admit this, and they are as anxious as other men to have their newspaper every week-day, but they object to newspapers being circulated on a Sunday. That day is appointed to rest from irksome manual labour; it is the only day that the bulk of the labouring classes can read, or are expected to read; and yet the opulent Sabbatarians, who enjoy the newspaper every week-day, cruelly try to prohibit the working man from receiving his stamped newspaper by the Post on the Sunday.

Underlying all more special motives, however, and giving them force, is a prevalent disposition from which all Europe is now suffering, of one man to meddle with another man's business. One of the disadvantages of our present condition of civilisation is to throw up a great number of persons who have much leisure and much ambition. They find a delightful employment, and hope to gain distinction by prescribing the duties of other men. That class furnishes us with Louis Blancs and Lord Ashleys. The busy merchant, the well-briefed advocate, the popular physician, or the hard-working mechanic can only now and then, when he is strongly moved, find time to hawk about petitions or to plan schemes for social improvement; but those who are at ease in their worldly circumstances, ambitious, and at leisure, take all society under their care. They will leave nothing unregulated. They are not satisfied with being surpassingly wise and surpassingly good themselves; they insist on modelling all other men by their standard. Nature makes men individuals and different—they want to make them all alike. Their principle is an exalted Communism, which other men carry to its proper conclusion by insisting on the Legislature making all men equally rich and prosperous, as well as equally religious and wise. They are doing, without intending it, we admit, a prodigious deal of mischief. By extending so much the interference of the Legislature, they make it, and make those who influence the Legislature, responsible for all the "ills that flesh is heir to." Socialism and Communism in their worst forms are the natural and necessary consequences of their demands. The Legislature that interferes with amusements and employments, will soon be required to provide for every member of the community. Those who insist on all men being made to conform to their views of the manner in which the Sabbath is to be observed, may expect that others will insist on their views as to equality of possessions being made the law of the land. If men are to be made by law equally religious and equally wise, why not equally rich?

HANOVERIAN ACCESSION.—On the 1st of August, Sir James Thornhill formerly gave the pensioners at Greenwich Hospital a bowl of punch, containing 90 gallons, each man having half-a-pint for his share.

ZOOLOGICAL SOCIETY.—Her Majesty has been graciously pleased to present the gigantic Land Tortoise (of which we gave an illustration on the 13th inst.) to the Zoological Society of London.

WHITTINGTON CLUB.—On Monday evening a very successful amateur dramatic entertainment was given by the members of the Whittington Club, in their large room, for the benefit of the fund for decorating the ball-room. The performance commenced with a scene from "Twelfth Night," followed by a scene from the second part of "Henry IV.," succeeded by the farce of "My Fellow Clerk;" the trial scene in the "Merchant of Venice;" concluding with the farce of "Killing no Murder." The performance was throughout very creditably sustained, the ladies eclipsing the gentlemen.



NEW PIANOFORTE.

THE PATENT DOLCE CAMPANA PEDAL PIANOFORTE.

THE Pianoforte manufacturers in the United States have made great progress of late years. Amongst the new inventions and improvements, the Patent Dolce Campana Pedal Pianoforte, now exhibiting at 28, Baker-street, the Engraving of which instrument is above, is deserving of notice. It has been imported from the manufactory of Messrs. Boardman and Gray, of New York, in order to have its merits tested by our makers, professors, and amateurs. Our Illustration at once exhibits the novelty, which is, in point of fact, a simple attachment to the sounding-board of the ordinary pianoforte, consisting of a series of pressing hammers secured by nuts at the back part. These hammers, or weights, are arranged by a lever pedal, to fall, at the will of the player, when required, upon an equal number of screws, and which, altering the vibration, affects and produces novel sounds. The hammers, or weights, do not touch the strings, the pressure being on the bridge, and they are made of a thin box of brass filled with lead, the arms being also of brass. The principle in this invention is to act upon the tone of the pianoforte just as the mutes do on the violins; and, as the title "Dolce Campana" imports, the results of the action of these hammers are a prolongation of the sound, and the production of the tonality of "sweet bells," or the harp. One great advantage in the attachment is, that it can be employed or not, entirely according to the performer's inclination. The invention can also be applied to the pianoforte of any maker, the old instrument not being in the slightest degree departed from. Sir George Smart, Mr. Benedict, Charles Hallé, and other eminent professors, have afforded testimonials of the value and utility of the invention. Whether it be destined to take a permanent position in pianoforte improvements can only be proved by time. Fixed notions and habits in respect to the quality of instruments are difficult of change, and we have seen many alleged improvements, fall to the ground; but, as regards the instrument now exhibiting, as a specimen of American taste, skill, and art in the workmanship, we have great pleasure in inviting the attention of our amateurs, and in recording in the above Engraving the nature of the "Dolce Campana" invention.

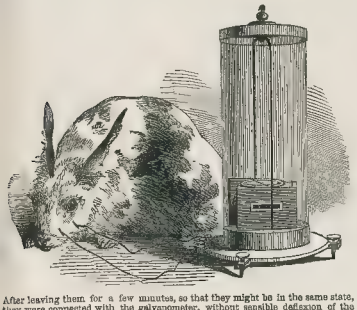
ANIMAL ELECTRICITY.

EVERY new fact and every new experiment tending to throw an additional light on the yet obscure and mysterious agent which animates the human frame, must always command not only the attention of philosophers, but of the public generally. The extraordinary excitement created by the pretended miracles of animal magnetism, is only a symptom of that allowable curiosity which leads the credulous and ignorant to believe in the tricks and deceptions of magnetisers: the true disciple of science, not so easily imposed upon, restrains his curiosity by a slow and careful examination of the phenomena as they present themselves: he indulges in no hurried solution of the fascinating mystery by adapting dreamy and fantastic theories, but knows, beforehand, that a strict and patient investigation will reveal facts, enabling him to prove that their miracles are no miracles, but are only refined and exquisite effects of causes operating constantly in the material world, and in perfect harmony with natural laws already learned.

The history of animal Electricity commences with the discovery of Galvani, in 1780. It is said that his wife, a most beautiful and intellectual woman, was suffering under that frightful malady consumption, for which she was taking a remedy consisting of a soup prepared from frogs. On one occasion, the recently killed animals were placed on a plate in the neighbourhood of an electrifying machine, when a pupil of Galvani's happening to turn it, the wife remarked that the frogs when touched with a scalpel gave a sudden and convulsive start. Galvani's attention being instantly directed to the singular occurrence, he at once believed he had discovered the secret of life, concluding the nervous and galvanic fluid to be one and the same thing.

About the year 1820, electrical science received an important addition in the invention of the Galvanometer, an instrument by which extremely feeble currents of electricity can be detected and measured. The construction of this instrument is so beautiful in theory, that we must refer our readers for a clear description to works devoted to this mysterious and interesting subject. We may briefly remark that it owes its existence to the wonderful discovery of Œrsted better known as electro-magnetism, to which we also owe that marvellous application the electric telegraph.

Space will not allow us to do justice to the numerous *savans*, who have been engaged in the investigation of Animal Electricity. We may, however, recommend to the notice of those who are curious in these matters, a remarkable work recently published ("Electro-Biology"). This work contains the results from practical investigation of more than ten years by its author, Alfred Smee, Esq., F.R.S., who has established beyond doubt the analogy existing between muscular and chemical or galvanic action. As it is our present purpose to notice more particularly a recent experiment remarkably confirmatory of the previous researches of Mr. Smee, we extract from his book one of the earliest of his numerous recorded experiments:—"Having obtained the arrangements necessary for measuring feeble currents of electricity, the time arrived for applying the test to the living creature. The first animal which was honoured was a black rabbit, into the masseter muscle of which I introduced a sewing-needle, whilst a second needle was placed in the subcutaneous cellular tissue.



After leaving them for a few minutes, so that they might be in the same state, they were connected with the galvanometer, without sensible deflexion of the needle. After a few moments, the animal not liking its treatment, made an attempt to bite the mechanism of volition was instantly exhibited by the deflexion of the galvanometer. A piece of wood was then given to the animal to bite: upon which it used all its powers of mastication, and, by catching the oscillation of the needle, a very powerful electric current was exhibited. In this experiment, the deflection of the needle proved the existence of a voltaic current during the action of biting, and thus denoted the mechanism of the force employed to throw the muscles into operation."

Our Second Illustration represents the arrangement of an experiment recently performed by M. Dubois-Reymond, a gentleman eminent in the study of "Organic Electricity." A cylinder of wood is fixed firmly against the edge of a table; two vessels filled with salt and water are placed on the table, in such a position that a person grasping the cylinder may at the same time insert the fore-finger of each hand in the water. Each vessel contains a metallic plate, and communicates by two wires with an extremely sensible galvanometer (*a*). In the instrument employed by M. Dubois-Reymond, the wire made 24,000 turns. The apparatus being thus arranged, the experimenter grasps the cylinder of wood firmly with both hands, at the same time dipping the fore finger

of each hand in the saline water. The needle of the galvanometer remains undisturbed: the electric currents passing by the nerves of each arm, and being of the same force, neutralize each other. Now let the experimenter grasp with energy the cylinder of wood with the right hand, the left hand remaining flaccid and free; immediately the needle will move from the west to the south, and describe an angle of 30°, 40°, and even 50°. On relaxing the grasp, the needle will return to its original position. The experiment may be reversed by employing the left arm, and leaving the right arm free; the needle will in this case be deflected from the west to the north. This reversing the action of the needle, by the contraction of the muscles of the right and left arm alternately, places beyond all doubt the question of the electric current being induced through the agency of the nervous system.

Three conditions are necessary for the success of this experiment:—1. Great muscular force; 2. The precaution to contract the muscles of only one arm at the same time; 3. That the skin of the hand should be soft, quite clean, and free from any kind of wound, however small.

If the experimentar is too feeble, the needle is scarcely disturbed. If both arms are contracted unequally at the same time, the deflection only shows the excess of force of one arm, as compared with the other. When the skin of the hand is thick and hardened, it is a bad conductor of electricity, and the least scratch or wound gives rise to chemical actions which develop of themselves the electric currents. The incontestable result of this experiment is, that the *human will*, producing a muscular contraction, causes a deflection of the needle.

The theory which accords best with the numerous experiments is the following:—The nerves are the channels or seats of continuous currents of electricity, which contraction of the muscles, pain, and other circumstances may interrupt. At the moment the fingers are plunged into the saline water, the needle remains perfectly quiet; the currents passing through both arms, and in opposite directions, neutralize each other. When one arm only is contracted, the electric current is interrupted in this arm; the current from the other arm, acting alone, causes the needle to deflect according to the muscular or electric force developed. The nervous phenomena have, then, a close analogy with those of electricity. Future research and discovery may some day inform us if the will by which the muscles are contracted is not itself induced by electricity, of which the nerves are the sources or channels, impressed and acted upon by external causes or impressions. Since the time of Galvani seventy years have elapsed before man was able to prove by experiment upon himself the existence of electric currents which this great physiologist had suspected; but science progresses incessantly, and, little by little, the mystery of life clears itself; phenomena which were believed exclusively vital, now associate themselves with phenomena purely physical or chemical: and if man should arrive some day to the knowledge of the principle which animates him, it will be more by the labours of physiologists than by the speculations of metaphysicians. What new facts have been discovered in metaphysics since the time of Aristotle and Plato?

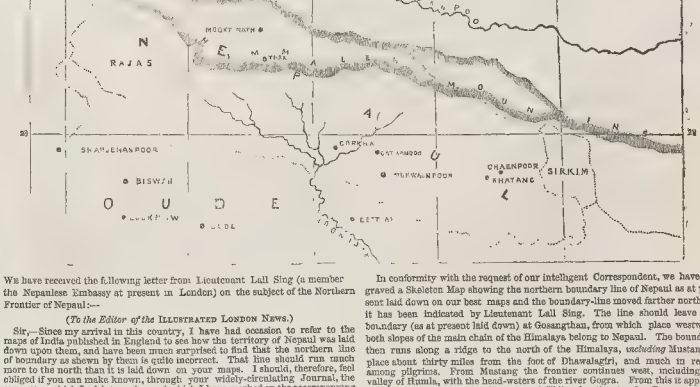
AN ENTERPRISING VOYAGER.—The following extract is from a letter dated "Chagres," June 27th, 1850:—"B. Butler, from the state of Wisconsin, 2000 miles above New Orleans, built a boat of five tons, carted it forty miles to the river, and, with three companions, started with this craft for California. Their intention was to cross by Nicaragua, go by the lake, and, with wheels to the boat, to take her overland to the Pacific, launch her afresh, and go on to San Francisco. They had never seen salt water before, and with an old chart and compass, off they went, reaching Cuba first, where they were seized as pirates, and detained thirty days. Two of the four left here, and then the other two started, coasting it all along Cape Catoche to St. Juan. When they arrived at that place, they found it impossible to get the boat up Nicaragua River, and they then brought her to Chagres, sold her for a good price, and started back for their own country, to build a more suitable craft; but, unfortunately, they were capsized in the American barque, and lost all. There was about 30,000 dollars on board of her. Thus ended the romance of the Yankee, whose perseverance certainly deserved a better fate.

ROMANTIC OCCURRENCE AT DRUMLANRIG TUNNEL.—About six weeks ago there came to Drumlanrig Tunnel a young man about seventeen or eighteen years of age, of the name of William M'Dougall, who asked for and obtained work as a labourer, and was employed in the tunnel at the bottom of one of the shafts, which is much inundated with water, and about 150 feet from the surface of the ground. While at work, his clothes were scarcely ever dry, but, notwithstanding this, he wrought ten hours a day alongside the best navvies in the shaft, and soon became, by his kind and obliging disposition, a great favourite with his fellow-workmen. A few days ago, from various circumstances, suspicions arose in the minds of some of the managers that he was other than he appeared to be; in short, they suspected him to belong to the "better half of creation." The house in which he lodged was discovered, and on inquiry of the landlady as to the descriptions of her lodgers, she answered they were all miners except one labourer, named Willie M'Dougall, a quiet, well-doing lad, who had a good stock of clothes of his own, besides some of his sister's, which he had brought away from her by mistake," and as this latter information increased preceding suspicions, Willie was immediately sent for and taken roundly to task, when he stoutly denied being other than a man; however, on being strongly questioned, and seeing *she* could keep her secret no longer, she at length acknowledged herself to belong to the fair sex, and gave as reasons for her strange proceedings, that she wished to raise, by honest industry, "the needful" to carry her to America. By the kind assistance of the lady of one of the managers, she was soon attired in habiliments becoming her sex and position in life. A subscription had been commenced at the works and in the neighbourhourhood, for the purpose of raising a sufficient sum to enable this spirited, enterprising, and dauntless girl to accomplish the object she had in in view, and which promises fair, from the spirit in which her brother-workmen and others are entering into the scheme, to provide her with ample funds for her laudable object. We may add that our heroine is a native of the "sister isle." *Dumfries Courier.*

AN INSIGHT TO THE ASSESSED TAXES.—We direct attention to this pamphlet, which we recommend as a means to avoid surcharge and unnecessary payments. It is replete with cases and decisions both before judges and commissioners.

EXPERIMENTS WITH SMALL ARMS.—A committee on small arms is at present sitting at Woolwich to test several descriptions of muskets, the experiments being made at the butt in the Royal Arsenal. The experiments have been carried on for some time by artillerymen, and have now commenced with line regiments. One captain, one lieutenant, two sergeants, two corporals, and twenty privates, selected from the three regiments of Foot Guards, arrived at Woolwich, on Wednesday evening last, to continue the experiments.

NEPAUL.



We have received the following letter from Lieutenant Lall Sing (a member the Nepaulese Embassy at present in London) on the subject of the Northern Frontier of Nepaul:—

(*To the Editor of the* ILLUSTRATED LONDON NEWS.)

SIR,—Since my arrival in this country, I have had occasion to refer to the maps of India published in England to see how the territory of Nepaul was laid down upon them, and have been much surprised to find that the northern line of boundary as shewn by them is quite incorrect. That line should run much more to the north than it is laid down on your maps. I should, therefore, feel obliged if you can make known, through your widely-circulating Journal, the correction which I wish to make, and which I have marked on the accompanying map. As no English surveyor has yet been to the furthest limit of our boundary on the Himmaleh Mountains, and as I have been myself frequently there for the purposes of our survey, I am the more anxious to have the error corrected.

I have the honour to be, sir, yours, &c.

LIEUTENANT LALL SING KHATTAY, Nepaul Officer.

In conformity with the request of our intelligent Correspondent, we have engraved a Skeleton Map showing the northern boundary line of Nepaul as at present laid down on our best maps and the boundary-line moved farther north, as it has been indicated by Lieutenant Lall Sing. The line should leave the boundary (as at present laid down) at Gosaingthan, from which place westward both slopes of the main chain of the Himalaya belong to Nepaul. The boundary then runs along a ridge to the north of the Himalaya, *excluding* Mustang, a place about thirty miles from the foot of Dhawalagiri, and much in resort among pilgrims. From Mustang the frontier continues west, including the valley of Humla, with the head-waters of the river Gogra. From this it appears that the distance from the Nepaul and Thibet frontier to the Bramaputra or Dsampo, is about seven kos, or fourteen miles. The Bramaputra or Burrampooter, as it is sometimes spelt, is at this place about as wide as the Thames at London, and fordable in some places. Thak and Mookteenath, the two places marked on the map by Lall Sing, and which are omitted in our maps, are very large and populous villages, carrying on a great trade in salt with Thibet.

TESTIMONIAL PRESENTED TO THE MARQUIS OF TWEEDDALE, K.T. AND C.B.

THE TWEEDDALE TESTIMONIAL.

THE magnificent group of plate has just been, as explained by the inscription which it bears,

Presented
by
The SOCIETY of MADRAS,
to
GEORGE, 8th MARQUIS of TWEEDDALE, K.T. and C.B.,
Governor and Commander-in-Chief,
1842—1845;
As a Token of Respect and Esteem
for
His Public and Private Worth.

The Testimonial is four feet in height, and consists of a candelabrum, the branches of which are intertwined with the Scottish Thistle. Around the stem is a group embodying the following interesting event:—

It is recorded in "Buchanan's History of Scotland and Annals of the Hay Family," that, in the reign of Kenneth the Third, A.D. 980, the Danes having invaded the country, were unsuccessfully opposed by the Scots, who fled. A countryman named Hay was, with his two sons, ploughing in a neighbouring field by the Pass of Clancarty, when Hay, a man of great strength and courage, instigated by a strong love for his country, seized the yoke from his oxen, and his sons whatever instruments came readiest, and took their stations in the narrow pass through which the fugitive Scots must proceed; they then forced their countrymen back upon the Danes, and, joining in the conflict, successfully routed them. After this gallant exploit, Hay entered the city of Perth in triumph, carrying his yoke, and accompanied by his sons and a numerous retinue. At a consultation of nobles held a few days after, at Scone, nobility was conferred upon Hay and his sons, and the King gave them as much land as the falcon could fly over, which proved to be six miles of country, afterwards called Errol. The King also assigned them three shields or escutcheons, to intimate that the father and two sons had proved the three shields of Scotland.

The group consists of the elder Hay and his two sons; a mounted Dane and a Dane overthrown. The basal-relievi on the base represent the flying of the Falcon and the conferring the Knighthood; and the other panel bears the inscription.

This truly noble piece of plate has been designed and modelled by Mr. Alfred Brown, under the inspection of Francis Grant, Esq., A.R.A., and E. H. Bailey, Esq., R.A. It has been beautifully executed in silver, at the cost of £2000, by Messrs. Hunt and Roskell, successors to Messrs. Storr and Mortimer, of New Bond-street

THE GREAT EXHIBITION OF 1851.

THE Royal Commissioners for the Exhibition of Industry of all Nations for 1851 have been pleased to appoint Lieutenant-Colonel Lloyd, her Majesty's Surveyor-General and Civil Engineer-in-Chief at Mauritius, and now on leave of absence, Special Commissioner, to co-operate with Dr. Lyon Playfair.

Her Majesty's Commissioners for promoting the Exhibition of 1851 give notice, that, having decided on giving three bronze medals, of different sizes and designs, as prizes to exhibitors, and having, by public advertisement (March 23), invited the artists of all countries to compete for the designs for the reverses of such medals, announcing at the same time their intention to give a reward of £100 for each of the three designs which should be accepted, and a reward of £50 for each of the best three designs that should not be accepted, and reserving to themselves the right of making such arrangements for executing the successful designs as may appear to them to be the best; and a number of designs, amounting to 129, having been sent in consequence of the above advertisement, which are now being exhibited at the rooms of the Society of Arts, John-street, Adelphi, the commissioners appointed the following gentlemen to act as a committee for selecting the best designs:—The Lord Colborne, W. Dyce, Esq., R.A., J. Gibson, Esq., R.A., M. Eugène Lami, C. Newton, Esq., of the British Museum, Herr J. D. Passavant, and Dr. Gustave Waagen, who, on the 29th June, presented to the commissioners the following report:—

"Society of Arts, Saturday, June 29.

"Sir,—The committee on the medals, consisting of Dr. Waagen, M. Lami, Mr. Gibson, Mr. Newton, and myself, have met, according to your summons, and have selected the following list, which in their opinion are most deserving of notice.

I remain, &c.,

"To J. Scott Russell, Esq., &c., (Signed) COLBORNE."

"No. 65, first; No. 24, second; No. 105 (1), third; No. 104 (3), fourth; No. 28, fifth; No. 68, sixth."

The commissioners accordingly decided that the £100 prizes should be awarded to Nos. 65, 24, and 105 (1), and the £50 prizes to No. 104 (3), 28, and 68.

On opening the papers attached to these designs, they were found to have been submitted by the following gentlemen:

No. 65, Mons. Hippolyte Bonnardel, of Paris; No. 24, Mr. Leonard C. Wyon, of London; No. 105 (1), Mr. G. G. Adams, of London; No. 104 (3), Mr. John Hancock, of London; No. 28, Mons. L. Wiener, of Brussels; No. 68, Mons. Gayrard, of Paris.

We have this week engraved three of the Prizes.

No. 65, *M. Bonnardel's Medal*, shows Mercury holding a female figure by the hand (intended to represent Industry apparently, from the anvil, locomotive, &c., near her), in front of a thick-set figure of Britannia standing on a slightly raised platform, with both hands extended, holding wreaths: flags of different nations make up the background. Motto: "Est etiam in magno quibdam respublica mundo."

No. 24, *Mr. Wyon's Medal*.—Britannia, seated, is placing with one hand a laurel wreath on the head of an emblematical figure of Industry; and leading her forth with the right hand. Behind, are representations of the four quarters of the world, who have brought Industry to Britannia. To the right are emblems of the four sections: 1. The cotton-plant and wheat-sheaf; 2. A wheel; 3. A bale of goods; 4. A vase. Motto: "Dissociata locis concordi pace ligavit."

No. 105, *Mr. G. G. Adams's Medal*, is a gracefully modelled group, in low relief, of Fame, Industry, and Commerce. Motto: "Artificis ingeniosi et cocita quod mermere manus."

THE BUILDING IN HYDE PARK.

THE following is a full copy of the statement made by the Attorney-General in justification of his refusal to sanction the information proposed to be filed in the courts of law against the proposed structure in Hyde Park:—

"I have in this matter a duty of a judicial nature to perform. The object of the information is to call in question the exercise of the discretion of the Woods and Forests in the management of a part of the property of the Crown. The information states that what the Commissioners of Woods and Forests are about to do is illegal and injurious to the public. The information states no facts which, in my opinion, establish either of these propositions. But even if there were a question as to the legality, the Attorney-General is bound to judge whether it is for the interest of the public to litigate the question. Cases may be conceived, and indeed not unfrequently arise, in which the letter of the law has been violated, and in which the Court has, nevertheless, required the Attorney-General to consider whether he would allow an information to proceed complaining of such violation, even where the Attorney-General had already in his discretion allowed the information to be filed, and where, if the information had proceeded, the Court could have done no other than enforce the strict right. The discretion of the Attorney-General is interposed to prevent this mischief; and his exercise of that discretion is purely an exercise of a judicial function, and as such I have exercised it to the best of my ability.

"In the present case the sense of what is for the interest of the public, with relation to what the Commissioners of Woods and Forests propose to do, has been unequivocally expressed by a vote of the House of Commons. It would, in my opinion, be an improper measure on the part of the Attorney-General if, in the exercise of his discretion, and acting on behalf of the public, he were to sanction a proceeding directly at variance with that vote. If any private right were affected by my decision it would be a different matter; but I have the satisfaction of knowing that no private right of any individual or individuals can be withdrawn from the consideration of any Court or in any manner affected by my refusal to sanction this information."

GRAND BANQUET TO LORD PALMERSTON,

BY THE REFORM CLUB.

THE recent triumphant majority in the House of Commons on Mr. Roebuck's motion, which affirmed the confidence of the nation in the foreign policy of the present Government, and in an especial manner in the conduct of Lord Palmerston, as the organ of that policy, was commemorated on Saturday evening last by a grand banquet, which was given at the Reform Club, to the noble Secretary of State for Foreign Affairs. The number of the participants in the honour of welcoming and congratulating the noble Lord was necessarily limited to but a small proportion of the whole body of the members of this extensive and popular club; the first 200 only of the members who had signed the invitation being privileged to obtain tickets for their own admission, that number being the extent which the grand dining-hall of the Club can accommodate. The Club was specially decorated and arranged for the occasion. The large candelabra in Pall-mall, facing the grand entrance, were lighted as on the occasion of a great public illumination. In the magnificent vestibule, the galleries, and the reception-rooms, exotic plants, articles of vertu, and other objects of taste, were abundantly distributed, and in the dining-room the exhibition of plate in candelabra, vases, tazzas, and other appropriate decorations of the banquet-table, was profuse. The band of the Coldstream Guards was in attendance in the vestibule, under the direction of Mr. Godfrey, and during the dinner performed the following pieces:—Overture, "Leonora" (Beethoven); "Valse et Galop de Fascination," "Aima" (Costa); Cavatina, "Beauté, divine enchantresse," "Les Huguenots" (Meyerbeer); Quadrille, "The Hibernian" (Gallien); Fantasia, "Le Prophète" (Meyerbeer); "Valse d'Amour" (Koenig); Introduction and aria, "Cujus Animam," "Stabat Mater" (Rossini), Polka, "Victoria Regia," "Lily" (Coote), Selection, "Figaro" (Mozart); "Starra," March Galop (Price). The cuisine was under the direction of Mr. Butler, the proprietor of the London Tavern. Mr. Harker attended as the toast-master, and Mr. Hobbs superintended the vocal music.

The chair was taken by Ralph Bernal Osborne, Esq., M.P. for Middlesex.

Amongst the noblemen and gentlemen present on the occasion, besides the noble guest of the evening, were Lord Sudeley, Lord James Stuart, M.P.; Lord Elcho, M.P.; the Right Hon. C. D'Eyncourt, M.P.; Sir Charles Napier, Lord Marcus Hill, M.P.; Mr. R. T. Blewitt, M.P.; Colonel Freestun, M.P.; Mr. James Matheson, M.P.; Mr. A. Shafto Adair, M.P.; Baron Rothschild, M.P.; Sir M. Cholmondeley, M.P.; Sir Henry Webb, Bart.; Sir George Strickland, Bart., M.P.; Mr. H. W. Tancred, M.P.; Mr Maurice O'Connell, M.P.; Mr M. Bass, M.P.; Mr. Ralph Etwall, M.P.; Mr. Joseph Locke, M.P., Mr. William Collins, M.P.; Sir W. Gibson Craig, Bart., M.P.; Sir De Lacy Evans, M.P.; the Attorney-General, M.P.; Hon. W. Cowper, M.P.; Lord Camoys, the Solicitor-General, M.P.; Mr. E. K. Tenison, M.P.; Sir R. Price, Bart., M.P.; Hon. C. Clements, M.P.; Herbert Ingram, Esq.; W. M. Thackeray, Mr. A. Hastie, M.P.; Mr. W. Brown, M.P.; Colonel Salwey, M.P.; Mr. T. C. Grainger, M.P.; Mr. Sergeant Murphy, &c., &c.

The cloth having been removed,

The Chairman begged to suggest, before proceeding to the business of the evening, that it would be more convenient if the honours usually accompanying toasts were omitted in all but two cases. (Hear, hear.) Without further preface, he said: I will come to the chartered toast of all English meetings—one that needs no encomium, because we are all convinced that the stability of the country rests upon the Queen. (Loud cheers.) It is unnecessary for me to expatiate on the virtues of the woman, we equally drink to the validity of the office. I give you without further preface, and with all the honours, "The Queen, God bless her!"

The toast was drunk with great enthusiasm, and the singing of the National Anthem was frequently interrupted by applause, especially at the lines—

Confound their politics,
Frustrate their knavish tricks.

The Chairman: In proposing the next toast, which is, "Prince Albert, the Prince of Wales, and the other members of the Royal Family," I shall content myself with saying, and I am sure I express the feelings of this meeting, that we hope the Prince of Wales will imitate the private virtues and the public worth of his sire. (Cheers.)

The Chairman: In calling your attention to the next toast I feel that its objects have some right to complain and find fault with the noble Lord on my right, as it is through his policy that the army and the navy have not found that support which they anticipated. (Great cheering and laughter.) But we shall not be deterred from drinking the triumphs of by-gone times, and I am delighted to see near me two honourable members of this Club who have shone alike in the senate and the field, and I have great pleasure in coupling with the toast of the "Army and Navy," the names of Admiral Sir Charles Napier and General Sir De Lacy Evans. (Cheers.)

Sir Charles Napier, in returning thanks for the navy, said the noble Lord (Palmerston) had been more closely connected with the navy than they had supposed; for he had commenced his career in the navy as a Lord of the Admiralty, and, had he continued in it, his career would have been as brilliant as it had been in a political point of view. (Hear, hear.) He had also been connected with the army, as Secretary-at-War. (Hear.) When his connexion with the navy ceased, he had still found occasion for its services; first, in carrying out his policy in Belgium, and afterwards in Portugal. Subsequently, he had called

GREAT EXHIBITION OF 1851.—PRIZE MEDAL (£100).—NO. 65.—M. HIPPOLYTE BONNARDEL.

GRAND BANQUET TO VISCOUNT PALMERSTON BY THE REFORM CLUB.

the navy and the army into operation in Spain, and had, by so doing, preserved the peace of Europe. (Cheers.) Afterwards, in Syria, with a handful of sailors and marines, he had settled a question which had posed all the statesmen of Europe; he succeeded in that, as he had done in every other enterprise he undertook. (Cheers.) He (Sir Charles) had had the honour of serving under the noble Lord many years; for the Secretary of Foreign Affairs was in effect First Lord of the Admiralty; and his policy was such, that any officer might be proud to be employed under him. (Cheers.) On a late occasion, when the British fleet entered the Dardanelles, they had done what was perfectly right, whether instructed by the noble Lord or not; and he was confident that the noble Lord would always give gallant and proper instructions. (Cheers.)

Sir D. L. Evans, M.P., acknowledged the toast on behalf of the army, who, he said, had done their share towards the supremacy of this country. In one part of the noble Lord's policy, as it regarded Spain, he had been personally concerned in bringing about a better state of things. Comparing Spain 20 years ago with what it is now, it would appear that no country of Europe had made greater progress in rational liberty and civil and religious freedom in so short a space of time; and this was in a great measure owing to the policy pursued by the noble Lord. (Cheers.) Lord J. Russell, in his work on the British Constitution, stated that Queen Elizabeth was, perhaps, the greatest Sovereign of her age, obtaining glory without injury to foreign nations, and that her name and that of England was a terror to foreign tyrants. Substituting Victoria for Elizabeth, he thought the eulogy would be just as applicable to the present reign and the foreign policy of the noble Lord. (Cheers.)

The Chairman then said—Should I fail to do justice to the toast I am now about to propose, I can assure you it is not from underrating the importance of the occasion, still less from feeling any want of sympathy with my theme, but rather that I have been more accustomed to pass structures on the collective acts of a Government than to pay compliments to an individual Minister. (Cheers.) But I should be wanting in that feeling of independence and candour which ought to characterise a representative of this great country (hear, hear), and the chairman of this great meeting (hear, hear), did I not on every part gladly seize the opportunity to express on your behalf our great satisfaction at being honoured with the presence of a Minister whose varied attainments and accomplishments, whose courtesy and mild bearing in private life, have won not merely the applause of a party, but the respect and admiration of the civilized world. And, gentleman, by your leave, I will take this opportunity to say that we may look upon this, not as a meeting important only in its political bearings, but for the moral views of the subject (hear, hear), because it will show to the world that the great Liberal party of this country, differing as they may in minor shades of opinion, are not prepared to see the Minister calumniated, or the man misrepresented. (Loud cheers.) Because he has been firm in his adherence to a Liberal course of policy (hear, hear), they will not carp at any minor or petty details; they will remember that—

> If severe in aught,
> The love he bore to freedom was in fault.

(Loud cheers.) I, for one, rejoice that this question of foreign policy was brought before the Commons' House of Parliament. (Hear, hear.) I do so because I think it will show to other nations that the reasoning people of this country will not consent to sacrifice the principles of reform and natural progress because other people may have confounded anarchy with progress, and mistaken revolution for reform (Cheers.) We are still prepared to walk in the paths of the Constitution, and to urge those reforms which may be consonant with the times. (Cheers.) But I also rejoice that the noble Lord has been exposed to personal attacks and recrimination, because it has given to the world and to future ages that great intellectual effort (hear, hear) those enunciations of great truths—that lucid array of facts, and, above all, that calm and Christian-like forbearance from recrimination (applause) which will be handed to future ages as a monument of eloquence, to be studied by the philosopher and taken as a model by the statesman. (Cheers.) Gentlemen, it is not for me to offer any laboured

No. 24.—MR. LEONARD C. WYON.

No. 105.—MR. G. G. ADAMS.

GREAT EXHIBITION OF 1851.—PRIZE MEDALS (£100 EACH).

panegyric upon the noble Lord. It has been reserved for one of the greatest and most favoured of modern writers to describe the greatest and most accomplished of modern statesmen:—

> Warmed by the instincts of a knightly heart,
> That roused at once if insult touched the realm,
> He spurned each State-craft, each deceiving art,
> And met Britons as valiant as his helm.
> This proved his worth: hereafter be our boast—
> Who ruled Britons as valiant as he the most.

(Loud cheers.) You will at once recognize the original. (Hear, hear.) It remains for me, my Lord Palmerston, to hand to you the names of the members of this club who subscribed to this document; and I beg to add that the signatures would have swelled to much ampler dimensions had not the time for recording them been prematurely closed. (Cheers.) You see around you many men distinguished alike in commerce, in science, and in politics. I say to those gentlemen who urge the peaceful and calm pursuits of commerce, that, in drinking this toast, they are doing honour to a man who has preserved inviolable the property of British subjects, and maintained the honour of the British flag in all quarters of the globe. (Loud cheers.) I say to those—and I see many such around me—who are content with the calmer paths of literature and science, that you are doing honour to the orator and the scholar. (Cheers.) Above all, I say to those—and the Legislature has given the peaceful path of constitutional responsible Government, you are doing honour to a man whose name in other climes is identified with those principles which we are assembled here to-night to hail, and which are the charter of this free country. I give you, then, with all the honours—that "nine times nine" which is only devoted to celebrated men "The health of our valued guest, Lord Palmerston."

The toast was most enthusiastically received, and drunk with "all the honours," as indicated by the chairman.

Viscount Palmerston, whose rising was the signal for a fresh burst of enthusiastic applause, after silence had been restored, spoke as follows:—"My Lords and gentlemen,—When I think of the honourable and flattering reception which I have received from you this day, and when I think of the terms—far exceeding anything which I can feel conscious of deserving—in which my honourable and gallant friend has been pleased to propose this toast to you, I am sensible of that truth which we have often heard—that it is far more easy to find arguments successfully to repel opponents than words adequate to express all one's thanks and gratitude to one's friends. (Cheers.) It is said, indeed, that from the fulness of the heart the mouth speaketh; but the heart may be too full to allow the tongue to give proper utterance to the feelings. (Cheers.) Gentlemen, you have met here to-day not merely to testify your kind and friendly feelings towards one individual, but you have met here to be assembled to record by this public demonstration great and leading principles of public policy. (Loud cheers.) I am entitled to infer, gentlemen, that the principles of policy which have guided the Government of which I have the honour to be a member in the administration of the foreign relations of this country have been such, generally speaking, and in their general tenor, as to be thought deserving of your approbation. (Loud cheers.) Those principles of policy may be described in a few simple words: the leading object of the policy of the Government with regard to its foreign relations has been the interests of England—(great cheering)—interests which begin in the well-being of this country, and which, in their progress, comprehend the well-being of every other country. (Loud cheers.) In regard to this country, it is needless to say that it ought to be the first object of those who are charged with its foreign relations to maintain unsullied the honour, the dignity, and its rights. (Enthusiastic cheering.) It is also our duty to protect our fellow-subjects, in whatever foreign land they may be. (Loud cheers.) Gentlemen, we are eminently a travelling, and inquiring, and a commercial nation. (Cheers.) There is no part of that great ocean that occupies so vast a portion of the globe on whose bosom our ships and our merchandize are not found to float. There is no land, however distant, or however inhospitable it may be, however barbarous, in which Englishmen are not found, either for the purpose of recreation or of health, in the pursuit of science or of commerce, or in the nobler and higher vocation of shedding in the regions of darkness the light of our Christian faith. (Continuing plaudits.) Gentlemen, the British subjects who partake of ours are entitled, wherever they may be, to think that they are under the guardianship of the watchful eye of this country; and that the arm of England will either protect them from wrong, or, if wrong should be done, will be powerful to obtain for them redress. (Tremendous and prolonged applause.) I have said, gentlemen, that the interests of England lie not only in our own particular objects, but in the well-being and happiness of other nations. (Cheers.) I have gone by, at least in this country, in which men thought and nations imagined that their prosperity could be promoted by the adversity of others. (Cheers.) We glory in our own wealth—we glory in our own happiness—we glory in our own liberty; but we are not desirous to monopolise those blessings, and, so far as our efforts can be properly exerted, I think it is the duty of the Government of this country to assist other nations in following at least our example, and in endeavouring to attain a position similar to that which we have attained. (Loud cheers.) Gentlemen, I do not mean to say, as to those who have endeavoured to thwart our policy have unboundedly asserted, that we ought to go, like knight-errants of civilisation, forcing institutions on other countries exciting them to discontent, and encouraging them to disturbance. (Hear.) Such is not a part of the duties of the Government of England. (Cheers.) But when we see nations labouring in the manacles which their Governments put upon them to improve their institutions—when we see nations sensible of the evils under which they are suffering, endeavouring rationally, temperately, and calmly to improve their condition—we cannot at least the sympathy of England (loud cheers)—and if other powers, differently impressed by opinions, should endeavour to interfere, in order to prevent the development of liberty—(cheers)—I conceive it to be the duty of the Government of England will always be supported and backed by the people of England in throwing our weight into the scale, and endeavouring thus to restore the balance. (Loud applause.) And, gentlemen, by pursuing this course we shall follow without endangering the continuance of our peaceful relations. (Cheers.) I do not imagine that we are less sensible than any man in the country of the value and importance of peace do not imagine that we think lightly of the calamities of war—of the interruption which war inflicts upon every improvement, social, political, and commercial. Do not imagine that we are insensible to the reasons which ought to deter the governors of any country from lightly involving, without absolute necessity, the people with whose destinies they are charged in the miseries and calamities of war. (Hear, hear, hear.) But, gentlemen, do not let the people of this country imagine that every angry word that may fall from other Governments will be immediately followed by a blow. (Loud cheers and laughter.) Do not let the people of this country believe that every angry demonstration—every exhibition of dissatisfaction, diplomatic or otherwise—(laughter)—that may come from Governments whose policy and views may be thwarted by the views and policy of England will necessarily lead to hostilities. ("Hear, hear," and applause.) Anxious as the people of this country are—and, to their honour be it spoken, I believe no other people are more anxious for the preservation of peace, or more desirous to avoid war with any country whatever—yet, believe me, that no other country is a bit more desirous, and for the best of all reasons, of peace than the Government of England is disposed to engage in war with it. (Loud and long-protracted cheering.) Gentlemen, this consciousness of strength, this feeling of national power, ought never to tempt the Government or the people of England to do any thing that is unjust or wrong. (Loud cheers.) But it ought, at least, to bear us up in pursuing the course of justice and honour, and must induce us not lightly to give way to apprehensions which may be founded on no real grounds. (Hear, hear.) Gentlemen, I feel that we may be proud, and reasonably proud, of the country in which we have had the good fortune to be born. (Hear, hear.) It seems to me that this British nation is destined by Providence to have an honourable part in the promotion and advancement of the civilisation of mankind. (Loud cheers.) It is from this hive that that swarm has proceeded—the busy, active swarm which has covered, by the works of its countless industry, the wilds and primæval forests of North America. (Cheers.) There is no land, however remote, in which Englishmen are not introducing the arts of civilisation and the blessings of Christianity. (Cheers.) And here, in this land, in which we are assembled, we may feel proud in thinking that we hold out to all civilised nations of the world an example of internal organisation, of systematic and progressive improvement, of practical proof and consciousness, of improving and repairing ancient institutions, you give them strength, and do not overthrow or destroy them. I say that this country is holding out to the civilised nations of the world an example worthy of the imitation of the most enlightened, and worthy also of the admiration of the wisest philosophers. (Cheers.) Gentlemen, I again must thank you—inadequately thank you, for the great and distinguished honour which has been conferred upon me this day. I feel conscious that though my words may fall far short of my feelings, and inflictely below that which is deserved by the kindness which I have received at your hands, the recollection of this day will be treasured up in my memory to the latest hour of my existence; and that in any act of my public life in which I may feel hesitation or doubt, the recollection, not only of the kindness you have exhibited today, but of the handsome and generous support which I have received at your hands in moments of great personal difficulty—(cheers)—will operate as a powerful encourage me and support me always in the performance of my public duty—(cheers)—and this you may depend on, gentlemen, that so long as this country has the good fortune to be represented by such men as those whom I see around me—so long as the people of this country are animated by those generous and patriotic feelings which have led you here to-day, there can be no danger to any Government of England will shrink from the performance of its duty, nor will there ever be peril for the fortunes of our country. (The noble Lord resumed his seat amid deafening and protracted cheering.)

Lord JAMES STUART said that the committee of which he had the honour to be a member had chosen him to propose a toast which he was convinced would be well received; nay, he hoped enthusiastically received, by all shades of reformers in that room. (Hear, hear.) He was quite aware that the members of the Reform Club composed people of every variety of Reform sentiments; at the same time, recollecting the benefits which had accrued to this country from the possession of office by Lord John Russell and his colleagues—(hear, hear)—he (Lord James Stuart) confessed he could have no want of confidence in offering this toast to the company. He had had the honour of being one of a deputation which waited on Lord John Russell to invite his Lordship to be present on that evening. It certainly was a disappointment that Lord John Russell could not attend, but the noble Lord said that the state of his health alone prevented him from accepting the invitation; and he added, also, that he highly approved of this demonstration. (Cheers.) Indeed, he (Lord J. Stuart) should have been disappointed had any other sentiment been expressed by the noble Lord, and his conviction was that the whole of the Cabinet entirely concurred with their noble colleague whom they had now the honour to meet. (Hear, hear.) He (Lord J. Stuart) should not enter into any comments on the policy pursued by the noble Lord (meaning Lord John Russell) either during his possession of power or in the course pursued while member of the House of Commons during the last thirty-eight years; he should only advert to certain facts in his political life which marked him as one of the most eminent statesmen which the country had given birth to, as a friend to civil and religious liberty. He (Lord James Stuart) would allude to the effective means by which, in 1837, his lordship repealed that which he (Lord James Stuart) conceived to have been the disgrace and shame of the [illegible] and Corporation Acts, which had been on the statute-books for upwards of 150 years, and which so unjustly excluded Dissenters, on account of their religion, from their rights as citizens of England. It would also be recollected how ably the noble Lord and those with him carried on, through an arduous opposition, the determination to repeal those acts affecting the Roman Catholics, though it was not fated that the noble Lord and his colleagues should be the parties to remove such acts from the statute-book. (Hear.) It was quite true that the Corn-laws had been repealed by that statesman whose departure they all so much regretted (Mr. Peel); but the noble Lord and his colleague (Lord John Russell was not unavailing, and he would also bring to the recollection of the company the great obligations they were under to the noble Lord at the head of the Government at the present time, by his efforts in the country to avoid those difficulties which beset in 1848 the neighbouring nations. (Hear.) The noble Lord concluded by proposing "Lord John Russell and her Majesty's Ministers," which was drunk with the usual honours.

The Attorney-General (Sir John Romilly), in replying, said that he could have been well pleased that it had fallen to some person other than himself to have returned thanks on the present occasion for the honour which had been conferred on him, in connexion with the toast just drunk, considering the manner in the manner they had; and he should have been better pleased had he been more competent, from standing higher in the scale of her Majesty's Ministers, to have stated more fully the principles which guided the noble Lord, as he believed, actuated all their opinions and sentiments. (Hear, hear.) But he considered it no slight honour to be called upon on the present occasion to return thanks for them, because from the many eminent men that were present he could not have his sentiments, he could recollect that they were connected with those sentiments of the freedom, and progress, and improvement of liberal institutions which actuated every member of the present Government, and which was brought forward by her Majesty's Government. He felt it also the more strongly, because he considered that no unusual degree of honour was conferred on the present occasion upon her Majesty's Ministers, when they had stated that they had acted in the manner they had done, and had

PARIS FASHIONS FOR AUGUST.

THE fashions have scarcely varied since our last. Of the slight changes we shall give an account. First, however, of the splendour of Soulouque's Court This magnificent Emperor has ordered of Mdlle. Dugnet, for the Empress, a series of splendid dresses, the list of which we give, for the curiosity of our fair readers:—

A Court-mantle, of sky-blue velvet, wreathed with a garland of gold flowers, having its ground sprinkled with flying bees, crowns, and golden ciphers.

Another Court-mantle, of red-crimson velvet, trimmed all round with a splendid gold Spanish-point. This mantle, as well as the blue velvet mantle, is lined with white satin.

A white satin gown, on the front of which is embroidered an apron; its skirt

PROMENADE DRESS.

is also beautifully embroidered in gold. This gown is made with a body leaving the neck and shoulders bare *(à pointe décolletée)*, turned off with a *berthe* of gold blonde.

A second white dress, of antique moire, embossed with large garlands of white flowers, is made with a long train; the skirt is also splendidly embroidered in gold; the body is likewise made to display the neck; the sleeves are made Grecian fashion, long and opened up, so as to hang loosely. This opening and the lower part of the sleeves are richly embroidered with gold.

Next is a satin dress, red-amaranth, trimmed with two deep flounces of gold-lace; above each flounce, in front, is a gold-lace work; the *berthe* of the body is of gold lace, the sleeves are short and lined with gold lace. We suppose this costume, from the value of its lace and *embroderie*, to be worth from 3000 francs to 4000 francs.

Next is a satin rose-dress, quite in the Parisian fashion, embossed with flowers and white and rose garlands; the skirt is opened in front, discovering an apron of plain satin, trimmed with three double flounces of white silk

OPERA DRESS.

blonde; each terminated at both ends with a satin bow of ribbon embossed and composed of several fallings, shells, and two ends. The body of this dress is upright, opened in front, in the form of a heart, with a facing of a flounce of blonde; the sleeves, half long, are opened and trimmed with two rows of blonde.

A dress of taffeta sky-blue Pompadour embossed, the body low, adorned with a blonde in white and gold; the sleeves have facings tucked up to the elbow, and trimmed with blonde of silk and gold.

A dress of antique moire of frosty gray, rose and green, embossed with white and cherry-red flowers; the skirt simple, the body low, in Pompadour style, lined with a flounce of ribbon forming in front a ladder of ribbon knots; short sleeves lined with two rows of blonde turned up with a ribbon knot.

A morning gown of beautiful black damask, the skirt simple, the body adorned with guimps of jet black; a girdle of jet black; its sleeves are opened half way up, with under sleeves open, and lined with two rows of black lace.

All these dresses are so long that they might do honour to the stature of a *tambour-major*: the Empress is very tall, and she likes to wear her gowns longer than her height, so that they have rather a fantastical appearance.

For the Empress' daughter, only eight years of age, Mdlle. Dugnet has made a dress of white satin, with a train garlanded with roses, embroidered with gold; the body is low, with a berthe of gold blonde.

A dress of silver and sky blue moire; the skirt is made with a train, and lined with silver and silk blonde; the body is low and trimmed with a berthe of silver and silk blonde.

For a niece of the Empress, aged sixteen years, Mdlle. Dugnet has made a dress of white satin with train; it is worked with gold wire; the body is low with berthe of gold blonde; the sleeves are short, trimmed with gold blonde.

CAP AND ENGAGEANTES.

PROMENADE DRESS.

bordered with a garland of flowers, and bouquets sprinkled on the ground, is much worn. The mantlet, like a close straw bonnet, with crape and white blonde, with, on both sides, a bunch of pansies. Boots are generally worn, but we have seen shoes lately much in use.

Opera Dress.—Sleeves with rows of lace (*pointe d'Alençon*), adorned with five rows of the same lace, lying flat, and adorned on each side with a bow of ribbons of the same colour as the dress; again, on the front part of the body are two triple knots of ribbons, gradually decreasing. The robe is of Italian taffeta; the pattern of the sleeve is *engageante*, to correspond with the low gown; an embroidered muslin, with two rows of lace.

Cheapness of male attire is the *furore* in Paris, as every wall attests. Among the few houses in which good taste and elegance have taken refuge is the house of Humann (a new house, 83, Petits Champs). Coat and vest in lady's cloth, with long body; the skirts short and round, with a single row of buttons, and without any on the back. Pantaloons in Canton cloth, silk stockings, and shoes; Scotch cravat, and waistcoat *en pépin* with small figures.

NEW SCHEME OF WEST INDIA MAIL-PACKET SERVICE.

The following notice has just been issued by the Post-office authorities:—

"A new scheme for the West India mail-packet service having been sanctioned by her Majesty's government, the mails from the United Kingdom for the West Indies, Mexico, &c., will be despatched, on and after the 2d August next, under the following arrangements:

"The mails will be made up in London, as at present, on the mornings of the 2d and 17th of each month, except when those days fall on Sunday, in which the case the mails will be despatched, in the former instance on the evening of the 1st, and in the latter instance on the morning of the 18th.

"Mails for Havannah, Honduras, Nassau, and Jacmel will be forwarded only by the packet leaving on the 17th, and mails for Vera Cruz and Tampico only by the packet of the 2d of each month.

"For all other places mentioned in the annexed table mails will be despatched both by the packet of the 2d and by that of the 17th of each month.

"Mails for the western coast of South America will be made up, for conveyance, as far as Panama, by each despatch of the West India packet; but from Panama the Pacific mail packets will only be despatched once a month as at present. These packets will continue to be fitted to the departure from London of the 17th of the month.

"No mails will be transmitted by the West India packets, after the termination of the present month, to Madeira, Bermuda, or to Mobile. The correspondence for Madeira will, unless otherwise addressed, be sent by the Brazil packet leaving Falmouth on the 6th of each month; that for Bermuda will be forwarded by the route of Halifax, by means of the North American contract packets; and the correspondence for Mobile will be transmitted in the ordinary mails to New York or to Boston.

"The West India packets will cease also, under the new scheme, to call at St. Jago de Cuba, La Guayra, and Puerto Cabello. All letters for Cuba will be despatched in the mails for Havannah, and the correspondence for Venezuela will be forwarded to St. Thomas, and conveyed thence to its destination by the vessels provided for that purpose by the government of Venezuela.

"The following is a list of the ports comprised in the new scheme of the Royal Mail Steam-packet Company, with the rate of packet postage chargeable on a letter not exceeding half an ounce in weight.

"(Note.—On letters to those places marked thus (*), the postage must be paid in advance, or the letters cannot be forwarded).

HISTORIC QUERY.

(To the Editor of the ILLUSTRATED LONDON NEWS.*)*

CAN you or any of your readers tell me who was the wife of Edward the Outlaw, son of King Edmund Ironside, and consequently the mother of Margaret, Queen of Scotland, ancestress of our Royal Family?

The best historians assert that the sons of Edmund were sent by King Canute, in 1016, to the King of Sweden, for the purpose of being put to death; but the messenger, moved with pity, took them to Solomon, King of Hungary, who in course of time gave his *daughter* in marriage to the eldest, who died without issue, and married the younger, Edward, to Agatha, daughter to the Emperor Henry II., and sister to his own Queen; and that Edward returned to England in 1057, having then three children living, and having lost two in Hungary.

This story is generally adopted by all writers, but examination of dates proves it impossible.

In the first place, Henry II. died in 1024, *without issue*, declaring, on his deathbed, that he and his wife had kept their vow of chastity, which was apparently believed at the time—as could not have been the case had his daughter been married to Edward.

Solomon, King of Hungary, married Sophia, a daughter of the Emperor *Henry III.*; but this marriage did not take place, nor did he ascend the throne of Hungary till 1063.

Henry III. (whom some call father-in-law of Edward the Outlaw) was born October 28, 1017; married to Chunehilde, 1036, who died July 18, 1038, leaving a daughter, Beatrix, an abbess. He married secondly, November 1, 1043, and therefore could hardly be grandfather to the five children of whom Edward was father in 1057, one of whom, Matilda, married, in 1068, Malcolm, King of Scotland.

Solomon was born between 1047 and 1054, and therefore could not be father to a daughter married to the brother of Edward, who died before 1057.

I have consulted most of the best English historians, and that excellent work the "Art de verifier les Dates," but in vain; if, therefore, you can throw any light on the subject, or direct my inquiries to some source capable of answering, you will much assist

A PERPLEXED HISTORIAN.

LOWESTOFT.—THE REGATTA.

PICTURESQUE as Lowestoft at all times is, it was rendered infinitely more so than usual on Monday, by the Regatta and its festive accessories, which drew the largest number of visitors ever witnessed by that most ubiquitous of annalists, "the oldest inhabitant," or ever recorded by any of its more venerable and veracious chroniclers, whether Roman, Dane, Angle, Saxon, Norman, Dutch, or British; for, at one time or other, Lowestoft has afforded stirring materials to historians of nearly every epoch in our annals. Of late, or, rather, until of late, its name has rarely been heard beyond the district in which it is situated: that is, it has had no English status, whether in business or pleasure, commerce or hygiene; but its situation on the extremest point of the eastern coast, its proximity as the nearest port to Holland, being only ninety miles from the Texel, directly opposite, has invested it with an almost universal geographical familiarity to the tempest-tossed mariner navigating the German Ocean; and it may boast of a still wider and more enduring attractiveness in the circumstance of its being close to Yarmouth Roads, the first haven of that most famous of all voyagers, Robinson Crusoe. Lowestoft, however, is fast acquiring an eminence among modern watering-places, fully commensurate with the position it so long held among more ancient localities similarly situated. Hitherto, it has been comparatively shut out from the tourist and the valetudinarian, to whom the peculiarities of the surrounding country, the genial climate, and many topographical advantages, economical and otherwise, would have recommended it. But within the last two or three years, an extension of the Eastern Counties Railway has thrown it open, and the population of the entire district, embracing an area of not less, probably, than 100 miles, have since kept flocking to see it in progressively increasing numbers, and with an eagerness which each succeeding visit augments. This feeling would seem to have reached its culminating point on Monday, when not less than some fifteen thousand persons, or about four times the numerical amount of the resident population, assembled ostensibly to see the Regatta, but fully one-half found amusement in various other charms which the coast and immediate inland presented.

The first remarkable feature calculated to strike an observant stranger, during Monday's proceedings, was the decorous and orderly conduct of the multitude—conduct most creditable to the several neighbourhoods contributing the holiday-makers, especially Norwich, whence the largest number came. Not the least disturbance occurred from first to last; and as there was no necessity for police, neither was there any needless obtrusion of their interference or officiousness. It may be questioned whether districts pretending to much more refinement than can reasonably be expected at the *Ultima Thule* of the Suffolk coast, would have been characterised by anything like the same traits, under similar circumstances, especially as the most buoyant enjoyment accompanied the most commendable avoidance of excess of every kind. In this panegyric the humbler orders of Lowestoft are particularly entitled to share, the more so as, being seafaring men, for the most part engaged in fishing, it might not unnaturally be inferred that an occasion of this sort would have furnished incentives to the boisterous coarseness and offensiveness too often, unfortunately, observable among their class. And this commendable self-control received its complimentary reward in a manner not a little flattering to their *amour propre* and local pride; for the successful yacht in the day's sport, the *Fanny*, was one of their own build, and though a new and untried boat, carried off the prize from the *Pearn*, a Harwich craft of considerable celebrity and much greater burden. The *Fanny* is a beautiful boat, constructed by Mr. Sparem, under the supervision of her owner, Mr. Clay, lately connected with the Eastern Counties Railway, in which, as well as in his private capacity, he has been no inconsiderable benefactor to Lowestoft.—consequently the success of the *Fanny*, which he sailed himself, was a matter of general congratulation to the town. Mr. Clay is now the manager of the Lynn and Norfolk Railway, and it is not unworthy of remark, though probably not altogether *apropos* to the present matter, that he is the only person in England who works passenger railway traffic with horse

THE LOWESTOFT REGATTA.—DRAWN BY DUNCAN.

power. Thus he accomplishes on the little line between Huntingdon and St. Ives—a distance, it is true, of only 4¾ miles, but which one horse performs, drawing a carriage constructed to contain sixty (first and second class) passengers, at a cost, it is needless to add, perfectly insignificant as compared with the wear and tear of a locomotive; yet is the accommodation quite adequate to the wants of the places, and if the same prudential adaptation of means to ends were more generally employed, wherever practicable, many of the complaints against the ruinous expensiveness of short branch lines would be obviated, and the satisfaction of shareholders proportionately augmented.

The local satisfaction at the success of Mr. Clay's boat was increased by the act that the second was another Lowestoft craft, the *Little Eastern*, belonging to Mr. Roney, secretary to the Eastern Counties Railroad. Considerable disappointment, however, was felt at the non-success, owing to some unexplained mishap, of the *Waveney*, built also at Lowestoft, by Captain Andrews, of whose nautical skill it is enough to say that he for several years commanded the *Medway*, West India mail steamer, but relinquished that lucrative and honourable post to take the office of Harbour Master of Lowestoft, where his experience and decision of character prove the greatest auxiliary in the advancement of the prosperity of the port, the tonnage of which is increasing in a ratio that would be utterly discredited by those who have not known Lowestoft since the genius of Stephenson and Bidder began to be employed on the sea-works and railways in 1846.

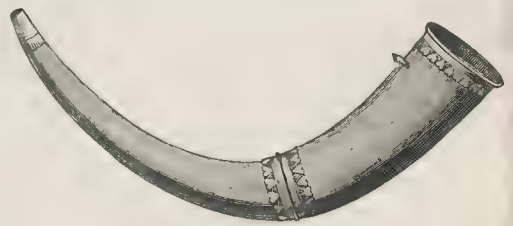
Altogether, the yacht-race was everything that could be desired; and there being a stiff breeze, the seamanship exhibited in the run of twelve miles—six in and back—was complimentary to all parties concerned. Still greater seamanship, however—or, at least of a more unique kind—was exhibited in the race with the yawls, whose construction is peculiar to this coast, being of most graceful and elegant form, and with a very foreign air about them—an aspect not a little strengthened by the number of Dutch, and French, and other continental fishing craft frequenting the port. Indeed, there is probably no watering-place in England whose sea in this respect is equally active, as the sailors call it; that is, within sight of which an equal number of foreign shipping is visible; and this is not the least of the many advantages which Lowestoft possesses over Brighton and the southern resorts of the like category: though probably Lowestoft's principal claim to superiority is its splendid shelving beach, the water varying only a few feet at all times of tide, and bathing, consequently, is equally practicable throughout the day. In respect to the pier promenade, so long a distinguishing feature of pre-eminent merit with the frequenters of Brighton, Lowestoft also greatly excels; inasmuch as it has two piers, of not less than 1300 feet each, running right into the sea, the head of each being circular, and 60 feet in diameter, with a lighthouse erected on either, the brilliant red lights in which, as well as in the light-ship, and the several light-houses about the harbour and its entrances, are at night a source of constant interest and curiosity to all strangers, and tend greatly to vary and heighten the effect of the scene.

In the yawl race the ancient supremacy of the Lowestoft fishermen, famous for so many centuries, was again manifested, the *Eclipse*, a local boat, extinguishing her competitors; and so again with the *Fit Fry*, in the six-oared beach pig contest, which finished the marine amusements of the day.

In the evening there was a grand dinner at the Royal, a new hotel, magnificently fitted up on the plan of the London Reform Club, and conducted by Mr. Howes, who, in addition to a lengthened experience at the Euston Hotel, has been a *maître* at one of the largest establishments in Paris, much resorted to by the leading English nobility, many of whom have subsequently sojourned here at the Royal Hotel. The dinner was to have been presided over by Mr. Peto, M.P. for Norwich, who, as contractor of all the great public works in the district, and as one of the largest proprietors in the town and neighbourhood, naturally commands a prominent position, which, however, is subsidiary to the influence arising from an exemplary private character, and unwearying and unostentatious munificence. Being unable to take the chair through indisposition, his place was filled by Mr. Roney, the Secretary to the Eastern Counties Railway; and the festivities were prolonged till the departure of the special train for Norwich, at eleven o'clock, by which a large number of the guests left, infinitely gratified with Lowestoft, which, now that it is participating in all the substantial advantages derivable from modern science and abundant capital, presents one of the most singular scenes anywhere to be met with, owing to the contrast thus afforded to the stand-still mediæval air of the elder portion of it, hanging, as it were, on the face of a bold headland, right in front of the German Ocean:—

> Enthroned upon an ancient hill it rests;
> Calmly it lifts its time-worn head, and first
> Of all Old England's bray towns, whispers
> Its orisons, and greets the rising morn.

Considering how greatly dependent the place was upon its own resources, shut out from the world of fashion and vicissitude almost as much as any town in England, and bearing in mind how much it must have suffered from the deterioration of its only two staples—fish and corn, it is surprising the evidences of solid Saxon stability and comfort of every kind that marked the old Danish-named stronghold, up to the last two or three years, when modern prosperity first flowed in upon it, and wealth brought activity, animation, and refinement, though as yet fortunately without any of the drawbacks and reproaches of luxury. The majority of the houses are of great extent and of considerable architectural beauty, of an antique mould, and were seemingly built for all time. There are few structures of a public kind, Lowestoft being, happily for the peace and cordiality of its people, neither a parliamentary borough nor a corporate town; so that political and party feuds in no degree embitter the charities of private life. These are advantages of which its inhabitants are fully sensible; and, if they were disposed to forget them, they are abundantly admonished by the example of a town eleven miles to their north, which is a prey to the dissensions Lowestoft is so luckily a stranger to. Such are some of the many pleasant traits that potently recommend it to the patronage and countenance it receives from the Gurneys, Buckstons, Frys, and other well-known constitutional quotists of the same class in Norwich, Cambridge, Essex, and elsewhere, as well as to a very numerous resident gentry in the vicinage, and many health-seeking families from a distance, who occupy lodgings to a much later period of the year than might be thought desirable in so apparently exposed a latitude. But it would seem that even in the winter months the atmosphere is exceedingly mild, as the foliage of the well-wooded neighbourhood sufficiently indicates. This circumstance had for many years induced Baron Alderson to reside, whenever he could, at Lowestoft, braving all the loss of time and dreary inconveniences of stage-coach travelling to reach it; and, of course, now that the railway has so vastly diminished these drawbacks, he has so much the more reason to continue an example which, in so distinguished an individual, is naturally productive of no inconsiderable imitation in his circle.



THE BORSTALL TENURE HORN.

NOOKS AND CORNERS OF OLD ENGLAND.

BORSTALL, AND ITS TENURE HORN.

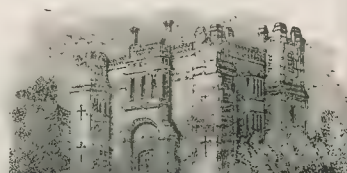
THE fine old place—"Borstall Tower," as it is popularly called—is situated on the western side of Buckinghamshire, within two miles of Brill, which formed part of the ancient demesne of the Anglo-Saxon Kings, who had a palace here, to which Edward the Confessor frequently retired to enjoy hunting in Bernwood Forest. Tradition relates the forest to have been about that time infested by a wild boar, which was, at last, slain by a huntsman named Nigel, to whom, in reward, the King granted some lands, to be held by cornage, or the service of a *horn*; a mode of livery which, in that age, appears to have been common. On the land thus given Nigel erected a large manor-house, and named it *Bore-stall*, or Boar-stall, in memory of the event through which he obtained possession. These circumstances are corroborated by various transcripts relating to the manor, which are contained in a manuscript folio volume, composed about the time of Henry VI.; it contains a rude delineation of the site of Borstall House and grounds, beneath which is the figure of a man on one knee, presenting a boar's head to the King, who is returning him a coat of arms.

The property remained in the possession of the Fitz-Nigels until 1336, when it passed by heirs female into the families of De la Pole, James, Rede, Denham, Banistre, Lewis, and Aubrey. The latter has been in possession upwards of a century and a half. Sir Thomas Aubrey, Bart., the present owner, resides at Chilton House, near Aylesbury. Bernwood was not disafforested until the reign of James I.

Early in the Civil Wars, Borstall House was garrisoned for King Charles; but in the spring of 1644 it was evacuated, and the fortifications were partly dismantled. The Parliamentary garrison at Aylesbury, however, soon took possession, and soon became a great nuisance to the King's garrison at Oxford; when Colonel Gage reduced it, after a slight resistance. On this occasion, according to the "Historical Discourses" of Sir Edward Walker, the Lady Denham, the then owner, being conscious of his disaffection, stole away in disguise. In the following year two unsuccessful attacks were made on the Royalists at Borstall House; but, on June 10, 1646, General Fairfax reduced it after an investiture of eight hours only, it being surrendered to him by the Governor, Sir Charles Compton, who was subsequently slain at Colchester.

Borstall Tower, the north front of which is shown in the Illustration, is a good specimen of the castellated architecture of the time of Edward II., when it was built by John, son of Richard de Handlo, who had married the daughter of John Fitz-Nigel. The edifice is in plan square, with embattled turrets at each angle; the entrance to the tower is over a bridge of two arches, which supplies the place of the ancient drawbridge, destroyed by order of Parliament, when the tower and house were dismantled, in the year 1644. The gateway is secured by massive doors, strengthened with studs and plates of iron. Each of the northern turrets contains three light and lofty apartments; the southern turrets have spiral staircases; but the principal apartment is on the second story, and occupies the whole space between the turrets. Here is a bay window, partly filled with stained glass, an escutcheon of the De Lazures and De Handlos. The roof is flat, and forms a beautiful terrace. One side of the moat has been filled up, but the other three sides still remain.

The "Tenure Horn," which we have here engraved, belongs to Sir Thomas Aubrey, Bart., to whom it has descended, together with the estates, through the female line, since the Saxon times. This interesting relic was exhibited to the Archæological Institute, at their late meeting at Oxford. There are several specimens of these tenure horns, the property of the Marquis of Northampton and other noblemen and gentlemen.



BORSTALL TOWER.

News from Cuba to the 4th inst. states that the fears entertained that a rupture would be provoked between America and Spain, in consequence of the detention of American prisoners, were allayed by the fact that the governor of Cuba had declared that all of them would be surrendered to the American authorities in due course of time.

THE ILLUSTRATED LONDON NEWS.

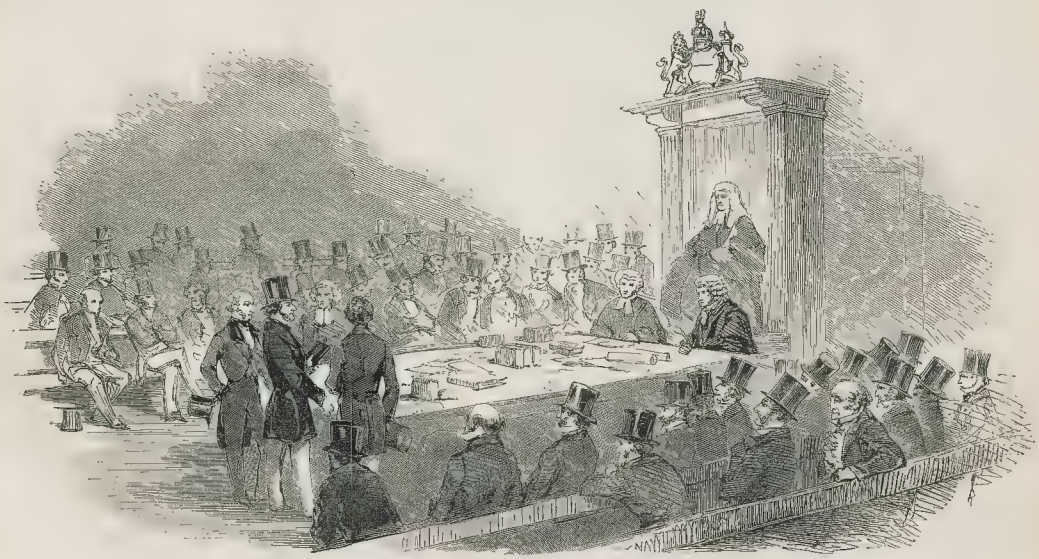
No. 439.—VOL. XVII.] FOR THE WEEK ENDING SATURDAY, AUGUST 3, 1850. [SIXPENCE.

THE JEWISH QUESTION.

THE question of the admissability of Jews to the British Legislature has been the great, if not the only topic of the past week. Upon this question the head of the Ministry stands in a peculiar position. The urgency and complication which it has assumed are principally due to the conduct of Lord John Russell, and the embarrassment which it causes has its main source in the procrastination, not to say the vacillation, of which he has been guilty. The House of Commons has twice affirmed its desire that the Baron Rothschild, twice elected by the city of London, should take his seat; and the House of Lords, acting in accordance with its constitutional right, has twice refused its assent to the measure introduced by the Ministry. Under these circumstances, it was clearly the duty of Lord John Russell to have forced the subject to an issue, and to have risked the existence of his administration upon it. At the last moment, and while the electors of London, his Lordship's constituents, as well as those of Baron Rothschild, were patiently awaiting his pleasure as to the further conduct of the bill, his Lordship coolly announced his determination to postpone it until next session. It was not to be expected that the electors of London, after the long delays that have occurred, and the many promises that have been made and broken, with regard to it, should have submitted to continue unrepresented for another twelvemonth; and they very properly recommended their member elect to offer himself at the bar of the House, and claim admission. Hence the long, technical, complicated, and embarrassing discussions that have taken place; and hence, also, the difficult position in which the Ministry has placed itself.

The general question has long ago been decided by the common sense of the country. A Jew can elect members to Parliament; a majority of one, and that one a Jew, can return a representative for any borough or county in the kingdom; Jews can serve, and are frequently compelled to serve, as jurymen in cases affecting the interests, the liberties, and the lives of their fellow-subjects; and Jews can not only serve, but are obliged if elected to serve, as sheriffs and magistrates, and as mayors of boroughs: yet, by the accidental wording of a form of oath not intended to exclude them, they are prevented from sitting in Parliament. The City of London has pronounced itself in the most emphatic manner against this absurdity; and the statesmanship of the Legislature, and the members of the Ministry more particularly, have, on every relevant occasion since the present Parliament was elected, confirmed the enlightened judgment of the first constituency of the Empire, and the general opinion of the country upon the subject. Unwilling to bring the two Chambers of the Legislature into collision, and unwilling, at the same time, to embarrass a Ministry which, with all its faults of omission and commission, is the necessity of the country at the present time, some of its friends and the friends of that great cause of civil and religious liberty with which it was once the greatest pride of Lord John Russell and his coadjutors to be identified, have suggested that, in reality, there is no statute which can exclude a Jew from Parliament, and that Baron Rothschild may be admitted without asking the assent of the House of Lords, or doing the slightest violence either to the spirit or the letter of the Constitution. The discussion, complicated as it appears, has, in reality, been narrowed to this point. It is impossible to deny its deep importance. If, without straining, forcing, special pleading, quibbling, or hair-splitting, it could have been decided that Parliament, in strict accordance with the intent and scope of the law, had no power or right to exclude Baron Rothschild, it would have been a fortunate ending of a dispute between the two Houses, and one at which all parties would have had reason to rejoice. We must say, however, that the slightest doubt, in such a case, would have been a matter of future regret and difficulty, and that Lord John Russell, at the eleventh hour, has taken the only wise and safe course—that of refusal to consent to any compromise of which the complete, utter, unquestioned and unquestionable legality and constitutionality, was not as clear as a mathematical problem. The only pity is that, considering his personal relations with the city of London, and his responsibility to the country at large, he did not use the means at his command to settle the question at an earlier period, and that he should only have acted with vigour, courage, and impartiality, when under the thumb-screw of coercion. Sooner or later, the question must be authoritatively and finally settled. All the world sees that; and though no credit may be due to the Administration for their conduct of this delicate, but most important matter, it must be admitted that Lord John Russell's ultimate refusal to be a party to any compromise, or shirking, or trick, to avoid a difficulty with the House of Lords, is the wisest and most dignified, and, at the same time, the safest and most constitutional policy which he could have pursued. Such questions admit of no compromise. They demand an absolute settlement. We therefore applaud the decisive stand which the Ministry, acting under the powerful coercion of events, have at length made upon the subject. The House of Lords has never shown itself a really obstructive body. It weighs and considers, objects and amends, but never, in our time, has it factiously or obstinately impeded or finally rejected any measure of importance on which the leaders of party were agreed, and on which the common-sense of the country had pronounced a decided opinion. We may be certain that upon the Jew Bill it will ultimately yield to the House of Commons and the wishes of the people. It would, we may be sure, have yielded long ago, if those who had the management of this question had not procrastinated and trifled with it, on account of the weakness of their position on other subjects, and their dislike to dislocate still further the crazy bones of the old and almost defunct parties of Whig and Tory.

As regards the unchristianisation of the Legislature, which some estimable, conscientious, and strictly religious men have affirmed to be the consequence of the admission of Jews to Parliament, it seems somewhat too late in the day to raise the question. Oaths cannot exclude Pantheists or Atheists, neither of whom believe in the divine origin of Christianity; and, surely, none will seriously affirm that a stray Jew in the House of Commons will unchristianise it to a greater extent than it may be, and has been unchristianised by infidels and sham Christians. Besides, if Jews may, and do, elect members, the unchristianisation is in reality effected by that process. Lord John Russell himself, and his two Christian colleagues in the representation of London, might have been in a minority at the last or previous election if not for the votes of the Jews; and if this be the case, the fears of the unchristianisation of the House of Commons are of no account. To be consistent in the exclusion of Jews from the Legislature, we ought, in fact, to deny them all the privileges which they now enjoy—the privilege of voting, the privilege of serving on juries, and the higher privilege of administering the law as magistrates. We should even go further than this. In extreme cases of civil warfare, the soldier is called upon to exercise the functions of administrator of the law; and if we will not permit a conscientious Jew to legislate for us, amid 658, we ought not to permit a Jew to bear a sword or a musket, or even a special constable's staff, in defence of the



BARON ROTHSCHILD AT THE TABLE OF THE HOUSE OF COMMONS.—TAKING THE OATH.—(SEE NEXT PAGE.)

liberties of a Christian country. But the case is beyond argument, and its decision is simply a question of time. Baron Rothschild has but to resign his seat, and to be again elected by the City of London, as he assuredly would be if such a proceeding were deemed advisable, to settle the question immediately. Should the settlement be postponed much longer, we shall have not one Jew, but half a dozen knocking at the doors of St. Stephen's, and clamouring for admission, with a whole people to back their pretensions. It is high time for Lord John Russell to stake the existence of his Ministry upon this question, if upon no other, and to stand or fall by the decision of the House of Lords. Had he done so three months ago, the question would have been at an end. It is late, but not too late, to put it to this issue.

We had written thus far, before the two resolutions, which are to be discussed on Monday next, were placed upon the table of the House. Lord John Russell, whatever may be their fate, and whatever may be thought of the policy of postponing the question for another twelvemonth, must, at all events, be considered to have pledged himself to stand or fall by the measure. After what has passed, the question is no longer an open one. It cannot be trifled with. The Russell Ministry, if it last so long as the middle of next session, must stake its existence upon the admission of Baron Rothschild to Parliament. So far, at least, the question has made some progress. The following are the resolutions :—

1. That the Baron Lionel Nathan de Rothschild is not entitled to vote in this House, or to sit in this House during any debate, until he shall take the Oath of Abjuration in the form appointed by law.

2. That this House will, at the earliest opportunity in the next Session of Parliament, take into its serious consideration the form of the Oath of Abjuration, with a view to relieve her Majesty's subjects professing the Jewish religion.

BARON ROTHSCHILD TAKING THE OATHS IN THE HOUSE OF COMMONS.

The Engraving on the front page represents the extraordinary scene in the House of Commons, which will be found described under our Parliamentary report of Tuesday.

It is one of the most curious of the episodes in the history of the struggle for the complete establishment of civil and religious liberty in this country; and, though neither the enthusiasm nor the theological hate which characterised the different phases of the contest in days gone by, were conspicuous, the occasion was, nevertheless, one of very remarkable interest

The present state of the case is, that Baron Rothschild's claim to sit in the House of Commons without taking the oath of abjuration, according to the form which retains the words "on the true faith of a Christian," remains undecided.

The debate on the resolutions submitted to the House by the Government is fixed for Monday next, when it is expected a final result will be arrived at in this vexed question.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

Their Lordships met at half-past four o'clock.

ROYAL ASSENT.

The Royal Assent, by Commission, was given to the following bills:—Court of Session (Scotland), Larceny Summary Jurisdiction, Upton-cum-Chalveley, Marriages Validity, Naval Prize Balance, Convict Prisons, Population (Ireland), Linen and Manufactures (Ireland), Incorporation of Boroughs Confirmation (No. 2), Loan Societies, Ecclesiastical Jurisdiction, Militia Ballots Suspension, Court of Chancery (County Palatine of Lancaster), Manchester Rectory Division, Court of Exchequer (Ireland), Militia Pay, Stock in Trade, Shipwrecked Fishermen and Mariners' Benevolent Society, Newcastle-upon-Tyne and Carlisle Railway, Wolverhampton Waterworks Act (Amendment and Extension of Works), British Electric Telegraph Company, Liverpool Corporation Waterworks, Dundalk and Enniskillen Railway, Borough of Salford Waterworks and Improvement, Bradford Improvement (Police and Purchase and closing of Bradford Canal), Newcastle-upon-Tyne Improvement (Amendment of Acts and New Acts), Commercial Gas Company and Poplar Gas Light Company, Aberdeen Railway, Cromford and Newhaven Turnpike Road, Rochdale (through Bamford and Birtle to Bury) and other Turnpike Roads, Kent and Sussex Roads, Lancashire and Yorkshire Railway, Godstone and Highgate Turnpike Road, Midland Great Western Railway of Ireland, Tumber Preserving Company, Earl of Shrewsbury and Grace's Trustees Estate, St. Thomas's Hospital Estate.

The Lords Commissioners were, the Lord Chancellor, the Earl of Minto, and the Earl of Carlisle.

MESSAGE FROM THE QUEEN.

The Marquis of LANSDOWNE read the following message from her Majesty:—"Her Majesty being desirous that the house in Marlborough House should be secured to his Royal Highness Albert Edward Prince of Wales, when he shall have attained the age of eighteen years, during the joint lives of her Majesty and his Royal Highness, recommends to the House of Lords to concur in enabling her Majesty to grant and settle the same in such manner and with such provisions as will effectually accomplish such purpose."

The message was ordered to be taken into consideration the following (Tuesday) evening.

The Bills of Exchange Bill was read a second time.

The Canterbury Settlement of Lands Bill, the Highway Rates Bill, the Turnpike Acts Continuance Bill, and the Borough Courts of Record Bill went through committee.

The Leasehold Tenure of Land (Ireland) Act Amendment Bill was read a third time and passed, with amendments. Adjourned.

HOUSE OF COMMONS—MONDAY.

In consequence of the adjourned debate respecting the admission of Baron Rothschild to Parliament being fixed for this day, an unusual degree of excitement prevailed in the neighbourhood of St. Stephen's. The Strangers' and Speaker's galleries were filled at an early hour, and the lobbies were greatly thronged by persons desirous of obtaining admission. A vast concourse of people was also stationed opposite the entrance, most of whom greeted Baron Rothschild with loud cheers as he passed.

The Speaker took the chair at five minutes past twelve o'clock, when a very large number of members were present.

THE ADMISSION OF JEWS—BARON ROTHSCHILD.

Previous to the resumption of the debate on the swearing of Baron L. N. de Rothschild as member for the city of London,

Mr. HENLEY suggested the propriety of calling in the Baron and asking him why he refused to be sworn on the New Testament.

Mr. WOOD did not object to that course, which was approved by Sir George Grey and Sir James Graham.

Sir F. THESIGER considered that a second question would be necessary, viz. —Was the Baron of the Jewish persuasion?

After a desultory discussion, the CHANCELLOR of the EXCHEQUER moved that Baron Rothschild, one of the members for the city of London, be called to the table, and that Mr. Speaker do ask him why he had demanded to be sworn on the Old Testament.

The motion was agreed to, and Baron Rothschild was called in and asked the above question; his answer was:—"Became that form of swearing I declare to be most binding on my conscience." He was then ordered to withdraw.

Sir F. THESIGER proposed that, as the Baron had not given any reply to the question put to him when he first presented himself to be sworn by the clerk, viz. "Whether he desired to take the Protestant or Roman Catholic oaths?" he be again called in and asked which oaths he was willing to take.

The CHANCELLOR of the EXCHEQUER objected. The first thing to decide was the form, and not the oaths to be taken.

After another discussion, this proposition was withdrawn.

Mr. S. WORTLEY then moved that Baron Rothschild be called in, and that Mr. Speaker be desired to ask him if he was willing to take the oaths required by act of Parliament to be taken by members.

Sir G. GREY thought this question immaterial to the preliminary question raised by Baron Rothschild, to wit, whether he should be allowed to be sworn on the Old Testament.

A division having been taken on Mr. J. S. Wortley's motion, there were 1 for putting the question, 104; against it, 118: majority against Mr. Wortley's motion, 14.

The SPEAKER then put from the chair the original question, which had been moved on the previous Friday by Mr. Gladstone for the University of Oxford (in lieu of H. Inglis), viz. "That from the earliest times of the existence of a legislature in England, no man was ever admitted to take any part therein, except under the sanction of a Christian oath: and that the Baron Lionel Nathan de Rothschild having requested to take the oaths on the Old Testament, and having, in consequence, been directed by Mr. Speaker to withdraw while the House deliberated, this House refuses to alter the form of taking the oaths."

The adjourned debate was then resumed by Mr. HUME, who, adopting Mr. B. Osborne's amendment, moved, "That Baron L. N. de Rothschild, one of the members for the city of London, having presented himself at the table of the House, and having, previously to taking the oaths, requested to be sworn on the Old Testament (being the form which he had declared to be most binding on his conscience), the clerk be directed to swear him on the Old Testament accordingly."

Sir F. THESIGER recommended Sir R. Inglis to withdraw his resolution, and to allow the discussion to be taken on Mr. Hume's amendment. The hon. and learned member then proceeded, by an examination of the statutes, to show that the particular oaths of allegiance, of supremacy, and of abjuration were all required by Act of Parliament to be administered in the Christian form, and that the Jewish form, which it was now proposed to adopt, was excluded by the terms of the different acts. The act prescribing the oath of abjuration, which contained the words "on the true faith of a Christian," and he had a right to assume that the House was not prepared to strike out these important words from the abjuration oath without an act of Parliament; therefore he conjured the House not to take a step that would be a violation of the acts of Parliament, and that would lead to collision with the courts of law and with the other branch of the Legislature.

Lord J. RUSSELL was anxious to follow the hon. and learned gentleman, because he had treated the question properly as a strictly judicial one. The hon. and learned member had laid it down that promissory oaths were always taken in a Christian form, and that the House was bound by the usage of Parliament and by positive statute to administer them; but he (Lord J. Russell) did not think that it had been proved that there was any positive statute by which the House was bound to administer the oaths on the New Testament; and, as there was no precedent against admitting a member on the Old Testament, and, as Lord Hardwicke and other learned Judges had decided that the Old Testament was the Jews' *Evangelium*, he did not think the House was precluded from allowing a member to be sworn on the Old Testament. But then came the question, What oaths would Baron Rothschild have to take? and, taking the acts 9th George I. and 13th George II., which gave exception, in certain cases, to the words "on the true faith of a Christian," he (Lord J. Russell) was decidedly of opinion that the House had the power to dispense with these words without a special act of Parliament. Were they to do so, they would be exercising a dispensing power such as that which, when exercised by the Crown, led to a revolution. In the present case, he thought that Baron Rothschild ought to be allowed to swear on the Old Testament, but then the House could not allow any portion of the oath to be left out without the sanction of an act of Parliament. With respect to the words "on the true faith of a Christian," although those words were never intended to exclude the Jews, nevertheless, he would vote against the omission of those words: but he was of opinion that every latitude should be given to the honourable member who presented himself to be sworn, as to the manner in which he should take the oaths. He thought that as Jews should be admitted into the Legislature, but he also thought that, if the existing laws were decidedly against such admission, they should adhere to the law until the Legislature should think fit to alter it.

Sir R. INGLIS was willing to withdraw his motion, or allow it to be negatived, provided he found the general sense of the House was expressed in favour of that course. He could not see what advantage would be gained by allowing Baron Rothschild to take one, or perhaps two, oaths, and then to be stopped at the third, which it was manifest he could not get over.

Sir G. GREY then, at a few minutes after three o'clock, moved the adjournment of the debate to the next day (Tuesday).

Mr. DISRAELI objected to allow the Irish Franchise Bill to be thus superseded.

Lord J. RUSSELL then agreed to an adjournment to Thursday.

Mr. B. OSBORNE threatened to stop the supplies unless the Government would consent to go on with the debate at five o'clock

Lord J. RUSSELL gave way, and the debate was adjourned to five o'clock.

At the evening sitting,

The debate was resumed by Mr. C. ANSTEY, who expressed his surprise at the course pursued by Lord John Russell, in the face of the fact that Quakers were admitted without taking any oaths at all. This was what they called upon the House to do now, and afterwards to invite the House of Lords to assimilate its practice to that of the House of Commons.

Mr. F. WOOD replied at great length to the arguments advanced by Sir F. Thesiger, and dwelt strongly on the fact that the only question then before them was as to the manner of taking the oaths, and he therefore regretted that Lord John Russell should have given such a strong opinion upon a question which had not as yet arisen

Mr. S. WORTLEY would vote against the motion of Mr. Hume, on the ground that, according to the practice of Parliament, the three oaths should be combined. His answer at the table afforded a fair inference that he was a Christian, and it was trifling with the time of the House to put the two first oaths, when they were already aware that on the third oath they must turn round and close the door upon him.

Sir R. Inglis's motion was negatived without a division; and the House then divided on Mr. Hume's amendment, which became the main question. For Mr. Hume's resolution, 113; against it, 239: majority against, 126. [See p. 104.

As, in the standing orders of the House, new members cannot be sworn after four o'clock, and as it was past seven when the division took place, no further proceedings in this business could take place, and the administering of the oath to Baron Rothschild by the clerk was postponed.

The Mercantile Marine Bill was read a third time and passed.

RESIDENCE FOR THE PRINCE OF WALES.

The House having resumed itself into a committee,

Lord J. RUSSELL moved the consideration of the Queen's message, relative to the settling of Marlborough House on the Prince of Wales, and proposed a resolution, the object of which was to settle Marlborough House on the Prince of Wales upon his attaining the age of eighteen.

Mr. HUME strongly objected to make such a grant nine years before it was required. Besides, it was national, and not Crown, property, and Parliament might find other means of disposing of it. There were at present a number of Royal palaces in existence. He should, therefore, move, as they had years before them to deal with the subject, that the Chairman should report progress

Lord J. RUSSELL said that the Marlborough House should be appropriated to the reception of the Vernon pictures from the National Gallery; and it was but right that it should be understood that such appropriation was but temporary.

Mr. TREVANNY, Mr HENLEY, Alderman SIDNEY, and other hon. members also objected to the settlement as premature.

The committee divided:—For reporting progress, 46; against it, 68: majority for the Government, 22.—The resolution was then agreed to.

On the motion to go into Committee of Supply, Colonel SIBTHORP moved an Address to the Queen, praying her Majesty to direct the Attorney-General to give his sanction to the filing of the proper informations for an injunction to restrain the erection of any building in Hyde Park for the Exhibition of 1851.

After some remarks from the Attorney-General, Col. SIBTHORP withdrew his motion.

To a question put by Mr. Newdegate, Mr. PAGE WOOD replied that it was Baron Rothschild's determination to present himself at the table next day (Tuesday), for the purpose of being sworn.

Lord J. RUSSELL said that, as he had previously stated that he would go on with the Lords' amendments to the Irish Franchise Bill, he would do all in his power to keep his promise; but he could not supersede any debate that might arise on Baron Rothschild's case, as it was a question of privilege.

The House went into committee of supply, and several votes were taken, after much discussion. The chairman obtained leave to sit again on Thursday.

The Duke of Cambridge's Bill was read a second time.

The House went into committee on the Customs Acts, and a resolution was proposed by the CHANCELLOR of the EXCHEQUER, and agreed to, to repeal the remaining export duties on coal, which produce £50,000.

The ATTORNEY-GENERAL withdrew the Fees (Court of Chancery) Bill.

The other orders of the day, forty in number, having been disposed of, by adjournment or by advancing a stage without opposition, the House adjourned at a quarter before two o'clock.

HOUSE OF LORDS.—TUESDAY.

A loyal address, in reply to her Majesty's message relative to the settlement of Marlborough House on the Prince of Wales, was agreed to.

The Highway Rates Bill and the Canterbury Settlement Bill were read a third time and passed.

The Bills of Exchange Bill and the Borough Courts of Record Bill went through committee.—Adjourned.

HOUSE OF COMMONS.—TUESDAY.

The Speaker took the chair at twelve o'clock, both the body of the House and the strangers' gallery being very crowded in expectance of the proceedings in Baron Rothschild's case. A throng of the curious was also collected in the street outside the House

NEW MEMBER

Sir Robert Peel took the oaths and his seat for the borough of Tamworth. The honourable baronet was introduced by Mr. Goulburn and Mr. Cardwell, near whom he subsequently took his place.

ADMISSION OF JEWS—BARON ROTHSCHILD'S CLAIM.

The SPEAKER having called upon any other member that was to be sworn to come to the table,

BARON ROTHSCHILD appeared at the bar, and amidst loud cheers advanced to the table, accompanied on either side by Mr. Page Wood and Mr. J. A. Smith. All three standing at the table, the clerk presented the Old Testament to Baron Rothschild.

Lord JOHN RUSSELL moved that the resolution agreed to by the House on the previous day be read to the Baron.

The SPEAKER then said: Baron Lionel Nathan de Rothschild, I have to inform you that the House has come to the following resolution:—"That Baron Lionel Nathan de Rothschild having presented himself at the table of the House, and having, previously to taking the oaths, requested to be sworn on the Old Testament (being the form which he has declared at the table to be most binding on his conscience), the clerk be directed to swear him on the Old Testament accordingly."

The clerk then administered to Baron Rothschild first the oath of allegiance. The Baron, who was uncovered, audibly repeated the words after the clerk, and at the close he put on his hat, according to the Jewish custom, while he pronounced the words "So help me God." Exactly the same proceeding took place in the administration of the oath of supremacy, which followed next. Then the clerk proceeded to administer the oath of abjuration. The Baron repeated all the words, without hesitation, as far as and including "all these things I do plainly and sincerely acknowledge and swear, according to these express words by me spoken, and according to the plain and common sense and understanding of the same words without any equivocation, mental evasion, or secret reservation whatever; and I do make this recognition, acknowledgement, abjuration, renunciation, and promise, heartily, willingly, and truly:" but instead of proceeding to say, in the form of the oath, "upon the true faith of a Christian," he said, "I omit these words, as not binding upon my conscience," and kissing the book with his head covered, he concluded, "So help me God."

Great cheering followed from the Baron's friends; and after he had signed a paper, which was either a copy of the oath as he had taken it, or the Parliamentary Roll,

The SPEAKER said: "Baron Lionel Nathan de Rothschild, you may withdraw."

A loud cry was hereupon raised of "No, no; take your seat;" intermingled with calls of "Withdraw;" during which the Baron retired to the seats without the bar.

Sir F. THESIGER immediately rose, but was interrupted by

Mr. HUME, who said: I rise to order, Mr. Speaker; and I rise to order upon this ground. As I understand from you, you have directed the honourable member for the city of London to retire. ("Hear," and cheers.) He has taken the oaths at the table (loud cries from the Opposition of "No, no"). He has taken the oaths at the table ("No, no, no.") He has, I repeat, taken the oaths at the table. (Renewed cries of "No.") If gentlemen will hear what I am saying, they will hear me assert that the honourable member has taken the oaths in that form and in those words which are most binding upon his conscience. (Cheers.) The vote which the House came to last night expressly states that he should do so, as he had previously declared he would use such words as were binding upon his conscience. (Hear.) Having done this, he has complied with the requisition of the House; and, therefore, I object to his being directed to retire. (Cheers.) I shall conclude by moving that the honourable member do take his seat. (Hear)

The SPEAKER: The honourable member rose to order, and he cannot propose that motion. (Hear, hear.) I directed the honourable member for the city of London to retire, because he did not take the words in the last oath which are prescribed by the act of Parliament. (Hear, hear.) I therefore desired the honourable member to withdraw, in order that the House might come to a decision upon the case. (Hear, hear.)

Sir F. THESIGER then rose and said: I beg leave to move that Baron Lionel Nathan de Rothschild, one of the members returned for the city of London, having refused to take the oaths prescribed by law before a member can sit and vote in this House, Mr. Speaker be instructed to issue his warrant to the Clerk of the Crown to make out a writ for a new election for the city of London, in the place of the said Baron Lionel Nathan de Rothschild. (Cheers, and cries of "Oh, oh!")

Sir R. INGLIS seconded the motion.

The SPEAKER having put the question,

Mr. ANSTEY said, I do not know whether this is the proper time for me to move the resolutions of which I have given notice. I will not, of course, stand in the way of the business of the House, but I wish to know whether it is competent for me, upon the motion of the honourable and learned member for Abingdon, to move the two resolutions of which I gave notice. (Loud cries of "Divide, divide.")

Mr. PAGE WOOD: Do I understand that the motion for a new writ is seconded?

Sir R. INGLIS: Yes, I had the honour of seconding it. (Hear, hear.)

Mr. PAGE WOOD: My hon. and learned friend the member for Abingdon has moved for a new writ, and he has not concluded to state to the House any reasons for the motion. (Hear, hear.) I shall take leave to move an amendment before I sit down—that the seat of the honourable member is full. (Cheers.) The honourable and learned gentleman then went on to show, from various acts of Parliament, that the omission or total refusal to take the oath of abjuration did not vacate the member's seat in Parliament. Negatively, therefore, no cause existed why a new writ should issue. But he proceeded to argue the case positively, that the oath had that day been taken by the member for London in such legal and sufficient form as to entitle him to take his seat. The omitted words referred not to what was sworn to, but what was sworn by; they did not declare the faith, but confirm the abjuration of the deponent. And the decision of the House last very member should be sworn according to the form most binding on his conscience governed this clause, and was sufficient to justify its omission. This conclusion the hon. member supported at much length, arguing that a contrary decision involved the anomaly of declaring the objects of the Popish recusant convict. He also corroborated his argument by the precedent set in the admission of Mr. Pease, of which the technical proceedings had only been ascertained during the present session, the Journals of the House for that year having been destroyed when the House of Commons was burnt in 1834. It was now, however, proved that the terms of the abjuration oath were altered throughout for the benefit of Mr. Pease, to a much greater extent than was now required by Baron Rothschild, and a wider liberty was awarded to the Quaker than was sought to be obtained by the Jew. After having admitted the principle, and conceded the point, that a member though not a Christian might take the oaths, a narrow technicality was now pleaded as a cause why their previous resolution should be of non-effect. The hon. member concluded by moving his amendment declaring that the seat for the City of London was full.

The ATTORNEY-GENERAL admitted the principle, and declared his own wish, that Baron Rothschild and his brother religionists should be admissable to sit in the legislature. But judiciously considering a case which must be argued altogether upon points of law, he had most reluctantly come to the conclusion that the oath of abjuration could not be said to be taken as the statute required that it should be taken, if those words were omitted to which Baron Rothschild had objected. They formed a vital part of the oath, and by leaving them out its whole tenor would be vitiated. The act in which the words were inserted was clearly an enacting statute, definite and precise in its terms, and not to be dispensed with upon inferential or collateral grounds. He reminded the House that in the case of Mr. Pease, on which so much stress was laid, great doubts prevailed as to the correctness of the course adopted, inasmuch that an act was subsequently introduced and passed declaring the resolution adopted by the Commons. It might be true that the abjuration oath was now less onerous, since it abjured Protestors, who were not now in existence; but so long as the act remained on the statute-book it must be observed. The House might justly demand its repeal, but could not, upon their single authority, abrogate, modify, or omit its observance. For the sake of the House itself, it was of the utmost importance that one branch of the Legislature should not usurp the powers exercised by all those in conjunction He apprehended great danger from the precedent they would set if they allowed the words to be omitted. The strict interpretation of the act being once violated, there was no clause or section of the oaths which might not, under the sanction of that precedent, be hereafter altered or rescinded.

Mr. C. ANSTEY denounced the unfair treatment which Baron Rothschild had received at the hands of the Government. His case was prejudged without being heard. Instead of listening to the arguments in his behalf, the Prime Minister had pronounced a premature opinion, and intended to summon a tyrant majority to support him in his negative. The Quakers and Roman Catholics were used very differently; but the Catholics numbered millions, while the Jews were but 40,000

Mr. HUME contended that even if the member for London should be adjudged incompetent to take his seat, no reason had been adduced to show that he had forfeited it. He might not sit or vote, except under penalties, but he was not thereby expelled.

The ATTORNEY-GENERAL referred to a statute which ruled that by refusing to take the oath of abjuration a member *de facto* vacated his seat; and assumed that the objection to repeat certain words in the oath was a *quasi* refusal of the oath in its entirety.

A hasty discussion was then carried on between Mr. P. WOOD, the ATTORNEY-GENERAL, and Mr. V. SMITH, as to the degree in which certain statutes should be considered still in force, or had been repealed by subsequent acts

Sir G. GREY distinguished between the amendment declaring the seat for London to be full, for which he could not vote, and the resolution ordering a new writ to issue. This latter point turned upon the collation of several statutes, upon which he did not wish to pass a hasty interpretation. His impression was that the seat was not vacant.

Sir F. THESIGER explained that he had moved for the writ, believing that the omission under the term used by Baron Rothschild of the particular words was tantamount to a refusal to pronounce them.

Mr. F. WOOD, interposing in the name of the Baron, said that the omission might be so accepted.

Sir G. GREY wished, only for the sake of precedent, that the fact of such a distinct refusal should be so presented as to obtain a record on the journals of the House

After some observations from Alderman Sidney, an irregular and stormy discussion, as on previous occasions, ensued relative to the propriety of adjourning the debate. Several motions to that effect were made, but successively withdrawn.

Mr. B. OSBORNE charged the First Minister with disgraceful conduct in respect to this question.

Lord J. RUSSELL declared that he considered it a judicial question, and that

he had no wish to influence any member of the Cabinet or any member of the Government in giving a vote on it.

The House divided—

For Mr P. Wood's amendment	.. ..	117
Against it	.. ..	221
Majority against the amendment ..	.. ..	104

Lord J. Russell then said, that as he doubted if the House was in a position to declare that Baron Rothschild had refused the oaths; and, as it was necessary to ascertain the effect of the different precedents brought forward in the legal arguments urged in the course of the debate, he thought the best course would be to adjourn the debate. He promised that the Attorney-General would by Thursday next ... are such resolution or resolutions as would conduce to the dignity of the House.

After a noisy discussion, Sir F. Thesiger's motion was negatived without a division, and the further proceedings on Baron Rothschild's case were postponed to twelve o'clock on Thursday.

The House then adjourned at half-past four to half-past six o'clock.

On resuming at the evening sitting—

THE FRANCHISE—IRELAND.

The order for taking into consideration the Lords' amendments to the Irish Parliamentary Voters Bill having been moved,

Lord J. Russell stated, accruing to the announcement which he had previously made, that he intended to ask that House to replace by £12 the £15 rating qualification, which the Peers had substituted for the £8 originally inserted in the bill. Their Lordships' omission of the 2nd clause (the joint company clause) he should not attempt to disturb; but he would propose the restoration of the 18th and two following clauses, also struck out in the Upper House, which made enjoyment of the franchise involuntary on the part of the elector. Referring to the just announced result of the Mayo election in proof of the rapid diminution of the county constituencies, the noble Lord calculated that a £15 qualification would place only 8 per cent. of the adult male population on the polling list, which the £12s he proposed would increase to no more than the moderate and requisite average of 10 per cent. He assigned, however, far more importance to the provision bestowing the franchise upon the voter without compelling him to prefer and establish his own claim.

Mr. M. Gaskell objected to any sweeping democratic reform, and thought that a moderate measure, such as that sent down from the Lords, was justified by the present condition of Ireland, and by considerations of public policy.

Mr. French, Lord Jocelyn, Mr. Moore, Colonel Dunne, Colonel Rawdon, Mr Clements, Mr. Anstey, Mr. S. Crawford, and Mr. Scully were willing to accept the compromise proposed by the Government.

Mr. Bright feared that the Government had neglected the Irish constituencies too long, and not grappled with the difficulty arising out of their destruction with sufficient firmness. The bill before them would be almost the sole, and a very shabby, result of six months' legislation. He could not reconcile the Ministerial defence of the £8 rating in the Commons with their easy surrender to the £15 amendment proposed in the Lords; and even now would not accept the compromise which would reduce the Irish electorate by a full third from the basis at first designed. If the bill was good as passed under Government patronage by the Commons, they should have stood manfully now by their own measure. He would accept the £12 rating as a temporary arrangement; but it must be superseded by a wide and more satisfactory settlement.

Lord John Russell, in replying, took occasion to defend himself from the charge of political pusillanimity. He vindicated the right of the Peers to revise and modify the decisions of the House of Commons. To deny that principle was to erect the lower House into a single chamber; and such a change in the constitution he was not prepared to advocate, believing that, after all its drawbacks of delay or occasional antagonism, the existing balance of power was that best calculated to secure good government and popular freedom. The noble Lord then reviewed the many measures of reform which he had himself been instrumental in passing; arguing that Catholic Emancipation, the Reform Bill, the repeal of the Test Act, the commutation of the tithes, and the measures relating to corporations and the Irish church, showed that the most extensive ameliorations were attainable by discussion and compromise, without the exercise of a despotic power by the popular representatives. He could not consent to distinguish between the aristocracy and the people of England, as if they were separate and hostile communities. Class melted into class, and the individual members of each were interchanged by time and circumstances, so as to produce an unity of interest among them all. Here lay, as he believed, a common mistake, on which were founded arguments which tended to shake and change the whole constitution of the country. As regarded the present bill, it was outlined some years since, but delayed in deference to the deplorable calamities which required social rather than political remedies. Their acceptance of the compromise now suggested in no degree bound them to consider the bill final, if, hereafter, a further extension of the franchise should appear requisite.

Mr. M'Cullagh reminded the House that the original principle of the bill was that of creating an equality between the constituency of Ireland and that of Great Britain, according to the ratio of the population. This principle had been asserted by repeated majorities, and yet the Government was now surrendering it. He denounced the insulting tone adopted towards the Irish people by the opponents of the bill in both Houses of Parliament; and professed himself obliged to dissent both from the bill sent down by the Peers and the mutilated proposition of the Government.

Mr. M. O'Connell, approving of the self-acting clause, consented to accept for its sake the compromise now offered upon the rating qualification.

Mr. Shiel remarked upon some incongruities exhibited in the amendments of the Peers, and defended especially the voluntary franchise clauses. He did not despair of the admission of the Lords, nor even of the assent of Lord Stanley, some of the incidents of whose past career had shown that he was not always unassailable by popular impulses

Mr. Disraeli contended that the question had been argued in an unconstitutional manner.

Mr. Reynolds warned both Mr. Disraeli and Lord J. Russell that the Irish members had heretofore decided who should be Minister, and might do so again. If Ireland were not treated liberally, he insinuated that they might be inclined immediately to exercise that power. The right hon. member proceeded to remark upon the arbitrary interference of the Peers with the liberties of the Irish people.

The House divided—For the £12 qualification, 213; Against it, 91: majority for the Government, 122.

The House then divided on the proposal to restore the compulsory register clauses:—For restoring the clauses, 179; against it, 109: majority for the Government, 70.

In reply to a question from Mr. Goulburn, Lord J. Russell stated that he would continue the discussion on Baron Rothschild's business at twelve o'clock o'clock on Monday next. The resolutions to be framed by the Attorney-General would be laid on the table on Thursday.

On the bringing up of the report of the resolution for settling Marlborough House on the Prince of Wales,

Mr. Hume opposed it, and a division took place—For receiving the report, 81; Against it, 39: Majority for the Government, 42.

NEW WRIT.

A new writ was ordered for Lambeth, in place of C. Pearson, Esq., who has accepted the Chiltern Hundreds.—The House adjourned at one o'clock.

HOUSE OF COMMONS.—Wednesday.

The House assembled at noon in the New Chamber, to try the acoustic effects of a temporary inner roof put up for the purpose. The lowering of the ceiling decidedly facilitates the transmission of sound, but at the sacrifice of whatever architectural symmetry the hall could boast of. The windows, the most ornate and elegant features of the chamber, are cut in two, and deprived of their fair proportions.

SUNDAY TRADING.

Mr. Alcock moved the committal of the Sunday Trading Prevention Bill.

Mr. Anstey opposed the motion, on the ground that it would be impossible to pass the measure in the present session. He had himself clauses to propose that would take a week to discuss. The hon. and learned member moved, as an amendment, that the bill be committed that day three months.

Mr. Trelawny seconded the amendment

Sir G. Grey deprecated any attempt to defeat the bill by delay. He recommended hon. members to permit the House to go into committee on the bill

After a long discussion, Mr. Crawford moved the adjournment of the debate.

On a division, there were—For the adjournment, 36; against it, 71: majority against the adjournment, 35.

Mr. Alcock, after a short conversation, withdrew the bill.

LANDLORD AND TENANT (IRELAND).

The adjourned debate on the second reading of the Landlord and Tenant (Ireland) Bill was resumed by Mr. R. M. Fox, who opposed the measure as a mutilated edition of the Government bill, retaining only those portions of it which were favourable to the landlord

Sir G. Grey thought at the present period of the session he would not be justified in supporting the second reading of the bill, which gave certain advantages to landlords without conferring corresponding advantages on the tenants.

After some observations from Sir H. W. Barron in support of the bill, and Mr. Reynolds against it,

Mr. Hamilton said, he would be willing, if the House would allow the bill to go into committee, to confine the measure to the clauses making it penal for tenants to cut their crops on Sunday with the fraudulent intention of depriving the landlord of his rent.

Considerable discussion ensued, and at length

Mr. M'Cullagh moved the adjournment of the debate, it being impossible to finish the discussion before six o'clock.

The debate was ultimately adjourned.

The Lords' amendments to the County Courts Extension Bill were considered and agreed to

Sir G. Grey moved the second reading of the Inspection of Coal-mines Bill.

Some discussion ensued, and several hon. members requested that the bill might be postponed. At length,

Mr. Wawn moved that the debate be adjourned, it wanting but five minutes to six o'clock.

The House divided, and Mr. Wawn's amendment was negatived by a majority of 54 to 15.—It being now six o'clock, the House adjourned.

HOUSE OF LORDS.—Thursday.

The Court of Chancery (Ireland) Bill, on the motion of Lord Brougham, was read a third time and passed.

IRISH FRANCHISE BILL.

The Marquis of Lansdowne moved for a conference with the Commons on the Irish Franchise Bill.

The motion was agreed to, and the Marquis of Salisbury, the Bishop of Oxford, Lord Beaumont, and other Peers were appointed to manage the conference.

On their return, the Marquis of Salisbury reported that the Commons had disagreed to certain of the Lords' amendments, and had assigned their reasons, which he delivered, and which were ordered to be printed

The Canterbury Settlement Lands Bill, on the motion of Earl Grey, was read a third time and passed

AFFAIRS OF THE RIVER PLATE.

The Marquis of Lansdowne laid on the table the convention entered into with the Argentine Confederation.

LANDLORD AND TENANT (IRELAND).

Lord Montagle moved the appointment of a commission to inquire into the state of the law of Landlord and Tenant in Ireland, showing the difference between the law of Ireland and of England in that respect.

The Lord Chancellor objected that the field of inquiry was so extensive that no advantage could result from it.

The Marquis of Lansdowne said it would give rise to expectations in Ireland which could not be realized. He should, therefore, oppose the motion.

After some observations from the Earl of Glengall, Lord Montagle withdrew his motion.—Adjourned.

HOUSE OF COMMONS.—Thursday.

The House had an early sitting at twelve o'clock.

AUSTRALIAN COLONIES GOVERNMENT BILL.

On the motion for taking the Lords' amendments to this bill into consideration, Mr. F Scott asked if it was the intention of the Government to accede to all the amendments made by the House of Lords; for, if so, the bill would be a very different one from what it was when it left that House. They would not succeed in cementing the affections of the colonists by passing a bill like this, which would curtail the franchise one half by the amendments introduced into it by the House of Lords. As the bill now stood, the convict population of New South Wales would be able to exercise a very dangerous power, which might have been much neutralised had they a double chamber; and it was to be regretted that the double chamber was lost by a majority of only one in the House of Lords.

After a few words from Sir De L. Evans and Mr. V. Smith,

Lord J. Russell said the Government proposed to agree to the amendments made by the Lords. As the federal clauses could not be immediately acted upon, and as it was feared by Earl Grey that in a federal assembly the smaller colonies might be swamped by the influence of the larger, he thought it more expedient to leave that part of the measure for future consideration. With regard to the admission of squatters, he saw no objection to it. If it should not be disagreeable to the colonists, and upon that point he had no information. With respect to two chambers, the Government had come to the conclusion, after mature consideration, that it was not necessary to insist upon them in the present bill. In other respects, the bill was substantially the same as when it left that House. He thought the bill would be of great benefit to the Australian colonies; and he did not think that the amendments which had been made in it would at all tend to diminish the satisfaction which it would give to the colonies.

Mr. Gladstone would not deny but that the bill would confer many advantages on the colonies, but it was so very imperfect as a constitution, that, if he had the alternative, he would prefer postponing all legislation on the subject until next session, rather than pass such a measure. He would, however, at present, content himself with entering his solemn protest against the bill.

Mr Roebuck also protested against the bill, which he strongly condemned.

The Lords' Amendments were then agreed to.

In the evening sitting,

BRITISH CLAIMS ON TUSCANY.

In reply to Mr. Hume, Lord Palmerston said that the amount of British claims against Tuscany was about £15500; and they arose out of the ransacking of the houses of British subjects in Leghorn by Austrian troops. Although those houses were marked on the outside as the residences of British subjects.

THE CHARTIST LAND SCHEME.

Mr. Fearous O'Connor asked the Hon. Secretary to the Treasury (Mr. Hayter) whether a man named Somerville, who had been dismissed from the army, and was known as a public writer, under the signature of "One who Whistled at the Plough," had not received money out of the public funds, for making enquiries respecting the National Land Company?

Mr. Hayter replied that Mr. Somerville was a very respectable man, and had never been dismissed from the army, that he was quite as respectable a man as the hon. member for Nottingham himself (Mr. F. O'Connor). He (Mr. Hayter) having had the misfortune to be chairman of the committee appointed to inquire into the National Land Company's Scheme, had employed Mr. Somerville for a few days to collect some information for him on the subject, and he had remunerated Mr. Somerville for his trouble out of his own pocket and not out of the public funds.

LAND-TAX.

Mr. Wodehouse put a question to the Chancellor of the Exchequer, whether it is the intention of her Majesty's Government to introduce any measure for the purpose of remedying the inequalities of the present land-tax as regards that portion of the tax which remains unredeemed, and which were particularly adverted to by the Chairman of the Board of Revenue, Mr. John Wood, in his evidence before a committee of the House of Lords in 1846; or for amending the present state of the law with regard to appeals from the Commissioners, by giving a right of appeal to one of the superior courts.

The Chancellor of the Exchequer replied that when the land-tax was first imposed, it was laid equally on all the property of the kingdom; but by lapse of time it had necessarily operated very unequally. It was not at present the intention of the Government to bring in any measure to remedy the inequality.

SUPPLY.

The House having gone into Committee of Supply, several votes of the miscellaneous estimates were agreed to; amongst them, £11,000 for expense of removing the marble arch, and forming an ornamental inclosure in front of Buckingham Palace; £161,000 for honours of refuge; £43,200 for salaries and charges for the officers of the Privy Council, £3640 for a portion of the expenses of the Ecclesiastical Commission, &c.—Adjourned.

Militia.—From a return just made to the House of Commons, it appears that the sum voted for the militia of the United Kingdom, was less in 1849 than in any year since 1843-4, and that the vote has regularly diminished every year since then, except in the years 1846-7, when it exceeded the votes for the two preceding years. The vote for 1849 was £122,800, being more than £30,000 less than for 1847, and more than £20,000 less than for 1848. The total expense of the militia in 1849, was £121,866 18s. 1d

FIRE AT PARKHURST PRISON, ISLE OF WIGHT, ON TUESDAY LAST.

DESTRUCTIVE FIRE AT PARKHURST JUVENILE REFORMATORY, ISLE OF WIGHT.

(From our own Correspondent)

Shortly after midnight on Tuesday last, the watchman on duty in the Lower Prison at Parkhurst discovered one of the dormitories to be on fire, and immediately sounded the alarm bell, which quickly roused the inmates from their slumbers. The sentinels on duty at the Albany Barracks, in the vicinity, responded to the alarm, the drums were beaten, and the soldiers, under command of their respective officers, left the barracks, and proceeded to the prison to render aid. The engine from the barracks was promptly on the spot, the soldiers forming lines along the premises for the purpose of passing from hand to hand buckets of water. Shortly afterwards, the engine from the House of Industry, under the superintendence of the Governor, Mr. Clark, with some of the able-bodied paupers, arrived. About one o'clock, two more engines from Newport also came; but, notwithstanding the most efficient assistance was given, it was found utterly impossible to save the range of buildings on fire, and every attention was accordingly paid to the neighbouring erections. The stores were prevented taking fire by an incessant supply of water being poured upon them

As soon as the alarm was sounded, the juveniles were rescued, and every precaution taken by the officers for their safe custody. So rapid were the flames, that great apprehension was entertained for the safety of those locked up in the further cells, and orders were given for one and all to break open their doors, and the young ones fortunately saved themselves: four or five having a most miraculous escape: most of the boys left their dormitories in a state of nudity: some, however, at the onset saved their clothing and blankets. As soon as the military arrived, a cordon was formed round the prison, and sentinels were placed in every direction. By order of the Deputy-Governor, Mr. Shirley, whose exertions were most humane and indefatigable, the boys were all marched to the parade-ground, where they sat silent spectators of the conflagration, guarded by a few soldiers.

The fire broke out in the range of new buildings called the *C Ward Dormitory*, a building upwards of 200 feet in length, by 25 feet broad, of three storeys, the walls of massive brickwork, but the whole of the interior fittings composed of timber. There were 200 inmates, in iron bedsteads.

The building is situate immediately behind the Governor's house, parallel with a similar dormitory shown in our Engraving, and contiguous to another range of buildings, comprising the stores, cookhouses, warders' apartments, and mess-rooms, all which range formed part of the old Barracks, and are built of lath, plaister, and rabbit-tiles; these, however, were covered with wet blankets, &c., and a plentiful supply of water kept poured on them, which saved them from being attacked this portion. The whole cluster of buildings would have been burnt. It was not until 4 A.M. of Wednesday that the fire was got under, when the roof fell in, leaving, of the building, the immense stack of chimnies in the centre, and a portion of the walls. So great was the heat, that the iron bedsteads (about 200) were all molten into masses. Fortunately, there was a plentiful supply of water from the tanks and pipes under ground. Temporary beds have since been made up in the shoemakers', tailors', and various workshops on the premises, and all the spare cells filled

Great praise is due to Major Alves, of the military *depôt* at Parkhurst; also to the Adjutant, who was very active throughout: the latter headed the soldiers, a detachment or gang of which shouldered one of the engines full of water, and carried it up a flight of steps to get round to the back of the building, which proved of the greatest service.

In the Illustrated London News, No. 254, we gave a series of drawings of the Parkhurst buildings.

There are two groups of buildings, known as the Upper and Lower Prison; the former being occupied by the juveniles under 15 years of age, and the latter in which the fire took place—by those between the ages of 15 and 19 years

We are happy to state that no lives have been lost, although some few had a narrow escape. The fire is supposed to have originated in one of the flues.

Summary Jurisdiction in Larceny Cases.—On Wednesday the new act for the further extension of summary jurisdiction in cases of larceny was printed. The object of this act, which declares that "the expense and delay sustained in the prosecution of personaguilty of petty thefts tends to the increase of such offences," is to extend the acts 9 and 11 Vict., cap. 82, and the 11 and 12 Vict., cap. 59, relating to the punishment of juvenile offenders, to all cases in which the age of the person charged does not exceed 16 years. Offenders above 14 years are not to be liable to whipping. There is a provision in the statute which was added in consequence of the allegation that it tended to diminish trial by jury. Henceforth, when a person is charged under this act, or the recited acts, the magistrate is to say, "We shall have to hear what you have to say in answer to the charge against you, but if you wish the charge to be tried by a jury, you must object to our deciding upon it at once." If the objection is made by the person or his parent, the magistrates are to proceed with the charge as if the said acts had not been passed. The act is now in force.

Doggett's Coat and Badge.—This very old-established aquatic contest, upon which the popular musical farce of the "Waterman" is founded, took place on Thursday, and, as usual, collected a vast assemblage of spectators. To the livery and badge, "bequeathed by Mr. Thomas Doggett, a famous comedian, in commemoration of the happy accession of the family of her present Majesty to the throne of Great Britain," have been added from time immemorial the interest, amounting to about £7, on South-Sea Stock, the gift of the late Sir W. Jolliffe, to be divided between the second and third men, in proportions of five-eighths and three-eighths; but, upon the present occasion, the Fishmongers' Company, who have the control of this wager, kindly awarded a guinea, in addition to the livery and badge for the winner, £1 11s. 6d. to the fourth man; and a guinea each to the fifth and sixth. The distance was, as usual, from the Swan at London-bridge to the Swan at Chelsea. The competitors came in in the following order:—Wm. Iam Campbell, Lambeth, 1; William Jame Cowrie, Blackfriars, 2; Benjamin Thomas Huntingford, Greenwich, 3; John Thomas Cannon, Wapping, 4; Thomas Mills Howard, Irongate, 5; Joseph Wyld, Lambeth, 6. There was about fifty yards distance in coming in between the second and third men, but the last two were completely tailed. The men were afterwards regaled with a substantial repast at the Old Swan, and the winners subsequently duly presented at head-quarters to receive the award of victory.

PEDESTRIAN FEAT OF 1000 MILES IN 1000 HOURS.

This unparalleled feat has just been accomplished by Richard Manks, a native of Warwickshire, or the "Eastern Warwickshire Star," as he is designated in the sporting world.

Manks commenced his performance at eleven minutes past five o'clock, on the afternoon of Monday, June 17, at the Barrack Tavern Cricket Ground, Sheffield, or a gratuity of £50, voluntarily undertaking the attempt to accomplish it by each and every mile being walked at the strike of every hour. Manks had only five or six days' notice to commence operations; he went into no particular training for the occasion, and his distance was measured from a given point on the ground. He walked 6 yards from his bed-side to a staircase having 13 deep steps, and then proceeded from the foot thereof to the starting post, another distance of 28 yards, having two other descending steps. On the completion of his mile, he again walked 22 yards, ascending 14 steps to reach his bed, altogether making inclusive of the measurement of the staircase, 62 yards, which, being multiplied by 1000, gives 62,000 yards, or 35 miles 400 yards over and above the stipulated distance of 1000 miles; independent of the additional

labour of lifting himself up the staircase to his apartment, an attic in the roof of the house, with a very confined ventilation.

Manks's style of walking is to bend forward the body, whereby he throws its weight on the knees. His step is short, and his feet are raised only a few inches from the ground, which quickens his pace, and enables him to walk with more

RICHARD MANKS, THE PEDESTRIAN.

ease, and better able to endure the fatigue of his long journey than by walking perfectly erect, which would throw too much of the weight of the body on the ankle joints. He walks in light shoes and lamb's wool stockings, which preserve his feet from injury. He packs the inside of his shoe-heels with a portion of horse-hair sock

His feet have undergone frequent scarification by a surgeon; and he suffered much from swelling. At one time his condition was as various as a railway time table, and his more sanguine friends were in despair that he would not sustain the completion of his undertaking. There was a favourable coldness of the extremities which physically accounted for his wakefulness. He was frequently rubbed with oils, spirit of camphor, &c., to prevent rigidity of the joints and limbs, and a simple tonic admixture was occasionally administered, to keep up the tone and action of the stomach. When aroused, he rose up at once, with great mechanical rapidity, buckled on his belt, seized his stick with a tight grip, and stared intensely. His skin is remarkable for its transparency, developing every artery, and exhibiting a fine muscular and anatomical picture. When he commenced his task, he weighed 11 stone 3lb.; and, on being put into scale, after five weeks' toil, the result showed a diminution of 26 lb. He craved much for good old ale, but got none; ate heartily of sago puddings, steaks, chops, lamb, fowl, rabbit, &c. He drank bottled porter, Sherry, and, when overtaken by morbid torpidity, he partook freely of an admixture of rum, milk, and egg. He was the most inclined to profound sleep from two to eight o'clock in the morning. He varied his shoes from leather to carpet as the necessity of his feet required, sometimes walking under acute punishment, and at other times under no apparent inconvenience, reliefs secured by surgical operations and applications. The pathway of his route being laid with safes, loose portions were frequently taken from his shoes

On the 9th of July, at two o'clock in the morning, he performed his route, not as a sleep-walker, but as a person all but asleep, and, to the surprise of his attendant, he found him lying on one of the railings of the green. Aroused, he walked on with renewed energy, and completed his mile in 15 minutes and 11 seconds.

On Monday, July 22, Manks was pursuing his journey in a miraculous manner, completing his progressive miles in the space of 10 minutes and 30 seconds. The marginal brow of the proximate hills at Upperthorpe, within a bowshot of the grounds, were continuously dotted with clusters of anxious human beings, looking down upon the movements of the thousands below.

On July 23 the weather was sultry, and Manks suffered severely from a powerful determination of blood to the brain. His eyelids drooped in the evening; but the intense anxiety of his mind about the shortness of his time kept him awake.

On July 25, 26, and 27 the rain fell in torrents, but Manks suffered nothing from it.

On July 28 (Sunday) the grounds were not opened until the evening, when the rush of spectators was tremendous. There were not less than 8000 persons present at one time; the evening was also extremely fine. The crowds on the distant hills were unprecedented. Manks, on this occasion, walked in his flannel jacket and drawers, though he had on preceding Sabbaths performed his task in his usual Sunday clothes. It was with the utmost difficulty that a clear pathway was kept for him: notwithstanding these interruptions, he surprisingly accomplished each of these miles in the incredible space of ten minutes, no ordinary work for an unexhausted man. The universal commiseration and expressed respect towards him was evidently cheering to him.

LAST DAY'S PERFORMANCE.—MONDAY, JULY 29.—At the earliest dawn hundreds were wending their way to witness the completion of this pedestrian feat. At five o'clock the doors were opened, and Manks walked that mile in 10 min. 0 sec.; 6 o'clock, 9 min. 20 sec.; 7 ditto, 8 min. 9 sec.; and THEREBY HE LAST MILE IN EIGHT MINUTES and FIFTY-FIVE SECONDS, after the hour had struck 8 A.M., beating Captain Barclay's last mile by 6 minutes and 5 seconds! and amidst loud cheers. Annexed is the time for Monday morning:—

To avoid a too sudden transition from long wakefulness to inordinate slumber, he was awakened at progressive lengthened intervals, and proceeded to walk a mile in the presence of a continued influx of spectators. He retired to his own home at eight in the evening, in a hackney-coach. The crowd of admirers opposite his house became so great that he presented himself at the window; and, by his desire, they peaceably retired.

It should be added that the length of daylight, the continuous influx of witnesses, and the proximity of dwellings to the grounds—as the barrack, the guard-house, and the sentry on duty, were the best public guarantee for the full performance of the feat, which, it must be remembered, differed materially from the celebrated task by Captain Barclay, as Richard Manks proceeded to his post on the striking of each consecutive hour.

BULL-FIGHT AT MADRID.—ACCIDENT TO MONTES, THE MATADOR.

To all accustomed to read the details of the Royal Bull-fights at Madrid, the prowess of Montes, the celebrated *matador*, must be familiar, as forming no unimportant feature of the barbaric spectacle. A Correspondent, who was a spectator of one of these shows, on the 21st ult., has favoured us with the following details, and Sketch of the catastrophe:—

Montes, long known to be the "first sword" in Spain, married, about two years ago, his second wife; she having made the stipulation that he should no longer follow his dangerous vocation. For one season he kept his word; but this year, not being able any longer to resist the excitement of the bull-ring, or (as some say) influenced by avaricious motives (he clears by his vocation some £2000 per annum), he returned to his former career. Up to the last day of the Madrid bull-fighting season, Montes escaped without any injury, although it was the general remark, by those who had known him in other times, that his agility was somewhat on the wane. Well it might be, indeed, for he numbers, at this time, some fifty-seven or fifty-eight years—of which fact his grey hairs give abundant evidence.

On Sunday, the 21st ult., took place the last *media corrco*, or afternoon fight of bulls at Madrid; at which Montes was assisted, as usual, by his nephew, the young *chuchanero*, almost as dexterous a swordsman as himself. The first bull which entered the ring (there were seven massacred that day) manifested symptoms of more intelligence than usually falls to the lot of the bovine race. Instead of attacking the horses of the lancemen, or goring the red flags which the *chulos*, as usual, waved in his face, this bull made directly at the bodies of the men *dio el cuerpo*, as the Spaniards remarked—and plied his human tormentors so dexterously, that they were at much pains to keep clear of his horns. In short, the Madrid belles pronounced this to be an infantry bull, as he only killed two horses—a fact which was considered so very disgraceful on his part, that *banderillas de fuego* were called for and granted. A word or two about these instruments of torture. Fancy, then, one of our old English cloth-yard shafts, ornamented with ribbons and coloured paper, and garnished with fireworks, which, by some contrivance of Spanish ingenuity, ignite immediately the dart is plunged into the bull's shoulders—this is a *banderilla de fuego*. Their description awakens no very agreeable sensations, but yet they are considered a refinement on the old practice of worrying the bull with dogs for the purpose of raising his spirits before the final attack of the *matador*. The bull of which I speak, having been garnished with some dozen of these demoniacal weapons, at length became as mad as the most *exigeante* section of Madrid could desire. Now came on Montes, his right hand bearing the sword, his left a red flag, his nephew, the *chuchanero*, by his side, and a band of *chulos*, or men whose duty it is, by flags and mantles, to distract the bull. Montes, looking his enemy full in the face, waved his flag, and walked, or rather waltzed up to his horns: as usual, he stood a little on one side and shook the flag in the bull's face; but despite the confusion of fireworks and the noise of the spectators, his bull still knew the difference between a flag and a man. He aimed directly at the body, made a spring, and in an instant Montes was under his feet. The *chulos* ran forward, shook their flags but in vain; the bull had already transfixed the calf of Montes, whose leg he was furiously shaking in the air; already he had withdrawn his horn to make another thrust, when the young *chuchanero* rushed forward, faced the bull, and without waiting for position, just touched the beast with the point of his sword on the nape of his neck; and it was no more. It was like the touch of a magician's wand; the sword scarcely entered three inches, yet the bull fell dead without a groan. Old Montes was rapidly carried away; the *chuchanero* gracefully bowed, and then left the ring to see the extent of his uncle's injury. After this five other bulls were murdered with the same refinement of cruelty; and finally, the Madrilenos clamoured for another, which was conceded to them, as a blood offering to their beloved Montes.

PARLIAMENTARY PORTRAITS.

VISCOUNT JOCELYN, M.P. FOR LYNN REGIS.

ROBERT VISCOUNT JOCELYN, eldest son of the present (third) Earl of Roden, by the second daughter of the 22nd Lord Le Despencer, was born at London on the 20th of February, 1816, and was educated at the school of the celebrated Dr Felenburgh, at Hofyl, near Berne, in Switzerland. In 1833 he entered the army in the Rifle Brigade, from which he subsequently exchanged to the 15th Hussars. In 1839 he went to India, and served in that and the following year with General Elphinstone, on the frontiers. In 1840 he was appointed Military Secretary to the Chinese Expedition, which sailed from Calcutta on the 8th of May, and he brought home the first despatches after the meeting of the British and Chinese Plenipotentiaries, at the month of the Peiho River.

In October, he sailed with the despatches from Canton; and, on the voyage to Bombay, wrote an account of the expedition, published by Murray in 1841, under the title of "Six Months with the Chinese Expedition," and which went through seven editions. It is a plain, soldier-like narrative of the causes and first events of the war, ending in the exaction of full payment for the seized opium and the opening of the five ports to our ships under one of the most liberal tariffs in the world. The glimpses of China and the Chinese given in the little volume are full of interest. There is no attempt to exaggerate; no effort after fine writing: the descriptions are simple, straightforward, often entertaining, from the strangeness of the people, and we question if any other book, however large or elaborate, be better calculated to give the general reader a true idea of the central flowery land, and its busy, ingenious, imitative, boastful people. The little work completely put an end to the delusion so industriously circulated at the beginning of the war, of the existence of a race-hatred between the native Chinese and their Tartar rulers

VISCOUNT JOCELYN, M. P. FOR LYNN REGIS.

ready, on any occasion, to lead to a junction with invading foreigners. Viscount Jocelyn stated that everywhere the people were prepared to stand by their governors and rulers; and that all mention of intent to punish only the ruling powers was received with dismay by the people, as an announcement of hostilities against themselves. The subsequent events of the war proved the accuracy of the statement. With such poor strength and feeble resources as they had, the Chinese fought together bravely against "the invading barbarians," and on no occasion gave even the slightest evidence of division amongst themselves or disloyalty to the Emperor. One passage of this little work, even in so brief a notice as of necessity belongs to a memoir, deserves to be quoted:—"Most of the disagreements (says Viscount Jocelyn) between our soldiery and the Chinese people, and also the want of supplies, arose from the difficulty of making bargains and agreeing upon prices, when there were no linguists to interpret between the parties." In view of this fact, his Lordship, therefore, strongly urges the necessity, for the success of all future negotiations, of education, either by the East India Company in their colleges, or by the English Government, through a professor at Macao, of trustworthy persons to act as interpreters.

In 1841, his Lordship married Frances, youngest daughter of the ninth Earl Cowper. In the same year her Ladyship was appointed, under the Ministry of the late Sir Robert Peel, one of the Ladies of the Bedchamber to her Majesty—an appointment which she still continues to hold.

At the general election in 1841, Lord Jocelyn was invited by requisition to become a candidate, with Mr. Beckett, for the representation of Leeds, against Joseph Hume and W. Aldam; after a severe contest his Lordship and Mr. Hume were defeated, the numbers polled being—Beckett, 2076; Aldam, 2043; Hume, 2033; Viscount Jocelyn, 1976.

In the following year, however, he was returned for Lynn Regis without a contest, and has since continued to represent that borough unopposed. His first speech in the House was in defence of the Affghan War, in 1842. He also took part in the debate upon the Opium Trade; arguing that though the trade might be prohibited, it was no more possible to put down the use of opium among the Chinese by law, than of gin amongst ourselves.

In 1844, he spoke in opposition to the Government on the subject of the war in Scinde, and in defence of the Ameers, and showed such knowledge of Indian affairs, that he was shortly appointed Secretary to the Board of Control, an office which he held until the dissolution of the Peel Ministry, in 1846.

His Lordship has taken an active part in several important committees: amongst them may be named the Gaming Committee, of which Lord Palmerston was chairman; the New Zealand Committee, in 1843; the Committee on the Truck System, in 1843; the China and Tea Trade Committee, and Committee on the Growth of Cotton in India, of last session; and, in the present session, the Committee on Sir Thomas Turton's defalcations, on which his report has been adopted.

His Lordship is a Conservative, but supported the Free-Trade measures of the late Sir Robert Peel. He has spoken frequently on Irish questions, and in the present session, in an able speech, called the attention of Government to the propriety of assisting the formation of Railway communication in India, as essential to the development of the resources of that country, and especially to the production of cotton. His Lordship especially urged the importance of the line from Madras to Arcot, forming about ninety miles of a main trunk line, and doubted whether the bits of lines which had been sanctioned in Bengal and Bombay would be of such practical use as to admit of fair deductions being drawn as to the value of railways in India.

Our Portrait is from a beautiful miniature by Sir W. Ross.

BULL-FIGHT AT MADRID.—ACCIDENT TO MONTES, THE MATADOR.

GOODWOOD RACES.—THE PRIZE PLATE.

The three "cups," or pieces of prize plate, which have just been run for at Goodwood, are of great excellence in their class of art. Two of them have been manufactured at the establishment of Messrs. Hunt and Roskell, Bond-street; and the third at the establishment of Mr. Hancock, at the corner of Bruton-street, Bond-street. They are—

1. A Vase, of classic character; the handles composed of sea-horses; the ornaments, closely following the antique examples, consisting of horses' hoofs, stable implements, &c. The bas-relief represents the race and Grand Stand at Goodwood. The cup is supported by centaurs. It was designed by Sir George Hayter, and was placed for "the Chesterfield Cup," and was run for yesterday (Friday)

2. A Vase of tazza form, supported by the fan-palm. The group around the base represents "Alexander the Great contending with the Lion." Reproving the effeminacy of his soldiers, in Persia he constantly took the exercise of war or of hunting, and exposed himself to danger and fatigue with less precaution than ever, so that a Lacedæmonian Ambassador, who attended him one day when he killed a fierce lion, said, "Alexander, you have disputed the prize of Royalty gloriously with the lion." Craterus got this hunting-piece represented in bronze, and consecrated it in the temple at Delphi. There were the lion, the dogs, the King fighting with the lion, and Craterus advancing to the King's assistance. Pliny informs us that Apelles alone was permitted to represent him on canvass, Praxiteles in marble, and Lysippus in bronze; this work was, therefore, most probably by Lysippus. It was designed and modelled by Alfred Brown, was placed for the "Stewards' Cup," and won by Count Hahn.

The third Cup, manufactured by Mr. Hancock, is after a design of the eminent French artist, M. Freret, who modelled a racing cup last season. The horse introduced is modelled by Mr. M'Carthy. It consists of a group, exquisitely wrought in silver, disposed upon a ground of bronze, and a large ebony pedestal. The incident represented is Robin Hood contending for the golden arrow at the great archery *fête* given by the Sheriff of Nottingham, with the view of attracting the great outlaw from his stronghold, as detailed in the legend; the trick failed, owing to the timely aid of Robin's "merry band." The sheriff is mounted on horseback, superintending the game. The other figures are Robin, in the act of discharging his successful arrow, and Little John, who is in a bending posture, watching the progress of the game, his quiver and arrows having been thrown down beside him. Two Scottish greyhounds form interesting companions to the archers. All the figures are highly modelled, and the horse is the largest ever formed in silver. The nominal value of the prize is £300, and it was placed as the "Goodwood Cup."

THE GOODWOOD CUP.

THE CHESTERFIELD CUP.

THE STEWARDS' CUP.

GOODWOOD RACES.

In the present week was celebrated the forty-eighth anniversary of the great Sussex meeting. How may the scene be spoken of in fitting phrase? Ye "stately homes of England," where, in all your proud profusion, shall we look for one more fair, more noble than peerless Goodwood? Stands there one more excellent "in all the pleasant land?" Behold it amid its "tall ancestral trees;" around wave cedars, such as graced Lebanon in the time of her forest glory: away in the distance ascend downs, fresh and fragrant as "Cytherea's breath:" in front spread lawns more verdant than "emerald meadows of Cashmere." Is not this a right-worshipful picture? The music of Theocritus never sung of spot more complete in sylvan loveliness.

. . . . . The drive from the entrance-gates to the summit of the downs, on which the race-course is situated, is

GOODWOOD RACES, 1850.—THE PRIZE PLATE.

prodigal of beauties, that, for variety and interest, are to be found within the precincts of no other domain in England. On either hand the foreground is a panorama, rich in rural embellishment, while in the far horizon is seen the lovely Wight, set in the sparkling ocean. That such a tryst as this should command good company, follows as a matter of course. But apart from the local advantages to which it ministers, the occupation of Chichester, and every town and hamlet within a radius of twenty miles, by pleasure seekers to whom "money is no object," Goodwood introduced and continues to exhibit a system of management, as regards racing, nearer perfection than any heretofore designed. Without paradising rules more suited to an assembly of Covenanters, than a company met together for the purposes of amusement, good precautions are adopted to prevent licence from straying into licentiousness. In all that has relation to the convenience and enjoyment of its visitors, there is nothing left uncared for. The Grand Stand, with its saloons, banquet-halls, terraces, and *parterres* "lying in a pleasant shade," is a fitting place wherein the noble and gentle may meet and mingle; while for the humbler holiday folk there is a splendid course for a promenade during the intervals between the races, upon which no horses man is permitted to intrude on any pretence whatever. This is a great

GOODWOOD RACES, 1850.

good—one of the most troublesome nuisances at provincial meetings being the mounted crowd of jockies, trainers, and others, "in brief authority" by whom they are infested. . . . . With this brief preface we proceed to the details of the occasion referred to in our first paragraph. But how shall words do justice to the fact? The *morale* of a race-course is not easily to be touched; however, we may skim the

Quips and cranks and wanton wiles
Nods and beeks and wreathed smiles,

that flaunt so gaily upon it. If the various causes that impel to its excitement could be read, then, indeed, would a stirring page be studied. If the human heart was analyzed, the three shillings and sixpence would be found the most powerful passion of the greatest number. Pervadventure, in lieu of the *euri sacra fames* leading men to the ring, we should discover

That danger's self were here alone.

The last week of July broke the spell of St. Swithin. Monday, the 29th, was without rain, and fair if not fine weather, distinguished the following days. Tuesday dawned cheerfully, and the report ran that the glass was rising. At Chichester, nevertheless, things looked far from promising. If the social aspect was not actually gloomy, it was certainly without the stir and excitement of former years. On reaching the course, the *habitué* could not fail to mark "what a falling off was *there*." He missed the master hand that once directed all, like the wand of a magician. The machinery did not work as it was wont the character of the *mise en scène* was slow. It is right, however, to say that it was orderly beyond all common experiences of such a tryst. The course, so to speak, kept itself. Police there was none—the only officials being rural swains with staves of office in their hands, more for ornament than use. At the tinkling of a bell, the company arranged itself, and the performance began with all the decorum and observance of a theatre royal. The curtain draws up for the Craven Stakes; but our notices must be confined to the principal features, to prevent with a little harmless gossip. It is needless to observe, perhaps, as a preliminary, that for the last two or three months the racing market has been in a very "unsettled" state—so much so, indeed, that there are those who do not hesitate to declare the Ring had not a leg to stand upon. That which the Derby began at Epsom, was continued at Liverpool, and it remains to be seen how it was finished at Goodwood. The terror of the fastest was a courser hight Windshcgrata, that had put into certain of the sporting handicaps so lightly weighted as to be "turned loose," as the professional phrase goes. He won the Liverpool Cup in a canter, as everybody knows, and the betting gentlemen spake with intensity of "Windy," as they call him, in allusion, probably, to the "*hiss*" he had dealt the fielders. This is a digression, but it is *apropos* to the apathy with which the liberal bill of fare for the first day was discussed. There were eight races, but not one of them could lay claim to the slightest sensation. The interest of the catalogue turned upon The Flying Dutchman's appearance—announced to be his last race. He had won 300 sovereigns a piece, each, 12 subscribers, whereof ten paid half forfeit. Consequently, it was run a match—the flyer's opponent being Vulcan. Lord Eglinton's phenomenon "waited" till close home, when he left his antagonist—who started only with the view of saving his stake as second—and won in a canter by half a score of lengths. But had the event been ordered differently, would Vulcan have saved his stake? I rather think he not have lost his £300. It would have been a worthy "wind-up" of a racing career without any precedent, had he been run to distance his adversary and achieved it

The gorgeous landscape through which they passed who mustered upon Goodwood Downs on Wednesday morning, was bathed in a mist that prevailed from dawn to dusk. Albeit the "Stakes" day—the rendezvous of all such as make the turf their calling—the attendance was much below the average of the last ten or a dozen anniversaries. But the sum of life is mutability. "We have our exits and our entrances"—some for good luck, and some for the reverse—who, as Mr. Douglas Jerrold says in the play, "might as well have staid where they were." The late Goodwood Steward seems to have be-spoke to the former. He departed this life but very recently, leaving behind him a store, according to rumour, that might be quoted emphatically in favour of agricultural pursuits. The sport was, as usual, very ample, the second event bringing out a field of twenty-six. This was the Stewards' Cup, a very beautiful trophy, valued by Mr. Hunt at £300 besides in the shape of sweepstakes. It was won by a German-bred horse, called Turnus—an animal whose form would have done credit to any stud in Great Britain. His party had also a nag for the Cup, which unfortunately did not stay. With the present facilities for raising and running stock of every description—high as well as middling—it is a question for the offer advantages to foreign horses for favourable run at our principal local race-meetings and institutions. There were two races in the list, of which but one fell within the Bee-hunter being permitted to walk over for the Drawingroom Stakes, and the City-Members' Plate breaking down in consequence of Marksman lying down, and only a brace being left in. The cynosure of all interest and account was "The Goodwood Stakes" handicap by a subscription of 25 sovs each, 15 forfeit, and 5 only if declared within a specified time, with 100 added for horses of all forms

have been expected—as the recent defalcations of many officers of these desirable institutions have but too deplorably shown. We are, therefore, glad to observe that the attention both of the Government and of independent members of Parliament has lately been more powerfully directed to both of these subjects, and that there is a growing disposition to legislate upon them in a manner consistent with the interests of the working classes—and, indeed, of all ranks and orders of the people.

The time of Parliament has now, and has long been, more fully occupied in undoing the erroneous legislation of the past than in originating new measures. The great want of the country is, in fact, the removal of obstructions. It desires no paternal care from the Government. It only wishes to be left free and unimpeded to pursue its own industry. While one large capitalist can do much under the existing system, twenty or a greater number of small capitalists, who may between them possess a larger accumulation of savings than the one, can do little or nothing. The law of partnership interposes difficulties. The secure and profitable investment of small savings is so impeded, and rendered so expensive, that a man with fifty or a hundred pounds scarcely knows what to do with it. Upon these subjects—the importance of which, in a state of society like ours, where our population runs so rapidly upon the heels of our resources, it is scarcely possible to over-estimate—a Select Committee has lately been sitting. Its report has just appeared, and forms a document in all respects most interesting and valuable. It lays bare the evils of the present state of the law of commercial association in a striking and powerful manner; and will, in all probability, be the means of enlightening the public opinion of the country to an extent sufficient to compel the interference of the Legislature to remove the many existing obstructions that prevent the free play of the national industry. The Legislature is not asked to do, but to undo; and we will not doubt its desire to act in this respect in accordance with the necessities of the time, and with the true interests of the wealth-producers of this country.

There are three objections to the safe and profitable investment of small capitals, to which the attention of the Select Committee was more particularly directed, and to which it devotes the principal portions of its report. These are the laws relating to the sale and transfer of real property, the revenue laws, and the laws of commercial partnership. The committee heard evidence upon each of these heads. The first and last of them seem, as far as we can judge, to be the most important. The committee states with justice that investments in land or in landed securities are much desired by the provident among the working and middle classes, but that the uncertainty and complexity of titles, the enormous length and expensiveness of conveyances, together with the costs of stamps, place this species of investment beyond the reach of those parties. The committee are of opinion that the greatest benefit would be conferred both upon the owners of real estate and upon small capitalists desirous of calling "some spot of land their own," if these evils were diminished, or entirely removed, by the simplification of titles and the shortening of conveyances. This subject is not new. It has long engaged the attention of the best lawyers and the wisest statesmen of our time, and is at present under the official consideration of commissioners appointed by her Majesty. The country may therefore hope that, in due time, and after full and earnest deliberation, the action of the Legislature will be announced to the aid of the buyers and sellers of land and houses, and that hereafter there will be no more difficulty in purchasing an acre of ground than in purchasing a garment.

With regard to the association of persons of small capital for trading purposes, with liabilities limited and clearly defined, the public opinion of the country is not yet so ripe as on the former question. The public, it is true, has recently been shocked by the dreadful disclosures made with regard to the slop-trade, by which a wealthy speculator entering into the labour market, grinds down the faces of the poor to his own profit, and degrades the unhappy work-people socially, physically, intellectually, and religiously, to a degree unknown in any other country calling itself civilized. For this state of things there is but one possible remedy—the association of the workers to provide the slop goods which the public *will* buy, and the distribution among these workers of the enormous profits made by the speculating capitalist. The law of partnership is the impediment. In some cases, even at present, the working man of various trades, degraded and depressed by the operation of the slop system, have united their small savings of money and combined their labour, to produce for public sale the articles of their manufacture. "These industrious men," say the committee, "work together under regulations of their own, with a small capital; they are directed by managers whom they choose, the goods produced are sold for their common benefit, and the profits are divided among the contributors of capital and labour, in certain proportions agreed to. At present the law affords no effectual remedy against the fraud of any one dishonest contributor or partner, and no summary mode of enforcing the rules agreed to for mutual government. The committee add their opinion that the difficulties which affect the law of partnership operate with increased severity in proportion to the smallness of the sums subscribed, and the number of persons included in the association. They think that any measures for the removal of these difficulties would be peculiarly acceptable to the middle and working classes, and would tend to satisfy them that they are not excluded from fair competition by laws throwing obstacles in the way of men with small capitals."

This French law of partnership, known under the name of partnership "*en commandite*," seems peculiarly available to the necessities of this trading and commercial age, and to the wants of the humble and industrious population of Great Britain; and to some such law the recommendations of the committee very clearly point. The law may be simply defined as one permitting partnership with a limited liability. A Royal Charter is at present requisite to legalize such an association in England; so that an association of working tailors, for instance, wishing to work together for mutual benefit, and to undersell the individual slop speculator, could not be brought into a position to compete with him with any safety or legality unless they procured a charter, at an expense which could not be less than £1000, and which might, under some circumstances, be £2000. The committee, without expressly recommending the French system of partnership "*en commandite*," are of opinion that Royal Charters for such associations should be procurable at a more reasonable cost; an opinion in which most persons who know anything of the subject will be disposed to agree. The whole matter is one of great interest and importance, not only to the working-classes, popularly so called, but to the middle, and, indeed, to the upper ranks of society. Whatever tends to make the poor provident, industrious, and self-supporting, is a national boon—not to be measured by its influence upon any one section of the people. The benefit permeates and pervades society, and extends from the lowest to the highest classes. We hope that the subject will receive the attention which it merits, and that the report of the Select Committee will in due time produce its proper fruit—a wise, earnest, and beneficial series of legislative enactments, simplifying the titles and cheapening the transfers of property realized; removing impediments from the path of that industry which desires nothing more than to employ itself in the creation of wealth; and relieving labouring men from the perilous position of semi or utter pauperism to which they are often reduced by the operation of erroneous and ill-considered laws, passed long ago, and utterly inaccordant with the wants, opinions, and true interests of the present age.

POSTSCRIPT.

HOUSE OF LORDS.—FRIDAY.

HYDE PARK

Lord BROUGHAM understood that it was intended to pave the road from Hyde-park-corner to Kensington with huge blocks of granite in the nature of paving-stones, and he wished to know if it was true or not, and if a similar operation was to take place in the Park itself, which would render it more safe for waggons to go upon, but not for persons to ride upon. This was one of the consequences of the new law that the Attorney-General was the sole judge of all cases between the subjects and the Crown, and exercising a more than judicial power, a power which no attorney had any right to assume, and the Attorney-General was, according to Sir Robert Filmer, only the attorney to the King, and he exercised it by giving judgment in his chamber in favour of his client. There was no petty prince in Germany, Turkey, or Russia, who was more absolute than the Sovereign of this realm, if the opinion of the Attorney-General was to be taken in opposition to the opinions of those lawyers who had been engaged in hundreds more cases than the Attorney or Solicitor General.

The LORD CHANCELLOR thought the noble friend could not have consulted the early channels of information, because the Attorney-General had given an answer which he considered perfectly legal and satisfactory, as he should be prepared to show when the subject should be brought before their Lordships in a regular manner. As to the quotation of his noble friend, it merely went to show that the Attorney-General represented the public as an attorney represented his client. He represented the public, but did the complainants represent the public and complain of public wrong? They did not. Were they private persons, they could proceed by bill ement if they had suffered indirect wrong; if they came as representatives of the public, the Attorney-General was the proper judge. This park was the property of the Crown, and he took it that the Attorney-General had exercised a sound discretion and was responsible for what he had done.

The Marquis of LANSDOWNE rose to answer the question about paving. He contended that his noble and learned friend had departed from the orders of the House in entering into a discussion as to the functions of the Attorney-General on the presentation of a petition. In answer to the question, he had to state that the persons who had to erect the building had undertaken to pave the way from the gate to the building.

Lord BROUGHAM: Not the road?

The Marquis of LANSDOWNE: Not the road.

Lord BROUGHAM was very glad to hear it, and placed the most implicit trust in the statement of his noble friend.

LIVERPOOL PETITION FORGERIES.

Lord BEAUMONT brought up the report of the Committee on the Liverpool petition forgeries. The report stated that they were of opinion that due precaution had not been taken, but that there was no evidence to prove that the parties engaged in getting up the petition had abetted the commission of these forgeries, although there was great carelessness exhibited on the part of the promoters of the petition, and that they were guilty of gross neglect.

The report and evidence was ordered to be printed.

Lord MONTEAGLE gave notice that he should on Thursday draw the attention of the House to this subject.

THE CIVIL LIST

Lord BROUGHAM then moved for an account of the savings of the Civil List Revenues since the beginning of the year 1835. His object was not to open up any indecorous inquiry into the personal expenses of the Sovereign; but he perceived by the Returns on the table of the House that the savings of the savings up to the present time amounted to upwards of £38,000, and he wished to know in what department, and in what years, these savings had been effected.

The Marquis of LANSDOWNE thought it extremely dangerous to open up a question of this description; and he would not, therefore, give to the noble Lord the smallest particle of information. It was settled, by a compact with the Crown, that the Civil List should not be interfered with, and he should therefore oppose the motion.

The Duke of WELLINGTON said, that, on settling the Civil List, Parliament had stipulated that it would not inquire into the expenses of the Civil List; and the right of the Crown to appropriate to one department the savings effected in another was unquestionable.

After some observations from Lord MONTEAGLE and Lord BROUGHAM in reply, the motion was negatived without a division.—Adjourned

HOUSE OF COMMONS.—FRIDAY.

The House met at noon.

BARON ROTHSCHILD.

Mr. HUME gave notice, that he would move, as an amendment to the resolutions proposed with respect to the admission of Baron Rothschild, that Baron Lionel de Rothschild, M.P. for the City of London, having taken, as directed, and in the manner most binding on his conscience, the oaths of Allegiance, Supremacy, and Abjuration, with the exception only of the words at the end of the oath of Abjuration, "on the true faith of a Christian," he cannot be liable in any other penalties than those set forth in the statutes relating thereto, to be imposed only by a court of law. That at the commencement of the next session of Parliament this House will take into its serious consideration the oaths administered to members of Parliament at the table of the House, and more particularly the oath of abjuration, with a view to meet the case now before the House, and to make all the oaths more consistent with the changes which have taken place since the passing of the Acts enacting the oaths.

CRIME AND OUTRAGE ACT (IRELAND) CONTINUANCE BILL.

On the motion for the second reading of this bill,

Mr. M. J. O'CONNELL said, that as the bill involved forfeitures and penalties, it should have originated in the Commons and not in the Lords, and as the present bill was first introduced into the Upper House, it ought to be rejected.

The SPEAKER was of opinion that the bill should be rejected and another bill brought in.

Lord J. RUSSELL said, he was willing to bow to the decision of the Chair, and, on the bill being rejected, he would ask leave for bringing in a similar bill.

The bill was then withdrawn, and leave asked to bring in a new bill.

Mr. HUME hoped no such bill would be introduced, as there was no necessity for it in the present state of quiet which existed in Ireland.

Sir W. SOMERVILLE was happy to say that the state of Ireland was at the present time greatly improved from that in which it was when the act was first introduced; but he thought that it was still advisable to pass the measure before the House, and that was the opinion of the Lord-Lieutenant of Ireland.

Col. DUNNE would not oppose the introduction of the bill, but he hoped it would be in operation for as limited a period as possible.

Mr. SHARMAN CRAWFORD was opposed to the introduction of the bill; for, although he was satisfied that the powers which it conferred on the Lord-Lieutenant would be wisely exercised by Lord Clarendon, still, as the bill was unnecessary in the present state of Ireland, he thought no such measure should pass the House

After a lengthened discussion, the debate was adjourned.

In the evening sitting,

SMITHFIELD MARKET

In reply to Mr. Heathcote, Sir G. GREY read a letter from the Corporation of London, refusing to remove Smithfield Market to another site. The right hon. gentleman said that letter was in reply to a communication enclosing the report of the commissioners, recommending the removal of the market. The Government approved of that recommendation, but were not prepared to bring in a bill on the subject before next session.

In reply to Mr. Stanford, Sir G. GREY stated it was not the intention of the Government to introduce a bill this session to restrict the sale of poisons.

In reply to Mr. Mullinge, the CHANCELLOR of the EXCHEQUER said it was his intention and hope to pass the Stamp Bill in its present shape.

The House then went into Committee of Supply, and the rest of the evening was passed in the discussion of a vote of £30,000, proposed by the CHANCELLOR of the EXCHEQUER, to make good one half of the defalcations in the Cuffe-street Savings-Bank, in Dublin. On a division, the vote was agreed to, by a majority of 118 to 30—Adjourned.

COLLISION ON THE EDINBURGH AND GLASGOW RAILWAY.—LOSS OF LIFE.

On Thursday morning a fearful collision took place on the above line of railway, shortly before eleven o'clock, near the Cowlairs station.

A pleasure train left Perth early in the morning. From its length, it was deemed advisable to divide it into several parts. The first portion of it arrived at the Cowlairs station almost immediately after the Edinburgh train, which was then stationed there, and getting ready for entering the tunnel. The Edinburgh train contained forty-one carriages, and there were twenty-seven in the Perth one.

Following close after was the Scottish Central ordinary train.

Such was the number of passengers carried by the intermediate train, that several cattle trucks had been attached to it; but, as a good many found accommodation. They brought up the rear. They had not been at Cowlairs—where, as is well known, a stoppage invariably takes place—more than five minutes when the succeeding train came up, and a fearful collision ensued.

Neither the guard nor fireman had taken the precaution to send back signals that they were in the way. On the other hand, the parties in charge of the approaching train, though there does exist a curve in the line a little beyond Cowlairs, which would necessarily prevent them from observing that the passage was not clear till they were almost close on the obstruction, must have been aware that they were but a little distance behind, as the two trains had left Greenhill Junction nearly together, and they had kept sight of the preceding one the whole way onwards.

The collision was a most violent one. Scarcely any of the number of passengers have escaped unhurt, though, fortunately, the bruises of most are comparatively slight. It is not so, however, we regret, with all. Three persons were killed on the spot.

Sheriff Bell, and other official parties, visited the spot; and, after investigating the circumstances, directed that the drivers of both trains should be apprehended.

LAMBETH ELECTION.—The writ for the election of a burgess to serve in the present Parliament for the borough of Lambeth, reached the high sheriff of the county of Surrey (J. W. Freshfield, Esq.) on Wednesday, and on Thursday the returning officer of the borough (R. Onslow, Esq.) attended on Kennington Common, at the spot where the hustings are usually erected, and made proclamation that he should proceed to the nomination and return on Monday next, the 5th inst., at ten o'clock. The ex-member for Marylebone, Sir C. Napier, has issued an address to the electors. He pledges himself to go to the poll if he finds himself well supported, but not otherwise.

THE CHARTER-HOUSE.—The Right Hon. Fox Maule, M.P., Secretary-at-War, and a Carthusian by education, was on Thursday elected to fill the vacancy among the Governors of the Charter-House, caused by the lamented death of the late Right Hon. Sir R. Peel.

LATEST FOREIGN NEWS.

SCHLESWIG-HOLSTEIN.

The details of the great battle at Idstedt have been published in official reports, the one drawn up by General Willisen, who commanded the Holstein army; and the other on the part of the Danes, signed, by order, C. Gluel. The discrepancies between the two accounts are, of course, many; but General Willisen admits that the victory was with the Danes, which he attributes entirely to their superior numerical force. He says that his retreat was effected in good order, and that he had no other loss in *matériel* than three dismounted guns. He regrets the great number of officers and men killed and wounded; but says, as soon as the former can be replaced, he shall be as ready for action as at first. He had but few of his own troops made prisoners, but took between 400 and 500 belonging to the Danes. The total loss of the insurgents is not stated. The Danish report, on the contrary, states that the Danes took 1000 insurgent troops prisoners, and five pieces of cannon; and that 2000 of the wounded enemy were lying in the hospital at Schleswig. The dead in the fields were so numerous, that waggons sufficient could not be found to carry the bodies away. The report acknowledges the loss of at least 12 distinguished officers, with 73 wounded, 104 killed, and 2300 non-commissioned and privates wounded. The Holstein men are preparing for a second battle.

FRANCE.

The French Minister of Finance has presented to the Assembly a project of law to compel the bank to resume cash payments. The reasons assigned for this measure are the revival of business, and the progress of tranquility throughout France, together with the satisfactory state of Europe. The bill has been referred to the budget committee

The Court of Cassation has decided that the three years of domicile required by the new electoral law must be continuous and without interruption.

A great number of passports have been applied for by those members of the Legitimist party who intend going to pay their respects to the Count de Chambaud at Wiesbaden

M. Thiers has quitted Paris for Belgium, Holland, and Germany.

On Thursday the new stamp act came into operation, when the *Atelier* and *Punch* ceased to appear, the proprietors preferring to abandon those journals rather than submit to the restrictive provisions of the measure in question. The *People*, which was a monthly periodical, is now to be published three times a week. Further changes are in contemplation by the directors of several other papers.

COURT AND HAUT TON.

THE COURT AT OSBORNE

Her Majesty the Queen and his Royal Highness Prince Albert have been enjoying their accustomed retirement during the past week at Osborne. Her Royal Highness the Duchess of Kent arrived on a visit to her Majesty and his Royal Highness on Monday

His Imperial Highness Prince Peter of Oldenburgh also arrived on a visit to the Queen on Monday, returning to town on the following day.

On Tuesday, her Majesty the Queen and the Prince Consort, accompanied by her Royal Highness the Duchess of Kent, and several of the Royal children, visited Appuldercombe, the beautiful seat of the Earl of Yarborough, on the southern side of the island. It is rumoured that the object of the Royal visit was to determine upon the eligibility of selecting this place as a temporary residence for the Duchess of Kent.

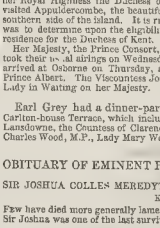
Her Majesty, the Prince Consort, and family still continue at Osborne, and took their usual airings on Wednesday and Thursday. The Earl of Clarendon arrived at Osborne on Thursday, and remains on a visit to her Majesty and Prince Albert. The Viscountess Jocelyn has relieved the Countess of Dysart as Lady in Waiting on her Majesty.

Earl Grey had a dinner-party on Wednesday, at his residence, in Carlton-house Terrace, which included the French Ambassador, the Marquis of Lansdowne, the Countess of Clarendon, Earl St. Germans, Lady Dufferin, Sir Charles Wood, M.P., Lady Mary Wood, &c.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED

SIR JOSHUA COLLES MEREDYTH, BART., OF GREENHILLS, COUNTY KILDARE.

Few have died more generally lamented than this excellent and worthy Baronet. Sir Joshua was one of the last survivors of the race of old-fashioned courtly gentlemen, now nearly extinct: and he delighted to show the kindly courtesies of his earlier years, which—told with a grace and humour peculiarly his own—rendered his society in the highest degree entertaining. In kindness of heart, cheerfulness of spirit, and gentlemanly bearing, he has left scarcely any equal; and his death will cause a void among his numerous friends, which will be long and sorrowfully felt.



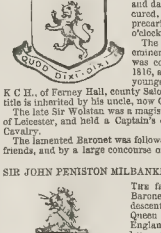
The family, one of very ancient Welsh descent, of which he was the representative, is established in the Sister Island in 1584, by the Rev. Dr. Richard Meredyth, who went from England as chaplain to the Lord Deputy Perrott, and became eventually Bishop of Leighlin and Ferns. His son, also a distinguished man in his time, was the Right Hon. Sir Robert Meredyth, of Greenhills, Chancellor of the Irish Exchequer. From him the deceased Baronet was seventh in descent.

Sir Joshua was born June 1, 1771, and had, consequently, just entered on his 80th year. Early in life he served with credit in the British army, was knighted by his father's lifetime, in 1793, and received from Louis XVIII. the order of military merit, and from the Grand Duke of Hesse that of Louis of Hesse. He married, first, in 1795, Maria, only daughter and heir of Lawrence Coyne Nugent, Esq., of the county of Westmeath, and secondly, in 1823, Dorcas, second daughter and coheir of Colonel Edwards, of London. By the former he leaves four daughters: Frances, married to Philip O'Kelly, Esq.; Barbara, who wedded, first, Eyre, Lord Castlecoote, and secondly, Joseph, present Earl of Milltown; Maria, widow of the Hon William Butler; and Dorcas, widow of James M'Evoy, Esq., of Tobertinane, county of Meath.

In the proceedings recently adopted by the Baronets Committee to substantiate their claims of privileges, Sir Joshua Meredyth took an active part. He headed one deputation to the Government, and was cordially received as an old acquaintance by Sir Robert Peel. He died at Dover, on the 27th ult.

SIR WILLOUGHBY WOLSTAN DIXIE, BART

This gentleman died on the 23rd ult. The event was so sudden as to excite universal surprise and general regret. On the preceding Sunday afternoon, while sitting with several other friends on an iron rail, at Shenton Hall, the seat of Major Wollaston, he lost his balance, and fell back on his head, which caused his instantaneous death at the time, but the accident was not thought of a serious nature, inasmuch as the next day he was about the park as usual. On the following Tuesday morning, however, Sir Wolstan was taken suddenly and dangerously ill: medical aid was instantly procured, but proved of no avail; he continued in a precarious state for a few hours, and died about two o'clock, P.M., the same day.

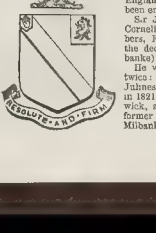


The deceased Baronet represented an ancient and eminent Leicestershire family, on one which a Baronetcy was conferred in 1620. He was born in October, 1816, and married, 16th March, 1841, Louisa Anne, younger daughter of Lieut.-General Sir Evan Lloyd, K.C.H., of Ferney Hall, county Salop, by whom he leaves three daughters. The title is inherited by his uncle, now Captain Sir Alexander Dixie, Bart., R.N

The late Sir Wolstan was a magistrate and Deputy-Lieutenant for the county of Leicester, and held a Captain's commission in the Leicestershire Yeomanry Cavalry.

The lamented Baronet was followed to the grave by a number of relatives and friends, and by a large concourse of tenantry

SIR JOHN PENISTON MILBANKE BART., OF HALNABY, COUNTY YORK.



THE family of Milbanke, of which the deceased Baronet was the male representative, derived its descent from Ralph Milbanke, Cup Bearer to Queen Mary of Scotland, who sought an asylum in England in consequence of a duel in which he had been engaged in his native country.

Sir John was son of John Milbanke, Esq., by Cornelia his wife, daughter of Sir William Chambers, Knight, and succeeded to the Baronetcy at the decease, in 1825, of his uncle, Sir Ralph (Milbanke) Noel, father of Lady Noel Byron.

He was born 20th August, 1776, and married twice: first, in 1799, Eleanor, youngest daughter of Juhnes Herring, Esq., of Jamaica; and secondly, in 1821, Elizabeth, daughter of Captain James Fenwick, and widow of Thomas Grey, M.D. By the former he had one son, the present Sir John Ralph Milbanke, Bart., a diplomatist, and five daughters.

MEETING IN WILLIS'S ROOMS, ST. JAMES'S, FOR THE ERECTION OF A MEMORIAL TO THE LATE SIR ROBERT PEEL.

MEMORIAL TO SIR ROBERT PEEL.

MEETING IN WILLIS'S ROOMS.

In our Journal of last week we duly reported the proceedings of the public meeting held in Willis's Rooms, King-street, St. James's, of the friends and landowners of the late Sir Robert Peel, "for the purpose of perpetuating by some enduring memorial the recollection of his talents, his exertions in the public service, and his exemplary private virtues."

We now engrave the most interesting stage of the proceedings—his Grace the Duke of Wellington reading the first resolution to the meeting. On the left of his Grace is seated the right hon. chairman, the Earl of Aberdeen; and next, Viscount Hardinge.

The following noblemen and gentlemen were at once appointed members of the committee:—The Duke of Buccleugh, Duke of Wellington, Marquis Camden, Earl of Aberdeen, Earl Bathurst, Earl of St. Germans, Earl of Ripon, Earl Jermyn, M.P.; Viscount Sydney, Viscount Canning, Viscount Hardinge, Viscount Ashley, M.P.; Viscount Mahon, M.P.; Viscount Nowa, M.P., Lord Frede[illegible] M.P., Lord Wharncliffe, Lord Lyndhurst, Lord Ashburton, Lord Montcagle, Right Hon. Sidney Herbert, M.P., Hon. F. H. Cl[illegible], M.P., Right Hon. H. Ce[illegible], M.P., Right Hon. Sir J. R. G. Graham, Bart., M.P.; Right Hon. John Nicholl, M.P., Right Hon. W. E. Gladstone, M.P.; Right Hon. Sir George Clerk, Bart., M.P.; Sir W. Middleton, Bart.; Sir John Young, Bart., M.P.; Sir William Verner, Bart., M.P.; Mr. T. G. Bucknall Estcourt; Admiral Bowles, M.P.; Colonel Wood; Mr. J. Wilson Patten, M.P.; Mr. W. Tatton Egerton, M.P.; Mr. Duncan M'Neill, M.P.; Mr. Edward Cardwell, M.P.; Mr. William Cotton, Mr. H. H. Lindsay, Mr. William Gregson, Mr. Richard Twining, and Mr. Robert Garrard.

The subscriptions collected in the room exceeded £1600.

WORKING-MAN'S TESTIMONIAL TO SIR ROBERT PEEL.—On Wednesday evening a meeting of the Central Committee for carrying out the testimonial was held at the committee-room, Lincoln's Inn Fields, Patternmaker, which was attended by Sir James Duke, M.P., Baronet, Joseph Hume, Esq., M.P., and other influential members, when the affairs were thoroughly investigated, and found to be in a very satisfactory state. It is contemplated to hold a public meeting at the Whittington Club, on Wednesday next.

MONUMENT TO SIR R. PEEL AT LEEDS.—On Monday, a very numerously attended meeting, presided over by the Mayor, was held in the Courthouse, at Leeds, for the purpose of taking steps to commemorate the public services of the late Sir Robert Peel. Resolutions expressive of the national loss sustained by his death, and providing for the erection of a public monument to his memory, were unanimously adopted, the meeting being addressed in support of them by Mr. W. Beckett, M.P., the Rev. W. Sinclair, Mr. Gott, Mr. Sikes Mr. Wilkinson, and other influential gentlemen.

FOUNDATION OF "THE ALFRED FREE GRAMMAR-SCHOOL," AT WANTAGE.

IT will be recollected that a committee was formed some months past with a view to the erection of a memorial in commemoration of the thousandth anniversary of the birth of Alfred the Great, at Wantage, Berks; described in the ILLUSTRATED LONDON NEWS for Oct. 27, 1849. The result was an appropriate proposal to revive the Wantage Grammar School by subscription, in augmentation of the limited fund appropriated to that purpose since the reign of Queen Elizabeth; the erection of a suitable building, with master's residence, &c.; and the allotment of sufficient salary to maintain a gentleman of character and education as master. Although the whole amount required is not yet subscribed, the laudable efforts of the committee have been so far successful, that on Monday last the corner stone of "The Alfred Grammar-School" was laid by B. Wroughton, Esq., of Woolley Park, Berks. Appropriate prayers were previously offered by the Lord Bishop of the diocese; the Venerable the Archdeacon Berens, the Vicar (the Rev. Mr. Buller), and most of the clergy, gentry, and inhabitants of the neighbourhood attending the interesting ceremony.

We annex a Sketch of the proposed building, which is in the style of the first period of pointed architecture prevailing in the 13th century; and is arranged round three sides of a quadrangle. The school occupies the west side; the dining-hall, kitchen-offices, and dormitory, the north; and the residence for the master, the east. The edifice is to be built of Cirencester stone, with Bath-stone quoins and dressings. The roof of the school and dining-hall will be open to the timber framing. The School will provide accommodation for seventy scholars, of which thirty will be boarded.

THE ALFRED FREE GRAMMAR SCHOOL, WANTAGE, BERKS.

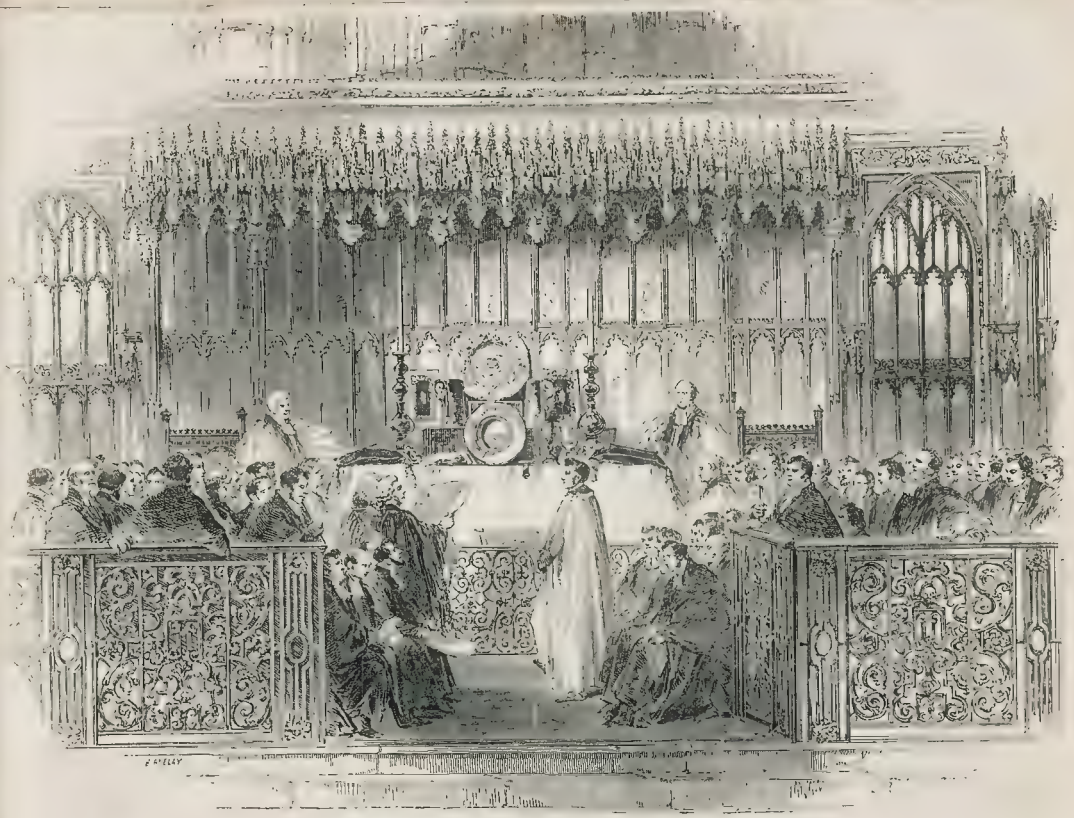
The design is effective, in good keeping; and possessing much variety of outline. It will be a pleasing addition to the picturesque scenery of the ancient town of Wantage. Mr. J. B. Clacy, of Reading, is the architect; and the contract for the work has been taken by Messrs. Hunt and Kent, of Wantage.

In a well-considered appeal in behalf of the funds for carrying out this desirable object, it is stated that "the Governors of the Wantage Town Lands have long been anxious to revive their Grammar School, and to provide for the middle classes of their neighbourhood a cheap and efficient course of instruction, embracing not only a rudimental acquaintance with the Latin language, but also the necessary addition of a sound modern education.

Mr. Ormond, of Wantage, Treasurer of the County, has undertaken the management of the fund; and the list includes the following subscriptions:—

The Governors of Wantage 100l.; B. Wroughton, Esq., 100l.; the Lord Bishop of Oxford, 50l.; the Lord Bishop of Salisbury, 25l.; J. Morrell, Esq., jun., 25l.; H. Palmer, Esq., M.P., 25l.; P. Lawe, Esq., M.P., 25l.; Lord Harrington, 20l.; J. Loveden, Esq., High Sheriff of Berks, 10l.; the Lord Chancellor of Ireland, 10l.; the Hon. A. Johnstone, Duke St., in Memoriam, 10l.; Miss Alexander, 10l.; the Rev. J. W. Bowden, 10l.; the Earl of Hardwicke, 20l.; D. Tritton, Esq., Banker, 20l.; the Rev. R. Cresswell, Worcester, 10l.; the Rev. J. L. Mowbray, the President of Trinity, 10l.; John Townsend, Esq., 20l.; George Hayter, Esq., 10l.; Thomas Duffus Hardy, Esq., 10l.; R. P. Hastard, Esq., 20l.; Mr. and Mrs. George Stone, 10l.; the Rev. John Harward, 10l. 10s.; Dr. Whitechurch, 5l.; Henry Hippisley, Esq., 10l.; the Vicar of Wantage, 10l. 10s.; W. Ormond, Esq., 10l.; C. Elkington, Esq., 10l.; the Warden of All Souls, 10l. 10s.; the Rev. W. Hayward, 10l.; the Chatham Family, 10l.; J. Bowles, Esq., 10l.; Paul Craven, 25l.; C. B. Eyre, Esq., 10l.; C. W. Heath, Esq., 10l.; Magdalen College, 10l.

MONUMENT TO SIR R. PEEL AT LEEDS.—On Monday, a very numerously attended meeting, presided over by the Mayor, was held in the Courthouse, at Leeds, for the purpose of taking steps to commemorate the public services of the late Sir Robert Peel. Resolutions expressive of the national loss sustained by his death, and providing for the erection of a public monument to his memory, were unanimously adopted, the meeting being addressed in support of them by Mr. W. Beckett, M.P., the Rev. W. Sinclair, Mr. Gott, Mr. Sikes Mr. Wilkinson, and other influential gentlemen.



CONSECRATION OF THE BISHOP OF MONTREAL IN WESTMINSTER ABBEY.

CONSECRATION OF THE NEW BISHOP OF MONTREAL.

THURSDAY week (St. James's Day) being appointed by the Archbishop of Canterbury for the consecration of the Rev. Francis Fulford, D.D., late minister of Curzon Chapel, Mayfair, to the bishopric of Montreal (Canada), at Westminster Abbey, the sub-dean (Lord John Thynne) and the canons met the Archbishop of Canterbury and the Bishop of London in the Jerusalem Chamber, Westminster, at a quarter before eleven o'clock.

At the appointed hour (eleven o'clock), the procession formed and proceeded to the cathedral. The Archbishop took up his place on the north side of the holy table, the Bishops of London and Manchester on the south side, and the Bishop designate in a seat appointed in the *ascensum*.

The sub-dean and canons having taken their seats in the stalls, the usual morning prayers commenced. The Archbishop then proceeded with the communion service and the responses; and the Nicene creed being sung, the Rev. Thomas Bowdler, secretary to the Church Building Society, preached an eloquent sermon from the 28th chapter of St. Matthew's Gospel, v. 18, 19, 20.

The canons' verger then conducted the Bishop designate to the chapel appointed, where he was invested with the rochet.

During his absence, the anthem, "We have heard" (Aldrich.—Psalm xliv. 1—6), was sung. At the conclusion, the Bishop designate returned to the *ascensum*, where he was presented to the Archbishop. The Consecration Service from the Book of Common Prayer was then proceeded with, the Litany being chanted by two minor canons. When the Archbishop had concluded the questions to the Bishop designate, he retired and put on his robes, and the Bishops of London and Manchester (the presenting Bishops) resumed their seats, and an anthem, "The Lord gave the word" (Handel), was sung; after which, the Bishop designate returned and knelt down at the communion-table, and the "Veni Creator" (Palestrina) was sung by the whole choir. The Consecration Service then proceeded, and at the conclusion the Bishop designate took his seat within the rails. The holy sacrament was then administered, and the ceremony closed. There was a very large congregation present. We briefly recorded the Consecration last week; we now illustrate its most impressive portion—at the altar.

The Rev. Dr. Fulford, the new Bishop, was educated at Exeter College, Oxford, of which college he became a fellow in 1825. He was afterwards for twenty years rector of the populous manufacturing town of Trowbridge, in Wiltshire, and for the last four years and a half minister of Curzon chapel, Mayfair, and also chaplain to her Royal Highness the Duchess of Gloucester.

The newly constituted diocese of Montreal is formed out of the late diocese of Quebec, which formerly contained the whole of the province of Lower Canada. The new diocese will contain the whole district of Montreal as defined for judicial purposes. The late Bishop (Dr. Mountain) will take the name of Bishop of Quebec, and will retain the districts of Quebec, Gaspé, and Three Rivers. The new diocese will contain 417,213 inhabitants, 55,258 square miles, and only 44 clergymen. The parish church of Christ church, a large and rather handsome Grecian edifice, will be made the cathedral of the Bishop, who will remain at Montreal.

It was intended that the Consecration of the new Bishop of the Canterbury Settlement (the Rev. Thomas Jackson, D.D.), who for some years past has filled the post of Principal at the National Society's Training College, Battersea, should have taken place on Thursday week; but, in consequence of certain necessary arrangements not having been complied with, his consecration has been postponed for the present.

The Bishop of Montreal will proceed forthwith to enter on the episcopal duties of his diocese.

MARLBOROUGH HOUSE.

WITHIN the present week the handsome mansion in Pall-mall, known as Marlborough House, has been the subject of some interesting proceedings in both Houses of Parliament, by which possession of the mansion will be secured to his Royal Highness the Prince of Wales so soon as he shall have attained the age of eighteen years. In the meantime the house will be appropriated to the display of the grand collection of pictures so generously presented by Mr. Vernon to the nation. These have, accordingly, been removed to Marlborough House, which was opened privately on Thursday, and will be opened to the public on Monday next.

We have had an opportunity of seeing the new arrangement of the pictures, which have hitherto been so sadly misplaced in the underground rooms of the National Gallery. Of course, any change from their former position must be for the better; but, in order to exhibit pictures well, you require certain architectural conditions not often found in even the most magnificent of dwellings. The gain in respect of the Vernon Collection is rather in the increased convenience of the public, who can now wander through a suite of rooms, instead of being confined to one, than in the actual viewing of the pictures. As regards light—the light, that is to say, which is necessary for pictures—they are not much better off than they were when in the "cellar," and this we say with a full allowance for the gloominess of the weather on Wednesday, when the private view took place. Besides the "Vernon" collection, there are two rooms filled with pictures of the English school that have hitherto been exhibited in the National Gallery—those by Reynolds, Gainsborough, Wilson, Wilkie, Hogarth, &c.; in short, all the English branch of the National Collection. The change with respect to these pictures is decidedly for the worse. In the building on "the finest site," they could, at least, be seen; at Marlborough House an antique gloom is thrown over them by the shadows from the deep windows, not at all favourable to the development of their merits of colour.

The whole collection occupies the suite of rooms on the ground-floor. The two first rooms are devoted to the National Gallery excerpts, and the rest to the Vernon Collection. That collection is too well known to our readers to require even enumeration. We noticed many peculiarities in the placing or "hanging" of the pictures, by which the merits of some were detracted from, while those of others were a little too much enhanced; but, doubtless, there are good practical reasons for all these things. One picture, the large Turner, "The Fates and the Golden Bough," is placed on the mantel-shelf of one of the rooms. It is a picture which requires to be seen from a distance: here it is brought too close to the eye, and its effect, such as it is, is spoiled. Mr. Eastlake's picture, painted for the Vernon collection, and exhibited this year at the Academy ("The Escape of the Carrara Family"), is here. It occupies a conspicuous position, "on the line." Landseer's pictures are generally pretty well placed. His new title of knighthood is added to the inscriptions, all the pictures by him being labelled "Sir Edwin Landseer, R.A." There are seven pieces of sculpture in the collection—Gibson's "Hylas," Baily's "Eve listening," after Nollekens, his "Welcome," after the same, Lawson's, after Foubelle, Chantrey's "Sir W. Scott," and Mr. Bacon's bust of the Marquis of Wellesley.

The history of the mansion is curious. Marlborough House was built in 1709-10, by Sir Christopher Wren, for John Churchill, the great Duke of Marlborough, on ground leased by Queen Anne to the Duchess. "It therefore built and used for keeping of pheasants, guinea-hens, partridges, and other fowl," and on "that piece of garden taken out of St. James's Park, then in the possession of Henry Boyle, one of her Majesty's principal Secretaries of State." We find this minute piece of information (Docquet of Grant, 10th June; 1709, in Harl. MS. 2284) in the second edition of Mr. Cunningham's "Handbook of London;" whence, also, we quote the substance of the following details.

The expense of building the house (between £40,000 and £50,000), the Duchess tells us, was entirely defrayed by the Duke. Wren was employed, to vex Vanbrugh. The great Duke and the Duchess died in this house. The Duchess used to speak of her *neighbour George*, meaning the King, in St. James's Palace; and here she is described as "sitting up in her bed in her usual manner," and thus receiving a deputation of the Lord Mayor and Sheriffs. The Pall Mall entrance to the house being, as it still is, extremely bad, the Duchess designed a new one, and was busy trying to effect the necessary

MARLBOROUGH HOUSE, PALL MALL.

purchases, when Sir Robert Walpole, wishing to vex her, stept in, and bought the very leases she was looking after. The blocked-up archway of the intended opening faces the principal entrance to the house, and forms a sort of screen to the parlour in Pall Mall. The old buildings between Marlborough House and St. James's Palace were removed by Vardy, in 1748.

Marlborough House was bought by the Crown in 1817, for the Princess Charlotte and Prince Leopold. The former died before the agreement was effected; but the Prince (now King of the Belgians) lived here for several years. The last inhabitant was the late Queen Dowager Adelaide.

METROPOLITAN NEWS.

PUBLIC MEETINGS

MIDDLESEX HOSPITAL.—On Thursday, a quarterly court was held, when the present Duke of Cambridge was elected a vice-president, in the room of his illustrious father. It appeared from the report that the number of patients in the hospital last week was 238, of whom 46 had been discharged, and five died, leaving 187 under treatment. During the present week 40 had been admitted, making the number in the hospital 227. The balance in the hands of the treasurer was £1447 9s. 7d., and on the Samaritan Fund £112 3s. 9d. The committee wished it to be particularly known, that, in order to fully carry out the objects of the hospital, at least £4000 per annum was required beyond the ordinary income. The report was adopted; and after some formal business, the meeting separated.

JOB AND POSTMASTERS', &c. PROVIDENT SOCIETY.—On Thursday the annual meeting of this society was held at Messrs. Tattersall's; Mr. Deacon in the chair. The report stated that the capital amounted to £3828 17s. Three per Cent. Consols. During the last year an additional life annuitant had been elected on the funds, receiving £18 4s. per annum. Since their last annual meeting the receipts had been £812 15s. 9d., of which £476 12s. 1d. had been invested in the funds, and there remained a balance in the hands of the treasurer of £283. The report was adopted; and, after some complimentary votes, the meeting separated.

TALLOW-CHANDLERS' BENEVOLENT SOCIETY.—The annual meeting of this excellent charity was held at the offices, 18A, Basinghall-street, on Wednesday, Mr. Glin presiding. From the report, it appeared that the society was formed in 1843, and since its commencement fifty-eight persons have become the recipients of the bounty. At the present time there are forty-one pensioners on the funds—twenty-five men and sixteen women—the former receiving 18s. per month, and the latter 14s. The total amount distributed amongst the pensioners has been nearly £1300; and the directors, who have recently raised the pensions 2s. per month, are desirous, as soon as possible, of adding to the number of pensioners, and still further increasing the amount of the pensions. The total receipts of the past year were £1239 14s. 4d.; and the expenditure, including £372 19s. 3d. in the purchase of £414 4s. 10d. Consols, having a balance in the hands of the bankers of £414 4s. 10d. The society also now possesses £3400 in the Three per Cents, and may be fairly looked upon as firmly established among the metropolitan charities.

EPIDEMIOLOGICAL SOCIETY.—A general meeting of the members of the medical profession, and others interested in the subject, was held on Tuesday at the Hanover-square Rooms, for the purpose of forming a society to investigate the history, origin, cause, and topographical prevalence of diseases, with a view to their more effectual prevention or improved treatment. Lord Ashley, M.P., having taken the chair, said that in England and Wales alone the cholera carried off in one year 73,000 persons, and yet its cause and its origin were unknown. If such visitations as this continued to be periodically repeated, and the existing uncertainty regarding them remained, it would be a disgrace to the medical profession, and a scandal to the age in which we lived. The investigation of such subjects would be the object of the society they had met to form, and these researches would tend to the discovery of truth, and its application to the well-being of the community. In moving the first resolution, establishing the society, Dr. Babington said that the society had no intention of interfering with investigations of individuals. On the contrary, it proposed to aid them with funds, with a good library, by putting them in communication with the members of other countries, and to facilitate their efforts in every way. But to carry out their plans they must have funds at their disposal, and therefore it was proposed that each member should pay an annual subscription of one guinea. Mr. B. D. Grainger said that it was a striking fact, that, in the year 1848, when the cholera was approaching, no less than 19,000 deaths were caused in the metropolis by epidemic or zymotic diseases—a larger number than occurred during the visitation of cholera in the subsequent year. For several years the mortality increase had been observed in this class of diseases, so that in 1846 the number of deaths from them was seven times greater than in 1838. These were facts the causes of which it would be the object of the society to investigate. They would have to investigate the influence of a deteriorated atmosphere and of impure water; to settle the debated question of contagion or non-contagion; the incubation of diseases, and other subjects of a similar nature, and shed a new field was before them. Resolutions providing for the government of the society, and appointing a president (Dr. Babington), vice-presidents, and a council, were also passed, and the meeting was addressed by Lord Ashley, Dr. Babington, Dr. Simpson, Mr. Charles Hawkins, Mr. Rogers, Dr. Allison, and other gentlemen

TITHE REDEMPTION TRUST.—On Tuesday morning a general meeting of the clergy and laity was held at St. Martin's Hall, Long Acre, with the view of promoting the restoration of alienated tithes to their legitimate purposes, viz. the service of the Church. Lord J. Manners, M.P., took the chair. His Lordship observed that the proceedings of the second half-yearly meeting had appeared fully in print, and therefore it would not be necessary for him to enter at any length into its details. The Rev. James Davis proposed the first resolution

That the principle of tithes has been generally admitted from time immemorial, and that the Church and State in England have always recognised it in their legislation as the proper provision for the public maintenance of religion.

Mr. [illegible] seconded this resolution, which was carried *nem. con.* The following were also agreed to:—

That tithes have been in many instances during a long period alienated from their holy purpose, their restoration has been, and still is, a matter of deep anxiety to the conscientious; and that the Tithe Redemption Trust has been formed with the view of remedying the great evil of the alienation of tithes, and of enabling their ownership to be vested in the parties from whence they arise, that the objects and mode of proceeding proposed by the Tithe Redemption Trust are deserving of support and co-operation, as being likely well directed to cause a general restoration of alienated tithes, but as being well fitted to promote in the best manner that increase of church endowment which is now so much needed.

Those were ably supported by several clergymen and gentlemen present, and the meeting separated, after thanking the chairman.

BUILDERS' BENEVOLENT INSTITUTION.—On Tuesday, the third annual meeting of the friends and supporters of this charity was held at the London Tavern, Bishopsgate-street; Mr. Wm. Cubitt, M.P., in the chair. The report of the directors for the year ending 24th June, 1850, stated that during that period the contributions to the charity had exceeded the expectations of its most sanguine supporters, though, considering the various trades with which [illegible] were connected, the result might have been fairly anticipated. The donations and subscriptions during the past year amounted to nearly £1030; the annual ball, which was celebrated in January, produced a profit of £298, and at the anniversary dinner in June last upwards of £400 had been contributed to the funds of the society. The institution has at the present time £1600 invested in the Three per Cents. Of this sum £500 had been contributed for the special purpose of erecting almshouses, which was one of the principal objects of the founders of the society. The first election of pensioners was held in October last, when four persons were chosen from a large number of candidates, and the committee had resolved on another election in October next, when five pensioners would be admitted to the benefits of the society. In moving the adoption of the report, the chairman said that the Builders' Benevolent Institution was a charity which deserved a large measure of public support, and, considering the influential position occupied by the trade, he did not doubt it would become one of the first and most useful charitable institutions in the metropolis. He regretted that the treasurer, stated that since the report had been drawn up, an additional sum of £200 stock had been purchased. A vote of thanks was then passed to the patrons and officers of the society, and the outgoing directors having been re-elected, the proceedings terminated

ROYAL GENERAL ANNUITY SOCIETY. A general half yearly and very numerously attended meeting of the supporters and friends of the above society was held on Monday, at the London Tavern, for the purpose of electing annuitants and other business. H. Pownall, Esq., presided, and in a long address described the financial position of the society, and also that its funds were applied for allowing annuities to decayed members of the clergy, clergymen, solicitors, medical men, master manufacturers, tradesmen, their widows and clerks, and to single females (their daughters), from all parts of the United Kingdom. From the condition of the funds they were unfortunately compelled this year to admit more than nine out of the 121 candidates, viz. three males and six females; though he had hoped, from the recent exertions which had been made, that a greater number of candidates would have been elected. The ballot then took place, and, after the result had been announced, the chairman congratulated the successful candidates, and expressed his sympathy for the unsuccessful, with a fervent hope that the future would be enabled to elect all the applicants. In conclusion he urged on the meeting the necessity of exerting their influence funds for the erection of their "Royal Victoria Asylum." Thanks were then unanimously voted to the chairman, which having been duly acknowledged, the meeting broke up.

MEMORIAL TO THE LATE DUKE OF CAMBRIDGE.—On Monday, a meeting of the secretaries of the various charities of London was held in the London Tavern, for the purpose of fixing upon a fitting mode of commemorating the many acts of munificence of the Duke of Cambridge in support of the benevolent institutions of the metropolis. The Rev. D. Laing, secretary to the [illegible] Benevolent Institution, was called to the chair. Mr. Locke moved the first resolution, which was expressive of the sorrow of the meeting at his Royal Highness's lamented death, and suggested that the most fitting medium for erecting to his memory a monument commensurate with his virtues, would be through the united co-operation of the committees of the metropolitan charities. A resolution was then proposed, and, after addresses from several [illegible] in eulogy of the deceased Prince, was unanimously agreed to—

[illegible]ting be commenced in furtherance of the preceding resolution, that the Right Hon. the Lord Mayor be respectfully invited by a deputation to preside, and permit the meeting to take place in the Egyptian Hall; and that a committee be appointed to carry out the objects of the present meeting.' This meeting then separated.

GRAND ENTERTAINMENT AT FISHMONGERS' HALL.—On Thursday the worshipful Company of Fishmongers entertained in their splendid hall a numerous and distinguished company of guests. The dinner was given to her Majesty's ministers, but, owing to a mistake, the leading members of the Government were absent. Up to the last moment Lord J. Russell, Lord Palmerston, Sir George Grey, and Sir Charles Wood were expected. Among those present were the Earl of Carlisle, Lord Brougham, Lord Nugent, Lord Robert Grosvenor, the Marquis of Breadalbane, Lord Ashburton, Sir William Molesworth, Sir James Weir Hogg, Sir James Duke, Mr. Mitchell, M.P., Mr. Fitzstephen French, M.P., Alderman Humphrey, M.P., &c. Sir J. Easthorpe, the Prime Warden, filled the chair. The Earl of Carlisle, Lord Brougham, Lord R. Grosvenor, Sir James Weir Hogg, Mr. Page Wood, and Baron Rothschild replied to the toasts proposed

LONDON FEVER HOSPITAL.—On Sunday morning, a sermon in aid of the London Fever Hospital was delivered at the church of St. Peter's, Vere-street, by the Venerable Master of the Temple, Archdeacon Robinson, D.D. During a very eloquent appeal, the venerable preacher stated that, since its foundation, the hospital had received 29,000 patients, nearly 4000 of that number having been admitted during the past three years. Recently, the hospital had been considerably enlarged, causing the ordinary expenses of last year to exceed the income by £600; and as the increased accommodation would proportionately add to the expenditure of the present and future years, an urgent appeal was made for the farther co-operation necessary to maintain the hospital in its exertions for the cure and prevention of so distressing a malady. The collection at the conclusion of divine service amounted to £44 6s.

ELECTION OF SHERIFF.—On Monday this contest was brought to a close. At four o'clock Mr. Under-Sheriff Millard, accompanied by the committee and friends of the candidates, attended the buildings, and the numbers were announced as follows:—Hodgkinson, 819; Rutley, 99; majority for Hodgkinson, 420. The common crier then made proclamation that the declaration of the successful candidate would be made by the Lord Mayor at twelve o'clock on Wednesday, and the proceedings terminated. On Wednesday morning the Lord Mayor, attended by the committee and friends of the candidates, attended the buildings, when the official numbers were declared. Mr. Hodgkinson, citizen and spectacle-maker, was then declared to be duly elected to serve as sheriff for the year ensuing, and the meeting separated.

LAMBETH ELECTION.—The late member for Coventry, William Williams, Esq., appears to be the favourite candidate for the representation of the above borough. On Monday he attended a meeting of the electors, at the School Room, George-street, Lambeth, for the purpose of making a declaration of his political principles, and to answer any interrogatories put to him by the electors. His exposition and his answers appeared to be most satisfactory, as he declared himself to be in favour of an extension of the franchise, of lessening the duration of Parliaments, and to use the strictest economy in all branches of our expenditure, and in favour of many other popular measures. The large school-room was crowded to inconvenience. On a motion by the chairman for a show of hands, recognising the propriety of supporting Mr. Williams, every hand in the room (the exception of three) was held up against him, whilst for the rest were for him, followed by shouts of applause. On Wednesday evening, two meetings were held, one at the Rosemary Branch, Peckham; the other at the Lecture Hall, Walworth; at both of which, by a good arrangement of time, Mr. Williams attended. There the same demonstration was manifested as at the former meetings, and the general opinion seemed to be that the ex-member for Coventry is for the same "in the coming man." The election is appointed to take place on Monday next Sir Charles Napier arrived in London on Thursday, so that it appears likely that Mr. Williams, Mr. J. H. Palmer, and the gallant Admiral will go to the poll

The Lord Chancellor has presented the Rev Herbert Kynaston, D.D., High Master of St. Paul's School, to the Rectory of St. Nicholas Cole Abbey and St. Nicholas [illegible], M.A., [illegible] death of the Rev [illegible]

[illegible]

NOVEL BAZAAR IN AID OF A RAGGED SCHOOL.—On Tuesday, a sale of useful and ornamental articles took place under the arches of the South-eastern Railway, Newkinger-road, Bermondsey, in aid of the debt incurred in fitting up the [illegible]14 as a ragged school for the education of the poor children of the locality. The arches were tastefully decorated with evergreens and flowers. The place was tastefully arranged, and the ladies who presided over the stalls had their benevolence rewarded by the receipt of a considerable sum in aid of the object in view.

LONDON AND GREENWICH RAILWAY.—The half-yearly meeting of the shareholders of this company (leased to the South-Eastern Company) was held on Tuesday, at the offices, Moorgate-street; Mr. Shadbolt in the chair. The accounts showed a net revenue balance of £724, which, after the payment on bonds and preference shares; and a dividend of 4s. per share, clear of income-tax, having been declared, a vote of thanks to the chairman closed the business of the meeting.

MEXICAN BONDHOLDERS.—In consequence of a difference having arisen between Col. Facio, the financial agent of the Mexican Government, and Mr. Thomas Schneider, the late agents of that Government, which will prevent the division of the funds among the bondholders, a meeting was held at the London Tavern, on Thursday, Baron Goldsmid in the chair, at which it was resolved that the bondholders' committee should be authorised to enter into any fair arrangement with the Mexican Government as to prevent the present difficulty arising in future. A resolution, deprecatory of the differences and the results, was also passed; and Mr. Richmond added to the committee. It having been stated that the gentleman who was the authorised agent of the bondholders, Mr. Falconnet, should proceed to Mexico and Washington, in order to come to some arrangement with the new Government for the securing the payment of the funds due to the bondholders (should that Government consent) to the bondholders, the meeting separated

On Wednesday a ballot was taken at the East India House, for the election of a director in the room of Francis Warden, Esq., who has disqualified. At six o'clock the glasses were closed and delivered to the scrutineers, who reported that the election had fallen on Henry Thoby Prinsep, Esq.

EXHIBITION OF 1851.—COMMENCEMENT OF THE BUILDING.—The commissioners of Woods and Forests on Tuesday delivered over to the executive committee the ground to be appropriated to the building for the reception of the articles sent for the Exhibition in 1851. Messrs. Fox and Henderson, the contractors for the building, immediately commenced their labours by staking out the ground

MONEY ORDERS.—A notice, just issued by the Postmaster-General, directs that in future, on the suspension of the business of any post-office where money orders have been issued, such orders shall be payable at any other post-office which the Postmaster-General shall direct: that such orders shall be invalid at the expiration of twelve months from their date; that money orders shall be payable on two months after the end of the month of their issue; such orders, if not paid within the prescribed period, to be renewable by fresh orders, less the poundage, on application to the Postmaster-General, and subject to the regulations affecting original orders.

DECAY OF TIMBER BRIDGE.—On Monday a large quantity of shingle was thrown into the bed of the Thames to support the abutments of the centre arch of Blackfriars-bridge, which have sunk so much that the stones at the crown of the arch have loosened, and the brasswork has cracked. For some weeks divers have been employed in the bed of the river, who have ascertained that the foundations are affected.

BIRTHS AND DEATHS.—Births registered in the week ending Saturday, July 27: Males, 664 females, 660: total, 1324. Deaths during the same period:—Males, 439; females, 499: total, 898. This return, in connexion with the two previous, indicates a continuous increase in the mortality of the metropolitan districts. The deaths which in the two preceding weeks were successively 781, 863, rose last week to 898. In the corresponding weeks of nine years (1840–48) the lowest number occurred in 1843, and was 749; the highest in 1846, when it was 1,015. The number in the same week the deaths rose to 1831, when pestilence rapidly multiplied its victims. The average of the corresponding weeks of ten years (1840–49) is 1022, which, with a correction for increase of population, becomes 1115. The 898 deaths of last week, therefore, show a decrease on the average of the present year amounting to 217: but it will be observed that the average is in part founded on the aggravated mortality of last year. The deaths from pothisis or consumption are still less numerous than usual, having last week been 121; in corresponding weeks they fluctuated between 120 and 156. In the class which comprises other diseases of the respiratory organs, the deaths, amounting to 74, also fall below the average. The epidemic or epizootic class number 279 deaths; and though this return is not yet excessive as compared with that of the same week in some previous years, it shows a tendency to increase as the autumnal season approaches. Small-pox, measles, scarlatina, hooping-cough, and typhus, show less than the usual fatality, or differ little from the average: but diarrhœa exhibits a rapid increase on the previous weeks, and has now risen above the average. The numbers from diarrhœa in the last four weeks have been successively 40, 57, 81, and 104. Of the last number, those died of it last week, 84 were infants under 1 year, 14 were 1 year old and under 60, and 6 were 60 year- of age and upwards. Last week 13 were ascribed to cholera, showing a decrease on the previous week. The cholera registered returns; but an investigation of the cases as detailed in the registers proves that in a certain proportion of them it was the common English form of the complaint. A comparison with the above deaths from cholera registered last week, it is proper to mention that, in the corresponding week of 1846, there were 26 from the same disease, also 26 in that of 1848; and in that of 1849, the deaths from cholera rose to 793

METEOROLOGICAL OBSERVATIONS.—At the Royal Observatory, Greenwich, the mean height of the barometer in the week was 29 691 inches. The mean temperature was 63·4°, about 2° above the average of the same week for seven years. On Monday and Tuesday, when the temperature was highest, the means were respectively 69° and 72°, and were from 8° to 11° above the average of the same days. The temperature then declined, and, on the last three days, the mean was below the average.

FOREIGN AND COLONIAL NEWS.

DENMARK AND SCHLESWIG-HOLSTEIN.

The contest between the Danes and the people of the Duchies has begun in dread full earnest. The two armies, which had been in presence a few days previously, after some slight skirmishes on Wednesday week, came to a general engagement the next day, Thursday, the 25th of July. The battle began at dawn of day (about three o'clock in the morning), and lasted eleven hours. The Danes attacked with about 25,000 men, and the Duchy army was about 20,000 strong. But the exact strength of either army is not stated. One account represents the Danes as 38,000, and the Duchy troops as 28,000 strong.

The centre of the Schleswig-Holsteiners, under General Willisen, occupied the village of Idstedt, a little distance north of the town of Schleswig. The Danes attacked both wings of their enemies, and, after a combat which continued for eight hours, brought all their disposable strength against the centre of Willisen's troops, and at length forced him to return through Schleswig, to Scheatedt, one mile north of the Eider, and close to the boundary line separating Schleswig from Holstein.

The battle is described as a very sanguinary one, and was fought with great bravery and obstinacy on both sides. The Danish troops, however, were not only superior in the number and weight of metal of their guns, but were also more fully officered, as well as having a large amount of rank and file than the Duchy forces. The result is therefore not remarkable. The battle commenced with an attack by the Danes on both wings of the Schleswig-Holstein army. The Danes did not at first succeed in obtaining any advantage, but in a short time they began to gain ground on the left wing, where they attempted to establish themselves, but were so far driven back by the gallant charge of the Duchy rifles and infantry, that no further attack was made from that quarter. On the right wing they were so severely pressed by the Schleswig-Holsteiners that they could not succeed in gaining a single inch of ground. After this attack on both wings had continued for two or three hours, the Danes made an onslaught on the centre along the Chaussée, in the direction of Flensburg, with infantry, cavalry, and artillery at the same time. The Schleswig-Holstein light infantry retired behind the main position near Idstedt, where the advancing Danes were received with a shower of balls from the German sharp-shooters up there, which compelled them to retire a little. The Holsteiners again rushed to the centre, and with such vivacity that the Danes were soon obliged to retreat *en masse* into the position they had occupied. This manœuvre was repeated, and twice more their main position on the right wing and centre attacked by the Danes. On the left wing a mere skirmishing fire was only carried on

The battle lasted, by this time, continued for nearly eight hours; and between ten and eleven o'clock it seemed certain that the result could not be otherwise than favourable to the Duchy troops. But just at this time it became apparent that the Danes had concentrated their whole force for a main attack on our centre and right wing. The white Danish infantry emerged from the popular wood and formed in line directly opposite the Schleswig-Holstein force, bringing up at the same time several new batteries of field artillery. At the same time, the Danish fatigued and worn-out troops were relieved by fresh battalions. General Willisen also caused his reserve batteries to be brought forward as well as the cavalry, which had as yet been but partially engaged; and about eleven o'clock a most fearful cannonade commenced on both sides, which was kept up on the part of the Schleswig-Holsteiners with great obstinacy for two hours and a half, although the enemy's guns were larger and more numerous. Individual instances of courage at this critical period of the struggle were shown, that would appear almost incredible. A small Duchy battery of 12 pounders charged right into the thickest of the enemy's fire, posted itself at half distance, and greeted a Danes with repeated discharges from the battery. It was, however, soon obliged to retire, in order to avoid a charge of cavalry. The most determined courage of the whole army was, however, of no avail against the superior force of the Danes at this time brought into action. They were also deficient in ammunition. About two o'clock the Danes made a concentrated combined attack upon the centre of the Holstein line, which, after a fierce but brief resistance, gave way. The whole line then retreated in excellent order through the town of Schleswig to their present position, the Danes having been too roughly handled to follow up their dear-bought advantage by pursuit.

It is battle of Idstedt will certainly maintain its place among the most sanguinary contests on record. Both sides fought in the most desperate manner, but the Danes have suffered more than the Schleswig-Holsteiners, great numbers of whose officers, however, fell beneath the deadly aim of the Danish Rifle Brigade. The number killed, wounded, and missing, on both sides, is stated to be above 7000; but all is conjecture as yet till official returns are published. The most probable estimate, however, fixes the amount put *hors de combat* at 5000. Fresh Danish troops have entered the city of Schleswig, and the fortifications of Fredericia are being rapidly strengthened.

The latest accounts, which are to the 29th July, state that no change had taken place in the relative positions of the hostile forces. The Schleswig-Holsteiners were in the same position as on the morning of the battle, and confidently anticipated will result in victory; while the Danes were not less on the alert in making such arrangements as they think will secure to them another decided triumph. The Danish papers of the 30th contain the full official report received in the Danish capital of the battle of Idstedt, and its results. The official communication made to the Minister of War by the Danish General is as follows:—"After a two days' battle, I have gained a decisive but sanguinary victory, and has approached the town of Schleswig. We have taken five cannon and 1000 prisoners. Our loss is very great." After this notification the Danish paddle-boat, a war-steamer arrived at Copenhagen, from Flensburg, with 155 prisoners on board.

A greater loss to the Danes than the number of their killed and wounded is the death of General Schleppegrell, who was shot early in the morning of the 25th. General Schleppegrell was the commander of the artillery of the Danish army, and is said to have possessed great military abilities. Another able officer of the Danish army, who is said to be dead, and who is known to be severely wounded, is Colonel Lassoe, who commanded the Danish right wing in the battle of Idstedt.

The Danes are fortifying the old Dannewerk to the south of the town of Schleswig. In the town itself they seem to be behaving with more moderation than was anticipated, though further to the north their acts are most vexatious, fixed contributions having been levied from German inhabitants; and those whose opinions have rendered them more prominent opponents of Danish misrule have been seized and sent off to Copenhagen as prisoners. Martial law has been proclaimed for the Duchy of Schleswig.

A fleet of eighteen Danish men-of-war lies before the harbour's mouth at Kiel.

FRANCE.

The news from Paris this week is important. The Legitimist journals believe that a *coup d'état* is concocting at the Elysée, and that it will be necessary for the Prorogation Commission to keep a sharp watch on the 15th instant, in order to defeat the object they suppose to be entertained. The suspicions observers of public affairs, however, think that the Legitimists have no foundation for their fears, which owe their origin only to excited imagination and easy credulity.

The *Moniteur* announces that the session of the National Assembly cannot possibly be closed before the 10th of August, but that the sitting of the Assembly should be prolonged.

A great many more persons have been arrested connected with the Nemesis society

M. Drouyn de Lhuys has been made Grand Officer of the Legion of Honour; and M. Thouvenel, Minister Extraordinary and Minister of the Republic to Greece, that of Commander of the Legion of Honour, for the skill and zeal they displayed in the late affair of Greece.

The immoral productions and the political dramas lately brought out at the Paris theatres have determined the Government to put a stop to them for the future. The censorship of the stage, which was formerly too severe, and undeniable, that the Ministers resolved to bring before the Assembly, on Tuesday, a law forbidding the representation of any play, unless an authorisation should first be obtained from the Minister of the Interior. The submitted necessity of such a law prevented nearly all opposition, and it passed with a few dissentients only.

The *Moniteur* announces that the Minister of Marine has decreed a gold medal of honour to Captain Demson, of the American schooner *Jacob N. Eyeleus*, for having saved six seamen, who were separated from the French whaler, the *General Teste*, and for having carefully provided them with every necessary in the most generous and disinterested manner during thirty-four days.

ITALY.

Accounts from Rome, of the 17th ult., state that the committee of cardinals is busily occupied with the municipal and provincial laws and other reforms, which are to be published in terms of the *motu proprio* of Sept. 1849. These measures are being proceeded by an amnesty, from which about 100 persons are to be excluded, and which will be published in August. The treasury of the Papal Government is exhausted, and some surprise is expressed that the Government does not make use of the produce of the Rothschild loan still lying in Rome, and which has never been touched.

An attempt to assassinate M. Narduni, an officer of the Pope's Guards, has resulted in the capture of the assassin; but the discovery of a conspiracy among some political desperadoes in the Eternal City

From the Austrian territories in the Peninsula, we learn that the re-organization of the Lombardo-Venetian provinces has been completely settled as follows There are to be two Civil Lieutenants, one at Venice for Venetian affairs, the other at Milan for Lombardy. Both these Lieutenancies will be under the immediate control of the Minister. Each Lieutenancy has councillors. M. Togenburg is mentioned as likely to be named Lieutenant for Venice, and Count Harrig for Milan

UNITED STATES.

We have accounts this week from New York to the 17th ult.

The funeral of the late President Taylor took place on the 13th, and was attended by the leading senators and representatives of all parties. The occasion was honoured with appropriate and impressive solemnities; the military escort, commanded by the veteran General Scott, was composed of detachments of the United States troops, with a large number of volunteer militia companies from Baltimore and the district of Columbia.

In the principal cities of the Union the day was observed by suspension of business and suitable ceremonies.

The official list of the Cabinet (as changed by the new President) has not yet

been published, nor does it appear that all the selections have been made. In the absence, however, of official data, the following are said to be amongst the appointments likely to take place:—Mr. Toombs, of Georgia, or Mr Mageum, of North Carolina, as Secretary of War; Mr. John J. Crittenden, or Mr. Arthur F. Hopkins, as Attorney-General; Mr. T. J. M'Hennan, of Pennsylvania, or Mr. George Evans, of Maine, as Secretary of Treasury. Mr. James A. Pearce, of Mississipi, or Mr. King, of Georgia, as Secretary of Navy; Mr Winthrop, or Mr Webster, as Secretary of State. It is understood to be likely that the other seats in the Cabinet will be disposed of amongst the following gentlemen:—Governor Crittenden of North Carolina; Governor Morehead, of Kentucky, Messrs. Corwin, Baynard, Ingersole, &c.

On the 16th, in the Senate, a warm eulogium was delivered by Mr. Webster upon the character of the deceased magistrate.

On the 16th Mr. Webster gave notice of a bill to erect a monument to the President in Washington.

Strong hopes were entertained that the Compromise Slavery Bill would meet with the assent of the Senate at the Lower House.

It was anticipated that Congress would shortly adjourn on the question of a new cabinet and the policy of the President.

The late President, a few days before his death, had prepared a strong message to Congress, directed against the threatened invasion of New Mexico by Texas.

The alarm concerning the Indians at Brownsville, on the Rio Grande, is subsiding. The Brownsville papers state "Indians abound in large numbers, on both sides of the river, but as yet few outrages have been heard of."

Professor Webster's case was still undecided.

The hero of the fallen Roman Republic, Garibaldi, was expected to arrive in New York in the course of one or two weeks. He intends, it is said, to become an American citizen. Arrangements will probably be made to give him a reception worthy of his character as an exiled patriot.

On the 15th a daring attempt was made to burn the Astor-house Hotel, New York. It was discovered by the engineer of the Astor-house. It appears that Smith (the engineer) was in the cellar, and smelling smoke, endeavoured to find out from whence it came. Being unable to find anything of the fire in the cellar, he sent for Mr. Coleman, who soon ascertained that the smoke came from the cellar of Mr. Auguste Grandjean, and he at once ordered the door of Mr. Grandjean's store, No. 1, Barclay-street, to be forced open, when the store was found to be filled with smoke. Mr. Smith made his way into the cellar of the store, where he found a box filled with paper in a light blaze, and by the application of a bucket of water the fire was extinguished. An examination of the cellar showed that the fire had been kindled also under the stairs with some light wood, paper, and straw, but from some cause it had gone out. The box stood beside two barrels filled with loose paper, and covered over with loose straw. A short distance from these combustible materials stood three barrels filled with alcohol, and a few minutes would have sufficed to set those on fire, when they would have exploded beyond question, and none can foretell the consequences that would have ensued. Alexander Grandjean, a lad about sixteen or seventeen years old, the son of the proprietor, and Hugh Murray, his clerk, were arrested on suspicion of having set fire to the store, it being proved on the examination that they left the store a few minutes before the fire was discovered, and that there was no smoke in the place at the time they left. Grandjean was liberated on his giving bail in the sum of one thousand dollars, and Murray remained still in confinement

A telegraphic despatch from New Orleans brings the information that Texas is moving to assert by force the jurisdiction which New Mexico repels. Public meetings are held, volunteers are enlisted, and the Legislature is convened for August, so that the complaint which is to follow may have the benefit of the favourable season. It is quite probable that the invasion will take place even before the action of the Legislature. The very next intelligence from Santa Fe may be laden with the clamour and sanguine with the bloodshed of civil war.

INDIA.

Accounts from Bombay to the 25th of June, and from Calcutta to the 15th of June, have been received by extraordinary express, in advance of the Overland Mail. With the exception of the Nizam's dominions, which are in a disturbed state, tranquility continues to prevail throughout our Eastern possessions Sir Charles Napier will certainly leave India in October; this long circulated rumour is now published as a settled and unquestioned fact. Inquiries are to be instituted into the management of the Post-offices at Calcutta, Madras, and Bombay, with a view to their improvement. Mr. Stevenson and his engineering staff have arrived at Calcutta; but finding the plan of the Bengal railway agreed to by the London Board of the Court of Directors impracticable have proceeded to examine a new line, and to report thereupon, which must be transmitted to England for approval before the railway can be commenced. Among the deaths recorded in Indian papers are Captain Newbold, one of the most celebrated geographers in the East, and Doctor Larkworthy, whose exertions in endeavouring to stop the ravages of cholera are above all praise. The former had been ill for some time, but the latter was cut off by the disease, to which, in very many cases, he had been instrumental in eradicating or alleviating.

CHURCH, UNIVERSITIES, &c.

ETON COLLEGE.

"Election Saturday" (last), owing to the unfavourable state of the weather, did not witness the usual influx of company which, on this occasion, is usually drawn together on the Brocas. There was a good muster of old Etonians and friends of the present "young men," but the general company was much less numerous than is customary About an hour before starting the weather cleared up, and the crews, in high spirits, prepared for the encounter. At seven o'clock the boats were manned, each crew being distinguished by its peculiar costume; and after pulling to the Collier and back, they started for Surley Hall in due order, preceded by the band of the Royal Horse Guards.

On arriving at "Old Surley," the gentlemen partook of an elegant repast, which was prepared in a meadow on the opposite shore, each crew having a separate table, with its captain in the chair, and his banner suspended over it. After drinking the customary loyal and other toasts connected with the college, they started for Windsor, where they arrived at nine o'clock. A grand display of fireworks then took place, whilst the crews rowed several times round the eyot in admirable style; the bridge, wharfs, barges, and buildings commanding a view being crowded with spectators. The half-yearly examinations had taken place during the previous week. The examination was conducted by the Rev. H. Moseley, one of the Government inspectors of schools

The annual election speeches were delivered on Monday previous to the breaking-up for the vacation. The speeches commenced at eleven o'clock, in the upper school, which was crowded by personages of the highest distinction; amongst whom were the French Ambassador, the Austrian Minister, and his lady, Earl and Countess of Wilton and Lady Mary Egerton, Lord and Lady De Ros, Marchioness of Aylesbury, Lord Charles Bruce, General Sir F. Davie, M.P., Hon. and Rev Philip York Saville, &c.

After the delivery of the speeches, a large party of the nobility, clergy, and gentry, including the French Ambassador and the American Minister, dined with the King's scholars in the college hall; grace being chanted by Thackeray, Esq., assisted by the choir of the chapel. The hall was hung with ancient tapestry; the silver model of the college was displayed in the centre of the hall; and the tables, as usual, exhibited a proof of the munificent intentions of the Royal founder.

The Rev. E. Balston tendered his resignation as a Minister of King's College, Cambridge, late on Saturday last; and Ridler, the captain of the school, was, consequently, on Monday morning, appointed to the Fellowship; and he celebrated the event through the evening "—in ancient custom of ping-up the gown, performed by the provost. The school numbers 620; Drake captain.

ST. THOMAS'S CHURCH, WOOLWICH.

—This church, built in the ecclesiastical district of St. Thomas's, Woolwich, near the confines of the parish of the same name, in Southwark, was consecrated on Wednesday morning in due form by the Lord Bishop of Salisbury, for the Bishop of London, who was indisposed. The clergy of the district, including the Rev. Mr. Greenlaw (rector), Rev. Mr. Delamere (incumbent), officers of the Government departments, Sir Thomas Ulsher, Esq., and the whole body of the respectable inhabitants of the borough, were present. The Bishop of Salisbury concluded the service by preaching a most appropriate sermon. A collection afterwards increased the building funds £62. Subsequently, Sir Thomas Wilson, who has largely subscribed to the additional place of worship, and who generously presented the site on which the church is built, gave a *déjeûner* to about 150 of those who were at the consecration, including the right rev. the Lord Bishop The church has been raised by subscription; it contains open pews for the accommodation of 800 persons, and has cost about £4000

TESTIMONIALS.

—The following clergymen have lately received testimonials of affection and esteem:—The Rev. E. Parry, from the congregation of St. Clement's Church, Windsor, near Liverpool; the Rev. C. Roberts, lecturer at the United Church of St. Antholin and St. John the Baptist, Watling-street, from the congregation; the Rev. E. T. Adler, from the parishioners of Bungay, Suffolk, on his departure; the Rev. D. E. Donville, curate of St. Mary Church, near Torquay, from the congregation, to mark their sense of the manner in which he conducted the services of the church and the affairs of the parish, amid the very trying circumstances in which it was been placed by the secession of the vicar, the Rev. W. Maskell; the Rev. H. E. Dewey, curate of Handsworth, Warwickshire, from the parishioners; the Rev. Tyler Sherwood, late Curate of Lyndhurst, Hants, from the parishioners; the Rev. Henry Fry, Assistant Garrison Chaplain, at Birr, from some of the non-commissioned officers and privates of the 59th Regiment; the Rev G. Roberts, curate and evening lecturer, from the ladies of Limehouse; the Rev. Mackenzie Walcott, M.A., by the parishioners of St. Margaret's, Westminster, on his leaving that curacy.

PREFERMENTS AND APPOINTMENTS.

—The following appointments and preferments have recently been made:—The Rev. Edward Wyndham Tufnell, rector of Beteningstoke, Wilts, and a rural dean, has been collated to the prebend of Major Pars Altaris, anciently founded in the Cathedral Church of Sarum, void by the death of the Rev. Canon Bowles; and on Sunday last he took his seat and read himself in during the morning service at the Cathedral. The Rev Robert Edwards Hankinson, to the consolidated rectory of Inlesworth, and the vicarage of Chedlston, in Suffolk; the Rev. Scott F. Surtees, to the rectory of Banham, Norfolk; the Rev Vernon George Guise, to the vicarage of St. Mary Beedin, Canterbury; the Rev. George Ornsby, to the vicarage of Fishlake, Yorkshire

VACANCIES.

—Perpetual curacy —Harthill, county and diocese of Chester; value £114, with residence; patron, T. T. Drake, Esq.; Rev. W. Vawdrey, deceased. Curacy—Knightsbridge St. Paul, Middlesex, diocese of London; patron, Rev. W. Bennett.

CHESS.

TO CORRESPONDENTS.

H M, Lords—Ingenious, but not at all difficult. A little more experience in composition will enable you to produce something worthy reporter, we are quite sure

AN OLD SUBSCRIBER—The solution of the beautiful Enigma No 502, by R H G, is—1. Pawn to K 8th (= P takes R (new). 2. R to Q 8 (ch) 2 Anything; 3. B to Q 5 (mate).

A P—A player on Castle after his King has been in check, but not after the King has been moved.

STUDIOUS—We have not space to answer to the whole, but we consider the following works of the old masters especially commendable to every amateur of the game:—1. "Libro da la Invencion chiamal Arte del Juoco dal Axedrea," of Hay Lopez, 1561. 2 "Il Giuoco degl i Scacchi," of Salvio 1723 3. "Il Giuoco degli Scacchi" of Carrera, 18 7 (Translated by Lewis). 4 Greco's brilliant Treatise, also translated by Lewis 5 The famous work of Ercole del Rio, with the elaborate commentary by Lolli 1763 6 "Il Giuoco degli Scacchi," of Ponziani, 1769. 7 "Il Giuoco degli Scacchi," of Cozio. 1766.

PAOLO The richest and rarest collection of MSS on the game of Chess will be found in the library of the British Museum, and in the National Library at Paris. There are some few, also in the Ambrian, at Oxford in the Vatican, at Rome; in the Libraries of Dresden, Florence, Lisbon, Naples, Strasburgh, Turin, and the College Royal of Toulouse. See the "Literatur des Schachspiels" of Anton Schmid, published in Vienna, 1847

JUVENTUS—In your article on the Problem you may introduce as many Queens, or Knights, or other pieces as you please; but we should recommend you never to exceed the ordinary complement

DR NEEDWOOD should have repeated his Solutions if he wished them re-examined. His correct copy as we preserve the hundreds of letters which are sent to us every week

CAIRSA—Too simple by far | J A W—By all means

AN OLD SUBSCRIBER—There are so many ways in which Mate in two moves may be effected on the diagram you have forwarded, that we have not time to enumerate them It must suffice to say that White may claim a Queen *for any one* of the three advanced Pawns, and give Mate on the next move, or he may take the Black P (ch), and then play the Rook a Pawn to Queen, giving Mate

W G, Beverley—It shall be duly examined.

H T, Tunstall—Full of promise; but as occasionally have some other specimens.

J C B Problem No. 497 is perfectly correct; you omit to observe that if white play as you propose, the Black R R Pawn may take his K's Bishop

F P, Newport—See the preceding number for G E. B.'s Problem which can be solved in less than the stipulated number of moves is comparatively worthless

R B W—the last is pretty, but very obvious: your former one shall appear in a week or two

J O W—In your former diagram the P at Black's R B 3d was omitted. Even with the amendment the position is not by any means up to our standard

CELESTIES—Each cannot move his Pawn as you propose, it being stopped by the White Pawn Observe the direction in which the B and R Pawns are going

SOLUTIONS OF PROBLEM NO. 338, by H B T and A R A, are correct.

SOLUTIONS OF PROBLEM NO. 339, by R B T and A R A, are correct.

DR NEEDWOOD, R B T, Dr. FIELD, J A W, BELLAMY, C A M, DERNTON, R B W, B A Q, F G R, M F, MITRE, SOLON MILES, are right. All others are wrong.

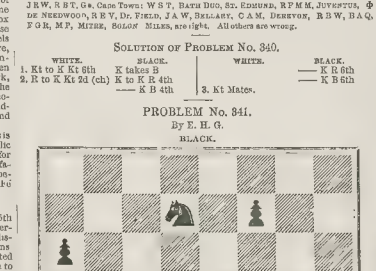
SOLUTION OF PROBLEM NO. 340.

WHITE.	BLACK.	WHITE.	BLACK.
1. Kt to K 4th	K takes B	——	K B 6th
2. R to K Kt 2d (ch)	K to K R 4th	——	K B 6th
——	K B 4th	3. Kt Mates.	

PROBLEM No. 341.

By E. H. G.

BLACK.



WHITE.

White to play, and mate in four moves.

SECOND MATCH BY CORRESPONDENCE BETWEEN THE CHESS CLUBS OF LONDON AND AMSTERDAM.

WHITE (London),	BLACK (Amsterdam).
12. P takes P	
	Amsterdam to play.

CHESS IN KENTUCKY.

(Scotch Gambit.)

The two following games are part of a Match played at Louisville, between Mr. B. B and Dr. R., two well-known amateurs in "the States." Dr. R. engaged to play in each game a particular variation of the Scotch Gambit.

WHITE (Dr. R.)	BLACK (Mr. B. B.)	WHITE (Dr. R.)	BLACK (Mr B. B.)
1. P to K 4th	P to K 4th	17. Q to K Kt 3d	B takes Q B P
2. K Kt to B 3d	Q Kt to B 3d	18. Q Kt to K B 3d	Q to K R 4th
3. P to Q 4th	P takes P	19. Kt to K R 4th	Q to Q B 4th
4. K B to Q B 4th	K B to Q B 4th	20. P to K B 4th (g)	B to K B 4th
5. K Kt to K t 4th (a)	K Kt to R 3d	21. Q to K Kt 5th	R to K B sq
6. Kt takes K B P	Kt takes R	22. P to K Kt 4th	P to K R 3d
7. B takes Kt (ch)	K takes B	23. Kt takes B (ch)	R takes Kt
8. Q to K R 5th (ch)	P to K Kt 3d	24. Q to K 4th	P to Q 4th (dis ch)
9. Q takes B	P to Q 3d (b)		
10. Q to R 3d (c)	R to K sq	25. K to Kt 2d	Q to Q 4th (ch)
11. Castles (d)	R takes P	26 K to R 3d	R to K B 2d
12. Q to K B 3d (ch (e)	Q B to K B 4th	27. B to Q 2d	Q R to K sq
13. Q Kt to Q 2d (f)	K R to K sq	28 Q R to K sq	Q R to K 7th
14. Q to Q Kt 3d (ch)	K to Kt 2d	29. B to Q B 3d (ch)	K to R 2d
15. P takes Q Kt P	Q to Q 2d	30. R takes R	P takes R
16. Q to Q Kt 3d	Q R to Q Kt sq	31. R to K sq	R takes K B P
		And White surrendered	

(a) The variation wh ch Dr. R agreed to adopt throughout the match, is that wh ch contains in embryo the game with the above first five moves

(b) It may be instructive for the student to compare the results of this mode of play, which is that usually adopted in the present opening, wi h the consequences spr ng nc from the new move later imported from St Petersburgh, namely, P to Q 4th. He will find the variations, which are much too copi ous for our space, set forth at length in an interesting ar ic e, by the great Russian player, Jaenisch, published in the July number of the *Chess-Player's Chronicle*

(c) The customary play is Q to bar Kt 5th.

(d) Any attempt to preserve the King's Pawn now would be perilous to White.

(e) This move serves to enable Black to bring out his forces. P to K B 4th would have been far superior

(f) He might first have played the B to K B 4th. (g) Most objectionable.

BETWEEN THE SAME PLAYERS.

(Scotch Gambit.)

WHITE (Dr. R.)	BLACK (Mr. B. B.)	WHITE (Dr. R.)	BLACK (Mr. B. B.)
1. P to K 4th	P to K 4th	15. Q Kt to R 3d	B to K h 5th (ch)
2 K Kt to B 3d	Q Kt to B 3d	16. Q to Ler 3d	Q takes K P
3 P to Q 4th	P takes P	17. Q takes Q	R takes Q
4 K B to Q B 4th	K B to Q B 4th	18. Kt to Kt 6th	K to K 7th
5 K Kt to K t 5th	K Kt to K 2d	19. P to K R 3d	B to K B 4th (c)
6. B takes K B P (ch)	Kt takes B	20. K R to K B 2nd	K R to K sq
7. Kt takes Kt	K takes Kt	21. B to Q 2nd	B takes Q B P
8. Q to K R 5th (ch)	P to K Kt 3d	22. P to Q Kt 4th	P to Q Kt 4th
9. Q takes B	P to Q 3d	23 Q R to Q B sq	R takes K R
10. Q to Q R 4th (ch)	Q B to K 2d	24. K takes B	R to Q 6th
11. Q to K 2d	K to Kt 2d	25. R to Q B 3d (ch)	K to Kt sq
12. Castles	K R to K B sq	26. R to K sq	R takes R
13. P to K B 4th (a)	Q to K 2d	27. K takes R	Kt to Q sq
14. P Kt to Q 3d	Q R to K sq		

The game was prolonged for some time yet, but was finally won by Black.

(a) White has a better opening than in the preceding game

(b) R to Q 4th would also have been good ones

(c) Black has every poss n p sy, while his opponent's Q's Rook and Bishop have never once come into action.

CHESS ENIGMAS.

No. 503.—By Messrs. KLING and HORWITZ.

White: K at Q Kt 4th, R at K R 4th.

Black. R at Q Kt 7th, R at Q B 6th, P at Q B 6th.

White, having the move, can draw the game.

No. 504. By CAISSA.

White: K at K B sq, R at K 2d, Bs at K B 5th and Q Kt 6th; Ps at K Kt 5th, K B 3d, Q B 2d, and Q Kt 2d.

Black: K at Q 5th, R at Q B 4th; Ps at K Kt 2d, K B 5th, K 2d, Q 3d and 4th, and Q B 6th.

White to play, and mate in four moves.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

A new class of Sunday letter-carriers has been discovered: some of the passengers, when they arrived at Southampton on Sunday last, by the excursion train from London, immediately sent off two carrier pigeons, with notes announcing their arrival safe from railway accidents. The pigeons, as soon as they were let go, ascended over the town of Southampton, and for a few moments they kept darting towards all points of the compass, but at last, true to unerring instinct, flew off rapidly in a north-easterly direction towards the metropolis

The new Sunday postal regulations have ingeniously multiplied human labour on the Sabbath day. All the common carriers sending their goods by railway were in the habit of having duplicates of their bills of parcels by post, and it often happened that half a dozen of these duplicates were delivered, in various towns in the kingdom, by a single postman. It is necessary that these bills of parcels should be delivered on Sunday in order that carriers may commence work at five or six o'clock on Monday morning. Since the late postal regulations, the carriers have had these duplicates sent by rail, and every Sunday all the carriers are obliged to send each a man to fetch them, so that it often happens that where one postman was formerly employed on Sundays, six carriers' servants are now employed instead.

The iron steam-ship *Viceroy*, which sailed from Galway lately and was last off Seal Island, on the coast of America, has been abandoned. Several attempts had been made to rescue her, but unsuccessfully, and her hull has been advertised for sale

It is reported that the banks of the St. Lawrence, at the falls of Niagara, were in a very precarious state and threatened to give way

The accounts from the western districts of the United States, as to the spread and fatality of cholera, are very discouraging. The cities of St. Louis and Cincinnati, as on the former occasion, appear to be most severely visited. The epidemic is also raging throughout the countries of Texas and Mexico.

From 17th of May to 16th June there were 7846 cases and 2700 deaths from cholera in the city of Mexico Later reports say 1000 die daily. In San Luis Potosi there have been 900 cholera deaths; but in Zacatecas the cholera is declining

The Cuban question has assumed a more definite and satisfactory aspect. A Washington correspondent of the *New York Courier and Enquirer*, under date the 13th July, says: "The assurances which were recently communicated by General Campbell, that the Cuban prisoners will be released after certain formalities, had been fulfilled. Despatches were received here this morning per post captain M'Keever, of the United States frigate *Concord*, dated the 8th inst., stating that the Cuban authorities had promised to give up their prisoners in the course of a few days."

Havre advices of the 28th of June report the probability of the invasion of St. Domingo to be doubtful. Soulouque professes to desire peace.

Carthagena (Central America) accounts of the 22nd of June enlarge upon the expulsion of the Jesuits from that quarter Santa Anna, the Mexican revolutionary chief, still remains a resident, and has become a great money dealer

The Pope's return to Rome has just been celebrated in grand style in the city of Mexico

The *Mary William*, Dublin steamer, on her way up the river, on Saturday morning, about daylight, ran down the *Union* brig, in ballast, bound to the north, about half a mile below Grays pier, where her wreck now lies sunk. One of the crew of the *Union* was drowned from the forepallant yard, by the collision, upon the deck of the *Royal William*, and killed.

A scene is related to have occurred lately week in the Wesleyan Chapel, at Wellington, Salop. The minister refused to grant the wishes of a couple to stand before the altar and be married by the Wesleyan minister The registrar claimed a right by law to say who the ceremony should be performed by, irrespective of the minister, the chapel having been gazetted as a legal marriage house. The minister persisted in his refusal, and placed an additional padlock on the door; this was broken and the ceremony performed, the regular minister protesting and threatening an action for trespass.

In Great Britain, in the year ending 5th January last, the quantities of soap made numbered 1,405,834 lb. of mottled soap; 178,543,868 lb. of other hard soap; and 17,447,581 lb. of soft soap. In the year, 1849-50, 1b. of hard soap, and 4608 lb. of soft soap were imported into Great Britain from Ireland, during the year which was 61383 lb. 3d. There were only 7 convictions for defrauding the revenue. The number of licenses granted to soap-makers was 228, of which 192 were resident in England, 23 in Scotland, and 153 in Ireland

On Sunday afternoon, the residents at Thames Bank, Vauxhall-bridge-road, were alarmed by loud shrieks and cries for help issuing from the river; several boats put off, and five persons who had become immersed were rescued from the party recovering from their fright. It was found that a Miss Ashton, who had been married that morning to Mr. Harper, of 19, Little Deanstreet, Southwark-road, and whose wedding excursion it was, had been drowned, and though search was made for the body, it was not recovered. The accident arose from the unskilfulness of the parties in the management of the boat.

According to a paper printed by order of the House of Commons, on behalf, the estimated expense of the monument to be erected in Westminster Abbey, to the late Sir Robert Peel, is £2250

The *Manchester Guardian*, in noticing the great high church meeting held in London on Tuesday, week says, "The body of the hall was crowded with clergymen and *lawyers*." The paragraph had been transmitted "per electric telegraph," and no doubt the wires had metamorphosed "laymen" into "lawyers."

We learn, says the *John O'Groat Journal*, from a gentleman who has perambulated the greater part of the counties of Sutherland and Caithness during the last few weeks, that the prospects of the sportsmen are very cheering. We do not know how to account for this, unless the wet spring has affected the young birds."

On Wednesday, the 24th ult., the parishioners of St. Margaret's, Westminster, presented a very handsome richly chased salver to the Rev. Mackenzie Walcott, M.A., of Exeter College, Oxford, on his relinquishing that curacy

The Dean and Chapter of Ely have put forward a renewed appeal to the public for funds towards the restoration of their magnificent cathedral

The Society of Old Brothers in Arms of the Empire, at Antwerp, have recently offered to the President of the French Republic the title of honorary member of that. It is stated that the society Lave received a letter from Prince Louis Napoleon in which he accepts the title offered him.

The Ministerial white-bait dinner takes place at the Trafalgar, Greenwich, on the 30th, and not on the 3rd inst., as before announced

Several alterations are about to be made with respect to the Lincoln Minister choir. Instead of four supernumeraries, for the future there are to be two, with salaries increased, who are to attend daily service. The singing boys are to be chosen out of the National School, and placed under the direction of Mr. G. Brook, one of the lay vicars. A new organist is to be elected shortly, and Mr. Skelton, who has filled the office for a great number of years, retires with a continuance of his salary for life.

The Dutch Government has received intelligence from Bahonia, one of the Moluccu islands, of a series of frightful earthquakes having occurred during the days, and committed great ravages. They were followed by a violent eruption which carried off a great many of the natives and most of the Europeans. A young man, who had recently arrived in the island from Holland, as an *employé* of the third class, suddenly found himself, by the death of all his superiors, the first official, and as such, he had to undertake the duties of governor.

It is stated in a letter from Simlin, of the 20th, that Mr. Fonblanque, Consul-General of England in Servia, had struck his flag, and had sent a letter of complaint to the Pacha of the fortress, in consequence of the Servian police having inflicted some punishment on his domestic—an act which he represenes to be a violation of his privileges

The Madrid *Gazette* publishes a Royal decree, granting various commutations of sentences of confirmed prisoners. The decree states, that, notwithstanding the disappointment of the hopes of her Majesty of an heir to the throne, she is not willing that it should destroy the intention which she had entertained of performing an act of clemency on the occasion of the birth of an heir to the throne, and she is happy to make this decree her first mark of submission to the will of Providence

A few days ago some strawberries were gathered from the garden of Mr Jenny Burns, at the west end of Cottenham, six of which weighed six ounces, and one of them an ounce and a half, and measured seven inches round. They were as delicious in flavour as remarkable for size. Mr. Burns has been long known for his successful cultivation of strawberries

A fire, supposed to originate in the act of an incendiary, was discovered to be raging on Sunday morning last, about one o'clock, on the farm premises of Mr. Tapping, near Stoke. A messenger was despatched, shortly after its outbreak, for the Aylesbury fire-engine, which was speedily on the spot. On its arrival, however, there was but a very scanty supply of water, and the flames were not got under until a barn, containing a thousand trusses of straw, and other outbuildings, besides a rick of hay, were totally consumed. The property was insured

On Sunday, the Bishop of Norwich preached a sermon at the ancient church of West Ham, Essex, to a very large congregation, in aid of the funds of the Royal General Asylumy Society. His Lordship pointed to the circumstance of there being no less than 121 applicants for admission at the forthcoming election, while the committee were unable to admit more than nine. The sermon had the effect of producing a liberal collection at the doors.

On Thursday night week, about half past eleven o'clock, Mr. Swift, of Bank Farm (Sawtield), when returning home from Wortley, discovered a large haystack belonging to Mr. John Hobson, farmer, Town End, enveloped in flames. The stack was one of last year's growth, containing from twelve to fourteen tons of excellent hay, a portion of which was fortunately saved. There is reason for supposing that the stack was maliciously fired. The property was insured in the North of England Insurance Company

In the conflagration at the city of Philadelphia on the 9th ult., which we noticed last week, property to the amount of a million dollars was destroyed. 367 houses were consumed. There were 19 bodies found dead amidst the ruins. Three persons died in hospital from the effect of injuries received; 15 were still missing; and about 90 were more or less wounded.

The Madrid journals of the 21st ult. state that the Queen had ordered nine days' mourning for the Duke of Cambridge.

OPENING OF THE ROYAL BOTANIC GARDENS, PLYMOUTH.

OPENING OF THE PLYMOUTH ROYAL BOTANIC GARDENS.

Plymouth and its environs present some grand and picturesque attractions for the lover of nature and art. The Breakwater, as a miracle of man's constructive skill; the Hoe, as the finest marine walk in England; and Mount Edgecumb, with its fairy-like grounds, fully attest this pre-eminence. Yet, strange to say, with these allurements, visitors have been known to complain of *ennui*; and residents have joined in desiring some public resort, where the *élite* might enjoy themselves in a rational manner, and where intellectual improvement and entertainment might be sweetly blended. This desideratum has, at length, been supplied, not, however, by public exertion, but by the unaided labour of Mr. Rendle, who has just completed a large and important establishment, designated "The Royal Botanic Gardens," which was opened with great *éclat* on Tuesday.

The grounds are very judiciously laid out and planted, so as to combine the scientific advantage of a "Botanic Garden" with the delights of an archery field and pleasure promenade.

The accompanying view (from a Sketch by Mr. Jewitt, of the Plymouth Public Library) shows its principal features, as a castellated structure, a large and tasteful fountain, and an orchestra handsomely embellished, and covered with a hood-shaped roof of corrugated iron.

The opening day was extremely auspicious; the sun shone brightly, and there was not a cloud either in the sky above or in the faces of those who came from all quarters to witness the inauguration. The Gardens were crowded to excess. The bands of the 23d Royal Welsh Fusiliers and the Royal Marines were in attendance, and played some of the most popular pieces from Auber, Donizetti, Verdi, Jullien, &c., in good style. We must not omit to mention the Horticultural show, which consisted of beautiful flowers of all descriptions, that had been put in competition for several prizes.

At about half-past five the Nepaulese Ambassador and suite visited the gardens. His Excellency General Jung Bahadour, Commander-in-Chief and Prime Minister of the Court of Nepaul, Colonel Jugget Shumshere Jung, Colonel Dere Shumshere Jung, attended by Captain Cavenagh, Captain James, and all his suite. They were received with much cheering, and a salute was fired by the gunners. They visited the tents of flowers, and were particularly struck with their beauty. His Excellency was much pleased with the experimental balloons, discharging their signals.

The gardens were attended by upwards of 6000 people of the highest respectability.

EXTENSION OF THE BIRMINGHAM RAILWAY TO BLACKWALL.

Last week, one of the most important works on this line, at the point where it crosses the Great Northern Railway, in Copenhagen-fields, fell, and was reduced to the ruinous appearance shown in the Illustration. The viaduct was nearly 40 feet high; and the centre, or, as it may now be termed, the standing arch, is 60 feet span. From the unforeseen difficulties which the peculiar character of London clay presents to works of this nature, the bridge in question never seems to have acquired a firm position, but was observed to have always had a disposition to "twist." Happily, it has fallen without any accident to those engaged about it.

California.—The following is a copy of a letter received at Lloyd's from their agent, dated San Francisco, June 1, 1850:—"Sir,—I beg to call to your attention a regulation lately passed here, prohibiting the importation of convicts into this state under very heavy penalties. As this law is principally aimed against vessels bringing passengers from the penal settlements of Australia, and will be enforced within thirty days from the date of publication, I fear that many of the vessels bound to this port from our Australian colonies may become involved in difficulties in consequence, as it is well known that many convicts have been brought here by these vessels. Some disturbances have taken place in the southern mines, in consequence of a heavy tax on foreigners 20 dollars per month. By the last steamer a commission has arrived from the States to investigate matters connected with the custom-house department here. Several salmons of British vessels in the employ of the Hudson's Bay Company are reported to have been made in Oregon. The charges to which vessels are subject at this port are so heavy that shipowners should in all cases provide them with funds for the payment thereof, it being extremely difficult to raise money here on bottomry or otherwise, owing to the high rate of interest. Many vessels not furnished with sufficient means to defray the heavy expenses incurred here will either be sold or detained until funds are remitted by the owners. There are now about 600 vessels in port, and about 1000 vessels more are expected in the course of the year; prices of ships, particularly large ones, rule very low in consequence. Seamen's wages are now from 75 to 100 dollars per month; and will remain high until the approach of winter. The export of gold continues to increase, being now upwards of two millions per month. This steamer has this quantity on board; and the total export during the year will not fall far short of forty or fifty millions of dollars. A safe harbour has lately been found to the southward of Trinity Bay, called Humboldt Bay, and which will probably soon become an important port on this coast. A settlement is being formed there, as well as at the mouth of Thast, or Trinity-river, as it is now called. One of these harbours will probably be made a port of entry, and being in the vicinity of rich gold mines will soon acquire importance. I have the honour to be, &c. (Signed), Lloyd's Agent. To Captain George A. Halstead, R.N., Secretary of Lloyd's, London."

Non-delivery of Letters on Sunday.—Mr. J. Irving Scott, the secretary to the metropolitan movement, which has been organised for the purpose of restoring to the community a delivery of letters and newspapers in the country on Sunday, has received the following important letter from Mr. Locke, M.P., who has taken so prominent and active a part against the absurd Sunday postal restriction: "London, 11, Adam-street, Adelphi, July 26, 1850. Dear sir,—The commission appointed by the Crown for reconsidering the Post-office question has commenced its labours, and I am told that it is ready to receive an memorials or statements of hardship arising out of the present question from any quarter. I think it right, therefore, to urge on you to lay before the commission all the information you can obtain, and induce others in all quarters to do the same. The secretary of the commission is Sir Alexander Gordon. I am, dear sir, yours truly, Joseph Locke." It will be seen by the above how necessary it is that the opponents of the measure should lose no time in carrying out the wishes of the honourable member for Honiton.

Crime and the Sunday Postal Regulations.—The following recital, taken from the *Banbury Guardian*, strikingly illustrates the mischief of the late Sabbatical postal derangements: On Saturday last, Thomas Dyke, coal-dealer, of Banbury, when returning to that place from Fenny Compton wharf, in company with two men strangers to him—who had joined him on the road, and whom he had treated to ale and tobacco at a public-house, was violently attacked by them about half-past nine o'clock, when they had reached a point of the road about four miles from Banbury, and within a few yards of the spot where last year Leyton shot his wife and cut her throat. One of them struck him with something that appeared to him like a hammer; he became insensible, and, on recovering consciousness, he found he was lying under a hedge in a field adjoining the road, where he was found, put into a cart, and conveyed home. He had been robbed of a patent lever watch, a steel chain, a steel key, two brass keys, and a silver coin. They also took from him some silver. That they meant to murder him, and believed they had done so, there is little doubt; for as they had travelled miles together he would have had no difficulty in recognising them if left alive. The wounds he received were very severe; there is one on each side of his face near the temple, about two inches in length, and there are several others on his head. He is, however, likely to recover. Hand-bills describing the men were immediately printed, but, in consequence of the stoppage of the Sunday mails, they could not be circulated to any distance until the next day. It was most important for the ends of justice that the information should reach distant towns early on Monday morning, when an attempt would probably be made, at some or one of them, to dispose of the watch, and the detention of the men might have been effected. It is not many years since a robbery took place upon the same road, hand-bills were posted on the Sunday, and on Monday morning the highwaymen were taken; they also would probably have escaped, as these men have done, had the regulations of the present time then existed.

Removal of Mr. Smith O'Brien from Maria Island.—Mr. Smith O'Brien is to be removed from Maria Island to Port Arthur, where arrangements are now being made for his reception. The staff attached to the former residence of Assistant-Commissary-General Lempriere is to be his dwelling-place. A platform in front is being erected as the post of a military sentinel; and it is understood that intercourse will be restricted to the visiting magistrate, the superintendent, officer, and sergeant of the guard.—*Hobart Town Courier*.

Sale of the Marquis of Exeter's Property, Strand.—On Tuesday, Messrs. Driver put up to auction, at the Auction Mart, the valuable freehold property belonging to the Marquis of Exeter, called and known as the London Estate, and which comprised a large number of extensive buildings situate in Wellington-street North, Exeter-street, Catherine-street, Burleigh-street, Brydges-street, Strand, and Exeter-passages; among the spacious edifices being the Lyceum Theatre and Exeter-Change. There was a full attendance of capitalists, among whom there was a very active competition for the various lots. The estate was stated to produce rents amounting to about £5000 per annum, but of the estimated rental, when the whole is in possession, of upwards of £8000 per annum. The auctioneer said that the property had been in the possession of the family of the Marquis of Exeter since the year 1666, when it was first held by Lord Burleigh, treasurer to Queen Elizabeth. There were 44 lots, which were offered in one lot, but upon that there was no bidding, when they were disposed of in separate lots. The day's sale comprised 24 lots, which produced a rental of about £3030 per annum, but which was of the estimated total value of about £4000 at the expiration of the present leases. Lot 1, at £310 per annum rent, went for £4900; lot 3, rent per annum £333 12s., disposed of for £6900; lot 5, annual rental £130, fetched £2680; lot 17, rent per annum £70 went for £1350, &c. The day's sale realised about £68,000.

FALLEN RAILWAY ARCHES IN COPENHAGEN FIELDS.

SCENE THE LAST FROM "LA JUIVE," AT THE ROYAL ITALIAN OPERA.

ROYAL ITALIAN OPERA.

At the second representation of Halévy's "Juive," last Saturday night, although Mario was able to appear for the first time as *Lazaro*, he still laboured under such severe indisposition that he merely walked through the part, and sang with evident languor. Formes, who had left his bed to play at the opening performance, was replaced on Saturday by Zelger, who has frequently enacted the *Cardenal* in Belgium, and at Drury-lane Theatre, in 1846, with the Brussels company. On Tuesday night the execution of the opera was undisturbed by any contrariety, and the amateurs were enabled to judge of the efficiency of the cast. The opera was received from first to last with the greatest enthusiasm. Viardot, Mario, and Formes were recalled at the end of the first act; Viardot, Tamberlik, and Mario, at the termination of the second act, were twice summoned for ovations; and Viardot and Mario were compelled to appear after the fall of the curtain, the *Rachel* by name and by

PANORAMA OF CONSTANTINOPLE AND THE DARDANELLES.—THE SUBLIME PORTE.—(SEE NEXT PAGE.)

nature of the opera receiving a continuous shower of *bouquets*. The triumph of "La Juive" is now beyond a doubt, and the opera will gain upon every rehearsing. As the music of the composer becomes more familiar to the ear. The pieces that now make the greatest impression are the cavatina of the *Cardinal*, "Se pel rigor," with its exquisite orchestral and choral under-current; the serenade of Tamberlik, "Lontan dall' amate," the double quartet of the drinking chorus, "Ecco il vino," always encored, and so admirably sung by Mariali, Mei, Soldi, Romani, Zelger, &c.; the finale of the first act, with the solos of the two tenors and soprano; the duo between Viardot and Tamberlik, and the trio finale with them and Marini in the dungeon scene of the *Cardinal*, in the third act; the duo between Mario and Fornes; and the grand scena of the former in the first scene of the fourth act, and the concluding trio *finale* at the place of execution. Overscored as are many portions of the accompaniments by the free use of the brass and percussion instruments, the instrumentation is, on the whole, remarkable for elegance and appropriateness to the dramatic situation. As in all works of the French school, the tune and polka-measurers will complain of the want of catching themes; but those amateurs who examine carefully the poem of Scribe, and analyse the intentions of the composer, will be forcibly struck by the consistency and coherency of the whole work. The terrible picture of religious persecution in the middle ages is wonderfully realised both by poet and composer. Halévy has sacrificed nothing to vulgar stage effect; he has not sought, by reiteration of a common-place motif, to conceal poverty of ideas; on the contrary, he more than avoids the reproach of displaying over-fecundity, for, out of the innumerable melodious phrases flowing throughout the opera, there are the materials to manufacture shoals of modern ballads. Halévy's "Juive" is a masterpiece of its class, even if that class be not the first in lyric composition. It is no deprecation of its manifold beauties to state that it is not equal to the "Roberto," "Huguenots," and "Prophète" of Meyerbeer, that it does not approach the "Don Giovanni" of Mozart; that it does not eclipse the "William Tell" and "Semiramide" of Rossini. It is not because there are higher standards of art, "La Juive" is to be underrated, and the genius of Halévy be quest ioned. If we are to have but one school of art and painting, the sooner national galleries are closed the better

Splendid as was the singing of Mario on Tuesday, in the Passover scene, and in the slow movement of the grand scena, in the fourth act, "Rachele, ah quando a me," he has not yet realized expectations as to his general delineation of the Jew *Lazaro*. The first great mistake is in the making-up of the head. The face is not furrowed as it should be by the wrinkles of age and cunning, and he looks more like Leo Hebrew than a Jew father of Shylock's time. Mario's tone, and his gait is too steady for the restless, suspicious *Shylock* of Constance. Mario does not give vent to the malicious passions of *Lazaro*; he is much too tame and inanimate in the telling scene of the first act, and in the effective trios of the second act. That the popular tenor will improve in the part, there can be no doubt; everybody recollects how he played *Raoul* and the *Prophète* the first times, and how acute those characterizers are to his general delineation of his hearers may never have heard Duprez in *Lazaro*, yet Maralti's copy of the great Parisian *artiste* was sufficiently vivid to make the Royal Italian Opera visitors aware how the Jew should be depicted; and in fact is a fact that Mario, who, if he have the will, has unquestionably the intellect and power, to render *Lazaro* one of his finest creations. The *Rachele* of Viardot is the very character she assumes. As in *Fides*, as in *Valentine*, she has stamped the part of *La Juive* with her marked individuality. Her first great display of tragic power is in the duo with Tamberlik, when *Rachele* learns that *Leopoldo* (*Samuel*) is a Christian. Her imploring tones in the trio, in which she pleads for mercy for her lover, were exquisitely beautiful. The denunciation of *Leopoldo* was withering in passionate scorn -the whole frame of Viardot was convulsed with powerful emotions. But the triumph of her histrionic genius is in the march to the place of execution. When *Rachele* hears the dreadful death chants of the church, she exclaims "Padre mio, qual tremore." Viardot's deportment and manner of crossing the stage to cling to *Lazaro* at this awful moment must be seen to be appreciated; the profound stillness and attention throughout the house proved the thrilling sensations that her acting had produced. The entire portraiture is one of deep and intense eloquence as regards vocalisation, and of surpassing skill, intelligence, and pathos in the acting. The *Cardinal* of Formes is most magnificently sung and acted; and we do not believe it possible that the excommunication to be without a flaw. The *Leopoldo* of Tamberlik is rendered with such artistical skill and vocal power as to command the applause of his audience, if the disagreeable manner of Tamberlik be overlooked. Masoli, Polonini, and Rommi do good service in the secondary parts; and if Madame Castellan had been the *Princess Eudoxia*, instead of Mille. Veru, the cast would have been unexceptionable. The dancing of Louise Taglioni and M. Alexandre, in the Pas de i nveurs, is deservedly applauded.

The *mise en scene* is the theme of universal admiration. The costumes are magnificent, and are historically correct in the minutest detail. The procession in the first act—the *Emperor's cortège*, with civil, military, and ecclesiastical authorities—is admirably managed. Grieve and Telbin have surpassed all their former scenic displays in this opera, particularly in the view of Constance and the Minster, with the ancient streets in the foreground, the gardens in which the *Emperor's* banquet is given, for extent of stage never approached, and the grand square, filled with the vast populace, and the city in the distance, where the *Jew* and *Jessea* are left to re-enter. *Ode (la Illustrazione)* is also charming in all these scenes, and the general stage business, under Mr. Harris's direction, are worthy of every praise. Since the first night the opera has been curtailed, and it plays under four hours.

On Thursday "La Juive" was repeated, for the fourth time.

PANORAMA OF CONSTANTINOPLE, THE BOSPHORUS, AND THE DARDANELLES

THE "City of the Sultan" has often found a panoramic representative: but we question if ever one so efficient as the painter of this picture, Mr. Thomas Allom, advantageously known to the public by a series of superb illustrations of Constantinople, from his pencil.

The present Panorama, established at 309, Regent-street (adjoining the Polytechnic Institution), is divided into two parts, the first showing the Bosphorus, the Dardanelles, and the exterior of the city; and the second conducting the spectator into the interior of the city, where various features of Turkish life, such as the bazaar, the bath, and the seraglio, are displayed.

The architectural portion of the pictures, as well as the landscape and marine scenery, is ably drawn, and the colouring is highly successful. We have engraved part of the second picture, thus described:—

"THE SUBLIME PORTE.—The principal entrance to the palace of the Sultan, like our St. James's, gives its name to the diplomacy that emanates from the administration. A solemn, serious, nearly unadorned stone gateway, with semi-columns in the jambs, and crowned by a pointed arch, is not in accordance with our notions of the word sublime, and would seem more suited to an hospital or a barrack than a palace; but the rich, yet soft, grey stone colour of the whole is well calculated to give effect to the highly-decorated fountain in front, with its immensely projecting roof, that reminds us again of the skill and knowledge in construction which seems never to fail with the Turks, whether for the simple over-hanging residence of humble individuals, the sumptuous bath-room, the more stately religious edifice, or their military fortifications, or the tapering shafts of their minarets. The form of this and other fountains is not unlike Indian and Cochin Chinese work-boxes that we have seen; and the coloured ornaments, red, green, and gold, with the varied arabesques, strongly remind us of the tombs of King Henry III. and of Queen Eleanor in Westminster Abbey, by artists brought to England by Edward I., on his return from the Holy Land. The various figures attendant on the palace, and others seeking water at the fountain, by their varied and picturesque costume, assimilate buildings in such striking contrast."

Even in the present multiplicity of panoramas, Mr Allom's must be estimated as a very attractive addition.

LITERATURE.

ANECDOTES OF THE ARISTOCRACY, AND EPISODES OF ANCESTRAL HISTORY. By J. BERNARD BURKE, Esq. (Second Series.) 2 vols. Hurst and Blackett.

IT rarely happens that a sequel is equally successful with its predecessor. The work before us, however, presents a remarkable instance of this well-sustained recommendation. It has the agreeable anecdotic spirit of the first series, combined with somewhat more of the sensational element. The stories consist of mere waifs and strays and scraps of personal history, but of some sixty narratives, which have the charm of the novel and romance blended with sober biography. The same ingenious and useful faculties which change the fortunes of the personages who figure in these pages are very striking now we have a family tradition of the reign of Charles I., the very age of wonders, then a story of sanguinary vengeance (Grey; then a tragedie of the olden time (Sir John Elsnd, of Elsnd); next a tale of romantic love, of combat and duel; of lawsuit and disinheritance; of unexpected accession to wealth and honours, and as unlooked for deprivation of them; of the decadence of families—how a baronet of olden descent became a tapster in the Fleet prison, and a Plantagenet a sexton! These, however, are but a few of the very attractive characteristics of Mr. Burke's new volumes of "Anecdotes of the Aristocracy," which we now commend to our readers.

RICHMOND AND BUSHY PARKS.—It appears by a parliamentary return, printed at the instance of Colonel Sibthorp, that the actual amount of work done to the value of £2000 in the repairs of official persons occupying houses belonging to the Crown in Richmond and Bushy Parks, for the last five years, was as follows: In 1845, there was expended in Richmond Park, £2086, and in Hampton Court and Bushy Parks, £1693. 1846, Richmond, £1913 10s. 6d.; Hampton Court and Bushy, £1133 10s. 1847, Richmond, £2875; Hampton Court and Bushy, £1975. 1848, Richmond, £1716; Hampton Court and Bushy, £2408 1849, Richmond, £2569 10s. 10d.; Hampton Court and Bushy, £1424

REMOVAL OF THE GREAT GUN OF BEEJAPORE TO ENGLAND.—This enormous weapon of destruction, one of the greatest trophies of the late Mahratta war, is expected to arrive in England in the course of next month, and is to form a prominent object at the Industrial Exhibition. It is cast entirely of brass, and weighs forty-one tons

HOPS FROM NEW SOUTH WALES.—A vessel laly l has arrived in the Thames docks from Sydney, New South Wales, has brought a parcel of hops, consigned as a part of her cargo. This is the first instance of an importation of this article of merchandise from that far-distant quarter of the globe, and the arrival is of some interest and importance.

THE THEATRES.

HER MAJESTY'S

The popularity of Mozart's divine opera of "Don Giovanni" would seem to increase upon each successive performance. The more familiar the airs become, the more exquisite they appear, and every hearing discovers new beauties dependently of their intrinsic loveliness, are found to be so vital to the development of the several characters to which they are allotted, and express so truthfully the dramatic sentiment, that the most pleasurable emotions which they create become secondary when the mind and heart acquires sufficient rest and calm to enter philosophically into the deep intention of the author. And this is the true test of genius, for merely sensuous tunes and toe-tickling rhythms pall upon recurrence, and quickly fail to awaken any associations with the poems to which they were originally allied. Any of the thousand melodies of Mozart may be instant y associated to the specific opera to which it belongs. They are stereotyped on the heart of the music-lover, and are to him as familiar as the sweet home words, which are to him a memory and a delight. The "Don Giovanni" is the most marvellous opera ever written. The score contains every element of human passion, united with the grandeur of the middle ages. There is no aim to give the Spanish local colouring, for human emotions are everywhere the same. The tragic elevation of *Donna Anna* amalgamates naturally with the pastoral simplicity of the village maiden *Zerlina*. The wild chivalry of *Don Giovanni* is wonderfully contrasted with the babbling cowardice of the light-hearted *Leporello*, and thus is every personage of the drama merry considered, and with a thoroughly Shakespeare spirit. In this opera there is no mere ballast to serve for cant, no violent instrumental crashings forth of sound and fury, signifying nothing, no crude harmonies to surprise and confound the ear, nor sheep-skin detonation, nor braying of brass; every bar is instinct with truth, and every phrase reflects the sentiment of the singer. The utterances of Mozart were the outpourings of the divinity within him, and although the human passion, united with the mysterious awe of "Don Giovanni" was given, for the last time this season, at her Majesty's Theatre, on Tuesday evening.

The only change in the accustomed distribution of the characters was the *Donna Elvira* of Madame Frezzolini, who sang the music with honours due reverence of the composer, and with musical artistic refinement. The *Zerlina* of Madame Sontag is one of her most charming performances It is graceful, winning, simple, and full of the true Mozartian spirit. "La ci darem la mano" was re-demanded; and we need scarcely add, that "Batti, batti, o bel Masetto," and the exquisitely coaxing "Vedrai, carino," were encored with enthusiasm. The *Leporello* of Lablache was inimitable as the present occasion seemed to possess all its pristine power and melodiousness. Lablache's *Don* is more a potent than passionate; and the *Ottavio* of Calzolari wants dramatic *oplomb* and lyrical refinement. Parodi was effective as *Donna Anna*, and sang the aria "Or sai chi l'onore," with admirable expression and tragic power. The house was crowded.

ST. JAMES'S.

On Wednesday, Mdlle. Rachel concluded her engagement by the performance of *Camille*, in "Les Horaces." Her acting was distinguished by its usual excellence, and the audience attested their appreciation of it by repeated plaudits.

The French *tragédienne* has been succeeded. by Mrs. Fanny Kemble, who has commenced with much success a course of Shakspearian readings. The "Tempest" was the drama chosen on Monday. Mrs. Kemble was particularly felicitous in the comic parts of *Trinculo* and *Stephano*, while the more serious dialogue she supported with a weight of elocution that well justified the school in which she has been educated. The assumption of *Prospero* was various, and that of *Miranda* was given with interesting delicacy. The great speeches were sublimely delivered. Altogether the reading was very striking, and remarkably suggestive

On Wednesday the reading consisted of "The Midsummer Night's Dream," in which Mrs. Kemble revelled in the exquisite poetry of that marvellous drama. We trust that these readings may prove eminently successful.

OLYMPIC.

During the week this theatre has been opened by Mr. George Bolton, for the purpose of producing on the modern stage the old play of "The Maid-servant," written by John Marston, the author of eight of our earliest dramas. The hero, *Molevole*, performed by Mr. James Johnstone, is a bitter satirist, and his sarcasms upon mankind constitute the string of the whole dialogue. Considering the extravagant nature of the performance the piece was cleverly acted, and the audience, which was numerous, seemed well pleased

We are happy to state that the report of Mrs. Clifford's death has been contradicted; though we understand that the lady has been seriously ill.

MUSIC.

THE BACH SOCIETY

The fame of the Bach family is great in musical annals. The name of John Sebastian Bach, of Eisenach, born March 21st, 1685, who died July 30th, 1750, at Leipsic, is recognised as one of the great masters of the science of music. As a proof of the high estimation in which the genius of this composer is still held, we may mention that the approaching anniversary of his death was celebrated at Leipzig on Sunday, the 28th ult., with much pomp, by a gathering of 2000 music lans and a numerous assemblage of amateurs, many of whom came from other towns. The same anniversary was also kept at Hamburg, Magdeburg, Berlin, &c; and, on Monday, the newly-formed Bach Society of London gave a performance in honour of the distinguished composer, under the direction of Mr. Henry Smart.

The programme comprised the fine Motet in E minor, No. 5; the magnificent Motet in B flat, No. 1; the chorales "God, my King," and "Farewell, thou ort of splendour;" a concerto in D minor, for pianoforte, violin (by the clarichord); a duo and chaconne for violin and pianoforte, executed by Molique and Sir William Bennett; and a vocal duo "Et in unum," from the Mass in B minor. It is hardly creditable to the taste of the public, that this concert, in honour of the greatest musical genius of any age or country, should have been so thinly attended; and it was very gratifying to witness the number of well-known professors and amateurs who assembled on such an occasion. The performance is, of course, not within the reach of legitimate criticism, but we are justified in stating that the general execution of Bach's most difficult compositions was musicianlike On hearing the motets, we were amazed that the Sacred Harmonic Society should so long have overlooked the sublime works of Bach. It is quite evident that for the last twenty years our rising musicians and amateurs have become intimately acquainted with Bach's inspirations. Antiquated as the forms may be, there is a freshness and piquant novelty in the whole, that are justified in stating that the general execution of Bach's most difficult compositions was musicianlike On hearing the motets, we were amazed that the Sacred Harmonic Society should so long have overlooked the sublime works of Bach. It is quite evident that for the last twenty years our rising musicians and amateurs have become intimately acquainted with Bach's inspirations. Antiquated as the forms may be, there is a freshness and piquant novelty in the whole, that are justified in stating that the general excellence of the performance of the motets, and the orchestral pieces, on Monday, must have been a great surprise to many. Handel, it is true, is the most expressive and impassioned melody, and the most effective orchestral combinations, are masterpieces of high art in the sacred school. The Mass in B minor is another monument of genius, but "superannuated" composer, as he has been appropriately styled in Germany, on account of his facility and fecundity

CONCERT OF SENORA MARTINEZ.—If the black vocalist of the Havannah had not foolishly assumed the name of the present vocalist of any age, and had originally appeared with the *troupe* of the Ethiopian Serenaders, there would have been a chance of success for her in this country; but there is but little talent in her style of singing, and in the quality and power of her voice, and there is too much of the irresistibly comic in her appearance, to justify her reception in any concert as a serious vocalist. To the Spaniards, and perhaps to persons unacquainted with the language, her exhibition at the Hanover Rooms, last Monday night, was amusing: as the former from association, and to the latter from the *naïveté* and drollery of her style; but we think that she was out of place with the two accomplished guitarists, the Ciebras, and that the Anerican burlesque company of the Ethiopian school would have been the best calculated for Donna Maria Loreto Martinez's vocal powers.

MUSICAL EVENTS.—Mr. John Parry will repeat his new entertainment next Monday, at the Music Hall.——Mr. F. O. Williams gave a concert at the Horns, Kennington, last Monday, assisted by Ernst, the violinist, Messrs. Sims Reeves, J. Perren, T. Williams, Signor Bottesini, Misses Poole, Day, F. Hindeart, and Madame Rolfano.——A Scottish musical entertainment will be given by Mr. and Mrs. Cooper and Miss Leslie, next Monday, at the Marylebone Institution.——The Ceciian Society had a miscellaneous concert on Thursday, at the Albion Hall, conducted by Mr Walker.——Mdlle. Liind is at Wiesbaden, where Vivier, the celebrated horn player, will give a concert, at which she will sing. She gave nearly £2400 to the pension fund for the widows and orphans of *artistes*, the product of six concerts she gave during at Stockholm.——Signor Circa, a young composer of great promise, has just died at Bologna.——A new work, called "The Deluge," composed by Count Castelbarco, has been executed with success at the Teatro Carcano, at Milan.——Mr. Reger has left Paris for Hamburg, where he will play *Jean of Leyden*, in the German version of the "Prophète," for a few nights.——The new three-act comic opera of "Giralda, or, the New Psyche," the poem by Scribe, and the music by Adolphe Adam, was produced on the 20th ult., at the Salle de l'Opéra Comique, in Paris, with immense success, sustained by Mdlle. Felix Miolan. Mdlle Meyer, MM. Audran, Sainte Foy, Busane, and Hicquier. M. Halévy, the composer, who writes a notice of this work in the *Constitutionel*, remarks that "Giralda" is superior to Adam's previous operas, "Le Châlet," "La Reine d'un Jour," "Le Postillon de Lonjumeau," "Le Roi d'Yvetot," and "Le Torréador;" higher praise he could not bestow.——M. Brisus, the publisher of the works of Meyerbeer and Halévy in Paris, was present at the two first representations of "La Juive" at the Royal Italian Opera.——Alboni has been recently singing at Nantes with her usual success.——Beethoven's "Fidelio" is in rehearsal at the Royal Italian Opera for Madame Viardot, and will be the last production of the season.——Prior to the opening of the Sacred Harmonic Society season, in November next, the alterations and improvements in Exeter Hall, sanctioned by the directors and shareholders, will be completed, comprising the raising of the present flat ceiling, giving it an arched form, free from unnecessary projections; also the removal of the large square pillars at the gallery end of the Hall, throwing back the organ and wall behind it The works are now in progress, and will be finished about the first week in October.

TOWN TALK AND TABLE TALK.

THE West-end streets and parks, the omnibuses in noisy thoroughfares, and the steam-boats on the "silent highway," have recently assumed that decidedly Gallic air which tells of cheap excursions on the Great North of France Railway, and the consequent presence amongst us of swarms of the honest *bourgeois* and *badauds* of Paris. You can hardly turn a corner without running against a pair of fierce moustaches, a Gibus hat, a coat cut marvellously full in the skirts, trowsers pockets reaching almost to the knees of the wearer, and a couple of little shiny boots. Monsieur Anatole or Monsieur Jean Baptiste is rushing frantically about, armed with a "Guide de Londres," and a plan which puzzles him woefully; but, nevertheless, intent upon seeing the metropolis of his doughty neighbour John Bull, with all its wonders, in the scanty two days allowed by the *entrepreneurs* of the excursion. Generally, however, our friends from the other side of the Channel move about in groups—sometimes provided with an interpreter, whose explanations unlettered English folk find as hard to understand as those of any of his clients; and sometimes, when destitute of any such functionery, getting up quite a ballet of action in their frantic attempts to avail themselves of a novel language of signs which only Perrot or Carlotta Grisi could interpret. In spite of these disadvantages, however, our welcome visitors appear, on the whole, to get on very well; and a party is seldom long in a fix for lack of English enough to ask their way to "Green-wich" or "Dn Tonnelle," without some benevolent expounder of the Parisian vernacular hurrying to their rescue. The number of French of the middle and tradespeople classes in London, is, however, nothing to the vast shoals who have only adventured as far as the coast, enticed by cheap fares from Paris. Boulogne, the other day, was actually invaded. Three trains brought down no less than seven thousand people, and provisions at once rose 50 and 70 per cent. An eye-witness informs me that the scene upon the arrival of each *convoi* was exceedingly curious and characteristic. The sea was the grand object of attraction—not one in a hundred of the whole party having ever seen water wider or deeper than the Seine at the Pont Neuf or the canals at Versailles; and, accordingly, no sooner did the trains pull up at the station-house than the majority of the excursionists, as though moved by a common impulse, started off, with their carpet-bags under their valises and sacs de nuit with them; and, without staying to inquire for refreshment or accommodation, rushed pell mell through the astonished streets of Boulogne, exclaiming "*La Mer!*" and capering with delight as they trampled, shouting and screaming, along the jetty, or dispersed themselves over the sands—as delighted with the sparkling surf as children with a new and magnificent plaything.

A visit to Mr. Mechi's celebrated farm, last week, very much puzzled me, who am no agriculturist, and has moreover, I expect, puzzled a good many folks who have. Doubtless the most learned in the matters of long horns and short horns, subsoil ploughing, and tile draining, adepts in cold steaming, philosophers on pig feeding, and the profoundest of sages in mangle wurzels and turnips, are all at loggerheads about the matter; and what can a mere literary amateur in things bucolic, even although he did happen to be summoned for the occasion by a week's unremitting study of fat bullocks and complicated wheel-barrows, at Exeter, do but wonder at the high contending parties? "Here," says the agriculturist of power, "look at this rich and luxuriant manure—here's nourishment for the world." "Not a bit of it," retort the opponents of the scheme; "it's not nourishment, it's stimulant." "Just sprinkle a dribble of this precious fluid over your fields," exclaims the experimenter; "it will fall as gentlely upon barren clods as turtle descends into the stomach of an alderman." To which the reply is ready—"Not a pint not a drop. Would you ruin the constitution of the farm—undermine its permanent health? such manners as soup, but brandy. Would you have Mother Earth turn dram-drinker in her old age, to bear a few unnaturally flaunting crops under the spur of the strong drink, and then be done up, *bla—*, worn out, as useless as an old cab, with dull eyes and shaking hands, tottering into a state of *delirium tremens*?" Who, then, are to decide upon the merits of the unsavory compound. As for Mr. Mechi, he is the most thorough-going of reformers. He declares that nine-tenths of the farmers of England know nothing about farming; that the land is generally ill ploughed, half manured, that, in fact, not one-half—perhaps not one-fourth—of the good things are taken out of it which it is competent to produce. And, certainly, the fields of grain are in a very poor crop, which the Mechi partisanship points to, do appear great facts. But then, say the objectors—the steady-going, practical men—the men who must live by their farms, and be punctual upon their rents—"The thing don't pay." "You may farm too high as well as too low—you may waste a penny candle looking for a lost farthing; and if we set to work trying dubious experiments, let it be recollected that we have a wife and children in Cornhill to make the general balance stand at the right side of the ledger at the end of the financial year." This part of the question will, probably, soon receive a partial solution by the promised publication of Mr. Mechi's farm-books—I say partial, because the feeling is tolerably strong that figures can be made to prove anything, and the staunch sticklers for the good old ways are not likely to be jostled, against their will, out of them, however prosperous may appear the result of the Tiptree Hall agricultural budget.

The last of the present French plays is a rose fallen from the fast-fading chaplet of the season. Rachel—that wondrous revivifier of a dead school of art, has left us for Hamburgh; but before she went, she did not fail to pay a graceful visit and a handsome pecuniary benefit to the performers at an English theatre, where a sister *artiste* is now engaged in delineating a character, the exquisite elaboration of which formed the most recent triumph of the histrionic art in Paris. Rachel's pianoforte accompanist (before the clavichord); a duo and chaconne for violin and pianoforte, executed by Molique and Sir William Bennett; and a vocal duo "Et in unum," from the Mass in B minor. It is hardly creditable to the taste of the public, that this concert, in honour of the greatest musical genius of any age or country, should have been so thinly attended; and it was very gratifying to witness the number of well-known professors and amateurs who assembled on such an occasion. The performance is, of course, not within the reach of legitimate criticism, but we are justified in stating that the general execution of Bach's most difficult compositions was musicianlike On hearing the motets, we were amazed that the Sacred Harmonic Society should so long have overlooked the sublime works of Bach. It is quite evident that for the last twenty years our rising musicians and amateurs have become intimately acquainted with Bach's inspirations. Antiquated as the forms may be, there is a freshness and piquant novelty in the whole, that are justified in stating that the general excellence of the performance of the motets, and the orchestral pieces, on Monday, must have been a great surprise to many. Handel, it is true, is the most expressive and impassioned melody, and the most effective orchestral combinations, are masterpieces of high art in the sacred school. The Mass in B minor is another monument of genius, but "superannuated" composer, as he has been appropriately styled in Germany, on account of his facility and fecundity

CONCERT OF SENORA MARTINEZ.—If the black vocalist of the Havannah had not foolishly assumed the name of the present vocalist of any age, and had originally appeared with the *troupe* of the Ethiopian Serenaders, there would have been a chance of success for her in this country; but there is but little talent in her style of singing, and in the quality and power of her voice, and there is too much of the irresistibly comic in her appearance, to justify her reception in any concert as a serious vocalist. To the Spaniards, and perhaps to persons unacquainted with the language, her exhibition at the Hanover Rooms, last Monday night, was amusing: as the former from association, and to the latter from the *naïveté* and drollery of her style; but we think that she was out of place with the two accomplished guitarists, the Ciebras, and that the Anerican burlesque company of the Ethiopian school would have been the best calculated for Donna Maria Loreto Martinez's vocal powers.

MUSICAL EVENTS.—Mr. John Parry will repeat his new entertainment next Monday, at the Music Hall.——Mr. F. O. Williams gave a concert at the Horns, Kennington, last Monday, assisted by Ernst, the violinist, Messrs. Sims Reeves, J. Perren, T. Williams, Signor Bottesini, Misses Poole, Day, F. Hindeart, and Madame Rolfano.——A Scottish musical entertainment will be given by Mr. and Mrs. Cooper and Miss Leslie, next Monday, at the Marylebone Institution.——The Ceciian Society had a miscellaneous concert on Thursday, at the Albion Hall, conducted by Mr Walker.——Mdlle. Liind is at Wiesbaden, where Vivier, the celebrated horn player, will give a concert, at which she will sing. She gave nearly £2400 to the pension fund for the widows and orphans of *artistes*, the product of six concerts she gave during at Stockholm.——Signor Circa, a young composer of great promise, has just died at Bologna.——A new work, called "The Deluge," composed by Count Castelbarco, has been executed with success at the Teatro Carcano, at Milan.——Mr. Reger has left Paris for Hamburg, where he will play *Jean of Leyden*, in the German version of the "Prophète," for a few nights.——The new three-act comic opera of "Giralda, or, the New Psyche," the poem by Scribe, and the music by Adolphe Adam, was produced on the 20th ult., at the Salle de l'Opéra Comique, in Paris, with immense success, sustained by Mdlle. Felix Miolan. Mdlle Meyer, MM. Audran, Sainte Foy, Busane, and Hicquier. M. Halévy, the composer, who writes a notice of this work in the *Constitutionel*, remarks that "Giralda" is superior to Adam's previous operas, "Le Châlet," "La Reine d'un Jour," "Le Postillon de Lonjumeau," "Le Roi d'Yvetot," and "Le Torréador;" higher praise he could not bestow.——M. Brisus, the publisher of the works of Meyerbeer and Halévy in Paris, was present at the two first representations of "La Juive" at the Royal Italian Opera.——Alboni has been recently singing at Nantes with her usual success.——Beethoven's "Fidelio" is in rehearsal at the Royal Italian Opera for Madame Viardot, and will be the last production of the season.——Prior to the opening of the Sacred Harmonic Society season, in November next, the alterations and improvements in Exeter Hall, sanctioned by the directors and shareholders, will be completed, comprising the raising of the present flat ceiling, giving it an arched form, free from unnecessary projections; also the removal of the large square pillars at the gallery end of the Hall, throwing back the organ and wall behind it The works are now in progress, and will be finished about the first week in October.

TOWN TALK AND TABLE TALK.

THE West-end streets and parks, the omnibuses in noisy thoroughfares, and the steam-boats on the "silent highway," have recently assumed that decidedly Gallic air which tells of cheap excursions on the Great North of France Railway, and the consequent presence amongst us of swarms of the honest *bourgeois* and *badauds* of Paris. You can hardly turn a corner without running against a pair of fierce moustaches, a Gibus hat, a coat cut marvellously full in the skirts, trowsers pockets reaching almost to the knees of the wearer, and a couple of little shiny boots. Monsieur Anatole or Monsieur Jean Baptiste is rushing frantically about, armed with a "Guide de Londres," and a plan which puzzles him woefully; but, nevertheless, intent upon seeing the metropolis of his doughty neighbour John Bull, with all its wonders, in the scanty two days allowed by the *entrepreneurs* of the excursion. Generally, however, our friends from the other side of the Channel move about in groups—sometimes provided with an interpreter, whose explanations unlettered English folk find as hard to understand as those of any of his clients; and sometimes, when destitute of any such functionery, getting up quite a ballet of action in their frantic attempts to avail themselves of a novel language of signs which only Perrot or Carlotta Grisi could interpret. In spite of these disadvantages, however, our welcome visitors appear, on the whole, to get on very well; and a party is seldom long in a fix for lack of English enough to ask their way to "Green-wich" or "Dn Tonnelle," without some benevolent expounder of the Parisian vernacular hurrying to their rescue. The number of French of the middle and tradespeople classes in London, is, however, nothing to the vast shoals who have only adventured as far as the coast, enticed by cheap fares from Paris. Boulogne, the other day, was actually invaded. Three trains brought down no less than seven thousand people, and provisions at once rose 50 and 70 per cent. An eye-witness informs me that the scene upon the arrival of each *convoi* was exceedingly curious and characteristic. The sea was the grand object of attraction—not one in a hundred of the whole party having ever seen water wider or deeper than the Seine at the Pont Neuf or the canals at Versailles; and, accordingly, no sooner did the trains pull up at the station-house than the majority of the excursionists, as though moved by a common impulse, started off, with their carpet-bags under their valises and sacs de nuit with them; and, without staying to inquire for refreshment or accommodation, rushed pell mell through the astonished streets of Boulogne, exclaiming "*La Mer!*" and capering with delight as they trampled, shouting and screaming, along the jetty, or dispersed themselves over the sands—as delighted with the sparkling surf as children with a new and magnificent plaything.

A visit to Mr. Mechi's celebrated farm, last week, very much puzzled me, who am no agriculturist, and has moreover, I expect, puzzled a good many folks who have. Doubtless the most learned in the matters of long horns and short horns, subsoil ploughing, and tile draining, adepts in cold steaming, philosophers on pig feeding, and the profoundest of sages in mangle wurzels and turnips, are all at loggerheads about the matter; and what can a mere literary amateur in things bucolic, even although he did happen to be summoned for the occasion by a week's unremitting study of fat bullocks and complicated wheel-barrows, at Exeter, do but wonder at the high contending parties? "Here," says the agriculturist of power, "look at this rich and luxuriant manure—here's nourishment for the world." "Not a bit of it," retort the opponents of the scheme; "it's not nourishment, it's stimulant." "Just sprinkle a dribble of this precious fluid over your fields," exclaims the experimenter; "it will fall as gentlely upon barren clods as turtle descends into the stomach of an alderman." To which the reply is ready—"Not a pint not a drop. Would you ruin the constitution of the farm—undermine its permanent health? such manners as soup, but brandy. Would you have Mother Earth turn dram-drinker in her old age, to bear a few unnaturally flaunting crops under the spur of the strong drink, and then be done up, *bla—*, worn out, as useless as an old cab, with dull eyes and shaking hands, tottering into a state of *delirium tremens*?" Who, then, are to decide upon the merits of the unsavory compound. As for Mr. Mechi, he is the most thorough-going of reformers. He declares that nine-tenths of the farmers of England know nothing about farming; that the land is generally ill ploughed, half manured, that, in fact, not one-half—perhaps not one-fourth—of the good things are taken out of it which it is competent to produce. And, certainly, the fields of grain are in a very poor crop, which the Mechi partisanship points to, do appear great facts. But then, say the objectors—the steady-going, practical men—the men who must live by their farms, and be punctual upon their rents—"The thing don't pay." "You may farm too high as well as too low—you may waste a penny candle looking for a lost farthing; and if we set to work trying dubious experiments, let it be recollected that we have a wife and children in Cornhill to make the general balance stand at the right side of the ledger at the end of the financial year." This part of the question will, probably, soon receive a partial solution by the promised publication of Mr. Mechi's farm-books—I say partial, because the feeling is tolerably strong that figures can be made to prove anything, and the staunch sticklers for the good old ways are not likely to be jostled, against their will, out of them, however prosperous may appear the result of the Tiptree Hall agricultural budget.

The last of the present French plays is a rose fallen from the fast-fading chaplet of the season. Brisus, the publisher of the works of Meyerbeer and Halévy in Paris, was present at the two first representations of "La Juive" at the Royal Italian Opera.——Alboni has been recently singing at Nantes with her usual success

NAVAL AND MILITARY INTELLIGENCE.

RETURN TO PORTSMOUTH OF THE ROYAL YACHT.

The Royal yacht *Victoria and Albert* arrived at Spithead on Wednesday afternoon, and went straight into harbour at half-past three. Lord Adolphus landed at the dockyard to pay his respects to the Commander-in-Chief, Admiral Sir Bladen Capel, and to bring some dispatches from Gibraltar and Lisbon.

The yacht went into Cherbourg at half-past five o'clock on Wednesday morning. Captain Lord Fitzalerance and his friends landed, called on the authorities of the place, and left in the yacht again at half-past nine, making the run from Cherbourg to Portsmouth in five hours and a half.

The *Victoria and Albert* was placed in quarantine when she went into Bordeaux on Sunday week, and remained two days. She then received *pratique*, and anchored off the town, where she remained till Saturday. She went into Brest and remained 24 hours, and left that harbour on Tuesday morning, arriving at Cherbourg on Wednesday morning.

The Royal yacht was visited at Bordeaux and Brest by a vast number of the inhabitants, who were courteously received on board by Lord Fitzalerance, Captain Crispin, and the officers. During the few hours the *Victoria and Albert* remained at Cherbourg a small number of persons were received on board.

The yacht is reported to have behaved well throughout, and her engines have performed most satisfactorily. Altogether, she has had a most satisfactory cruise; the only difficulty was the procuring coals at the French ports, and then only getting them at intervals of time and in small quantities.

Prince Edward of Saxe-Weimar, Sir G. Wombwell, Bart., Sir Joseph Copley, and Colonel Yorke have returned in her. Prince Ernest of Leiningen, late a midshipman in the *Arrogant* (screw-frigate), who came in the Royal yacht from Lisbon to Bordeaux, left the yacht at the last-named place to proceed to Germany by land.

Lord Adolphus Fitzalerance, on his return to Portsmouth, proceeded to Osborne to report his arrival and the particulars of the interesting cruise to her Majesty

---

The Government, it is confidently rumoured, have resolved on giving the Military Order of the Bath to distinguished military and naval surgeons. The most eminent military and naval surgeons have refused to receive the civil decoration of the Bath.

THE MEDITERRANEAN FLEET.—Intelligence from Malta to the 24th ult. announces that Sir William Parker was still at Malta. The fleet was cruising outside. About 70 cases of cholera had occurred in the ships under the immediate command of Sir W. Parker; but the number was daily diminishing. The total number of deaths had not exceeded 30. The flag-ship *Queen*, 116, Captain Wise, had suffered most.

NAVAL DESERTION AND DESERTION.—Seven boys and two seamen, late of the *Lily*, Commander Bedford, have arrived at Portsmouth from Sierra Leone, having been left there without clothes or pay, and after having been flogged on board the *Lily*. The case is before the Admiral, and will most likely lead to a very serious inquiry

---

COUNTRY NEWS.

FALL OF A COTTON MILL AT STOCKPORT.

On Tuesday afternoon, between one and two o'clock, a large portion of a new mill at Stockport fell suddenly to the ground, and caused the death of several of the hands employed about it. It is as yet impossible to say how many, but probably not over seven. The mill in question, which is called the Brinksway Mill, is the property of Mr. Cephas Howard. It is a new fire-proof mill, having been commenced in August last, and having been only occupied about a month by Mr. Joseph Heaward. It is a rather handsome erection, and the walls are apparently substantial enough. It is 47 yards long and 20 wide, and is four storeys in height; the bottom one being the doubling-room, the second for throstle-spinning, the third for carding, and the fourth for blowing.

About half-past one-sixth part of the mill was fallen to the ground. Fortunately, the mill hands were almost all at dinner at the time, or the consequences to life must have been dreadful. As it was, there were only a few inmates, a boy, and a girl, remained to eat their dinners at the mill, when all at once a crash was heard, and the whole of the building which fell. John Marsh, a machine-maker, was one of these. He was in the third storey, and he states that the first thing that occurred to seeing the brick-work fall from the fire-proof arches of the room; that he immediately ran to the other end of the mill, and thus escaped, the building crashing down behind him as he went. Of the women who were in the mill at the time, none escaped; four were killed immediately afterwards rescued from the ruins:—Elizabeth and Ann, daughters of Richard Salt, butcher, Portwood, who were on the first-floor of the mill when the accident happened, and were not seriously injured, and Ellen Lomax, who had all three storeys; she was taken out of the ruins dreadfully injured, and though every attention was rendered to her at the Stockport Infirmary, she expired in about two hours. The boy, who was in the lower room, was also carried out amongst the ruins, and when found he had received a severe flesh wound in his thigh; but this, it is said, will not prove serious. Four other women have not been seen since the accident, and it is supposed they have been killed and are buried in the ruins, and that their bodies must still be buried under the ruins. These are Margaret Harding (single woman), of New Bridge-lane; Ann Swindells, a married woman with four children, aged 31; Ann Gee, aged 17; and another girl, a stranger, named Cash. But besides these there were workspeople—millwrights and their labourers engaged in putting up the new water wheel at the time of the accident, of these, Ephraim Sidlow, Wright Barlow, and John Bradley (millwrights), are found to be dead; and James Bradley, Joseph Orme, and Samuel Harrop (labourers), were known to have been engaged under the part of the mill which has fallen at the time of the accident—the four first about the wheel, and the latter near the west gable end. Of these four all but Harrop are known to be killed, and their bodies must still be buried under the ruins. Four other women have not been seen since the accident, they also are assumed to be buried under the rubbish. This would give eleven lives lost, as follows:—Ellen Ashton, Margaret Harding, Ann Swindells, Elizabeth Sykes, Ann Gee, Ephraim Sidlow, Wright Barker, John Bradley, James Robinson, Joseph Orme, Samuel Harrop.

The damage done to the mill and machinery is very considerable. The damage resulting to the estate of the mill will be about £4,000; that to the machinery is, however, computed at not less than £7000.

Since the removal of the ruins has commenced, three bodies, those of the wheelwrights, have been got out.

SEAFORD (SUSSEX).—BLOWING UP THE CLIFF.—Lieutenant Ward and 21 Royal Sappers and Miners have arrived here for the purpose of making the necessary arrangements for the intended grand explosion, by gunpowder, of the cliff at Seaford Heights The fall of the cliff is considered requisite for preserving the bank of beach in the bay, and for making a natural groyne, as the line between Newhaven and Seaford Head is found to drift considerably to the east-ward, towards Beachy Head. The works have been for some time in contemplation. The explosion, it is expected, will take place in two or three weeks, and no doubt, attract an immense number of spectators and scientific men. The Sappers and Miners have pitched their tents in the Battery-yard.

GREAT FIRE AT POOLE.—Letters were received on Monday morning last, by the living assurance companies in the City, announcing a terrible fire at Poole on Friday week, by which it appears several bonded warehouses, stores, and several houses situate on the quay were totally consumed, together with their contents. The fire was discovered shortly after three o'clock in the morning raging in the lower part of the premises belonging to the Steam Flour Company, known as the Mills, the largest building in the town, situate fronting the quay. The town engines were promptly brought to the spot; but before they could be got into play the whole of the interior of the building, with the contents, consisting of valuable machinery, 500 quarters of wheat, 300 sacks of meal, and 300 sacks of flour, were encompassed by the flames Within a short time the fire-proof warehouse of Mr. Oakley were exceedingly valuable; they contained upwards of 2000 quarters of wheat and 600 sacks of flour and meal. Next to these, the conflagration extended to the oil stores of Mr. Slade; these were also soon levelled with the ground; the oil flowed through the lanes and alleys in a flaming stream, firing the dwellings of the poor in all directions. The excitement among the inhabitants now became intense, as the whole town appeared to be destined to destruction. All the engines that could be obtained from the neighbouring villages were brought into requisition, but the ravages made by the fire seemed almost to paralyse them. A change of wind, happily, had the effect of staying the conflagration in the direction of the town, but it was some hours before it was finally checked. In addition to the premises destroyed as before stated, some ten or eleven houses were partially gutted. The fire continued burning on Sunday, but no further damage was expected. Suspicions were entertained that it was caused by an incendiary. The total loss is reported to be near £40,000.

IRELAND.

MAYO ELECTION.—The nomination of candidates to fill the vacancy created by the compression of the county by the death of the late D. Browne, Esq., took place, at Castlebar, on Thursday week, when Mr. O'Higgins, in the Liberal interest, was proposed by the Hon. Frederick Cavendish, and seconded by the Very Rev. Dean Burke, P.P. of Westport; Mr. Butt (Conservative) was proposed by Mr. John Gore, and seconded by Colonel M'Alpine: Sir Richard O'Donnell, Bart., Captain Higgins, and Mr. E. Costello were then respectively put in nomination, but only to give them an opportunity of speaking. Mr. Ousley Higgins and Mr Butt addressed the assembly at great length. The proceedings of the nomination did not terminate until near seven o'clock in the evening, when the Sheriff adjourned the Court till the following morning. As there was much excitement, and a breach of the peace was feared, there were in the town, in addition to a large body of constabulary, three troops of the 8th Dragoons, the head-quarters and five companies of the 17th Foot, and three companies of the 14th Foot, al under the command of Colonel Stoyte, of the 17th Regiment. On Monday evening the Sheriff declared Mr. Higgins duly elected for Mayo. The numbers polled were:—For Higgins, 141; For Butt, 95 Majority, 46

DUNGANNON ELECTION.—Henry Alexander, Esq., a member of the English bar, has issued an address to the electors of Dungannon as a candidate to fill the vacancy caused by the retirement of Lord Northland. Mr. Batt, Q.C., who has been unsuccessful at Mayo, is said to be anxious to try his luck here.

THE POTATO AND OTHER CROPS.—The *Limerick Reporter*, which had such gloomy reports of the blight last week, now states that potatoes supposed to be diseased are recovering. The *Cork Examiner* has accounts from all parts of the counties of Cork, Kerry, Limerick, and Waterford, which concur in stating that there is yet no real potato disease, and that the prospects of the harvest are most cheering. Some of the provincial journals, too, which reported a serious blight in the wheat crop, now declare that that crop, in general, is sound, and promises a good produce. Confidence is rapidly reviving amongst the farmers, with the hope of a return to abundance.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

The English Market has been unusually tranquil during the week, scarcely a fluctuation varying the uniformity of prices. On Monday Consols opened at 96⅜ ⅜, marking 97 for Account at the close of business. 96⅝ 97 were the current quotations of Tuesday, and on Wednesday a momentary sumulation improved quotations to 97 to ⅜ for Account. But on Thursday the market became duller, and prices receded on the earlier quotations. Exchequer and India Bonds maintain their former values, and some business has been done in Long Annuities and New Three-and-a-Quarter per Cent. The last official quotations of the week are—Bank Stock, 212; Three per Cent. Reduced, 97⅜; Three per Cent. Consols, 96⅞; New Three-and-a-Quarter per Cent., Ann., 99⅛; Long Annu., to expire Jan., 1860, 8 1-16; Do., 30 years, Oct. 10, 1859, 8 1-16; Do., 30 years, Jan. 5, 1860, 8; India Stock, 270; India Bonds, £1000, 92 pm.; Do., under £1000, 92 pm.; South Sea Stock, 107⅛; Do., New Anns., 85⅛; Consols for Account, 96⅞; Exchequer Bills, £1000, 100, 70 pm.; £500, 100, 70 pm.; small, June, 70 pm.

A large amount of business has been doing in the foreign Funds during the week. Mexican has fluctuated between 29½ to 30. Peruvian has advanced to 103; Danish, Five per Cents., to 103¾ 104; and Chilian Six per Cents. to 103. Portuguese have not materially altered, the bad faith displayed in deducting 25 per cent. on the overdue dividend without giving any acknowledgment not being calculated to increase confidence in the foreign loans. The Portuguese Government. At the close of the week prices were generally firm, Mexican having advanced to 29⅞ to 30⅛; Brazilians quoting 91⅛; Chilian Six per Cents., 103⅜; Danish Bonds, Five per Cents., 103; Equador Bonds, 3⅜; Mexican, Five per Cent., 1846, Ex Jan. Coupons, Account, 29⅞; Peruvian Bonds, Four-and-a-Half per Cent., 82¼; Portuguese Five per Cents., 37⅜; Ditto, Four per Cents., to 103¾ 104; and Chilian Six per Cents. to 103. Portuguese Four-and-a-Half per Cent., 36½; Spanish Three per Cents., 37⅛; Venezuela Bonds, Two-and-a-Quarter per Cent., 35; Ditto Deferred, 12⅜.

Shares have quoted improved prices in several instances during the week, particularly North-Westerns, South Westerns, Great Westerns, and Midlands [illegible] appears to have, however, mainly resulted from the state of the accounts, as, after the settlement on Wednesday, prices became flatter, with a downward tendency. Foreign shares, however, show a steady advance, arising from the gradual resumption of trading operations on the Continent generally.

The closing quotations of the week are:—Aberdeen, Preference, 2 dis.; Buckinghamshire, 17½; Caledonian, New £10 Preferences, 8½; Eastern Counties, Holyhead Preference, 9 Eastern Counties, 5 per Cent, 60; Eastern Union, Class A, Scrip (6 per Cent.), 16; East Lincolnshire, guaranteed 6 per Cent., 26⅜; Great Northern, 8⅜; Ditto, 5 per Cent. Preference, 10⅜; Great Western, 54⅜; Hull and Selby, Half-Shares, 48⅜; Lancashire and Yorkshire, Thirds, 8⅜; Ditto, New, Guaranteed Six per Cent., 12⅜; London, Brighton, and South Coast, 81⅜ x.d.; London and North Western, 111; Ditto, New Quarters, 47⅜; Ditto, Fifths, 13; London and South Western, 60; Midland, 43⅜; Ditto, 5 per Cent. Shares, 10⅛; Ditto, Consolidated Bristol and Birmingham, Six per Cent., 120⅛; Norfolk, New £20, ⅜; Shrewsbury and Chester, Eight per Cent. Preference, 12⅜; South-Eastern, 54⅛; Ditto, Registered, No. 4, 4⅛; York, New scrip, and Berwick, 14⅛; Ditto, Newcastle Extension, 9⅜; Ditto, G.N.E., Preference, 4⅛, York and North Midland, 16; Ditto, Preference, 7⅛; Northern of France, 14⅛ Orleans and Bordeaux, 3; Paris and Rouen, 24⅛.

On Friday the Consol Market was very inactive, and prices were a shade lower. The Three per Cents were quoted at 96⅞ sellers; and the New Three-and-a-Quarter per Cents, 99⅛. Bank Stock, 212; India, ditto, 270; Exchequer Bills, 70 to 72 pm.; and Exchequer Bills, 70 pm. Foreign Bonds were tolerably firm. Brazilian, 91⅛, Mexican, 30; Russian, 111⅝. Very little doing in Railway Shares.

THE MARKETS.

CORN EXCHANGE (Friday).—The fresh arrivals of English wheat for our market this week, coastwise, have been confined to 1910 qrs., and from abroad to 2400 qrs. Since Monday last the several of Monday's unsold samples were on offer but the actual supply to the hands of the dealers was comparatively small. The attendance of buyers and millers was very limited, and the few sales in wheat of home produce were at prices about equal to those obtained on Monday, without effecting a clearance. Upwards of 13,000 quarters of foreign wheat have come to hand. The grain met a very inactive buyery, and, in some instances the quotations were almost nominal. No fresh barley at market, but the supply of it reigns was the turnover. Malting grades ruled steady at late rates. In grinding and distilling sorts, very little doing. The show of malt was somewhat large. All kinds were a slow sale, but without change to notice in value. Very few home-grown oats were on sale to-day, but the supply of foreign exceeds 34,000 quarters. Good dry qualities sold at previous quotations, but inferior sorts have been difficult to clear. Beans, peas, Indian corn, and flour remained unaltered in value.

ARRIVALS.—English: Wheat, 1910; barley, 53; malt, 3360; oats, 440; flour, 3825.

FOREIGN.—Wheat, 18 510; barley 2683; oats, 34,650; flour, 1600

English.—Wheat, Essex and Kent, red, 39s to 46s; ditto, white, 41s to 48s; Norfolk ditto, red, 42s to 45s; ditto, white, 42s to 46s; rye, 32s to 33s; grinding barley, 18s to 20s; distilling ditto, 22s to 25s; malting ditto, 30s to 37s; Norfolk and Lincoln malt, 44s to 48s; brown ditto, 40s to 44s; Kingston and Ware, 46s to 50s; Chevalier ditto, 50s to 54s; Scotch and Lincoln thirds feed oats, 16s to 17s; potato ditto, 18s to 21s; Youghal and Cork, black, 14s to 15s; white, 15s to 16s; tick beans, new, 29s to 32s; ditto, old, 32s to 34s; grey peas, new, 28s to 30s; white, 32s to 34s; maples, 34s to 36s; flour, 42s to 44s, per quarter. Town-made ditto, 45s to 47s; Suffolk, Essex, 39s to 43s; Stockton and Yorkshire, 37s to 38s, per 280 lbs.

Foreign.—Dantz grd wheat, —s to —s; white, —s to —s; barley, —s to —s; tick beans, s to —s, peas, s to —s per quarter. Flour, American, 31s to 35s per barrel, Canada ditto, 32s to 34s per barrel.

Wheat.—The present week's show of wheat is characterised as improving—above off slowly, at 42s per qr. Now raceway has changed hands at 30s to 37s per qr. Oats, barley, and beans, a quarter lower.

Hops.—English, sewing, 54s to 56s; Bastle, sruabing, 42s to 48s; Mediterranean and Odessa, 38s to 44s; kompassi, 35s to 36s per quarter; sortander, 30s to 31s per cwt. Wheat, mixed seed, 40s to 44s; white, 5s 6d to 10s 6d, tares, 4s 6d to 5s 6d per bushel. English rapeseed, £26 to £28 per last of ten quarters; linseed cakes, English, £9 to £9 0s ditto, foreign, £5 10s to £7 10s per 1000; rapeseed cakes, £4 0s to £5 0s per ton; canary, 6s to 7s per quarter. English clover-seed, red, —s to —s; extra, —s to —s; white, —s to —s extra, up to —s. Foreign, red, —s to —s; extra, —s, white, —s to —s; extra, —s per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 6½d to 7d; of households 4½d to 6d per 4lb loaf.

Imperial Weekly Average.—Wheat, 43s 6d; barley, 22s 3d; oats, 18s 1d; rye, 34s 9d; beans, 37s 4d; peas, 37s 8d.

The Last Weeks Average.—Wheat, 41s 6d; barley, 22s 0d; oats, 17s 2d; rye, 32s 0d beans, 37s 0d; peas, 37s 4d.

Wool.—Another market is by no means active, late rates are well supported Common second sorts are selling at 10½d to 11d per lb. The imports continue on a par with those of last year

Sugar.—The West India market is firm, and prices have an upward tendency. Bengal and Mauritius qualities are pointing rather more money. Refined goods are steady Brown lumps, 42s 6 to 43s; and fr to good grocery, 51s to 52s per cwt

Coffee.—Plantation kinds are in moderate request, at late currencies. Good ordinary native Ceylon moves off slowly, at 45s per cwt. Foreign coffee dull at late sale.

Rice.—The demand continues inactive. Some good Bengal has changed hands at 11s 6d per cwt.

Provisions.—Since our last report, several large arrivals of foreign butter have taken place, and prices have declined 2s per cwt., and prime have given way 1s per cwt. Fine Friesland, 65s to 68s per cwt. Irish butter mrx. s off slowly, at barely late rates; Limerick, 63s to 64s; Cork, 60s; Carlow, 58s to 60s per cwt. Kerlish butter is in good demand, at 60s to 62s; Dorset, at 76s to 78s per cwt; and fresh, 8s to 10s per dozen lb Irish bacon is very dull, and 2s to 3s per cwt cheaper, prime sizeable Waterford, 56s to 57s per cwt. Waterford shoulders, 50s to 54s per cwt.

Tallow. Our markets is steady, at about stationary prices. P Y C on the spot is quoted at 42s 6d to 43s 6 per cwt.

Oils.—Sperm, southern, and seal command a steady sale, at very full prices. Otherwise the market is inactive.

Hay and Straw.—Old meadow hay, £2 15s to £3 10s, new ditto, £2 5s to £3 0s, old clover, £3 5s to £4 5s; new ditto, £3 to £3 10s; Tandon, £1 15s to £2 5s per load. Straw, £1 1s to £1 5s.

Spirits.—Very little doing in brandy, yet the importers refuse to sell except at full prices Fine Jamaica rum steady, and quite as dear. Genevas and cora spirits dull.

Coals (Friday).—Newcastle, 13s 3d; Tanfield, 13s; Hetton, 13s 3d; Wylam, 12s 6d; Stewarth, 14s; Lambton, 15s 6d; Adelaide Tees, 15s 6d per ton.

Hops (Friday). Nearly the whole of the accounts from the plantations state that the bine is looking remarkably strong and healthy. Our market is therefore, in a very inactive state, and no actual sales rather lower rates must be admitted to. The duty has been done at £185,000 to £190,000 Three pockets have arrived this week from *Lisbon*:

New Mid and East Kent pockets, £8 0s to £10 0s; New Weald of Kent ditto, £5 15s to £7 7s New Sussex ditto, £5 5s to £6 6s; Yearling Sussex, £1 15s to £3 15s; Old Hops, 15s to £3 0s.

Smithfield (Friday). For the time of year, our market to-day was but moderately supplied with fat beasts, the general quality of which was very mid dling. The supply of sheep was by no means numerous, the primest Scots, Downs, Herefords, &c., moved off steadily, at fully prime small ditto, 3s 4d to 3s 6d; large hogs, 3s 2d to 3s 6d; small ditto, 3s 4d to 3s 6d. The numbers of sheep being considerably in excess of those exhibited on this day se'nnight, the primest lambs moved extremely heavily, and the late advance in the quotations was entirely lost. Calves were in limited supply, and sold slowly at late rates. Pigs were dull, at 3s 6d to 4s per stone.

Newgate and Leadenhall (Friday). These markets were very moderately supplied with all kinds of meat, in which a moderate business was done, at as follows:—

[illegible] 2s 2d to 2s 4d; middling ditto, 2s 6d to 2s 8d; prime large ditto, 2s 10d to 3s 0d; prime small do., 3s 2d to 3s 6d; large pork, 2s 10d to 3s 4d; inferior mutton, 2s 8d to 2s 10d; middling ditto, 3s 0d to 3s 6d; prime ditto, 3s 8d to 4s 0d; veal, 2s 8d to 3s 8d, small pork, 3s 6d to 3s 10d, lamb, 5s 6d to 6s 6d.

MOST. HERBERT.

THE CANTERBURY SETTLEMENT, NEW ZEALAND.

COLONISTS' FAREWELL.

On Tuesday last a very interesting festival took place at Blackwall. The occasion was the approaching departure of the body of colonists who are proceeding to found the settlement of Canterbury, in New Zealand. This first expedition is to consist of four ships of the first class, of great size, each of which will convey about 250 emigrants. These frigate-like vessels—the *Randolph*, *Sir George Seymour*, *Cressy*, and *Charlotte Jane*—are lying together in the East India Export Dock; and they were early on Tuesday variously prepared and decorated for the reception of the expected company. On the lower deck of the *Randolph* four tables were laid, occupying the whole length of the ship, and covered (by Messrs. Bailie and Breach, of the London Tavern) with an elegant *déjeûner à la fourchette* for 340 persons. Of the company, which assembled at two o'clock and occupied every seat a little after three, we were informed that about 160, reckoning ladies and children, consisted of actual colonists, whose passages are taken in the ship. The daily journals almost express surprise at the absence of [illegible] at this farewell dinner, and seem to think it the practice of many "colonists." We may, therefore, state that passengers of the above first class, usually termed emigrants, are to be regaled separately, just before they sail, on the old English fare of roast beef, plum-pudding, and John Barleycorn; and that those who joined the party of Tuesday was given are exclusively *cabin* passengers—purchasers of land, and their families, who have helped to form the plan of the colony, and are going out as *leaders*, to carry it into effect. We have [illegible] to print the names of many of them which have been communicated to us, it would be seen that they belong to a class whose members seldom "emigrate." The name of one of them—Mr. James Stuart Wortley—was mentioned by his father, Lord Wharncliffe, who spoke with becoming pride of "contributing a son to this honourable enterprise." But this is not an isolated case; on the contrary, a large proportion of these colonists belong to the gentry class at home; and enquiry has satisfied us that they are distinguished from the mass of emigrating colonists no less by high personal character, than by their social position at home; that they are not driven from the mother-country, as too commonly happens, by the pressure of adverse circumstances, but are attracted to the colony by the prospects which its singular organization holds out. Neither are they, for the most part, younger sons, like Mr. Wortley, reverting to the old practice of the English nobility and gentry, by seeking fortune and the gratification of a laudable ambition in colonial fields, where a family of importance may be founded with means comparatively small; but most of them are heads of families, in middle age, accompanied by their wives and children, earnest and thoughtful men, whose obvious motive in emigrating is to find social room for their progeny, without depriving them of the best social comforts and enjoyments. To this class the religious and educational provisions of the Canterbury Settlement have been the main attraction: the Church, with its Bishop and clergy—the College, with its Professors—the Grammar School, with its highly-educated masters—these are the facts which account for the presence at Blackwall, *as emigrants*, of a considerable number of ladies and children, whom it was impossible to distinguish from ladies and children of the nobility and high gentry who were invited as spectator-guests.

Lord Lyttelton took the chair, and grace was said by the Bishop of Norwich soon after three o'clock. Among the company at the principal table, and interspersed among the colonists, were Lord Somerville and Mrs. Somerville, Lord Nelson and Lady Susan Nelson, Lord and Lady Wharncliffe, the Marchioness of Drogheda, the Countess Grey, the Hon. Mrs Edgcumbe, Lady Shelley and Miss Shelley, Miss Burdett Coutts, Mr. John Simeon, M.P. the Hon. H. Nelson, Lady Carolina Stirling and Miss Stirling, Mr. Somers Cocks, M.P., Mr. Thackeray, the Rev. William Sewell, Mr. Halswell, the Bishop of Norwich and Miss Howell, Lord John Manners, Mr. Watts Russell, Mr. Monckton Milnes, M.P., &c

We have not room for the interesting speeches delivered by Lord Lyttelton, the Bishop of Norwich, Mr. Sewell, Lord Wharncliffe, Lord John Manners, and others. These occupied several hours, and were listened to with the closest attention, and by some of the company (departing colonists, we presume) with manifest emotion. Later in the evening dancing took place on the upper deck of the *Randolph*, to the music of the band of the Coldstream Guards; but, notwithstanding this pleasant close of the entertainment, we observed throughout the day, and amongst the company generally, a tone of serious thought, not in the least melancholy, but of a manly and dignified cheerfulness suited to the occasion, and to the character of the English, now the only nation in the world capable of planning and accomplishing such enterprises.

THE CANTERBURY SETTLEMENT, NEW ZEALAND.—SKETCH ON BOARD THE "RANDOLPH" EMIGRANT SHIP.

THE ILLUSTRATED LONDON NEWS

No. 440.—VOL. XVII.] FOR THE WEEK ENDING SATURDAY, AUGUST 10, 1850. [SIXPENCE.

CALIFORNIA, AND ITS ASIATIC NEIGHBOURS.

EVERY arrival from the United States of America brings corroboration of the truth of previous reports of the mineral wealth of California. El Dorado is no longer a dream, but a reality. As yet, however, the gold percolates but slowly into the great marts of the world. There is no such abundance sent to the shores of Europe as to influence the old market price of that still rare and precious commodity. "The true uses of gold," says a Mormon apostle, "are to roof houses and to pave streets;" but the world has not arrived, nor is it likely to arrive, at such a consummation. Even if it did, we might well inquire the *cui bono?* If we might roof our houses with golden plates instead of tiles, or if we might walk upon pathways of pure gold, or drive our horses and carriages over macadamised lumps of the glittering metal, we should gain but little or nothing by the exchange. Tiles and slates and paving-stones have their appropriate uses; gold has no more. If California were all gold, and all California were transported into Europe, the world would actually be none the richer. It would only have to put a value upon some still rarer metal or commodity to answer the purposes of commerce, and to serve as a measure of other values. Diamonds, rubies, or platinum would supersede the metal which men now prize, and we should think no more of our golden footpaths than we now do of our granite *trottoirs* or our iron railways. Such a result, however, is not to be anticipated. It is even doubtful whether all the treasures yet discovered, or that ever will be discovered, in California will seriously affect the present value of the metal in the general markets of the world. We cannot learn that so much as ten millions' worth has yet been turned up in all the diggings; and we are not sure that ten times ten millions' worth distributed over America and Europe would render gold much less precious than it now is in all the haunts of busy humanity.

But the discovery of the treasures of California, even if those treasures be as inexhaustible and splendid as some imagine, seems destined to have other and far more important results in the history of the world, than any change in the relative value of the precious metals could be. A strip of land, hitherto barren and almost unknown, lying at the extreme west from Europe and America, and fronting the extreme east of Asia, has become suddenly peopled with a vigorous, active, restless, daring, and unscrupulous race. The immigrants of California, though imbued with the vices, possess, to a great extent, the virtues of civilisation, and especially those great virtues, energy and love of work. These virtues are the characteristic of the dominant people of the world, the Anglo-Saxon; and that people forms the large bulk of the swarms that have either already arrived, or are marching on their way to the harbour of San Francisco and the fascinating water-courses of the Sierra Nevada. These multitudes of energetic men will not always employ their energies in the hard and unwholesome work of the diggings; gold-hunting, fascinating as the pursuit may be, will not for ever engage their attention. Millions of men will, in the course of a very few years, be dwellers in the auriferous regions; and it needs but the ordinary knowledge of human nature to justify the belief that, in due time, the men of California, like the men in other parts of the world, will find that there are other sources of wealth than the washings of streams, the pickings of rocks, and the discovery of veins of gold upon the sides and bases of mountains. Ambition and quarrelsomeness are not likely to be extinguished on such a soil and amid such a people. The acquisition of California and the consequent discovery of its treasures was brought about by means of ambition and quarrelsomeness, and by means, also, of a wrong and an injustice. The United States fastened a quarrel upon a weak neighbour, and only made peace with her upon the surrender of a valuable portion of a long-coveted territory. In the inscrutable operations of Providence, out of this wrong a benefit resulted. A wandering and persecuted Mormon, disbanded from the conquering army of General Taylor, was washing at a mill—and, lo! California was revealed. The result of that wrong and of that accident is the creation of a new civilised state in a portion of the world hitherto untenanted by men with the energies peculiar to the European races; and in close proximity with two of the most populous, most jealous, most ancient, and most wealthy, but least known nations of the world. China and Japan, long without overlookers, have now got Brother Jonathan for a neighbour—the same greedy, unscrupulous, go-a-head, smart Brother Jonathan that picked a quarrel with and conquered Mexico. Brother Jonathan, in his new location, will, sooner or later, when tired of gold-digging, exercise that curiosity which, next to his energy, is his chief characteristic, by paying a visit of enquiry to these two close corporations, just to see what the "strangers" are like—to scrape acquaintance and do business with them, if possible; and, if not, to find or make a cause of quarrel. When we consider the character of the Anglo-Saxons that now people California, and that of the exclusive and haughty, but weak and nerveless Chinese and Japanese, the quarrel seems by far the more probable of the two results. In the great family of nations, nothing but distance can, in these times, maintain any one of them in that position of isolation in which those two states have so long remained. In their case, their best, if not only, safeguard against roving and busy Europe and her American offshoots, has been suddenly removed. The barrier of ages has been broken down; and California, teeming with life, ambition, and daring, will not allow another generation to pass away without taking the measure of the "flowery people," and displaying their country, by fair means or by foul, to the curiosity and the civilisation of the world. The Americans have already begun to speculate upon the subject; and, unless California be deserted, the opening up of these great empires from that direction is simply a question of time. Neither Americans nor Europeans justify or recommend the proceeding. A war with China or Japan would be as criminal as the war with Mexico; but, sooner or later, unless these empires condescend to make friends with the world of life and activity around them, they will share the fate that universally attends arrogant ignorance and weak stupidity. A stronger civilisation will overthrow them, just as in the continent of North America the Anglo-Saxons are gradually driving out—from very necessity—the inferior races of Spanish descent, who have present possession of Mexico. The great American essayist, Emerson, in his recently published volume, entitled "Representative Men," has some remarks which elucidate this subject. "Things," he observes, "seem to say one thing, and say the reverse. The appearance is immoral; the result is moral. Things seem to lead downwards—to justify despondency, to promote rogues, to defeat the just. But by knaves, as by martyrs, the just cause is carried forward. Although knaves win in every political struggle; although society seems to be delivered over from the hands of one set of criminals into the hands of another set of criminals, and the march of civilisation is a train of felonies, yet general ends are somehow answered. Throughout history, Heaven seems

THE SCHLESWIG-HOLSTEIN WAR.—BLOWING UP OF THE SCREW STEAMER "VON DER TANN."—(SEE NEXT PAGE).

to affect low and poor means. Through the years and the centuries—through evil agents—through toys and atoms, a great and beneficent tendency irresistibly streams." And so it will be in this case of California. It may be an immoral agency that shall finally overthrow the exclusiveness and jealousy of the Chinese and Japanese; but the result seems a matter of as absolute necessity as that the strong should conquer the weak, or that the light should dispel the darkness. The exclusiveness and jealousy of these nations have been in themselves immoral, and, in the march of events, must meet the inevitable punishment which Heaven has decreed on all offenders against the great moralities of nature. A nation has no more moral right to shut itself up in its own conceit, and refuse to open its territories to the sight or the tread of universal humanity, than the citizen of any one state has to isolate himself from the operation of the laws which are instituted for the general well-being. Every man owe something to every other man; and every state has a brotherly duty to perform towards every other state in the great family of civilisation. The civilisations of the extreme East have yet to learn this lesson, and California seems destined to be the instrument which shall teach them. Event is locked within event; and, whatever men may think of the morality of their own individual actions, "a great and beneficent tendency" over-rides them, for the general benefit and advancement of the world.

THE SCHLESWIG-HOLSTEIN WAR.

The Illustration upon the preceding page represents a strategic episode in the war—the blowing up of the screw steamer *Von der Tann*, thus related by the *Times* correspondent:

"Considerable sensation had been created in Hamburg on the 22nd by the intelligence that Lieutenant Lange, commanding the Schleswig-Holstein steam gun-boat *Von der Tann*, had blown up his ship rather than suffer her to fall into the hands of the Danes. It appears that he was trying to make his way from Tremmbde to Neustadt, when the vessel ran on shore. Fearing lest she might be made a prize by the enemy's cruisers, the crew took to the boats and set fire to the *Von der Tann*, which soon afterwards blew up."

The contending armies remain encamped close to each other, without any hostile movement, except an exchange of shots at intervals between the outposts. Since the retreat of the Holstein army within the entrenchments of Holstein Proper, the head-quarters of General Willisen have been fixed in the fortified town of Rendsburg; several battalions are camped in its immediate vicinity, but the main body of the army is at Wilstorf, about 3 leagues distant, at the head of Ober Eyder. The garrison of Rendsburg itself has not been materially increased. The Danes are throwing up field works at different points round the town of Schleswig, to guard it against attack; but neither side, from present appearances, contemplates an immediate renewal of operations.

The deficiency of officers in the Holstein army is being gradually supplied, there are daily arrivals of officers from the different German States, who volunteer for the service of the Duchies, and there would be still more if the Governments did not generally refuse leave of absence when applied for for this purpose. The Holsteners trust much to the excitement and sympathy the intervention will create in Germany, and which, by popular agitation, may to some extent compel the rulers to be less scrupulous. The number of German officers who have up to the present time reported themselves for service here has averaged four or five a day.

The Danish commander has issued a proclamation, declaring that those volunteers, if taken, will be regarded as without the pale of the treatment due to prisoners of war.

A considerable amount of money has also been received by the Stadholderate, derived from subscriptions in various parts of Germany.

The Danes at Eckernforde, though they have not taken possession of the *Gefion*, have compelled the Prussian troops on board her to take down the Prussian flag and hoist a white one, in sign of neutrality

FOREIGN AND COLONIAL NEWS.

FRANCE

Paris witnesses this week a great void created in the world of politics, by the prorogation of the Legislative Assembly, which takes place this day (Saturday), the Chamber having risen from Wednesday for the purpose.

The temporary absence of the President of the Republic is another feature in the prospective cloud of dulness which hangs over the gayest capital in the world, which, in a week or two, may vie with London after "the close of the season" in this respect.

M. Louis Napoleon's "progress" through the provinces commences on Monday next. He goes first to Lyons, and proposes to return to Paris about the 18th inst., by Strasburg and Metz.

M Berryer, the *chef* of the political adherents to the elder branch of the ex-Royal family, has gone to Wiesbaden to have an interview with the Count of Chambord, to place before him the views and objects of the Legitimist party in France. He will be followed by a large number of the Legitimists of all ranks

General Lamoricière has gone to Switzerland, where he is to have an interview with General Cavaignac. General Lamoricière is said to be the bearer of an important document, signed by many of the principals of the Republican party, acknowledging General Cavaignac as their political leader, and calling upon him to come forward in support should the gallant officer offer himself as a candidate for the President's chair of the Republic.

The Bank Bill for the resumption of cash payments has been adopted by the Assemblée, as also the Tours and Nantes and Orleans and Bordeaux Railway Bill.

The committee appointed to investigate the demand made by the Minister of War for an extraordinary credit of nearly 13,000,000*f.*, of which 10b,000*f.* were intended to meet the expenses of the proposed camp at Versailles, having reported against the measure (General Oudinot, who was chairman, taking the most prominent part in the committee in opposing the demand), the Government has announced its intention of forming the camp, and has thus got rid of the probable defeat of the Ministry, and the threatened differences between the President of the Republic and the Assembly.

Paris was visited on Tuesday by a thunderstorm, attended by rain, which fell in torrents. In some places the water was four feet deep. Shops and cellars were inundated. The carriage horses were up to their shoulders. Coaches plied in the Boulevard Montmartre to convey persons across for one sou.

On Wednesday morning the President of the Republic reviewed the newly-formed corps of Gendarmerie Mobile and the Republican Guards. The President was loudly cheered by the political spectators, amidst cries of "*Vive Napoleon!*" and "*Vive l'Empereur!*" The former prevailed

The *Silhouette*, a weekly paper, was seized on Sunday last for being published without a stamp. No less than 3000 persons had been printed, and as the penalty is 50*f.* upon each number, it must end in the stoppage of the journal, if the fines be rigidly enforced

UNITED STATES.

Accounts to the 25th ult. have reached us from New York. The new Cabinet, under the administration of President Fillmore, has been installed in office. It consists of Daniel Webster, of Massachusetts, Secretary of State; Corwin, of Ohio, Secretary of the Treasury; Preston, of Maryland, Secretary of the Interior; Bates, of Missouri, Secretary of War; Graham, of North Carolina, Secretary of the Navy; Crittenden, of Kentucky, Attorney-General; and Hall, of New York, Post-master-General. These are men of ample political experience and eminent talent ability. They will compose a Cabinet entitled to the public confidence, for its knowledge of the interests of the country, its weight of personal character, and its sound Whig principles.

The American prisoners at Cuba have been released by the Spanish authorities, and are expected to arrive soon in the United States

The Compromise Bill has been resumed in the Senate, and called forth an able and elaborate speech from Mr. Webster, after which an amendment, introduced by Mr. Benton, allowing a larger territory to New Mexico than was provided for in the bill, was rejected. Mr. Crawford, the late Secretary at War, laid a communication before the House, requesting the commencement of a legal suit, in order to test the validity of the Galphin claim.

The delegate to Congress from New Mexico has been refused a seat in the House by a majority of eleven votes. The effect of this vote is to deprive New Mexico of a hearing on the vital questions which are now pending, and in which her interests and even her existence are deeply involved. It was carried by coalition between slavery and anti-slavery men, united, which has long exerted a disastrous influence on the legislation of the country.

Our latest dates from New Mexico announce the continued ravages of the Indians. A treaty was made by Major Sumner with the Apaches, which they violated within three days. A detachment of soldiers was immediately sent out for their chastisement. The audacity of the Indians in attacking the people and property of the territory is represented as very frequently occurring within one or two miles of the military stations, killing persons and driving away cattle.

The Governor and Council of Massachusetts have decided against a commutation of the punishment in the case of Professor Webster, and have assigned Friday, the 30th of August, as the day for his execution.

On the night of Thursday, the 18th ult., the Atlantic shores of the United States were visited by a terrific storm of wind and rain from the east, which has destroyed much property and many lives. The deluges of the previous day have been truly disastrous. All the lines of railway and telegraph were much injured.

The feeling in Texas in favour of reducing Santa Fé as rebellious, and of denouncing the action of the United States is very strong. A great meeting of the people of Texas was held on the 11th ult., when, among the resolutions passed, was the following

Resolved, that the Governor of this State be requested on demand of the President of the United States, that he abolish the *de facto* Government now existing under his authority in New Mexico, within the limits of Texas; that all commissions held by, and instructions issued to, persons, to exercise the powers of government therein, be revoked and re-called; and that the army be instructed to confine itself to its appropriate duties, and to abstain and refrain from any and all interference in the affairs of the State of Texas, by which her rights and authority are to be disregarded, disclaimed and set at defiance.

All this looks very fierce, undoubtedly; but things in the long-run will be peaceably settled, especially if Congress should vote several millions of dollars in payment for the purchase of her imaginary boundary.

CALIFORNIA.

Advices from the gold country have been received *vid* New York to the 18th of June, being eighteen days later than the previous dates. Another awful fire had occurred at San Francisco, and had consumed a large portion of the principal business part of the city. The destruction is estimated at 5,000,000 dollars, considerable part being in goods consigned, the loss of which would fall on the shippers, who were being no means of insuring against fire there. All kinds of building materials had advanced in price. A large trade was doing with the Australian colonies, and a great many passengers had arrived from thence. Some new discoveries of gold had been made in Oregon, and were exciting attention; it was thought probable that some emigration would be directed there. Pacific City, near the mouth of the Columbia, was increasing in buildings, and a steamer was to be put on between that port and the upper waters of the Columbia. The miners were in good health, and assurance that there will be a greater quantity of gold dug this summer than before.

WEST INDIES.

The advices received this week from the various West India islands, by the *Dee* steamer, are again of a generally satisfactory nature in agricultural affairs, but they record the disastrous effects of a severe gale which visited most of the northern Antilles on the 12th and 13th July with great severity, and did a vast deal of damage; but the extent of the injury cannot be ascertained by the present mail. Antigua was the island most suddenly and severely visited, and the storm was so violent as to prevent the packet communicating with that island. Several wrecks occurred.

Our advices from Jamaica, which extend to the 6th ult., acquaint us with the opening and closing of the local Parliament, which met for the purpose of remedying a defect which existed in the Loan Bill of the previous session.

Some of the island papers and Jamaica urge most strenuously upon the attention of the colonists the cultivation of cotton upon a large scale.

NAVAL AND MILITARY INTELLIGENCE.

TRIALS OF SMALL ARMS AT WOOLWICH.—The trials of small arms in the Arsenal are now going on every week by order of the select committee, with some picked men of the Guards, commanded by Captain Brownrigg, and attended by Colonel Chalmer and other experienced officers. Mr. Lancaster's and the Prussian muskets are tried last week. This week the men began with a trial of the new ignition water-proof primer of Colonel P. Hawker, who was also present. All three of these arms went without a miss-fire, and will now be kept at the Arsenal in order to be further tested after exposure to rain, and every other trial for actual service.

THE IRISH SPIRIT TRADE AND THE NAVY.—The Chancellor of the Exchequer, yielding to the remonstrance which has been addressed to him on the subject of the annual supply of spirits to the Navy, has intimated that in future the contract shall not be confined to rum, but that whiskey shall be admitted as an article of contract, thus enabling Irish distillers to participate in a benefit from which they had been previously excluded. This will consequently be calculated to confer a great advantage upon the interests connected with the Irish spirit trade.

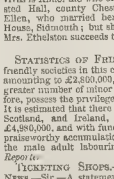
THE PROFESSIONAL POSITION OF NAVAL SURGEONS.—The following circular has been forwarded to all flag officers, captains, &c.: "Admiralty, July 17. My Lords Commissioners of the Admiralty are pleased to direct that the following regulations be established with reference to the rank and position of the assistant-surgeons of the Royal Navy. 1. Assistant-surgeons are to be divided into two classes. 2. The first class is to consist of all those who have completed three years' servitude from the period of their first entry; one year of which, at least, must be on board a commissioned ship, and the other two may be served in one of her Majesty's Naval hospitals, and who have passed their examination for surgeon either at home or abroad, as directed by the Admiralty instructions (chap. 2, art. 26, page 26); but in case the servant in which the ship may be employed should render it improbable that those surgeons can be assembled for a considerable period of time, then the captain may give an order to the surgeon of the ship to examine the assistant-surgeon whose period of time has expired, and, if found competent, may grant him a temporary certificate until the requisite officers can be assembled. 3. Assistant-surgeons who may have served more than three years, and have passed the examination for surgeons under the above conditions, are to rank the next to naval instructors, and are to mess with the wardroom officers, to be allowed cabins on board when the accommodation and space on board will admit. 4. The second-class of assistant-surgeons is to consist of all those who have not served three years, and those who have not passed their examination for surgeon. 5. The cabin specified in their Lordship's order of the 26th of February, 1846, is to be strictly appropriated to the officers mentioned in that order, and their Lordships' instructions on that head are to be fully carried out. 6. First-class assistant-surgeons, who may be serving in small vessels commanded by lieutenants, are to mess in the gun-room, with the other officers. 7. The above regulations are to be carried into effect on the receipt of this circular order. By command of their Lordships, J. PARKER. "To all flag-officers, &c."

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

THE HON. JOHN WINGFIELD STRATFORD, OF ADDINGTON-PLACE, KENT.

THIS gentleman, who died at his residence in Stratford-place, on the 3rd inst., aged 78, was second son of Richard, 1st Viscount Aldborough, by the Lady Emilia Stratford, his wife, daughter of John, first Earl of Aldborough. The additional surname of Stratford was assumed in 1809. He was born in 1772, and early entered the army, in which he attained the rank of Lieutenant-Colonel. He married first, in 1797, Anne, only child of Leonard Bartholomew, Esq., of Addington-place, Kent; and secondly, in 1833, Harriette, daughter of Henry Grant, Esq., of Gaol, county Glamorgan: by the former (who died in 1837) he had issue one son, John, and two daughters, Frances-Amelia, widow of the Rev. John Ceoli Hall, Archdeacon of Man, and Isabella-Harriet, wife of John Malcolm, Esq.

THE LADY ALBINIA CUMBERLAND



THE decease of this venerable Lady, who was in the 92d year of her age, occurred on the 2d instant, at her apartments in the Palace, at Hampton Court. She was the eldest daughter of George, third Earl of Buckinghamshire, by Albinia his wife, daughter and co-heir of Lord Vere Bertie. Her husband, Richard Cumberland, Esq., son of the celebrated dramatic writer, died many years since.

MRS. ELIZA PEEL, OF WALLINGTON HALL, NORFOLK.

ANOTHER respected member of the Peel family has departed this life. The lady whose name is prefixed to this notice died on the 1st instant, at her seat of Wallington Hall. She was daughter of William Yates, Esq., of Bury, aunt of the late lamented Sir Robert Peel, and widow of Robert Peel, Esq., who, as partner of his uncle, the first Baronet, amassed a large fortune, and purchased estates in various counties. The only issue of Mrs. Eliza Peel that now survives is Anne, the wife of the Rev. Charles Wicksted Ethelston, M.A., of Wicksted Hall, county Chester, rector of Upleyne. There was another daughter, Ellen, who married her cousin, Robert Peel, Esq., of Scarcombe House, Sidmouth; but she died before her father, in June, 1841. The son of Mrs. Ethelston succeeds to the large fortune of his maternal grandfather.

STATISTICS OF FRIENDLY SOCIETIES.—There are 14,000 enrolled friendly societies in this country, having 1,600,000 members, an annual revenue amounting to £2,800,000, and an accumulated capital of £6,400,000. A still greater number of societies are in existence, but not enrolled. We can, therefore, possess the privileges and means of self-protection enjoyed by the former. It is estimated that there are 33,333 societies in this position in England, Wales, Scotland, and Ireland, having 3,000,000 members, and paying annually £4,480,000, and with funds amounting to so large a sum as £11,360,000—the praiseworthy accumulations of the purely industrial classes. Indeed, half of the male adult labouring population are members of benefit societies.—*The Report*.

TICKETING SHOPS.—To the Editor of the ILLUSTRATED LONDON NEWS.—Sir,—A statement appeared in your columns of the 20th ult., highly prejudicial to us. We have waited until now for a contradiction, expecting to discover its author. We have also made an application to the magistrate, with the intention of indicting the parties for perjury, but find they left no name, and their statement was not on oath. The only course we have now is to rely on your love of justice for the insertion of a plain statement of facts:—Two women came into the shop and asked the price of some print dresses, and were told is. 11½d. the dress, that they were of the best manufacture, and the money procured if the colours changed in the wash. They desired three dresses to be cut off They afterwards looked at some skirts, and bought two, the parcel was packed up and given to them. A bill was then made. They then found they had not sufficient money to pay, and said they would take the skirts only. This was refused upon the ground that they were cut off especially for them, and that several ladies had gone out unserved owing to all hands being engaged at the time. They also stated the dresses were marked 11½d. The absurdity of having a dress of the best Manchester print for such a price must be evident to all. But the is. was marked in letters four inches in diameter [illegible] we believe, unprecedented, and which we could not afford to do at, but from the fact of our printing them ourselves.—We are, sir, yours obediently, JAMES REID and CO., 16, Oxford-street. (We copied the report in question from a morning contemporary.)

IMPERIAL PARLIAMENT.

HOUSE OF COMMONS.—SATURDAY, AUGUST 3.

The Speaker took the chair at twelve o'clock.

HISTORICAL RECORDS.

On the motion for bringing up the report of the committee on supply,

Mr. HUTT called the attention of the House to the publication and distribution of the historical work called "Monumenta Historica Britannica." The first volume of this work had cost the public £10,000, and it was sold at five guineas. The Secretary of State, however, subsequently altered the price to two guineas, which sum was now charged for the work. He (Mr. Hutt) complained that even that sum was too much for the public to pay for a work the whole expense in publishing which the public had itself defrayed. He thought that the work ought to be sold at the mere cost of the printing and paper, for the sum now charged had a prohibitory effect on the distribution of the work, as it appeared that, out of 600 copies printed, only 45 had been sold at the price mentioned. (Hear, hear.)

Mr. C. LEWIS reminded the House that this work was merely a compilation or a reprint of historical works which would be found in many libraries. He thought, therefore, that the sum of £2 2s. was not too much to pay for the convenience of having these records collected in one volume, but should it be found that it would have a prohibitory effect on the circulation of the work, the matter would be taken into consideration.

Mr. HUME suggested that they should pursue the plan adopted in Prussia, and which was, in his opinion, productive of great advantage, namely, to send a copy of every work of such a nature to each library in the kingdom, having previously obtained such security as would ensure the preservation of the book. (Hear, hear.)

Mr. J. BROTHERTON and Mr. G. THOMPSON having expressed their concurrence with Mr Hume's suggestion, Mr. HUTT gave notice that he would next session call the attention of the House to the same subject.

The report of the committee of supply was then brought up and agreed to.

WAYS AND MEANS.

The reports of the Committees of Ways and Means were received and agreed to, after some discussion, during which two pledges were given, one by Mr. HUME, that "next session" he would apply his undivided attention to financial questions, and oppose any vote of public money after twelve o'clock at night, the other by Mr. Brotherton, that "next session" he would propose that, at twelve o'clock at night, the Speaker should *ipso facto* quit the chair, as he now did at six o'clock on Wednesdays, a practice which, he observed, had worked well, and induced members to economise time.

The Corn Duty Cess (Ireland) Bill, and the Fees (Court of Common Pleas) Bill, were read a third time and passed.

The National Gallery (Edinburgh) Bill went through committee.

The Appropriation Bill was brought in by Mr. C. LEWIS.

The House adjourned at two o'clock.

HOUSE OF LORDS.—MONDAY.

ROYAL ASSENT.

The Royal Assent was given by commission to the Australian Colonies Government Bill, the Factories Bill, and several other public and private bills.

The Small Tenements Rating Bill was read a third time and passed.

The Cruelty to Animals (Scotland) Bill and the Public Libraries and Museums Bill went through committee

Lord BROUGHAM withdrew the Charitable Trusts Bill on account of the lateness of the session.

The Commons' amendments to the County Courts Extension Bill were considered.

Lord REDESDALE moved that the Commons' amendment on the 17th clause, relative to the town-halls, be disagreed from.

On a division there were, for disagreeing from the amendment on the 17th clause—Content, 11; Non-content, 13: majority against Lord Redesdale's motion, 2.

The Commons' amendments were agreed to.

Several unopposed bills on the table were advanced a stage without discussion. Adjourned.

HOUSE OF COMMONS.—MONDAY.

The House met at noon

NOTWITHSTANDING the announcement that the debate with respect to Baron Rothschild's claim to take his seat as member for London would be resumed today, the attendance of the House and of strangers was not as large as on previous occasions.

ADMISSION OF JEWS.—BARON ROTHSCHILD.

MR. J. A. SMITH—previous to the resumption of the discussion on Baron Rothschild's proceedings—inquired how it happened that it was not recorded in the votes that Baron Rothschild had signed a declaration on paper and left it on the table, after he had taken the oaths

The SPEAKER replied, that the reason the fact of the Baron's having signed a paper and left it on the table of the House did not appear recorded in the votes of the House, was that the proceeding was informal and irregular. The paper had not been formally tendered to the House, and he (the Speaker) could not recognise it.

The clerk having read the record of the proceedings entered in the votes of the House,

The ATTORNEY-GENERAL moved the resolution of which notice had been given on the part of the Government, viz. "That the Baron L. N. de Rothschild is not entitled to vote in the House or to sit in the House during any debate until he shall make the oath of adjuration in the form appointed by law." And, "That the House will, at the earliest opportunity in the next session of Parliament, take into its serious consideration the form of the oath of adjuration, with a view to relieve her Majesty's subjects professing the Jewish religion." The hon and learned gentleman said that the two resolutions were perfectly distinct, and that any one might vote for one and reject the other. It appeared to him that the question was ripe for the decision of the House, and that the House was bound to decide it, inasmuch as it wished all its former resolutions upon it to be regarded as a mockery. There were three requisites in an oath—the substance, the form of words, and the manner of taking it. With regard to the form, he regarded it as a material part of the oath, and he did not think the House could dispense with it or alter it. It could not be denied that Baron Rothschild had not taken the oath of adjuration in the form appointed by law. But, after a stricter examination of the subject than he had given when he last discussed the question, he came to the conclusion that the Baron's seat was not vacated in consequence of his not taking the oath, and that the House was not authorised by statute or constitutional law, or by usage of Parliament, to issue a new writ. The law was, therefore, in this monstrous state, that a member returned to serve in Parliament was prevented, by the idle form of an oath (now obsolete, and which no one could violate even if he ever so willing), from sitting and voting, and his constituents were prevented from having the benefit of his services. It appeared to him (the Attorney-General), therefore, that it was incumbent to pledge the House to alter this state of the law at the first practicable opportunity. The course he recommended was one of the most advantageous to Baron Rothschild himself; nor, were the House to resolve that the Baron could take his seat, and were he to sit and vote, he would subject himself to all the penalties of a "Popish recusant convict," the penalties which would penetrate him were he using in courts of law.

Mr. HUME moved, as an amendment, "That the Clerk of the House having proceeded, as directed by the House, to administer the oaths to Baron Lionel Nathan de Rothschild, one of the members for the City of London, upon the Old Testament, being the form he declared to be most binding on his conscience; and the Baron having so sworn to the oath of adjuration with the omission of the words 'upon the true faith of a Christian;' and doubts having arisen as to the legal effect of his so taking the oath, it is expedient, at the commencement of the next session of Parliament, that a bill should be introduced, to declare the law with reference to the due administration of that oath; and, further, the House would then take into its serious consideration the subject of the oaths now administered to its members, with reference to the changes which have taken place since they were first imposed by law."

Mr. ARDEN, having ascertained that it was not the wish of Baron Rothschild to be heard by himself, his counsel, or his agent, in support of his claims to sit and vote, withdrew the amendment of which he had given notice to that effect The honourable and learned member supported Mr. Hume's amendment.

Mr. DISRAELI considered that no men had less cause of complaint against the Legislature of this country than Englishmen professing the Jewish religion. Considering the state of social degradation and political disability in which they were placed a quarter of a century ago with the greatly ameliorated condition in which they now stood, he was of opinion that they had much reason to be thankful. The natural impatience of Baron Rothschild and his friends, arising from the position in which they were placed, had found vent in accusations against the House of Lords. But the House of Lords had acted, in regard to the admission of Jews to Parliament, in a perfectly fair and constitutional manner. When, three years ago, a bill was sent up to them, it was rejected by no overwhelming majority; and when, two years ago, a second bill was sent up to them, that was rejected by a decreased majority. But on the occasion of a London had returned Baron Rothschild a second time by a triumphant majority, the House of Lords had had no opportunity afforded them of reconsidering the subject. It was not the House of Lords, but her Majesty's Government who were responsible for the position in which Baron Rothschild and the question of the admission of Jews to Parliament were placed; and it was to extricate the Government from their embarrassment that the House was asked to agree to two resolutions, one of which was almost unconstitutional in its character, and the other of which was impolitic, as pledging the House to a course to be taken in a future session. He (Mr. Disraeli), speaking on himself on this occasion, was not prepared to vote for either of these resolutions though he still hoped that full and speedy justice would be done to the descendants of that race which all admitted to be sacred, and to the professors of a religion which all admitted to be divine.

SIR R. INGLIS would oppose the Attorney-General's resolutions, on the broad ground that he was determined to oppose every proposition that had for its object the destruction of the Christian character of the British Legislature

Mr. ROEBUCK charged the Attorney-General with proposing a course ungenerous, unsafe, and discreditable. The proper straightforward mode of dealing with this question would be boldly to propose that Jews be admitted to Parliament. Keeping them out by means of the abjuration oath was unworthy and

paltry. The oath itself was ridiculous, and was never designed to apply to Jews.

Mr. Reynolds could not vote for the Attorney-General's resolutions.

Mr. F. Wood contended that by the existing law Baron Rothschild was entitled to take his seat and vote in the House.

The Solicitor-General (Mr. Cockburn) regretted that he could not come to the same conclusion. He was called on by the first resolution to declare the law, and as a lawyer he felt bound to say that Baron Rothschild could not legally sit and vote in the House. The words "upon the true faith of a Christian" were a substantial part of the oath, and the House could not dispense with them.

Mr. Bright pointed out the affirmation made by Mr. Pease, Mr. Ellis, and himself when they took their seats in the House, and insisted that they did not affirm either the abjurations or the form of the abjuration oath.

Mr. Goulburn explained the particular circumstances under which Mr. Pease had been permitted to make the affirmation.

The House having divided, there were—For putting the original resolutions, 163; against it, 101: majority against Mr. Hume's amendment, 62.

The House then divided on the first resolution proposed by the Attorney-General—For the first resolution, 166; against it, 92: majority for the first resolution, 74.

Mr. Bright endeavoured to induce the First Minister to pledge himself that the Government would propose the measure next session as a Government one —taking up the question, and standing or falling with it.

Lord J. Russell declined to take the pledge.

After a desultory discussion, the House divided on the Attorney-General's second resolution—For the second resolution, 142; against it, 106: majority for the second resolution, 36

The House adjourned from half-past five to seven o'clock.

STAMP DUTIES.

At the resumed sitting the House went into committee on the Stamp Duties (No 2) Bill, and the clauses and schedules were agreed to, with amendments, after lengthened discussion, the principal amendment being the reduction of the duty on conveyances, &c., from £1 per cent. to 10s. per cent.

CUSTOMS BILL.

In committee on the Customs Bill, Sir J. Graham objected to a clause by which it was proposed to give to the Board of Customs general unlimited powers of making rules and regulations in lieu of the powers strictly limited by statutes now enforced to it.

The Chancellor of the Exchequer contended that it was necessary to give the Board of Customs general powers for regulating the most convenient manner of carrying the existing duties and carrying into effect the acts of Parliament.

After a discussion, the Chancellor of the Exchequer allowed the clause to be struck out of the bill, on the understanding that it should be reconsidered in the report.

The bill went through committee.

MARLBOROUGH HOUSE.

In committee on the Marlborough House Bill, Mr. Hume objected to it altogether, and, with the view of defeating the bill, moved that the chairman report progress.—For reporting progress, 66; against it, 115: majority against Mr. Hume's motion, 59.

The bill went through committee.

IMPURITY OF THE PARLIAMENTARY ATMOSPHERE.

In the course of the discussion, Mr. Mowatt complained of the stench that prevailed in the House during the evening, which he declared to be intolerable.

Mr. Hume thought the stench very natural, considering the general corruption of the House. This was true, the first ever perpetrated by Mr. Hume, caused extraordinary astonishment and admiration; the hon. member himself seemed quite amazed at his own brilliancy.

The Assessed Taxes Composition Bill and the Assizes (Ireland) Bill passed through committee

ANNUITY OF THE DUKE OF CAMBRIDGE.

The Duke of Cambridge's Annuity Bill was read a third time.

Mr. Hume proposed an amendment, for the purpose of reducing the annuity from £12,000 to £8000. Considering that labourers' wages were reduced to 8s. or 7s. a week, he thought that £8000 would be enough; but he had no hope of carrying a proposal to reduce the allowance to £5000, therefore he was obliged to be satisfied with trying a reduction to £8000

The House divided—For the original annuity, 111; against it, 52: majority against Mr. Hume, 59.

Mr. Bright moved a proviso, the effect of which was, that in no case should the Duke of Cambridge receive more than £12,000 per annum of public money.

For Mr. Bright's proviso 39; against it, 108: majority against the proviso, 69.

The bill then passed

The Police Superannuation Fund Bill passed through committee.

The Canterbury Settlement of Lands Bill was read a second time.

The Public Health (Ireland) Bill was postponed till next session.

The Tenant Right (Ireland) Bill was also postponed till next session.

Lord Seymour brought in a bill to confirm certain provisional orders of the General Board of Health.—Adjourned at a quarter past one o'clock.

HOUSE OF LORDS.—Tuesday.

The Public Libraries and Museums Bill was read a third time and passed.

The report of the Treaty to Annex (Scotland) Bill was received.

The Poor Relief Bill was read a second time.

LORD BROUGHAM.

Lord Brougham complained of an attack made on him in one of the journals, reflecting on his mode of conducting appeals in their Lordships' House, and asserting that his judicial conduct had been the subject of remonstrance on the part of the Bar. The noble and learned lord detailed the judicial labours he had performed, and maintained that he had patiently heard and maturely considered the appeals that came before him, and that he lost no time in delivering judgments —the result of his exertions being that there were no arrears left.

The Lord Chancellor testified to the patience and diligence exhibited by Lord Brougham, and to that his judgments had given satisfaction to the Bar

The Duke of Wellington said that their Lordships were under great obligations to Lord Brougham for his extraordinary activity and diligence in hearing appeals and keeping down arrears. He trusted the noble and learned Lord would not allow these attacks in the newspapers to induce him to discontinue his exertions.

After a few remarks from the Marquis of Lansdowne, the subject dropped.

The Marquis of Salisbury moved the third reading of the Small Tenements Rating Bill.

The Earl of Harrowby opposed the bill, and moved as an amendment, that it be read a third time that day three months.

Lord Portman considered that some such bill as this was necessary, and therefore he trusted the House would read the bill a third time.

The bill was read a third time, and passed without a division.

THE FRANCHISE, IRELAND.

The Marquis of Lansdowne moved the consideration of the Commons' amendments on the Parliamentary Voters, &c. (Ireland) Bill, and, having described the points in which the Commons had receded from the Lords' amendments, urged their Lordships to assent to the compromise in the franchise qualification proposed by the Commons, viz. £12, and to the re-introduction of the compulsory registration clauses.

Lord Stanley said he considered the points on which the Commons had yielded to the opinion of their Lordships comparatively unimportant, whilst the two points on which the Commons had refused to yield to the opinion of their Lordships were the really important ones. The £15 qualification was fixed by their Lordships, not as a compromise or bargain with the Commons, but as the lowest qualification that could agree to safely with the maintenance of a sound representative system in Ireland. A lower qualification than £15 would create a representation of mere numbers that would overbear all property. The last election for the county of Mayo was an example of the danger of a pauper constituency, for in that case the election had been carried against the landlords, the proprietors, and the occupiers of the soil, by the unblushing intimidation of the Roman Catholic priesthood. He trusted their Lordships would adhere to the £15 qualification. With respect to the compulsory registration, he had a strong opinion of the dangerous character of that principle; but, had the Commons shown a real disposition to concede to the opinion of their Lordships on the qualification, he might have been induced to yield on this point. The noble Lord called on their Lordships to insist on restoring the £15 qualification, and in expunging the compulsory registration clauses.

After a few observations from the Marquis of Clanricarde, their Lordships divided

For insisting on the £15 qualification,					
Contents present	..	..	..	..	62
Proxies	..	..	..	..	52
					114
Non-contents—Present	..	..	..	..	56
Proxies	..	..	..	..	70
					126
Majority for the Government	..	..	..	..	12

The £12 qualification was therefore agreed to.

The other amendments of the Commons were also agreed to without a division, after a protest from Lord Stanley against the unusual use of proxies practised by the present Government. Adjourned.

HOUSE OF COMMONS.—Tuesday.

CRIME (IRELAND).

The House met at noon, when the adjourned debate on Lord John Russell's motion for leave to bring in a bill to continue the Crime and Outrage (Ireland) Act for two years, and Mr. Sharman Crawford's amendment thereto, was resumed by Mr. Moore, who opposed the bill.

Colonel Rawdon spoke in favour of, Mr. Scully and Mr. M'Cullagh against the bill.

After a long discussion, the House divided—For Mr. Sharman Crawford's amendment, 28; against it, 81: Majority against the amendment, 53

The debate was resumed on the original motion.

Mr. Fox then moved the adjournment of the debate, and the House divided—For the adjournment, 24; against it, 85 majority against the adjournment, 61.

After another discussion, the House divided on the main question—For bringing in the bill, 84; against it, 24. majority, 60.

Leave was at length obtained to bring in the bill, and the House adjourned.

At the evening sitting—

THE DUBLIN AND LONDON MAILS

Mr. Reynolds drew attention to the great public inconvenience caused by the present mode of transmitting the mails between Dublin and London. He complained that the mail which leaves London at half-past five o'clock takes 17½ hours to reach Dublin, whereas it might be conveyed in 11½ hours, as was proved by the fact that the morning mail from London reached Dublin in 13 hours. He contended that the mails from Dublin to London might reach London at a quarter past ten instead of one o'clock, as at present. He attributed the delay he complained of to the desire to sacrifice the interests of Ireland to those of Liverpool, which sacrifice was effected at Chester.

Mr. C Lewis promised that the whole question would be well considered by the Postmaster-General, who had already devoted his attention to it.

HOLYHEAD.

Leave was given to the Chancellor of the Exchequer to bring in a bill to relieve the Chester and Holyhead Railway Company from the payment of £200,000 towards the construction of Holyhead Harbour, and to amend the acts relative thereto.

The House went into committee on the Medical Charities (Ireland) Bill, and agreed to its clauses, after much discussion.

The Stamp Duties (No. 2) Bill, the Customs Bill, and the Marlborough House Bill, as amended, were severally considered

The Consolidated Fund (the Appropriation) Bill went through committee.

LANDLORD AND TENANT (IRELAND).

On the motion of Mr. Hamilton, to go into committee on the Landlord and Tenant (Ireland No. 2) Bill,

Mr Bright declared his determination to oppose the bill in every stage, because he regarded it as an attempt to increase the powers of the Irish landlords, without regard to the interests of the tenants. He understood that it had the approval of the Lord-Lieutenant of Ireland, but that would not induce him to assent to the measure. He moved, as an amendment, that the bill be committed that day three months.

Mr. Hamilton urged the necessity of passing the bill, in order to confer the power of distraining growing crops, and to prevent tenants from fraudulently cutting and running away with the produce of the land.

Mr. M'Cullagh, Mr. Anstey, Mr Moore, Mr. P. Scrope, Mr. R. M. Fox, and Mr. S. Crawford spoke against the bill; Colonel Dunne, Mr. Lennard, Mr. Henley, and Sir W. Somerville, in favour of it.

Mr. Anstey moved the adjournment of the debate.

The House divided—For the adjournment, 22; against it, 46: majority against adjournment, 24.

Mr. Reynolds immediately moved the adjournment of the House, and threatened to obstruct the bill in every possible way.

After another long talk against time, protracted up to half-past one o'clock,

Lord Palmerston recommended that, as it was evident no progress could be made in the bill that morning, an agreement should be come to between both parties, either to adjourn the debate or to allow the bill to be committed *pro forma*, and the noble Lord suggested that they might toss up for the choice between adjournment and the *pro forma* committal.

The debate was finally adjourned.

The other orders having been disposed of by the usual summary process, the House adjourned at two o'clock.

HOUSE OF COMMONS.—Wednesday.

The Speaker took the chair at twelve o'clock in the New House, in which some further attempts had been made to overcome the acoustic defects of its construction. The temporary roof which was tried the week previously had given place to one of a much more substantial and finished character, constructed with greater attention to the architectural design of the building, though still the "effect defective" in this respect was very conspicuous. The only point, however, with which the reporter ought to interest himself is, whether it will secure for him a better hearing; and in this respect it must be acknowledged to be entirely successful. The desks in the reporters' gallery were lowered about half a yard, the arrangements of that most important portion of the House would be perfect

Sir W. Clay withdrew the Compound Householders Bill.

INCUMBERED ESTATES (IRELAND)

Mr. Hamilton moved the second reading of the Incumbered Estates (Ireland) Bill, which had come down from the House of Lords. The hon. member urged the necessity of having some restriction on the operation of the Encumbered Estates Act, which was confiscating all the property in Ireland. Even the property of estates that were not safe under the existing law, for, when lands were sold by the commissioners, enough was not obtained to pay encumbrances. This bill was designed to mitigate the evils arising from the Encumbered Estates Act

The Attorney-General opposed the bill, which he regarded as a piece of one-sided legislation, framed with a view to the interests of the landlords only. It would interfere prejudicially with the operation of the Encumbered Estates Act; and one clause in it would enable parties to keep possession of estates in spite of the creditors. By the clause which enacted that estates should not be sold under fifteen years' purchase, the present holders would be enabled to keep possession, in defiance of encumbrances, and to the impoverishment of the tenants. The hon. and learned gentleman moved, as an amendment, that the bill be read a second time that day three months

After a lengthened discussion,

The amendment was carried without a division The bill was consequently thrown out

The House went into committee on the Friendly Societies Bill, and agreed to the clauses down to 37. Progress was then reported.

The Stamp Duties Bill was read a third time and passed

The Marlborough House Bill, the assessed Taxes Composition Bill, the Assizes (Ireland) Bill, the Poor Relief Continuation Fund Bill, and the Canterbury Settlement Lands Bill were severally read a third time and passed.

The General Board of Health (No. 3) Bill was read a second time.

The Chancellor of the Exchequer obtained leave to bring in a bill to facilitate the transfer of loans for the improvement of landed property in Ireland.

The bill was brought in and read a first time.—Adjourned at a quarter before six o'clock.

HOUSE OF LORDS.—Thursday.

The Grand Jury Cess (Ireland) Bill and the Summary Jurisdiction (Ireland) Bill were each read a second time.

ECCLESIASTICAL COMMISSION BILL.

The Marquis of Lansdowne moved the order of the day to consider the amendments of the Commons to the Ecclesiastical Commission Bill.

The Archbishop of Canterbury moved the rejection of the Commons' amendments on the 13th clause. The Commons, by these amendments, had united together the episcopal and the general fund, whose the House of Lords had separated the funds from each other. He therefore moved the rejection of the Commons' amendments.

The Marquis of Lansdowne supported the Commons' amendments.

The Earl Powis supported the amendment of the Archbishop. If the two funds were amalgamated together, it would be annually distributed. It would be absorbed in small livings, and, when the establishment of a new bishopric was considered desirable, they would be told there was no fund for the establishment, and that would be a just answer. The Commons' alteration was an invidious attempt to prevent the establishment of new bishops when required to meet the wants of the increasing population

The Bishop of Oxford remarked, that, under the new arrangements, the fund for bishops would be forestalled. He hoped their Lordships would adhere to their former decision

After a few words from Earl Grey and the Bishop of Salisbury,

Their Lordships divided—					
For the rejection of the Commons' amendments	..	..	..	..	22
For retaining them	..	..	..	..	37
Majority	..	..	..	..	—15

Adjourned.

HOUSE OF COMMONS.—Thursday.

The House met at twelve and sat to half-past four o'clock, when it adjourned, and met again at half-past six o'clock

The Spitalfields and Shoreditch New Street Bill passed through committee.

RECENT POSTAL REGULATIONS.—MEETING AT FREEMASONS' TAVERN.

Mr. Hume presented a petition from the inhabitants of London and Westminster, in public meeting assembled, stating the grievances and inconveniences inflicted on the people by the recent postal regulations on Sunday, particularly with regard to the transmission of weekly newspapers, which were the means of conveying solid instruction and useful information to a large portion of the population, and praying the House to urge her Majesty's Government to rescind those regulations. The hon. member also presented a similar petition from Chester.

IMMIGRATION OF AFRICANS TO THE WEST INDIES.

On the motion that the Consolidated Fund (Appropriation) Bill be read a third time,

Mr. Bernal called the attention of the House to the evils at present arising to our West Indian colonies, particularly to Jamaica, owing to the state of the law with regard to the employment of Africans who had been rescued in those colonies. According to existing arrangements, natives of Africa were brought to the colonies under agreements binding only for one year, and it generally happened that their labour was not remunerative to their employers during that period. When they arrived they were generally covered with sores, and unfit for work, and it was a long time before they became tractable. The labouring population was in consequence in a very deplorable state, and was every day more deserving the serious and maternal consideration not only of the Government of the colony, but also of this country. What he proposed was that the period for employing these people should not be less than three years, and in that case he thought their employers would be induced to devote more attention to their moral, religious, and mental improvement. There were important points connected with this question, and he hoped that the attention of the Colonial Office would be turned to it.

Mr. Hume confirmed the melancholy facts which had been stated by the honourable gentleman.

Mr. Hawes said, with respect to the term of duration of the contracts entered into by immigrants, neither himself nor the noble Lord at the head of the Colonial-office very much approved of long contracts of this kind, and it was quite in the power of the immigrants, if they were indisposed to work, to make these contracts a burden to the employer. There was nothing to enforce work without resorting to the means which would be justly reprobated. The sanction, however, of the Colonial office had been given to contracts for three years in British Guiana: and although the term was still limited to one year, the alteration rested with the local Legislature, and not with the Colonial-office. It was a mistake to suppose that the subject of the importation of free labour into the colonies was a subject which had never been taken into consideration by the Colonial-office. Many efforts had been made, but he considered that it was a thing almost impossible, except by means which he was sure the House and the country would never sanction.

The bill was then read a third time, and passed.

CRIME AND OUTRAGE BILL (IRELAND).

On the motion for the second reading of this bill, Mr. S Crawford rose to move that the bill be read a second time this day three months. The provisions were unconstitutional, oppressive, and unjust. There were two systems of government—one had recourse to just and humane laws, while the other pursued a policy of coercion. Now, ever since Ireland had been connected with this country, she had been governed by the latter system: but the time had come when a change must be made in the government if the Legislature wished to secure the tranquillity of Ireland.

Sir George Grey reminded the House that considerable discussion had taken place already on asking for leave to introduce this bill, which, in the ordinary course of things, would have been had on the second reading. Believing that the Act which the bill proposed to continue for a limited period had done indubitable good in the prevention of outrage to life and property in Ireland, he would give it his support.

After some discussion, the House divided, when there appeared—

For the amendment	..	..	..	..	26
Against it	..	..	..	..	89
Majority	..	..	..	..	—63

The amendment was consequently lost.

The bill was then read a second time.

LANDLORD AND TENANT BILL.

After a few observations from Mr. Hamilton,

The order of the day for the adjourned debate on this bill was disclaimed on the motion of Mr. Reynolds.

CUSTOMS BILL.

On the motion for the third reading of this bill,

The Chancellor of the Exchequer moved the insertion of the following clause:—"And whereas divers rules, orders, and regulations have from time to time been made by the Commissioners of her Majesty's Customs, in pursuance of the powers conferred upon them by certain Acts passed in various sessions of Parliament, some of which Acts have since been repealed; and doubts have arisen whether such rules, orders, and regulations are of legal force and efficacy; be it therefore enacted, that all rules, orders, and regulations already made or issued by or under the authority of the said Commissioners, under or in pursuance of any Act or Acts relating to the Customs, or to trade or navigation, unless and until the same shall be revoked or rescinded; and that all acts whatsoever done or to be done in pursuance of any such orders, rules, and regulations shall be valid and effectual." Upon which,

Mr. Hume objected to the clause

The House divided, when there appeared—For the clause 50; against it, 14: majority, 36.

The clause was then agreed to, and the bill was read a third time and passed.

The Administration of Criminal Justice Improvement Bill was withdrawn for the present session by Sir G. Grey, as also the Chief Justices' Salaries Bill, Lord J. Russell stating that the recommendations of the Salaries Committee would be considered carefully by the Government during the recess.

SAVINGS-BANKS BILL.

Sir H. Willoughby urged the propriety of withdrawing this bill for the present session, as it was one of great importance, and could not at that late period be properly discussed.

The Chancellor of the Exchequer concurred in the observations of the hon. gentleman, and consented to withdraw the bill for the present.

The bill was accordingly withdrawn.

The Landlord and Tenant (Ireland) (No. 2) Bill was ordered to be committed that day three months

The General Board of Health (No. 3) Bill passed through committee.

The Copyright of Designs Act Amendment Bill passed through committee *pro formâ*.—Adjourned.

THE NEW HOUSE OF COMMONS.

The select committee appointed to inquire into and report upon the accommodation afforded in the New House of Commons, and in the lobbies and passages immediately adjacent thereto, and whether any improvement can be made therein, and the probable expense of making such alterations, have proceeded in the examination of the matters to them referred, and have agreed to report to the House—

"That the plan submitted by Mr. Barry, providing accommodation for 316 members on the floor of the house, or for 338 members (if seats for Peers be provided in the south gallery), or for 349 members by the side galleries, allowing 20 inches for each member, will, in the opinion of the committee, be an improvement on the present house, and afford adequate accommodation for the transaction of public business; and that the probable expense of making the alterations proposed will be £9600

It may not be out of place here to mention that, although Mr. Barry has, by adopting the plan proposed by Sir B. Hall (with modifications of his own), secured accommodation for 468 members, the general accommodation for the public and the members of the press is of the most inconvenient and unsatisfactory description. The total number of persons who can secure seats in the building is only 604, viz 468 members and 136 strangers. Of the 136 seats allotted to strangers, 36 are for Peers and official persons, 36 for persons admitted by orders laid of the Speaker, and 64 for the public admissible on presenting the written orders of members. The accommodation provided for the gentlemen forming the Parliamentary corps of the morning papers is of the meanest possible description. When it is borne in mind that several of those gentlemen are compelled to remain in attendance during the entire sitting of the House, it is not unreasonable to expect that some adequate accommodation should be prepared for them. As at present arranged, their gallery is approachable by a narrow flight of stone steps, which leads to a couple of miserable apartments, with slated floors, and without fire-places or sufficient light. These rooms, which resemble cells in a penitentiary, are about ten or twelve feet high. One of them is so dark that it is impossible either to read or write in it; and even the luxury of an unken table is dispensed with, a sort of shelf or ledge of planks being substituted. There is no place where refreshments can be had; and, as before remarked, there is no fire-place in either of the cells. The accommodation provided for third-class passengers at a railway station, which is only occupied for a few minutes, is far preferable to that which the "select committee" and Mr. Barry have provided for the representatives of the public.

THE GORHAM CASE.

On Tuesday, the Arches Court, on the motion of Dr. Bayford, decided that, acting ministerially, it would carry into effect the order of her Majesty in Council, and declare Mr. Gorham entitled to be instituted to the Vicarage of Brampford Speke; but, first, a copy of the minute must be transmitted to the Archbishop of Canterbury, that his pleasure might be signified.

Institution of the Rev. G. C. Gorham.—At the termination of the ordinary business in the Prerogative Court on Tuesday, the Rev. G. C Gorham was unexpectedly introduced to Sir H. J. Fust. Having signed the articles and taken the customary oaths, Sir H. J. Fust addressed Mr. Gorham to the following effect:—"I, Sir Herbert James Fust, LL.D., Doctor of Laws, Official Principal of the Arches Court of Canterbury, lawfully constituted, do, by virtue of the authority to us committed, admit you, the Rev. George Cornelius Gorham, clerk, B.D., to the vicarage of Brampford Speke, in the county of Devon, diocese of Exeter, and province of Canterbury; we do give you true, lawful, canonical institution, and do invest you with all the rights and appurtenances thereunto belonging, and do commit to you the cure of the souls of the parishioners of the said parish." Mr. Gorham then bowed to the learned judged and retired, accompanied by his proctor, b.r. Bowdler

The Bishop of Oxford.—A memorial having been addressed to the Bishop of Oxford, signed by 247 graduates of the University, not being members of the Convocation, of whom 100 are in holy orders, praying his Lordship to take such measures as shall seem most effectual, for the declaration and restoration of the doctrine of Holy Baptism, and for relieving those who feel grieved in conscience by the legal sanction given by the late sentence to the denial of that article of faith, his Lordship replied as follows:—

Cuddesdon Palace, August 2

Sir,—Upon reaching home from my duties in Berks I have found an address forwarded here by you as one near two behalf and that of a large number of graduates in the University of Oxford who are not members of the Convocation. I have read the expression of your faith herein with the greatest pleasure. With you I hold it as an undoubted fact that the Church of England considers the matter of revealed faith, that every infant offered by the Church to God in Holy Baptism is therein regenerated by his grace, and receives a remission of sins through the merits of Christ our Lord; and, God helping me, I will take (as your address prays me to do) all measures in my power to preserve this teaching of the Universal Church pure and incorrupt amongst us. I am, sir, yours, in the common faith,

S. OXON.

G. R. Portal, Esq.

Loss of the "Corsair," Emigrant Ship.—This noble vessel, nearly 1000 tons burthen, was, we regret to say, totally lost on her last outward passage on the eastern banks of Newfoundland, with a very near sacrifice of all the passengers. The ship, which was the property of Messrs. Pollock and Co., of Glasgow, sailed from Liverpool in the latter part of May last for New York, carrying 300 emigrants. After a passage of 35 days she was making for the south-east point of the banks of Newfoundland, when she unfortunately struck on some rocks. There was a strong swell running inwards, causing the ship to thump tremendously, soon battering in her bottom, and the sea filling her. The preservation of the alarmed passengers was the first care of the master and officers. A rope was got to the shore, thus enabling the crew to place the emigrants safely on the land. Subsequently the vessel was surrounded by a gang of desperate wretches, who plundered the baggage of the passengers of everything that was valuable

ARCTIC EXPEDITION IN SEARCH OF SIR JOHN FRANKLIN.—FIRST ICEBERG SEEN, JUNE 3.

ARCTIC EXPEDITION IN SEARCH OF SIR JOHN FRANKLIN.

We have been favoured by a Correspondent, a Lieutenant of the *Assistance*, with the accompanying Sketch of the first iceberg seen by Captain Austen's Expedition, June 3, 1850, in lat. 59 deg. North, long. 48 deg. West. The iceberg was about 70 feet in height; the largest our Correspondent, writing from Whale Island, June 19, had then seen was 170 feet high. During the still night, whilst lying at anchor, the crew often heard the report of icebergs splitting, with the sound of an earthquake.

The following extract from a private letter, written by an officer of the Arctic Expedition in search of Sir John Franklin, has been published in the New York *Tribune*.—"United States' brig *Advance*, off St. John's, Newfoundland, June 7. —Our progress thus far has been much slower than I anticipated, in consequence of head winds and heavy weather. In a gale on the 29th ult. we parted from our consort. Yesterday we made the southern cape of Newfoundland, and at the same time fell in with several icebergs; we have continued to meet them since, and now have at least twenty in sight around us. The officers and men are all in good health and spirits, and, with myself, are sanguine as to the success of the enterprise."

MARIA ISLAND.

We learn from the *Hobart Town Courier*, received a few days since, that Mr. Smith O'Brien is to be removed from Maria Island to Fort Arthur, where arrangements are now being made for his reception. The stable attached to the former residence of Assistant-Commissary-General Lempriere is to be his dwelling-place. A platform in front is being erected as the post of a military sentinel, and it is understood that intercourse will be restricted to the visiting magistrate, the superintendent, officer, and sergeant of the guard.

Maria Island, on the east coast of Van Diemen's Land, was named after Van Diemen's daughter. In 1825 it was made a penal settlement for convicts, whose crimes were not of so aggravated a nature as those committed by the men sent to Macquarie Harbour. A small town was soon formed, to which the name of Darlington was given. It is shown in the accompanying Sketch. In 1832 the establishment was broken up, and the island rented to some settlers, but it again became a Government station when the probation system was introduced, and still continues such.

Maria Island is separated from the mainland by a channel varying in breadth from four to eight miles; which channel is navigable for large vessels, although some caution is necessary, as the soundings are not correctly laid down in the charts; the passage being on the east side of Lachlan's Island (a spot about midway across), whereas in Flinders' Chart the greatest depth of water is shown on the west. The east coast of Maria Island presents a mass of perpendicular basaltic rocks, upwards of four hundred feet in height. The land from the summit gradually slopes to the west. The north shore is entirely composed of petrified oyster and scallop-shells. The extreme length is twenty-one miles, but the breadth in no part exceeds three miles; an isthmus so narrow that the sea on each side approaches within a few yards, separates Half-moon Bay from Oyster Bay.

The west shore has a delightful and picturesque appearance, being broken alternately by rocks and sandy bays, and lined with magnificent trees. The soil is very fertile, and the climate the best in the colony; even melons will grow and ripen in the open air.

Darlington consists of the residence of the Magistrate, Superintendent, and other officers, a capacious store and hospital, a chapel and school-room, barracks for the military and convicts, and other buildings. In former days there existed a cloth manufactory, where excellent blankets were produced. A probation station was established some time since at Long Point, but it has been abandoned. The whole island is interspersed with rivulets and lagoons, which afford a plentiful supply of excellent water for all purposes. Fish, excellent in quality, is caught all round the coast in abundance; the lagoons supply fine eels, and the oysters found in Oyster-bay are superior in size and flavour to most in the colony. Quail and wild duck are in abundance; but a great drawback to the sportsman's enjoyment is the constant dread of treading on snakes, of which there are a great many, and all venomous. The only species of kangaroo found is the mallerby, very small, but affording a good dish for the table, as well as furs much handsomer than those of the forester and brush kangaroos. The timber is of first-rate quality, especially well calculated for ship-building. The gum (*Eucalyptus*) grows to the height of 300 feet, perfectly straight, and often reaches 50 feet without a branch. Keels of a single piece are made from it. At the present time, Mr. Walton, ship-builder, in Hobart Town, has laid one down (a single piece) 100 feet in length. The light wood, *Acacia Melanoxylon*, makes excellent and handsome furniture. There is very good clay for pottery, some very fair specimens of which were manufactured some years since.

We have to thank a Correspondent, "T. J. L.," for the accompanying Sketch and descriptive details.

MARIA ISLAND, VAN DIEMEN'S LAND

MONUMENT TO THE 80TH REGIMENT OF FOOT, IN LICHFIELD CATHEDRAL.

A BEAUTIFUL monument in commemoration of the services and death of the officers and men of the 80th Regiment of Foot, or Staffordshire Volunteers, has within the last week, been placed in the southern transept of Lichfield Cathedral

MONUMENT LATELY ERECTED IN LICHFIELD CATHEDRAL, TO THE 80TH REGIMENT OF FOOT.

We find in a little work entitled a "Short Account of the City and Cathedral Church of Lichfield," just published by Lomax, the following description of the Monument —

The work is from the chisel of Peter Hollins, and consists of a black marble tomb, of Egyptian architecture, surmounted by an Egyptian sphinx, in white marble. In the same material, at the front of the tomb, and reading on its base, is an ample military trophy, and over this, at the top of the inscription-tablet, is a basso-relievo of a soldier's funeral. At the top of the tablet on the left hand side, in low relief, are the arms of the late Field-Marshal, the Marquis of Anglesea, the founder of the regiment. On the right hand side of the tomb is an inscription containing the names of the officers and men who fell during the Sutlej campaign. The Egyptian architecture and sphinx are adopted in commemoration of honours won by this regiment in Egypt. The inscription is as follows: -

Dum locant clamant.

To the memory of the brave officers and men of the 80th Regiment of Foot, or Staffordshire Volunteers, whose names are recorded on this tablet, and who fell in the actions of Moodkee, Buddiwal, Aliwal, Ferozeshu, and Sobraon, including those who subsequently died from the effects of their wounds, when serving with the army of the Sutlej in India.

Fortis cadere, cedere non potest.

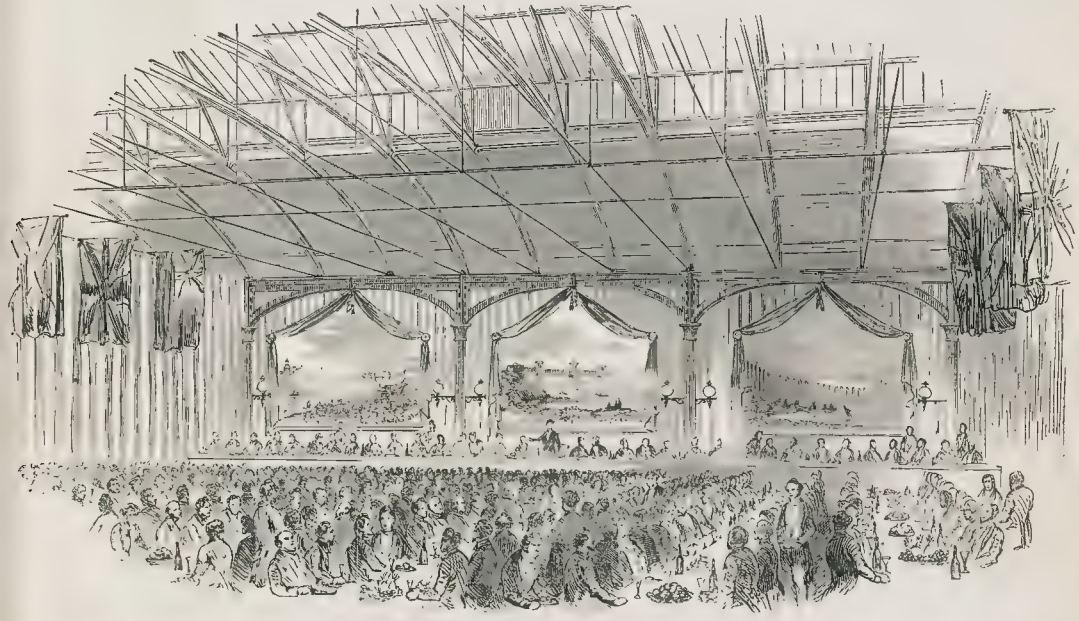
The execution of the work reflects the highest credit upon the distinguished artist, and has already attracted many visitors to the Cathedral.

THE GREAT CENTRAL RAILWAY STATION AT NEWCASTLE-UPON-TYNE.

PUBLIC DINNER TO ROBERT STEPHENSON, ESQ., M.P.

On Tuesday week, the friends and admirers of Mr. Robert Stephenson, the civil engineer, entertained him at Newcastle-upon-Tyne, at a public dinner, as a mark of their high respect for his scientific eminence and unblemished character. The new railway station, in Neville-street, was judiciously chosen for this interesting celebration, where a portion of the immense area of the station was temporarily enclosed on three sides with wood-work and drapery, the fourth side being formed by the stone-work of the main entrance. No other site in the town, whether from its extent or its position, as the focus of the great trunk lines of the York, Newcastle, and Berwick, and of the Newcastle and Carlisle Railways, could more fittingly have been appropriated to the purpose—to do honour to the name of Stephenson which, whether as belonging to the father or the son, will be handed down to a remote and admiring posterity, as inseparably connected and interwoven with the great railway creations of the nineteenth century. Three beautiful cartoons, of gigantic dimensions, adorned one side of the dining-room, representing three of the great works planned and executed by Mr. Stephenson; namely, the High Level Bridge, Newcastle, the iron tubular bridge across the Menai, and the Berwick bridge. These paintings, though hastily executed for the occasion, reflect great credit on the respective artists, Mr. John Storey, jun.; Mr. John Gibson, assisted by Mr. R. S. Scott; and Mr. Scott alone. The tubular bridge, which occupied the centre, was shown with admirable effect. The views were ingeniously fitted into the drapery; and flags, banners, and various devices were suspended round the room. Opposite the cartoons was the main entrance, consisting of three large doorways, the outer ones surmounted by busts, in basso relievo, of the Queen and Prince Albert; and that in the centre surmounted by a circular opening. Busts of Watt, George Stephenson, Chantrey, and other distinguished men were ranged along the north side of the room. Entirely across it, and placed near the roof, was a pipe of gas-jets. There were nine tables, with an elevated cross-bench for the accommodation of the principal speakers, and the dinner comprised every delicacy of the season, served up with great elegance by Mr. Haigh, of the Assembly Rooms The Hon. Henry Thomas Liddell, of Ealington House, presided, having the guest of the evening, Mr. Stephenson, on his right hand; the vice-chairs were filled by Joseph Crawhall, Esq., and George Hawks, Esq. About four hundred guests partook of the entertainment.

After the customary loyal and national toasts had been duly honoured, the chairman rose to propose the toast of the evening, and was received with great enthusiasm. The hon gentleman then introduced the health of Mr Stephenson with great ability, illustrating that gentleman's claims to such distinction by exhibiting a map, with the railway communication of the island indicated by a red line, in the whole of which, from east to west, and from north to south, Mr. Stephenson has been personally engaged: "In certain unconnected lines he had laid down an extent of no less than 126 miles of iron railing. In the Eastern Counties line, comprising a number of branches, amounting to twelve, he had laid down 296 miles of railway; on the London and North-Western Railway, comprising a vast variety of branches, he had laid down down 377 miles; on the Midland and Birmingham and Derby lines, 302 miles; on the North Staffordshire, 148 miles; on the South-Eastern, 25 miles; on the Whitehaven and Furness line, 69 miles; on the Stockton and Darlington line and the lines in the north counties, 215 miles, on the York and North Midland, 220 miles: making an aggregate of 1790 miles of railway; which, added to the Florence and Leghorn Railway, of 60 miles, gave a total number of 1850 miles. But this was not all. He had connected, by his personal exertions and his genius, the German Ocean and the Irish Channel; and, by an iron union, the kingdoms of England and Scotland. The union between the three kingdoms, in fact, seemed now complete; for it was admitted in the Houses of Legislature that there was no longer any necessity for a separate Government for Ireland. (Applause.) The chief reason given for the abolition of the Lord-Lieutenancy of Ireland was the rapidity, the certainty, and the constancy of the communication by railway which had now been established." The hon. chairman then called attention to the cartoons already described, and observed, "they had seen solid and enduring structures in the form of an iron cross uniting the German and Atlantic Oceans, and uniting the Thames and the Tweed. They had seen a great arm of the sea bridged over, not by boats, which the first hurricane might scatter to the waves, but they had seen the straits of Menai crossed from side to side by a bridge of solid mason-work and tubular iron. An iron structure, before unheard of and unthought of, had been reserved for the genius of their distinguished guest to design and accomplish. They had seen the kingdoms of England and Scotland connected by that beautiful structure which was now on the eve of completion; and the Tyne had been spanned by a bridge upon a level which, a few years ago, any man would have been deemed a madman to have projected. (Cheers.) They had seen all these works successfully accomplished by their honoured guest of to-day; and he need hardly say, that they had done well and wisely in offering him this testimony of their approbation. He would remind them that it was but a few days since Mr. Stephenson had enjoyed the proud satisfaction of placing in its required bed the last and perhaps the most painfully interesting portion of that great structure, the Menai Tubular Bridge. (Hear, hear.) He



PUBLIC DINNER TO ROBERT STEPHENSON, ESQ., M.P., AT NEWCASTLE-UPON-TYNE.

knew, indeed, from his own mouth, to how great a degree his interest had been centered on that occasion. They were all familiar with the proverb, "It is the last hair that breaks the camel's back." So he now called on them for their sympathy no less than for their approbation; for the placing of the last tube of that great structure had weighed on Mr Stephenson's mind with tenfold interest. The hon. gentleman concluded by proposing the health of Mr. Stephenson, which was drunk with immense cheering.

Mr Stephenson then rose, and, as soon as the cheering which greeted him had subsided, proceeded to address the company:—"It was true he had had the good fortune to be intimately connected with the rise and progress of railways and the locomotive engine. He had had the satisfaction of superintending the execution of no inconsiderable portion of that great net-work of railways which now extended throughout the length and breadth of our land. It was true he had taken a deep and anxious interest in those great works which now formed so conspicuous a feature in the town at which they were now assembled. If it was on account of these circumstances that he was now called to receive at their hands this high honour, he felt he was called on to receive that which ought to be shared by others, more especially by the memory of him who was no more. ("Hear," and applause.) To be associated with works of this kind had always afforded him exquisite pleasure; but to be called upon as he had been, to design and carry into execution such a structure as the High Level Bridge, and to receive an acknowledgment such as he was now receiving from his townsmen, was beyond what he could have expected. Intimately connected as he had been with the rise and progress of railways, and familiar with all the phases through which they had passed, he could not help now drawing their attention to the retrospect of the last few years—a retrospect which he had not himself been able to approach without considerable astonishment. It was but a few years since he was engaged as an assistant in tracing the line of the Stockton and Darlington Railway. Since that period, the Liverpool and Manchester, the London and Birmingham, and a hundred other great works, had sprung into vigorous existence. So suddenly, so promptly, had they been accomplished, that it appeared to him like the realisation of fabled powers, or the magician's wand. Hills had been cut down, and valleys had been filled up; and where this simple expedient was impracticable, high and magnificent viaducts had been erected; and where mountains intervened, tunnels of unexampled magnitude had been unhesitatingly undertaken. Works had been scattered over the face of our country bearing testimony to the industrious habits of the people, and to the unrivalled skill of its artists. (Loud cheers.) In referring thus to the railway works, he must refer also to the improvement of the locomotive engine. This was as remarkable as the other works were gigantic. They could not be driven by any to each other. The locomotive engine, independent of the railway, would be useless. They had gone on together, and they now realised all the expectations that were entertained of them. It would be unbecoming in him, he was just, if he were to conceal the circumstances under which these works had been constructed. No engineer could succeed without having men about him as highly gifted as himself. By such men he had been supported in the past; and though he might have added his mite, yet it was to their co-operation that all his success was owing. (Hear.) In this immediate neighbourhood, he felt it especially his duty on this occasion to call their attention to a gentleman with whom he had been associated. Mr. Thomas Harrison (Loud cheers.) Mr. Stephenson then briefly thanked the company, and resumed his seat amidst great applause.

The high Sheriff spoost the health of Earl Grey, the Lord-Lieutenant of the county of Northumberland, which was drunk with great applause

Robert Ingham, Esq., proposed the health of the Lord-Lieutenant of the county of Durham, the Marquis of Londonderry, and referred to that nobleman's hearty appreciation of the genius of Mr. Stephenson. (Cheers.)

Mr. Stephenson then proposed the health of the chairman, whose noble father promised the first locomotive constructed by Messrs. Hall and Stephenson. Sir Matthew was endeared to him by many of his early association, and reminded him of the time when he served his apprenticeship under Mr. Wood, of Killingworth, and when, day by day, and week by week, George Stephenson was struggling with all the difficulties. (Cheers.) The toast was drunk amidst great applause.

The "Healths of the High Sheriff, Sir W. C. Trevelyan, Bart.; of the Duke of Northumberland; and the Mayor and Corporation of Newcastle," were then drunk; as was "Both sides of the Tyne, and success to the Company whose High Level Bridge has so nobly and so intimately united them;" proposed by M. Cowen. Mr. Leeman thanked the company for the latter toast, on behalf of the York, Newcastle, and Berwick Railway Company, in an able address, which served that throughout the financial annals of the affairs of that company, there had never been revealed an item or a figure but which redounded to Mr. Stephenson's professional honour (loud and long-continued cheers); and he might add, also, additional weight to his personal character. (Renewed cheers.)

Mr Leeman then adverted to the great work of the High Level Bridge, and next to the Berwick Viaduct, which, he anticipated, would be a great ornament; would, in a few days, be opened by her Majesty and Prince Albert. Mr. Leeman concluded by reading the following letter, which he had just received from the Earl of Carlisle :—

July 29 1850.

My dear Leeman,—If you have not been already apprised, I am now able to assure you that the Queen and Prince Albert will open the High Level Bridge on Wednesday, 7th August. They will sail off from Castle Aigward that morning, and will sleep in Edinburgh. I shall rely upon your making the railway arrangements as complete as possible.

Yours very truly,

CARLISLE.

After a variety of other toasts had been drunk, the company separated, highly delighted with the proceedings.

We have condensed the above from an able and copious report of these highly interesting proceedings in the *Newcastle Chronicle*.

We have engraved the exterior of the Central Station, towards Neville-street, which is unusually picturesque. Its lofty main arches, its coupled bold Roman-Doric columns and stylobate, and its cleverly panelled attic (where it is proposed to place colossal statues), are very effective features of this grand architectural composition, by Mr. Dobson, who is specially enlarged on his health being proposed by the hon. chairman at the above dinner

CALENDAR FOR THE WEEK.

SUNDAY, August 11.—Eleventh Sunday after Trinity.
MONDAY, 12.—Grouse Shooting begins.
TUESDAY, 13.—Zenor in the sign of the Virgin.
WEDNESDAY, 14 . . King's College incorporated, 1829
THURSDAY, 15 . . Assumption.
FRIDAY, 16. . Sun rises 4h. 47m., sets 7h. 19m.
SATURDAY, 17 . . Duchess of Kent born, 1786.

Evening, Eight.—Admission, is.; stalls, 2s 6d; Reserved Seats, 3s. Doors open half-an-hour before each representation.

THE ILLUSTRATED LONDON NEWS.

MONUMENT to the GOOD DUKE of CAMBRIDGE.—At a PUBLIC MEETING, held in the EGYPTIAN-HALL, MANSION-HOUSE, at Two o'Clock on Tuesday, August 6

The Right Hon. the LORD MAYOR in the chair,

For the purpose of considering the best measures for carrying out the resolutions of the Committee for Erecting to the Memory of his Royal Highness the late Duke of Cambridge a Monument commensurate with his many virtues, and in recognition of his munificence, untiring exertions, and unwonted self-denial of that good Prince in the cause of the public charities of the United Kingdom;

Proposed by the Right Hon. Lord Robert Grosvenor, M.P., seconded by Benjamin Bond Cabbell, Esq., M.P.;

Resolved,—That this meeting deeply deplores the demise of his late Royal Highness the good Duke of Cambridge—a loss which must be felt as irreparable by the benevolent world; that among the many rare and noble virtues which distinguished that illustrious personage, the benignity of his disposition and affability of manner were strikingly conspicuous, endearing him to all who had the honour to approach him; that his conduct was equally characterised by the dignity of a Prince and the unaffected humility of a Christian; whilst his whole life and fortunes were devoted to the protect n and affectionate care of the sick and the afflicted, more especially in instituting and upholding the varied and numerous charities of the metropolis. Anxious to pay a tribute due to great moral worth, this meeting resolves on raising a suitable monument to the memory of the "good Duke of Cambridge," which, whilst it becomes a record of public sorrow at his death, of admiration and gratitude for his self sacrifice in the cause of charity, shall serve as a guide and example to all who wish to become the benefactors of mankind.

Proposed by the Most Hon. the Marquis of Granby, M.P., and seconded by the Right Hon. the Earl of Talbot.

Resolved,—That, while the present endeavour to do justice to the memory of the Duke properly originated with those charitable institutions whose management he by his Royal Highness liberality, the nations, feelings demands a participation in the honour of perpetuating so worthy an example of Christian munificence; it is, therefore, resolved, that a general subscription list be now opened to procure funds necessary to erect the Monument referred to; that the London Bankers be requested to receive, and the Secretaries of the Metropolitan Charities to col ect subscriptions; and that the following gentlemen be invited to become Treasurers:—J. Labouchere, Esq.; B. Bond Cabbell, Esq., M.P.; Samuel Gurney Esq.; John Abel Smith, Esq., M.P.; and, further, that a General Committee, to consist of the Royal Family, be formed, consisting of the Provisional Committee, and such gentlemen present, and others as may be willing to aid by their personal co-operation.

Proposed by Richard Twining, Esq., Jun., seconded by the Hon. Lieut.-Colonel Sir Edward Cust,

Resolved.—That measures be taken to convene a public meeting, similar to the present, at Willis's Rooms, St. James's, that his Royal Highness the Prince Albert be respectfully requested to preside on the occasion; and that a deputation wait on his Royal Highness to solicit that honour.

Proposed by R. A. Christopher, Esq., M.P., seconded by Mr. Sheriff Nicoll;

Resolved,—That the best thanks of this Meeting are due, and are hereby given, to the Right Hon. the Lord Mayor, for his kindness in so promptly granting the use of the Egyptian-hall, and in so meeting the wishes of the Committee in the manner in which he has presided on the present occasion.

A list of subscriptions will be published in a few days

EDWARD FREDERICK LEWIS, Hon. Sec. to the Committee.

2, Charlotte-row, Mansion-house.

ASTLEY'S ROYAL AMPHITHEATRE.—Proprietor and Manager, Mr. W. BATTY.—On MONDAY, AUGUST 12, 1850, the curtain will rise at Seven o'clock, when (for the last week) the Performances will commence with the Equestrian pantomime of MAZEPPA and the WILD HORSE. Manager, Mr. N. T. Hicks. To be followed by Batty's inconparable SCENES in the ARCTIC REGIONS and AUSTRALIA, for which the most eminent Artistes will appear. To conclude with the successful Ballet of the CHAMOIS HUNTER; or, the Leap of the Deathcells. Box Office open from Eleven till Four. Stage-manager, Mr. W. West.

ROYAL POLYTECHNIC INSTITUTION.—During this Week the ALPINE SINGERS from Styria will perform daily at Four, and in the Evenings at Half-past Eight. LECTURE on CHEMISTRY, by J. H. Pepper, Esq. LECTURE by Rosenthal on VOLTAIC ELECTRICITY. NEW SERIES of DISSOLVING VIEWS daily at Half-past Four, and in the Evenings at a Quarter to Ten. Also a Series, exhibiting SCENES in the ARCTIC REGIONS and CEYLON, daily at One o'Clock. DIVER and DIVING-BELL, &c.—Admission, 1s; Schools, Half-price.

SAMPSON, the largest Horse in the world, 20 hds. 2½ in. high, and only Four years old, and that wonderful animal, the HYBRID, a cross between the Wild Deer and Pony—Exhibited by the Napoleone Frères and Co. Cruikshank's Gallery watched several times upon the monster's back the only individual who ever could, although tried by hundreds. New Exhibition in Old Bartlemy Mews by the same artist.—Admission, 1s each. Servants and children half-price.—A fine Kroplumaux Dog on Sale.

EMIGRATION to CANTERBURY.—Notice is hereby given that assisted Passages to Port Lyttelton, in the Canterbury Settlement, will be granted to Unmarried Female Servants, whose Characters will be satisfactory, by the ship "Sir George Seymour," Master, Charlo to Jane," and "Randolph," to sail on the 20th of August; being Gardeners, Shepherds, Farm servants, Grooms, Dairymaids, Nurses, and Female Servants under the age of 30, of the highest character for sobriety, steadiness and respectability, as certified by the Clergymen of their Parishes. Full particulars, with forms of application, may be obtained from James Edward Fitzgerald, Superintendent of Emigration, Office of the Canterbury Association, Cockspur-street, London.

Portfolios for keeping the Numbers clean during the six months, price 4s.

TO CORRESPONDENTS.

A CORRESPONDENT—The official precedence of the husband is not communicable to the wife Consequently, the wives of the Lord-Lieutenant and High Sheriffs of counties do not precede one from the husbands' offices

ARMIGER.—The cost of a grant of arms and crest is about £75. The grant is obtained at the Herald's Office. The writing would well suit any commercial purpose.

PENTICULLEN.—We will do our best for our correspondent

QUIDAM.—The arms of Thomson are, "Or on a fesse cancelée, az. three escalles arg.; on a canton of the second the sun in gory pp. Crest: An arm erect, vested gu. cuff. arg. holding in the hand ppr five ears of wheat or." Motto: "In humbles lieem"

INQUISITIVE.—The arms of Jarv s are, "Arg. six scutch feathers sa. 3, 2, and 1;" but we do not know if these were the bearings used by James Jarvis, Esq., of Ledbury.

AN OLD SUBSCRIBER OF EIGHT YEARS' STANDING.—An application at the Herald's Office, Doctors' Commons, will obtain the information you require.

E W, Birmingham.—There is nothing contrary to law in the assumption of a coat of arms, provided it does not belong to any one else. Many of our oldest families took their bearings ad libitum in early, and no other rule can be laid down than that which governs the matter in the kingdom than this private assumption. Any clever law-writer in London would make the enquiries at Doctors' Commons.

HERALDIC wishes to know if there are any of the family of Warren Hastings now living. Perhaps some of our correspondents may be able to inform him

A A—The usage of a coat of arms in any way renders the bearer liable to the tax on armorial bearings

X X—The heiress of the House of Plantagenet was Elizabeth of York, Queen of Henry VII. The present representative of the Royal families of Plantagenet, Tudor, and Stuart, is the Crown Prince of Modena.

B W. Liverpool—Halevy's "Turnpeta," produced June 8, has been played 14 times. Meyerbeer's "Prophète," revived May 16, has been given eight times, besides one representation last season

OPERA.—Madame Pauline Garcia Viardot was born in Paris July 18, 1821; and she first sang, on any stage, at the King's Theatre, in London in May, 1839, appearing as *Desdemona*, in "Otello," the name of which character she had previously sung in the concert-room in 1840 to M. Viardot, a distinguished publicist, in Paris.

F. Some borough.—There is not to be mentioned, and it may be hard of any music publisher that the works in the places mentioned are the first of their respective classes; but it by no means follows that each case is the first. Lissi and Thalberg are the best.

P W. We do not know

J O. SOUTH AS OLD SUBSCRIBER.—Sir Edward Bulwer Lytton resides at Knebworth, Herts

PAPER-CLASSIFIER.—Apply to Messrs. Cowan and Co., Nos. 1278 at Peel's Coffee-house, Fleet-street

Price of the Two Numbers, ONE SHILLING.

ON AUGUST 31st, WILL BE PRESENTED

A SUPPLEMENT, GRATIS;

Containing Pictures of

HER MAJESTY'S VISIT TO THE NORTH.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, AUGUST 10, 1850.

THE Report of the Select Committee appointed to inquire into the Salaries of Public Functionaries has just been published. The Report is divided into three branches: the first relates to official servants holding their appointments at the pleasure of the Crown; the second to judicial officers or Judges of all ranks, from the Lord Chancellor downwards; and the third to the diplomatic service. In each of these departments, the Committee, which was composed of men of all parties in the Legislature, recommends a reduction. Generally, it seems to have exercised a sound judgment, both in retaining salaries at their present amount, and in insisting upon reductions. Rarely does it appear to urge economy in any division or subdivision of the public service, merely for the name or sake of economy, and without earnest consideration of the duties to be performed, and of the remuneration justly due to secure the best services of the best men. But the labours of the Committee, however onerous, have, after all, been unproductive of but small results. This was to have been expected. As a general rule, the public servants of Great Britain are under, rather than over, paid; and it is not so much in salaries as in pensions that the principal scandal against State extravagance has originated. Exorbitant pensions to the heirs of persons long since deceased, and who originally had no claim upon the country, are the true sources of the outcry that has long been kept up on the subject of the waste of public money. These are the matters that require revision to a degree far more urgent than the salaries of the *hard fide* servants of the nation. We are, however, glad to see that the committee, without prejudging, or even alluding to this branch of the subject, has exercised a wholesome vigilance upon the matter more peculiarly entrusted to its care, and that, wherever reduction is proved to have been feasible, it has boldly recommended it. Upon the subject of Ministerial salaries it bears lightly, because, considering what is expected of them, the great officers of state in this country are not extravagantly paid. The Committee recommends, therefore, that the salaries of the Premier, the Chancellor of the Exchequer, the three Secretaries of State, and the First Lord of the Admiralty should be retained at their present amount. The only reductions which they recommend in this department are in the salaries of the Junior Lords of the Treasury and of the Admiralty—merely ornamental offices. The first of these they propose to reduce from £1500 to £1200, and the second, from £1200 to £1000—a proposal which is just in principle, but in amount a cheese-paring. The Committee fur her recommends the reduction of the salaries of the two Under Secretaries of State from £2000 to £1500; and the amalgamation of the Railway Board with the Board of Trade, and the consequent saving of the salaries paid in the first-mentioned department. It also recommends that the office and salary of Lord Privy Seal should be abolished. This also appears to be judicious, and would save the country £2000 per annum. Altogether, under this head, the Committee recommends the reduction of salaries to the amount of between £7000 and £8000 per annum.

Under the head of Judicial Offices the Committee is more ruthless in its recommendation of retrenchments, and would lop the Lord Chancellor at one fell swoop of 40 per cent. of his income, and the other judges in proportion. Under the third head, of Diplomatic Service, which is in reality the department in which, as a nation, we are guilty of the greatest amount of extravagance, the Committee, instead of entering into details, boldly recommends that it should be proposed to the Governments of France and Turkey to convert the present embassies exchanged with those countries into first-class missions; that a single mission in some central point in Germany should be substituted for the various missions which now sent to the petty sovereignties of that Confederation; and, generally, that no diplomatic salary should exceed £5000 per annum, exclusive of allowance for a residence. They also recommend that the salaries of the whole diplomatic service should be revised with reference to this proposed *maximum*, and the relative importance of the various missions. Upon the subject of consular establishments, which rank next in importance to the diplomatic service, the Committee has come to no conclusion, not having had time to inquire into it. Upon the whole, the report is a valuable document; but, as already observed, the Committee has had but little to work upon. The salaries of acting public servants in Great Britain are not extravagant; and, although economy in all departments of the State is both desirable in itself, and strictly necessary in the circumstances of a country having a large debt, which it makes no effort to pay off, it is evident that such retrenchments as these are chiefly valuable for the example which they set. The utmost possible economy in them will not, to any perceptible extent, diminish the public burdens. But, even if they place £50,000 or £60,000 per annum at the disposal of Parliament, a good will be effected; and the example of economy in the higher departments, where work is really performed, will inevitably pave the way for an examination of the salaries and pensions paid to persons who perform no service at all. England wants her work well done, and has no objection to pay for it; but she wants, at the same time, a reconsideration and readjustment of her whole financial system, under all its aspects—what is levied upon the people, how it is levied, and how it is disposed of. This is the task that has to be accomplished, and to which all such investigations as that upon public salaries are but the preliminaries.

THE WORK OF THE SESSION.—A Parliamentary return, moved for by Sir B. Hall, of the names of all the public bills ordered to be brought in during the present session up to the 31st of July, was printed on Wednesday. It appears that the total number of public bills introduced up to that period was 153; viz. ninety-five by the Government, and fifty eight by private and "independent" members. Of the Lills introduced by the Government, seventeen were withdrawn altogether, or put off for three or six months. The Highways District Surveyors Bill, introduced by Mr. Frewen, was the first bill ordered to be brought on. The second reading was deferred seven times, and the bill was ultimately put off for three months on the 18th of July; the second reading of the Charitable Trusts Bill was put off eleven times, and the second reading of the Landlord and Tenant (Ireland) Bill fifteen times; the second reading of the Merchant Seamen's Bill, and of the Woods and Forests Bill was put off fifteen times, and both measures were ultimately withdrawn.

POSTCRIPT.

HOUSE OF LORDS.—Friday.

The Turnpike Acts Continuance (No. 2) Bill was, on the motion of the Earl of Granville, read a second time.

The Fisheries Bill passed through committee.

The Portland Harbour Bill was read a second time.

The Decrees in Court of Chancery Bill, on the motion of Lord Brougham, was read a second time.

The Marquis of Lansdowne laid on the table the Reports of the Registrar of Births, Deaths, and Marriages, and of the Irish Poor Law Commissions.

The Prince of Wales's Provision (Marlborough House) Bill was read a second time on the motion of the Marquis of Lansdowne, as also was the Duke of Cambridge's Annuity Bill, and the Consolidated Fund (Appropriation) Bill.

JUDICIAL BUSINESS OF THE HOUSE.—CRIMINAL LAW CONSOLIDATION.

Lord Brougham explained the state of the judicial business of the House, stating that there was but one case in arrear. The noble and learned Lord then proceeded to relate the history of the appointment and the labours of the Commissioners appointed in 1831, to prepare a digest of the criminal law. It was the opinion of Lord Lyndhurst, Lord Cottenham, and himself, that it would be advisable to continue the Commission.

SUNDAY POST-OFFICE DUTY.

In reply to Lord Brougham, the Marquis of Clanricarde said the committee on this subject would, he hoped, be able to make a report to-morrow, by which some satisfactory arrangement would be come to.—Adjourned.

HOUSE OF COMMONS.—Friday.

The House met at twelve o'clock in the new chamber.

HOLYHEAD HARBOUR BILL.

On the motion of Mr. C. Lewis, this bill was referred to a select committee

The Deanery of St. Burian Division Bill was read a third time and passed

The Spitalfields and Shoreditch New Street Bill, as amended, was considered and ordered to be read a third time.

The (Friendly Societies Salaries and Expenses) Bill was considered as amended, and ordered to be read a third time; and the Friendly Societies Bill passed through committee.

CRIME AND OUTRAGE ACT (IRELAND) CONTINUATION BILL.

On the order of the day for the House resolving itself into committee on this bill,

Mr. Reynolds moved, as an amendment, that the bill be committed this day three months. The Government had now had twenty-four hours to consider, and he hoped they would see the propriety of withdrawing a measure which had been brought forward in the absence of the greater part of the Irish members. He denied that there was any compromise by which this bill was to be allowed to pass, and he also denied that his determination to oppose the bill could be in any way considered factious.

Mr G. Thompson seconded the amendment.

After some discussion,

Sir G Grey said, that though the opposition to this bill had been very great, he must say that the Irish members' opposition had been honest and straightforward. The bill which had come down to that House from the Lords had been laid aside, and leave moved for to bring in another bill: on that occasion, unusual as it was, great opposition had been offered to that and to every subsequent stage of the bill. The honourable member, after such repeated debates on the bill, seemed entirely to have mistaken the objects of the bill. The honourable gentleman seemed to think the bill, when it was first introduced, was to repress the disaffection in Ireland; and he argued, after the loyal reception which her Majesty had met with in her late visit, that there was no more occasion for it. The honourable gentleman ought to have known that this bill was not introduced to repress political agitation, but it was enacted with reference to the system of assassination, which was unfortunately so prevalent in that country. He must also beg to remind the Hon. and Learned Gentleman opposite (Mr. Anstey) that he too had taken a wrong view of this bill. He seemed clearly to consider it as analogous to the Coercion Bill, as it was called. The bill, in fact, was a necessary substitution for a bill of still more stringent provisions. He must say that he thought there had been quite sufficient opportunity for discussion on this measure, and he hoped the House would not allow them to go into committee.

The House divided, when there appeared —For going into committee, 82; against it, 34: majority, 48.

The House then went into committee on the bill.

On clause 1,

Mr Moore moved an amendment that the duration of the bill should be limited to one year.

On a division, the amendment was negatived by a majority of 75 to 34

The bill then passed through committee, and was ordered to be read a third time on Monday.

The Medical Charities (Ireland) Bill was read a third time and passed

The House agreed to the Lords' amendments in the General Board of Health (No. 2) Bill.

Some other bills on the table were forwarded a stage, and the House adjourned at half-past five o'clock to half-past seven o'clock.

In the evening sitting

METROPOLITAN SEWERAGE.

Mr. Mackinnon inquired whether a number of cases of diarrhœa, which had recently occurred among the officers of the Queen's Bench, was not considered a miasmata which arose from the recent opening of the sewer contiguous to the House, and the operations conducted therein ?

Viscount Ebrington replied that the cases of diarrhœa referred to were not attributable to the cause suggested by the hon. gentleman.

Mr. T D'Eyncourt said that £25 000 had been raised in Lambeth and Camberwell for the construction of new sewers, and of that sum only £1000 had been spent in the parish of St George's-in-the-East, and he wanted to know whether those districts were to receive the benefit of the balance of the whole amount

Viscount Ebrington stated that plans for the construction of sewers in those districts had been submitted to the Commissioners and approved of by them; that the expenditure would amount to a quarter of a million sterling; that all the open sewers would be covered in, that cess-pools would be abolished, a perfect system of drainage established, and the practice of flushing done away

THE IONIAN ISLANDS

Mr. Hume moved an adress to the Queen, praying the appointment of a Royal Commission, to proceed to the Ionian Islands to inquire on the spot into the causes of the disturbances that occurred in the island of Cephalonia; and into the measures of the Lord High Commissioner, Sir H. Ward, to restore peace; and into the cases of 44 persons, 21 of whom had been put to death; and of 92 persons, who had been either flogged or banished from the island without trial; also to inquire generally into the causes of discontent in those islands, and to recommend the best means of promoting their future peace and welfare.

Mr. Hawes defended generally the conduct of Sir H. Ward, who, he contended, was justified by the circumstances of the time in proclaiming and carrying out martial law, seeing that he was interrupted in his reforms and improvements by the sudden outbreak of rebellion. It was during the existence of martial law that these necessary severities were exercised. He therefore opposed the motion

Mr. Bright strongly condemned the course of the Government's proceedings in the Ionian Islands, and the conduct of Sir H. Ward in Cephalonia.

Lord J. Russell justified the proceedings of Sir H. Ward, whose vigorous measures had suppressed a dangerous rebellion and restored tranquillity, on the establishment of which an amnesty was published and restrictive measures were put an end to.

After a short discussion the House divided :—For the motion, 13; against it, 84; majority against the motion, 71.

London Bridge Approaches Fund Bill passed through committee —Adjourned.

BURNING OF PARKHURST PRISON.—the fire that threatened such a fearful loss of life at Parkhurst Prison, and which destroyed a building called the "hotel," has turned out, as was expected, to be the work of arson. Some of the reclaimable young scoundrels who are kept there. The diabolical plot was a considerable time maturing, and as many as four or five are considered as principals, and many implicated; thirty were put into solitary confinement after the fire, and it is understood that the prison authorities are in possession of all the particulars.

SOUTH-WESTERN RAILWAY.—The half-yearly meeting of this company was held yesterday, at the Nine Elms Station.—W. J. Chaplin, Esq., M.P., in the chair—when the directors' report was adopted, the dividend of three per cent. declared, and a series of alterations in the by-laws withdrawn. Some reflections having been cast upon the chairman, relative to his holding the office of chairman and being at the same time a carrier of goods to the line, a vote of confidence in him was passed, not, however, without considerable opposition. The subject of the future audit of accounts was postponed until the next meeting; and the meeting, which lasted upwards of five hours, broke up.

LATEST FOREIGN NEWS.

HOLLAND.

Our accounts yesterday (Friday) from Paris state that the Legitimists are using their best endeavours to get up a demonstration in favour of the Duke of Bordeaux. Deputations of workmen are to go to Wiesbaden to present an address to his Royal Highness. Individuals of influence and wealth are busily getting out for the same destination, and with the same objects. Those who like peace and quietness are not the best pleased at these preparatory manifestations, but feelings of hostility are not confined to the exhibited in some of the eastern provinces while Louis Napoleon is on his tour

SCHLESWIG HOLSTEIN

On yesterday (Friday) the following letter was received at Lloyd's announcing the forcible arrest of the British Consul at Wyck-on-Fehr, on the 2nd instant, by the commander of the Schleswig-Holstein gun-boats stationed there and afterwards conveyed on board the steamer Kiel also his lady there, which immediately left for Travemunde, from whence the Consul will probably be conveyed to Kiel or Rendsburg.

The Consul received permission to land for a few minutes on shore, because he was unable to walk without assistance, and was unable to put on boots or trowsers.

By order of the Consul, I have made this a memorandum.—With respect,

J. M. LOBSON, Authorised Delegate.

No reason is assigned for this unusual proceeding.

This morning my principal, Mr Nemmann, the agent of Lloyd's, was arrested by Lieut. Hansen, the commander of the Schleswig-Holstein gun-boats stationed here, and afterwards conveyed on board the steamer Kiel also his lady there, which immediately left for Travemunde, from whence the Consul will probably be conveyed to Kiel or Rendsburg.

The Consul received permission to land for a few minutes on shore, because he was unable to walk without assistance, and was unable to put on boots or trowsers.

By order of the Consul, I have made this a memorandum.—With respect,

J. M. LOBSON, Authorised Delegate.

No reason is assigned for this unusual proceeding.

METROPOLITAN NEWS.

THE LATE DUKE OF CAMBRIDGE.

On Tuesday, a public meeting was held at the Egyptian Hall, Mansion House, for the purpose of considering the best measures for carrying out the resolutions of the committee for erecting a monument to the memory of the late Duke of Cambridge. The chair was taken by the Lord Mayor.

Lord Robert Grosvenor moved

That this meeting deeply deplores the demise of his late Royal Highness the good Duke of Cambridge, a loss which must be felt as irreparable by the benevolent world: that among the many rare and noble virtues which distinguished that illustrious personage the benignity of his disposition and affability of manner were strikingly conspicuous endearing him to all who had the honour to approach him: that his conduct was equally characterised by the dignity of a Prince and the unaffected humility of a Christian whilst his wide life and fortune were devoted to the protection and all other care of the sick and the afflicted more especially in the liming and upholding the manifestive charities of the metropolis. Anxious to pay a tribute due to great moral worth, this meeting resolves on raising some permanent monument to the memory of the "Good Duke of Cambridge," which, while it becomes a record of public sorrow at his death—of admiration and gratitud : for his self-sacrifices in the cause of charity, shall serve as a guide and example to all who wish to become the benefactors of their species.

He said, they might have met to commemorate a Prince who had run a more striking career—(hear, hear) but it would be hardly possible to name an individual who had conf rred more benefits on suffering humanity than the late Duke of Cambridge. He thought the public ought to know what was the career open to a Prince of the blood. If he possessed great abilities, with a natural ambition and desire for power, and took part in public affairs, he could scarcely avoid attaching himself to one or other of the great parties in the legislature; and if he did so he might find himself in opposition to the Government of the Sovereign on the throne. His actions must be known to the public, and, as well as his motives, would be severely scrutinised, and probably misrepresented. It was therefore almost impossible for a Royal Prince to take an active part in public affairs without running serious and dangerous risk, and he was quite sure that the people of this country would not like to witness a repetition of the scenes which occurred in the beginning of the present century from 1812 to 1814, when a Prince of the blood royal was seen in constant opposition to his father on the throne. It was, therefore, hardly possible for a Royal Prince, under any circumstances, to open before the country to so startling a light as those who have an open career before them. There seemed to be no alternative for them but to spend their lives in retirement. But the Duke of Cambridge did not choose to accept that position. He chose rather to occupy himself with certainly not the most captivating of all duties, that of attending to the interests of the various charities with which the metropolis abounded. He hoped they were not assembled merely to pay a compliment to the memory of a good man, but to show that in this country it was thought necessary to exhibit a deep sense of the conduct of a man who had deserved well of his country, and to take measures to preserve the memory of that conduct, that it might serve as an example to those who might in future years be placed in a similar situation.

Mr. B. B. Cabbell, M.P., seconded the resolution, which was carried unanimously.

The Marquis of Granby moved the appointment of a committee to carry out the previous resolution, and the nomination of four gentlemen to act as treasurers

Earl Talbot, in seconding the resolution, said he wished to correct a misapprehension which appeared to have gone abroad, that any part of the money necessary to carry out the objects of the meeting would be taken from the funds of the charities. It was the desire of the committee that no contributions should be made from that source, and they wished to ask every man for his subscription in his individual character, and not as a subscriber to a charity.

The resolution was carried unanimously.

Mr. J. M. Johnson said he had been deputed by the committee of a school for the female children of the Jews, to express their concurrence in the object of the meeting. The school had been established by the advice of his late Royal Highness, who had been a liberal contributor to its funds

Mr. Moore, who, as medical adviser to the late Duke, was much in his confidence, bore testimony to the extent of his private charities.

Mr. R. Twining, jun. undertook to be the treasurer of the fund.

That measures be taken to convene a public meeting, similar to the present, at Willis's Rooms, St James's; that Prince Albert be respectfully requested to preside on the occasion; and that a deputation do wait on his Royal Highness to solicit that honour.

Carried unanimously

Mr Christopher, M.P., then moved a vote of thanks to the Lord Mayor for granting the use of the Egyptian Hall for the meeting; which being seconded by Mr. Sheriff Nicol, was carried unanimously

Many subscriptions were announced, and the list included £50 from Lord Brownlow, £50 from Mr. F. Huth, £50 from Mr. B. B. Cabbell, M.P., 25 guineas from Lord R. Grosvenor, 10 guineas from the Lord Mayor, and several sums of the same amount from other gentlemen.

ENTOMOLOGICAL SOCIETY.—The monthly meeting of this Society was held on Monday evening, G. R. Waterhouse, Esq., President, in the chair, when a letter was read from W. Spence, Esq., announcing the recent death of the decease of the Rev. W. Kirby, Honorary President of the Society. Mr. Westwood moved, and Mr. Stephens seconded, that Mr. Spence be requested to draw up, for publication in the Society's transactions, a biographical memoir of Mr. Kirby. The President then suggested that all scientific business be adjourned, out of respect to Mr. Kirby's memory, which was unanimously agreed to.

ADULTERATION OF COFFEE.—At a meeting of the Botanical Society of London, held at the Society's rooms, 20, Bedford-street, Strand, on Tuesday evening, J. Reynolds, Esq., treasurer, in the chair, a paper was read by Dr Arthur Hassall, "On the Adulteration of Coffee." The author commenced by observing that the subject of which he was about to speak in detail, had been discussed in a remark made in the House of Commons during the late debate on chicory, to the effect that no means had been yet discovered by which the adulteration of coffee with that substance could be determined. The recollection of the fact that, in vegetable charcoal, the component parts of the several articles may be detected by the microscope, led Dr. Hassall to infer that, by the same means, the less completely charred cells and vessels, &c., forming the tissues of those substances employed in the adulteration of coffee might likewise be discovered—an expectation fully realised. In this way it was ascertained that the substances most frequently used in the adulteration of coffee are chicory, roasted wheat, colouring matter, and occasionally beans and potato-flour. The structure of the coffee-berry and of several productions just named were then minutely described, and it was shown that chicory might at all times be distinguished from coffee with the greatest ease by the size and ready separation of the cells, as well as by the presence of bundles of vessels of the dotted or interrupted spiral kind. The substance so generally employed to deepen the colour of coffee Dr. Hassall proceeded to analyse, in those instances in which he had examined it, of burnt sugar, and he referred to the fact that the rich brown hue of coffee is not peculiar to a decoction of that berry but that almost all vegetable substances when charred yield a somewhat similar colour. The author then proceeded to detail the results of the 34 examinations of coffee of all prices; from these it appeared that the whole of the coffees, with two exceptions only, were adulterated that chicory was present in 21 instances, roasted wheat in 12, colouring matter in 10, beans and potato-flour in one only; that in 10 cases the adulteration consisted of a single article, in 12 of two, and in 10 of three substances; that in many instances the quantity of coffee present was very small, and in others not more than a fifth, fourth, third, half, and so on. Contrasting coffee and chicory, it was observed, that while the coffee-berry contains a large quantity of essential oil, visible in small drops in cells, and upon which the fragrance and actual properties mainly depend, the essence of any similar oil is to be found in the chicory root. The properties of coffee are those of a stimulant and nervine tonic, with an agreeable flavour and delicious smell, not one of which properties is possessed in any degree by the chicory root, it being rather aperient. Dr. Hassall regards chicory, therefore, as in every respect inferior to coffee, and observed that if its employment be deemed in any way desirable, it should be sold openly, and not as at present, under the names of Ceylon, Berbice, Costa Rica, Mocha coffees, &c. The paper, which contained many other interesting details, was brought to a conclusion by one or two hints addressed to coffee-drinkers, namely, that the coffee should be ground fine in order to facilitate the liberation of the essential oil, existing in the cells of the berry, and that an infusion and not a decoction of it should be made.

ROYAL DISPENSARY FOR DISEASES OF THE EAR.—The half-yearly meeting of this institution was held on Wednesday, at the Dispensary, Deanstreet, Soho, Dr Lightfoot in the chair. The amount of subscriptions received during the last six months had in some measure decreased, in consequence of the lamented death of the Queen Dowager; but it had also, on the other hand, contributor to the institution for a period of fifteen years. The numbers admitted of the various diseases of the ear amounted to 441 during the last six months, and 1193 had been discharged cured. The committee regretted the financial difficulties of the institution—difficulties arising not only in consequence of the circumstance above alluded to, but from the increasing number of applicants for relief; and they appealed to the benevolent and charitable to assist them in carrying forward their objects of the charity.

THE DIORAMA, REGENT'S-PARK.—On Tuesday Mr. Leifchild offered for sale, at the Auction Mart, the extensive and valuable property known as the Diorama, Regent's-park, and which, for the last twenty-seven years, has been one of the most prominent exhibitions of science and art. There were included in the estate the two grand pictures now on view, viz.—"The Castle of Edinburgh, on the Rhine," and the "Shrine of the Nativity, at Bethlehem." Together with all the costly and novel machinery connected with the exhibition (the invention of M. Daguerre), and the fourteen valuable properties which have been exhibited in those years, among which were "Paris" "Venice from the an Eruption," "Interior of Rhe ms Cathedral," "Paris," "Basilica of St. Paul, near Rome." &c. The pictures are severally rolled on large cylinders. Above £10,000 have been expended on the erection of the building, which contained an extensive saloon or gallery, the exhibition-room, &c. After some competition it was knocked down for

CARDINAL WISEMAN.—By letters from Rome we learn that at the consistory which is to be held early in the present month, the Archbishop of Cologne, and the Bishops of Breslaw and Olmutz, are to be promoted to the cardinalate Dr Wiseman, the present Bishop of the London district, will, at the same time, receive the like dignity, but mean the express reasons for which he resides in Rome, which he has consented to do. The Archbishop of Munich was to have been among the newly-created cardinals, but he could not comply with the required conditions of taking up his abode in the Eternal City. It is believed stated that the cardinal's hat will be presented to the Archbishops of Toledo and Seville.

FREE ADMISSION TO ST. PAUL'S CATHEDRAL.—The public will learn with satisfaction that the twopenny fee for admission to St Paul's Cathedral is really to be forthwith abolished, and entrance to be allowed at the west door, so as to afford an imposing view of the fine interior. Preparatory to this arrangement, the gate to the churchyard facing Ludgate-hill is being repaired, and a few other little improvements are in hand. This is in accordance with Sir George Grey's assurance in the House, in reply to Mr. Hume, that the free admission of the public was actually under the consideration of the Dean and Chapter.

VISIT OF PARISIAN EXCURSIONISTS.—On Sunday, a monster train, conveying no less than 1400 Parisians, on an excursion to the metropolis, arrived at the London-bridge terminus of the South-Eastern Railway. Every cab and means of conveyance in the station and vicinity proved inadequate, and a number of gentlemen were engaged to carry them to their destination in Leicester-square. The lengthy cavalcade, and the unusual appearance of the excursionists, the majority being of the working class, *en blouse*, and wearing beards, attracted much curiosity. The hotels and lodging-houses had not sufficient accommodation, and numbers had to be quartered in the Strand and vicinity. They remained in the metropolis till Tuesday.

THE CHEAPER SEASON.—Monday being the 5th of August, the sale of oysters, agreeably to annual custom, was opened at Billingsgate Market. The extensive importation of oysters from Jersey, which has continued unremittingly during the whole of the year, has served to detract much of the novelty from the well-known Billingsgate oyster-day and its juvenile accompaniments. "Please to remember the grotto," and, to use the apostrophe of an aged fish-fag, who was selling oysters on the departed glories of Billingsgate, "Things isn't as they used to was; nothing was thought of four or five being drowned oyster-mongering; but, what with them 'ere steam-ingins and other gimcracks, things go on anyhow."

In anticipation of the usual tumult and struggle to get on board the boats, Mr. Goldsmith had made every necessary arrangement to prevent loss of life and property; extra barriers were erected, and policemen stationed to preserve order. The Old Dock having been taken in for the improvement of the market now in progress, the fleet of oyster vessels, 30 in number, extended out into the bed of the river. At six o'clock, the bell rung for the market to open, and the rush of the hundreds assembled to get on board was tremendous, but no accident beyond entertainers occurred. By a rule of the market, every vessel is bound to display a board containing the description of oyster for sale. There were China rocks, barley royals, Milkons, natives, and commons, at prices varying from 8s. to 12s. per bushel. There were also a few real natives at 36s. and 40s. the bushel. Before twelve o'clock every boat had sold out and departed, and numbers who delayed their purchases till the afternoon came away disappointed.

FOREIGN CATTLE AND PROVISIONS.—The vessel *Magnet*, arrived from Amsterdam, has brought, besides 33 oxen and cows, 17 pigs, 444 sheep, nearly 96,000 cheeses, and a large general cargo of provisions, 142 calves, which is one of the largest importations that have taken place of this description of live stock, the produce of Holland

POOR LAW MEDICAL AND MORAL RELIEF.—From January 6 to December 31 (as appears from a parliamentary paper yesterday published) there were 4,343,352 money orders paid, amounting to £6,158,356 14s.

MONEY ORDERS.—From January 6 to December 31

BIRTHS AND DEATHS.—The number of births registered in the metropolis for the week ending Saturday last was 1484. The mortality of London exhibits a continued disposition to increase. The deaths which, in the three preceding weeks, were successively 781, 863, 898, rose in the week ending last Saturday to 917. In the ten corresponding weeks of 1840–49, the lowest number of deaths occurred in 1841, and was 759; they rose in 1846 to 1086, and during the prevalence of cholera last year they were 1967. The average of the ten corresponding weeks is 1091, or, augmented in the ratio of increase of population, 1114; compared with which latter number the return of last week shows a decrease amounting to 197. Small-pox carried off last week 12 children and a man above 60 years, and has been successfully vaccinated in his youth; measles was fatal in 11 cases; scarlatina in 20; hooping-cough in 18, croup in 6; thrush in 8, purpura in 2; infantile fever in 2; rheumatic fever in 1; paralysis in 32. With the exception of measles and scarlatina, which now destroy not more than the average number of lives, the epidemics mentioned show a fatality that differs little from the usual amount. The gradual increase of mortality that has been observed since the second week in June is due to the present data, is due to the diarrhœa chiefly prevailing amongst children, which is known to attend this season of the year, and which, if the conclusion may be drawn from returns of corresponding weeks of 1840-9, has increased since the latter date. Mild during later years has procured a mortality sixfold less amount which was common in the earlier. Last week the deaths from diarrhœa were 136, of which 123 occurred amongst infants under two years of age. These children not more than 12 had completed an existence in the world of twelve months. In the same week of 1846 there died 186 persons from diarrhœa, in that of 1847 the deaths were 111; in 1848 there were 141, and in 1849, 179. Last week eleven fatal cases of a more or less severe form of cholera were recorded; six occurred amongst young persons, and five at more advanced ages. The following are the circumstances in detail:—At Chelsea, north-west sub-district, at 5, Regent-street, on 30th July, the wife of a labourer, aged 47 years, died of "disease of the heart (several years), cholera, 22 hours." In St. Margaret, Westminster, at 2, Windsor-place, on 26th July, a labourer, out-pensioner, of Chelsea College, aged 70, died of cholera (3 days), spasmodic cholera (24 hours)." Mr. Nealand remarks that "deceased had lately been much overworked, was double ruptured, and frequently had relaxed bowels." In the same sub-district, at 25, Gloucesterterrace, Hyde-park-gardens, on 2nd August, the daughter of an upholsterer, aged 14 years, "cholera biliosa (24 hours), delirium (12 hours)." She was of a bilious habit, and had a severe attack two years ago. In Marylebone, at 15, Upper-Montagu-street, Montagu-square, on 1st August, the child of a painter, aged 7 months, "diarrhœa (3 days), cholera infantum (10 hours)." In St. John, Margaret, at 2, Samford-street, on 26th July, the widow of a labourer, aged 60 years, "cholera (3 days), exhaustion." In St. Pancras, at 89, Mary-street, Hampstead-road, on 31st July, the daughter of a chocolate-maker, aged 7 months, "cholera infantum (7 days), phrenitis (2 days)." At 15, Tindall's-buildings, Grays-inn-lane, on 31st July, the son of a labourer, aged 1 year, "cholera (3 days)." In Clerkenwell, at 8, Northampton-square, on 30th July, the daughter of a carpenter, aged 4 months, "English cholera (32 hours)." At 3, Pigeon-court, Houndsditch, on 30th July, the son of a clothes-dealer (deceased), aged 1 year, "cholerale diarrhœa (20 hours)." At 1, Hanover-court, Hanover-street, over two houses of which are situated in a small, confined court, contain two rooms each, without ventilation at the back, and are confined by a high wall on either side. The mother of deceased was twice severely attacked with cholera last autumn." In West London, at 25, Plough-court, St. Andrew's, on 28th July, a pot-maker, aged 51 years, "bilious cholera (3 days)." In Southwark, London-road sub-district, at 10, Kennington-green, on 2nd August, a printer, aged 56, "cholera (1 week), operation of the brain." In a considerable proportion of cases in the above list, the terms of the medical certificates, the ages of the patients, or the duration of their contingencies, seem to indicate only the common form of the disease. Against the 11 deaths from cholera last week it is necessary to state that there were 13 in the corresponding week of 1844, 23 in that of 1846, 24 in that of 1848, and 926 in that of 1849

METEOROLOGICAL OBSERVATIONS.—At the Royal Observatory, Greenwich, the mean daily reading of the barometer was above 30 in. on Tuesday and Thursday. The mean of the week was 29·859. The mean temperature of the week was 61·3°. The mean daily temperature was below the average of corresponding days in seven years on every day except Monday and Wednesday, when it was slightly above it.

Lady Peel and family have left Southampton for Jersey. Captain Peel has taken a house for two months in that island

DUNGANNON ELECTION.—The election of a member for Dungannon took place on Saturday, when Lord Northland, who had resigned, and is now at Brighton, was returned by the Conservatives without opposition. The opposition, the electors, it appears, not being satisfied with either of the new candidates.

The Earl of Dunraven expired on Tuesday morning, at Adare Abbey, in the county of Limerick.

THE TENANT-RIGHT CONFERENCE.—The first meeting of the tenant-right conference, to which public attention has been so long directed, took place on Tuesday in the City Assembly Rooms. The attendance was numerous, including several Roman Catholic and Presbyterian clergymen; and there were few localities of any note in the country which might not be considered as represented there, if the term "representative" could be legally applied to the assembly. At the commencement of the proceedings a discussion took place upon the resolution recommended by the preparatory committee that the press should be excluded from their early meetings, and it was ultimately determined that they should consider themselves for the present as sitting in committee; that reporters would not be admitted until the public meeting which should close their proceedings; and that in the meantime the secretaries should prepare an abstract of the daily proceedings to appear in the newspapers.

GREAT NORTHERN RAILWAY.—OPENING OF THE LINE TO PETERBOROUGH.

Amidst the large crop of railway schemes of a few years since, not the least prominent was the idea of forming a direct communication from London to York. Soon, however, came ruinous Parliamentary battles and the railway panic. Yet, with surrounding disaster and ruin, the idea of a direct communication between London and York still existed, and what is still more marvellous, existed in spite of no distant date has been placed beyond a doubt by the opening of the line to borough, a distance of seventy-six miles, which was inspected by the directors on the 2nd instant, and opened to the public on Wednesday

to-day, the 143 miles of line which the company have had at work have been in the position of local or branch lines disconnected with their trunk line to Peterborough, inspected on Monday, and opened on Wednesday, will now begin a connection with the metropolis, and the shorter routes will be made available for the traffic from Hull, Louth, Boston, and other points. There will also be by the same communication about nine miles of the journey between Peterborough and York shall have been completed, the saving in distance will be 30 miles. The present station for passengers is at the Regent's Canal, some little way down Maiden lane. It is on a level with the road, and in contion being to convert it into a general goods station when the traffic augments of it. A new passenger station will then be erected on the site of the London Fever and Smallpox Hospitals, at King's-cross, and in order to effect this, it will be necessary that the line should pass under the canal, a difficulty which it is proposed to overcome in a very ingenious manner.

OPENING OF THE GREAT NORTHERN RAILWAY.

THE LINE AT PETERBOROUGH.

The line from Maiden-lane to Peterborough had been certified by the Government inspectors to be fit for traffic; and, on Monday, in order to further the test of its efficiency, the Contractors invited the Directors to take a trip down the line, and satisfy themselves as to the manner in which the work had been performed. Accordingly, at nine o'clock, a party of about 400 gentlemen, filling altogether some 17 carriages, took their departure from the station in Maiden-lane. The equipment and general appearance of the train was peculiar. The carriages are all built of teak, by Mr. Williams, of Goswell-street; and, instead of being painted, the grain of the wood is polished and highly varnished, by which a great economy is effected both in the time and in the expense of construction. The internal fittings are of much the same character; the first-class carriages being quite as comfortable, though perhaps less showy than those on other lines, and the second and third being vastly better than anything of the same stamp.

The train having started, away it went in gallant style, and, dashing into a tunnel of some length, emerged shortly after, and went skimming along a region of corn fields. This sudden transition from the busy haunts of life to quiet rural scenery, undisturbed even by the presence of a villa, is what chiefly strikes one at first starting on the new line. A tumble-down viaduct of the Birmingham branch to Blackwall recalls the town for a moment; beyond this nothing meets the eye but indifferent farming and a thinly peopled country side. Passing Hornsey, which is the first station on the line, and going through a second tunnel, the train drew up at Southgate, where the station was decorated with laurels and a few flags, and where a few navvies and rustics had collected. Here at Colney Hatch, is a very large and handsome lunatic asylum building, which forms a very conspicuous object on the *route*. A third tunnel was passed, and the train reached East Barnet, to be again received in nearly the same manner as at Southgate. Thence to Potter's Bar there are no less than three tunnels; in fact, the works along the first fourteen miles are particularly heavy, there being besides the tunnels some very extensive cuttings. At Potter's Bar there was a faint attempt at firing a salute.

THE STATION AT HUNTINGDON.

been mustered at any of the stations. Again the train moved on, and, crossing the greensand formation, proceeded, by Biggleswade, Sandy, St. Neots, and Offord, to Huntingdon. Here there was a fair number of persons collected on the platforms, and the station, like most of those already passed, was decorated with flags and evergreens. The train then rushed through the low fen lands which lie in the direction of Peterborough. In no way are the fens seen to such advantage as from a railway train. The embankments formed for the permanent way enable the traveller to look down over a vast extent of plain, when one cannot help being struck with wonder and admiration at the even, sea-like surface of the soil, at the evidences of great natural fertility visible on every side, and at the thought that that land now beaming with vegetation, drained by steam power, and crossed by great railways, was once an immense lake, or, perhaps, a part of the ocean. Such are the real triumphs of civilization. The train, passing Holme, reached Peterborough shortly after half-past one o'clock.

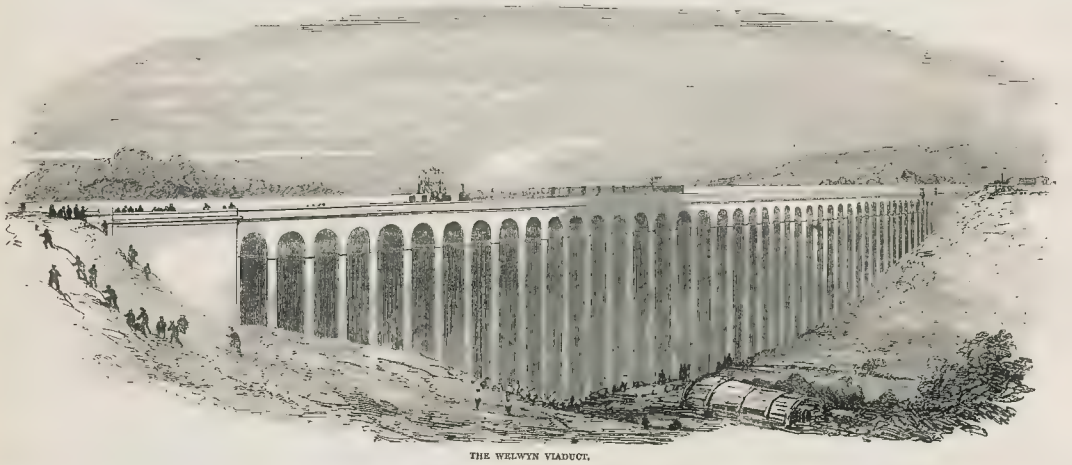
The line, which has been constructed under the superintendence of Mr. Joseph Cubitt, engineer-in-chief, and Messrs. Higginbotham and Ford, the resident engineers, appears, for a new line, to be extremely well consolidated, and well fitted for traffic; although the various stations—which are situated at Hornsey, Colney Hatch, Barnet, Potter's Bar, Hatfield, Welwyn, Stevenage, Arsley, Biggleswade, St. Neots, Huntingdon, Holme, and Peterborough—are as yet in a very incomplete state. At Peterborough, the line joins the loop-line of this company, which has for some time been opened, and, by means of it, proceeds, *viâ* Boston, Lincoln, &c., to the Knottingley Junction, whence it proceeds, over the York and North Midland, to York—a distance of 210 miles from London; being, according to *Bradshaw*, about sixteen miles shorter than the present route by the London and North-Western and Midland lines.

At about half-past two o'clock on Monday, the company at Peterborough, having been joined by Mr. Beckett Denison, M.P., the chairman of the company, who came over from Doncaster to meet them, sat down to a very elegant *dejeûner* laid out in the station, under the direction of Mr. Binney, of the Crown Hotel. The chair was taken by Mr. Denison, supported by Mr. Packe (the deputy chairman), the Directors, and a large number of directors and officials from other lines.

After the repast, the customary loyal and national toasts were drunk, and followed by "the Shareholders of the Company;" "the health of Mr. Brassey," "the Engineer-in-Chief, Mr. Joseph Cubitt;" "Mr. Beckett Denison, and the Directors of the Company;" "Mr. Packe, Deputy Chairman;" and "the Navvies."

The festivities of the occasion then terminated; and the company, at half-past four o'clock, took their departure for town, where they arrived in safety shortly after nine o'clock.

We have engraved three Views of Monday's proceedings, showing also three of the principal works upon the line—the magnificent Viaduct at Welwyn, and the Stations at Huntingdon and Peterborough.



THE WELWYN VIADUCT.

H.R.H. THE PRESENT DUKE OF CAMBRIDGE.

GEORGE-WILLIAM-FREDERICK-CHARLES, present Duke of Cambridge, K.G., G.C.H., and G.C.M.G., a Major-General in the Army, General Commanding in the Dublin District, and Colonel of the 17th Lancers, was born at Hanover, 26th March, 1819, the only son of Adolphus-Frederick, the late Duke of Cambridge, by the Princess Augusta-Wilhelmina-Louisa his wife, daughter of the Landgrave Frederick of Hesse-Cassel.

The Peerage honours his Royal Highness inherits are the Dukedom of Cambridge, the Earldom of Tipperary, and the Barony of Culloden, which were conferred on the late Duke, then Prince Adolphus Frederick, by his father, King George III., on the 27th November, 1801.

The title of Cambridge has been almost invariably associated with Royalty. The first personage who ever bore it was John de Avesnes of Hainault, uncle of Philippa, King Edward the Third's consort. His Lordship was so created in 1340; but engaging afterwards in the interest of France, he was deprived of the dignity. The next possessor of the title was Edmund Plantagenet, surnamed De Langley, fifth son of King Edward III., and with his descendants the honour remained until it became merged in the Crown by the accession of Edward Plantagenet, Duke of York and Earl of Cambridge, to the throne, as Edward IV. From that period, until the reign of James I., the Earldom of Cambridge continued dormant; but in 1619 it was granted by that Monarch to his kinsman, James, second Marquis of Hamilton, whose last surviving son, William, second Duke of Hamilton and third Earl of Cambridge, was slain at the Battle of Worcester, in 1651, when, as his Grace left no male issue, his English honours became extinct.

Prince Henry Stuart, surnamed "Henry of Oatlands," third son of King Charles I., appears as the next possessor, having been created, in 1659, Earl of Cambridge and Duke of Gloucester. His Royal Highness, who died unmarried in 1660, was the last who derived an Earl's title from Cambridge. A Dukedom, bearing the same designation, was conferred successively on four of the children of King James II., but they all died in infancy; and the ducal dignity was not again revived until 1706, when it was bestowed on George Augustus Guelph, Prince Electoral of Hanover, who became in the sequel King George II. Thenceforward it merged once more in the Crown, until his Majesty's grandson, George III., granted it to his youngest son, the late lamented Duke, in 1801.

The accompanying Illustration is copied, by permission, from a Portrait painted by Mr. Crowley, and in possession of his Royal Highness. A highly-finished print from this picture, the only portrait of the Duke, is about to be published by Messrs. Graves and Co., of Pall-mall.

HIS ROYAL HIGHNESS GEORGE WILLIAM FREDERICK CHARLES, DUKE OF CAMBRIDGE, K.G., G.C.H., &C., FROM A PICTURE BY MR. CROWLEY.

OSBORNE, FROM THE GARDEN.

IN some of the former Numbers of our Journal we have given representations of Osborne, sketched by the express sanction of her Majesty; and, in continuation of our series, we this week have the pleasure of giving a view of different character to any hitherto published, one from the garden, showing a portion of the building not before illustrated.

The entrance tower, with lofty campanile, is a conspicuous object, as is also the mass of buildings to which it is attached, and which, our readers will recollect, is the Pavilion, the portion more especially the residence of her Majesty; and the main building shown in our annexed Engraving contains a great number of rooms for the Royal Family, the household, &c.

The pleasure-grounds, or gardens, are very prettily laid out, and contain a profusion of flowering shrubs, and the more gaily tinted of Flora's treasures. The shrubs and dwarf trees, we should mention, are not entirely Royal additions to the beauties of Osborne, as great numbers of them, and especially those of larger growth—as those delineated in the foreground in our View—were planted by the former possessors of Osborne.

As we have stated in one of our former notices, the unassuming yet elegant character of Osborne is one of its most agreeable features; and, indeed, to our minds, this perfect simplicity, so opposed to regal grandeur, is proof of the high taste of refinement displayed by the Queen and Prince Albert in making this their retreat from the bustle of a London season.

OSBORNE.—THE GARDEN FRONT.

COURT AND HAUT TON.

THE COURT AT OSBORNE

The chief incident of Court life during the past week has been the celebration of the birthday of his Royal Highness Prince Alfred, on Wednesday last. On this occasion the usual annual *fête* was given by her Majesty and his Royal Highness Prince Albert to the servants of the Royal establishment, the workmen and labourers employed upon the estate at Osborne, together with their wives and families, and the seamen of the Royal yachts. The day was particularly favourable, and the ground, which was profusely decorated with flags and banners, had a very gay appearance. At three o'clock, the dinner, which was provided for 300, was carried in procession, preceded by the bands of the Royal Marines and an infantry regiment, by the Royal servants and the seamen, to a spacious marquée previously prepared, and, grace having been said by Mr. Toward, her Majesty's bailiff, the happy guests commenced their dinner. Her Majesty the Queen and his Royal Highness Prince Albert, with all the Royal children, accompanied by his Serene Highness Prince Leopold of Saxe Coburg, Count de Mensdorff Pouilly, and Count A. de Mensdorff Pouilly, and attended by the Ladies and Gentlemen of the Household, proceeded from the house as soon as the dinner was prepared, and visited the different tables. Immediately after dinner, Mr. Toward proposed the healths of "The Queen," "The Prince," and "His Royal Highness Prince Alfred," which were heartily responded to. Dancing then commenced, and the following sports and games in succession amused and employed the assemblage during the afternoon:—Cricket, quoits, jingling, or blind-man's buff, foot races, hurdle races, jumping in sacks, snapping at gingerbread and treacled rolls, bobbing in water for oranges, dipping in meal for coin, climbing greasy pole for leg of mutton, leap-frog, wheeling barrows blindfolded, the man wheel race, winding and unwinding string round pegs, football, whipping the monkey. At seven o'clock, the Queen and Prince Albert, together with the Royal Family and guests, who appeared highly amused with the sports of the afternoon, retired from the ground amidst the loud cheers of the hundreds assembled. It would be difficult to say whether the high spirits and enjoyment, or the orderly conduct of all assembled, was most remarkable.

Her Royal Highness the Duchess of Kent and his Serene Highness Prince Leopold of Saxe-Coburg closed their visit to the Queen and the Prince Consort on Tuesday, and returned to London.

THE ROYAL VISIT TO EDINBURGH.—A communication was received, on Monday last, by the Lord-Provost, from the Secretary to his Royal Highness Prince Albert, intimating that her Majesty is to arrive in Peterborough on the evening of Thursday, the 29th inst.; and that it is the intention of his Royal Highness to lay the foundation-stone of the National Gallery on Friday the 30th. According to the present arrangements, we believe that the Court will leave London on the 28th inst., and will proceed by railway as far as Castle Howard, the seat of the Earl of Carlisle, where the august party will pass the night. On the 29th her Majesty will proceed by the York, Newcastle, and Berwick Railway to Berwick, where the Royal party will honour by their presence the ceremony of formally opening the gigantic bridge over the Tweed, connect-

ling the above railway with the North British line, by which her Majesty will immediately continue her journey to this, her northern capital. It is stated that her Majesty will sojourn at Holyrood for a fortnight after her return from Balmoral.

Their Imperial Highnesses the Prince Peter and the Princess of Oldenburg, with their suite, have arrived at Torquay, with the intention of deriving benefit from the sea air.

His Serene Highness Prince Edward of Saxe-Weimar arrived at Ellis's Hotel, St. James's-street, on Saturday, from the Continent.

The Marquis of Douglas has arrived at the Clarendon Hotel, from Paris.

Viscount and Viscountess Combermere and the Hon. Miss Cotton have left Belgrave-square for Combermere Abbey.

Viscount Alford, M.P., and Lady Marianne Alford, accompanied by Lady Margaret Compton, have arrived in town from Italy, after an absence of twelve months in Egypt and the Continent. We are happy to learn that the health of the noble Viscount is quite re-established.

The nuptials of Miss Singleton and Lord Rodney were solemnized on Saturday last, at St. George's Church.—On Thursday, the Lady Caroline de Burgh, youngest daughter of the Marquis of Clanricarde, was married to Mr. Weyland, son of Major Weyland.—The Earl of Darnley is about to be united to the Lady Harriet Pelham, eldest daughter of the Earl and Countess of Chichester.

MUSIC.

Musical Events.—A concert will be given next Monday at Sadler's Wells Theatre.——Mr. John Parry will repeat his new Entertainment at the Music Hall, on Monday evening.——Mr. Sims Reeves will give a morning and evening concert at Reading, next Tuesday, assisted by the Misses Lincombe and H. Reeves, Mr F. Boddis, and Herr Kuhe.——The Gloucester Musical Festival will commence on the 10th inst., instead of the 17th, as previously announced.——Stephen Heller and Ernst have left London for Paris. The distinguished violinist will return to London in January next, to commence a tour in the provinces under Mr. Beale's direction.——M. Vivier's concert at Baden-Baden was to have taken place last Tuesday (the 6th); Mdlle. Lind was to sing at this entertainment, and then leave Germany, with Vivier and Benedict, for the concert at Liverpool, on the 16th instant (next Friday).——After the performance of Handel's "Messiah," on the 19th, at the Liverpool Philharmonic Hall, Mdlle. Lind will embark on the 21st, in the *Atlantic* steamer, with Benedict and Belletti, for the United States. M. Silas, the celebrated composer and pianist, is now at Liverpool, and will pass the winter in Edinburgh, where his distinguished abilities cannot fail to be appreciated.——Mdlle. Alboni is engaged for Stockholm. Vieuxtemps is also engaged for the same company. It is not yet certain whether Madame Sontag will visit St. Petersburgh during the season 1850-51.——The Grand Festival of the Netherlands Society for the Encouragement of Musical Art was given on the 29th ult., in the Haarlem Cathedral. The festival lasted three days, under the direction of Herr Van Bree. Mendelssohn's "Elijah" was executed on the third day, and, amongst the selections, were works by J. S. Bach, Hesse, Weber, Kreutzer, Verhulst, Klein, Kalliwoda, Zellner, Schubert, Schneider, Van Beek, &c. The number of vocal and instrumental performers amounted to about 600. The musical societies of Amsterdam and Rotterdam obtained the chief choral prizes.——The diploma of Doctor of Music, conferred by the University of Jena on Meyerbeer, was presented to the composer by five of the professors, having at their head Herr Karl Gottlieb Reissiger, the celebrated mathematician: the diploma was beautifully inscribed on vellum in letters of gold, ornamented with devices, and enclosed in a red morocco case, bearing the arms of the University, and the Latin inscription—"Jacopo Meyerbeer, musicæ arti in Borussia præfecto primario, operibus eximiis et elegantissimis non modo in patria, sed etiam apud exteras gentes celeberrimo, etc. etc., honoris causâ."——Madame Anna Thillon has been engaged for a novel musical entertainment, to be produced in the autumn in London.——A Scottish musical entertainment was given last Monday, at the Marylebone Institution, by Mr. and Mrs. Seguin and Mr. Macfarren.

Death of George Budd, Esq.—We regret to announce the demise of this well-known and much respected musical amateur, who expired at his house in Pall Mall, after a long and painful illness, on the 1st inst. Mr Budd was a surviving partner of the firm of Calkin and Budd, the booksellers, and for many years had studiously collected a very valuable musical library. Besides being a member of the Ancient Madrigal Society, held at Freemasons' Hall, Mr. Budd was one of the founders of the Western Madrigal Society in 1840, of which he was the honorary treasurer and secretary; he was also secretary of the Philharmonic Society. Mr. Budd has left a widow (a daughter of the celebrated Willman, the clarionet player), and a large family to lament the loss, in the early age of 44. His funeral took place on Wednesday, at St. James's Church, Piccadilly. Mr Budd was the composer of some glees and madrigals, and was well acquainted with the works of the ancient masters.

THE THEATRES.

HER MAJESTY'S.

The masterpiece of Mozart, the "Nozze di Figaro," was presented on Tuesday with unparalleled completeness. The text was rendered with perfect reverence of the author, and the lovely melodies with which the opera is imbued were interpreted without any supplementary ornament. Indeed, all embellishment has ever gracefully conceived or perfectly executed, mars the singular beauty of the *motivo*. The characters and the situations are so truthful, and the music apportioned to each personage is so sharply individualized, that, from the first intrigue, *Figaro* to the ardent *Cherubino*, from the gentle *Countess* to the fascinating *Susanna*, from the gay *Count* to the drunken gardener, ever, but reflects their special idiosyncrasies, and their very inner being, with their several emotions and designs are made apparent to the most unmusical auditor. To enjoy the music of Mozart exacts no contemporaneous knowledge; all that is required is a love for melody, and a sensitive ear for it. It goes at once to the heart, while it satisfies the senses—for Mozart sought not to astound the mind, or to surprise the ear. His plan was clear and unembarrassed, and each several part rose naturally till the culminating point was reached. The two grand finales have never been equalled in dramatic ingenuity or musical appropriateness. There is not a bar, the excision of which would not derange the perfect musical form. And then, what richness of orchestral colouring! what an almost instinctive knowledge of the constitution of each several instrument! how exquisite the combination! and how marvellous the entire harmony! The "Nozze di Figaro" is bathed in an atmosphere of beauty; it is perfectly Raphaelesque in its grace, its harmony, and its proportions. To render such a work with due appreciation, the *artistes* must not alone possess physical means for its vocal and instrumental embodiment, but must be also en rapport with a sentiment, a poetic feeling; and such a union of requirements is as difficult of achievement as it is delightful when secured. As a proof of the perfect triumph of Tuesday, we may cite the fact that all the solos, and they are infinite, were redemanded with enthusiasm. The finales were very finely performed, and the orchestral accompaniments were delivered with remarkable firmness and delicacy. Madame Sontag, who is the *beau ideal* of *Susanna*, was in brilliant voice; her lady-like and effective as the *Countess*; and Miss Catherine Hayes was perfect as the impassioned "Voi che sapete" with a rare tenderness. Coletti's *Count Almaviva* and Belletti's *Figaro* are admirably sustained, and Bartolo of Lablache is a per formance *per se* full of the ripest comic spirit and unrivalled in melodic potency. The recalls before the curtain were continuous as deserved; and the opera, from the first note to the concluding strain, was listened to with unalloyed satisfaction, and applauded with a fervour that was as honourable to the public as flattering to the performers.

The "Prima Ballerina," with its piquante *pas* and picturesque groupings, has not moulted a single feather of its brilliant plumage. Amalia Ferraris and Pasqua warded for her extraordinary talent with encores, recalls, and bouquets. The theatre, despite the approximating prorogation of the Houses of Parliament, has been fully and fashionably attended.

ROYAL ITALIAN OPERA.

Meyerbeer's "Huguenots" was given for the tenth time, on Saturday night. On Tuesday Grisi and Tamberlik appeared for the last time in Bellini's "Norma," the second and third acts of Auber's "Masaniello" coming the entertainments. On Tuesday, for the extra night, the "Prophète" was performed for the eighth time, with Mesdames Castellan, Formes, Marulli, Polonini, Tagliafico, and Mario in the principal characters. This night (Saturday) Sedlitz and Halévy's "Juive" will be repeated for the fifth time. The season is expected to terminate about the 24th instant.

HAYMARKET.

The Adelphi Company has been transferred to this house for a few nights. On Monday, encoredly, performed, "The Willow Copse," "Jack in the Green," and "The Double-bedded Room." Madame Celeste, Miss Woolgar, Mr. Hughes, Mr. Wright, and Mr. Paul Bedford, as usual, received the honours of the evening.

NEW STRAND.

A peculiar drama, in two acts, written by Mr. Shirley Brooks, was successfully produced on Monday. Its heroine is a spy-spy girl, named *Miriam*, or the "Dreamer of the Stars," who is substituted by a rascally attorney for the piece of real life-tempered client, the *Hon. Mrs. Armitage* (Mr. Farren, jun.) discarded his nephew, *Lieut. Ernest Dalton, R.N.* (Mr. W. Farren, jun.) *Hawkstone* finds it necessary to educate his new *protegée*; and *Dalton* contrives, through the attorney, to place his own wife in the post of governess to the secret is well kept. *Miriam* becomes a prodigy of accomplishments, and learns in early days received an important service from *Dalton*, cherishes a gratitude which ripens into love. Combining her affection to her instructress, the latter, though startled at the intelligence, still maintains her self-possession, and persists in obedience to her husband's injunctions. At length the fact is revealed, together with evidence which shows the nephew to be entitled to the property which the uncle is in possession. *Miriam* herself proves to be the [illegible] attorney, who surrenders to the officers of justice, for having swindled his client by fraudulently depositing their title-deeds for money borrowed on his own account. The first act of this piece sparkles with wit, attributed, however, without respect to persons, to all portions of the dialogue; the second is intricate in its circumstances, sentimental in its style, and unsatisfactory in its *denouement*. Mrs. Stirling was the heroine, and in the early scenes was pointed and brilliant; while *Katharine Dalton*, the nephew's wife, was very artistically supported by Mrs. Leigh Murray. Mr. Cooke, as *Crawley*, the attorney, was capital. Mr. Compton had a part of unmitigated drollery, in the shape of a college-bred butler, one *Barcilona Beanbrush*, who is satiated with inimitable zest and spirit. Mr Farren, as *Hawkstone*, acted admirably, and realised the situations with a spirit worthy of his best days.

Sadler's Wells will re-open on Saturday, the 17th, with the tragedy of "Hamlet."

NATIONAL SPORTS.

The turf fixtures for the ensuing week are confined to Wolverhampton, on Monday and two following days; Eglinton Park, commencing on Tuesday, and finishing on Thursday; Reading, on Wednesday and Thursday; and Boulogne, which will realise a fine English meeting, on Wednesday and Friday. Of these Wolverhampton and Reading appear likely to furnish a fair amount of sport; but Eglinton Park, with a large amount of public money, and the patronage of one of the most popular men on the turf, will be a failure, and for this reason, that south-country people will not go so far north to meet such animals as the Flying Dutchman and Elibron. The Boulogne authorities promise well, offer plenty of money, and may knock up a tolerable two days' sport.

The "Sons of the Thames" will derive amusement on Monday at the Richmond and Poplar regattas, and on Wednesday at the Hungerford regatta. On Monday the Royal Yacht Squadron (Cowes) and Manchester Regattas commence, and on Wednesday Bath and Rock Ferry (Mersey).

The Cricketer's calendar stands as follows:—*Monday:* The return match between Kent and England at Canterbury, and the Surrey Union versus the Paragon at the Oval, and a match at Copenhagen House. *Wednesday:* the Zingari Club against Gentlemen of Kent at Canterbury. *Thursday:* the Gentlemen of England versus the Gentlemen of Kent, at Canterbury, and an "All England" match at Hereford.

TATTERSALL'S.

Monday.—The Goodwood settling took up too much of the afternoon to permit of any extensive transactions on future events; we can, therefore, submit but a brief list of prices:—

BRIGHTON STAKES.

7 to 4 agst St Hon-alia (t)	4 to 1 agst Rebecca	6 to 1 agst Rhodyolna
	6 to 1 agst Beebee Bunnoo	

EGLINTON HANDICAP.

6 to 1 agst Cantab	8 to 1 agst Elcho	10 to 1 agst Clothworker

ST LEGER

6 to 5 agst Voltigeur	7 to 1 agst Cotherstone	7 to 1 agst Cluncher
	9 to 1 agst Pitsford	15 to 1 agst King of Oude.

Thursday.—No betting.

BRIGHTON RACES.—Wednesday

The Trial Stakes of 5 sovs each, with 25 added.—Major Martyn's The Moor (W. Abdale), 1. Mr. Carew's Buscot (Charlton), 2.

The Marine Stakes of 20 sovs each, with 100 added.—Mr. Payne's Catalpa (Goodhall), 1. Mr. Gratwicke's Exeter (S. Mann), 2.

The Brighton Stakes of 25 sovs each.—Mr. Dale's Fernhill (Bartholomew), 1. Mr. Osbaldeston's Minimum (Charlton), 2

The Town Plate of 50 sovs, added to a handicap sweepstakes of 5 sovs each.—Duke of Richmond's Quiver (S. Mann), 1. Duke of Bedford's Newport (Pettit), 2.

The Town Plate of 50 sovs, added to a sweepstakes of 3 sovs each.—Mr. Lewis's Michael Brunton (E. Sharp), 1. Mr. Howard's Tit-bit (Bartholomew), 2.

HUNTINGDON RACES.—Tuesday

The Hinchinbrook Plate of £50.—Mr. Rogers's Ballet Girl (Hammond), 1. Hon. G. Ongley's Camilla. 2

The Two-year-old Stakes of 10 sovs each, and 50 added.—Colonel Peel 2d Once More (Nash), 1. Mr. Wilson's Mosaic, 2.

Sweepstakes of 5 sovs each, and 20 added.—Colonel Peel's b c by Dromedary (Rogers), 1. Lord Sandwich 2d Nutbrown, 2

RIPON RACES.—Monday.

The Two-year-old Stakes of 10 sovs each, with 20 added Mr. Harrison's Trickatess (Holmes), 1. Mr. Barker's Valentine (Dickinson), 2

The Selling Stakes of 25 sovs each.—Mr. Ellis's Acomb (Osborn), 1. Lord Cardross's Scarborough (Nash), 2.

The Members' Plate of £50. (Heats) Mr. A. Johnstone's b c by Charles XII. (G. Gates), 1. Mr. Foster's Osbaldwick (Wakefield), 2.

COUNTRY NEWS.
